JACUTRA Java. See **JAKATRA**

JACINTO (San) a river U States Texas, which, after a S.E. course of about 100 m and receiving numerous affluents, as Big Dry Creek, Spring Creek, and Cypress river falls into the upper part of Galveston Bay It is partly navigable General Santa Anna was defeated by the Texans, and taken prisoner, on the banks of the San Jacinto, April 21, 1816.

JACKSON numerous places, U States, among which are—1. A tn., cap of Mississippi 165 m. N by W, New Orleans. It is regularly laid out, has a handsome statehouse, a governor's house, a penitentiary a U States land-office, two churches, a bank, and is connected with Vicksburg by a railway 45 m long. Pop. 2100.—2. A vil Louisiana, 124 m. N.W. New Orleans, with a college, three academies and two schools. Pop 932.—3. A vil Missouri, 196 m S.E. Jefferson city with a courthouse and jail &c. Pop 600

JACKSON (Port) Australia. See **STUART**

JACKSONVILLE, a tn. U States, Florida, in a rich and highly cultivated prairie, 89 m W Springfield, with a market and a courthouse a jail, four churches, lyceum, college, mechanics institute, an academy, a distillery, tannery, and mills of various kinds.

JACMEL, or **JACQUET**, a seaport, t. lal, and empire Hayti, S. coast, at the head of a bay of the same name, 28 m S.W. Fort-au-Francis lat (wharf) 18° 13' 30" N, lon 73° 56' W (L). The upper part, built on a rising ground, is usually named Belair in the lower part the streets are narrow It has a considerable trade, and is a place of call for the W India mail steamers The roadstead affords anchorage for 1

every description of shipping, but is exposed to S. winds, and a heavy sea sets in towards the shore Pop. 3000.

JACOB (St.) a hamlet, Switzerland. *See* BASEL.
JACOB *Pasos* (St.) a large thriving vil Holland prov Friesland 9 m. W Loosdrecht, with a Calvinistic church, three schools, and two breweries. Agriculture and cattle-rearing are the main occupations Pop. 3416.

JACOB *Isle* and one of the Sthls Islands, George III Atropelago Russian America, well supplied with wood, chiefly pine, larch, and cedar.

JACOBINA a to Brazil prov of and 219 m W N W Bahia 1 bank Itapicuru where it is joined by the Oco, here crossed by a bridge. It consists of a principal street which traverses the town through its whole length, and is intersected by several cross streets houses of stone. It has a parish church, and two other churches a Latin, and a primary school. The district though hilly has a great deal of excellent arable land, well adapted for the sugar-cane, cotton tobacco, rice, and millet. The orange, vine and guava also thrive admirably, and of the fruit of the last large quantities of marmalade are made and exported to Bahia. There is a considerable trade in agricultural produce, horses, cattle, and goats. Pop. dist. 10,800.

JACOBSTADT a tn. Prussia prov Pomerania gov of, and 37 m E Stettin on the N shore of a small lake. It is very old and a court of justice, a church, and a trade in cattle. Pop. 1619.

JACOBSTADT two places, Russia —1 A seaport tn. Finland, gov of and 53 m N E. Vasa, on a bay in the Gulf of Bothnia with a church, church-ovens and a small but well sheltered harbour at which a considerable trade is carried on, particularly in pitch, timber, butter and other provincial us. It has also a small building-dock. Pop. 1565 —2, A tn. gov Courland 1 bank Dwina 80 m E. S. E. Mitau, with three churches and several distilleries. Pop. 1443.

JACOBSTOWN two parts Eng —1 Cornwall 4554 sq. f. op. 467 —2 Devon 2840 sq. Pop. 255.

JACOTT A a tn Hindostan, presid. Madras, coast of, and 10 m N Cochin lat. 10° 10' N. lon. 76 14 E.

JACOVA or YAKOVA, a tn. European Turkey Albania, pach. and 67 m E. E. E. Soutari near the white Drin.

JACQUEMONT a tn. Hayti. *See* JACMES.

JACQUEL S. CARRIER, a river Lower Canada, which after a tortuous course, N. to S., through a mountainous and imperfectly-known country, falls into the St. Lawrence 24 m S.W. by St. Quebec. Its banks are very steep and its stream so rapid that it cannot be navigated even by canoes.

JACQUINOT ISLAND off N coast Papua, lat. 5° 24' S. lon. 144° 24' E. (a.) It has a very pleasant appearance, being agreeably varied by level beaches, scattered with clumps of cocoa-nut trees, and hills covered with shady woods.

JACUTI river Brazil prov São Pedro-de-Rio-Grande formed by numerous head streams in the W. part of the province near lat 28° S. E. flows S. and then E., receiving numerous affluents and falls into Lago dos Peixes. Total course about 300 m. much of which is navigable.

JADRAQUE, a tn. Spain, New Castile, prov Guadalajara, 1 bank Henares, 56 m N E. Madrid. It has a parish church, townhouse, prison, two schools, an old Capuchin convent, manufacture of linen and hempen tissues and a trade in corn, wine, wood and fruit. Pop. 1426.

JADFIN a tn. Kania gov and 113 m W Khasi 1 bank Sura. Pop. 1853 2078.

JAFNA a tn. Spain Andalusia, cap. prov. of same name, finely situated on a terrace-slope of Mount Castillo, near the S. bank Juen, 122 m E. E. Sevilla. It consists of an old town, formerly surrounded by a Moorish wall, flanked with towers, of which some well preserved remains still exist; and of a new town which stretching beyond the narrow limits of the old, has extended itself downwards and reached the plain. From the nature of its site, many of the streets are steep and those of the old town, in particular are very irregular narrow and winding. Those of the new town, on the contrary, are generally spacious, and most of the houses which line

them are not only substantial but often elegant. Not a few of them, particularly in the suburbs, have good gardens attached to them. The largest and best-built squares are those of St. Maria, San Francisco, and Mercado; and the Carrera, which stretches between the latter two, is the most spacious street. The principal buildings are the cathedral, a vast and magnificent structure, in the form of a Latin cross, with a fine facade, flanked by two towers above 200 ft. high, a richly-decorated interior, 500 ft. long by 150 ft. wide, with numerous pulpits and sculptured seven other which churches, several of them large and handsome, several suppressed convents, the buildings of which still remain, and form conspicuous objects. Four existing nurseries generally in large and handsome buildings, but occupied by few nuns—only about a dozen in each; the episcopal palace, college, museum, diocesan seminary superior and primary school general and founding hospitals, the theatre, the palace of Count Villar Don Pardo, the buildings of the Inquisition and the ball ring, only completed in 1847 and capable of seating 5000 spectators. The manufactures, not of much consequence include woollen and linen cloth soap, and brandy. There are also an extensive silk and numerous oil mills. The trade is chiefly confined to wine and articles of primary necessity, exposed at the two annual fairs, one of which lasts three, and the other nine days. Jaen is a place of considerable antiquity and several Roman remains have been found in it. Its present name was given it by the Moors, who made it the capital of the kingdom of Jaen the smallest of the four into which Andalusia was divided, and not so extensive as the modern provinces 1 17 267 — The ruins were founded N. by that of Ciudad-Real, E. Albaroz and Granada, S. Granada, and W. Cordova, is about 80 m E. to W. with a mean breadth of about 70 m. The surface is generally mountainous, being covered, in the N. by ramifications of the sierra Morena, in the S. by the mountains of Granada and in the E. by those of the sierra de Segura. The highest portion is in the W. on the frontiers of Cordova. The centre is occupied by a valley, forming the banks of the Guadalquivir, which receives all the waters of the province, directly or by affluents, the most important of which is the Guadameles. The lower districts are necessarily devoted to pasture, but the W. plains and lower valleys are fertile though not well cultivated. The forests have some excellent timber. The minerals, particularly argentiferous lead and copper are very valuable, and have long been worked extensively. For administrative purposes the province is divided into twelve districts. Jaen is the capital. Pop. 507 410.

JALN (Río del) a river, Spain Andalusia. It rises in the S. of prov Jaen in the plain of Angul in the sierra de Valdepeñas flows N. and joins 1 bank Guadalquivir, after a course of about 45 m.

JALN DE BRACACORNE a tn. Ecuador dep. Azuay cap. prov. of same name, in a mountainous region, 240 m. N. E. P. Guayaquil near the junction of the Chunchupe with the Marañon. Gold is obtained in the vicinity. Pop. 4000.

JAFPA or YAFPA [anc. Joppa] a maritime tn. Asiatic Turkey, pach. Damascus, in Palestine 81 m N W Jerusalem lat. 32° 3' 24" N. lon. 34° 44' E. (a.) It is picturesquely situated upon an eminence or promontory crowned by a castle, the houses and streets, all of which are narrow, ill paved, and dirty rising regularly above one another in tiers, and many of them crowded by flights of steps. It has a khan, large convent for the reception of pilgrims, some small churches and mosques a large citadel, with a roof resting on Saracenic arches, and a large soap manufactory. Jaffa still enjoys a considerable trade with the neighbouring coasts, in corn, fruits, cotton, and coral and exports large quantities of soap to Cairo and Damascus. Fish is plentiful, and excellent of its kind but, like provisions generally, is dear, and in the harbor there is a profuse display of the finest fruits and vegetables, more especially of famed water-melons. The harbor, which is close to the town, is nearly a long, narrow, shallow basin, enclosed by rocks and the roadstead is not safe even for the boats and vessels belonging to the country to the N. A little to the W. is the celebrated tower of Babel, 120 ft. in height, from which an extensive view is obtained. The monument is reached by a staircase within. Jaffa or Joppa is a very ancient town, having been a considerable seaport in the time of Solomon while there are traditions of

its existence long prior to this period. By St. Jerome it was called *Japha*, and in the time of the Crusades *Japha*. It was the port of Jerusalem and the landing-place of the cedar with which the Temple in that city was built. In 1799 it was taken, after a sanguinary siege, by Napoleon, who here put to death 1200 Turkish prisoners, who had broken their parole, and subsequently poisoned a number of his sick soldiers, on the plea that it was to keep them from falling alive into the hands of a cruel enemy. Pop. 5000.

JAFFATIAH, or **JAVVATIAH**, a group of five isls., Red Sea, the largest of which is 5½ m. long and very narrow, lat. 8° 37' 12" N lon. 54° 1' 30" E.

JAFFIEHUGUE, a town in Hindoostan, prov. Bengal, 1 bank Ganges, near the junction of the Aidi, about 42 m W by N Dacca.

JAFFNAPATAM, or **JAFFNA**, a town and fortress, on an island off the N W extremity of Ceylon, fronting Falk's Strait, lat. 9° 47' N, lon. 80° 2' E, 219 m. N Colombo. The town is built in the form of a pentagon and contains, besides the barracks, a few good buildings, and a Dutch church, which is made use of by the English. The town or *petah* about 1½ m. E. the fort, contains many large broad streets, lying parallel to each other and crossed at right angles by smaller ones; houses in general large and convenient, of one story, with very wide verandahs. It contains the Cutchery, a church belonging to the Tamil Protestant Christians, called St. John's, and a Wesleyan chapel, and has a trade in clove shells, Palmyra timber and tobacco which last is cultivated in the vicinity. It is about 1½ m. distant to a large and magnificent Hindoo temple. Pop. 8000.

JAGARAGA in Java. See **DIJAGARAGA**.

JAGATTY a river Persia, prov. Azerbaijan, rises about lat. 38° N, and flows N W till it falls into the E and of Lake Urmia. Total course, about 100 m.

JAGEPOOR, a town in Hindoostan, prov. Bengal, Orissa, dist. of and 35 m. N N E Cuttack, on bank Bytaria which during the rainy season, is here nearly 4 m broad. It is large and straggling, composed of thatched mud huts, contains numerous Hindoo and Hindoo mosques and was at one time regarded by the latter as a place of peculiar sanctity and has extensive manufactures of cloth.

JAGHENDORF or **KANSOW** a town in Austria, Salina, circle of, and 14 m N W Tropan cap. duchy of same name, beautifully situated at the foot of the Burgberg in the valley between the great and the little Oppa. It is walled has three suburbs, spacious well paved streets, a handsome parish church, with two towers 280 ft high, the loftiest in Salina, a stucco palace, townhouse, high school, Minorite cloister and hospital, and manufactures of woollen and linen cloth, bleaching, and a paper-mill. Pop. 4800.—The tower of Jaghendorf area 144 geo. sq. m., since 1630, has belonged to the prince of Liechtenstein. Pop. 40,004, almost all R. Catholic.

JAGO, par. Irel. Kilidare 1621 no. P. 256.

JAGO (S) several cities, isle. See **SARITAGO**.

JAGODIN a town in European Turkey, Servia, 55 m N W Nissa, near 1 bank Morava, containing about 800 houses.

JAGUANI, a town, prov. Minas-Geraes, on W slope of Serra de Mantiqueira, east of the road from Rio-de-Janeiro to the town of São-Paulo and Campinas, with a church, court-house, and prison, and a trade in cotton, hides, and leather.

JAGUARIBY a river, Brazil, which rises in the mountains of Boa-Vista a branch of the Cordillera of Hixapapaba, prov. Ceara, flows N till it reaches the town of São-João-do-Príncipe, when it turns first S.E., then N.E. passes the towns of São-Bernardo and Aracati, and about 19 m below the latter, falls into the Atlantic, about lat. 4° 8' S.; lon. 37° 30' W. Its principal affluents are the Baigado and the Rana-baite. Total course, about 460 m. The influence of the tide is felt beyond Aracati, to which ascending vessels can ascend, though with considerable difficulty, owing to sandbanks and other inequalities of depth. It is subject to extensive inundations.

JAGUARIFE, a town, Brazil, prov. of and 45 m. W S W Bahia, 1 bank Jaguaribe. Its streets are paved with tiles, and its houses are of earth. It contains a parish church, a Latin and a primary school, is the seat of an electoral college and residence of a justice of the peace and has some trade in bricks, tiles, and earthenware of its own manufacture.

JAHDE a small river Germany, duchy Oldenburg. It rises in the S of abbe Neuenburg, near Rastadt, flows N, and, after a course of about 15 m falls into a sandy bay on the N Sea, which, though of great width continues to take the name of the river Jahde.

JAHICOA, a town, Brazil, prov. Paraíba, 70 m. E.S.E. Oeiras, near 1 bank Itahim. It has three churches and, on Sundays and other festivals, when there is a great attendance of people from the country has a very stirring appearance, but on other days seems almost deserted. District of great extent and very fertile. Pop. 2000.

JAHJOW a town, Hindoostan, prov. Bengal, prov. of, and 15 m. S.W. Agra, the scene of two decisive battles, the first in 1656 when Dara Shikoh was defeated by his brother Aurangzeb, the second in 1707, when Shah Alim defeated Asim Lashan.

JAHNEVI a river Hindoostan, prov. Bengal, prov. Gurkhal, one of the early affluents of the Ganges which it joins near Gangpoot.

JAHNDORH a village Saxony circle Zwicken, ball and near Chemnitz. It is well built, contains a picturesque situated church, is one of the principal seats of the hosiery manufacture in Saxony, and has several mills. Pop. 1400.

JAJCZE, a town European Turkey, Croatia, 30 m S. Ban-Jelaka 1 bank Verba, here crossed by a stone bridge. It is walled, and defended by towers, and a fortress, and near it salt-petre is manufactured. Pop. 2000.

JAILUM or **JULUM**, **JULUM**, **JULUM**, or **DEWUR** (a Hindoo) the most W and probably the principal of the five great rivers that intersect the Punjab E. from the Indus. The eastern part of its course is somewhat erratic. According to Hügel, it rises near the extreme S point of Cashmere in about lat. 33° 33' N lon. 75° 40' E. whence it flows N W along the centre of the valley of Cashmere, the whole of which it drains, passing Shababad, Islamabad, Bernagar and some other places of note, till it falls into Lake Wallar or Wullar on the S W extremity of which it again issues, flows W S.W. and, finding its way through the low of Baranulla in the left range of the Hix-Pangul, enters the Punjab, about lat. 34° 10' N lon. 74° 40' E. From this point it flows W N W till it reaches within 3 m of Mansharwal, where it is joined by the Kishan Gunga, a stream of nearly equal volume, which rises in Bulit. Here it turns sharply S., and holds on a general S course till it falls into the Chenab at lat. 31° 10' N lon. 73° 10' E. 75 m N N E Mooltan. The whole course of the Jailum through the valley of Cashmere, before it finds an outlet through the Pass of Baranulla, is, including windings about 120 m. for 70 m of which it is navigable. It is navigable also from its junction with the Chenab up nearly to the emergence from the mountains. It abounds in fish, and is infested by alligators. En route course, about 450 m.

JAILUM or **JULUM** a town Punjab 1 bank river of same name, about 8 m N N P of the junction of the Khan, lat. 32° 2' N, lon. 78° 36' E. It is of considerable extent, and tolerably clean, though the streets are narrow and intricate. It is however, rendered unhealthy by the inundation which extends widely over the E bank of the river. A little above the town there is a ford, by which the British army crossed the Jailum, in December, 1839, on their return from Afghanistan.

JALME (Sax), a town, Venezuela, dep. Apure, on a height, 1 bank Portuguesa, 28 m N N W San Fernando lat. 8° 12' N, lon. 68° W with some trade. Pop. 7000.

JALPITZ or **ART JALPITZ** a town Austria, Moravia, circle of, and 10 m N N W Znaim on a height above the Gersowka, with a church, an old castle, and four annual fairs. Rock crystals, chalcodony, and other pebbles, are found in the vicinity. Pop. 1040.

JALTPUR, a town Hindoostan, prov. Gujerat, 20 m. N E Junagarh lat. 20° 42' N lon. 70° 48' E.

JAJARCOTE a town Nepal 256 m. W N W Khatmandoo lat. 28° 51' N, lon. 81° 8' E., cap. dist. of same name.

JAKATRA—1 A former kingdom, lat. Java, now divided into the Dutch provs. of Batavia, Batavia, Buitenzorg, Krawang and Praanger.—2 A former town, the cap. of kingdom, its site is now occupied by Batavia.—3 One of the divisions of Batavia.—4 A bay, N coast Java, into which falls a river of same name, also called *Juwang*.

The climate of Jamaica is in most places, exceedingly hot and unfavourable to European constitutions; but this is the case in the lower plains along the coast only for, on the high lands, the air is temperate and pure, and fever is unknown at an elevation of 2500 ft. while, even on the low grounds, the heat is greatly moderated by the cool sea-breezes which set in every morning about nine or ten o'clock. The mean summer heat is 80° in the shade, and that of winter is 75°. There are two rainy and two dry seasons. The rains last from May till July or August, and during October and November. The dry seasons occur between these periods. The sea and land breezes are pretty regular from the latter and of January until May. On the N side of the island, during the greatest part of July and the whole of August, the sea-breezes generally blow hard, with frequent squalls. On the S side, southerly winds generally prevail. The hurricane months are August, September and October.

The soil of Jamaica is so exceedingly various as to occasion very remarkable differences in the sort of its agricultural productions, it is not, on the whole, however, very fertile, being greatly inferior in that respect to Barbadoes. The indigenous vegetable productions comprise a variety of forest trees, the principal, mahogany, lignum-vita, iron wood, logwood, brazilwood, &c. some of which rise to a great height. The native fruits are numerous and many of them delicious they include the plantain, guava, custard-apple, pine-apple, cocoanut, sour-app, sweet-app, papaya, casheew apple, granddolla, and prickly pear. The orange, lemon, mango grape, breadfruit tree, and cucumber tree have all been naturalized in the island, and thrive well. The cultivated vegetable products and chief articles of export, are sugar, indigo, coffee, and a little cotton. The only native quadrupeds now remaining on the island are the agouti and monkey, although, when first discovered, there were several others, including the armadillo, opossum, racoon, and musk rat. Lizards are numerous and some of them very beautiful. The wild fowl are the ring-dove, the rice-bird of South Carolina, which visits the island in vast numbers in October, and parrot. Domestic fowls also flourish. Horned cattle of large size and males are numerous, the latter employed on the sugar estates, the horses being fit only for the saddle and harness. Sheep, goats and hogs are plentiful. The industry is excellent, but the wool is very inferior. Fish of all kinds abound on the coasts and in the rivers. The principal articles of export, besides those above named, are arrowroot, pimento, rum, ginger, cocon, logwood, molasses, and tobacco. The exports for 1848 amounted to £1,256,559 and the imports for the same year to £457,004.

The government of Jamaica is administered by a governor as executive and a legislative council appointed by the crown and a house of assembly elected by the freeholders of the island. The military establishment generally comprises four European regiments of the line, one W India regiment, a strong detachment of artillery and of colonial militia. The revenue for 1848 was £187,892 the expenditure £206,868. The Established church is provided over by a bishop, whose see extends over the Bahamas and Honduras. There are twenty-two rectories in the island and fifty inland curacies, eight stipendiary curacies, and ten curacies paid by the Society for the Propagation of the Gospel. The Scotch Presbyterian church has four clergymen, the Wesleyans, twenty-four ministers, the Baptists sixteen and the Moravians eight. Education is rapidly extending, there being eight free schools connected with the Established church, eighty-two public schools, nine free, forty-six Wesleyan mission, twenty-one Moravian one R. Catholic, two Jews, and thirty-three miscellaneous.

From the report of a committee appointed by the House of Assembly in Jamaica, in 1847, to inquire into the distressed state of agriculture in the island, the most distressing results would appear to have followed the passing of the British Slave Emancipation Act: the report stating that since then 140 sugar estates out of 655, and 465 coffee plantations, have been abandoned, and their works broken up; and that sugar as far from being a profitable manufacture, was attended with a loss to the cultivator of 7s 7½d per acre, the consequences of slave competition. Still the quantity of sugar manufactured has not greatly fallen off for in 1848, the yield was 42,468 hogheads—value, £1,218,514; and the average of five years, ending 1851, gives 41,978 hog-

heads—value, £206,913, the hoghead having fallen from £20 in 1843 to £18 since 1846. Labour is deficient the African population preferring to squat in idleness on waste or unappropriated lands and those of them who are more industrious being able to purchase lands on easy terms and thus become, after a sort, independent cultivators. The cholera visited the island in 1851-2, and carried off 40,000 people. Spanish-town the capital and Kingston, the principal ports, are united by a railway, the other chief ports are Mananga Bay, Falmouth, and Yacoa, on the V coast, and Moravia Bay on the E coast, besides which there are the smaller towns of Black River, Savannah la Mar and Port Morant, on the E coast, and St. Ann's Bay, Port Maria, Austitz and Antonio, on the N coast. Jamaica was discovered by Columbus in May, 1494 and was first colonized by Spaniards in 1503. It remained subject to the crown of Spain until 1655 when it was taken by the English and has since remained undisturbed in their possession. The aborigines have long ceased to exist, there having been no traces of them even at the time the island was taken from the Spaniards, nearly two centuries ago. Pop. (1848) 877,483. (See SUPPLEMENT.)

JAMAICA a vll. U. States, New York 12 m. L. New York city on the Long Island railroad It has five churches, a female seminary and manufactures of pianofortes, carriages, &c. Pop. 8781

JAMARI or CAMDEAR, a river, Brazil prov. Mato Grosso. It rises in the N slopes of the Serra Parana, flows N W and falls into the Madeira, about lat. 8 40' S., lon. 63° 20' W. Total course about 300 m.

JAMBE, a vll and com. Delapin, on the Meuse, opposite to and properly a suburb of Namur, with manufactures of tobacco and cigars, a salt-refinery, a brewery and two distilleries. Pop. 1778

JAMBH, or JAMBES, a tn Sumatra cap state or dist of same name on both sides of the Jambh R. E. side of the island lat. 1 32' S. lon 108 35' E. It is about 8 m. in length and consists chiefly of marsh lands and bogs, intersected with a few of a superior description. The principal exports are dragon's-blood, benzoin, and rattan imports—coarse European and Chinese ware, opium and Siamese salt. The trade is almost wholly confined to Singapore.—The district is flat and swampy on the sea coast, but rises as it recedes from the shore.—The river, formed by the junction of several streams about 20 m. above the town, flows thence N E and falls into the China Sea, about lat. 1 S., total course about 100 m.

JAMBURG, a tn Russia, gov of and 69 m. S.W. St. Petersburg cap circle of same name, r. bank Luga, here crossed by a long wooden bridge. It has a large octagonal market-place adorned with an obelisk, three churches, manufactures of woollen and linen cloth, cannet, and silk, honary glass-works, sawmills, and some transit trade. Pop. 1500

—The climate is well wooded and well watered but only of indifferent fertility. Area, 883 geo sq m. Pop. 48,006

JAMES.—1 A large bay forming the S E. extremity of Hudson's Bay British America, extending from lat. 51 to 55° N. lon. 78° 25' to 82 30' W. length, N to S. 280 m., breadth, 75 m. to 170 m. It is situated with numerous islands, of which the Arctica and the Charlton are the principal and receives the R. Main, Rupert, Moose, Albany and other considerable rivers.—2, An isl. Pacific Ocean, one of the largest of the Galapagos, about 16 m. E. Albemarle Island lat. 0° 12 6' S., lon 90° 55 45' W. It is about 20 m long by 20 m broad of volcanic origin mountainous and barren, and on its W side has an inlet, called James Bay. Its coasts are frequented by great numbers of seals and crabs, and the interior swarms with colonies of a large size.—3, A British fort and station, W Africa, on the Gambia, lat. 4, A British fort, W Africa, belonging to the settlement at Sierra Leone on the Gambia coast lat. 5° 30' N lon 0° 12' W

JAMES RIVER U States Virginia, formed by the union of the Jackson's and Cowpasture rivers, in the Alleghany mountains, whence it flows E. to the entrance to Chesapeake Bay having previously expanded in an estuary of considerable width. It is navigable for 40-guns ships to Jamestown, 32 m from its mouth, and for vessels of 120 tons to near Richmond, 48 m further up

JAMES (Sr) and Sr PAUL, two par. Eng.—1 Glou cester, 480 ac. Pop. 7885—2 Kent, 199 ac. Pop. 8833.

JAMES (Str.)—1 A tn. France, dep. Manche, 12 m. N. by E. Avranches. One of the strongest fortresses in the country was built here by William the Conqueror and remained in possession of the English till 1448. The manufacture consisted of cloth well known as the drop-de St. George, drapery, &c., and there is a considerable trade in corn, cattle, sheep, thread and flax, particularly the last. Pop. 1989.—2, A mpe, Anom. S. coast lat 10° 1'. N. lon 107° 5' E.

JAMESTOWN—1 A tn. Ireland, co. Leitrim 3½ m. S.E. Carrick, on the Shannon, here crossed by a bridge of seven arches, and formerly a fortified town. Pop. 212.—2 A tn. 1 State, New York, 287 m. W by S Albany with four churches, an academy and various manufactures.—3 A former city 1. State, Virginia, on the James River 8 m S.W. Williamsburg, but now in ruins. Here, in 1608, the first English settlement in the U States was made.—4 The cap. of St. Helena.—(check acc)

JAMULANA, a tn. Spain, Andalusia prov. of and about 7 m from Jaen, at the W extremity of the sierra of same name, houses almost all of one story but built with considerable regularity. It has a parish church, courthouse, 17 prison primary school manufactures of linen and white soap, and a trade in corn, oil, and wine. Pop. 1417

JAMULANA, a vil. Bohemia circle Chrudim. In a mountainous district about 30 m from Leitomsch. It has a chapel and a school. Pop. 1102

JAMULANA, a tn. Austria, Moravia, circle of and 25 m. N.W. Zuden on a height above the Zolotawa, with a castle, four churches, a synagogue, and two breweries. Argentiferous lead is worked in the vicinity. Pop. 1440

JAMULANE, a vil and com. Belgium prov. Luxembourg on the Semois, 18 m. W. Arlon, with a salt furnace on an oil a saw and three flour mills. Pop. 1217

JAMULU, or **JUMULU**, a tn. Punjab among the mountains, on an affluent of the Chenab 87 m. N. by E. Lahore. It has a handsome palace a large and well-supplied bazaar and a fort. The rajah has a beautiful and extensive pleasure-ground and in the vicinity are numerous and extensive ruins. P. 8000

JAN (Str) ad W. Indies See **JOUAN (Str)**

JAN MAYEN or **JEAN MAYEN** an isl. Arctic Ocean, 150 m from the coast of F. Greenland, frequented by sea-fort boats and whalers. It is a mossy mountain in this island, 6870 ft. high is in lat. 1° 4' N. lon. 7° 30' W. There is also a volcano, 1500 ft. high, an eruption of which occasionally takes place. It was discovered in 1611 by the Dutch navigator Jan Mayen

JAN-RENNEL ISLAND, of the W. LANDS, an isl. Holland prov. N. Holland, in the 1½ m. S. Zealand. It is uninhabited, marshy and covered with reeds

JANA (L), a tn. Spain, Valencia, prov. of and about 40 m from Castellon-de-la-Plana, a bank Cerrol. It is old but, on the whole regularly built. has a modern parish church, townhouse with prison, hospital boys and girls school manufactures of white soap, three distilleries, a trade in fruit, wine, and oil and a much-frequented fair which lasts three days. Pop. 1244

JANE ISLAND one of the Carolines, N. Pacific Ocean lat. 7° 33' N. lon. 156° 3' E. It is dangerous to approach in thick weather being very low. Extent, about 4 m. It produces coconuts and breadfruit

JANEIRO, in Brazil See **RIO-DE-JANEIRO**

JANETOWN, a vil. Scotland, co. Ross, par. of, and 1 m S.W. Lochmorton. Pop. 513

JANINA, **JANINA** **JOANINA**, **YANINA**, a tn. Turkey in Europe, cap. of prov. Albania, peak of same name, 425 m. W S.W. Constantinople lat. 39° 49' N. lon. 21° E. beautifully situated on the margin of a lake of several miles in extent and stretched along the greater part of its W shore.

The streets are tortuous and ill paved and many of the houses, particularly in the outskirts of the city are wretched mud-built cottages. The habitations of the middle ranks make a nearer approach to comfort, being constructed of wood with a small open gallery under the projecting roof. The dwellings of the higher classes partake more of an oriental character being quadrangular structures surrounding an open court, and having wide galleries running round the sides, but almost destitute of windows towards the street. The houses, as in all other Turkish towns, have a lively and bustling appearance, and consist of ten or twelve streets, intersecting each other at irregular angles. Each house is appropriated to the sale of one particular description of goods and those selling jewellery and articles of dress are richly and abundantly furnished. There are sixteen mosques in the town, each standing on an open space of ground, and generally surrounded by large yppresses; there are also about seven or eight Greek churches. In front of the town a plain mala stretches into the lake and terminates in two distinct promontories of rock, on one of which stands a large Turkish mosque, with a lofty minaret and extensive piazzas, and on the other the old seraglio of the pasha of Janina. The whole of this peninsula is fortified, and is insulated from the city by a lofty stone wall and moat. A considerable amount of trade is carried on here. The chief article of importation is cloth of French, German, and English manufacture. The articles of exportation are—oil, wool, corn, and tobacco, for the Italian ports and for inland circulation through Albania and Roumelia. spun cottons, stocks of guns and pistols, mounted in chased silver unadorned velvet, stuffs, and cloths. The banks of the lake are studded with numerous objects of a picturesque description, while the lofty mountains, nearly 5000 ft. high, by which it is surrounded and which stand abruptly and majestically from the water's edge, directly opposite the town, impart to the whole scene a singularly grand and imposing appearance. The lake is of no great depth, and at either extremity, terminates in low marshy land. During the life-time of Ali-Pasha, Janina enjoyed a great degree of prosperity and its population was computed at 50,000 but since his death in 1822 the town has fallen off very much and now numbers, according to some authorities, 20,000 according to others only 10,000 inhabitants.

JANOS (Szabo) a vil Hungary Thither Thesus, co. Bi has on the White h. vis 4 m from Gireswardeis, with a Protestant parish church. Pop. 1167

JANOSDA a vil Hungary Thither Thesus co. Bihar dist. of and 6 m from Kistanya. It has a Greek non-united parish church. Its inhabitants are Wallachians. Pop. 1000

JANOSHAZA a market tn. Hungary Thither Danubus, co. Eszemburg, near the Marcell 12 m N.W. Somegh. It has a church, synagogue, and a trade in tobacco, chestnuts, other agricultural produce, and poultry. Pop. 2200

JANOSI several places, Hungary particularly —1 J-Kosztol a vil Thither Thesus, co. Southern dist. of and 89 m E. Nyik-Bator, with two churches and a synagogue and a trade in corn wood, and wine. Pop. 1732 —2 A vil Thither Thesus co. Gümör on the Rima, 3 m from Munkacs-bath with two churches and an abbey. Pop. 878.

JANOWITZ, several places (army particularly —1 *Alt-Janowitz*, A vil Prussia, prov. Posen, cov. of, and 24 m. S. S.W. Lagnitz, on both sides of the Biber, here crossed by a stone bridge with a church and a castle, paper, saw and other mills. In a beech forest in the neighbourhood are the ruins of three old castles. Pop. 1148 —2 A tn. Holstein, circle of, and 7 m S.W. Klatzen on the Angel, at the confluence of the Dilschewitz with a church school, synagogue a paper and other two mills and a trade in wood. Pop. 1210

JANSJORE or **JOUNSJOER** a vil Bohemia, circle Chrudim, 6 m from Leitomsch, on a small stream, on the frontiers of Moravia, with a church, school and two mills. Pop. 1289

JANILIA, a river European Turkey Bulgaria. It rises in the N. slope of the Balkan mountains flows N. into the Danube, 25 m. S.W. Rusechuk, after receiving several affluent, of which the Perakto, Raltar, and Rusalina are the chief and a total course of above 60 m.

JANUARIA or **BOBART**, a tn. Brazil, prov. Ceara, in a plain watered by the Araro, 120 m. W.N.W. Fortaleza. It contains two churches, two primary schools, a courthouse, and prison, and has a trade in cotton, and raw and dressed hides.—The district, which is of large extent, is fertile, but suffers much from drought in the dry season. The sugarcane, however, is extensively cultivated particularly near the soutra Marauco and large quantities of wine are made. Some gold also is obtained. Pop. of dist. 15,000

JANUARIA, a tn. Brazil, prov. Minas-Geraes, near the streams Pardo and Preto, each of which is here crossed by a bridge, 150 m. N. Minas Novas. The houses are built of unburned brick, with a framework of wood, and the only

buildings deserving of notice are the townhouse and prison. The trade is chiefly in horses, timber, and cotton. Pop. of dist. 6000.

JANUTZPOL, a tn. Russia, gov. Volhynia, dist. of, and 36 m S Jitomir. Pop. about 1000.

JANZE, a tn. France, dep. Ille-et-Vilaine, 18 m. S.E. Rennes. It has manufactures of sailcloth, and a considerable trade in poultry—known as the *poulaillerie de Rennes*. P. 1877.

JAPAN (*Nippon* or *Nippon*) an island-empire in the N. Pacific Ocean off the coast of China, consisting of a archipelago, comprising three large mountainous and volcanic islands—Niphon, Kikoo, and an immense number of smaller, of which the most important are Hodo, Tsushima, Awaki, Tanegashima, Yki Yakima, and Oshima, with the groups Okinawa, Gotoama, and Koshikama, forming Japan proper and the large island of Yesso N. of Niphon, and separated from it by the strait of Sangar or Matsushima, with the S. half of the island of Taraka Krafu or Baghalla, and the larger and more S. Kurile islands, forming a dependency, called the provinces of Matsuei. Including the dependency of the Loo-Choo islands, Japan extends from lat. 34° 18' to 50° N. and lon. 128° to 151° E. being about 38° of lat. and 23° of lon. It is bounded N. by the Sea of Okhotsk, E. and S. by the Pacific Ocean W. and N.W. by the strait of Corea, the Sea of Japan and the Gulf of Tartary. The following table gives a general view of the extent of the empire, and of the number of islands of which it is composed—

| Principal Islands. | No. of small Islands. | Area in sq. m. |
|-----------------------|-----------------------|----------------|
| JAPAN PROPER— | | |
| Niphon | 1,269 | |
| Kikoo | 1,118 | |
| Saikoo | 436 | 87,804 |
| Yki | 201 | |
| Tsushima | | |
| DEPT. ISLANDS— | | |
| Yesso | 83 | 20,728 |
| Kurile | 48 | 1,138 |
| Kafu or Baghalla | 47 | 11,184 |
| Islands near group. | 89 | 89 |
| Loo-Choo Islands | 83 | 8,010 |
| | 3,881 | 182,758 |

The population is variously estimated at from 15,000,000 to 50,000,000. The state of our information, in almost every particular respecting this extensive empire, is very imperfect and unsatisfactory.

Physical Features.—The largest island, Niphon or Nippon, is upwards of 700 m. long N. E. and S. W. breadth varying from 60 m. to 100 m. Kikoo separated from Niphon by a channel, which in one part, is narrowed to 3 m. width, is about 200 m. long N. to S. and 120 m. broad. Kikoo the third and smallest of the three principal islands, is 140 m. long by 60 m. broad. It lies E. of Kikoo from which it is separated by the strait of Bounge which, throughout its extent, is limited by the W. coast of Kikoo and its narrowest part is not more than 10 m. broad. The straits to the N. and E. which divide Kikoo from Niphon, are scarcely broader, while they are so thickly set with small islands that the passage is frequently not more than 1 m. wide. Yesso is of a triangular form, the sides of which are respectively 800 m., 860 m., and 590 m. in length. It is separated from the Niphon on the S.E. by the strait of Sangar about 8 m. broad in the narrowest part. W. of Niphon lies the important island of Hodo, between Cape Noto and Russian's Cape, it is supposed to be about 45 m. long, and 21 m. to 24 m. broad. The narrowest part of the channel separating it from Niphon, is about 30 m. wide. No European navigator has ever yet visited this island. The coasts of the larger islands are extremely irregular, being deeply indented with gulfs, bays, and inlets. The surface, also, is generally uneven and, in many instances, rises into mountains of great elevation. This is especially the case in the island of Niphon, which is traversed throughout its whole length by a regular chain of mountains; the highest peak of which, *Fuji*—a dormant volcano, covered with perpetual snow—is 12,000 ft. high but the elevation of the range is in general so low as to admit of cultivation up to the water-shed of its streams. The Japanese islands form a part of the line of volcanic action

which commences in the N. with the Aleutian Isles, passes through the Philippines, Sumatra, and Java, to Sumatra, and then, in a N.W. direction to the Bay of Bengal. The volcanic vents, which indicate the direction of the line, are numerous in Yesso, Niphon, and Kikoo earthquakes, often causing great devastation, are of frequent occurrence in Yesso some dreadful eruptions have occurred—once, in 1783, destroyed 23 villages and the volcano of Wumatsake, one of five active in the island of Kikoo is the terror of the surrounding inhabitants—an eruption of it, in 1792 having destroyed 68,000 people. The prevailing formations in these islands are trachyte and basalt, plastic clay marl, and slate occur in various localities, and there are whole mountains of porcelain earth. The metallic wealth of the empire is and to be very great, comprising gold, silver, copper, tin, lead, and iron. The island of Hodo is particularly mentioned as rich in gold. Both the tin and copper of Japan are considered to be of very superior quality. Coal is found in various parts; sulphur abounds, thermal and mineral springs are of frequent occurrence, and ambergris met with on some of the shores. Bureaux are numerous in Japan but have very short career, and are, for the most part, rather torrents than rivers. Of the lakes too little is known to warrant any attempt at giving an account of them.

Climate.—The climate of Japan though extremely various—being intensely cold in the N. and about as warm as the S. of France in the S.—is, on the whole, much milder than its latitude would indicate owing chiefly to the influence of the surrounding ocean. A remarkable difference of climate exists also between the E. and W. shores; the cold, during the rigorous season, when this difference is most perceptible, being more intense on the latter than the former, owing to the proximity of the Asiatic continent, the low temperature of which has a material effect on the climate of the W. coasts of the large islands nearest it while the E. coasts are protected from the cold continental winds by the lofty central ridge of mountains that traverses the islands, N. to S. In Kikoo, and the S. parts of Niphon the thermometer ranges between 32° and 104° Fahrenheit, 80° being the average in the middle of summer, and 85° in the coldest month of winter. In lat. 33° N. ice is formed of several inches in thickness, in lat. 36° the lakes are covered with a sheet of ice, and in 88° to 89° the ice becomes so thick that the rivers may be crossed upon it, while in Yesso, near Cape Soga, lat. 45° 21' N. wheat yields but a poor return and winter is so severe as to drive the savage but vigorous Amos to the protection of caverns. Rain is very frequent, hurricanes and storms also occur often, and are sometimes very violent.

Vegetation.—Partaking, as the climate does, of the advantages and disadvantages both of the torrid and of the temperate zone, the vegetation of the islands is exceedingly various. The palm, banana, bamboo, bigonia, and myrtle, flourish in the S., while in the N. more especially in Yesso and Baghalla, oaks and junos abound but sweet oranges, pomogrates, pears, apricots, peaches, many plants known in botany as Japanese, and above 600 of the principal ornamental and useful plants, are of foreign origin, having probably been introduced from Corea and China. The emperor of various trees are indigenous. The soil of Japan is actually fertile, but the patient industry of the agriculturists, favoured by the general climate, has covered with vegetation every spot capable of bearing anything. In the S. the sugarcane is cultivated with success, and rice yields two harvests, and constitutes the chief article of food. According to situation wheat and barley are also grown to a limited extent, and buckwheat, soy, potatoes, melons, pumpkins, and cucumbers, in great abundance. Ginger, pepper, cotton, and tobacco, are also cultivated in considerable quantities, and there are extensive plantations of the tea plant—yielding, however, a produce inferior to that of China.

Zoology.—Buffaloes and swine are common, but are used only for sustenance and agricultural purposes. Horses of various breeds—and, though small, and to be very excellent—are numerous, but are only used for the saddle, and that by the nobility. There are neither asses, mules, elephants, nor camels, and sheep and pigs are few. Small bears, hares, deer, hares, and immense numbers of foxes, are among the principal wild animals. Dogs are common, and are held

marred but, though cats exist in thousands, and are esteemed great favorites with the Japanese ladies, yet the country is stated to be over-run with rats and mice. There is a great variety of birds, including falcons, which are much esteemed pheasants, ducks, geese, teal, storks, penguins, ravens, larks, pelicans, cranes, herons &c. Snakes are not unfrequent one species of which, the *Orobanch* attains an enormous size. There are also tortoises and lizard, scorpions, centipedes, and the insect faun is innumerable. The cats abound in fish which are taken in great quantities, and form the chief subsistence of the inhabitants.

People Religion and Language—The Japanese belong to the great Mongol Tartar family and are distinguished, like all the other branches of this stock by broad skulls and high cheek bones, small black eyes, obliquely set long black hair and a yellow or sallow oval complexion. Some are good-looking and many are well made, active, and valuable. Se-

JAPANESE TOWN'S PEOPLE.

From Richard Andrieux parache: usage des Japon.

build divides them into inhabitants of the coasts, inhabitants of the country, and inhabitants of the towns all of which he alleges, differ in physical appearance, language, and manner. They are divided into eight classes—princes, nobles,

JAPANESE COUNTRY PEOPLE.—From Richard.

princes, soldiers, civil officers, merchants, artisans, and labourers—which are kept distinct, with all the strictness of caste, each person following invariably the profession of his fathers. Their principal moral characteristics are skill per-

severance, courage and frankness; with much good-humour, natural politeness and courtesy of manner. The latter qualities are particularly observable amongst the agricultural population, who are, besides, industrious, temperate, and hospitable.

The Japanese dress consists of loose garments of silk or cotton. The men of the higher orders wearing a kind of petticoat-browsers, and those of the highest rank two swords. They wear no hats, except in rainy weather; and shave the whole front and crown of the head, forming the rest into a tuft on the bald skull. The women, again, wear their hair very loose with numerous costly ornaments of tortoise-shell but none of any other material. They destroy their natural complexion with paint, colour their lips purple and when married, blacken their teeth and pluck out their eyebrows. Polygamy is not practised, although the moral code of the Japanese is not otherwise by any means, particularly rigid. Various laxities being indulged in without scandal. All are slaves to custom, and ridiculous, often oppressive, etiquette. The established or state religion is that of Buddha, although another and older form also exists, called Shinto or Shu-Sin (faith in gods, or way to gods). The priests of this sect are allowed to marry. The language is polysyllabic, and has an alphabet of 47 letters which are written in four different forms one of which is used exclusively by men, and another by women.

Manufactures and Trade—In manufacturing industry and ingenuity the Japanese are, at least, equal to the Chinese. Their works in copper, iron, and steel bear a high character. Telescopes, thermometers, watches and clocks, of good quality are made at Nangasaki: one of the five imperial cities, on the W coast of the island of Kjusiu. Glass is made, but not very successfully. Silk and cotton cloths are manufactured and porcelain, said to be superior to that of China. The art of japanning, as it is called with us or more properly lacquering is practised with great success and specimens are produced far surpassing in brilliancy and splendour any that are ever seen in Europe. Good paper is made from the bark of the mulberry and other trees and carriages from the fibres but neither ship-building nor house building are well understood. The houses are almost universally constructed of timber plastered on the outside and consist of two stories divided into rooms by slight paper partitions. Foreign commerce has been hitherto rigidly limited to the Dutch and Chinese but the traffic of the former does not at present exceed 270,000 per annum—two vessels only being allowed to remain in the harbour (Nangasaki) at a time. The importations of the Dutch into Nangasaki consist chiefly of wax, spices, ivory, beads, quicksilver glass wares cotton linen, and woollen goods, for which they take back copper, japanned or lacquered ware, porcelain, and camphor. Silk, tea, and dried fish, are amongst the chief imports of the Chinese who also take in return the articles above enumerated. Both the coasting and internal trade of the empire are, however extensive.

Government—The government is a hereditary absolute monarchy shared between two sovereigns, the one ecclesiastical, called the Mikado or Dairi Sann, who resides at Miako the other military called the Shogun or Yoban, who resides at Yeddo the capital. The latter is the true sovereign, as regards the civil government, the former being merely a secondary personage although in possession of the entire superintendence of religion and education and surrounded by officers, who treat him with almost divine honours. The Shogun or principal ruler who resides at Yeddo, is assisted by a council of five hereditary princes and by a senate, which forms the legislative body and decides in all civil and criminal cases. The empire is divided into 8 great circles or Doo, and these again into 68 provinces, subdivided into 653 districts, governed by officers appointed and dependent on the Shogun, whose power is thus at once extensive and absolute. The principal towns are Yeddo the capital, on the island of Nippon, Miako and Obomka, on the same island, the latter the commercial capital and Nangasaki, on the island of Kjusiu. The laws are severe, and even sanguinary; torture, and death by decapitation or impaling on a cross, are ordinary punishments. The public revenues are derived solely from taxes on land and houses, which are assessed to be the property of the state. The army, in time of peace, is rated at 100,000 infantry and 30,000 cavalry. There is no armed navy. Discipline and the art of fortification are little understood.

History.—Marco Polo is the first European traveller who speaks of Japan, called by him *Cipangu* or *Coumoum*. In 1543 it was reached by *Mendonça Pinto*, and shortly afterwards the Portuguese obtained permission to settle at Nagasaki and established a highly-lucrative trade. In 1549, the Jesuit missionary, *Francis Xavier*, arrived, and by his means, and that of his followers, many of the natives were converted to the church of Rome. But the government becoming jealous of the Portuguese, and irritated at the interference of the missionaries with the religious profanity of the people, in 1585 expelled the traders, and compelled the native converts to return to their former faith. In 1600 the Dutch, with difficulty, prevailed upon the Japanese to allow them to trade, on condition of not interfering with the national religion, and they still continue the only nation having direct intercourse with them. The trade, however, is carried on under great disadvantages, and is subject to numerous vexatious restrictions. An Englishman, named *William Adams*, a master in the navy was wrecked on the coast of Japan during the reign of *Queen Elizabeth* and kept a prisoner for life. He gained favour with the emperor and succeeded in opening commercial relations between England and Japan, which for several years flourished vigorously, but during the reign of *James I* the English flag was withdrawn, and the English shared in the general expulsion of Europeans above adverted to—since which time the ports of Japan have been closed upon us.—(*Stobold's Japan, A. Sanger, &c.*)

JALAN OF DUAH is a tin lake Java, prov. of and about 25 m W S W Soerabaya, 1 bank Kediri. It is a large populous place, the residence of the provincial governor of the interior, and has several mosques, and a good island trade. Near it are the ruins of the old town of *Medan* and *Kamalan*.

JAPAN (Sea of) that portion of the Pacific Ocean enclosed by the Japan Islands, on the E. and S. and the coasts of *Manchuria* and *Corea* on the W. and extending from lat. 35° to 52° N., terminating in the N. with the gulf or channel of *Tartary* through which it communicates with the sea of *Okhotsk*. It communicates with the Pacific E. by the strait of *La Perouse*, of *Matsuyama* or *Sauger*, and S. by that of *Corea*. It is about 540 m wide at the broadest part.

JAPARA or *DIAPARA* is a tin, cap. residency or prov. of same name, lat. Java, N. coast, about 8 m from the mouth of the *Japara*, 36 m N. N. E. Samarang, lat. 5° 32' S. lon. 110° 43' E. It has an elegant mosque, a fine governor's house, a good school, and a fort and carries on a considerable amount of trade. Three miles inland are the ruins of the Javanese city of same name.—The province or residency is bounded S. by prov. *Samarang* and on the other three sides by the Java Sea. It forms a peninsula or peninsula, and is about 40 m long N. to S., and about 25 m broad. Inland, it is rather hilly, but towards the shores the ground is marshy, and the climate unhealthy. It is fertile, yielding excellent crops of rice, coffee, and Turkish wheat and the woods, which cover the uplands, swarm with wild animals and birds of many kinds. Soil is plentiful. Pop. (1845), 400,000.

JAPURA, or *CAQUETA*, a large river, S. America, an affluent of the Amazon. It has its sources in the Andes of Ecuador, about 50 m N. E. Pato, lat. 1° 20' N. lon. 78° 50' W. whence it flows E. by S. and then S. E., forming the boundary between Ecuador and New Granada from about lat. 1° 5' N. lon. 75° 15' W. to lat. 0° 25' S. lon. 73° 20' W. when it becomes the line of demarcation between Ecuador and Brazil finally entering the latter at lat. 1° 20' S. lon. 73° 20' W. from which its course, with a few deviations, is nearly due E., to lat. 1° 50' S., lon. 65° 15' W., when it suddenly takes a S. direction and falls into the Amazon at lat. 8° S., lon. 65° W.; having been for upwards of 850 m of the latter part of its course, wholly a Brazilian river. Its whole length is upwards of 1000 m. It has numerous affluents from both the N. and S., the principal of which are the *Fraser*, *Caguan*, *Caniari*, *Apurysa*, and *Perote*. The navigation of the *Japura* is interrupted by a great cataract, which occurs in lat. 1° 10' S., lon. 73° 20' W.

JARAFUEL, a tin, Spain, prov. of, and 45 m W S W Valencia, 1 bank Rio, tolerably built, with two squares, a church, townhouse, prison, two schools, and a public granary. Manufactures of linen and woollen fabrics, shoes, soap, and
Vol. II.

white wax, and a trade in wine, wax, honey, and vegetables. Pop. 2078.

JARAGUA.—1 A to Brazil, prov. of, and 70 m E Goysas, with two churches, one of them a handsome edifice and a considerable trade in cattle—said to be the best in the province. Pop. dist. 2500.—2 A port, Brazil prov. Alagoas, on the S. side of the promontory of *Ponta Verde*, 4 m E. Maceio. It is one of the most frequented ports in the province.—3 A river Brazil prov. Santa-Catharina, an affluent of the *Irupia* from the S. It is navigable for oxen for about 30 m.

JARAGEJO, a tin Spain, Extremadura, prov. of, and 40 m E. N. E. Caseres. It is a poor place, consisting chiefly of one wide and dirty street, traversed by a number of dark and filthy lanes, and has a church, a townhouse, manufactures of linen and soap, and a trade in corn and cattle. Pop. 1098.

JARATZ, a tin Spain, Extremadura, prov. and 54 m N. E. Caseres. It is an old place, poorly and irregularly built, though having paved and clean streets, contains two churches both an ancient a courthouse, prison, primary school and hospital and has manufactures of linen several oil and numerous flour mills and a trade in payments, milk, oil, and wine. Pop. 3500.

JARANDILLA, a tin Spain, Extremadura, prov. of, and 60 m N. N. E. Caseres at the confluence of the *Jaranda* and *Jarandilla*, nearly surrounded by hills of the *sierra de Hajar* and *Grados*. It is very poorly built, has a church in its structure more resembling a fortress than an ecclesiastical edifice, an old turreted palace, partly in ruins, an hospital and townhouse and several oil and flour mills. Pop. 2191.

JANCY JANCY or *JANCY* a vill and town France, dep. Savoy, on bank *Cheron* about 16 m from *Chambéry*. It is surrounded by lofty peaks but has some good land in its vicinity, a trade in dairy produce and in apples, pears, and nuts. Pop. 1215.

JAREK, a vill Hungary *Hither Danube*, co. *Bacs*, m a plain about 2 m from *Imenich*, with a church, and a trade in corn and potatoes. Pop. 1210.

JAREMBINA or *JARABINA*, a vill Hungary *Hither Thels*, co. *Zips*, in a mountainous district 20 m N. *Louschach*, with a church, manufactures of linen and leather and a trade in sheep and cattle. Pop. 1640.

JARENGA, a tin Russia, gov. of, and 360 m E. N. E. *Vologda*, cap. circle of same name, on the *Wytschega*, which remains frozen for five months. It has a church and manufactures of ironware a trade in fur, and other articles, sent chiefly to *Archangel* and several annual fairs. Pop. 1128.

—The circles is extensively covered with lakes and morasses, is not well adapted for agriculture and has even very indifferent breeds of cattle, but is tolerably rich in minerals, particularly iron. Area, 859 sq. m.

JARIGEAU (anc. *Georgienum*) a tin France, dep. *Loiret* 10 m E. *Orleans* 1 bank *Loire*, here crossed by a handsome bridge. Near it good red wine is made. *Jarigean* was formerly fortified, it was besieged and taken, in 1428, by the famous *Earl of Salisbury*. Pop. 1452.

JARKOVACZ, a vill Hungary *Hither Danube*, co. of and 30 m S. W. *Temesvar*, on the *Becava* canal. It contains two Greek non-united churches. Pop. 2405.

JARLESBERG or *LARVING*, a local Norway, prov. *Christiansund*, bounded N. and W. by *Isle* *Busked* and *Reasborg*, E. by the gulf or fiord of *Christiansund* and S. by the *Skagerack*, about 55 m long N. to S., by 25 m broad area 673 sq. m., cap. *Tonsberg*. It belongs to the less mountainous regions of the country and depends chiefly on agriculture and cattle-rearing though there are likewise some iron-mines, and ship-building, wood-floating, fishing &c. are carried on. Besides its capital, it possesses the towns of *Hulmestrand*, *Aasgaardstrand*, *Hundsfjord*, and *Larving*. Pop. (1845), 68 070.

JARMAN, a tin France, prov. *Puy-de-Dôme*, gov. of and 61 m N. W. *Satillon* on the *Puyne*. It occupies a low flat has a parish church, a fishery and a trade in horses and cattle. Pop. 998.

JARHAC, a tin France, dep. *Charante*, agreeably and advantageously situated among extensive meadows, on bank *Charante* here crossed by a handsome suspension-bridge, 16 m W. N. W. *Angoulême*. It is well built and has a considerable trade in *Cognac* brandy red wine, cattle, and leather, and several annual fairs, each of which lasts three days.

Jarocin is memorable for the defeat sustained in 1580 by the Protestants under the command of Golligny and the Prince of Condé, when the latter was killed. Pop. 2368.

JAROCIN, or JAROCYNA, a town in Prussia, prov. of, and 79 m. S.E. from — It has a court of justice, a Catholic church and a trade in horses, cattle and swine. Pop. 1604.

JAROMERITZ, or JAROMERTZ, a town in Austria, Moravia, circle Znaim 1 mile Rakonitz, 38 m. W. Brün with a castle, a church, and two mills. Pop. 2018.

JAROMIERZITZ, a village in Austria, Moravia, circle Olmütz, about 10 m. from Goldenbrunn, with a church, a castle, and several mills. Pop. 1680.

JAROMIRZ, a town in Bohemia, circle Hainburg at the confluence of the Aupa with the Elbe, here crossed by a chain bridge, 68 m. E.N.E. Prague. It is walled has two gates, three suburbs, a demary church, chapel and hospital manufactures of cloth and a walk, a saw and other mills. It is an old place and suffered greatly during the Hussite war. Pop. 9480.

JAROSLAV [pronounced Jaroslav] a town in Russia, bounded N. by gov. Volhoda E. Kozlovsk. S. Volsk. W. Tver and N.W. Kopylov. lat. 56° 45' to 56° 55' lon. 37° 35' to 41° 30' E. But for a projection on the N.E. it is nearly of an oval form greatest length N. to S. 160 m. greatest breadth 140 m. area, 9600 sq. m. The surface, though somewhat elevated is generally flat, being only occasionally broken by the high banks of its streams, or by low ridges. In several places it has been very marshy. It wholly belongs to the basin of the Volga, which enters it on the N.W., traverses it first in a N.W. and then abruptly in a N.E. direction quitting it on the E. Besides thus draining a large part of the surface directly it receives within the gov. the Mologa, Shkama, and Kotorosl. Several lakes are found in different directions the largest is the Yero, in the S. near the town of Rostov. The air is pure and the climate healthy though winter is severe, a full summer comparatively short. Considerable tracts are covered with marshes and wood which not being generally of superior quality is chiefly useful for fuel. With exception of the ground thus occupied, almost the whole gov. may be considered arable. The soil however is by no means fertile, much of it consists of a thin sand or unproductive clay and hence, notwithstanding the large portion of surface under the plough, the grain produced falls short of the home consumption. After grain the principal crops are hemp and flax. In the S. apples and cherries are abundant. Domestic animals are comparatively few in number, and of indifferent breeds. The rivers particularly the Volga and the lake, are well supplied with fish. There are no minerals of the least consequence. Manufactures which are carried on with considerable activity consist chiefly of woollen linen cotton, and silk goods, hosiery gloves, leather harness wooden shoes, &c. The chief export of the gov. is fish, but there is a considerable transit trade in corn. Many of the inhabitants seek employment in other govts. For administrative purposes the gov. is divided into ten uyezds, of which Jaroslav is the cap. Pop. (1846) 1,046,100.

JAROSLAV, a town in Russia, cap. above gov. & bank Volga at the confluence of the Kotorosl 102 m. N.E. Moscow. Its site is somewhat elevated, and it is surrounded by a peninsula, and defended by a fort, though otherwise open. The houses, though mostly of wood have a massive appearance and are tolerably well built, but the streets are very irregular and narrow and only partially paved. Jaroslav is the seat of an archbishop, the residence of a governor and the seat of several important courts and public offices and contains no fewer than forty four churches, all of these of stone, several of them handsome and generally surmounted with domes and spires, which particularly at a distance, produce a striking appearance. The other buildings and establishments deserving of notice are the seminary or college, richly endowed by Prince Demidoff, possessed of a library a cabinet of natural history, and other good collections and attended by 600 students a gymnasium and several other public schools, three monasteries, a general and a funding hospital, several poor-houses and a house of correction. The manufactures consist of linen and silk goods soap, radishes leather paper plated metals, and iron, tin and copper ware. The trade—partly transit, and partly in the above articles of manufacture, particularly linen and leather—is of considerable importance.

Jaroslav derives its name from the celebrated son of Vladimir the Great, Jaroslav who founded it in 1095. It owes much of its prosperity to the linen manufacture, first introduced into it by Peter the Great. Pop. (1846) 25,000.

JAROSLAW a town in Austria, Galicia, circle Przemysl 1 bank Dan, 68 m. W.N.W. Lemberg. It is situated in a beautiful district, contains a handsome cathedral church (Domkirche) and a normal school, and has manufactures of woollen and linen cloth, yarn, russegiu and red wax, a considerable trade in these articles, and in honey salt, and ship timber the last sent chiefly to Danzig, and a weekly market, once famous, and still of considerable importance, though greatly fallen off. Pop. 3372.

JAROSLAW a village and par. England co. Durham. The village, 5 1/2 m. S.W. of S. Shields, & bank Tyne, is about 1 m. long, well kept and has an ancient church in the vestry of which is kept a rude oaken chair said to have belonged to the venerable Bede, who was born in the parish, and buried in the church. The parson contains the townships of S. Shields Jarroth Heworth, Hadworth, Monkton, Harton, and Westoe. Area 5782 ac. Pop. 42,448 (chiefly employed in collieries).

JARIN, or JARON, a town in Persia, prov. Fars, 98 m. S.E. Shiraz, on the road thence to the Persian Gulf. It has some trade in cottons tobacco and iron and is remarkable for the number and beauty of its palm-trees. Pop. 4000.

JARIN, — a small coral island N. Pacific Ocean lat. 0° 2' 37" S lon. 158° 54' 11" W. 12 m. E. to W. and 1 m. N. to S. without tree or shrub — (Chamisso). An inlet of the Gulf of Georgia, British N. America Oregon Territory lat. 49° 35' N lon. 124° W length 56 m. average breadth 5 m.

JASENA, or JASANA, a scattered village in Bohemia, circle Königgrätz, with a church and a school. Pop. 1067.

JAVLSKA, a market in Austria, Galicia, circle and 20 m. S.W. Sanok on the Jaslo among the Carpathians, on the frontiers of Hungary with a parish church. Pop. 2000.

JASIA, a town in Austria, Galicia, cap. circle of same name at the confluence of several small streams with the Wyszoka 188 m. W. by S. Lemberg. It has a law court offices for the circle a parish church two schools, an old castle a sulphur bath and a considerable general trade and trade in horses. Pop. 1800. — The climate is mountainous being partly covered in the S. by the principal chain and in other directions by ramifications of the Carpathians belongs to the basin of the Vistula, which receives its drainage chiefly by the Wyszoka, and is well wooded but by no means fertile most of the soil being sandy stony and almost barren. Area, 960 sq. m. Pop. 260,810.

JASNY, or JASNY, (ancient Jasnowy) the cap. of Moldavia, and residence of the Hospodar on the Prut 162 m. W.N.W. Odessa lat. 40° 10' 24" N lon. 27° 44' E. It is built partly on a hill and partly in a valley where the prevalence of marshes makes the air very unhealthy. A very large space is covered by the town, the houses being generally provided with gardens. The streets are mostly narrow and winding and several quarters of the town have a very mean appearance. But a great fire in 1823 having destroyed nearly 5000 houses, new buildings have sprung up, generally of a handsome appearance. Some streets are long and spacious. This is particularly true of the principal street which is the great place of commerce and business and is lined on each side by a long row of shops generally kept by Jews. Many of the public buildings, having been of wood were destroyed by the fire, but the ecclesiastical edifices being all solidly constructed of brick or stone, escaped. They are very numerous. Among them may be mentioned the metropolitan church of St. Nicolas, the churches of St. Nicholas, Theodosius, and Galatia the archiepiscopal palace, the convent of Trivritsch, in which the archbishops are buried, the E. Catholic and the Lutheran churches. St. Jassy has, besides, a large handsome public baths, a Wallachen press, the only one existing in the country, a small hospital, a seminary and several primary schools. There are scarcely any manufactures, but the trade is of some importance, and a great deal of business is done at the fairs. Jassy was a place of considerable importance in the time of the Romans, and is said to have contained 80,000 inhabitants. Its subsequent history is a series of great disasters. It was almost entirely

burned down in 1723 and was fearfully ravaged by the plague in 1772. Still the population exceeded 40,000 but since the Javanese set fire to it in 1822 it is diminished at least one-half, and cannot now be estimated at more than 20,000.

JASTROW, a *tu* Prussia, prov. W. Prussia, gov. and 90 m. W. W. Marienwerder on the Wutka, with a civil and a criminal court, a Protestant and a R. Catholic church, a synagogue, and a trade m. castle. Pop. 30,638.

JASZ-ARAT, a free market in Hungary, co. Heves, in a plain 48 m. E. Pesth, with a handsome R. Catholic church, and an important yearly market. Around it large crops, particularly of wheat, are raised. Pop. 8,800.

JASZ-BEGER, a market in Hungary, cap. Jasyga dist. 38 m. E. N. E. Pesth. It is prettily situated on both sides of the Zagyva which forms two islands near the centre of the town. These have been planted and laid out as walks. In the public square nearly opposite are the remains of an old fortress within which Attila king of the Huns, is said to have been buried a. d. 456. The buildings most deserving of notice are, a large and handsome R. Catholic church, a Franciscan monastery, with church attached a Protestant church, townhouse, with register-office, guardhouse, and royal gymnasium. The district around it of considerable fertility producing much wine, and raising many cattle, sheep and horses. There are three important annual fairs. Pop. 18,400.

JASZ-FENESZARU a vil. Hungary Jasyga dist. on the Zagyva, 10 m. W. N. W. Jasz-Derey, with two churches and a mineral bath. Pop. 3,439.

JASZ-ENICZA, a vil. Hungary Hither Danube on Arva, about 24 m. from Kozka. It has manufactures of linen, and a trade in it a distillery, and a smelting furnace. Pop. 1,085.

JASZ-ENOVÁ a vil. Hungary military dist. Temeswar about 8 m. from Lugodol with a parish church. P. 1890.

JASZKA a market in Croatia, Hither Sava, co. of and 20 m. S. W. Aggram with a castle, church, and Franciscan monastery. Pop. 1,212.

JASZI or **JOSZ**, a market in Hungary Hither Thiss. co. Abony, in a beautiful valley 1 bank Bodva 80 m. S. E. Loutelina. It contains a magnificent old Franciscan monastery, the church of which, surrounded by two gilded towers and a ruby painted dome and within almost entirely covered with marble and alabaster is one of the finest in Hungary. There is also an excellent library contained in a splendid hall and enriched with numerous valuable collections. The chief manufacture is earthenware and there are extensive markets, chiefly for fat cattle. In the vicinity are paper-mills, a marble quarry iron mines, and blast furnaces. Pop. 17,799.

JATIVA or **KATIVA** (KAT PUNYAN) a city Spain prov. of and 36 m. S. S. W. Valencia, on the slope of a hill crowned by an ancient and strong castle, with 50 towers and a double fosse near the confluence of the Guardamar and Albayda. The houses are in general well built, the streets generally wide, clean and paved. The principal and collegiate church in the form of a Latin cross, is a fine structure containing many curious and interesting monuments, and having a handsome dome there are also three other churches, seven convents, several public and private schools, a town-house, prison, hospital, storehouse, theatre, institution for the reception of poor widows, fifty three fountains, and a palace of the counts of Misericordia. In the environs are a bull ring and two public walks, decorated with trees and fountains. Manufactures—linen and woollen fabrics hats, soap, earthenware, candles, and silver vessels. Trade—manufactured goods, silk, rice, wheat, oil, wine, hemp, perfumery, hardware, cutlery, &c. Pop. 13,168.

JAUER, a *tu* Prussia, prov. Sillesia, gov. of and 10 m. S. S. E. Lögnitz, cap. circle of same name, r. bank Wild Neuse. It is surrounded by a double wall, with four gates; has two suburbs, several courts and offices for the strole, two churches, several schools, a savings-bank, house of correction, manufactures of linen, gloves, hosiery, ribbons, starch, and tobacco a windmill and several other mills, tile-works, and a trade in cattle. Pop. 7,108.—The **OUKRA** is hilly, watered by the Neuse and Jauer, yields good crops, and has excellent pasture, area, 469 geo. sq. m. Pop. 50,214.

JALERNIG, a *tu* Austria, Sillesia circle of and 52 m. N. W. Troppau, on the Prussian frontier. It has a church a courthouse, and manufactures of woollen cloth and roughie and several mills. Pop. 1,900.

JAUIJA, a *tu* Peru, dep. Jurun 120 m. E. Lima, 1 bank river of same name. It has a fine cavalry barracks, and car rest on a considerable trade in cattle and agricultural produce. Near it are silver mines. Pop. 16,000.—The **ARU** rises in Lake Chunduyococha, flows in a sinuous S. E. course for 400 m. and under the name of Mantaro, joins the Apurimac, near lat. 12° S., lon. 73° 55' W.

JAI RU a river Brazil which rises in the Serra of its name—a branch of the Cordillera of Pareana—in prov. Mato Grosso, flows first N. then S. E. and, after a course of about 280 m. joins r. bank Paraguay, 40 m. below Aldana-Maria. Its principal affluents are the Aguapohé and Belém.

JAVA, *malaya*, *Jasce rée*, Italian, *Ceylon* an isl. Indian Archipelago, and the principal seat of the Dutch power in the E. cap. Batavia. Next to Sumatra and Borneo, it is the largest in the Sunda group and is bounded N. by the Java Sea, and S. by the Indian Ocean separated W. by the strait of Sunda from Sumatra, and E. by that of Bali from Bali lat. 5° 53' to 8° 51' S. and lon. 105° 15' to 114° 35' E. In shape it somewhat resembles a parallelogram, the greater axis of which lies E. and W. with a slight inclination N. at the W. end. It is 630 m. long, by 85 to 146 m. broad, area, 49,739 sq. m.

Danawa—Java and the smaller adjacent island of Madura, are divided into twenty two provinces, as follows—

| Pop. 1815 | Pop. 1861 |
|---------------------------|---|
| Batavia 800,000 | Carried forward 5,322,000 |
| Batavia 210,000 | Madura 215,000 |
| Batavia 240,000 | Kediri 215,000 |
| Krawang 25,000 | Jepara 400,000 |
| Preanger Regencies 60,000 | Rembang 400,000 |
| Chembo 55,000 | Sourabaya, comprising the old residencies of Gresik, Madura, and Surabaya 770,000 |
| Tegal 240,000 | Panarogan 315,000 |
| Pekalongan 224,000 | Banual, comprising |
| 62,000 | Pekalongan, Pasa |
| Kadoe 40,000 | retaka and Banyuwangi 450,000 |
| Bagelen 40,000 | |
| Bandjone 410,000 | |
| Sekeloa 45,000 | |
| Djondjondjara 225,000 | |
| Tanjung 64,000 | |
| | Total 8,464,000 |

Carry forward, 5,322,000

The population in 1861 amounted to 18,019,108

Physical features—The Indian Ocean, which bays with great force along the S coast, has prevented the formation, on that side, of such alluvial plains as extend along the N parts. From the same cause the S coast is generally unsafe for shipping while the N affords excellent anchorage at almost all times and places. The N. presents a continuous front of crags and rocks forming the outer edge of an extremely mountainous country. The N is flat and low, and covered in many places with mangrove swamps. The principal capes bays, and harbours formed along its coast are, Java Head a cape, at the entrance of the Strait of Sunda from the Indian Ocean Cape St. Nicholas where that strait opens into the Java Sea Cape Pankas at the W. and Cape Sedendo at the E. entrance of the Strait of Madura, Capes East and South at the N. E. extremity of Java Wyneopce, Welome, and Pepper Bays at the W. end of the island and along the S coast, W. to E. Penangung Puchitan Pangol Sambrang Segar-Wadi, Dangpur and Grajagelan Bays. The chief harbours are those of Batavia and Sourabaya, on the N. and that of Calit Puyang formed by the small island Nam Kau bangsan, on the S.

The island is traversed in its whole length by two chains of mountains, which sometimes unite, and at other times depart from each other forming ramifications along gently down to the shore. The two chains, from 10,000 to above 12,000 ft. high are thickly set with volcanoes, active and extinct from 8000 to 9000 ft. in height some of them, rising to 12,000 ft., are seen at sea from a great distance, and furnish landmarks to the navigator. These mountains are intersected by large and beautiful valleys, watered by rivers and torrents, and covered with thick forests. Though alluvium is everywhere found, whether the ground be more or less elevated, yet the formation of the island is essentially trachytic, with diorite, limestone, sandstone, and other stones of mixed

Each family has its own portion of land, varying from half an acre to six acres. About a third of the cultivated ground is supposed to be thus occupied. After various unsuccessful experiments, the Dutch have succeeded at last in effecting such a commutation of the imposts formerly levied by the native sovereigns, as without trenching too much on the settled notions of the natives, enables them to draw from the soil a large amount of valuable tropical produce for transmission to Europe. This is called 'The system of culture,' and was introduced in 1822. A certain proportion of the land is now set apart for whatever crop the Government may direct, it taking on itself the risk of failure. This forms one part of the commutation the other is taken in labour applied to the Government ground and so as that one part of the village succeeds another from the preparation of the soil until the crop is reaped. It is then transferred to mill-owners and others, who according to a different class of arrangements, prepare the produce for market, and hand it over to the Government for that purpose. All is superintended by the native authorities, who are stimulated to activity and fidelity by liberal remuneration. In this manner large supplies of produce are procured for transmission to Europe, and a large surplus revenue has replaced a yearly deficit. At the same time—partly by improved methods of culture and irrigation, partly by the clearing of fresh ground—the staple food of the country has been augmented, and the population is contented and rapidly increasing.

Zoology.—Including domestic and marine animals, 100 kinds of mammals inhabit Java. Though so close to Sumatra and the Malay Peninsula, neither the elephant nor the tiger are found in it but, in the W part, the one-horned rhinoceros is not uncommon and in numerous parks, especially higher districts the royal tiger, panther and tiger-cat keep the inhabitants in constant alarm by their depredations. The Babirusas are nowhere so plentiful and it, along with two kinds of wild hog (*Sus verrucosus* and *verruca*) form the large game of the island. *Hylarchus leucurus* two species of *Scorophagus*, and the cosmopolitan *Cercopithecus cynomolgus*, are the only representatives of the ape kind, but they people the forests in countless numbers. Two kinds of lemurs (*Scenops Javanicus* and *tardigradus*) inspire the inhabitants with superstitious fear by their mysterious nocturnal habits and this island may be esteemed the native seat of the largest bats (*Myotis edulis* or *Javanicus*), the largest of which measure 5 ft. across the wings, they may be seen suspended from the branches in hundreds during the day and at night they devastate the orchards and gardens. Two civets (*Viverra zibethica* and *malayana*) are common, and supply a perfume of which the Javanese are passionately fond the wild ox (*Bos sondaicus*) a beautiful and graceful animal which has hitherto been found unmanageable, abounds in the woods; and the Buffalo (*Bos bubalus* arm.) said to have been brought from continental Asia in the 12th century by the same prince to whom tradition assigns the introduction of the rice plant is the only animal met in agricultural labour and is doubtless more numerous than the oxen and horses used the latter animal is small but vigorous. The ornithology of Java is rich and varied, both in genera and in species almost all the known generic groups of rapacious birds are found here, and in great numbers. The peacock (*Avus splendens*) spreads his brilliant plumage in the hums of the tiger of which it forms the favourite prey. Thrushes of various kinds are common and near the principal craters may be seen a kind of blackbird (*Turdus fumidus*), which never departs from the localities exposed to eruptions and igneous matters. Gallinaceous fowls are plentiful, more especially *Turdus* species and peacocks, *Coturnix chinensis*, and *Bonivia* cocks. Both the rivers and the surrounding seas supply a great variety of fish and pearls and coral fish abound. Insects cover the grounds and plants in countless numbers; but few are distinguished for brilliancy or variety of colour, or are remarkable in form.

Manners, Customs, Religion, &c.—The Javanese are small in size, of a yellow hue superstitious, careless of the future, inclined to laziness, sober, compassionate, joyful, without being holier-than-thou, patient, enduring, and easily led when convinced that the orders given are not contrary to the ancient laws and customs of the country, which are held in religious reverence. They are respectful to parents, and venerate the tombs of their ancestors. They are, however, very susceptible of

efforts, which they are not slow to avow with the kris, which is invariably worn and they are frequently likewise armed with the sabre or pike. In religion they are Mahomedan a faith introduced in the 14th century by the Arabians, and which has since almost entirely displaced both Hindooism and Buddhism of both of which numerous imposing relics are to be met with in various parts of the island. The mass of the Javanese take only one wife, who is treated with respect and consideration but people of quality and wealth take advantage of the latitude allowed by the Koran, and practice polygamy. The deafening music of the Gamelan, and the movements of professional dancers are the great sources of amusement on festival days and great entertainments, all, without distinction are passionately fond of gaming more especially of cock-fighting, and the children in imitation of the parents, amuse themselves with combats between insects, whose bellicose disposition they endeavour to stimulate. The Javanese are good farmers, and have made some progress in metallurgy, in carpentry and cabinet-making. They weave and dye will make paper from the mulberry (*Morus papyrifera*) and many are engaged with poisoned arrows in obtaining fish which being salted and dried, constitute a great dainty. The great mass, however, of the people are devoted to agriculture.

Trade and Commerce.—The great bulk of the foreign trade is carried on through the ports of Batavia, Samarang and Soerabaya, and is chiefly in the hands of the Dutch and Chinese. The following tables exhibit the nature and extent in recent years.

VALUE OF TOTAL IMPORTS AND EXPORTS FROM JAVA AND MADAGASCAR, IN 1845, AND 1861.

Government and Revenue.—A governor-general or viceroy is supreme ruler with command both of the army and navy in all the Dutch provinces in the Indian Archipelago. He is assisted by the council of the Indies, composed of a vice-president and four members named by the king and is in correspondence with the governors of the different dependencies of Java, namely, Ambon, Borneo, Celebes, Sunda, all of which are under his orders. A high court of appeal sits at Batavia and courts taking cognizance of civil and criminal cases among Europeans sit in all the principal towns. The natives are under native tribunals, superintended, in certain instances by Europeans. Government has established schools for primary instruction at Batavia and the other principal towns, and has salaried vaccinators and medical practitioners in all the residences to attend to the wants of the natives. In 1845 the Government expenditure amounted to 45,591,190 which was considerably exceeded by the revenue, of which about 2800,000 were derived from the monopoly in opium alone.

History.—Ancient Javanese history is written in the still existing magnificent remains of temples and other public buildings, which are plentifully scattered over the island. These attest that the worship of Brahma and Buddha once prevailed in the island under the splendid Hindoo empire of Mafopahit the dismemberment of which was consummated by the Arabs, A.D. 1478 by the destruction of a vast capital of that name. Islamism had previously supplanted the rival worship, and had driven their last adherents into the neighboring island of Bali. The island then fell under the dominion of numerous petty chiefs and was found in that state by the Portuguese, the first European settlers on the island, who arrived in 1511. They were followed in 1596, by the Dutch who soon expelled them. Though their views were at first directed wholly to commerce the Dutch merchants like our own E. India Company soon found it necessary to assume the position of a governing power and treated accordingly with the native princes, with whom they were frequently at war. In 1811 Java was taken from the Dutch by the British, who, however restored it after the peace of 1816 since which time it has remained in their hands. Up till 1830 various portions of the island were still under native princes, who paid tribute to Holland but in that year a revolt took place, which resulted in the whole island falling under the Dutch sway with exception of two provinces, which have been left under the government of Javanese princes—Gorontalo, under its Boocoboonna and Djogjakarta under its sultan. Both princes have a court, nobles, ministers, &c. but are the mere instruments of the Dutch government by whom they are allowed a handsome pension. Since the close of this war the island has been rapidly increasing in population and prosperity.—(Van der Aa, *Tennant's India, Neerlandaise Monument des Indes*, Lyle's *Geology*, &c.)

JAVA SEA. that portion of the S Pacific Ocean lying between the islands of Borneo and Java, and between lat 10° and 116° E. Width of the sea, from one island to the other, about 250 m. It is traversed by two approved routes to China, the one by Pit's Passage, and the other by the Strait of Macassar.

JAVALI NUNEO a vil Spain prov of and about 4 m. from Murcia, a bank Segura, with a church two primary schools and a trade in silk and pimento. Pop. 1563

JAVALKINTO a vil Spain, Andalucia, prov of, and 14 m. N. from, on a height above r bank Guadalquivir. It has narrow and ill-paved streets a parish church townhouse, prison, and school a flour and several oil mills and a trade in oil and corn. Pop. 1061

JAVLER (San) a vil Spain prov of and 21 m. S.E. Murcia, about 4 m. E. of the Mediterranean. It is well built, has spacious though unpaved streets a church and a primary school gymnasium and lime kilns; several oil and flour mills and a trade in corn and barley. Pop. 2540

JAVRON a vil France dep of and 15 m. N.E. Mayenne, 1 bank river Mayenne. Near it is the extensive slate-quarry of Chateaugay, which employs above 800 workmen. P. 610

JAWANA DAWANA, or **JOANA** a vil. Java, prov of, and 30 m. S.E. of Java, near the mouth of the Jawana. It has a fort, a square, and a governor's house and carries on trade. Pop. 10,000.—The river, one of the largest on the N coast of Java, rises in an inland lake, whence it flows ge-

nerally N.E. to the Java Sea. Its mouth is encumbered by a bank, but yet prisms navigates the stream to its source in the inland lake.

JAWORNIETZ, a vil. Bohemia, circle Kooaggritz, 4 m. from Hohenheim. It stands on a small stream, and has a church, a school, two mills, and a trade in wood. Pop. 1803.

JAWOROW a vil. Austria, Galicia, circle Presmyel, on a lake abounding with fish 30 m. W. N.W. Lemberg. It is built in the form of a square, has extensive suburbs, a parish church, and mineral springs. Here Peter the Great first met with Catharism, afterwards Emperors of Russia. Pop. 5885

JAWUD a vil. Hindoostan prov Ajmer 80 m. E. by N Oodipoor lat. 24° 38' N lon 74 56' E. It is surrounded by a stone wall, and has good gateways, but is of no strength.

JAXARTES, river Asia. See Sir.

JAKT—1 A river, Württemberg, which rises near the confines of Bavaria, about 10 m. S. k. Ellwangen, after reaching which it flows N.W. to the frontiers of Baden where it turns S.W., forming, for a short distance, the boundary between Baden and Württemberg and ultimately joins r bank Neckar 7 m. N. Hellbronn total course about 100 m. It is nowhere navigable.—2, One of the four circles of Württemberg, forming the N.E. part of the kingdom area, 1000 sq. m. It contains the towns of Crailsheim Ellwangen Gmünd, &c. Pop. 355,607

JAKTHAUSEN a vil Württemberg circle Neckar r bank Jakt, 40 m. N.N.E. Stuttgart, with a church and three castles. Pop. 1107

JAYSUI MIE. See Tsumshu.

JAYI OWICE a vil Austria, Galicia, on the Strypa, 86 m. S.E. Lemberg, with a church 1 op. 2100

JAZYGIA a dist. Hungary surrounded by the cos. of Hesse and Pesh cap Jass-Berey. It is watered by the Keosna, Zagyra, and Tarna yields grain wine, and tobacco and rears horses and other domestic animals. For administrative purposes it is united with the districts of Great and Little Cumania. Area, 279 sq. m. Pop. 49,200

JEAN or **JUAN RABEL**, a maritime town and empire Ilayti N peninsula, 63 m. W. by N Cape Haylen, with good safe anchorage in 15 fathoms.

JFAN D'ARUKE (Sr) [Latin *Agrocinensis*] a vil France dep. Charante-Inférieure agreeably situated r bank Sautoune, here navigable by barges 35 m. E.S.E. Rochelle. It is a very irregularly built, but has a cheerful appearance, from the whitewashing of the houses and remarkable cleanliness of the streets; is the seat of a court of first resort and commerce has an agricultural society and communal college, two churches, a handsome market hall, hospital, theatre, and ancient abbey and manufactures of gunpowder distilleries of Cognac, and a trade in wine, brandy, tumber, clover lucerne, and elegant goods. Pop. 5447

JFAN D'ARUKE (Sr) a vil France dep. Haute-Savoie prov (val de Saône, 3 m. S.E. Brot in a valley of same name r bank Dranse. It once possessed a Cistercian abbey which has been suppressed. It has a trade in cattle, and cheese of excellent quality. Many of the inhabitants emigrate to obtain employment. Pop. 2258

JFAN DE BOCHNAT (Sr) a vil France dep. Isère 14 m. E. Vienne, on the Veronaise, a small stream which after giving motion to many mills is lost in the ground and does not re appear. There are here a refinery of best-roast sugar, several sawmills and tanning mills. Pop. 1631

JFAN DE LORE (Sr) a vil France dep. Côte-d'Or 18 m. S.E. Dijon, pleasantly situated in a plain, r bank Saône, where it is joined by the canal of Burgundy and near the mouth of the canal from the Rhone to the Rhine a position enabling it to carry on a trade in grain, wine, iron, wood, and charcoal. Pop. 2380

JFAN DE LUN (Sr) a small seaport and frontier town, France, dep. Basses-Pyrénées, 12 m. W. S.W. Bayonne, at the mouth of and on r bank Nivelle, across which is a wooden bridge to the suburb of Sibenort. It is defended by the forts of St. Barthe and Soubise. The sea has washed away many parts of the town, and the shifting sands at the mouth of the river have almost entirely blocked up its port. Its trade is trifling and consists principally in fish. Pop. 2134

JFAN DU BRUEL (Sr) a vil France, dep. Aveyron, 89 m. N. N.W. Montpellier, at the foot of a branch of the Cevennes.

It consists of a long street running from N to S, and in the centre of which is a spacious square. It has manufactures of woollen stuffs, cotton hosiery, and hats, and a trade in casks, ship timber, deals, fruit, corn, and cattle. Pop. 1446

JEAN DU GARD (Sr), a tn France, dep. Gard 9 m. W. Alais, l. bank Gardon d'Anduze. It has a church, and many features of silk stuffs, silk stockings, and silk thread, paper, leather earthenware and beer. Manganese is worked in the neighbourhood. Pop. 2818

JEAN PIERRE-POUR (Sr) a small fortified tn France, dep. Basses-Pyrénées, formerly cap. of Navarre. It is picturesque situated on the Nive, 26 m. S.E. Bayonne, and owes its name to its position between France and Spain, its outlet, on a height overlooking the town commanding the three passes leading from France to Spain. The town consists of a few narrow streets, and in itself is of no importance. In the vicinity are some traces of considerable ruins of adobe. Near the town is the Pass of Ronoveaux rendered famous by the defeat of the army of Charlemagne, in 778 when Roland, the famous Paladin, was mortally wounded. Pop. 1798

JEBA, or **GEBA** a river of W. Africa, Guinea, S of the Gambia. At its mouth—lat 11° 40' N lon 16° 14' W—it is 15 m. across but only small vessels can ascend it to any distance.

Its channel is encumbered by many dangerous banks. It preserves a great width till above the confluence of the Courbaal about 60 m. from its mouth, but beyond that it narrows rapidly, and in the dry season, is not more than 66 ft. broad though, during the rainy season, at several places, it is over 2 m. wide. The tide is felt above the village of Jeba, which lies on the r. bank of the river about 80 m. above its mouth. The upper course of the river is unknown.

JEHAH GENAIL, or **JEBEL** (anc. *Byblus*) a maritime tn Asiatic Turkey, Syria, pass. of 30 m. S.W. Tripoli, lat. 34° 12' N lon 35° 31' E. It is enclosed by a wall 1½ m. circumference, with many towers at intervals, apparently the ruins of the Crusades, it contains a castle and a bridge. Numerous ruins of antiquity consisting of pillars of red and grey granite, are scattered about and built in the walls. There is also a high tower the lower parts of which are bevelled in the Phœnician form and evidently extremely ancient. The place is now of no importance, and retains only a small trade in tobacco and sponges.

JEBELIYAH an isl. S.E. coast Arabia the most E. of the Curia Minus group a barren granite rock, 560 ft. high in the centre.

JERENHAUSEN a vil Württemberg circle Danneberg, bail. Göggingen, with a parish church, a castle, and two mineral springs. Pop. 1103.

JEDBURGH a port, b. market in and par. Scotland, co. Roxburgh. The town, 42 m. S.E. Edinburgh, beautifully situated in the valley of the Jed, here crossed by two bridges, is embosomed among venerable orchards and has broad, clean streets, and well-built houses. The principal edifices are the remains of the celebrated abbey a magnificent structure of the 13th century, part of which is now used as the parish church; the ancient castle, now converted into a prison and bridewell; and the county and town halls. It has also a Free and three U. Presbyterian churches, an Episcopal chapel, a grammar and numerous other schools, several public libraries, two reading rooms, a savings-bank, dispensary, and several friendly and charitable institutions. Blankets, carpets, flannels, and other woollen fabrics are extensively manufactured. Iron-founding and printing press-making are also carried on. Jedburgh unites with Haddington, &c. In returning one member to the House of Commons Pop. 1858. Area of par. 28 600 ac. Pop. 5476

JEDDO, city Japan. See **YEDDO**.

JEENU, or **JESSEN**, a tn Hindoostan, grand Bengal prov. of, and 70 m. N.W. Delhi, r. bank Chittang. It is about 3 m. long, by ½ m. broad, built of brick, surrounded by a wall, but has no ditch. Inside of the wall is an old brick fort.

JENDANA See **SARDAL-WOOD ISLAND**

JEFFERSON, a city U. States, cap. of Missouri, 386 m. W. Washington, b. bank Missouri, with a state-house, governor's house and judiciary. Pop. 1174

JEFFERSTON par. Wales Pembroke 5448 ac. P. 679.

JEGHEMOW a tn Russia, gov. and 75 m. S.E. Tula, cap. circle of same name, l. bank Metelcha. It consists of a

rally of indifferent, thatched houses and contains one stone and six wooden churches. The inhabitants are chiefly agricultural. P. (1850) 7857.—The *Onizna*, in the S.E. of gov. is well watered scantily wooded, and not fertile. Pop. 128,000

JEFFEREYSKATA, a tn Russia, gov. Don Cossacks' b. bank Medveditska, 250 m. N.E. Novo-Tcherkassk, in a daniel wooded, and great cattle-rearing district.

JEGHEDEERPOOR, or **JASHEDERPOOR**, a tn Hindoostan presid. Bengal prov. Orissa 247 m. S.W. Cuttack near the Indravaty.

JEGHEDORF or **JESSENORF**, a vil and par. Switzerland, cant. of, and 8 m. N.N.E. Bern. It was nearly burned down first in 1784, and again in 1820, but has been rebuilt in a much improved form. It contains a parish church and an old feudal castle with four conspicuous towers. Pop. 2725

JEGOMILVER, a tn Russia, gov. of and 60 m. N.W. Riazan, cap. circle of same name, on the Gzulinia, with two churches, and a trade in hops. Pop. (1849) 8712.—The *circle* is extensively covered by lakes, morasses, and forests, and is not well adapted for the growth of corn.

JELAHABAD a tn Hindoostan presid. Bengal prov. Bahar 33 m. S. by W. Irtan, famed for its manufactures of cotton fabrics. Pop. 5000

JELAH BONGKANG a vil and com. Belgium prov. of and 11 m. S.W. Liège, on the Bende, with a fine antique castle a brewery a flour mill and a trade in agricultural produce wood and coal. Pop. 1187

JELHO a tn. China. See **GENO**

JEHOSHAPHAT (VALLEY of) a deep and narrow gl. r. Asiatic Turkey in Palestine, along the walls of Jerusalem E. side, having Mount Moriah on one side, and the Mount of Olives on the other. The brook Cedron or Kedron which is of a dull red tint, flows through it N to S across which is a bridge of a single arch which is however unnecessary during the greater part of the year as the channel of the stream is perfectly dry excepting after the fall of heavy rains.

JELJURRY a tn Hindoostan presid. Bombay prov. Aurangabad 25 m. S.E. Poonah lat. 19° 10' N lon 74° 19' E. It has a fine mosque temple to Shiva, and is a favourite resort of the Mahatras for performing the ceremony of swinging.

JEKATERINOSLAV **JEKATERINBURG**, **JEKATERINOGRAD** **JEKATERINODOL**, the Russia. See **JEKATERINOSLAV** **JEKATERINOGRAD** **JEKATERINODOL**

JEKELALVA or **JELKLOWATZ**, a vil Hungary. Bihar Theiss, co. Zips, on the Gzulinia, 30 m. from Leutschau with a church, and near it iron-works and smelting furnace. Pop. 982

JELKIL-IRMAK, or **YRSHIL-IRMAK** (anc. *Iris*) a river Asiatic Turkey pass. Room of Syvas. It rises from seven alluvial streams, about lat. 39° 50' N lon. 37° 40' E., flows N.W. past Tokat, after which it sweeps round N. and then N.E. past Amassia, and falls into the Black Sea on the E. side of the Bay of Sinop. Total course about 500 m., the upper part of which is through an elevated wild country. After the Haiys or Kilik Trunk it is one of the largest rivers in Asia Minor. It receives numerous affluents, of which by far the most important is the Kelik (anc. *Lycus*) which joins it on the right, about 30 m. N.N.E. Amassia after which its course longer than its own.

JELAHUGA, a tn Russia gov. of and 210 m. S.S.E. Viatka, cap. circle of same name, r. bank Kama near a small lake. It contains three churches, and has manufactures of woollen, linen, and cotton cloth and articles in gold and silver. Here it are the ruins of a Shaman temple, where there was long a celebrated oracle. P. (1850), 4740.—The *Onizna*, in the S.W. of the government, is well wooded, and has rich tracts of arable land, particularly along the banks of the Kama. Pop. 88,000

JELALABAD, two tns Afghanistan—1, Cap. prov. of same name, 75 m. S.E. Cabool ½ m. from r. bank Kabul river, here about 450 ft. wide, and not fordable. It has between two parallel ranges of snowy mountains, on the N. and S. and in the centre of a considerable commerce, has a house of about fifty shops, but is wretchedly built and is mentioned by Burnes as one of the filthiest places he had seen in the East. It is rendered famous by the memorable and successful resistance made to an Afghan army, in the winter of 1841–2 by a handful of British troops, under Sir Robert Sale.

The fortifications were destroyed in October, 1842, on the evacuation of Afghanistan by the British. Bishnupur pop. about 2000, which, in the cold season, is increased tenfold by the people flocking to it from the neighbouring hills. It is 10° to 34° 40' N. lon. 70° to 71° E. forms a natural subdivision of the great valley of Kabul. It is well watered by the Kabul and its affluents; is fertile, and possesses a fine climate and beautiful scenery.—2. A tn. formerly Doshak, cap. of prov. Peshawar, 240 m. S. S. Kandahar. It appears to have been built on the ruins of another important town, and consists of well-built brick houses and a handsome bazaar. It is governed by a prince of an ancient and independent family who assumes the title of King of Belistan. P. 10,000.

JELALPOOR, several places Hindoostan.—1. A vil., grand Bengal, prov. Allahabad, 11 m. S.E.E. Jannapoor. Near it is a massive bridge over the Sbe.—2. A tn. prov. Agra, 19 m. S. Kalpa, *mundat xamir*, bank Butwa, houses of brick and loop-holed for defence.—3. A tn. Punjab. See JALALPOOR.

JELATMA, or JELATON, a tn. Russia, gov. of, and 100 m. N. Tambov cap. dist. of same name. 1 bank Oka, with two wooden and eight stone churches and several other public buildings, and manufactures of linen, vitrol-works and a trade in tallow, corn, hemp, wax, and honey. The extensive iron-works of Jeremshink are in the vicinity. Pop. 5600.—The canal is malodorous and has many fine forests, particularly of oak timber, but is not very fertile. Area, 62 sq. m. P. 77,998.

JELLY (Jessa and Lxxa) two nearly contiguous vils. Bohemia, circle Kunggratz, with a church, two mills, and a trade in cattle. Pop. 1815.

JELLY, or JELLY, a tn. Russia, gov. of and 102 m. E.S.E. Orsk. cap. dist. of same name. 1 bank Sosna, at the confluence of the Jolota and Latchina. It is old but regularly built has paved streets, twelve stone and two wooden churches three porthouses, and manufactures of soap, leather ironware and jewellery a ball foundry numerous lock smiths, and an extensive trade in corn. Iron abounds in the vicinity. P. (1851) 24,340.—The Latchina, in the E. of the city, government has an undulating surface, a well wooded, and very fertile, both producing much corn and rearing many cattle. Pop. 170,000.

JELLI, a tn. Beloochistan, cap. of the Marghasa, and residence of their ruler, 70 m. S.W. Kolat. It is surrounded by dilapidated mud walls, 15 ft. high is entered by three gates, and has an indifferent bazaar. Cotton is extensively cultivated in the neighbourhood. P. about 3000.—(Masson.)

JELLASORE, a tn. Hindoostan, prov. Bengal, 66 m. S.W. Calcutta, 1 bank Saluonka.

JELLING, a vil. Denmark, Jutland, bail. of, and 6 m. N.W. Vejle. It contains a parish church, a normal and an agricultural school. It is of considerable historical interest, as the site of one of the most ancient palaces of the Danish kings, called Hougards. The tombs of Gorm the Old and his queen Thyra, in the form of large tumuli stand on each side of the church and within it are the famous Jellinge Runic stones, while Harald Blaatand erected in honour of his father and mother. The inscriptions on them are still perfectly legible, and they are regarded as the most remarkable monuments of Scandinavian antiquity.

JELLINGHY, a tn. Hindoostan, prov. Bengal dist. Rajshahy 20 m. E. by S. Moorshabad, on a branch of the Ganges.

JELNIA, a tn. Russia, gov. and 45 m. S.E. Smolensk. cap. dist. of same name, on the Desna, at the confluence of the Grudochanka. It has some general trade, and two annual fairs. P. (1850) 2478.—The center, in S.E. of the government is well watered and densely wooded. Pop. 96,200.

JELSA (see. elac) a tn. Spain, Aragon, prov. of, and about 28 m. from Saragossa, on a wide plain 1 bank Ebro. It contains a palace of the Count de Montijo, a church, nursery, townhouse prison, hospital, and primary school and has manufactures of bombazine and blankets; oil and flour mills, and a trade in corn, wine, oil and silk. Pop. 1772.

JELUM, river, Tunis. See JELUM.

JEM, or EL JEM (see. Teyed) a tn. N.W. Africa, state and 124 m. S.E.E. Tunis. It contains a magnificent amphitheatre, in good preservation, with a number of fine statues, and other antiquities.

JEM a river W. Asia. See EMM.

JEMALABAD, a tn. Hindoostan, prov. Madras, prov. Canara, 110 m. N. by W. Calicut; lat. 18° 8' N. lon. 75° 22' E. with an almost inaccessible fort, built by Tippeco, on an immense rock.

JEMARU, a territory of W. Africa, Senegambia, 1 bank Gambia, immediately E. of McCarthy Island and Fort George.

JEMEPEPE, two vils and cons. Belgium.—1. Prov. of, and 8 m. W. Namur 1 bank Sambre, with two flour and mills chiefly employed in agriculture, in the woods, and in sculleries. Pop. 1478.—2. Prov. of and 44 m. S.W. Laige, with flax and hemp spinning, two breweries, five flour mills, two large collieries, and several brick works. Pop. 2287.

JEMGUM a tn. Hanover, gov. Aurich (E. Friesland) 10 m. S.E. Emden, exp. bail. of same name, on the Ems, with a church, manufactures of thread, and a small harbor, at which some trade is carried on. P. 1280 bail. 7088.

JEMMAPE, a vil. and cons. Belgium, prov. Namur, on the Haase, at the confluence of the Trouille, and on the canal from Mons to Condé, 2 m. W. Mons. It has several breweries, a salt-refinery a soap-works, some forges a tannery, four flour-mills, limestone quarries, and a trade in coal, which is extensively worked in the vicinity. The French under Demouras, here, in 1792, gained a great victory over the Austrians. After the union of Belgium with France, Jemmapes gave its name to a department which since 1815 has formed nearly the present province of Hainaut. Pop. 4697.

JEMTALA, a former political division of Sweden which now, with Högadalen the most barren portion of the kingdom forms the county or lile of Osterund.

JEN'A a tn. Saxo-Weimar principality of and 12 m. E. Weimar, in a valley surrounded by naked hills, 1 bank Saale, here crossed by a handsome stone bridge. It consists of the town proper surrounded by a wall, flanked with towers, and of four suburbs and is a dull, antiquated place. It is the seat of several counts of law one of them a superior appeal court for the Saxon Judioles and the jurisdiction of Jena, and contains a R. Catholic and three Protestant churches a school, in which one of the collateral branches of the Weimar family long resided and several hospitals. But it is to its university that Jena is indebted for any celebrity which it possesses. It was opened in 1553, and attained its highest prosperity towards the end of the last century when it numbered Schiller Hamholdt, Fichte, Schelling and Grisebach, among its teachers and was attended by above 1000 students. In 1844 the number had dwindled down to 411. It is a very complete establishment has 23 professors, who lecture on the different branches of law, medicine, philosophy and theology and possesses an anatomical theatre, botanical garden, observatory good physical and chemical cabinets and a library of 100,000 volumes. In 1806 the Prussians here sustained a severe defeat by the French. Pop. 5166 Area of bail. 44 sq. m. Pop. 15,600.

JENIDIGP, three tns Turkey in Europe.—1. (Karsa), in a peninsula, 58 m. N.W. Gallipoli. Near it is cultivated the best tobacco in Turkey. Pop. 3500.—2. (Kra lapad) A tn. Romania, 1 bank Tisza, 28 m. W. by W. Adriaupole. Pop. 2300.—3. (Fardar) A tn. Macedonia, 25 m. W.N.W. Salonika, with numerous mosques and schools. Near it are the ruins of the town of Pella, the birth-place of Alexander the Great and the Lake of Jeundje, an expansion of the Vistula.

JENIN or GIERA, a tn. Asiatic Turkey Palestine, near Damascus, 48 m. N. Jerusalem, on the route thence to Nablus, at the entrance to the valley of Esdraslon. It is surrounded by gardens and hedges of prickly pear; contains about 500 stone-built houses, many of them in ruins and is traversed by a copious streamlet of the purest water. P. 2000 to 3000.

JENISPI, a river, Siberia. See YESHUI.

JENNE, or JENNE, a tn. W. Africa, Senegal, on an isl. of same name, formed by the Joliba or Niger 285 m. S. by W. Timbuctoo lat. 18° 22' N. lon. 4° 50' W. It is surrounded by an earthen wall, about 10 ft. high, and 2½ m. in circumference houses of one story, built of sun-dried bricks they have no windows externally the apartments receiving air and light from an inner court. It is a place of great commercial

activity, and is resorted to for trade by the people of the surrounding country. In the shops, printed muslin, carpet cloths, hardware, and numerous other articles of British manufacture, are to be found. The inhabitants seem to be in comfortable circumstances; they are all Mahometans, and do not permit infidels to enter the town. Pop. 9000.

JENO numerous places, Hungary, particularly — 1 (*Boze-Jeno*), A market in Thüroer Thems, co. of, and 29 m N E Arad, on the White Karis, here crossed by a bridge. It has two churches, and the remains of an old castle, proved, by an inscription on part of it, to be of Roman origin. Some trade in corn and wine, and important annual fairs. Pop. 1608. — 2 (*Dos-Jeno* or *Jenoe*), A vil. Hither Danube, co. Neograd, at the foot of a hill 5 m. W Retag, with a church, and a mineral spring, used both internally and as baths. Near it are the ruins of the old castle of Kamor. Pop. 1886.

JEPFAN a tn Russia, gov of and 46 m. S.E. Tula, cap. circle of same name, r bank Don, with seven churches and manufactures of ironware. Pop. (1850), 5124. — The tract, in the S.E. of the government, stretches along the Don, and has good fertile land with considerable tracts of marsh and heath. Pop. 97,000.

JEQUINHONIA or **KIO-GRANDE DO-DEL-MONTE**, a river, Brazil which rises in the serra Pedra Kofonda, about 80 m. S.W. the town of Sorre in prov Minas-Geraes flows first N through that province, then N.E., enters prov Bahia, and shortly after, passing the town of Belmonte falls into the Atlantic. Its principal affluents are the Aracua on the right, and the Vaoira on the left. It seems with fluv from its source to its mouth, but unfortunately is not of much navigable importance, the water at its mouth, even in the highest tides, having no greater depth than 10 f. or 12 f.

JERANI a river, Icaria, Khuzistan. It rises in the Bakhtiari mountains flows S.W. past Behbahan thence it flows first N.W., and then W.S.W. past Dorak, above which it becomes navigable. Below Dorak its waters become much diminished from being taken off by six canals for irrigation, and one of which, connecting with the Karoon has been mistaken for a branch of the Jerani. A further portion of the waters of this stream is lost in some marshes and the remainder reaches the Persian Gulf — about lat. 30° 15' N., lon 49° E. — under the name of the Luebah and still navigable for boats. Total course about 200 m.

JERASH, Syria. See **GERARA**.

JERASHAN a river, Russia. See **IMORIAN**.

JERBA, or **GERBA** an isl in the Mediterranean, belonging to Tunis, on the E. side of the Gulf of Onbes and separated from the mainland by a very narrow channel lat (Boukal Castle) 38° 41' 6" N lon 11° 15' 10" E. (n) It is 23 m. long, E. to W., by 14 m. broad level, fertile, and in a high state of cultivation.

Large quantities of live stock are reared here and the manufacture of shawls, linen, and woollen cloths, is carried on to a great extent. Pop. about 30,000.

JEREMIE, a tn, in isl and empire Hayti, W and of the S. peninsula, 115 m. E. Port Leguabian. Near it coffee sugar and indigo are cultivated.

JERIZ or **Jamuz** see **MARQUENABU** a tn, Spain, Andalus, prov and about 25 m. from Granada, with dirty houses, and still dirtier streets a palace of the Duke d'Osuna, a church, rich in relics, a townhouse with prison; a primary school manufactures of iron and copper ware, limestone quarries, and a trade in fax. Pop. 1726.

JERIZ-DE-LA-FRONTIERA, or **JERIZA**, a tn, Spain, Andalus, prov of and 16 m. N.W. E. Cadix, in a beautiful and fertile plain. It was formerly surrounded by walls, flanked with towers, of which only portions now remain in a very dilapidated state. It consists generally of well built houses, of two or three stories, arranged in regular squares, or spaces, paved clean and well-lighted streets. The principal buildings are — the collegiate church (Iglesia Colegiada), a large structure, but heavy and tasteless, consisting of three

naves, and surmounted by a dome the church of San Miguel, with some fine sculptures and reliefs, several other churches, not much deserving of notice; seven monasteries and twelve suppressed monasteries, the Alcazar, an old Moorish castle, in ruins, the townhouse, an ancient and elegant structure, with a facade of Corinthian pillars a college or gymnasium, and several public schools a general, a foundling, and two other hospitals. The manufactures are of little consequence, but the trade, of which the staples are corn and wine, is very important. The corn is derived from the surrounding district, and either sold in the market of Jeriz, or shipped directly at what is called the Ferial of Jeriz. The quantity annually exported, on an average of the five years ending 1846, was 16,000 qrs. The annual export of wine, of which the greater part is sent to Great Britain, and there well known under the name of Sherry was, on an average of the ten years ending 1846, 1,082,388 gals. Jeriz-de-la-Frateria is a place of some antiquity, but its history possesses no interest. Pop. 83,104.

JERIZ-DE-LOS-CABALLEROS, a city, Spain Estremadura, prov and 40 m. S. Badajoz at the foot of a hill covered by a castle, near r bank Arzila. It is partly surrounded by an old Arab wall entered by six gates, and is in general well built. It has mostly clean, wide, and paved streets; eight squares, four parish churches, nine chapels, four convents, handsome and substantial town and court houses, with prisons a college, several schools, two hospitals, a theatre, storeroom and cavalry barracks manufactures of linen and woollen cloth soap, leather earthenware, wax, bricks and tiles and a trade in its manufactures, pigs, and fruits. Pop. 6120.

JERICA, a tn in Spain Valencia, prov of, and 27 m. W.S.W. Castellon-de-la-Plana, on the side of a hill, above l bank Puasuen. It is ancient, possessed considerable importance both in Roman and in Saracen times, and consists of an old and a new town, the former surrounded by a wall flanked with towers. It rises in the form of an amphitheatre and at a distance presents a fine appearance but internally has little beauty. It contains a parish church, a solid and well proportioned structure, with a facade of black marble a townhouse, in a very dilapidated state, a school, and hospital and has manufactures of linen strong paper and copper ware and several distilleries, oil and flour mills. P. 2979.

JERICHO [modern, *Jika* or *Erjika*], a famous ancient city of Palestine, now represented by the wretched village of Rha, 18 m. S. by N Jerusalem lat. 31° 57' N., lon. 35° 33' E. Rha is merely a congeries of miserable huts, built of loose stones, and covered with flat roofs, composed of reed or straw plastered over with mud, the whole being, sur-

VIEW FROM JERICHO, the Dead Sea in the distance. From Fakhri. Voyages dans le Levant.

rounded by a fence of the same material, enclosing a small yard. It contains a ruinous square tower with a dirty court 30 ft. or 40 ft. square, and about the same height, of doubtful antiquity but regarded by pilgrims as the house of Eusebius. The inhabitants have a sickly appearance, and are reckoned

vicious and indolent; while everything about them bears the mark of sloth and squalid poverty. They keep a few cattle and sheep, and till a little land for grain, as well as for gardens. In the latter are some vines, and in the vicinity of the village some fine agave, while, on the W. a noble grove stretches away N. to the distance of upwards of 2 m., and a few miles S.E. lies the mouth of the Jordan and the Dead Sea. Pop. about 300.

JERICHO a tn Prussia, Saxony, gov of, and 80 m. N N E. Magdeburg, cap. citre Jerichow II., r bank Elbe, with two churches, several distilleries and mills, and a trade in cattle. Pop. 1612. — The *Cucum* properly consists of the two circles of Jerichow I. and Jerichow II. Area of the former, 417 sq. m. Pop. 56,500. — Area of the latter, 402 sq. m. Pop. 46,411.

JERN a tn. Central Asia, Badukhan, l. bank Koksha, lat 38° 50' N; lon 70° 47' E. Though the largest place in the khannet, it consists merely of an extensive cluster of scattered hamlets, with a substantially-built fort. P. about 1,000.

JERMILLO a tn Portugal, prov Beira-Alta, near the Serra de Estrela, 8 m. from Guarda. It is famous for its cheese. Pop. 1068.

JERPOINT three pars. Irel Kilkeny — 1 (Abbey) 1008 ac. P. Big. 2 (C. Wick) 5995 ac. 1 956 — 3, (Wick) 8517 ac. Pop. 1016.

JERESIMA NYTZ, a vd Bohemia, circle Domanal about 7 m. from Alich. It consists of Upper and Lower Jeresima, and has a number of well-built houses, and a church with a tower and some hewn-roofing, but the greater part of the inhabitants are employed in agriculture. Pop. 1,040.

JERSEY one of the Channel Islands, belonging to Great Britain the largest and most valuable of the group, about 15 m. off N.W. coast France, lat (N. E. point) 49° 18' 54" N. lon. 2° 2' 18" W. (a), greatest length, E and W about 12 m., greatest breadth, 7 m. area about 40,000 sq. Its coast, especially on the N. is extremely rugged and precipitous and is formed by the waves into the most fantastic and picturesque shapes. It is deeply indented all round and has a number of good bays and harbours the chief of which are Boscley St. Catherine, Granville, St. Helier, and St. Brélade. The N. side, on the St. Helier, being open to the strong influx of the Atlantic Ocean, forms much excellent ground. Granite rocks, in some localities overlaid by schists, are the principal formation, and, in the centre of the N. coast, consists of a flatish coral stratum, which is susceptible of a high polish. The interior of the island is fertile, and intersected by deep beautiful valleys. It is abundantly wooded and has altogether a singularly rich and picturesque appearance. The climate is peculiarly mild and agreeable the mean annual temperature being 52° F. Agriculture has, in recent years, greatly advanced. Land brings a high rent and holdings do not, on an average, exceed 15 ac. resulting from the operation of the French law respecting the equal division of property. Wheat is the principal cereal raised besides which, a little barley is grown. Potatoes and pease are extensively cultivated, particularly the former and various kinds of fruits attain the utmost perfection here, including the Chamois, pear, melons strawberries paches and apricots. Cider of which about 20,000 bushels are exported annually is one of the principal products. A considerable portion of the land being laid out in orchards. Cows of the Alderney breed are reared and exported in great numbers but sheep are comparatively neglected, owing to the limited extent of pasturage. The horses are small but well qualified for the work required of them, and the breed has lately been much improved. The trade of Jersey is very considerable, and increasing, owing to the particular privileges its inhabitants enjoy, especially their almost total exemption from taxation, they being allowed to export their own produce to England, subject only to the same duties imposed on the produce of Great Britain, and to the absence of import duties. The exports to England consist chiefly of cattle, potatoes and oysters, the last of which considerably upwards of 200,000 bushels have been shipped yearly. The imports consist chiefly of woollen fabrics, hardware, and cutlery, glass, soap, nutmegs, &c. In 1845 Jersey had 311 registered vessels, of the burden of 37,661 tons in 1853 the number had increased to 370 vessels, of 24,000 tons; and the value of a considerable number of large boats, mostly

engaged in the oyster fishery. Great numbers of vessels are annually built in Jersey in consequence of timber and cord being situated duty free. In 1851 31 new vessels were added to the port of Jersey, measuring 2500 tons; besides these, several large vessels were built for merchants in Liverpool. Jersey has its own legislature the *States*, consisting of the governor and the bailiffs of the Royal Court, both appointed by the Crown the 12 judges of the Royal Court, elected for life and the rectors of the 12 parishes, and 12 constables, elected every three years by the ratepayers. Appeals lie to the Queen in Council. The natives speak corrupt French, and are very industrious. The island is divided into 12 parishes, and is attached to the diocese of Winchester. Principal towns, St. Helier, situated on the S.W. side of the island. Pop. (1841) 47,544, (1851) 57,020.

JJ-RSEY CLIFF a tn U States, New Jersey r bank Hudson, opposite New York, with which it is connected by a steam-boat ferry at the termination of the Morris canal, connecting the Delaware with the Hudson, 53 m. N. E. Trenton. It is regularly laid out with broad streets, at right angles to each other. It has four churches, a lyceum, a female academy and a high school for boys, an extensive pottery, flint-glass factory and several iron-foundries, a saw-powder, and a starch factory. By railway Jersey city is directly connected with all the N., N. and W. railway systems of the U States. Pop. (1850) 6895.

JJ-RSEY (New) one of the Eastern U States bounded by New York E. by the Atlantic Ocean and the Hudson River S. by the Atlantic and W. by states Delaware and Pennsylvania, from which it is separated by the Delaware river lat 38° 56' to 41° 20' N. lon 73° 54' to 75° 27' W. length 168 m. breadth 53 m. area, 8330 sq. m. The coast, being low and shifling has no harbours, except for small vessels but the bays of Newark, Raritan, and Delaware, form excellent harbours for ships of the largest burthen. The principal capes are Cape May and Sandyhook the former on the N. side of Delaware Bay and the latter at the entrance to New York harbour. The N.W. part of the state is mountainous, being crossed by two ranges of the Appalachian chain of which the W. is called the Kittatinny ridge, and the E. the South Mountain. Schooley's Mountain, in the last-mentioned range, is much resorted to in summer, on account of its climate and scenery as well as for its mineral waters. A range of trap or granite on the Hudson, called the Palisades, is principally in this state. Towards the river it presents a steep and sometimes perpendicular face of from 200 ft. to 500 ft. high, and is about 2½ m. wide, with a summit of table-land, from the margin of which there is a gradual slope to the W. The chief minerals are iron, which abounds, especially the kind called bog ore, and copper. In the prairie ranges are mica, red oxide of iron, clay, limestone, and serpentine. The middle portion of the state is agreeably diversified by hills and valleys, but the R. part is level and sandy and to a great extent barren yielding scarcely little else than shrub-oaks and yellow pine but marl, which is plentiful greatly improves its fertility. The other portions of the state have a good soil and, besides excellent pasturage produce the usual cereals, with Indian corn, buckwheat, and potatoes. The fruits are good especially apples, peaches, cherries, plums, and peaches. The climate is mild and nowhere is the cold severely felt in winter except in the mountainous regions of the N., where the finest cattle are reared and large quantities of butter and cheese made. The Hudson and Delaware flow partly in the state and it is, besides, intersected by other rivers, including the Raritan the Passaic, and the Hackensack, all of which are, to a greater or less extent, navigable for small craft. The principal manufactures are iron and ironware, nails, cotton fabrics, shoes, hats, carriages, red and white lead, and some articles of brass and copper. Oyster and other shell-fisheries are also carried on to a great extent along the coast. Its principal exports are agricultural produce, cattle, sheep, horses, butter, cheese, leather, and iron, but they are to a very limited extent. The state is intersected by several railways, communicating with the lines of the N. E., and W. states and by two canals, uniting the rivers Hudson and Delaware, and the Raritan and Delaware.

The principal seat of learning and education is the college of New Jersey or Nassau Hall, in Princeton, one of the prin-

cial colleges in the U States besides which there are Lutheran, in New Brunswick, Presbyterian and Dutch Reformed theological seminaries, and numerous schools of various kinds. The government is vested in a governor, chosen for three years, a senate, likewise elected for three years; and a general assembly chosen annually. The principal towns are—Trenton, the capital, Newark, New Brunswick, Paterson, and Burlington. New Jersey was first settled by the Dutch, from New York, between 1614 and 1690. It divided the constitution of the U States in 1787. It is adapted into 20 counties. P (1840), 878,300, (1850) 489,981.

JERBE, a tn. Spain, Extremadura, part of and 66 m. N N E. Cáceres, in a valley watered by a river of same name. It is a poor place, consisting of one wide and irregular street lined with houses built of wood and mud. has a parish church, with a very ancient tower, a townhouse, including a prison and school, several flour mills and a trade in wine, oil, and chestnuts. Pop. 1008. —The river rises on the frontiers of Old Castile, flows S. through prov. Cáceres, re-ceiving the Cúbar and Serrada, passes Plasencia, and joins I. bank Alagon, after a run of 30 m.

JERUMENHA a tn. Brazil, prov. Piauí 1 bank Georgetown, 100 m. W. Orixás, with a parish church; and a trade in cattle, tobacco, rice, mullet, and cotton. The district is fertile, but has extensive flats, with much stagnant water, which make it unhealthy. Pop. of dist. 3000.

JERUSALEM (Arabic, *Al-Quds* [The Holy]), one of the most ancient, and from the wonderful events of which it has been the theatre, one of the most interesting cities in the world situated in Asiatic Turkey. Palestine, peak, and 126 m. S. S. W. Damascus at the height of 2500 ft. above sea-level. lat. 31° 46' 48" N. lon 35° 13' E. The district in which it stands, forming part of the elevated plateau which extends from the plain of Kedron to S. to a line connecting the S. E. corner of the Mediterranean with the S. extremity of the Dead Sea, has a rugged and somewhat sterile appearance, being composed of a series of ridges of limestone, intersected by narrow and precipitous ravines. In many places the rock is seen puering the surface in blocks and patches, almost devoid of any covering of soil, and though the olive evidently thrives well and much ground is under regular culture, vegetation is, on the whole, by no means luxuriant. The site of the city itself is well defined. A broad swell of ground commencing in the W. near the summit of the plateau above mentioned, and almost on the line of watershed between the Mediterranean and the Dead Sea, descends with considerable rapidity to the E., and then terminates on the precipitous edge of a ravine called the Valley of Jehoshaphat.

A similar ravine, called the Valley of Hinnom commencing in the W. runs first S. and then E. till it unites with the former. Jerusalem occupies the greater part of the space included within the fork of these two ravines. This space, however, is not continuous. A valley less precipitous than the two already mentioned, and called the Tyropoon or Valley of the Chananians, traverses it nearly from N. to S. and divides it into two nearly equal portions, while these portions are again subdivided by two minor transverse valleys, thus forming, in all, four distinct ridges or hills—Zion on the S. W., Akra on the N. W., Moriah on the S. E., and Bezetha on the N. E. The bottom of the Valley of Jehoshaphat forms the bed of the brook Kedron, which flows only in the rainy season and on the opposite side of it, on the E., rises the Mount of Olives, overlooking the city, and commanding the finest view of it. To the S. of the Mount of Olives, and properly a continuation of it, is a hill called the Mount of Offences. On the S. of the Valley of Hinnom is another called the Hill of Evil Counsel; and, considerably to the N., beyond a W. sweep of the Valley of Jehoshaphat, a series of lofty summits are conspicuous, and thus, on all sides except the W., Jerusalem may be truly said to be en-

compassed by mountains. In ancient times, when the city was in its greatest glory, not only were the four hills of Zion, Akra, Moriah, and Bezetha, but also a considerable space, both to the N. and W. of them, included within its walls. The actual walls are of more limited extent, and have only a circuit of 2½ m. They were built by the Turks, about three centuries ago partly on the site, and, for the most part, with the materials of the ancient walls, and, following the inequalities of the ground, have a height varying from 20 ft. to 80 ft. They are composed of heavy stones, some of which, particularly in the lower parts, where the original walls appear to have been left untouched, are of enormous magnitude, surmounted by a battlemented and loop-holed breastwork, and flanked at intervals, by massive towers. The E. wall stretches, nearly in a straight line, from S. to N. along the edge of the Valley of Jehoshaphat, and has, nearly in its centre, a gate—called by the Franks St. Stephen's, and by the Mahometans Bab-es-sabat [Gate of the Tribes]—leading down to the brook Kedron, and across it to the Mount of Olives and to Bethany. The N. wall runs at first nearly due W. and then curves gradually round in a W. S. W. direction, till it reaches a second gate—called by the natives Bab-e-Amud [Gate of the Pillar] and by the Franks the Gate of Damascus, because in the line of the great road leading to that city and to the other important towns in the N. The W. wall is very irregular. Commencing at the gate now mentioned, it proceeds first in a S. S. W. direction then winds round a prominence which rises out considerably to the W., and then runs irregularly in a S. E. E. direction along the W. side of Mount Zion. In this wall, immediately S. of the prominence, is a third gate, called the Jafa, Bethlehem or Hebron Gate; because on issuing from it, two roads branch off one W. to the first and another S. to the last two of these cities. The W. wall originally was continued S. to the abrupt termination of Mount Zion, above the Valley of Hinnom. At present it stops short considerably to the N. of its ancient termination and is succeeded by the S. wall which, after running a short way due S. along Mount Zion is continued in an E. N. E. direction, across the Valley of Tyropoon, and thence toward by Mount Ophel, forming the S. part of Mount Moriah to its junction with the S. E. corner of the E. wall. A considerable part of Mount Zion, which was wholly included within the ancient, is thus excluded from the modern city, and, being mostly under regular culture, presents a remarkable fulfilment of the prediction that Zion should become a ploughed field. In this S. wall there is a fourth gate, called

THE BETHLEHEM GATE AND CASTLE OF DAVID, JERUSALEM
From Fortin, Vierge (see) in Lorient.

the Gate of Zion but it merely leads out to the adjacent parts of the mount, and is not in the line of any thoroughfare. Besides these four gates still open, are others four which have been built up and on the W. side, near Bethlehem Gate, conspicuously situated on the highest part of Mount Zion is a citadel, called also David's Castle and the Tower of Hip

plains, surrounded by strong walls flanked with towers. Thus bastions, the massive structure of the walls, and the preceptum ravines along which they are partly built, must have made Jerusalem capable of offering a very powerful resistance when attacked by any of the ancient modes of warfare, but a besieging army, with regular artillery by occupying the hills which command it, more especially the Mount of Olives could easily force it to submit.

The interior of the city is not attractive. A large part of it is occupied by mosques, churches, and convents, and the number of inhabited houses being, in consequence, comparatively small there is a great want of animation in its streets.

THE VIA DOLOROSA, JERUSALEM
From sketch by A. Campbell, Esq.

The houses too though built of stone and for the most part very substantially with flat roofs, from which numerous small domes rise, and have occasionally an imposing appearance present no windows to the streets, which according to generally narrow ill paved, and sloping to the centre—are merely long lanes with dead walls on each side of them. The only street, well known by its name, is the Via Dolorosa, so named because our Saviour is said to have borne his cross up it when about to be crucified. It runs from W to E, across the hill of Acra, and then after a short turn to the N, is again continued E between the hills of Bezatha and Moriah to St. Stephen's Gate. Another principal street proceeds in a direction nearly parallel to the former from the hill of Bezatha to the Gate of Zion, between the hills of Acra and Zion to the bazaar and then, after a short turn S., again E. to the W enclosure to the hill of Moriah. Nearly at right angles to these two streets is one which proceeds from the Gate of Damascus S., in the line of the bazaar and almost through the centre of the city and is only terminated at the S. wall, E. of the Gate of Zion. This street, and more especially the part of it occupied by the bazaar, the shopkeepers in which are mostly Christian, at the greatest thoroughfare, and the only one in which a spirit of activity is seen.

The public buildings are numerous, and either by themselves or their enclosures, occupy the far larger part of the space within the walls. The largest of these enclosures is that of

Moriah, now called by the Mahometans El Haram Esh Sharif [The noble sanctuary] It is in the form of a regular parallelogram surrounded on all sides by a lofty wall. This wall on the E., and for nearly two-thirds of its length on the S., is the same as that of the city and the whole enclosure is deemed so sacred, that none but Mahometans are permitted to enter it. The consequences of this bigotry is, that this most interesting locality where Abraham's faith was so remarkably in the world was reared can only be viewed by Christians from a distance, or approached more nearly by stealth and at great personal risk. This risk however, has been run by more than one European traveller and all which the enclosure contains is tolerably well known. Its area is computed at one-eighth of that of the whole city and, where not built upon, is laid out as a beautiful lawn planted sparingly with olive, cypress, and other trees. The most conspicuous building is the Mosque of Omar called also Khutbat-ol-Sakhrat [Dome of the rock] a splendid structure of an octagonal form, situated near the centre of the area, on an elevated terrace, approached by four porticoes one of them with an elegant marble colonnade, lighted by 48 windows of stained glass, and surmounted by a magnificent dome. This mosque occupies the site, and is understood to contain some remains of the Jewish temple. Another mosque, called El Akra, also a magnificent structure, and supposed to have been originally a Christian church, covers a large space in the S. part of the enclosure. On the opposite side of the city on the N. brow of Acra, and a little S. of the Via Dolorosa, is the Church of the Holy Sepulchre so called because alleged to contain under its roof the very grave in which our Saviour lay. The accuracy of the allegation unfortunately is more than doubtful and the hallowed feelings which the very idea of standing on such a spot is fitted to produce, are rudely disturbed by the intrusions and impurities which are continually practised at it. The church built in the Byzantine style, was erected by Helena, the mother of Constantine the Great and though not possessed of much architectural merit, is remarkable for the richness of its decorations, and the number of pilgrims by whom it is visited. The other buildings of greatest note within the city are the convents. Immense daily W. of the Church of the Holy Sepulchre and only separated from it by a street are the Greek and Coptic convents. The Latin convent, situated further to the W and partly enclosed by the W wall is a large and massive structure, with extensive courts and gardens, and is the place where European visitors usually take up their abode. The Armenian convent, built on a still more extensive scale, and capable of accommodating 1000 pilgrims, is finely situated on

THE POOL OF BETHSADA JERUSALEM — From sketch by A. Campbell, Esq.

Mount Zion in the angle formed by the junction of the W with the S wall. Immediately to the E. of it is a chapel said to mark the site of the house of Anna. Considerably to the S.W. and immediately outside of the S. wall, opposite to

the Gate of Zion, another building with an Armenian convent adjoining, is pointed out as the house of Caliph. Still farther S. on the mount, and forming one of the most conspicuous objects which Jerusalem presents when approached from the N., is a lofty mosque said to be erected over the tomb of David. The traditions which fix these localities are of very doubtful authority, but the vicinity presents various other localities, better authenticated, and possessing, at least, equal interest. Among them may be mentioned Aseldame or the Field of Blood, purchased, as a strange burying-ground by the money which Judas had received for his treachery, and situated on the S. edge of the Valley of Hinnom, the pool of Siloam, situated near the junction of the three valleys of Hinnom Tyropoeon and Jehoshaphat; the pool of Bethesda, close to the E. wall, near St. Stephen's Gate and the garden of Gethsemane situated at the foot of the Mount of Olives, on the E. side of the brook Kedron, and still containing venerable olive trees, evidently of such ancient growth, that their existence at the time of our Saviour's agony is, to say the least, not impossible.

Jerusalem, if identified as many have supposed, with Salem where Melchisedech reigned must have existed about 5000 years before the Christian era but it is not mentioned by its own name till about a. c. 1600 when it was in the hands of the Jebusites, and was wrested from them by the prowess of Joshua. The citadel however, continued in their possession till the time of David, who having succeeded in finally dislodging them, took up his residence in the stronghold of Zion, and made Jerusalem the capital of his kingdom. Under him it rose rapidly in importance, and received numerous embellishments but these were all eclipsed by the more magnificent structures of Solomon, whose crowning work was the erection of a temple more gorgeous than any which the world had previously witnessed, and infinitely distinguished above them all by its possession of a visible symbol of the Divine presence. The rash proceedings of his successor Rehoboam and the consequent revolt of ten tribes must have shorn Jerusalem of much of its glory but it still continued, for several centuries, to take precedence as one of the most distinguished cities of the East. At length, having awakened the jealousy or excited the aversion of neighboring potentates, it was attacked in succession by the Egyptians, Assyrians, and Babylonians. The last was headed by Nebuchadnezzar who a. c. 588 having made himself master of the city, destroyed it, burnt down the temple, after rifling it of its treasures, and carried off those of the inhabitants whom the sword had spared as captives to Babylon. After 70 years of captivity, Cyrus permitted the Jews to return and the temple, though on a scale of much less magnificence than before, was rebuilt a. c. 515. Jerusalem now enjoyed a period of repose, and had regained a considerable degree of prosperity when, on the dissolution of the Macedonian empire, which Alexander had established it was seized and sacked by Ptolemy Soter who carried off a great number of the inhabitants to Alexandria. By the victorious achievements of the Macedonians, the Macedonian yoke was thrown off, and Jerusalem in common with Judea became once more independent, 165 B. C. It next became tributary to Rome but, continuing to be governed by its own sovereigns, had not ceased to exist as the capital of a kingdom when the Barians appeared. By the infamous rejection of Him it soiled its doom; and, about 40 years after it had wounded its King, the curse which, during the perpetration of that atrocity, it had implored on itself and its children, was realized, and after enduring a siege by the Romans under Titus Vespasian, in which unexampled horrors were endured it was swept with the beam of destruction, A. D. 70. At a subsequent period, A. D. 138, Adrian destroyed any portion of it that had escaped, ploughed up its ruins, and endeavored to extinguish its very name, by founding the new city of *Ælia Capitolina* in its site. It continued thus depressed till the beginning of the 4th century, when, Rome having become Christian, Jerusalem shared in the benefit, and assumed the appearance of a distinguished Christian city under the fostering care of Helena, mother of Constantine the Great. This period of prosperity prolonged by a succession of Christian emperors, was suddenly terminated in 636, by the conquest of the Mohammedans, under the Arabian Khalif Omar, whose dynasty was afterwards succeeded by that of

the Turks. The indignities and cruelties heaped upon the Christians, and the miser description of their most holy places, roused the indignation of Europe, and led to the Crusades. In 1099 the Crusaders took Jerusalem by storm, and made it the capital of a Christian monarchy which with difficulty, maintained its existence till 1187 when it was finally overthrown by the celebrated Sultan Saladin. Since then, Jerusalem has continued to be trodden under foot of the Gentiles, and now has no higher honour than that of giving its name to a *sarak* in a Turkish pashalik. Its inhabitants, composed of nearly equal proportions, of Mohammedans, Christians, and Jews, have been variously estimated and may amount to about 15,000 — (Robinson's *Narrative in Palestine*, Wilson's *Lands of the Bible*, Cluett's *Explorator Expedition*, Kitto's *Biblical Cyclopedia*).

JERVIE, — A. A beautiful bay and harbour Australia, New S. Wales, about 80 m. S.W. Sydney lat. 36° 8' S. lon. 156° 5' E. (x.) The entrance is 2 m. wide and inside there is a bay or harbour about 10 m. in length and between 3 m. and 4 m. in breadth, capable of containing 200 sail. It is easy of access, affords shelter from all winds, and is abundantly furnished with wood and water. — 3. A cape, S. Australia, S.E. side of the entrance into the Gulf of St. Vincent, opposite the N.F. end of Kangaroo Island lat. 35° 58' S. lon. 138° 9' E. (x.) — 3. A small is. Torres Strait, lat. 9° 55' S. lon. 142° 10' E. (x.)

JERAN port, Arabia. See GUERAR
JESLERG a vil. Hesse-Cassel, Niederhessen cap. hall of same name 2 bank Gila, 98 m. S.W. Cassel, with a ruinous old castle, and several mills. Pop. vii 1280 hall 8408

JESI a m. Papal State. See LEO
JESOL, a small l. in up, 57 m. V.W. Moolten, near L. bank Indus. Some of the houses near the river are built on platforms, supported by strong posts, 12 ft. or 15 ft. high, they are used as places of refuge during the inundations of the Indus, which often overflows the country for 20 m. from its banks

JESSAYA, a river Turkey-in-Europe Roris an affluent of the Danube, which it joins at Semendria, after a N.E. course of about 80 m.

JESSLA, a l. in Prussia, prov. Saxony, gov. of, and 58 m. N.F. Merseburg on the Black Elster, with a court of law two churches an hospital, manufacture of linen, and a fishery Pop. 2420

JESSENYI, or GUERAR a vil. Bohemia, circle of, and about 20 m. from Duman with an elegant castle, two chapels, a courthouse and near it, iron-works Pop. 1148

JESNITZ a l. in Anhalt-Dessau 2 bank Mulde, here crossed by two bridges, 10 m. S.E. Dessau. It is entered by two gates, has two suburbs, a church and manufacture of woollen and linen cloth, a fishery and several mills. P. 2476 JP. 480, an is. Japan. See Yezo

JESSORE, a dist. Hindoostan presid. and prov. Bengal, in the centre of the delta of the Ganges between lat. 23° 28' and 23° 46' N. The S. portion though in the Sunderbunds, and composed of salt marshy islands, is extremely fertile and well adapted, in every respect for growing rice in addition to which it produces salt, indigo, tobacco, and pepper. Much of the district however still continues covered with jungle Area 3619 sq. m. Pop. 381,744 — Jessore, the capital, lies 77 m. N.E. Calcutta in the seat of the civil establishment, and has a large jail and an elegant school

JESSULMEER, or JATELMEER, a l. in the N.W. of Hindoostan Ameer, cap. principally of same name which is the most westerly of the Rajpoot states, 200 m. N.W. Hyderabad (on the Indus) lat. 26° 55' N. lon. 71° 28' E. It is a large and handsome place, of an irregular oval shape, about 2 m. in circuit surrounded by a wall or rampart of loose stones about 12 ft. high and defended by a ditch in the form of an irregular triangle, with towers of hard square stone, situated on every acclivity of the hill on which the town stands but all the defences are in a very ruinous condition. The houses are lofty, and occasionally apocous, rare-roofed and built of a hard, dark-yellow primitive limestone, which is sometimes elegantly carved; and the streets, wider than usual in the East, are laid out with tolerable regularity. Pop. about 35,000 — The RANERATTA of an irregularly-oblong shape, with a length from N.E. to S.W. of about 180 m., an average breadth of 60 m.,

and an area of 12,252 sq. m. is barren and unproductive, with an uneven surface, covered either with rock or sand, and containing very little arable land. In some parts, however, good crops of barley (safford) and mowing, which form the food of the inhabitants, are raised. Cotton also is grown, but under circumstances so unfavourable, that three years' forwarding can be expected between each crop. Many districts have tolerable pastures, but neither herbs nor flocks are abundant. The wool of the latter is of superior quality. A number of opulent merchants reside in the capital, and the trade is considerable, about 25,000 manna of opium passing annually through the country to Soleda. The returns are sulphur, asafetida, rice, and tobacco. The ruler bears the title of Haurul, and resides in the above fort. The great bulk of the inhabitants are Hittites Rajpoots. Few of them are Mahomedans. Pop. 74,000.

JESTETTEN, a vil. Baden, circle Upper Rhine capital of same name, on the Swiss frontier with a parish church and two castles in ruins. Pop. vil. 890. hall 8185.

JESUS, an isl., Nova Canada, 8 m. N.W. Montreal formed by the Praire and St. John rivers, the two branches of the Ottawa, before its junction with the St. Lawrence. It is 35 m. long by about 6 m. broad, is fertile, and well cultivated, and produces abundant crops of grain, pulse and fruit. Its S.E. part is covered with excellent pasture and fine pastures.

JESUS-MARIA an isl. S. Pacific Ocean W. New Ireland, lat. 10° 22' S. lon. 147° 46' E. (n.).

JETHOL one of the smaller Channel islands 1 m. E. Guernsey, surrounded by rocks, and having a picturesque appearance. Pop. 6.

JLITINGEN, a market in Bavaria, circle Swabia, on the Mindel here crossed by a bridge 11 m. W. Augsburg. It contains a castle and has a trade in corn. Pop. 1631.

JEVLEA, a tn. W. Germany, duchy Oldenburg, cap. circle of same name 53 m. N.W. Oldenburg on the Slettel, a navigable canal which communicates with the port of Hookslut. It is surrounded by walls and ditches, and entered by four gates has an old castle, of large dimensions; a Protestant and a Catholic church, a synagogue, orphan hospital, post-office, town-houses, and several superior schools. Manufactures of tobacco, tanneries and breweries, a saw, and other mills, and a trade in cattle. Pop. 2551. The castle is a low tract, bounded on the N. by the German Ocean, and only preserved from inundation by a system of carefully managed sluices. Area, 103 geo. sq. m. Pop. 1,567, almost all Protestants.

JEWING FOUN par. Eng. Sussex, 2099 ac. 1 up. 32. **JEW ALA MUKI** [Mouth of same] a tn. Punjab, in the Jalandhar Doab, 10 m. N. W. Ludhiana. It is dirty and neglected but has an extensive hamlet, containing numerous shops and votive gardens. There are several temples, in one of which dedicated to Siva a statue, produced by indelible gems issuing from fissures in the rock, burns continually and draws thither annually many pilgrims, who present offerings of butter, sugar, &c. Near the town is a valuable mineral spring. Pop. about 3000.

JHYPOOR, or **JHYPOOR**, a principality Hindoostan, Ajmer, one of the E. Rajpoot states, tributary to the British, between lat. 26° and 28° N., cap. Jhyppoor. Area, 15,251 sq. m. The soil is in general sandy and strongly impregnated with salt, large quantities of which are manufactured for exportation. Certain parts of the state produce wheat, cotton and tobacco. Sheep are reared in some localities for their wool, and in most parts there are good cattle. Herds of deer also roam over large tracts. In some of the towns, cloth, swords, and matchlocks are manufactured while fine cloths, Benares manufactures, Cashmere shawls, opium, lead, sluicework fruit, and horses, are imported. Most of the villages in Jhyppoor are fortified with walls and ditches. It contains also some of the strongest fortresses in Hindoostan, and an immense small fort or garrison and Jan temples. P. 1,291,124.

JHYPOOR, or **JHYPOOR**, a tn. Hindoostan, Ajmer, cap. above principality, in an irregular valley, 150 m. S.W. W. Delhi; lat. 26° 50' N. lon. 75° 50' E. It is 8 m. long, 14 m. broad, surrounded by a substantial stone wall, encircled by a crenel, with a line of fortifications extending along a range of neighbouring heights. It is said to be the handsomest and best-built town of Hindoostan, and many of

its streets and squares, both as regards width and architectural effect, would bear a favourable comparison with those of most of the cities of Asia, or even of Europe. The houses are generally of stone, three or four stories high and covered with a fine stucco. The façades are, in many instances, embellished with frozen paintings and numerous marble porticoes and sculptures, with which the houses in general are furnished, have a remarkably agreeable effect. It contains a magnificent palace, and temples of greater dimensions than any that is to be found in Upper Hindoostan, built in the purest Hindoo style. About 4 m. W. is Jhyppoor Ghant, a stately edifice, where a palace was built and gardens laid out by one of the rulers. 1 up. about 80,000.

JEZD a city Persia, the largest of the Curia Muria (nabot sec.).

JEZIRAH-EN-ONAN [anc. Bembé] a tn. Asiatic Turkey, pach. of, and 120 m. S.E. Diarbekir on a treeless island 900 ft. above the sea, about 24 m. in circumference, formed by the Tigris, and nearly all of which it occupies. It is of an oval form, and is surrounded by a low wall, which as well as the houses, is in many places in ruins. The remains of a bridge, built over both branches of the river by the minister Neursadim, still exist.

JEZEEL, a tn. Palestine. See **JEZEEL**.

JHJVENY, a vil. Hungary Thaur Thales co. Temeswar near Nokes, with a Greek non-union church 1 1500.

JHJLAWAN a prov. Baluchistan, bounded N. by Sarawan and Khet. E. by Cutch Gundava, and Schinde, S. by Lush and Mekran, and W. by Mekran and Sarawan between lat. 28° and 29° N. lon. 68° and 70° E. Length N. to S. 200 m. breadth, E. to W. 150 m. Area, about 20,000 sq. m. It is extremely mountainous, and in general barren, and very thinly peopled. The inhabitants, who are chiefly engaged in pastoral pursuits, are estimated by Masson at about 80,000. Its principal places are Nal, Khuzdar and Gekroo.

JHANSI, a tn. and fort, Hindoostan, Hindoostan capital of a small principality, 63 m. S.E. Gwalior. It has considerable manufactures of bows, arrows, spears, and carriages, and is a great thoroughfare between the Deccan and the upper provinces of Bengal. Area of princip. 3552 sq. m. Pop. 1900.

JHONJUNVA a tn. Hindoostan in Aymer 125 m. S.W. Delhi lat. 28° 3' N., lon. 75° 23' E. It is handsome, and ornamented with trees and gardens, which give it a pleasing appearance.

JHOU a tn. Baluchistan, prov. Mekran cap. of a small dist. of same name lat. 26° 11' N. lon. 65° 35' E.

JHYLUM river Punjab. See **JAYLUM**.

JIDDAH or **DJIDDAH** [anc. Bado-Begum] a tn. and seaport, one of the chief trading ports of Arabia, prov. Hijaz, on the Red Sea lat. 21° 28' 18" N. lon. 38° 13' E. (n.) 68 m. W. Mecca, of which it is the port, on a low sandy and sterile plain, badly supplied with water in front of a range of hills 10 m. from the sea. It is of a square form about 1500 paces in length, and half as many in width, and is enclosed by a wall with small towers at intervals, and having two forts with about ten embrasures each, at the angles towards the sea, but there are few guns mounted. A long well built street of two-storied houses, lined with shops, and containing several good khans, runs parallel to the sea. The other streets are not paved and are generally narrow and irregular, although some of them are wide and airy, houses mostly composed of mud, and, being whitewashed, present a striking appearance from a distance. It is comparatively clean, but has many suburbs. There is an extensive bazaar well supplied with meat, fruit, vegetables, and grain, but strangers are charged exorbitantly. There are three entrances to the town on the sea-side of which the centre and only public one is that at the Jetty, but the others are allowed to be used occasionally. There is also a gate on each of the other sides; that on the S. side is seldom opened, the W. one is common to all; but to the E. is the Mecca gate, through which none but the professors of Islamism are allowed to pass. The port, which is very indifferent, has two petty quays, adapted for small vessels only; the larger being obliged to anchor in the roadstead, about 5 m. from the shore, where there is excellent anchorage. It has a very mixed and stirring active

population carrying on a considerable trade Jiddah being in some degree the port of India, Egypt, Africa, and Arabia many of the merchants are very wealthy; some of them possessing property, it is said to the amount of £200,000, while there are at least a dozen mercantile houses, each of which has a capital varying from £40,000 to £50,000. In 1848, the imports amounted to £248,000, of which a third part came from India and the Indian Archipelago. Jiddah receives from Egypt all kinds of provisions including grain, legumes, &c. from Europe, through Egypt, tin, lead, mercury, copper, and other metals, glass, for mirrors, and in the form of bottles for essences, &c. of various kinds, military foot sugar, soap, cloths, silks, and cottons from India, narcotics, materials for turbans finely made girdles, and raw sugar from Africa, elephants teeth ostrich feathers, musk, mules, and slaves; from Arabia Pezom, dates from Lobos, pearls and naure, and from Hodeds and Mekha, incense, medicinal plants, and timber and a considerable amount of merchandise is brought by pilgrims, of whom 120,000 pass through annually on their way to Mecca. The exports consist of gums, incense, essences, medicinal plants, such as soma and cassia tortoise-shell, and coffee. Population estimated at from 12,000 to 20,000, or including the suburbs, which are equalled in the extreme some make the total 40,000.

JIGA-GOUNGGAL [Fortress of the White Town] the largest town in Thibet after Lassa, from which it lies S.W. on the r. bank Yarou-Dzang, lat. 29° 56' N. lon. 91° 28' E. Pop. said to be 20,000 families.

JIHOUN, river Asia. See OXUS.

JIJILLI or **JIMILLI**, a fortified maritime in Algeria. 50 m. N.W. Constantine lat. 36° 50' N. lon. 5° 54' E. It has a handsome hospital a little maritime commerce, and regular steam boat communication with Algiers. It was taken possession of in 1664, by the Duke of Beaufort, who laid the foundations of the fort which still defends the town. Pop. including garrison, 1860.

JILONA, a city Spain, Valencia, prov. of, and 16 m. N. Alicante on an acclivity surrounded by the remains of an ancient Moorish castle. It is indifferently built, has steep streets, lined with substantial dwellings, several squares, a spacious parish church four chapels, a townhouse, prison, hospital, storehouse, Lahn, and four other schools. Five fountains, and in the environs are some agreeable public walks. The vicinity though hilly yields good grain fruits, and vegetable, wine and oil and sheep and goats are reared in considerable numbers. Pop. 4705.

JIKALZE, or **SINAGUA**, a town Tibet, near r. bank Yarou-Dzang, 160 m. W.S.W. Lassa, above by Chah-lo-tun hoc, the residence of the Pashoo Lama. Pop. estimated at 100,000.

JILOLA, a river Spain, Aragon. It rises in the N. slope of the Sierra Albarran, near the town of Cella, prov. Teruel, flows circuitously N.W. passing the town of Daroca, prov. Saragossa, and after a course of about 70 m., joins r. bank Jalon, opposite the town of Calatayud. It is well supplied with fish, and its waters are much used for irrigation.

JIMAMALAN a small town, Philippines, on a shallow bay W. side of Luzon, opposite a few miles, and near the confluence of the river Tulaan and Vignit. It is a poor place, and the navigation of its river is obstructed by a bar at its entrance. Pop. 1682.

JIMENA, a town Spain, Andalusia, prov. of, and 14 m. from Jaen, consisting generally of old houses, and narrow, winding streets. It has a Gothic church, surrounded by towers, and said to have been once a Moorish mosque a court house, and primary school, a flour and several oil mills. The inhabitants are almost all engaged in agriculture, and raise grain, olives, and fruits. Pop. 1507.

JIMENA-DE-PAUCONA, a town Spain, Andalusia, prov. of, and 46 m. E. Cadix, on the E. declivity of the Sierra de Gastes, crowned by an old Roman fort. It is regularly built, with steep but clean streets, and possesses two parish churches, four chapels, a townhouse, prison, five schools, and a cemetery; with manufactures of linen, hats, soap, leather, earthenware, bricks, and tiles; and a trade in its manufactures and fruits. Pop. 5678.

JIMERA-DE-LYVAN, a town Spain, Andalusia, prov. of, and 46 m. W.W. Malaga, on a slope near the foot of a lofty mountain range. It is indifferently built, has a parish church, with a Moorish tower adjoining, which is used as a belfry; a

conthouse, prison, and primary school; manufactures of soap, a distillery of brandy and several flour mills. Pop. 1062.

JINGEL in Egypt. See GIZA.

JITOMIR, or **ZITOMIR**, a town Russia, gov. Volhynia, 1 bank Teterev, 870 m. S.W. St. Petersburg lat. (Baranovsk convent 50° 15' 28" N. lon. 28° 40' 44" E. (w.) It is the see both of a Greek and a R. Catholic bishop, has manufactures of leather and linen, an active trade in woollen linen, and silk goods wax, honey Hungarian wines, salt, and tallow; also four important annual fairs. Pop. (1846) 28,000.

—The climate is well wooded and fertile, producing much corn and flax, and rearing great numbers of cattle.

JIZDRA, a town Russia, gov. of, and 80 m. S.W. Kaluga, cap. circle, and of the N. shore of a lake formed by a river of same name. It has a stone and a wooden church, tanneries, and a trade in agricultural produce. Pop. 6880. —The climate has an unobscuring surface, one-half of which is occupied by fine timber. The greater part of the other half is of indifferent fertility. Area, 1964 sq. m. Pop. 110,000.

—The river runs W. of the town, proceeds across gov. Kaluga very circuitously, but nearly E.N.E. past the city of Kozelsk, and after a course of about 100 m., joins 1 bank Okla above Jerusalem its chief affluents are the Reseta, Votok, and Serena. Great quantities of timber are floated down its stream.

JOA—1. A large flourishing town, Punjab, on the Salt range, about 110 m. N.W. Lahore. Near it there are said to be good indications of coal.—2. A mouth of the Indus during inundations, but in the dry season merely a salt-water creek lat. 26° 18' N., lon. 67° 19' E.

JOACHIM one of the Columbranes Ials (Islands) (see)

JOACHIM (Str.) a vil France, dep. Loire-Inférieure 12 m. W. N.W. Bayeux, amidst extensive marshes, formed by the Briere the inundations of which in winter convert the side of the village into a kind of island. The ground around it in its best state, is mere bog, out of which great quantities of peats have been cut during the summer. Pop. 1110.

JOACHIMSTHAL, a town Prussia, prov. Brandenburg, gov. of, and 49 m. N.E. Potsdam, on the lakes of Granitz and Werbellin. It contains a gymnasium and has distilleries, tile-works, and a trade in cattle. Pop. 1647.

JOACHIMSTHAL, a town Bohemia circle Zbinogon on the Weesert, in a valley between lofty mountains of the Erzgebirge, near the frontiers of Saxony, 70 m. W.N.W. Prague. It is the seat of a mining directory, contains a monastery, and several other churches and depends chiefly on the valuable lead and silver mines which are worked in the vicinity. Dollar process were first coined here. Pop. 4366.

JOAG a town Senegambia, kingdom of, and 13 m. E.E. Gaiant, on an affluent of the Senegal, lat. 14° 22' N. lon. 10° 20' W. It is surrounded by a high wall, and the environs produce a good deal of tobacco. Pop. 2000.

JOANKO, a lake, Siberia, on the Arctia circle, m. lat. 175 E. in the territory of the Tobolsk. It is about 24 m. long by 12 m. broad, and discharges itself through the Anadir which issues from its W. extremity.

JOANNINA in Turkey. See JANNINA.

JOAO with affluents, the names of three places, Portugal.—1. *João-de-Mo* (Sko) a town and par. prov. Douro, 3 m. W. Oporto, at the N. corner of the mouth of the Douro with a small harbour defended by a fort, and provided with a light. It is much resorted to by the inhabitants of Oporto for sea-bathing. Pop. 8050.—2. *João de Arcas* (Sko) a town and par. prov. Beira-Alta, about 20 m. from Viseu. Pop. 2904.—3. *João-de-Paqueros* (Sko) a town, prov. Beira-Alta, near bank Douro, where the navigation is interrupted by a cataraet, 35 m. E. Oporto. It has four churches, and a grammar-school. Pop. 1350.

JOAO-DA-BARRA (Sko), a town Brazil, gov. of, and 80 m. E.N.E. Rio-de-Janeiro, r. bank Parahiba, near its mouth, on a barren, sandy flat. It has a parish church and a primary school, and builds some coasting vessels, inhabitants chiefly employed in fishing. Pop. dist. 3000.

JOAO-DA-PALMA (Sko) a town Brazil, prov. of, and 400 m. N. Oporto, on the singular piece of ground between the Palma and Parana, which, by their junction form the Paranaçopo. It has a parish church, primary school, and a trade in cattle.

JOAO-DE-EM (Sko), a town Brazil, prov. Minas-Geraes, in a valley between two mountain ridges, 70 m. S.W. Ouro Preto. It is traversed by the united stream of the Tijoso

and Barreiro, which is crossed by two handsome stone bridges, and lined on both sides by an elegant stone wall. The principal streets, on either side of the river, lie parallel to it, and are crossed by several minor streets, which are less regularly formed. The houses, with scarcely a single exception, are well built. The buildings most deserving of notice, are the church of Nossa Senhora do Pilar a large and handsome edifice of stone, with a facade adorned with sculptures, and surmounted by two towers; the church of São Francisco do Paula, an elegant structure with rich internal decorations; several other churches of less architectural merit, the residences, containing the smelting and refining establishments, the college, with various professorships; the public library; the hospital of Maria, a large and richly-endowed institution; two primary schools, and the townhouse, with an old and new prison. The trade is of great importance, the town being the outlet for the produce of the province, and the returns from Rio-de-Janeiro. This produce consists chiefly of coffee, cotton, and hides, and the principal returns are cacao, guano, woolens, alkali, salt, iron, and various utensils and articles of European manufacture. The commerce is the richest in the province. The few banks, though not of the first quality, raise in abundance all the ordinary crops of the climate, and the mountains abound in gold, iron and other minerals. P 5000

JOZO-DO-PRINCIPE (Rio), two mts Brazil — 1 More commonly São João-Morras, prov Rio-de-Janeiro, 26 m. N. Augusta dos Reis. It contains a church, townhouse, primary school, and prison. The trade is chiefly in coffee, sent to Rio-de-Janeiro by land-carriage, but, in addition to it, sugarcane, mandarin, and millet are extensively grown in the district, which has a population of 6000 — 7, in prov Ceará, on the Jaguaribe, lat. 6° 5' S. It is a small miserable place consisting of a few mean houses, many of them ruinous, but the district is of great extent, rears considerable numbers of horses and cattle, abounds in copper, iron, and other minerals, and has a population of 8604

JOBB (SECT) a market in Hungary Thither Theiss co. Bihor on the Bereity about 6 m. from Szekelybad in a fertile district, with two churches and a very ancient abbey. It was once strongly fortified. Pop. 1200

JOHLE as an Indian Archipelago, at the entrance to the Great Bay N side of Papea lat (W point) 1° 34' S lon. 130° 21' E. (a.) It is about 90 m long E. to W by a breadth varying from 28 to 12 m and is traversed throughout its whole length by a ridge of mountains, decreasing in height towards the W. The coast is high steep covered with woods, and without openings there being not a single cove or creek fit to receive a large ship.

JOJOCAHUA in prov Java. See JOJOCAHUA

JOCKMOCK, a in Sweden prov Unst, dist. Pind. Lappmark, on an affluent of the Lulea, about 140 m N N W from. An iron mine is worked in the vicinity P 1400

JODAR, a in Spain, Andalusia, prov and 24 m E Jaen. It is built hill, has mean dirty streets, a church, chapel, townhouse, with prison attached, two schools, and an old castle, now in ruins manufactures of exported fibres, soap, earthenware, &c. but inhabitants chiefly agricultural raising grain wine oil, and honey in which a little trade is carried on. Pop. 2614

JODOGNE (Flemish Goldenscheide) a vil and com. Belgium, prov S Brabant, on the Grande-Grôte, near the confluence of the St. Jean 24 m S.E. Brussels. It contains a superior primary school and has manufactures of soap, a self-work, oil mill, breweries and distilleries, and an important trade in corn and cattle. Jodogne once possessed a castle, in which the dukes of Brabant, reduced by the salubrity of the air, caused their children to be brought up. This castle was burnt down in 1878. Pop. 8228

JOHANN-GEORGENSTADT a in Saxony circle Zwickau, on a height above the Schwarzwasser in a bleak and mountainous district near the frontiers of Bohemia, 69 m. S W Dresden. It takes its name from the Elector John George I, who built it as an asylum for the Protestants driven out of Bohemia by Ferdinand II. In 1654 contains a handsome church a townhouse, mining and lace schools, the seat of a mining directory and has manufactures of flannel, needles, lace, tobacco, and rum. It stands in the heart of a district rich in minerals, including silver tin lead, iron, cobalt, bismuth, &c. Pop. 2835.

JOHANN (Sanc) three places, Hungary — 1, A vil, co. Lipitz, near Okolencs, with a castle, a parish church, and much frequented mineral springs. Pop. 907 — 3 A vil co. Wessenberg, in a fertile district, with a church. It is inhabited chiefly by Germans, who cultivate the ground, and send large quantities of hay and fodder to Vienna. Pop. 2231 — 3, A market tn. co. of and about 35 m. from Pressburg, in a fertile and well-wooded district, near the confluence of the Theya and Mava with the March. It has several mills, but the chief employment is agriculture. Pop. 1764

JOHANNA (French, *Angoumois* or *Angoumois*), one of the Comoros Is., E. Africa, Mosambique Channel, about equal distant from Comoro and Mayotte, having a central peak of great elevation, in lat. 15° 15' S. lon. 44° 29' 30" E. It is 24 m long by 18 m broad of triangular form abounds in wood and water and presents a pleasing and highly picturesque appearance. The soil is fertile, and produces rice, millet and a variety of fruits. The inhabitants, who appear to be a mixture of Arabs and Negroes, are clothed in the Turkish fashion speak the Arabic language, and are all Mahometans. They are fond of butter. All their trade is carried on through the port of Johanna, on the N. side of the island. The town is surrounded by a high wall has very narrow streets, a mosque and a fort and contains about 2000 inhabitants. Pop. of vil 20 000.

JOHANNEBERG a vil Bohemia circle Bumlau, on the Neus, 9 m from Kliebenburg with a church a school, several mills, and some general trade. Pop. 1163

JOHANNA-VIHAL, a in Austrian Galicia, circle of and 28 m. N W Troppa with a chapel, and in the vicinity, names are worked. Pop. 2000

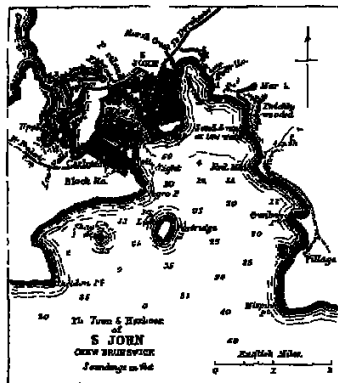

JOHANNEBERG a vil Nassau on a rising ground above a bank Rhine, about 12 m W by S. Mainz. It contains a parish church and a large castle now belonging to Prince Metternich and standing conspicuously among the vineyards which produce the Johanneberg, the finest of the Rheinhessen wines. Pop. 844

JOHANNEBURG a in Prussia, prov Fr. Posen, gov. of and 68 m S S W Gumbinnen cap circ. It is famous on the Pannoch or Pysch, near Lake Rogen or Wansche. It is the seat of a law court, and of several public offices; has a church, castle, and library and a trade in cattle. Pop. 2653. — The climate is flat, and not fertile. Area, 608 sq m or Pop. 34,100

JOHN (Str), a city and seaport, British N America, cap. prov New Brunswick on a rocky peninsula projecting into the harbour at the mouth of the river St. John, lat. (Partridge Island), 45° 14' 6" N, lon. 66° 5' 30" W (u). It stands on rugged and well built, though some of them are inconveniently steep. A projecting rock divides the city into two parts, which are called the upper and lower town, in the former of which the principal wharves and warehouses are situated. The buildings are now principally of brick, and many of the public structures have a respectable and even elegant appearance. The principal edifices are, the Episcopalian and Presbyterian churches, St. Catharine, Methodist and Baptist chapels; together with a marine hospital, two handsome ranges of barracks, a poorhouse, jail and government storehouses. It has a grammar-school a central Madras school, and two public libraries several religious and charitable societies, a providential and savings bank and a chamber of commerce. Carillon, a tn. on the W side of the harbour is included in the municipality and contains some good streets, with a handsome church, a meeting-house, and several fine buildings. The harbour is commodious, safe, and never obstructed by ice. At its mouth is Partridge Island, having a battery light-house, and an hospital for sick emigrants on their arrival in the country. Between this island and the mainland extends a bar,

which is entirely dry at low water and which is furnished with a beacon, surmounted by a light. The fishery within the harbour is valuable, yielding annually from 10,000 to 15,000 barrels of herring, 8000 barrels of salmon, and about 2000 barrels of shad. The commerce of St. John is very considerable. The principal imports consist of British manu- factures and colonial produce, while the exports are timber, fish, furs, and lime. Ship-building is carried on to a great

extent. St. John was founded by American loyalists in the latter part of last century and though it has frequently suffered from severe conflagrations, it has steadily continued to improve and prosper. Pop. in 1840 exclusive of the suburb of Portland, 20,718. The strait at St. John rises in the U. States, near the source of the Connecticut, and after flowing N. E. through Lower Canada for about 200 m. enters New Brunswick, near the parallel of 47° N. when it takes a S. E. direction and, after a total course of about 400 m., falls into the Bay of Fundy, by an estuary 5 m. wide, at the city of St. John. Its navigation is obstructed by several falls and rapids one of which, called the Rugged Narrows occurs about a mile above the city of St. John, it can be passed, however, by slope and velociter at certain times of the tide. The great falls are formed shortly after the river enters New Brunswick, and extend over half a mile, in which distance it falls 75 ft. The river is navigable for flat-bottomed boats of 30 tons burthen up to the foot of these falls. Its chief tributaries are the Matamoras, Tobique, Aroostook, Salmon, Washademoak and Kenabekau.

JOHN (Str) —1. A river or creek, U. States, N. America, Florida. It rises in an extensive marsh and after a course, first N. and then E., of about 200 m., falls into the Atlantic. It has 12 ft. water on the bar at its entrance, and is navigable for small craft for 150 m. from its mouth. —2. A lake, Lower Canada, 120 m. N. Quebec nearly circular and about 30 m. in diameter. It receives several rivers, and on the N. E. side has two outlets, which unite shortly after leaving the lake to form the Saguenay river which falls into the St. Lawrence. This lake abounds in excellent fish.

JOHN (Str) several isles. —1. (Bruce or Scheraga), an isl. Red Sea, coast of Nubia, at the entrance of Foul Bay; lat. 23° 40' 18" N. lon. 36° 9' E. (s.) It is of a circular form, about 700 ft. high, rising in the centre in a sharp peak, of volcanic origin. It is steep on all sides, and utterly barren, affording neither water nor any vegetable production. It was at one time famous for its emeralds but is now inhabited by two or three fishermen only, on the look-out for turtle which are rather numerous. —2. An isl. S. Florida, off Cape Santa Maria, Isl. New Ireland; lat. 4° S. lon. 155° 47' E. (s.) It is about 30 m. in circumference well covered with large trees, and to a considerable extent cultivated. —3. (Or St. Jan), One

of the Virgin isle, W. Indies, belonging to Denmark. lat. (middle), 18° 18' N. lon. 64° 49' W. (s.) about 19 m. long by 4 m. broad, rising to a considerable height in the centre, and having generally a very broken, uneven surface, and in- different, water scarce, some sugar and cotton are grown. On its S. coast, on Cruz bay, at the mouth town of Christiansburg, with 120 inhabitants. The bay affords good anchorage. Pop. lat., 25° 60' —4. (Or Soreloes) a small isl. Grecian Archipelago, lat. 26° 30' N. lon. 26° 41' E. (s.)

JOHN'S (Str) a str. British N. America, esp. Isl. and colony Newfoundland, near the extremity of the most E. of the numerous peninsulas which project from the E. portion of the island lat. 47° 23' 8" N. lon. 53° 49' W. (s.) on an acclivity and consisting chiefly of one street about 1 m. in length, rather irregularly built, but containing many good shops and stores the former mostly of stone. The houses in this part of the town are small, and built of brick, but in the upper parts they are of wood, and are very awkwardly disposed. The town, however, has, upon the whole, been much improved since the fire of 1846, both as regards the style of building, and the width and regularity of the streets. It is well supplied with water and gas, the former brought from a pond on an adjoining eminence, called Signal Hill. The public buildings, exclusive of the churches are, the Government-house, a large plain structure house of assembly, a handsome building of granite a lunatic asylum, hospital, and the market and custom houses, the upper story of the former used as a court room. There are nine places of worship—three Episcopal, one Established Church of Scotland, one Free-church, one Methodist, one U. Presbyterian, and two B. Catholic. The educational institutions comprise two schools in connection with the Church of England, one in connection with the Established Church of Scotland, and two in connection with the B. Catholic church. There are several societies religious and benevolent, a mechanics institute with museum library, and reading-room attached and an agricultural society a brewery, distillery flour-mill and foundry a botanic garden, marine promenade, and three cemeteries. The trade of St. John's consists chiefly in supplying the fishermen, most of whom are B. Catholics with clothing provisions and fishing and hunting gear. The harbour of St. John's is excellent, although narrow at the entrance, the channel from point to point, being only 380 fathoms wide. The tide rises 5 ft. neap-tides 3 ft. but very irregularly being much influenced by the winds. The narrow leading to the harbour are protected by a battery. During the spring season, the harbour is thronged with merchant vessels from London Liverpool, Poole, and Greenock, laden with dry goods, and salt for curing cod. from Hamburg and Copenhagen with biscuits, butter pork, glassware, leatherware, and hosiery, from the U. States with leather, pork, beef and ham, from Spain and Portugal with salt, wines, and preserves and from Barbadoes, and some of the other W. India islands, with sugar, molasses, and rum. The export fish trade commences early in August, when, and for some weeks previously, numbers of Spanish vessels arrive, bringing cargoes of sugar and molasses, the proceeds of which they invest in cod-fish. The ports to which the British vessels are consigned with fish are, Bilbao Oporto Cadix, Figueira, Lagnora, Naples, Barbadoes, and the Brazil. Besides its fisheries, St. John's is extensively engaged in sealing from 150 to 200 schooners and brigs, varying from 70 to 120 tons, muster in the harbour in the months of February and March, preparatory to proceeding to the sealing ground. The town is overrun with dogs, which make a great noise during the night; but are useful, although of vicious temper, being employed in dragging catamarans loaded with wood. St. John's was nearly destroyed by fire in 1846. Pop. resident, 13,000 fishermen, 6000 —(Private Communication)

JOHN'S HAVEN A vil. and seaport Scotland, on Kin-cardine 8 m. N. E. Montrose. A few sloops belong to the port, which are chiefly employed in importing coals, and exporting grain. The inhabitants are principally occupied in fishing and linen-weaving. Pop. 1172

JOHNSBURG (Str) a vil. and township, U. States, Vermont, 37 m. N. E. Montpelier, containing a church, several taverns, potteries, and mills. Pop. 1887

JOHNSTON, a large manufacturing vil. Scotland, on Beathrow, on the Black Cat, 8 m. W. by S. Paisley. It is regularly laid out, with several compact and well-built streets,

and a number of handsome shops; houses in general substantial, of two and three stories. It has an elegant octagonal Established church, with a handsome spire; a Free, and two U. Presbyterian churches, several schools, and libraries. The cotton manufacture, the chief source of employment here, is carried on to a great extent, and some brass and iron foundries are also done. By railway communications with Paisley Glasgow Greenock, Ayr &c. Pop. (1851) 5873

JOHNSTON, par Wales, Penbroke 1293 ac. P. 263. **JOHNSTON**, or CORNWALLIS ISLAND, a group, N Pacific Ocean lat. 16° 53' 20" N. lon. 109° 51' 30" W. They form a lagoon, surrounded by a reef stretching N.E. and S.W. 10 m., and 5 m. broad. Two low islets are on the N.W. side, the one a mudbank and the other covered with bushes.

JOHNSTON STRAIT a narrow channel British N. America, Oregon Territory, separating Vancouver's Id. from the mainland. Having Queen Charlotte's Sound on the N.W. and the Gulf of Georgia on the S.E.

JOHNSTON, par Scot. Dumfries 19,500 ac. P. 1261. **JOHNSTOWN** several places, U. States, particularly—1 A. to New York on elevated ground 46 m. N.W. Albany. It has a courthouse a jail six churches, and manufactures of various kinds. Pop. 5400—2 A. in Pennsylvania, 150 m. W. Harrisburg, with streets at right angles to each other, and miles of narrow lands. Pop. 1713

JOHNSTOWN, a dist. Upper Canada, including Cobles and Grenville, bounded S.W. by the St. Lawrence and on other sides by the East, Haverhill and Midland districts. It is traversed by the Rideau river and canal, and is watered besides by several lakes. It contains a considerable quantity of good land, and is altogether well settled, chiefly by Scotch and Irish. Pop. (1852) 45,695

JOHNSTOWN, par Irel. Kildare 1248 ac. P. 201. **JOHNSTOWN** (1871) a vil. and township, U. States, New York 60 m. N.W. Albany with a church tannery, distillery salt factory and several mills. Pop. 1923

JOHORE, or DUTONG, a tn. Malacca, cap. territory of same name forming the S. extremity of the Malayan peninsula, 35 m. N.N.E. Singapore, on the Johore lat. 5° N. lon. 104° E. It was founded in 1511 by Sultan Mahmud Shah the Twelfth king of Malacca, after the Portuguese had expelled him from his own residence at Malacca and rose to be a place of considerable importance, but has dwindled down into a mere fishing village of about thirty huts—

The **terraces** in its interior is very imperfectly known but the coast has been carefully explored and has an extent of about 50 geo. m. It presents a series of sandy bays alternating with rocky headlands, and is lined by two chains of islands, running nearly parallel to the coast for nearly 40 m. The land along the shores is generally low and appears to continue swampy for several miles inland. The greater part of the drainage is received by the Johore which flows N.W. to S.E. parallel to the coast at the distance of 15 m. to 20 m. The other streams, though numerous, are mere creeks. None of the products of the interior have as yet acquired any commercial importance.

JOHNSDALE a tn. Saxony circle Zwicken on the Schwarzwasser, 45 m. S.W. Dresden. Its manufactures consist of lace, ribbons, parchment, and cordage and it has several flour and saw mills. Mines are worked in the neighbourhood, and afford the chief employment. Pop. 1078

JOHNGY (see JONGGUM) a tn. France dep. Yonne beautifully situated on the Yonne, which is crossed by a handsome bridge, and above which it rises in the form of an amphitheatre 15 m. N.W. Auxerre. A beautiful and spacious quay extends along the river over the whole length of the town. The town proper is indifferently built and the streets, from the nature of the site, are not only irregular and crooked, but numerous steep, that, in several of them, the passenger lays hold of to ascend the ascent. The only buildings deserving of notice are the cathedral an elegant and ornate edifice of the 15th century; and the remains of an ancient castle, finely situated on the highest ground of the town. The manufactures consist of coarse woollens, linen, leather, broadly figured, and vinegar and the trade includes, in addition to these articles, corn, wine, casks, wood and charcoal. The grain markets held twice a week are important; and there are five annual fairs. Pop. 3688.

JOINVILLE E. a tn. France dep. Haute Marne, 25 m. N. Chateau, on the Marne, at the foot of a hill formerly crowned by a celebrated castle. It is a very ancient place, but has lost almost all its importance. It has manufactures of woollen hosiery serge, druggists, and worsted mills. Near it are valuable mines of iron, which employ several blast-furnaces and other iron works. Pop. 3080

JOKA (see KAGA and KAKA) a vil. Hungary, Hither Danube. co. of about 16 m. S. P. Prossburg, near the Kersch-Ujvar arm of the Danube with a church. Fine meadows are grown in the vicinity. Pop. 1914

JOKEO, or GORTHERWICK a market in Hungary, Hither Danube co. Neutra, near Vag-Ujhely, on the Neutra, in a narrow valley surrounded by lofty precipices. It contains a church, situated on a height and two castles, one of them very ancient, and said to have belonged to the Templars has manufactures of earthenware several distilleries, and a trade in cattle. Pop. 1428.

JOI IHA, a river W. Africa. See NIGER. **JOLESVA** ALKOVIA, or ELKOVIA a market in Hungary, Hither Thelus, co. Gümör in the valley of the Eltsch, 14 m. W. S.W. Rosenau with a church, fine castle a good trade in iron mined and smelted in the vicinity and quarries of white marble, resembling that of Carrara. Pop. 4045.

JONAS, an is. Sea of Okhotsk lat. 56° 25' 30" N. lon. 145° 18' E. about 9 m. in circumference, and 1200 ft. high. A crowd of detached rocks lie off its W. side, on which the waves beat with great violence.

JONFAY a vil. and par Switzerland can. St. Gall, circle of and about 1 m. from Rapperswil in a beautiful district. It is well built, has an old parish church finely situated on a height, and containing in its wall a Roman altar with an inscription found in the neighbourhood. Two extensive spinning mills, dye-works and bleachfields. Pop. 2111

JONSBOROUGH par Irel. co. Armagh 2186 ac. Pop. 1507

JONSBOROUGH numerous places in the U. States particularly a vil. Tennessee on Little Limestone Creek, 150 m. E. by N. Nashville. It has a courthouse, a jail two churches, and two academies. Pop. about 900

JONKOPING a tn. Sweden cap. ldn. of same name at the E. extremity of Lake Wetter on the tongue of land between two gulches, that lake and Lakea Boche. It has 83 m. S.E. Göteborg. It lies on low part of it is protected by embankments from inundation. It is in general well built, having substantial looking houses and wide streets and contains a handsome church governor's residence, townhouse, theatre, and grammar-school. It also has manufactures of cards and tobacco and a haven in the Munk lake, at which the trade, formerly important, has been greatly increased by the completion of the Göta Canal. In the vicinity are the mineral springs of Lendel and Märsdal. At a short distance, at Hingvarna, a manufacture of armour. Pop. 4749

The lake is bounded N. and N.E. by Linköping, E. Kalmar S. Halmstad, W. Elfsborg, and by Västmanland or Käraberg, and Lake Wetter. It belongs partly to the lagoon of the Kattegat, and partly to that of the Baltic, the former draining it chiefly by the Nies and the latter partly by the Åman, and partly by Lake Wetter. It is partly covered with mountains, but has much fertile soil, on which good crops of corn potatoes, hemp, and flax are grown. feeds many cattle, swine and poultry, is well wooded, and rich in minerals, particularly iron which is worked to a considerable extent. The chief exports are corn cattle, butter cheese, pitch tar, iron, and ironware. Area, about 4000 geo. sq. m. Pop. 143,300

JONQUIERES, a tn. France dep. Vendée, 4 m. S.E. E. Orange on an island of the Ouyrie. It has some trade in silk, the silk worms being extensively reared here, and in ordinary red wine. Pop. 1140

JONSWELL or JONSWELL, a vil. and par Switzerland, can. of, and about 20 m. from St. Gall with a R. Catholic church, and a trade in corn and cattle. Pop. 1024

JONZAC, a tn. France dep. Charente-Inférieure, on the Sologne, 60 m. S.E. Rochelle, with manufactures of serge, druggists, camel, and other coarse woollen stuffs, which has a market at the fairs of Beaune and Dardennes. Its chief trade is in brandy, of superior quality corn, cattle, eggs, and poultry. An old castle, seated on a mound at the E. extremity of the town, has an imposing appearance. Pop. 1985.

JOORUL, a tn. of N Hindoostan between the Jamma and the Sutlej; lat. $31^{\circ} 10' N.$; lon. $77^{\circ} 25' E.$; cap. principally of same name.—The *FRANCISVILLE*, one of the hill states, area, 150 sq. m., is bounded E. by the river Paber, W. by the rivers Poodur and Nulsen, N E. Basasheer, and S. E. by Sirmore. Pop. 15,000.

JOORUL-KANAR, a bay, E. Africa, Denakil country, at the head of the Bay of Tadjcora, with which it is connected by two narrow channels lat. $11^{\circ} 29' N.$ lon. $43^{\circ} 54' E.$ about 85 m. W. S. W. the straits of Babeimandab. It lies N. W. by W. and S. E. by S. and is 15 m. long by nearly 6 m. broad, its N. and S. sides are formed by precipitous limestone cliffs, 400 or 500 ft. to 2000 ft. above high water with very deep ravines. In the E. portion the depth is 115 fathoms, and in the W. extremity there is a small basin with 15 fathoms, surrounded by precipitous volcanic cliffs, but the entrance of which is closed at low water. Large masses of lava are found in this part of the bay.—(Lieut. Barker in *Jour. Roy. Geo. Soc.* 1848.)

JOOD, Jon, or **JUD**, a vil Hungary Thither Thela, on Maros, on a small stream of same name, 25 m. from Segesh, with a Greek church, and a synagogue and a trade in corn and cattle. The lake of Jeez, in the neighbourhood, abounds with pike. Pop. 1870.

JOODPOOR, **JOODPORE**, or **MAWAR** a tn in the N. W. of Hindoostan cap. principally of same name, which forms the largest of the Rajpoot states, 285 m. P. N. F. Hyderabad (on the Indus), lat. $26^{\circ} 18' N.$ lon. $72^{\circ} 12' E.$ It stands on an affluent of the Loony, in a hollow enclosed by rocky and barren, on which are three forts, and is a large place, surrounded by walls. One of the forts contains the palace of the rajah which is a very extensive edifice of solid though simple architecture, and, from its commanding position, forms a very conspicuous object at a great distance. Pop. about 60,000.—The *FRANCISVILLE*, which is about 260 m. long E. to W., and nearly the same in breadth—area 85,673 sq. m.—is well watered by the Loony and its affluents, and though arid in many parts, yields in others good crops of wheat, barley, millet, &c. Irrigation is well understood, and generally practised. Besides grain, considerable quantities of inferior opium and some tobacco are raised. The most important mineral product is salt. The general, and especially the transit trade, is very important, and has its central locality at Palice, which stands about 40 m. E. of the capital, and is the entrepot between the W. coast and Upper Indus. The principal article is opium of which 2000 camel-loads are frequently exported. Next in importance to it are wheat and salt. The camels of the country also are celebrated and are in great demand in the surrounding territories. The whole transport of goods throughout Joodpoor is performed by them. The towns next in importance to the capital are Palice, Nagora, and Meerta. Owing to the absence of hills, there are few strongholds. The most celebrated are Jalore and Seewane. Pop. 1,788,600.

JOOGDEA a tn Hindoostan prov Bengal, 76 m. S. E. Decan, lat. $22^{\circ} 50' N.$ lon. $91^{\circ} 12' E.$ Salt is manufactured in the neighbourhood by Government, but it is not held in equal estimation by the Hindoos with that extracted from the better branches of the Ganges in the Sunderlands.

JOONAGHUR, or **JUNAGHUR**, a city of W. Hindoostan prov Gujerat, at the entrance of a beautiful valley; lat. $21^{\circ} 41' N.$ lon. $70^{\circ} 21' E.$ 235 m. N. W. by N. Bombay. Its low walls are nearly hidden by the surrounding jungle the only conspicuous object being an old citadel, called, from its elevated situation the *Upurika*, a fine piece of fortification, situated within, and on the E. side of the modern city. The straggling walls occupy an extensive area, not more than half of which is inhabited. The streets are narrow and dirty and the houses badly built. In the centre of one of the bastions is the *Meer*, an insignificant building, as are all the other modern edifices, excepting a few mosques and tombs. The *Upurika*, already mentioned, though now in ruins, is a noble specimen of eastern fortification, its walls being unusually high, with immense bastions. The highest part of the interior is occupied by a handsome mosque, much damaged by the earthquakes of 1819 but still a very magnificent building.

JOONERK, a tn. and fort, Hindoostan, presid. Bengal, prov Assamghad, cap. dist. of same name, 45 m. N. Poona lat. $19^{\circ} 12' N.$ lon. $74^{\circ} 10' E.$ —The year has seven gates,

of masonry, one within the other, and contains the ruins of many Mohammedan tombs, as well as Hindoo excavations.

JOORLA, a tn. of W. Hindoostan, prov Gujerat, on the Gulf of Cutch, 78 m. N. Joonsaghar, lat. $22^{\circ} 37' N.$ lon. $70^{\circ} 28' E.$ A considerable trade is carried on here with Mandrie, and other markets in the Gulf of Cutch, and with Bombay.

JORFA a tn. in Palestine. See *JAWA*.

JORHATAR, or **JORHATARA** a Span. Anadolu, prov. and 35 m. S. E. Granada, on the side of a hill covered by the ruins of a Moorish castle. It has a parish church, and a primary school, distilleries, oil, and flour mills, and a trade in wine, brandy and figs. Pop. 1873.

JORAK, or **TORONAK** (anc. *Dompepe*) a considerable river, Asiatic Turkey. It rises in a mountainous district in the pass. Erzeroum, near the sources of the Euphrates about lat. $41^{\circ} N.$ lon. $40^{\circ} 30' E.$ whence it flows N. E. to about lat. $41^{\circ} 5' N.$ where it turns somewhat suddenly N. N. E. and falls into the Black Sea, near Cape Patumut; lat. $41^{\circ} 40' N.$ lon. $41^{\circ} 40' E.$ Entire length about 180 m. It has come from the Jorak from Atm to the sea, in three days and sometimes, though rarely track up against the stream in eight or ten days. It is believed, however, not to be navigable for boats, on account of rapids and rocks.

JORAT, a small mountain-range, Switzerland which, commencing in the Pays-de-Vaud, breaks off from the calcareous Alps of Moleson and Jaman, and stretching W. and N. W. hanks on with the Jura, near the town of Lausanne. The culminating point of the Jorat is Mont Pelera, 4087 ft. the highest point at which it is passed is at the Chalet-Gues, on the road from Lausanne to Bern, 3037 ft.

JORDAN (Arabic, *Sherat-el-Kebir* a river Turkey in Asia, pass Damascus, forming the E. boundary of a lake, and, from the frequency with which it is mentioned in Sacred Scriptures, as the scene of numerous remarkable events in the history of the Jews, one of the most celebrated rivers in the world. It rises from several sources, all in Anti Lebanon, uniting in Lake Bahr Huleh or the waters of Maron, which lies lat. $33^{\circ} 6' N.$ lon. $35^{\circ} 36' E.$ From this point it flows at first with a rapid current in a narrow bed about 80 ft. broad, and 4 ft. deep but subsequently it becomes more sluggish and after a S. course of about 10 m. it expands into Lake Thibana—(which see). Shortly after leaving the S. end of this lake, it receives the Yarmak on the left, and enters El Ghor, or the great depression through which the Jordan flows; and continuing a S. but angularly crooked course of about 70 m., direct distance, or 200, including windings, falls into the N. end of the Dead Sea, having received the Zerka, also on the left, and numerous smaller affluents. The upper part of the valley of the Jordan is hilly arid, and barren but it soon becomes more level and fertile and, as it approaches the Zerka, it becomes well cultivated and beautiful. Excepting in the upper part, it is very populous. The river is muddy and full of small fish. In the dry season it is shallow, numerous places occurring where it may be crossed on the stumps without the feet being wet; but in some places it is much deeper with banks 20 ft. high. It is subject to great inundations during the winter season, when the river attains a breadth occasionally of half an hour across. It is crossed by numerous weirs, which divert the water for the purposes of irrigation and its course is interrupted with many islands, and encumbered by 87 threatening besides many lesser, rapids. It is a dark-coloured, rapid stream (varying from 2 to 8 m. an hour) and empties daily into the Dead Sea about 6,000,000 tons of water. The valley of the Jordan forms one of the most remarkable depressions in the world, being wholly below the level of the sea. The lake of Thibana, at its N. end, is 328 ft. and the Dead Sea, at its other end, is 1212 ft. below sea-level.—(Chesney's *Engl. Exped.*, Lieut. Molyneux, in *Jour. Roy. Geo. Soc.*, Lynch's *Dead Sea*, &c.)

JORDANOW a market in Galicia, cradle of, and 21 m. S. E. Wadowice. It has a church and is the central locality of the linen trade of Galicia. About 8000 persons are sent annually into Hungary, and ordinary linen-prints are sent hither from Kilmark.

JORDANSTON, par. Wales, Pembrokeshire 1876 ac. P. 144.

JORGE (Sr.) one of the Azores See *GROZON* (Sr.)

JORGE (Sr.)—1, a river, New Granada, flowing N. E. for about 160 m., and falling into the Cauca, 25 m. S. W.

Mompoxa.—3 (of Olmeco) a tn. Central America, state Honduras, 80 m. S. S. W. Tuxtla.

JORGE (San), several places, Spain, particularly—1, A tn. Valencia, prov. and 40 m. from Castellon-de-la-Plana, on a hill above r bank Cerdal, with a church, town-house, prison and school, and a trade in wine and herbs. Pop. 857.—3 (San Jorge-de-tlor) a tn. Extremadura, prov. and 17 m. from Merida, with a church, and a trade in corn and oil. Pop. 678.

JORGE-DE-LOS-RIOS (Rio) a tn. Brazil prov. of, and 140 m. S. S. W. Bahia, on the S. bank of the bay and river Ilheos. It has three churches, a harbor, defended by several forts and capable of admitting large merchant vessels, and a considerable trade with Bahia in waxed flour, timber, rum, coffee, and cacao. Pop. dist. 3000.

JORHAUT a tn. Upper Assam both sides the Dihou, an affluent of the Brahmaputra; lat. 26° 45' N., lon. 94° 0' E. once the capital of a province.

JORQUELA, a tn. Spain, New Castile, prov. and 18 m. N. E. Alhacete, l. bank Júcar. It is walled, has a parish church, courthouses, prison two primary schools, and an old Franciscan monastery, in a ruinous state manufactures of linen and hemp goods particularly shoes and a trade in those articles and in corn, silk, wool, and cattle. Pop. 1778.

JORILLO XONTUJO or JOXUJO, a volcano Mexico, dep. Michoacan, 160 m. S. W. Mexico lat. 19° 6' N. lon. 101° 30' W., 80 m. distant from the Pacific. It is situated on the plain of Malpas, which forms part of an elevated plateau, between 2000 ft. and 3000 ft. above sea-level and is bounded by hills, composed of basalt, trachyte, and volcanic tuff. Though these rocks must have been produced by igneous action, the district had continued undisturbed from the discovery of the New World, and the plain of Malpas was covered by fertile fields of sugar-cane and pulglo, and watered by the two streams of Gutierrez and San Pedro. This state of tranquillity was suddenly disturbed in June, 1769, by fearful hollow sounds, succeeded by earthquakes. These had continued for two months, when, on the night of September 28th to 29th, flames burst forth from the ground, and fragments of burning rocks were thrown up to prodigious heights.

On the line of a chain which had been made, six volcanic cones, consisting of scoria and lava, were formed. The least of them was 300 ft. high, and the loftiest, to which the name of Jorullo has been given, was 1600 ft. above the level of the plain. It continued to send forth great streams of basaltic lava, containing fragments of granite, till February 1769, when its eruptions ceased. The ground to the distance of nearly two leagues round the volcano, was thrown up like a bladder forming a steep precipice round its margin of 30 ft. to 35 ft. in height. From the precipice the ground rises with a gentle slope, till it attains the height of 2890 ft. Above this slope, the N. W. edge of the crater rises other 1250 ft., making the whole height 4140 ft. above the sea-level. When Humboldt visited this volcano in 1803 forty-five years after the eruption, a mass of lava, 540 ft. thick, was found still smoking and the uppermost slope was covered with a vast number of small cones, called *borns* too, which had a high temperature, and threw out watery vapor. The two streams which watered the plain had lost themselves below its E., and re-appeared as hot springs at its W. extremity. In 1827, Burckhardt found that the boracate had ceased to send forth steam, and that the greater part of them had altogether disappeared. Vegetation also had made great progress on the sides of the new hills, and the surrounding country, which had been deserted as uninhabitable, was again covered with luxuriant crops of sugar-cane and indigo.

JORGE (San), a tn. and Jesuit missionary station, Bolivia, prov. Chuquisaca, lat. 17° 40' S., lon. 64° 40' W. about 3 m. N. W. a chain of hills called the Sierra de San José. It is regularly built contains a college, a handsome and spacious structure a church, with a fine facade manufactures of swinging Indian hats and cotton tissues and a trade in tamarinde, wax, and salt—the last of which is obtained from two extensive salt-water lakes about 120 m. S. S. W. It is the principal whence the W. Jesuit missionary stations are supplied, and was at one time capital of the province, and the head seat of the Jesuits. Pop. formerly 5000, now, by small fog, reduced to less than 3000.

JORGE (San)—1 (Of Filomena de San José) a city, Central America, prov. of Costa Rica lat. 9° 22' N.; lon.

84° 5' W. It lies in a deep valley, is pretty well watered with canals, and has three churches, and some fincas. Pop. 10,000.—3, A small tn. Upper California, 45 m. S. W. San Francisco and capital of the state. It lies in a fertile district, and a little way up from the mouth of a stream that falls into the most S. reach of the bay of San Francisco.—3 (San-Jorge), a mining vi. Mexico, dep. and 100 m. S. Chihuahua, E. side of the Sierra Madre. Pop. 5000.—4, An Isl. Gulf of California lat. 24° 30' N. about 35 m. long by 7 broad.—5, One of the Pearl Is., Bay of Panama.—6, A vi. Uruguay, 37 m. N. W. Montevideo on river of same name.

JORGE (Rio) several places, Brazil.—1 A tn., prov. Minas-Geraes, near r bank Montes, 200 m. S. W. Ouro-Preto. The houses, though of earth have a handsome appearance. Its principal buildings are—the church of Santo Antonio, richly sculptured and decorated in its interior, the churches of Nossa Senhora do Rosario and São-João-Evangelista, the prison, and a bridge over the small river Carandiba. The trade carried on with Rio-Janeiro is chiefly in cattle, swine, and cheese. The district is well cultivated well watered, and has rich pastures. In the mountainous part of it many of the inhabitants are affected with gout. Pop. dist. 12,000.

—2 A tn., prov. and 60 m. N. E. São-Paulo near r bank Parahiba lat. 23° 12' S. lon. 45° W. It was originally founded by the Jesuits, who established a college here, in which, in the beginning of the last century they trained and educated a great number of Indians. The church which they built is now the parish church. There is some export trade in cattle and swine. Pop. dist. 4000.—3 A tn. prov. Santa Catharina, on a creek in the bay of Catharina, 4 m. W. Desterro with a church, town-house and primary school, and a trade in sugar rum, and fish. Some of the inhabitants engage in the whale fishery. Traces of coal have been discovered in the district. Pop. 5000.—4 A bay E. end of Isl. Maranhão, formed by the mouths of the Mearim and Içapema. It is about 25 m. long, from N. to S. by about 5 m. broad.

JOSÉPHI (St.)—1 A tn. W. India, at Trinidad in a well cultivated plain, on a river of same name, 5 m. E. Port of Spain. It consists of mud houses covered with palm leaves, and although formerly the chief place in the island has now no commerce. Pop. about 8000.—2 A peninsula E. coast of Patagonia, between lat. 42 and 44 ° S. and intersected by the meridian of 64 ° W. It is 69 m. long N. to S., 24 m. broad E. to W. and is united to the continent by an isthmus about 6 m. wide. On its W. side is a capacious bay of same name and on the S. W. it has the Gulf of Nuevo.—3 A lake British N. America, lat. 50° 45' N., lon. 91° W. It is about 45 m. long by 10 m. broad receives the Cat Lake River and discharges its superfluous waters, by the Albany into James Bay.—4, An Isl. Upper Canada, in the channel between Lakes Huron and Superior having S. E. Drummond Island, and N. W. Sugar Island (greatest length, 20 m. greatest breadth, 15 m.—5, A small Isl. Indian Ocean, one of the Seychelles lat. 8° 27' N. on 55° 40' E.—6, A bay U. States, formed by the Gulf of Mexico, on the W. coast of Florida, immediately N. W. Cape St. Blas.—7 A river, U. States, Michigan, flowing chiefly W. for 140 m. into Lake Michigan. It is navigable to Lookport, a distance of 180 m.

JOSEPHOVA a vi. Hungary, Thither Thelce, ex-Toronal, on the Thelce, near Kuz-Kanissa, with two churches, a fishery, and an active trade in cattle. Pop. 1423.

JOSLPHSDORF formerly SCHNALL a vi. Austria, Sclavonia, 11 m. S. E. Peterwardein on the morass Atyanka River. It has several annual fairs. Pop. 8543.

JOSEPHSTADT, a tn. Bohemia, circle of, and 8 m. N. E. Kladsko, on the Elbe, at the confluence of the Appa and Metta. It occupies a gentle height, and is a place of considerable strength, being not only surrounded by walls and ditches, but defended by outworks, which are placed on both sides of the river. It consists of two principal, and several minor streets, all of which are well paved with squared stones and the houses are both substantially and regularly built. Pop. exclud. of garrison, 1890.

JOSEPHSTADT, a vi. America, Cresta, 34 m. S. W. Caracas with a S. Catholic church. Pop. 1162.

JOSIMATH, a tn. of N. Hindooon lat. 76° 40' N. Guchwal, l. bank Alaknanda lat. 30° 33' N. lon. 76° 40' E. The houses are neatly built of gray stone, and roofed with shingles.

JOSLOWITZ, or **JAROSLOWKON**, a vil Austria, Moravia, circle of, and about 16 m. from Znaim, on the Upper Thais. It has a church, a castle, a flour-mill, and a trade in Parmesan and other cheeses. Pop. 1888.

JOSSE-TEN-JONCK (St.) a tn. and town Belgium, prov Brabant, about 1 m. E Brussels, of which it is properly a suburb. It contains many fine modern mansions, and part of the botanical garden of Brussels is within it. Pop. 8870.

JOSSÉLIN, a tn France, dep Morbihan agreeably attests on the Oust, 24 m N N E. Yannes, with one of the most beautiful castles in Brittany, once a fortress of considerable importance. The original building was taken and razed by Henry II of England, in 1169. The present edifice was built in the 14th century, and belongs now to the Duc de Rohan. Josselin has a somewhat important grain market. Pop. 2665

JOUARRE [Latin, *Jouarre*] a tu. France, dep. Seine-et-Marne, 12 m E. Meaux, finely situated on a height near the Little Morin. It has a church with a very ancient and remarkable crypt the remains of the old abbey of Jouarre, now partly converted into a private mansion, and a trade in corn, cattle and muleskins. Ppn 1342.

JOUDOMA, a river, Siberia, which rises in the mountains of Okhotsk, in lat 60° 30' N and lon 140° E flows circuitously S.S.W. and joins r. bank Maim, after an irregular course of about 170 m.

JOUDPOOR, Hindustan. See JOODPOOR

JOUG, or **Jou**, a river, Russia, which rises in the S of gov Vologda, pursues a very circuitous, but generally N N E course, to its junction with r bank Suchana, a little below the town of Usting-reliki. Its principal affluents are, the Pashma and Laza, the Kharkenga and Kitchlimga. Total course, about 220 m

supposed to rise about 14.6% in Jan 1988. It doesn't
 55W as far as he is 40% N when asking a 75%
 course, it starts being 8% by Jan 1988, after 75%
 60W about 80% affluence. It is perfectly possible to 100% later on
 65W about 80% in from its month. On the 1st day, the bank x
 often low, and the country is covered with small settlements

JOUNKA—A river, Russian America, on an affluent of the Jonna, which it joins in lat 64° 50' N. Its banks are fringed with pines, poplars, aspens, larches and a species of willow, often of a large size. It is throughout at least 1 m broad, and is 200 m long, with a 15 km run from 12 m to 100 m deep.

JOURBOURG, or **GLOROKBOURG** a tn Russia gov of and 110 m. W N W Wilna, r bank Niemen, where it has a harbour. It is an important customhouse station, and has a considerable trade, both import and export.

JOURE, a market to. Holland, prov Friesland 6 m. N W Heeraven, consisting chiefly of one long straight street of well-built houses. It has four churches, a courthouse, weigh-house, posthouse, a Latin, and a town school a boat-building yard, saw-mill, tannery, manufactures of tobacco, cheese and clock work several anchor smiths two potteries, &c., and a considerable trade in grain butter, cheese, pigs, horses, and watch and clock work. 1 m. 2454

JOUX, a lake Switzerland, can. 60 m. long. The N end, at the E valley of same name, on the Jur. mountains, near the French frontier, about 8600 ft. above sea-level 18 m. N.W. of Lausanne. It is formed by an expansion of the Orbe, here S.W. to N.E., about 6 m. long by 1 broad, and is surrounded almost by most beautiful scenery. Mont Tendre, on its E. side, rises to a height of 9730 ft.—The CHATEAU DE JOUX is a fortress, France, cant. Doubs, 4 m. E. by S. Pontarlier, 18 m. N. by E. of Lake Joux, in the Jur. mountains. It is pleasantly situated on an isolated rock, above 600 ft. high, overhanging a precipitous gorge, and has a position commanding the passes of Mulsans, Thoiry, and L'Orreigne. Collopy's *Glossary of Place-Names*, p. 10.

JOWALE, a tra. and maritime dist. Hindoostan presid. Bengal, prov Arunabad. The district is bounded W by the sea and E. by the W Ghats, from which latter name-

runs streams flow to the ocean — The town is 44 m. S.E. Namam, lat. 19° 55' N ; lon 78 28' E.

JOWRAH, str. Hindoostan presid. Bengal, prov. Malwa,
50 m N W Orissa; lat. 23° 38' N, lon. 75° 11' E, and
1427 ft. above the sea. Pop. 2551

JOYEUSE [Latin, *Gerdouze*] a tn. France, dep. Ardèche, 26 m. S.W. Privas, r bank Rhone at the foot of the Cévennes. It has silk mills, and carries on a considerable trade in silk. Pop 2107

JUAN numerous places, Spain particularly 1 A in
JA, Majorca, on the side of a hill, with a dimorph. coarseness of
 prison, and primary soil. Prov 1875- — *Ju*, *Ju* (de-Alto-
 com), a vil. Valencia, prov. of, and 4 m NE Albate, in a
 plain near the Castells or Monreper. It consists of houses
 generally of one story, composed of mud, coarseness of
 soil, and a few manufactures of cotton and wool.
 trade in wine, barilla, flax, hemp and other agricultural pro-
 duce. Prov. 3773 — *Ju*, *Ju* (de-Puerto, San), a in Andalusia,
 lusa, prov. of, and about 5 m NE Huelva, on a large and fertile
 fertile plain, near the Tinto. It consists of tolerably well
 built houses, part of them forming two regular squares and
 the rest arranged in irregular and ill planned streets. It is well
 supplied with corn, wine, oil, and church and school. It
 school and has a considerable transit trade in corn and
 wine. Prov 1551 — *Ju*, (*Ju* from Reg), an mlt. Cantabria, in
 Llanzoza. It is one of four settlements which form the part of
 Aracena, one of great importance, but now almost deserted.
 — *Ju*, (*Ju* de la Nueva), a in Old Castile, prov. of and 16 m
 from Avila, on the site of a lofty hill which joins with the mts
 of the Sierra de Guadalupe. It is a small town, with a church,
 coarseness of ground, and primary soil, and has several fairs
 weekly, and a trade in cattle and wool. Pon. 692

JUAN (SAR) a prov. La Plata, with cap. of same name, mostly between lat 36° and 33° S, lon 67° and 70° W. It occupies the space between the great Cordillera of the Andes and the mountains of Córdoba, as far N as the Llanos, or plains of Córdoba, while S, it is bounded by prov. Mendoza. In the W it is almost desert, and the S.E. is a large lake. The climate is the classic dry one, with a high rainfall and the soil, by artificial irrigation, exhibits extraordinary fertility yielding in some instances, above two hundredfold. The inhabitants are chiefly employed in agriculture, and in the cultivation of vineyards and gardens. Corn, wine, and brandies of excellent quality are produced, and exported in considerable quantities to the other provinces. In the N there are some small towns, and the prov. is rich in minerals, but to a very limited extent. Pop. 20,000. — **THE CAPITAL** is situated on the river of same name, 120 m. N. Mendoza, lat 31° 4' S, lon 68° 57' 30" W, and has a considerable trade in wines, fish, and brandy. — **THE RIVER** rises in the Andes about lat. 33° 20' S, near the *Pasos Páez*, flows thence N. W. under the name of Rio-de-José-Pastos, to lat 30° 50' S, where it is joined by the Rio de las Yucas, and thence to the sea at Juan, it takes a S.E. course to the south, on the lake of Gran-nacaré, after a course of above 200 m.

JUAN DE LOS REYES, a part, Cuba. See REYES.
JUAN DE NOVA.—1 A group of isles, Indian Ocean, of N and Madagascar extending from lat. $10^{\circ} 5' 30''$ to $10^{\circ} 26' S$, centre in lon $61^{\circ} 9' E$. They consist of two islands of considerable extent, and 10 small ones, soil mostly coral, on which grow trees of small size. Turtle, and fish of various kinds are plentiful and some fresh water is to be obtained by digging.—2, (or *St. Christopher*), Mozambique Channel, lat. $17^{\circ} 5' S$, lon $42^{\circ} 47' E$. About $1\frac{1}{2}$ m. or 2 m. in length. It has a small elevation, not exceeding perhaps 40 ft. in the centre, covered with shrubs.

JUAN NICARAGUA ('San' - 1, a seaport, Central America). The San Juan River flows from the north-west, issuing from the S.E. part of Lake Nicaragua, in the state of same name, and, after a S.E. course of about 120 m., falling into the Caribbean Sea by several mouths, the principal of which is at lat. 10° 55' N. lon. 88° 45' W. It is obstructed throughout by some cataracts, but in the rainy season it is navigable throughout. Steamboats now ply on this river, and convey passengers across the lake of Nicaragua, on their way over the isthmus.

JUAN-DE-LOS RIOS (San), two towns, Mexico:—1, Dep. Durango, between the rivers Nazas and Guanabul, with rich mines, extensive trade in a kind of brandy called vinosmasa;

Pop. 11,000.—2, Dep. of, and 50 m. S E Quintero, in a lofty situation, surrounded by beautiful gardens, and having important fairs. Pop. 10,000

JUAN FERNANDEZ, or Mac a Tierra, an Isl. E Pacific, about 400 m. off W coast Chili, to which it belongs lat. (S. point) 33° 45' S. lon. 79° 2' W (A.) 19 m. long by 5 m. at its greatest breadth and on its N. E. side is the excellent harbour of Cumberland Bay. It is formed of a series of elevated mountains, of rugged and arid aspect, those in the centre more level and continuous, but either extremity of the land terminating in conical and gradually declining hills. Its loftiest summit is 1 mague (the aravil), rising 8000 ft. above a shore which is formed by an abrupt wall of dark-coloured bare rock 800 or 900 ft. high. Basalts, granites, and trap rocks, are the principal geological formations. The Yungue is wooded nearly from summit to base, whence an extensive and fertile valley watered by two streams extends to the shore. The higher parts of the island are generally thickly wooded, but in some places are grassy plains of considerable extent, abundantly supplied with a species of oat which grows very luxuriantly and towards the W., covers the ground for many miles. The neighbourhood of Cumberland Bay is covered with terraced plantations, wild radishes, nut, and palm, besides peach, apple, cherry and fig-trees, which are found everywhere wild. Wild guinea are plentiful in the more inaccessible parts, whither they have been driven by swarms of wild dogs, that occupy the lower grounds. Rats are numerous. Excellent fish may be caught in Cumberland Bay and large crabs-fish abound the latter are taken in numbers by the residents, who dry and cure the tails for exportation to Chili, where they are highly prized. The island is now (1850) leased by the Chilean Government to a party of settlers employed in taking seals and fish, and drying the latter for the Chilean market. Juan Fernandez was a favourite resort of the Buccaneers in their expeditions against the Spanish American possessions. In 1741 Lord Anson here refitted his vessels, and in 1749 the Spaniards formed a settlement in the island which was subsequently abandoned De Foë is supposed to have founded his *Life and Adventures of Robinson Crusoe*, on the history of the solitary resident here, for four years of a Scotchman named Alexander Selkirk. Pop. about 40

JUANES a river Spain, which rises about 2 m. N. V. Y. at Valencia flows first E. till it receives the Negro on the right then S. E., forming the marsh of Rambla Algezares and joins the bank Júcar after a course of about 45 m.

JUANPURI a dist. Hindoostan presid. Bengal between lat. 23° and 26° N. and surrounded by Oriss, and the districts of Azimgarh, Alidabad, Benares and Ghazipur. The soil is highly productive and well cultivated, and yields great quantities of sugar.—2 A. in cap. above dist. 40 m. W Benares, on the Gomty which is here crossed by a fine old substantial bridge. It has a lofty fort of solid stonework, and many respectable buildings. Near it are the ruins of numerous mosques and monuments. It was formerly the capital of an independent sovereignty

JUHA or GOVIND (called also *Pando* *Pao das Fugas* or *Beggar River*) a river and tn. E. Africa. The former after a S. E. course, perfectly known falls into the Indian Ocean, in lat. 0° 14' S. lon. 42° 39' E. It is said to rise in Abyssinia. Across the bar at its entrance, is a narrow channel, with plenty of water. Boats may be navigated up from its mouth for three months.—The town which is situated on the summit of a lofty hill 1 m. from the entrance of the river is a place of considerable size, surrounded by a wall and has buildings in the Arab style. The natives are fierce and treacherous.

JUBBI TANKOR, a tn. Hindoostan, presid. Bengal, S. W. territory 155 m. N. by E. Nagpore. It is decently built, and has an appearance of industry and prosperity. A considerable carpet manufactory and a brisk trade is carried on in cotton silk sugar and other articles. At the Great Exhibition, in 1851 was shown a beautiful sarong set, manufactured by reformed Thugs at the Government school of industry Jubbalpore

JUBEKA, a tn. Spain, Old Castle, prov. of and 20 m. S. S. W. Logroño, in a plain, bank Jubea. It has a church, townhouse, and primary school several flour-mills, and a trade in wool and charcoal. Pop. 1501

JUBRIQUE LA Kewra, a tn. Spain, Andalusia, prov. of, and 55 m. from Malaga. It consists of a number of steep, irregular, ill paved, and dirty streets, contains a very ancient Jewish shroob, formerly a Moorish mosque, a schoolhouse, and school, and has manufactures of coarse woollens, numerous distilleries, and flour-mills. Near it traces of copper silver, gold, and other metals are found, the attempts to work which have not succeeded but a good deal of *lapus lazuli* has been obtained and exported to England. Pop. 3030.

JUBY (Gara), Africa, N. W. coast, opposite the Canary Islands, lat. 27° 56' N. lon. 13° 55' W (A.) It is low and sandy having near its termination a hummock covered with bushes, which, from all directions, looks like an inlet.

JUCAR, an unnavigable river, Spain having its source in the confines of New Castle and Aragon whence it flows S. and S. E. across prov. Cuenca and Valencia, and joins the Mediterranean 4 m. S. Cape Cullera, total course, about 221 m.

JUDEA, or PALESTINE.
JUDENBURG (Latin, *Idesum*) a tn. Austria, Tyrol, cap. circle of same name r. bank Mur, here crossed by a bridge, 40 m. W N. W. Gellitz. It stands at the foot of a hill about 2368 ft. above the sea is surrounded by old walls, and has an old dual castle, two churches a convent, gymnasium, high school and hospital. In 1807 the greater part of it was burned down. In the Middle Ages it carried on an important trade with Italy and the Levant, but at present it has scarcely any trade, and its only manufacture of any consequence is gunpowder. It has also an saw and a number of flour mills. In the neighbourhood is the modern palace of 18th century. An armistice with Napoleon was signed here, in 1797. Pop. 2688.—The city is the largest in Tyrol. It is mountainous, but has many valleys of great fertility Cattle-rearing is the most important occupation. The minerals are lead, copper iron cobalt, coal and salt. The last, particularly has immense beds and is largely exported. The lakes are very numerous and well stocked with fish. The principal crops are wheat and flax. Area, 1681 sq. m. Pop. 101,200

JUGDLUK a vil Afghanistan is the defile between Jelalabad and Cabool 5815 ft. above sea level. It was the intended scene of the massacre of the British troops in their attempted retreat from Cabool in 1842 and here also, in August of the same year, a numerous Afghan army was totally defeated by the British, under General Pollock.

JUGGERNAUTH (*Jagannath* 'lord of the world, one of the names of Vishnu) called by the natives *Poor*, a tn. and celebrated temple, Hindoostan, presid. Bengal prov. Oriss, on the Bay of Bengal 48 m. S. Cuttack lat. 19° 50' N. lon. 85° 06' E. The town derives all its importance from the temple. This the most celebrated shrine in Hindoostan, was completed in the 12th century, at an enormous expense and 12 great festivals are held at it annually. The main street at the extremity of which the temple stands, consists entirely of religious structures built of stone, with plantations of trees interspersed, and has an imposing, and picturesque appearance but filthy in the extreme and swarming with religious mendicants. The gardens and groves by which the town place is surrounded, produce the finest fruit in the province. From the salubrity of its climate, Juggernauth has been called by Europeans the Montpellier of the East. It is visited annually by upwards of 1,000,000 pilgrims. Pop. 30,000

JULI or **JAL** a vil Borneo 15 m. N. W. Lake Manchar, surrounded by a dilapidated, mud wall 18 ft. high. It consists of mud huts, with a flourishing bazaar, and a mosque. Pop. about 1000

JULYU, a tn. La Plata, dep. of, and 40 m. E. N. E. Salta, on the Julyu. It is handsome and well built, and was formerly a place of considerable trade. Near it are several rich mines. Pop. about 4000.—The river, called likewise *Rio Grande de Julyu* and in the lower part of its course also *Lavayen* rises at the foot of the Andes, flows S. to Julyu thence E. to the junction of the Lavayen whence it flows E. N. E. to the Vermejo, which it joins in lat. 23° 5' S. lon. 53° 40' W. Total course about 500 m. It receives numerous affluents

JULALPOOR—1 a tn. Punjab, in a fertile valley, r. bank Jallum, 80 m. N. W. Lahore supposed by Europeans to be the scene of the battle between Alexander the Great and Porus; but Barnes places the spot higher up the river.—2, A vil Punjab, l. bank Chenuab, 60 m. S. W. Vesterabad.

JULI, a tn. Peru, dep. of, and 58 m. S.E. Puno, on the S.W. shore of Lake Titicaca, between two hills of red porphyry, 15,100 ft. above sea-level. It is well built, and contains four neat churches of stone. Sheep and llama wool and ponchos formed of those materials, are the principal articles of trade. In the vicinity are mines of copper and lead, which are not wrought, and rich veins of silver, which were formerly worked on a great scale, but are now nearly abandoned. Pop. 800 of can. 5000

JULIANSTOWN, par. Ire. Meath; 2019 an. P. 645

JULICH [French, *Julliers*, anc. *Julianopolis*], a tn. Rhine-Prussia, gov. of and 17 m. N.E. Aix-la-Chapelle, emp. circle of same name, at the confluence of the Elbe and Rhine, in a fertile plain surrounded by swamps and stagnant ditches, which makes it very unhealthy. It is strongly fortified, contains two churches, one of them collegiate and a superior town school, has a court of law and several public offices, manufactures of common and white leather, soap and vinegar, a cotton mill, and a trade in the above articles of manufacture and in corn, cattle, and colonial produce. Coal is worked in the neighbourhood. Julich is of Roman origin and has been supposed, though fancifully to take its name from Julius Caesar. It was long the capital of an independent duchy. Pop. 4201.—The climate is flat, well adapted for agriculture, and so fertile in corn that part of it has received the name of the Kornkammer or Granary. Area 93 geo. sq m. Pop. 33,418

JULIEN (MAX), two places, France.—1. A tn. dep. Haute-Savoie prov. Geneva on an extensive plain watered by the torrents Airo, Aranda, and Denise, frontiers of the can and 6 m. S.W. to the tn. of Geneva. It has an ancient castle and gypsum quarries. Pop. 1118.—2. A vil. and com. Savoie, prov. Maurienne, on the Comba, near its confluence with the Airo, 3 m. S.E. St. Jean de Maurienne. It has an Augustinian abbey and a trade in corn wine and fruit. The surrounding district is rich in minerals. Pop. 834

JULIEN DE SAULT (St.), a tn. France, dep. Yonne, 21 m. N.W. Auxerre, a back. Yonne, with manufactures of coarse cloth, worsted and leather. Pop. 1750

JULIEN DE JARRET (St.) a tn. France, dep. Loire, about 6 m. N.E. Mienne, on the Oise with an iron foundry, and a manufactory of fire-arms. Pop. 1862

JULIERS, a tn. Prussia. See **JULICH**.

JULIOT (St.) par. Eng. Cornwall; 2688 an. P. 255.

JULIUSBURG, a tn. Prussia, prov. Silesia, gov. of, and 18 m. N.E. Breslau. It contains a Protestant church town school, castle, and hospital and has dye-works, a weekly market and four annual fairs. Pop. 977

JULLA, a tn. Beloochistan prov. Cutch Gundava, 15 m. S. Gundava, on the road from thence to Larkhans, lat. 28° 10' N. lon. 67° 38' E.

JULIUNDHAR, or **JULUNDHAR**, a large tn. Punjab, 82 m. E. by S. Lahore lat. 31° 19' N. lon. 75° 38' E., finely situated in the Julunder Doab, a fertile tract between the Beas and the Soatie and surrounded by great numbers of handsome man. solatums. It was formerly the residence of the Lothi Afghan dynasty. Pop. about 40,000. The Julunder Doab, was ceded to the British in 1848 at the close of the Sikh war.

JUMBOOSKER a tn. Hindooistan, prov. Gujerat, 85 m. S.W. Baroda, near a lake, the banks of which are covered with Hindoo temples. A considerable trade is carried on from this place to Bombay, the exports consisting of cotton, oil, grain, and piece goods. Pop. 10,400

JUMET a vil. and com. Belgium, prov. Hainaut, on the road from Charleroi to Brussels, 21 m. E. Mons. It has very extensive glass-works, breweries, distilleries, a tannery, &c. The extensive coal-works in the vicinity give employment to a great proportion of the inhabitants. Pop. 6027

JUMIEGES [Latin, *Gemones*], a vil. and com. France, dep. Seine-Inférieure, second. of, and 11 m. W. Rouen agreeably situated near r. bank Seine. It owes its origin to a monastery which was founded in 661 and the remains of which, though in a very dilapidated state, are still very extensive, and attest its ancient splendour. They consist chiefly of a large chateau, the roof of which has fallen in, and two lofty towers, of a white colour which are seen from a great distance, and form a conspicuous landmark to vessels coming into the Seine. As usual with such edifices, it is of various dates. The plain but strictly W. facade has been compared

with the romanesque churches of the Rhine. This part, along with the nave, surmounted by a more massive central tower, on side of which is alone standing, is of early Norman (A.D. 1067) The E. end, which was in the pointed style of

THE ABBEY OF JUMIEGES, from the West. From Voyages de St. Antoine France.

the 12th century is no longer in existence, having for a time been used as a quarry by the inhabitants around, whence to obtain stones for their barns, &c. For extent number of inmates, and the share it took in promoting learning during the Dark Ages, the Abbey of Jumieges was the most important monastic establishment on the banks of the Lower Seine. It still contains some interesting monuments. Adjoining the monastery are the ruins of a royal seat, which was a favourite residence of Charles V. Pop. 1678

JUMILLA, a tn. Spain prov. of and 25 m. N.W. Murcia, at the foot of a hill called the Sierra del Castillo. Its houses are generally well built, and arranged in streets, which though not spacious are paved and clean. It has two parish churches, one of them a handsome structure of the Corinthian and Ionic orders, adorned with fine traceries and paintings, some of them said to be by Raphael, and the other also a handsome structure, with paintings by the first Spanish masters, an old hospital, the chapel of which is now used as a court-house, a Latin and two primary schools; and manufactures of woollen and linen cloth, soap, and fire-arms, brick and tile works, salt works, potteries, numerous oil mills; and a trade in the above articles of manufacture, and in hemp, asphalt, and cattle. Pop. 8897

JUMILLAC LE-GRAND a tn. and com. France, dep. Dordogne, 20 m. E. Nontron near the sources of the Isle. It contains an old castle, which shew several stages and figures in the wars of the English in France and has blast furnaces, and other iron works, and seven annual fairs. Pop. 2259

JUMNA a river Hindooistan, pres. Bengal. It rises in the Himalaya mountains at an elevation of 11,200 ft. above sea-level, at Jumnootri. From this point it flows, first S., and then S.E., passing through provs. Gurkhal and Delhi and, after a course of about 700 m., falls into the Ganges at Allahabad. It varies in breadth from 100 to 1000 yds. according to the season of the year. It is generally shallow, and unfit for navigation, but its waters supply All India's canal on the W. and the Doab canal on the E. The cities of Delhi and Agra, as also the towns of Kalpee and Etawah, are situated

ated on its banks. The lands through which it flows are in general well cultivated.

JUMNOUTHI a celebrated place of pilgrimage, in N Hindostan, prov Gurhwal, 185 m N N E Delhi. lat. 31° N, lon. 78° 40' E, at the source of the Jumna. The name of the place has distinct reference to the spot where ablution is performed. It is also remarkable for its hot springs. The latter have their source in a ledge of rock 10 or 12 ft above the bed of the river and fall down into the stream, covering the rock with a sediment of variable colour, but chiefly yellow and soft and spongy to the touch. Above the ledge the hot water forces its way through a cleft, in a smoking jet of 5 or 6 ft in height, which has melted the snow around in the distance of 20 or 30 yds. These springs are said to be 10,848 ft above sea-level. The bathing place of the Hindoos is a small basin where the waters of the river are mingled with those of the hot springs, and remains sensibly warm. After bathing the pilgrim is marked on the forehead with the yellow sediment which is deposited by the water. The ravine through which the Jumna here pours its waters presents some of the most transcendent scenery conceivable. Cliffs of gray granite rise at the sides almost perpendicularly to the height of 12,000 or 14,000 ft, and huge pines rooted in the rocky clefts, and overhanging the ravine, add to the sombre character of the scene. The height of the enormous mountain Jumnootri, one of the loftiest peaks of the Himalayas, is 25,500 ft above sea-level.—(*Four Voy. Geo. Soc.*)

JUMOT is a Punjab. See JANU.

JUMI D is a Central Asia khanat of 70 m. N W W Khiva. It is surrounded by a dilapidated wall consists of 50 houses and is inhabited by Turcomans, who cultivate the ground and rear cattle.

JUNDIAH is a Bengal, prov of and 30 m N W Rajshahi, near a bank river of same name, here crossed by a bridge. It contains a parish church and a Benedictine convent, and has manufactures of saddles and other harness for mules, in which amounts the trade is very considerable. The sugar-cane is extensively cultivated in the district. P 3000.

JUNEDA is in Spain, Catalonia, prov and 16 m S E Lerida, at a hill foot. It is well built contains a parish church, conchouse process, and primary school; and has several oil and flour mills and a trade in oil and corn. Pop 1600.

JUNDA is a town in Bohemia, prov and 12 m N E Taber on the Blauze. It has a ducal chateau, a town house, a school, a fine old castle situated in the centre of the town, manufactures of linen, and a trade in agricultural produce. Pop 1812.

JUNGBUNAU is in Bohemia. See BUNZAU.

JUNGLEYPOOK, is in Hindostan prov Bengali 22 m N W Moorabaddah. The manufacture of silk here at one time gave employment to 3000 persons.

JUNGFRAU [Maiden] a mountain Switzerland, in the Bernese or Helvetic Alps, on the frontier between can Bern and Valais, 6 m S S E Lauterbrunnen. It is one of the most magnificent mountains in Switzerland and the loftiest calcareous mountain in Europe height 13,174 ft. It was first ascended by the brothers Marco of Aarau in 1804 again by the same persons in 1810 by six persons from Grindelwald in 1811 and by Augustus of Vichard and Forbes of Edinburgh in 1811. The height of the Jungfrau cables it to mark as the eighth European mountain.

JUNIA (St) is in France, dep Haute-Vienne, beautifully situated on the slope of a hill above bank's sense at the confluence of the Glane 19 m W N W Limoges. It is built in the form of an amphitheatre, surrounded by finely planted lawns contains an ancient and beautiful parish church, with a fine light altar and bell-tower and has manufactures of serge, woolen, and cotton cloths, gloves, stoneware and porcelain, dyestuffs, wax, refiners, tanneries, numerous paper-mills and a trade in horses and mules. Pop 3265.

JUNIN or **JUNY** is in Peru dep-Jumay, 108 m E N E Lima, E. side of lake Chumlayococha with some ruins belonging to the times of the Incas. Near it is the pumpa of Junin, where, on August 24 1824 the Spanish troops, under General Cantero were beaten by Bolivar.—The DEPARTAMENT, formerly called Tarma, stretches quite across the Andes, and includes the valleys of Tarma and Guanaco.

JUNKEYUN or **SALANG** an Isl Lower Seas, off W coast Malay Peninsula, from which it is separated by a

narrow channel, called Pappa or Pak Pa Strait, navigable only by small prahus lat 8° N, lon. 108° 30' E. It is 25 to 37 m long, and about 10 m broad, lying nearly N and S. The hills are of moderate elevation slope gradually and are clothed with wood to their tops, while the levels are covered with grass and forest excepting where cleared for cultivation streams abound. The soil is various—clayey on the E. side, sandy on the W and where hilly, composed of the debris of granite rock and vegetable matter. The extensive flats and gentle slopes are fitted for tropical productions, and the lower ranges of hills, to whose summits cultivation appears to have once extended, seem well adapted to the cultivation of lodges and coffee. But this is the product which gives to the island its chief value, about 500 tons having been at one time raised yearly, although several of the richest mines are said to be now pretty well exhausted. The animals are buffaloes, hogs, and deer. There are no wild elephants, but leopards are numerous in the wilder parts. Common poultry may be procured, but not in very great abundance. Both the E and W coasts may be closely approached by large vessels, but the W being a lee shore, the chief harbour has been chosen on the E. side. The latter is excellent and is covered by two islands in front. The population of the island is about 25,000 chiefly Siamese, the exceptions being Chinese. There are two priests here and a papard. Pop about 5000.—(*Journal of the Asiatic Soc. of Bengal*.)

JUNQUERA, several places, Spain—1, *La Junquera*, in Catalonia, prov of, and 25 m N E Gerona, partly in a plain, and partly on a slope near the foot of a lofty mountain. It is well supplied with water contains a parish church, a townhouse, a Latin and a primary school, and the old castle of Rocavert, famous in Spanish history, and has manufactures of cork and a trade in cork and cattle. Pop 1165—3, *Santa Maria Junquera de Andalus* in N. Galicia, prov and 13 m S E Orense, on the Arroyo, with a Gothic church a primary a handsome townhouse and prison, a primary school, and manufactures of woolen and linen. Pop 700.

JUPANOWA Sopka a mountain, Kamtschatka lat 53° 45' N; and lon 156° 30' E. It is of volcanic formation and still indicates the presence of volcanic agency by the smoke which issues from its summit, and the subterranean sounds which are heard within its bosom.

JUJILLIE, a vil and comm Belgium, prov and 3 m E Lage, v bank Meuse. It is an ancient place, known under the name of Jobb Vils, and was the favourite residence of Pepin d'Héristal who died here in 714. It has manufactures of nails and steam-boilers paper, worsted and flour mills, and three annual fairs. The extensive collection in the neighbourhood employ a great part of the inhabitants. Pop 2323.

JURA a river which rises in the W of the Russian gov Wlma near Istava, flows S, enters E. Prussia, and joins v bank Niemen or Memel above Tilsit, after a course of about 75 m.

JURA [Dura, Red deer] one of the inner Helvetic, Scotland, co. Argyle. N E. Islay from which it is separated by a narrow strait, 1½ m wide, having the Gulf and Strait of Corryvreckan at its N extremity between it and the island Scarba. The centre of Jura is at lat 56° 2' N lon 5° 51' W its length, S W to N E, 38 m recent breadth, 7 m on Coast-line about 45 m exclusive of the narrow, deep indentations called Loch Turbert which divides the island nearly into two parts, penetrating from the W to within a mile of Turbert Bay on the E. The general aspect of the island is exceedingly wild and rugged presenting apparently, a continuous mountain ridge, uninterrupted by any visible plain or valley and rising at three different points, into lofty conical peaks, called the Paps of Jura, the highest of which attains an elevation of 2700 ft, the other two summits being but a very little lower. On the E. side are some angular crags, of apical dimensions, with dry and level floors, and having lofty and beautifully arched roofs. The centre and W coasts of Jura are composed of quartz rock, other alternating with conglomerates of other materials. On the E. side the quartz rock gradually gives place to clay slate, alternating with mica, chlorite, and talc slate. Trap veins, conspicuous for their size and extent, are also common. The soil of Jura partakes of the barrenness of the rock on which it lies, being sandy, and, from the want of the climate, and want of ready drainage, much encumbered with peat. It contains but little land

really arable, and is chiefly devoted to the rearing of black cattle, of which 1000 to 1500 head are annually exported. Much, however, has been done of late years in the way of improving waste and pasture lands to the best advantage. Hill-drumming is extensively followed out, and large tracts, covered formerly with stunted heath, are now clothed with verdure. The island abounds in game, and still retains its ancient reputation for the size of its red deer, though their numbers have much diminished. Pop. (including Collooney), 1901

JURA, a dep. in the E. of France, bounded N. by Haute-Saône, from which it is separated by the Ognon, N. E. Doubs, E. Switzerland, S. and S. W. Ain, and W. Saône-et-Loire, lat. 48° 25' to 47° 30' N. lon. 5° 17' to 6° 11' E. length, N to S, 75 m. greatest breadth, 40 m. area, 1817 sq. m. The surface is very mountainous, being covered in the E. by the principal chain of the Jura, and in other directions by its ramifications. The loftiest summits within the department have an average height of above 4000 ft. The whole of the surface belongs to the basin of the Rhone, which drains it chiefly by the Ain and the Ognon. The lakes are numerous, but small. The climate necessarily varies with the elevation of the surface, but, even in the lower grounds, owing to the snow, which covers the heights in the month of April the winter and spring are colder than usual in the same latitude. Mist and rain also are very prevalent. The quantity of arable land is rather more than one-third, and of that under wood rather less than one-fourth of the whole. The corn raised meets the natural consumption. The vine also is an important object of culture, and in the summer spots produces a wine of good quality. The pastures are both extensive and rich, and the cattle reared on them, together with their dairy produce, form the chief source of wealth. Sheep are so few in number that a good deal of wool is imported into the department. The rivers and lakes abound with fish. The minerals include several metals, but the only one so abundant as to be worked to advantage is iron. Coal also is said to exist, but is not worked. Marble and alabaster abound, and there are salt springs in different quarters, from which a good deal of salt is made. The staple manufactures are iron. The only others deserving of notice are cutlery, coarse woollens, linen, mineral acids, leather and clocks and watches, articles in wood and ivory. The chief exports are wine, highly Crayère cheese, timber, and the above articles of manufacture. For administrative purposes the department is divided into four arrondissements—Lons-le-Saulnier the capital, Dole, Poligny and St. Claude subdivided into 32 cantons, and 584 communes. Pop. 316,150

JURA Thun (German Leberberg Italian Gressa) a chain of mountains, Europe, belonging to the system of the Alps. The name is sometimes confined to the ranges which overlie the lake of Geneva, on the W. and N. W. end, proceeding thence in the latter direction, terminate at the Rhone. More properly, however, the chain includes all the ramifications which lie N. W. of the principal chain, and also all the heights between Switzerland, the lake of Geneva, the Rhone, the Saône, the Doubs, and the plains of Alsace. According to this view they may be subdivided into six minor chains, stretching S. S. W. to N. N. E. The greatest length of the range is 200 to 220 m. from Delémont in France, dep. Ain, to the banks of the Rhine, and the greatest breadth about 60 m., between the lake of Geneva and the banks of the Doubs. The part of the Jura nearest the Alps is the loftiest, the height gradually diminishing as it recedes from them. From this circumstance—viewed in connection with the other facts that the steepest side of the principal chain is in the same direction, and that the subordinate chains have a marked parallelism with that of Mont Blanc and the adjacent mountains—the Jura may be considered as a terrace of the Swiss Alps, with which it was probably united before the excavation of the intervening valley. The principal geological formation is Jura limestone, with green sand and belonging to the lower Cretaceous series, gypsum and alabaster, beds of coal, oilshale, marls, beds of sandstone, and sulphurous and saline springs. Siliceous sands are numerous. The principal lakes, forming a kind of reservoirs of the waters of the Jura, are those of Neuchâtel, Morat, Joux, and St. Point. The valleys are almost all longitudinal, following the N. N. E. direction of the principal chain. The two chief rivers which have their source in the chain are both French—the Ain and the Doubs—and, descending from its W. slopes, belong to the basin of the

Vol. II.

Rhone. Seen from the lake of Geneva, the Jura presents a long wall of about 5000 ft. The line is generally unbroken, but occasional prominent peaks stand up and form the culminating points. The highest of these are the Reculet, Mont Tendre, the Colombier and the Dole, the heights of which are, respectively, 5653, 5545, 5587, and 5515 ft. This comparatively low height, at least 1500 ft. below the snow limit, cannot be expected to furnish the sublime scenery of the Alps, but presents numerous basins of a less obtrusive kind—hills covered with waving woods, from which picturesque masses of bare rock occasionally project, and fresh streams, forming beautiful cascades or gushing from sunny slopes, and shortly after following a meandering course through meadows covered with a carpet of the richest green. Even scenes of grandeur occasionally occur, as in the Val de Montmor and Münster Thal, between Basal and Bâle; the lake of Joux, and the Kins pass, at the foot of the Ober-Haemstein. Numerous wolves and a few brown bears frequent the woods.

JURANÇON, a tu France, dep. Basses-Pyrénées, about 1 m. W. Pau on a hill whose slopes grow some of the best wines in the department. Pop. 1529

JURJEV, par. Isle of France, 1868

JURJEV POLONAI, a tu Russia, gov. of and 89 m. N. W. Vladimir cap. circle of same name, on the Koloksha, at the confluence of the Snakolka, in an extensive plain. It is an ancient place, and has five churches, a monastery, manufactures of silk and calico, a printfield, several tanneries, and a trade in the above articles of manufacture and in garden stuff which are extensively grown in the environs. Pop. 8887

—The *omra*, in the N. W. of the government, is for the best part flat, and in many places marshy, but has several fertile tracts, and produces much hemp and fax. Pop. 86,000

JURJEV POKLOSKA, a tu Russia, gov. of, and 90 m. S. S. E. Kostroma cap. circle of same name, 1 bank Volga, a little below the confluence of the Unja. It has three churches, a convent, and a trade in tallow, hogs and corn. Pop. 2830

The *omra*, in the S. of the government, is fertile well cultivated and well wooded, and has a large part of its inhabitants employed in the manufacture of linen. Pop. 111,000

JURJURA (Latin, *Ferrata*) a mountain chain, Algeria, an offshoot of the Lesser Atlas. It extends S. W. to N. E. from prov. Algiers into prov. Constantine. On the frontier between the two provinces is the defile of Milian or the Fortes-de-Fer, through which the French, under the Duke of Orleans and Marshall *Alfée* passed, in 1839

JURRUK, or JEAN, a tu Selinde near some low rocky hills, 7 tank Indus, 80 m. S. by W. Hyderabad lat. 25° 8' N. lon. 68° 15' E. It carries on a good trade in manufactured wares with Beloochistan, and has manufactures of tasteless, highly-finished iron. Pop. about 1500

JURUA, or JURUNA, an affluent of the Amazon principally in Brazil, prov. Para, but having its sources in the N. E. part of Peru lat. 8° 45' S. lon. 67° 55' W. from which it flows with little deviation N. N. E. and falls into the Amazon at lat. 2° 40' S. lon. 65° 40' W. after a course of 540 m.

JURUENA, a river S. America, which, during a great part of its course forms the boundary between Brazil and Peru. It rises about 80 m. N. N. E. of the town of Maca-Grocco, in the N. slope of the Farens mountains, lat. 14° 42' 30' S. lon. 69° 45' W., 6 m. W. the sources of the Guapore, and thence after tumbling over a lofty height, proceeds N. and a little W. about 480 m. forms a junction with the Arinos, in lat. 9° 20' S. These united streams take the name of Tapayon. The principal affluents of the Juruna are the Juna and Socrun. Its fertile banks are peopled by uncivilized Indians.

JURÉN, a river Russia, which rises in gov. Orenburg, on the W. slope of the Ural Mountains near the sources of the Ural, flows first N. W. then W. and joins 1 bank Ural a little above the fort Jeldimskan, after a course of about 140 m. Valuable seams of iron are found upon its banks.

JURJEV, a tu France, dep. Haute-Saône, 19 m. N. W. Vesoul, 7 bank Amance, near its confluence with the Saône. It is built in a wide and fertile valley between lofty hills. It is a place of great antiquity, was formerly fortified, and endured a memorable siege, in 1595. Pop. 2681

JUST (Gr) a vil. and par. England, co. Cornwall. The village is situated about 1 m. E. Cape Cornwall, and 26 m. W. Falmouth, on ground rising about 200 ft. above sea-level. It is industriously supplied with water; but the streets are well

kept, and the houses in general have a respectable appearance. A library institution, opened in 1847, is a handsome edifice; there are, besides, a good market-house, a parish church, and two Dissenting chapels, with several day schools, a museum, library, and some charitable institutions, supported by subscription. There are several mines in the parish, which appear to have been worked at a very remote period, and are still productive. The produce of 1851, arising chiefly from the, amounted to 258,800. The inhabitants, who are principally employed in mining, are intelligent and temperate, and in general their dwellings are kept scrupulously clean. Area of par 7821 sq. Pop. 3759. — (Local Correspondent).

JUST IN ROSELAND (Sr) a par Eng Cornwall 4192 sq. Pop. 1557

JUSTE-CHÉVALER (Sr) a tn and com. France, dep. Loire, 15 m. R.W. Roanne, l bank Ais, with several fairs. Pop. 2757

JUSTI-LA PERDUE (Sr) a tn France, dep. Loire, 12 m. S.E. Roanne. Pop. 1065

JUBA-PUR-Louis (Sr) a tn France, dep. Loire, 12 m. S.E. Montbrason, par. Loire, here crossed by a suspension bridge. It has manufactures of shawls and printed cotton goods, bottles, and chemical products. Pop. 1231

JUSTO DE LA VEGA (Sd) a vil Spain, prov. Leon, on the sides of two hills, near the Tueris, about 1 m. from Astorga. It contains a parish church and a primary school, and has manufactures of serge, and two flour mills. Pop. 1000

JUTAI JUTAI or JUTAI a river S America, an affluent of the Amazon, principally in Brazil but having its sources N.E. Peru, about lat. 11° 40' S. lon. 68° 15' W. It enters Brazil, where its head streams first unite, about lat. 2° 30' S. and holding on a N course, falls into the Amazon at lat. 2° 40' S. lon. 56° 40' W., after a course of nearly 700 m. This river throughout its whole length, runs nearly parallel with the Jutai at a distance of about 70 m.

JUTERBOGH, a tn. Prussia, prov. Brandenburg, gov. Potsdam, cap. circle of same name, on the Havel, about 13 m. S.W. Berlin. It consists of the town proper surrounded by walls with three gates, and of three suburbs. contains five churches in one of which is preserved Tessel's indulgence box (Ablasskasten) taken from him, and its contents appropriated, by a knight, who, at the same time, administered to the arch-indulgences vnder a well-merited censure all under the shelter of an indulgence, for future and undefined sins, obtained from Tessel himself. It has manufactures of woollen and linen cloths, a trade in horses, cattle and wool and four annual fairs. Pop. 3318. — The climate is fine and well watered, but windy. Area, 299 sq. m. Pop. 45,197

JUTLAND (Jutland, Jylland, Jutland, or Gotland, Latin Jutia, Chersonesus Cimbrica), the name sometimes given to the whole of the Danish peninsula, extending N from Holsten to the Skager Mack, but more properly confined to the N. division of this peninsula, which forms the province of N. Jutland. This province is encompassed on three sides by the sea—the Skager Mack, on the N.W. and N. the Kattegat on the E. and the B. Sea or German Ocean, on the W. Its only land side is on the S., where it is bounded by Schleswig. It lies between lat. 55° 25' and 57° 44' 55" N. and between lon. 8° 7' and 10° 46' E. and is very irregular in shape. In the N. it suddenly narrows to a mere tongue of land which continues to taper gradually till it terminates in a point. Its base in the S. is about 70 m. and its width across the centre, measured on a parallel of latitude, about 106 m. its greatest length, measured in a slanting direction from its S.W. extremity, through the tongue of land already mentioned is 182 m. area, 7453 sq. m. In this occupies not much less than a half of the whole surface of the kingdom, and though neither the most populous nor the most fertile, is in many respects its most characteristic and important province. Its coast-line has been estimated at 593 m. Of these, 277 m. belong to the E. coast on which there are several good harbours and deep openings leading into navigable waters; and 316 m. to the W. coast, which possesses scarcely a single harbour or navigable creek, and is bordered almost without interruption over its whole extent, by a long line of sandbanks and reefs. Geologically the whole province belongs to the upper part of the secondary formation, and is composed of immense beds of chalk or limestone. The elements of the climate are temperate, but variable. On the W. coast particularly mists are so very

prevalent that a bright clear sky is seldom seen. One of the most remarkable features of N. Jutland is a vast expanse of inland lakes, extending across it from the very side of the W. to its outlet on the E. coast. It is comprehended under the general designation of Lum-ford a name which it owes to the strata of chalk or lime which line its shores but it properly consists of three principal divisions, each of which forms a distinct lake, and of a great number of minor branches, which ramify like network, and often assume the most fantastic shapes. Numerous small streams send their waters into the firth. Its only outlet is near Aalborg, where it comes to a narrow neck, which, though still retaining the name of Limfjord, is to all intents a river, and the most important river of the province. The area of the Limfjord is 424 sq. m. The other streams are not of much consequence. Those deserving of notice are the Gudaa, Stor Skjern Waer, Lønborg Kjøge, Skive, and Holm. The lakes are scattered with such profusion over the province, particularly its N. divisions, that it were almost endless to enumerate even those of them which in most other countries, would be deemed unimportant. The principal water-shed is formed by an elevated tract, of considerable width, which extends through the province in a slanting direction from N.E. to S.W. Its highest point, the Himmelberg, is only 550 ft above the level of the sea. It exhibits almost throughout a dreary expanse of moorland waste. The ground slopes gradually from either side of it, to the opposite coasts, and presents a very different appearance, according as the direction is E. or W. In the latter direction heath and sand continue to prevail, and the soil in general is so barren, that nothing but the most laborious and persevering industry enables the husbandman to draw from it profitable returns. The only exception is in the S., where the general barrenness is compensated by a series of low alluvial tracts, generally used as meadows, and covered with luxuriant verdure. Towards the N. on the contrary, the natural barrenness is increased, and the sand carried about in clouds, is continually making new encroachments, covering arable and pasture land into desert wastes, filling up lakes, burying forests, and occasionally even engulfing villages. But, on the E. coast, numerous tracts occur, distinguished alike by the calm beauty of their landscapes and the fertility of their soils. Here hill and dale, lofty woods of beech, and waving fields of corn are finely intermingled. The inhabitants of this province are considered to be the most genuine specimens of the old Danish stock and have preserved both the language, and the manners and customs of early times in their greatest purity. For administrative purposes, N. Jutland, divided into 10 amts or bailiwicks—Hjorring, Thisted, Aalborg, Viborg, Randers, Århus, Skanderborg, Valsb, Ribe, Skjern and Ribe. Pop. 577,000. — (Bjerggreen, *Der Danske Stat*)

JUTHAAR, a vil Holland, prov. of, and 8 m. S.W. Utrecht, on the canal between the Leek, with two churches, two schools and a fort. Pop., agricultural, 1464.

JUTHORZYN or JUTHORZYN a tn in Prussia, prov. and 54 m. S.E. Posen, on the Orla, with two churches a synagogue and manufactures of woollen and linen cloth. P. 1776.

JUTTEFEL MOUNTAINS, a mountain range, Scinde, stretching S.W. from Sukrawa to Dooba about 70 m. lat. 25° 25' to 26° 20' N. lon. 67° 45' to 67° 55' E. They are steep, and above 2000 ft. high.

JYHON.—1 [anc. Fyromas] A river Asiatic Turkey, past Marash and Isiah. It rises in Mount Taurus, about lat. 37° 52' N. lon. 37° E., flows N.W. past Marash, and, after a course of about 160 m., falls into the Bay of Iskenderon, N.W. side.—2 or JYHON Turkistan. See Ooze.

JYNTEAH—1 [anc. Hindooism], beyond the Braham-pootra, between lat. 25° and 30° N. lon. 91 and 93° E.; bounded N. by Assam E. by Cachar, S. by the dist. of Sylhet, and W. by the Garrow hills. It is about 108 m. long, by 57 m. broad and is divided into a N. central, and S. district, the last of which is composed of well-watered and fertile plains. The other divisions are hilly, but the highest mountains do not reach an elevation of more than 1000 ft. During the Burmese war it was taken under British protection, and has since been annexed to the district of Sylhet.—2 [anc. Hindooism], the cap of the above dist., and residence of the Rajah, is situated at the foot of a range of mountains 20 m. N. by E. Sylhet.

K

KADIFN or **KADAYNA**, a tn. Dohemia, circle of, and 19 m W N W. Suez, in a mountain valley, 1 h. E. Eger, here crossed by a bridge. It is called, has four churches, a convent, Flavia college, and an old castle, converted into barracks. Manufactures of cloth and hosiery, and several corn markets. (a) is worked in the vicinity 1 op. 3229

KAAGÖE, an isl. off N W coast Norway properly forming part of the Lofodden group lat. 70° N lon 21° E It is about 18 m. long, by about 9 m. broad, and is chiefly composed of lofty mountains, which are seen far off at sea

KAAL, a vil Hungary co. Hervas, on the Tarna, about 12 m. from Eria. Inhabitants agricultural Pop. 2291

KAARTA, a country of W Africa, between lat. 14° and 15° N., and lon 8° 30' and 10° 30' W It is bounded W by Kason, E by Bambarra, and, though mountains, is fertile. It is under the sway of the Bambarras

KAATSHU/VEL (De) a vil. Holland prov N Brabant, 12 m W S. W. Hartogbusch with a large church and a school. The inhabitants make sulphur matches and butter brooms which are sent to all parts of the country Pop. 858

KABA NAQ a vil Hungary Thutler Theiss, co. Bihar 6 m from Mosolova, with a Protestant parish church. It has in a fertile district where much grain is grown and many cattle are reared. Pop. 6179

KABAH a ruined city Lucania about 30 m. S E Ugenti. The ruins are very extensive and contain some curious specimens of sculpture and engraving on wood.

KABAN MAJES See KAMADEN

KABARDIA a dist Russia-in-Europe in the N of Caucasus, separated N by the Terek from gov. Lencosau bounded, S. by the country of the Guesets, and W by Little Abkhassia. It is partly covered by some N ramifications of the Caucasus has a mild climate, fine meadows, a fertile soil, and raises cereals and legumes and depastures great numbers of horses, cattle sheep, and goats The country is usually divided into Great and Little Kabardia the former the W, and the latter the E portion.

KABEN NDA, a resort in Africa. See CARENIA

KABEN a tn Tunis See CAEN

KABO/LOBO, an uninhabited isl. Indian Archipelago, on the N E. coast of Isl. Sangir It is esteemed holy by the inhabitants of the Moluccas, affording, as it does excellent shelter to their frail vessels during heavy weather

KABOOL, or **CABOOL**, a river Afghanistan, prov Cabool It rises on the E. declivity of the Omana ridge, about lat. 34 20' N lon 68 20' E at an elevation of about 8000 ft flows N E, past the city of Cabool till it is joined by the Pamsir from the N W whence it flows E E. till it falls into the Indus, near Attock after a course of about 330 m. At first it is an inconsiderable stream but, subsequently receiving many large tributaries, becomes a formidable river sweeping, with prodigious rapidity and violence along the N base of the Khyber mountains and, in consequence of its boiling eddies and furious surges, not navigable except on rafts of hides E. of these hills it divides into three branches, which afterwards re-unite at Dabundee where it is about 300 yards wide, and whence it is navigable for boats of 40 or 50 tons, to Attock. Its principal tributaries are the Logur which joins it from the S the Pamsir, the Tager, and the Kama, with several others of lesser note, from the N The Kabool is the only great tributary to the Indus from the W

KABOOL, or **CABOOL**, a city See CABOOL

KABOU a country of W Africa, Upper Guinea, between the rivers Gambia, Gebao, and Juba. It is for the most part level, and covered in some places with thick forests. Rains very abundant from May to October, climate warm, moist, and unhealthy; the soil very fertile, yielding rice, millet, and Indian corn indigo and cotton. Mandingos are the most numerous of the inhabitants, and Shells is the only language in use. They have large and populous villages, well cultivated fields, are possessed of considerable riches, but are insolent, intractable, avaricious, and unkind to slaves.

KABR-IRAHIM or **KHATEL** a tn. Palestine, the modern name for Hebron (Jebus) see

KABEIRA, or **CABEIRA**, a Gradus lat. S. coast, between Cape Gallo and the isl. Sapezuma lat. (at extremity) 88 40' N lon. 21 47' E. (n.); about 5 m. long and 3 m. broad. At a distance it appears like a high and circular mass of land, serving to point out the adjacent harbours.

KABROUANG, an isl. Indian Archipelago Salibabon group, between Mindanao and Gilolo lat. 3 47' N lon. 137 E (n) It is about 20 m. in circumference, well cultivated and has a high peaked hill in the centre. Pop. 4000

KABERARY a tn. Central Africa, Bornu, 1 h. from Yala, about 85 m. from its mouth in Lake Tchad and about the same distance W Konka lat. 13 N lon 19 10' E.

KACHAO, a city Anam. See CACHAO

KACHAR a dist Hindoostan See CACHAR

KACHGAR, a tn. Central Asia See CASHGAR

KACHVAL-SERAI, a considerable town in Hindoostan prov Malwa, in a well-watered district and having several bazars; lat. 24 30' N lon 77 35' E.

KACHPOUR a tn. Russia, gov. Simbirsk, circle of, and 6 m S Syran r bank Volga. It still possesses the remains of towers and bastions and has three churches. 1 op. 1200

KACI NDA or **BUNDIA** a tn. of W Africa, Guinea, r bank Niger about 35 m. below Egga lat. 8 15' N, lon. 8 22' E It consists properly speaking of three or four villages each of considerable size, but unconnected, though situated within a very short distance of each other, i. e. circular and built of clay. It is the capital of a state or district of same name. Pop. 3000

KADARKUT a vil Hungary Thutler Danubio, co. Sümegh 14 m N W Szeged, with a Protestant church and a synagogue. Pnp 1206

KADDO, one of the Dhalan isls Red Sea, near the N end of a sandy and rocky bank. It is about 2 m. long, E. to W, and rather high, with a rocky shelf off its W end.

KADIAK or **KODIAK**, the largest of the Aleutian islands, and separated from the mainland of Russian America by the Straits of Chelgoff about 40 m. wide lat. 53° 30' to 57 45' N lon 152 to 154° W, length N E to S W 120 m. breadth, N W to S E 60 m. Its mountains, of granite, are of considerable height, and have, for the most part, a slight covering of soil. The valleys are narrow, and interspersed with rocks of a schistous nature, and in some localities chalk is found. The coast is much indented and contains good harbours. Kodiak is watered by numerous streams, and its climate and vegetation are superior to those of most of the other Aleutian islands. The land, particularly near the coast, is fertile, and is covered with thick grass. It also produces abundance of strawberries and gooseberries and oats, barley, and the common kitchen herbs are raised. In the interior are forests of pine birch, poplar and various species of willow. Bears and foxes are very common but the beaver, reindeer lynx and other animals yielding fur, have become comparatively rare. The coasts abound with whales, seals, shell fish, and sea-fowl. The island is said to have been seen by Behring, but possession of it was first taken, in 1760, by Chelgoff, in name of Russia, to which it still belongs. A fur company then established, with important privileges, still exists, and has its chief establishment on the Bay of Lakhik, where, in addition to the buildings of the company are a church, several shops and dwelling-houses, possessing gardens and patches of cultivated ground. This settlement is the depot where all the furs of the Aleutian islands are deposited, before they are sent off to Russia. Pop. 3600

KADIN, or **KANISO**, a tn. Russia, gov. Mohilev, circle of, and 19 m N W Madalevi, r bank Gorodnka. It has an important annual fair

KADJANG a small native state, nl. Calabon, S. W peninsula, a dependency of Buni, and on W coast gulf of that name. Its capital, of same name, lies on the small river Kadjang, in about lat. 6° 20' S.

KADNIKOV, a tn. Russia, cap. circle of same name, gov. of 23° N. N. E. Volynsk. lat. 53° 24' N.; lon. 40° 40' E. on the border with a church. Pop. 2035. The church (area, 3073 sq m) contains 78,091 inhabitants, employed chiefly in the preparation of brick- and producing various wooden articles, and in hunting.

KADUE, or **KANOU**, a central prov. in Java, bounded N. E. by Samarang, E. by Soerakarta, S. by Lijepokarta, and W. by Bagelan. It is hilly elevated, and consequently has a comparatively mild climate. Its soil is volcanic, enriched by numerous streams, and the most fertile in Java. Rice, cotton, pepper, poppy-oil, sugar, unseasoned tobacco, numerous edible roots, and all kinds of tropical fruits, are among its products. It yields likewise about 9 000,000 pounds of coffee annually. A small quantity of indigo and the inhabitants prepare a kind of leaf-mat for stools, etc. The horses of Kadue are large, strong, and fast. Pop. 323 119.

KADOL-GBER, a market in Bavaria circle Middle Franconia, 9 m W. Rünning. It contains two castles and a Protestant parish church and has some trade in corn and fruit. Pop. of in 1950 of dist. about 90,000.

KADUN a tn. Russia, gov. of, and 130 m N. Tambor on the Mokolca. It is built chiefly of wood, but contains three churches, and has a considerable trade particularly in honey and several well frequented annual fairs. It is inhabited chiefly by descendants of the Tartars, who are said to have founded it. Pop. 5800.

KAECHIKI a city China, Manchouia, E. side and 8 m. from head of the Gulf of Leaoching lat. 40° 25' N. lon. 121° 47' E. Its trade is very considerable, the produce of the surrounding country being collected here, and exported to Fokien, Canton and Hong-kong.

KAFI a country of E. Africa, S. of Abyssinia, and within, or on the borders of which are the sources of the Bah-el Abiad, or of its chief tributaries. Kafi was visited for the first time by a European traveller (M. A. H. Abiad) in 1848 but as the narrative of that journey has not yet been published, our information respecting the country in question remains still very scanty. Kafi is an elevated plain or table-land extending along the S. of Enares its boundary being formed chiefly by the River Gofado called by the Gallas Gofel, which, rising in a forest, in about lat. 7° 40' N. lon. 3° 30' E. flows N. E. about 150 m. till it joins the Lma.

This great river formed by the junction of two or more streams, called Gilbe (in old writers Edey, runs S. on the E. side of Enares and Kafi, and then turning S. W., joins the Tuhur, or Bah-el Abiad after a course of 500 m. or 600 m. The extensive region thus encompassed by the Lma and its affluents, and which has been vaguely entitled the island of Kafi, embraces the following countries—1. On the E. in the angle formed by the Gofado and the Lma, lies Kilo an elevated and mountainous tract inhabited by the Omani. 2. S. of Kilo is Gobo, also peopled by Omani—opposite, on the E. beyond the river, are the Negroes called Dokio.

3. Kafi proper is situate to the W. of Kilo—in capital, Bonga, standing in lat. 7° 10' N. lon. 36° 24' E., at no great distance from the Gofado. 4. Guma, W. of the preceding, is occupied by a people who call themselves *fiang* probably a branch of the Shaitas (Shit), who were established in Great Danos, in Abyssinia, previous to the irruption of the Gallas. 5. The country of the Buro 150 m. or 200 m. S. W. Bonga, and which producing barley in abundance, appears to be a continuation of the table-land, and to have an elevation of at least 7000 ft. 6. S. of the Buro are the Negroes called Mshanga. Kafi has been hitherto erroneously described as a country of lofty mountains. It proves to be a uniform plain, bearing palms and characterized by the production not of cereal grains, but of the esnea, a plant resembling the manna or benzoin. Thus, it would appear to have an elevation barely exceeding 5000 ft. The source of the Gofel has a height of 4600 ft. The application of grass-ester is used in Kafi as a term of contempt; the esnea furnishes the staple subsistence of the people. The kang or fete, as he is called, of Kafi has at the command 10 000 horsemen, but rules none to be absolute. It is not quite clear whether Christianity in any form, is still recognized as the religion of the country, but we are told that there are at least two churches in it, and the people are still called *Shaitas* a name which appears to have at one time distinguished the Christians of E. of Abyssinia.

It is certain that Kafi is the native country of the coffee plant (the *Indica* of the Arabs) and a very large proportion of the coffee now exported from Mocha, arrives at that market from the N. frontier of Kafi, and the S. part of Enares. Coffee,ivet, cardamum, and khar are the chief productions of the country which find their way into commerce, the last named of these—a kind of tea plant, the leaf or young twig of which is used by the Arabs as a masticatory—seems to be here, like the coffee plant, on its native ground. The people of Kafi are of the Abyssinian type, their language belongs to what M. D. Abbadie calls the Hamitic group, and is related to that of the Gallas, who dwell on the Abbat or Blue Nile, at its S. W. bend.

KAFERNIAH or **HISAR**, a river Central Asia, Turkistan, an affluent of the Upper Oxus. It has its sources in the Pamir table-land, about lat. 39° 30' N. lon. 70° 30' E., from which it flows S. passes the towns of Hisar and falls into the Oxus, 60 m. N. E. Balkh, lat. 35° 50' N. lon. 68° 30' E. after a course of about 210 m.

KAFERHAL, a vil. Baden, circle Lower Rhine, 8 m. N. E. Mannheim, with a parish church, manufactory of soda, and a mill. Pop. 1542.

KAFI now **FEODONIA** (anc. *Theodona*) a tn. Russia, W. angle of a magnificent bay in the S. E. of the Crimea, lat. 40° 6' N. lon. 25° 30' E. It is walled and well fortified and contains numerous public buildings of which the most worthy of notice are the three churches—a Greek, St. Catherine, and two mosques, two mosques, a spacious and commodious quarantine, and a college, founded by the Emperor Alexander, chiefly for gratuitous instruction in the modern languages. There is also a botanical garden, and a museum which is rich in the antiquities of the neighbourhood. The site and excellent harbour of Kafi would seem to mark it out as a place of great trade, but it has formidable competitors in Odessa and Kerch, and does not seem destined to recover its lost importance. It is a place of great antiquity, having been founded by a colony of Greeks from Ionia. It received its name of Theodona from the wife of Leonon, King of the Bosphorus, who took it after a long siege, and soon made it a place of great importance. In the Middle Ages it passed into the hands of the Genoese by purchase from the Khans of the Crimea, and became the seat of an extensive commerce with the East, by the way of the Caspian and Astrakhan. At this time it is said to have had a population of 80 000, but, having been taken by the Turks in 1474 its prosperity rapidly declined. Much has been done for it since it came into the possession of Russia, and it is still one of the most important towns in the Crimea. Pop. (1849) 8450.

KAFPRARIA a populous and fertile country of S. Africa annexed to the colony of the Cape of Good Hope, on the E. in order to find a general name for a number of different kindred tribes, the Dutch colonists adopted the word Kaffir, learned by the Portuguese from the Arabs, who apply the epithet Kafir signifying in their language, an unbeliever or pagan to the wild and uncivilized African natives. In this sense the term is inconveniently comprehensive and arbitrary have, at different times, applied it arbitrarily to very different groups of African nations. The inconvenience of a vague and inappropriate expression may be best avoided by using it in its narrowest acceptance. We shall therefore here take the name Kaffir in the colonial sense, as meaning the tribes who occupy the maritime region or from the mountains to the sea between the E. frontier of the colony and the British settlement at Natal, and who have one language and a common descent.

In 1795, the Kaffirs extended their dominion to the Great Fish River in lat. (nearly) 32° 27' S.; lon. 27° E., seizing upon the territory which had belonged to the Gossaga Kottentots, who appear to have become mingled with their conquerors. But, soon after they came into collision with the Dutch Boers, who, having advanced 600 m. E. from Cape Town, were in dignant at finding that the Kaffirs had advanced 40 m. in the opposite direction. The natives were repulsed, and driven, for the most part, beyond the Kalkamma but they never renounced their claim to, nor wholly withdrew their cattle from, the country between the rivers which, for some years, bore the title of the Neutral Territory. In 1835, when the defeated in the war which they waged on the colony, the Kalkamma and Kat river were fixed definitely as their W. boundary. From the Kalkamma to the Lomudikile (lat.

80° 28' E.), the farthest extent of the Kaffras towards the N. E., is a distance of 360 m. The breadth of the territory, from the mountains to the sea, is about 80 or 90 m. Formerly the E. limit of Kaffraria was at or near the Umamkulu (Hippopotamus river), which is 109 m. S. W. of the Umamkulu (Great Reed), or, at least the country E. of the former river, towards Natal, had, till after 1838, little or no population. But the retrenchment of territory on the W. seems to have constituted an extension on the E. Within the limits thus described, Kaffraria has an area of about 20,000 sq. m.

The mountains which, running parallel to the sea-coast, bound Kaffraria on the N. W. are called by the colonists the Winterberg, and, further N. E. the Stormberg. The natives do not seem to have a general name for the range, but a considerable portion of it, next the colony, is called by them Ivaga. These mountains rarely exceed the height of 3000 ft. Their most elevated summits are composed of trap-rock, clay-slate and sandstones appear lower down, and limestone has been found in small quantity near the coast. The level plains terminate about 20 m. from the sea, then follows a land of hill and dale extremely varied and picturesque. Numerous rivers cross this country to the sea. On its W. side, indeed, or between the Keleakamma and the Great Kal through the brooks are numerous in the hills the lower tracts still resemble the colonial forests in deficiency of water, but this defect rapidly disappears as we advance to the N. E. where the country grows at every step more fresh and vigorous. The chief rivers beyond the Kai are the Babi Umkila, Umamkulu, Umamkulu, and Umamkulu. These rivers all run in deep beds with steep banks, and, in the rainy season, swelled by the countless mountain-streams that join them they become immense torrents. But their course is rapid the floods soon pass off, and, in the dry season the lower part of the river often exhibits but a chain of pools. None of the rivers of Kaffraria are accessible even by small vessels, except, perhaps, the Buffalo between the Keleakamma and the Kai.

The country between the Fish River and Keleakamma, formerly the Neutral Territory, is nearly all a thicket, or, in colonial language, a bush, of thorny acacias. Between the Keleakamma and the Kai the country is more open. The banks of the rivers are shaded by large trees in the small thickets, scattered over the elevated grounds, the aloes and euphorbia are conspicuous. On the downs at the mouth of the Kai, the banana grows wild. The forests on the hills, contain among other varieties iron-wood, yellow wood a magnificent acacia, with leaves 8 ft. long and a species of sago-palm. The grasses in these countries are all very rank and tough, and grateful to cattle only when throwing out new shoots after the old crop has been destroyed with fire. Indeed, S. African cattle may be rather said to browse than graze. The Kaffra women cultivate a little maize, millet, and water-melons, with some tobacco and hemp, for smoking. In a few instances, near the frontiers, the labours of the field are now performed by men, who imitate, with ability and success, the husbandry of their white neighbours; but where the national habits remain, the extent of the cultivated fields or gardens is inconsiderable.

As the vegetation rapidly improves N. E. from the colony, increasing in vigour and abundance, so also the animal species undergo a change. On the W. of the Keleakamma, the quaggas and smaller antelopes, of many kinds, are numerous. On the E. are the large antelopes, the dorcas, eland, &c., the hippopotamus, and the elephant. The chase of these animals is a source of profit to the Kaffra, the abundance of wild honey, found in the clists of rocks, or in hollow trees, and in the search for which he is guided by the honey-bird, adds also to his resources. But herded cattle constitute the Kaffra's chief wealth. The Kaffra cows are ordinarily very large, but there is also a small breed, and the colonial breed has also been introduced by stealth or purchase. It is said that the native breeds yield much less milk than the European but we know not whether this inferiority may not be ascribable to the want of succulent food. Horses, purchased or stolen from the colony are now multiplying rapidly in Kaffraria, where, on the other hand, there are no sheep, goats, pigs, or poultry. The Kaffras, with the simple tastes of a pastoral people, prize strange articles of food; they will not taste small game, hares, birds, &c. nor fish; which, though abundant in their rivers, they hold in abhorrence.

Kaffraria differs materially from the Cape Colony in climate, whence originates its difference of vegetation. In the former country the seasons are regular, and have the tropical character, that is to say, the winter or cool season, from May to August, is dry and clear, the summer or hot season is also the rainy season. The rain always falls in the afternoon, with great violence, and generally attended with thunderstorms. The summer heat varies from 70° to 90° Fah in the shade, in winter the mercury rarely falls below 50° during the day but at night there are hour-frosts, and snow falls on the mountains. Thick and humid mists also are not unfrequent in summer. In winter the N. W. wind often blows with incredible violence, carrying with it clouds of dust from the dry plains. Sudden changes of temperature are not uncommon during the rainy season, and the climate, though perfectly salubrious, is disagreeable to those habituated to the equability of the Cape climate.

The Kaffras, within the limits which we have assigned to them, consist of three nations, namely—the Amakhas, or as the missionaries write the name, Amakhas (the represents a clashing sound borrowed from the Hottentots), the Amatémku, called by the Boers, Tambogor or Tamboukies and the Amaponda or Mambookus. The Amakhas (pl of Mzoen) occupy the country from the Keleakamma to the Bush (about 80 m.) and from the foot of the mountains to the sea, and, being in immediate contact with the colony and often in hostilities against it, they are more especially meant by the expression Kaffras. The Boers call them Kooles which is perhaps not derived from their national name but rather from the title of their chiefs (Aka), with the natural sound of the K. The Amaponda extend along the coast from the Bush towards the Umamkulu. The Amatémku possess the elevated land at the sources of the rivers, and the valleys between the mountains N. of the Amakhas, and nowhere approach the sea-side. The common ancestor of these three nations was Zwida, who lived 14 generations (at least 300 years) anterior to Hlotse, who fell in the Kaffra war of 1835. Kfoa, or Xosa, the great warrior who gave his own name to his tribe (the Amakhas) lived five generations later than Zwida. The original affinity of these three nations is still kept in view by some remarkable customs. The chiefs of the Amakhas and probably of the Amaponda also, take wives from the Amatémku and the children of these wives alone inherit their fathers rank. Thus Masodno, a chief of great natural ability governed the Galla branch of the Amakhas for some years, till his younger brother Sandili, the son of the Amatémku wife came of age, when the latter the present (1832) chief assumed the reins of government. It must be observed that, at the termination of the war in 1835, the country between the Keleakamma and the Kai was placed in some measure under Hlotse control and received the name of Hlotse Kaffraria. It is divided into the counties of Bedford, Lincoln, Mulders, York, Northumberland, Sussex and Cambridge. A large body of captives (the Amakhas) found in the villages of the conquered Kaffras, were then located in the lower part of that territory. These people, called in the colony the Hlotse, are of the Zulu or Amakhas nation (W. by S. of Delagoa Bay) and, though now settled in Kaffraria, are quite distinct from the Kaffras.

The appearance of the Kaffras is highly prepossessing, tall and beautifully formed, with fine eyes and open countenance, their every movement, look, and carriage show vigour and animation. Their colour is a dark iron-gray except thick lips, they have no Negro feature their heads are well formed their hair is woolly and in little tufts. The men, the chiefs particularly, exceed the stature of Europeans, the women, on the other hand, are small, but elegantly formed. Vivacity and good temper characterize both sexes. The men take as many wives as they can buy but it does not appear that polygamy among them ever runs to great excess. The fact is, that the purchase of a wife in Kaffraria is analogous to the making of a marriage settlement in England. The wife provides for herself a cottage and cows, but, as she is not individually consulted, the whole affair being settled with her parents, it is obvious that inconsiderate marriages are not likely to take place in Kaffraria. On the women devolves the care of the house, which is a spherical hut, framed of branches of trees, plastered with mud and cow dung and covered with reeds or palm-leaves. They also cultivate the fields and gardens, which give them little trouble, and they

prepare the skins used for clothing, beating and rubbing them until they have completely pulverized the inherent gluten. The men, on the other hand, are occupied with war and thieftaking. These last constitute the Kaffre's wealth, they are the constant object of his thoughts and admiration; he is always happy when looking on his cows. He knows how to

train the growth of the horns by nicking them. He teaches the bullocks to race, and constantly rides them. Instances are not wanting of great chiefs who claimed their horned cattle in regiments, according to colour, and trained them to jobs in the dance. Mik is the Kaffre's chief sustenance, and always in the curdled state. It is kept in baskets made of rushes,

KAFFRE WITH LAKE (KABAZ).—From August. Part Natal: w. Illustrations of the Kaffres.

and so closely plaited as to be water-tight. These, when frequently used, imbibe the lactic acid, so that the new milk poured into them very soon curdles. Venison, beef, marmosade of the water-melon, and various fruits, season the Kaffre's repast, but in small quantity. He may be said to live on milk, and a little millet or kaffre corn. Their dress is simple; the men are always bareheaded and wear a cloak (kaross) of skin, which they wrap close round them in winter; with the hair made the exposed side being reddened with ochre. They are often tattooed on the shoulders, and wear copper iron, or ivory rings and strung shells on their arms and legs. The kaross of the chief is generally of leopard's skin. The chief distinction of the female dress is the cap of lynx-skin,

Talambie; whose followers probably amount respectively to 50,000 45,000 and 40,000. The inferior chiefs could add perhaps another 40,000. The Amasombe under one chief (Uyefika we believe), do not probably exceed 70,000. The Amasombe, removed from the colonial frontier and with ample territory are probably increasing rapidly in numbers, reaping the chief benefit of the disorder in the W. and may be taken at 100,000. Their great chief is Fakai. The latter two nations are not avowedly at war with the British but there can be no doubt that they take part in the contest. It is said that the Kaffres can arm one in six of their entire population, boys of sixteen are reckoned as the best troops. If this be correct, then the Kaffres have a force of at least 50,000 fighting men. War is not sport to them. They are a shrewd and observant people, they know their deficiencies in the S. A. and are rapidly supplying them and should they but add a military organization like that of the Amasombe to improved arms, they will become truly formidable.

KAFIRISTAN, CAUPHIRISTAN or CAPHIRISTAN [Land of infidelity] a country of Central Asia, bounded N. by Badkshan W. S. and E. by Afghanistan and N.E. bordering on Central, lat. 35° to 36° N. and lon. 68° 20' to 71° 30' E. length, E. to W. about 110 m., breadth about 69 m. It includes a considerable portion of the Hindoo Kooch mountains, and part of those of the Bolor-Tagh and consists wholly of snow-capped mountains whose sides are covered with vast pine forests, deep and narrow chasms, and small but fertile valleys which produce large quantities of grapes, wild and cultivated, and flocks of sheep, and herds of cattle, while the hills are covered with goats. Grain is scarce and of inferior quality. The common kinds are wheat and millet. The S. part of the country, towards Afghanistan, is more level. It is traversed everywhere by innumerable torrents but its principal drainage is by the rivers Tagoos, Alaulang, Alingar, and Kama, all of which flow S. towards Afghanistan. The roads are only fit for men on foot, and are often crossed by rivers and deep torrents which are passed by fixed or swinging bridges. The inhabitants of the wild districts constitute an independent nation, and claim a European descent, priding themselves on being 'brothers of the Pirs,' and are so considered by the Mahometans, by whom they are surrounded, and who, accordingly, call them Kaffres—that is, infidels. They allege that they are descendants of the troops of Alexander the Great, who passed through their country, and it is certain, whatever truth may be in the allegation, that in many points, of both

KAFFRE CHIEF OF THE BALO TRIBES.—From August.

which is made of a conical shape but the cone laps forward, and, being fringed with blades, rings, or shells, hangs over the knees.

The Amakom at present (1853) obey several chiefs, three of whom are nearly equal in power, namely, Sandili, Krull, and

character and personal appearance, they much resemble the Germans, being fair complexioned, regular featured, remarkably handsome, and intelligent. Their intelligence is displayed in the construction of their houses, which are in general of wood, several storeys high and embellished with much carving. They are also good smiths, and their silver drinking-cups and bowls are worked and embossed in a very elaborate and artistic manner. They believe in one God, but also worship numerous idols made of stone or wood. Liberality and hospitality are their favourite virtues, and are largely practised amongst them. Their food consists chiefly of cheese, butter, milk, bread, flesh and a variety of fruits. Both sexes drink wine to excess and get merry in their cups, but never quarrelsome. Their favourite amusement is dancing, which they perform with great volubleness. Their music is generally quick, but varied and mild. They are a warlike people, and are not known to have been conquered, though surrounded by Mahomedans, whom they detest and with whom they live in a constant state of warfare, and who take every opportunity of harassing and oppressing them, invading their territory and carrying them off as slaves. Though often provoked to extremes by the persecutions of the Mahomedans whom they defy without success, they are generally humane, affectionate, and kind-hearted people, merry playful fond of laughter, and altogether of a sociable and joyous disposition.

The Kafirs, from their black goat-skin dress hang outwards are also named *Siyah Posh* [black clad]. They do not sit cross-legged, like other Amapians, but use stools and chairs after the manner of Europeans. They have no general name for their nation but are divided into tribes, occupying different valleys, each tribe having a peculiar name. They have hereditary priests, who have no great influence. It is not known that they have any regular government, all state affairs being managed, it is believed, by consultations among the influential persons. The property of the wealthy consists in cattle and slaves—(Tiphin's *Cashal*, Burnes *Bahara* &c.)

KAFF KOT [the Infidels fort] an extensive ruin, Punjab, 8 bank Indus lat 32° 50' N lon 71° 21' E. It consists of a number of towers bearing every mark of extreme antiquity, rising on the very summit of a mountain chain. A detached wall extends from them to the river.

KAGAI NIK, a town, Russia, which rises near the centre of Khasarabai, about 18 m. W. Khabunov, flows S.E. and after a course of 110 m., discharges itself into the Black Sea by a large lagoon. The principal affluents are the Telaga and Chikladra, both of which it receives on the left.

KAGHUBARA a populous vil. Hindoostan presd. Bouhar, prov. Arrungabad on the margin of a small lake, built of black stone, and noted for the manufacture of paper.

KAGUI, a lake, Russia, S.W. of prov. Khasarabai near the confluence of the Pruthi with the Danube, greatest length, 24 m., breadth about 9 m. It falls into the Danube.

KAHERLEK, a town, Persia, Damask, 8 bank Indus, here 1010 yds. wide, lat. 31° 25' N lon. 70° 57' E. Here is one of the principal fortresses of the Indus.

KAHLA a town, Germany, Saxony, Altenburg, cap. circle of same name, 1 bank Saale, here crossed by a bridge, 18 m. S.E. Weimar. It is walled, has three gates three suburbs, several courts and public offices, two churches and an hospital and manufactures of woollen and linen cloth, tanneries, dyeworks, tile-works, and a trade in wool and cattle. On the opposite side of the river is the old castle of Leuchtenburg now a prison, and was a hill overlooking the public road, the ruined castle of Oranienburg. Pop. 2468.—The *Circus* area, 96 sq. m. Pop. 15,820.

KAHOOWAWE, one of the Sandwich isles, off S.W. point Maui, and from its shape and appearance, apparently once a part of that island. It is 14 m. long, and 5 m. wide, low, and almost destitute of every kind of verdure or shrub, excepting a species of coarse grass. It is inhabited by a few poor fishermen only, and is used as a place of exile.

KAHLN a fort and in Afghanistan, in an extensive valley or plain, 15 m. long, and 16 m. broad, lat. 33° 20' N lon. 66° 15' E. It is a naturally well built and is surrounded by a wall. Water is scarce, the town depending wholly on rain collected in a tank. Kahlm was possessed by the British in 1846. Some months afterwards, a detachment which was sent from Poonah to relieve the fort, was attacked by the

Belooches, in a narrow pass, within a few miles of Kahlm, when 179 of the British were killed, 92 wounded, and 1076 camels, a great quantity of ammunition and stores, and three pieces of artillery, fell into the hands of this enemy.

KAIAHA, a town in Finland. See *KAJIA*.

KAIFFA, a small walled town and seaport, Asiatic Turkey, Syria, about 6 m. S.W. Acra lat. 32° 55' N lon. 34° 56' E (N.). It has a mole and anchorage, defended by a castle.

KAIFUNG or **CAI FONG**, a large city, China, cap. prov. Honan, 8 bank Yellow River 350 m. S.S.W. Peking, lat. 34° 55' N lon. 114° 20' E. It is a very ancient city but was destroyed in the 12th century by the overflowing of the river. Previous to that calamity it contained numerous palaces, gardens, and government houses and though it has been rebuilt, it has never attained to its ancient splendour. It has since been frequently inundated by the Yellow River but not with such serious results as in the instance above mentioned. The last calamity of this kind occurred in recent years, by which part of the city was destroyed and the inhabitants dispersed. The dykes erected in the vicinity of the city to prevent a recurrence of this visitation extend many miles, and are under the superintendence of the governor of the river. Kaifung is noted as the principal seat of the Jews in China, who have here a place of worship between 300 and 400 ft. in length, and about 150 ft. in breadth comprising four successive courts, various halls, and other apartments and a synagogue.

KAILAN MOUNTAINS, Tibet. See *CAIN*.
KAIN, a vil. and com. Holguin prov. Hainaut, on the Scheldt, 28 m. W. V. Mons with two breweries, a distillery and two oil mills, a considerable trade in agricultural produce and vegetables, particularly asparagus, for which the district is famed. Near it are clay-works springs. Pop. 5093.

KAINOURA DAMOT, a small vil. of W. Africa, 1 bank Faldé lat. 14° 22' N lon. 12° 19' W, supplied by the traveller Rainant to be the site of the ancient fort of St. Pierre though the people of Hondon with more probability point out Kidira Tata as the site of this fort.

KATNSK, a town in Siberia, cap. circle of same name, gov. and 260 m. W. W. Tomsk, on the Ona lat. 53° 30' N lon. about 78° 30' E. It is walled, and has three churches, and in 1850 had 2407 inhabitants, maintained by agriculture, the fur trade, and furs, one of which is frequented by persons from all parts of Siberia. The climate consists, in its N. half of an extensive plain watered by several streams. The S. half, which is equally well watered, has a milder climate, is better cultivated and more extensively wooded. The chief occupations are hunting and fishing.

KAIPARA a harbour New Zealand, N. lat. W. coast, lat. 36° 29' S lon. 174° 8' E. a little W. from the settlement of Auckland it branches off N. and S., into two completely landlocked harbours, each running about 15 m. into the land. The N. arm is the recipient of several rivers including one of the same name, which enters its S. extremity.

KAIRA a town in Hindoostan, presd. Bombay prov. Gujerat, cap. dist. of same name, 63 m. S.W. Baroda, lat. 22° 47' N lon. 72° 46' E. near the confluence of the Warrock and Seyres, affluents of the Saharmittee. It is a large and tolerably neat town, surrounded by a lofty stone wall, with semicircular bastions. The streets, though narrow are clean, and the houses solid and lofty, with sloping tiled roofs, and a good deal of carving in the wood work of their gables and verandahs. Most of the walls in the town and neighbourhood are brickwork, and the situation though selected for the cantonments, which are about 1½ m. distant, is unhealthy. In the centre of the town is a Jain temple, exhibiting much gaudy ornament, and some beautiful wood carving. Among other buildings are a large European church, erected in 1824 and a library for the use of the soldiers.—The *Muzurur* consists chiefly of lands ceded, at different periods, by the Gulowar and Peshwa, and so straggling in form, and intermingled with other districts as not to be easily defined. The Karea, which forms the boundary between it and Ahmedabad, is a considerable portion of the surface. Much of the soil is good, and it was thought that the cultivation of Bourbon cotton might succeed. The attempt, however failed, in consequence of a succession of severe frosts, by which the plantations were completely destroyed. Area, 1898 sq. m. Pop. 536,513.—(Trigon. Survey of India.)

KAIKAWAN a large town, refinery of 80 m. S.S.E. from, lat. 35° 57' N. lon. 105° 15' E., in a barren sandy plain, and surrounded by a wall. It is badly supplied with water, the inhabitants depending on a capacious reservoir filled by the rains, and a pond, which becomes nearly dry in summer when it emits noxious exhalations. Notwithstanding its ill-chose situation it ranks second only to Tamsui in trade and population. Kaikawan was the first seat of Sarabent's empire in Barbary and still exhibits many fine relics of its ancient grandeur, in the fragments of beautiful architecture which abound in it, besides one of the most magnificent mosques in Barbary. Pop. estimated at 50,000.

KAIKIRIAH or **KAMAKIRIAH** (anc. *Cassarea*), a town in Asiatic Turkey, near Karamana, cap. dist. of same name, 142 m. S.E. Angora, on a fertile plain lat. 33° 40' N. lon. 35° 20' E. It is walled; the houses are of stone and well built, though many of them exhibit cracks and dilapidations, produced by an earthquake in 1835; the streets are narrow and so very dirty, that the whole town may be said to breathe pestilence. Among objects worthy of notice may be mentioned a bridge erected by Soliman the Great and several mosques. The Armenians have two churches, with a bishop; there is also a Greek church. The bazars are extensive and well supplied. The principal Armenian merchants exhibit their goods in a large place, called the *Yusuf Khan* these consist chiefly of iron wares (many of them of German manufacture) snuff boxes, glass beads, shells, from the Red Sea in strings, for ornamenting pack-saddles &c. scissors, paper and cards. The chief articles of native produce are yellow beehives and gail nuts, which are sent to Smyrna; also trapezium mulder and a blue dye made from the loss of wine. The number of houses is estimated at 10,000 of which 5,000 may be Turkish, 2,500 Armenian and 500 Greek. Pop. above 30,000—(Hamilton's *Asia Minor*)

KAIKIRIAH a town in Palestine. See **CESAREA**
KAIKIRIAH a town in France. See **KATKIRIAH**
KALBESLAGER a town in Bavaria, Palatinat cap. dist. of same name on the Lautern here crossed by a bridge, and on the Main. Ludwigshafen 43 m. S.S.W. Mainz. It is walled has several public offices, a St. Catharine and two Protestant parish churches a normal and other schools and the remains of an old castle, built by Frederick Barbarossa, and now converted into a central prison. Manufactures of woollen cloth, cotton goods, hosiery and leather a paper and other mills, and important iron works, supplied from iron mines in the neighbourhood. Three successive engagements were fought here, in 1793—between the French and Germans. Pop. to 5500 dist. 47 5/4.

KALBSWALD a town in Bohemia, circle of, and 35 m. N.N.E. Leitmeritz, near the frontiers of Saxony at the foot of the Borsberg with a school manufactures of linen and two mills. Pop. 1,070

KALBSWALD a town in Rhemish Prussia, gov. of, and 6 m. N.W. Dasseldorf a bank Rhine. It contains a Protestant and a large Catholic parish church, a Capuchin monastery and a large Protestant establishment, comprehending a female normal school, an orphan asylum, an hospital and a seminary of deaconesses, in which evangelical elements of charity are trained and has manufactures of silk velvet, tobacco, and carriages; were cotton and worsted mills some shipping a considerable shipping trade, a ferry across the Rhine, and three annual fairs. Pop. 1919

KALSTEN (OBER and UNTER), two contiguous villages, forming a pair Switzerland, cant. Argov, circle of, and about 2 m. from Leuzenbourg, in a small and somewhat rugged valley. They contain a parish church and have a trade in corn and wine, grown in the district. Pop. 1124

KALTA, a desert and vil., lat. Caylon, N. ind. Houses generally of a mud composition, with a small, near St. Catharine church, and a courthouse. Its harbour affords safe anchorage at all seasons, and is much frequented by country craft and small vessels. There are here the ruins of an old Portuguese fort. The greater portion of the inhabitants are employed in fishing. Karta was in former times subject to dreadful inundations, by which many of the inhabitants, and great numbers of cattle perished—(Ceylon Gazetteer)

KAJAL, a vil. Hungary Thither Unsoeld, co. Presburg, in a fertile district, about 14 m. from Nagy Komboth with a Protestant parish church. Pop. 1250

KAJANA, or **KATANA**, a town, principality Finland, gov. of, and 84 m. S.E. Uleaborg, cap. dist. of same name, on a stream which flows out of Lake Namsjärvi into Lake Uleå, and forms two remarkably fine cascades, one immediately above, and one below the town. It was a place of some importance, and was defended by a castle, which still exists, but in so dilapidated a state as to have been converted into magazines. It has a church, and several well-frequented fairs. Pop. 312.

KAJAH, two places, Hungary—1 A vil. Thutser Danube, gov. of, and 34 m. from Teth, in a wooded district at the foot of Mount Bokro, with a parish church, and some trade in wine. Pop. 1857—2, (Belatofe Kapor) A vil. Thutser Danube co. of and 12 m. from Vassapria, near Lake Balaton. It has a Protestant church, a fishery, and a trade in wine and cattle. Pop. 1530

KAJDATE, a vil. Hungary co. of, and 13 m. N.W. Tolna, on the Palatinat Canal, with two churches, and a trade in corn and tobacco. Pop. 1234.

KAKASD or **KOKAS**, vil. Hungary, co. Tolna, near Szekes, with a R. Catholic parish church, and a trade in corn and cattle. Pop. 999

KAKAYA a vil. Asiatic Turkey, near Anatolia 8. coast lat. 36° 9' 36" N. lon. 29° 53' E. about 5 m. long, but of unequal breadth—the S.W. half being very narrow and the other exceedingly irregular. It has a small harbour at its S.E. extremity called Jort Rhiphona.

KAKISIA a town in Asiatic Turkey. See **KAKISIA**
KAKOVA,—1 A vil. Hungary, Thutser Thrus, co. Krasova, 44 m. S.E. K. Temevar in a beautiful district on the Karas. It contains a parish church. Pop. 1632—2 (Aulova or Erichon) a vil. Transylvania, co. Nider-Weissenburg, on a mountain slope, 12 m. from Hermannstadt, with a Greek non united parish church. Pop. 1,043

KALABACH or **KALABACH**, a town, Punjab r. bank Indus, 68 m. S.W. Attock, lat. 32° 37' N. lon. 71° 37' E. It rises on the foot of a steep eminence, overlooking the road and the river. There are extensive alum-works in the vicinity, the effluvia from which, added to the extreme natural heat of the place in summer renders the air unwholesome. Great quantities of salt also are extracted here for the supply of W. India and Afghanistan. There is, likewise, coal in the vicinity but it is of poor quality and in unequalable seams. The Indus is navigable to this town at all seasons. Pop. about 3000

KALABISIEF (Kia) a vil. Nubia L. bank Nile, 80 m. N.N.E. Iker lat. 23° 30' N. lon. 32° 55' E. Here are the ruins of the largest temple in Nubia, consisting of a nave, portico, and area but having sculptures of very inferior style. The ancient town stood on the N. and N. of the temple and extended along the hill behind towards the Bay-el-Wallas, which is strewn with bricks and broken pottery

KALACSA two places Hungary—1 A vil. Thutser Thrus, co. Temevar 2 m. from Monostor with a church Pop. 1263—2 A vil., co. Bihar 12 m. from Balonta with a church and a trade in corn. Pop. 839

KALADY, or **KOLADY** a vil. Bohemia, circle of and 20 m. N. Budweis, on the Leschnitz with a chapel, synagogue, school manufactures of potash, and a saw mill. Pop. 707

KALAFAT a town in Little Walacha, cap. dist. and on a plain of same name L. bank Danube about 3 m. E. Wlad, on the opposite bank, and 370 m. N.W. Constantinople. It is surrounded with walls consists of about 2000 houses, and has three churches, a townhall custom-house quarantine, and cavalry barracks. It has recently become a strong military position, the Turks having (1853-4) thrown up formidable redoubts and other works partly on two high hills in the plain which surround the citadel of the Russians.

KALAH-JIN, a town, Asiatic Turkey, near Anatolia, 34 m. S.E. Angora, at the foot of a hill, crowned by a fine old, but rather dilapidated castle. It contains 500 Mahomedan and 60 Armenian houses, 14 mosques, a Khan a public bath, an Armenian church, and the ruins of a Moslem monastery

KALAICHI a town, Punjab, 10 m. S. Dera Ismael Khan, with a considerable commerce, lat. 31° 48' N. lon. 70° 50' E.

KALAMAKI BAY, Asiatic Turkey, near Anatolia, 8. coast lat. 38° 10' N. lon. 29° 38' E. At the extremity of the cape, which forms the W. side of the bay, are the ruins of the ancient Palaea.

KALAMATA, a St. George. See CALANCA.

KALAMAZOO, a river in Great Michigan, rising near the W. extremity of the state, and, after a winding course, generally W N W, of 90 m., falling into Lake Michigan, 41 m. N the St. Joseph. It has an average depth of 13 ft. for 3 m. from its mouth, and is, at all times, navigable for small craft 88 m. upwards.

KALAMO, an Isl. Greece. See CALAMO.

KALAMIA, or KALAMIA, a vil. In Ceylon, once the cap. of a principality, pleasantly situated on the banks of a river of some name, about 10 m. N E Colombo. It has a number of neat houses, a Protestant and a E. Catholic church, and some native places of worship, with a large figure of Buddha in a sitting posture, which attracts an immense concourse of pilgrims from every part of the island, during the celebration of the principal festival in July.

KALANNA, a to Nigritia, cap. kingdom of same name about 246 m. S. S. W Timbuctoo. It has a numerous and industrious population.

KALANATA, a state, Malay Peninsula. See KALANAY.
KALASANO, or KALASAN, a vil Hungary Thirder Danube, co. of, and about 13 m. S. E. Tula. It is a thriving place, with a Protestant parish church, two mills, and a trade in corn, wine, and tobacco. Pop. 627.

KALAT, a to Beloochistan. See KALAT.

KALAGOA, an Isl. Indian Archipelago Flores Sea Int. 7 12 S. lon 121 45° E, called Old Klau by the Dutch. It is pretty large, and is inhabited by a treacherous people.

KALAU, or GAWAY, a tr. Prussia, prov. Brandenburg gov. and 50 m. S. W. Frankfurt-on-the-Oder, cap. circle of same name, on the Oder. It has two churches and many factories of woollen and linen cloth, a trade in wool and cattle, and two mills. Pop. 2177. — The **KALAS** is flat and sandy. Area, 291 geo. sq. m. Pop. 400 606.

KAT AVRIIA, a tr. Greece, more, nome Achana and Elis, 37 m. S. E. Patras, on the edge of a plain on both sides of a torrent which descends from Mount Chelmos, whose W. summit, covered with snow is seen over the back of the town. In a cave in the vicinity are two ancient catacombs on the side of a hill. Though Kalavryta is supposed to be the site of the ancient Cyclopes, these are the only remains of antiquity which it possesses. Pop. about 2160.

KALHE, a to Prussia. See CALHE.

KALBOR, or KALORUCH, a vil Transylvania, co. and 3 m. from Fogaras, on a mountain, with two churches. Pop. 1069.

KALD (ALZO and FELSO), a vil Hungary Thirder Danube, co. Bacsaburg, about 10 m. from Szalaber with a church, a castle, and a trade in corn and wine. 1 op. 1040.

KALDENKIMCHEN, a tr. Rhenish Prussia gov. and 27 m. W N W Düsseldorf, on a height. It was once well fortified, but only small portions of its walls now remain; has a Protestant and a E. Catholic parish church, manufactures of linen and cotton goods, ribbons, soap, vinegar, curry, and tobacco, and a trade in these articles. Pop. 1707.

KALE SUNA, a vil and caravanserai, Hindoostan, Punjab, 32 m. S. E. Attock, on the Jales, a tributary of the Riarroo, lat. 33° 44' N, lon 72° 49' E. At a short distance to the N W of the village is a ban or great well, the water of which is reached by a descent of 100 steps. The surrounding country is remarkably rocky, rugged, and barren.

KALENBERG, or KALANBERG, a principality Hanover, prov. or landgraviat Hanover bounded N and E by the co. of Hoya, and the principalities of Lüneburg and Hildesheim, and S and W by Brunswick, Lippe, Lippe-Deimold, &c. In the N it is flat and marshy, in the S hilly and fertile. It contains ten towns, of which the chief is Hanover. Area, 800 geo. sq. m. Pop. 169,318.

KALGAN, a tr. China, prov. Chihli, 100 m. N W Peking, 1 bank of the most N of the head-streams of the Hsiao-Ho; lat. 40° 50' N, lon 115° 8' E. It is a depot of the overland trade between China and Russia.

KALGUSSEW, or KALDOOEV, an Isl. Russia, in the Arctic Ocean, N of Gov. Arhangelsk, between lat. 63° 41' and 69° 27' N, lon. 65° and 65° 10' E., length, N to S, about 60 m., and breadth 40 m. It is about 60 m. distant from the mainland, and is surrounded by shoals. The ground, which is at first gently undulating, rises towards the centre, which is covered by some hills of considerable height. The greater part of the surface being covered with mosses, swamps, and

shrubs of no value. Its few inhabitants live chiefly by fishing, and gathering eggs and feathers, for which they are visited by the merchants of Moscow and Archangel.

KALI, CAT, or CAT, a river, Hindoostan, prov. Malwa, joining the Chumbul, 52 m. N by W Ujain, after a N course of 140 m., none of which is navigable.

KALIMNO, or KALIMNO, an Isl. Great Archipelago off the coast of Asia Minor between Cos and Lero; highest summit, 2200 ft., lat. 36° 58' 45" N, lon 27° E. (s.) It is of triangular shape, 11 m. long, and about 5 m. broad, mountains, but the soil is fertile, and celebrated for its honey. On the S. side of the island is the port of Kalimno, on the W the village of Limas, below which there is a schoolhouse, and on the E are the ports Vaidi and Kalamoni, both having a good depth of water, but open to E winds.

KALINFULVA FELSO, or KALINTEST, a vil Hungary, Thirder Themas, co. Marmaros, on the Kaszo, 12 m. from Salguth with a Greek church. Pop. 1062.

KALISCH, or KALISA, a city, Russian Poland, on the Prussian frontier, cap. palatinat of same name, on an Isl. in the Prosna, 132 m. W S. W. Warsaw lat. 51° 45' N, lon. 19° 13' E., considered one of the finest cities of Poland, and one of the principal places in points of mercantile wealth and trade. It is surrounded by a wall, flanked with numerous towers, and entered by four gates, and has ten churches, three convents, one synagogue, a E. Catholic gymnasium, with a fine library and extensive scientific collections, a military school theatre, public garden, house of charity and three hospitals. The streets are spacious, and well paved and some of them adorned with trees. The houses are well built. The most remarkable edifices are, the palace of the voivodes, in which the courts of law are now held, the cathedral of St. Joseph, the church of St. Nicholas, and that of the Lutheran. It has linen, woollen and leather manufactures, and six fairs are held annually. Kalisch was founded about 855, and was long the residence of the dukes of Great Poland. At a little distance from the city the Swedes were defeated by the Poles, in 1706; in 1835 a grand military review was held here attended by the Emperors of Austria and Russia, and the King of Prussia. July 18 and 19, 1852 a considerable portion of the city was burned down. 1 up. 11,000, of whom 2500 are Jews.

KALIKAT, or KHALIKAT, a country, Chinese empire, the N part of Mongolia bounded N by Sibiria, and S by the desert of Gobi, and extending from the Alai and Tianshan mountains E. to the sources of the Amoor, about lat. 45° to 52° 30' N, lon 88° to 115° E. Much of the surface is mountainous, but much of it is also covered by vast plains or steppes. The numerous head-streams of the Selenge, and some of those of the Yenissei and Amoor rise in this territory, and in the W part are several lakes of considerable size, smaller ones being scattered over the central and E parts. Many of these lakes have no outlet, and are salt. The Kalikas or inhabitants of this territory do not cultivate the soil to any extent. They render an annual tribute to the Emperor of China of horses, camels, sheep, &c., or their skins, but receive presents in return, of many times the value of those they give. Their tents are made of a framework of ox covered with layers of felt, the hearths are in the centre, and few of them have more than two apartments. The lodges of the wealthy, however, have several, and are elegantly furnished; but destitute of cleanliness, comfort, or warmth. Most of their clothes, utensils, and arms, are procured from the Chinese. Many of them derive a livelihood from conducting caravans across the country, but chiefly depend on the produce of their herds and hunting. A considerable trade is carried on with Russia, through Maimachin and Khatka. The territory is divided into four khans, governed by native chiefs, each claiming descent from Genghis Khan, who was a native of the Kalikas country. These chiefs or khans are subordinate to two Manchou superintendents, resident in Korum or Ourga, the largest town in Mongolia. Much of the real power however, is in the hands of a kind of high-priest, called the *tsakula*, also resident in the capital. The religion is Buddhism.

KAI KOON, or TUNKER, a group of mts. Java Sea, N E Koolang lat. 6° 31' S., lon. 115° 39' E. (s.) They are low and small, with dangerous coral banks projecting from them far out to the S.

KALLAKAVDI, a tn. of W Aden, N from Daham, about 70 m. S. by W Aden, lat. 12° 3' N, lon. 1° 25' E. It is a place of considerable importance, and on market-days presents a scene of great bustle and activity. Sheep, goats, oxen, and small, but handsome horses, are here exposed for sale, amongst numerous other commodities. There is also a slave-market, where great numbers of slaves are bought and sold. Built upon a dome in a westerly manner, and hill-tops and are neatly fabricated. The weavers also display considerable taste in the manufacture of a cloth peculiar to the place. The country around is well cultivated, the inhabitants being excellent farmers.

KALLAVESI, a lake, Russia, Finland, circle Kuopio; greatest length, N.W. to S.E., about 24 m. mean breadth about 6 m. It is of very irregular shape, contains a great number of islands, and lies between the lakes of Ruokovani and Kokovani, communicating with the former on the N.W., and with the latter on the E.

KALLMÜNZ, a market tn. Bavaria, Upper Palatinate, at the confluence of the Naab with the Vils, which is here crossed by a bridge, 12 m. N.W. Raitelton. It has a parish church, cornhouse, and hospital, manufactures of musical strings, and two mills. Hops are much cultivated in the vicinity. Pop. 1128.

KALLO, a vil. Hungary, Hither Danube, to Neograd about 20 m. from Matvas with a R. Catholic parish church, and a trade in timber. Pop. 1843.

KALLO (NAGY), a market tn. Hungary, Thither Thesus, cap. co. Szabolcs 25 m. N.W. Debrecen. It has county buildings, two churches, manufactures of potash, and several annual fairs. Pop. 5349.

KALLRIÖD, a lake, Sweden in the N.W. of län Östergötland, about 15 m. long N.W. to S.E., by about 9 m. broad. It is connected with a chain of lakes which extend to the frontier of Norway, and is enclosed by lofty mountains, one of which on its S. side, is 4800 ft. high. It communicates, by the Höleån, with Lake Storaen in the S.E.

KALLUNDBORG or **KALUNDBORG**, a tn. Denmark, W side St. Seeland, but Hothob on the inner part of the deep fiord of same name, 57 m. W. Copenhagen. It is an ancient place, and was formerly one of the most important towns in the kingdom, but has suffered much from war, at different times, and more especially in 1658, when it was devastated by the Swedes. It contains an ancient church, with five towers and the remains of a strong castle, in which King Christian II. was confined and has an excellent winter haven. Of the 4th class, which admits vessels drawing 10 ft. to its quay and a trade in corn and wool. Steam-packets sail regularly between Kallundborg and Aarhus; there is also a ferry to Brøndbyvælle, in the island of Samsø. Pop. 2400.

KALMAN, or **KALMAK**, a seaport tn. Sweden, cap. län of same name, beautifully situated on the W. part of the sound of the same, between Sweden and Öland, 215 m. S.E. W. Hootkholm (lat. church) 59° 39' 30" N. lon. 16° 22' 2" E. (n). It consists partly of the town-proper situated on an island, and partly of a suburb on the mainland, and connected with it by a bridge and is generally built of wood, but with considerable regularity. It is the see of a bishop, residence of a governor, contains a handsome stone cathedral, finely situated in an open space near the centre of the town, surrounded by a colonnade, and remarkable for the loftiness of its ceiling, unsupported by pillars; a town-house, a gymnasium, with library, and cabinets of natural history and coins, a house of correction for the län, and an old castle, surrounded on three sides by the sea, and celebrated in the early history of Sweden, and has manufactures of woollen stuffs and tobacco, a sugar-refinery, and several tanneries, two dockyards and a good harbour, at which a considerable trade is carried on. The principal exports are wood and masts. Pop. 6984. The län is bounded N. and N.W. by Linköping, W. Västmanland and Västerg., S. Carlsten, and E. the Baltic Sea. It is a rather mountainous part of the N., but flattens towards the S. It is watered by the Älman, contains several small lakes, and has a bold rocky coast, lined by small islands. The soil in the higher districts, is covered with rocks and stones, but in other quarters is light and tolerably fertile, producing corn sufficient for the home consumption, and a good deal of flax. Numerous cattle are reared; the forests, chiefly of beech and pine, are extensive, and furnish

excellent fuel and timber; and the productive fisheries on the coast furnish employment and subsistence to a considerable number of the inhabitants. Area, about 8600 sq. m. Pop. (1840), 155,041.

KALMINA, or **KALMINA**, a tn. of W. Africa, Delahay, about 1 m. S.E. E. Albany; lat. 7° 30' N, lon. 32° 25' E. Pop. 15,000.

KALMIDIR, a river Russia, which rises in gov. Ekaterinburg S.W. to S.W., forming the boundary between that gov. and that of Don Cossacks, and after a course of nearly 90 m., falls into the Sea of Azov at Marapok.

KALMUCKS, a tribe. See **CALMUCKS**.

KALNA, a vil. Bohemia, circle of, and 20 m. N.E. Březov, on a small stream of the same name, an affluent of the Elbe, with a church, school, manufactures of cotton, a saw and other mills. Pop. 1489.

KALO GUZBA, a river at Caylon. It rises near Adam's Peak, and falls into the Gulf of Manar at Calcutta. It is only 60 m. in length, but is sufficiently large to be navigable for boats for three-fourths of its course.

KALOCSA two places, Hungary.—1, (Kaloosa, or Kalooswa), a vil. Thither Thesus, co. Matramony on the Tisza, 35 m. from Raigelt near the frontiers of Galicia. It consists of five distinct portions, and contains a Greek parish church. Pop. 2323.—2, (Kaloosa, or Kaloosa), a vil. Thither Danube, co. of and 67 m. S. Pesth, in a marshy and unhealthy district, near the bank Danube. It was once strongly fortified and was a place of great importance, till it was almost destroyed by the Turks. It is still the see of an archbishop, has a cathedral several other churches, a bishop's palace, ecclesiastical seminary, Thierck college, lyceum, gymnasium, and head national school, and several fairs. Pop. 6000.

KALOO PASS, a lofty pass in N.E. Afghanistan over the R. Hindoo Kosh, 50 m. W. by H. Cabool, lat. 34° 40' N. lon. 67° 46' E. with an elevation of about 13,000 ft.

KALOOVONGONG, a native state. Indian Archæology, S.E. coast of Bali. It is the oldest and purest native state in the island, having a rocky, unfertile soil.

KALOZ, a market tn. Hungary, Thither Danube, co. of and 16 m. S.E. Stuhlweissenburg, is a fertile but marshy district on the Palatinal Canal, with a castle, two churches, an infirmary and a trade in horses and cattle. Pop. 2760.

KALRE, or **KALRE**, a tn. Hindoostan, prov. Aggra, 7 m. S.W. from about 50 m. S.W. of Calcutta, lat. 28° 10' N. lon. 79° 41' E. The original town stood on the plain remote from the river, but repeated Mahabatta incursions induced the inhabitants to remove it to its present position among extensive ravines, where there is a small fort which commands the navigation of the Jumna. The town is large and populous, and carries on a considerable trade. It is an entrepôt for the cotton of the S.W. territories, and is noted for its paper and sugar-candy.

KALPUN, two of the Laccadive Is., Indian Ocean, off W. coast Hindoostan joined together by a reef above water (lat. 8° 10' N, lon. 75° 35' E. (n). They are narrow and low, with a steep coral reef on the W. side. The S. and largest island, on which there are a few small villages, is well planted with coco-nut trees.

KALSCHEING or **KALSTYH**, a market tn. Bohemia circle of, and 14 m. S.W. Budweis, in a valley on the Blatitz-bach. It contains a parish church, and a hospital; and has several mills, a weekly corn-market, and four annual fairs, chiefly for the sale of wooden articles and earthenware. P. 936.

KALSEE, a tn. of N. Hindoostan, prov. Gujerat, near the junction of the Tones with the Jumna, 180 m. N.N.E. Delhi lat. 30° 25' N. lon. 77° 50' E. It is one of the chief marts in this part of the country.

KALTBRUNNEN, a vil and par. Switzerland, can. of, and 28 m. S.W. St. Gall, on the road from Glarus to Zürich. It is well built, contains a handsome parish church, with a lofty bellry, forming a conspicuous object at a great distance and has an important annual fair chiefly for horses. Lignite is found in the vicinity. Pop. 1463.

KALTENBRUNN, a vil. Austria, Tyrol, dist. Leodach. It is chiefly situated in the valley of Kain, and contains a church, to which numerous pilgrimages are made.—2, A vil. Hungary, co. and 3 m. from Frensdorf, with a church and a trade in corn and wine. Pop. 621.—3, A vil. Hungary, co. Eisenburg. See **HIMMELBURG**.

KALTENSDORFHEIM, a tn. Germany, Saxa-Weymar-Kleinach, circle and 18 m. S.E.W. Kleinach, cap. hall. of same name, on the Fulda, near the Haveria frontiers. It has a court of justice, a castle, and two churches; manufactures of woollen and linen cloth, a tannery, blacksmith, and worsted and several other mills. Coal is worked to some extent in the vicinity. Pop. 1600. Area of hall. 40 sq. km. P. 7509.

KALTENWESTEN, a vil. Württemberg, circle Neckar, hall. Balingen, 18 m. N. Stuttgart. It has a parish church and in the vicinity are the ruins of the old feudal castle of Leibenstein. Pop. 1871.

KALTERHERBERG, a vil. Rhénish Prussia, gov. of, and 18 m. S.E.E. Aix-la-Chapelle, with a church, manufactures of woollen and linen cloth, and a worsted mill. P. 1772.

KALTERN, a tn. and com. Austria. See CALZANO.

KALUGA, a central gov. Russia; bounded, W and N.W. by Smolensk, N.W. Moscow, E. Tula, and S. Orël; lat. 53° 24' to 56° 30' N., lon. 33° 40' to 37° E. The country presents the appearance of an almost uninterrupted flat. It is well watered, having no fewer than 18 streams, some of them of considerable size, particularly the Oka, which is navigable by barges throughout the year, and the Upa, navigable only when the water is high. There are also several small lakes, and occasional morasses. The climate is one of the most temperate in Russia. Winter sets in about the end of November and disappears by March. There are quarries of malms, and the mineral productions are bog iron-ore, chalk, and gypsum. About one-half of the surface is covered by forests, and the greater part of the remainder is fit for cultivation. The soil is of a clayey and sandy nature and with difficulty yields a return of five-fold. The favourite crop is barley, but other cereals—wheat, rye, and millet, and also buckwheat and beans—are likewise grown, though to a less extent, but the quantity produced does not meet the consumption. Hemp and flax are grown to a large extent and though much of it is worked up in the district, a considerable surplus remains for export, along with all oil and oil-cake. Not many cattle, but a considerable number of horses are bred. Neither game nor fish abound. Though the district is not rich in iron, the ample supply of fuel has made it the seat of an important iron trade. A large quantity of iron, both pig and malleable, is produced. Manufactures are also successfully carried on; and woollens, linen, calicoes, cottons, silk velvets, ribbons, leather, paper and glass are largely exported. There are also numerous distilleries for brandy. The industries are active, very temperate, and, in general, in comfortable circumstances. Area, about 10,000 sq. m. Pop. (1850), 1,036,500.

KALUGA, a tn. Russia, cap. of above gov., stands on an elevation, 7 bank Oka, 98 m. S.W. Moscow; lat. 54° 30' N., lon. 36° 10' E. It is nearly 7 m. in circumference, though the number of houses does not exceed 4000, and it is surrounded by a rampart, which has been turned into a walk. The town is of an inferior description; the streets being narrow and crooked and the houses for the most part of wood though several of the public buildings, which are built of stone, are handsome. It has 23 churches, a college for priests, a nursery, a foundling hospital, and a theatre. No mineral manufactures, but particularly of salicloth to supply the navy, make Kaluga a stirring place, and entitle it to be regarded as one of the most important manufacturing towns in the Russian dominions. Pop. (1850) 39,860.

KALUMULLA, a small tn. Ceylon, on the road from Colombo to Galle, about 4 m. S. Galle, with a Wesleyan mission school, and several R. Catholic chapels. The distill. of arrack is carried on here to a considerable extent. Pop. about 1000.—(Ceylon Gazetteer.)

KALUSA, a tn. Austria, Galicia, circle of, and 38 m. S.E. Strzy, among the Carpathian mountains, on the torrent Lomnica, by which much wood is here floated down. It contains a R. Catholic parish church, in which both the Greek and the Latin rituals are used and has salt-works. P. 3000.

KALWARIA, a market tn. Austria, Galicia, 19 m. S.W. Cracow, in a mountainous district. It is poorly built; and has a parish church, a castle, and a Bernardine monastery with a chapel in the vicinity, to which numerous pilgrimages are made. There is a large number of fields and is taken, and a good trade in them is carried on.

KALWARY, or **KALWARIA**, a tn. Russian Poland, prov. Augustow, cap. dist. of same name, 176 m. N.E. Warsaw;

lat. 54° 30' N.; lon. 23° 14' E. It is well built, but the streets are not paved; it has three R. Catholic churches, a synagogue, and two well-frequented fairs. Environs fertile, but marshy. Pop. (1841) 7628.

KAMA—1, A river, Russia, the largest tributary of the Volga. It rises in a branch of the Ural mountains, on the E. border of gov. Viatka, lat. 56° N.; lon. 58° 40' E. First taking a N., and then a N.E. course, it enters the gov. Perm, turns E. and pursuing a winding course, mainly S., reaches the town of Perm. Next, taking a S.W. course, it again enters and forms the S.E. boundary of the gov. of Viatka. Finally, entering the gov. of Kazan it proceeds S.W. and, after a course of nearly 1000 m., and about 40 m. from the town of Kazan it meets the l. bank of the Volga, and, by the accession of its waters, almost doubles that mighty river. It is navigable almost throughout its course. About 168 m. N. by W. Perm, it receives the Inja Kaitana on the l. bank; this stream is connected by canal with the River Kaitana, an affluent of the Dvina, thus uninterrupted water-carriage is established between the Caspian and the Arctic Seas—2 (or Kooner), a river Central Asia, rising in Gilgit, in the Hindoo-Koonh. It flows S.W., across Kalatistan, enters Cabool and joins the Kabool river on its l. bank lat. 34° 34' N. lon. 70° 55' E. Total course, 220 m., but still not a large river.

KAMAKURA, a small tn. Japan, on the S.E. coast, lat. 35° 40' N. It is a place of banishment for the grandees who have fallen into disgrace.

KAMAL, a tn. Indian Archipelago, S.W. coast, lat. Madura, with a good haven. It is the landing-place coming from Soerabaya, and a canal leads from it several miles inland.

KAMALLA, a small ancient-looking tn. Punjab, 8 m. from r. bank Raves, lat. 30° 44' N.; lon. 73° 38' E. built of burnt bricks, with a fortress and bazars of the same materials.

KAMAR (Eg), Mountains of the Moon. See ARICA.

KAMARAN or **KAMARAN**, an isl. Red Sea, W. coast Yemen, near Cape Insad, lat. 15° 17' N., lon. 49° 32' E. (w) The island, which is about 15 m. in length, N.E. to S.W., and 5 m. broad is composed of hard rock, intermixed with sand, in some parts very capable of cultivation, and has some spots on which date-trees flourish. It is generally low, swampy in the N. but towards the S. are a few small hills. Including Camaran there are seven small villages on this island, consisting mostly of a few miserable huts belonging to fishermen employed on the pearl banks, turtle islands, &c. in its neighbourhood. There is good anchorage in the small bay of Camaran near the S.E. part of the island.

KAMATA, a considerable tn. W. Africa, dist. Koronko, N.E. Sierra Leone on the route between Rokelle and Palaba. lat. 9° 15' N. lon. 11° 6' W. It is built on the pinnacle of a hill, and quite inaccessible, excepting by its two entrances which are thickly stocked on their sides with strong palisades, and guarded by double and massive gates of hardwood.

KAMBARA, one of the Visayan islands, S. Pacific. lat. (S. point) 18° 55' S. lon. 178° 55' W. (w.) It is of a rectangular form, about 3½ m. long and 2 m. wide, fertile and well wooded, the timber is esteemed above that of all the other islands of the group for canoe-building. On the N.W. side of the island, a remarkable bell-shaped peak, covered with rich verdure, rises to the height of 850 ft.

KAMBING, or **KAMBORA**, lat. Flores. See CAMBING.

KAMBURG or **KAMBURG** a tn. Germany, Saxa-Meiningen, cap. circle of its own name, 34 m. S.E. Leipzig, r. bank Saale, here crossed by a bridge. It has a church, town-hall, mill, two tile-works, and some trade in wood. Near it are a gypsum and a salt quarry. Pop. 1627.—The circle was once a county. Area, 40 sq. m. Pop. 8211.

KAMBURI, a tn. Siam See CAMBOUR.

KAMEL, a vil. W. Africa, Fouta-Djalla, l. bank Senegal lat. 15° 32' N.; lon. 13° 50' W. Its market for millet is much frequented.

KAMENETZ, gov. Russia See PODOLSK.

KAMENETZ, or **KAMENETZ**, a tn. Russian Poland, cap. prov. Podolsk, on the Smvritza, about 12 m. from its junction with the Dniester, lat. 48° 40' N. lon. 30° 30' E. It is defended by a fortress built upon a rock, which, however is commanded by a neighbouring height. The town is well built, without being regular. The most remarkable public buildings are the R. Catholic cathedral, the church of the Dominicans, three other R. Catholic, one Armenian, and four

Black, shagreened; with several convents, the Government strongly, and now gradually. It was for a long time considered the principal bulwark of Poland on the side of Hungary. Pop. 12,000.

KAMENITZ, or **KAMENICE**, three towns, Austria.—1, in the Bohemia, circle of, and 16 m. S.E. Tabor. It is a plain, but poorly-built place; contains a deanery church, a court-house, a school, a market, and a large old castle, and has two mills and six annual fairs. In the garden of the castle is a gigantic lime-tree, 400 years old, from which the town sometimes receives the surname of *Kamenitz-under-Leids*. Pop. 2361.—2, a market town, Moravia, circle of, and 11 m. E. Igla, with a parish church, a church, a school, a saw and numerous other mills. Pop. 1669.—3, a market town, Bohemia, co. Symon, 7 m. N. Danube, in a beautiful plain, 7 m. S.W. Peterwarden, with two churches. Pop. 1944.

KAMENSKOE, a vil. Asiatic Russia, gov. Okhotsk, near Penzhin, at the mouth of the Penzina.

KAMENSKOI, a market town, Russia, gov. Perm S.W. from Kamyshlovsk, at the junction of the Kamenska and Isot with an iron forge and cannon foundry. Pop. 8000.

KAM-NZ, a vil. in Bazony, Gov. Kamenetz.

KAMIN, a vil. Prussia, prov. Posen, gov. Oppeln circle, Barchen, with a parish church, blacksmith, and mills. P. 538.

KAMIONKA, a town, Austria, Galizia, circle of, and 13 m. N.W. Zloczow. 1. bank. Bar with a Greek and a R. Catholic church. It stands in a district covered with magnificent timber. Pop. 2345.

KAMIK, or **KAMIKER**, a maritime town, Persia, on the Persian Gulf, near Larshan, opposite to Kishm lat. 27° 0' N. lon. 55° 40' E. There are sulphur mines in the vicinity, the produce of which is shipped here for Muscat.

KAMISHIN, a town, Russia, gov. of and 99 m. S.W. Saratov, lat. 50° 5' N. lon. 45° 30' E. 7 bank Volga, at the confluence of the Kamyshchanka, which runs through the town. It is walled, and has two churches. On the opposite side of the Volga are large meadows for salt, which is obtained in vast quantities from Lake Elton. Pop. 8100.—The circle forms an extensive steppe contains a number of salt lakes and several fertile tracts but not much wood.

KAMIRLOV, a vil. Siberia. See KAMTSCHLOWA.

KAMITZ, a vil. Prussia, prov. Posen, gov. Oppeln circle, Nasse, with a parish church, a saw and two other mills. P. 1548.

KAMM, a vil. of N. Africa, W. Africa, 1. bank Senegal, lat. 16° 28' N. lon. 16° 19' W. The women fabricate mats, which are highly valued by the negroes and which they sell to the French; they also devote themselves to the drying of fish. The plains in the vicinity unutilized during winter produce in abundance cottonseed rice.

KAMMENOI-Ostrov two small islands, Russia. The one is in gov. Petersburg, at the mouth of the Nava, and immediately N.W. of the capital, with which it communicates by a bridge. It contains a palace, in which different occupations have occasionally resided, and a small Gothic church. The other island is in the N. of the Caspian Sea, near Gruz.

KAMMERWALD, a vil. Prussia, prov. Posen, gov. Oppeln circle, Schönbach, with a Protestant and a R. Catholic church, a castle, and several mills. Pop. 1245.

KAMNITZ, a town in Bohemia, circle and 25 m. N.N.E. Leitzmeritz, on a small stream of same name, in a mountainous district. It contains a church, a chapel, in which numerous pilgrimages are made, an old castle, in ruins, and an hospital and has a brewery, distillery and two mills. Pop. 2221.

KAMOCZA, or **KAMOTZA**, a vil. Hungary, Thidher Danube, co. of, and 12 m. N.W. Komorn on the Waag. It contains a Protestant parish church and has a considerable trade in corn, fruit, and tobacco. Pop. 1360.

KAMOTTA, one of the Nicobar isles. See CANOTTA.

KAMOUKAKA—1 A co. Lower Canada, 7 bank St. Lawrence lat. (nearby) 47° 3' N. lon. 69° 13' W. 168 m. long by 40 m. broad area, 4290 sq. m. The surface of this county is uneven and mountainous, particularly in the S.E. section. The soil is diversified, but in many places excellent. It is well watered by lakes and rivers.—2. A river which flows N.W. through the same county, and falls into the St. Lawrence about lat. 47° 33' N. lon. 69° 43' W.—3. A group of small rocky islets in the St. Lawrence, opposite the mouth of the Kamouraska river. They are almost bare rocks, but are of great utility in sheltering small vessels, and form the

stem of some extensive fisheries of herring, shad, salmon, spruce, haddock and mackerel.—4. A vil. pleasantly situated near the mouth of the Kamouraska. The houses are mostly of wood, but a few are well built of stone. During summer, it is much frequented by visitors for the benefit of sea-bathing, being regarded one of the healthiest spots in the province.

KAMP (Greece), a river, Lower Austria, which rises on the S. frontier of Bohemia, flows first E., past Zvettl, then S.E., and joins 1 bank Danube, about 9 m. below Krems, after a course of about 60 m. Its chief affluents are, on the right, the Klein Kamp, and, on the left, the Zvettel.

KAMPEN, a town and port, Holland, prov. Overijssel 45 m. E. N. E. Amsterdam, 1. bank and near the mouth of the IJssel, here crossed by a draw-bridge. It is walled but not fortified, has several gates, towers, and remains of its former defenses and is intersected by sundry canals. The centre of the town is densely, and the outskirts sparsely built and, stretching as it does along the river it is in shape long and narrow. Its principal buildings are an elegant townhouse, built in an antique style, and a convent house. It has, likewise, two Calvinistic churches, both of which are fine, a Baptist and a R. Catholic church, several hospitals, and other benevolent institutions and numerous schools. Anciently it was one of the most flourishing of the Hanse towns, but its commerce is now limited to a few vessels trading to Hull. Its main features have also suffered but still it carries on to some extent damask calico, plush, and blanket-weaving, and ropemaking and has a tile and three brick fields, a pottery, a sugar factory a distillery and two breweries. Pop. (1850) 10,879.—(Van der A.)

KAMPILHEE, a military station, Hindoostan, Madras, near Pondicherry about 10 m. N. E. Nagpore.

KAMTSCHATKA a long and rather narrow peninsula in the N.E. of Asia, forming a part of Siberia or Asiatic Russia, lat. 51° to 61° N. lon. 155° 30' to 174° E., bounded N. by the country of the Tchukotka, W. by the Gov. and Sea of Okhotsk S. and S.E. by the N. Pacific, E. by the Sea of Kamtschatka length 870 m. breadth very irregular owing to numerous deep indentations, which exist on the E. and contrast with the regular uniformity of the W. side. At the middle, where it is widest, the breadth is 280 m. towards the N. it varies from 80 to 150 m. while in the S. it narrows rapidly on both sides, till it terminates in the narrow fingers of land which form Cape Lopatka. The country, as seen from the sea, is rugged and desolate. Through its whole length, from N. to S., it is traversed by a chain of lofty mountains, crowned with numerous volcanoes, many of them extinct, but many also highly active. The names, positions, and heights of the most remarkable are as follows:—Awatshinskaya, lat. 53° 1' N. 8780 ft. Japanova, lat. 53° 35' N., 9060 ft. Korjakaya, lat. 53° 19' N. 11,315 ft., Kromokaya, lat. 54° 6' N., 10,120 ft. Schelutinsk, lat. 56° 40' N., 10,600 ft., and Khatambuk, lat. 56° 8' N., 15,512 ft. The last is particularly described by Erman, who, in 1839, ascended within 8000 ft. of the summit and saw it in sublime activity pouring forth a continuous stream of lava, which, at first opposed in its progress by masses of snow and ice, soon burst the barrier, and precipitated itself into the sea, with a noise which was heard for a distance of more than 50 m. This mountain rises from a large base, which swells in an elliptical curve, furrowed by deep ravines, and crowned by four cones. There is nothing in its structure resembling a granitic mountain, or any other primitive rock. It is an igneous, somewhat and strongly bilaterated mass, with large crystals of Labrador feldspar. The volcanoes of Kamtschatka are evidently part of a continuous line of volcanic action, which commences in the N. of the Alaskan Isles, in Russian America, and extends, first in a W. direction, for nearly 200 geo. m., and then S., without interruption, through a space of between 60° and 70° of latitude, to the Moluccas where it sends off a branch to the S. E. while the principal train continues W., through Borneo and Java, to Sumatra, and then, in a N.W. direction, to the Bay of Bengal.—(Lyle.) No part of Kamtschatka appears to be of primary formation. Supposing it divided into two sections, by a line drawn near its centre from N. to S., the E. section is wholly of igneous origin. The W. section may be divided into two bands, one of which comparatively narrow running N. and S., consists of the tertiary formation while the remainder, forming the W. side of the peninsula, is

wholly secondary. The only river of any extent is the Kamtschatka, which rises at the foot of a mountain-knot in lat. 54° N., and at a level far lower than might have been anticipated in a country abounding in lofty mountain-ranges, the height of the source, above the level of the sea, being not more than 1300 ft. It has a course of about 300 m., and is navigable for about 150 m. Its basin, forming the valley of Kamtschatka, becomes hummed in by precipitous rocks toward the mouth of the river, but, farther S., it swells out sometimes to 40 m. and is by far the most fertile part of the peninsula.

The climate is very severe, and much more so on the E. coast than on the W. At Petropaulshafen on the E. coast, the mean annual temperature is only 28° 30', whereas that of Tigil, on the W., is 43° Fah. On an average of four years, the temperature of the former was, for spring, 81° 80', summer, 85° 80', harvest, 37° 30' and winter, 19°. In winter severe frost the temperature falls far below the winter average, and has sometimes been — 15°. On the sea-coast, vegetation does not begin before the end of April but in the vale of Kamtschatka, in good shelter it is a month earlier. Notwithstanding the severity of the climate, forests of considerable extent occur, consisting of several species of birches, pines, poplars, and willows, while there is an undergrowth of shrubs, on which numerous berries grow; among others the raspberry and currant. On many of the tundras or moor levels, particularly when the ground is dry or strong, grows a *Limonium*, called by the inhabitants *Jinokot*, bearing a close resemblance to the *Limonium* *Coeruleum* of our gardens with berries of a particularly pleasing taste, and said to be very nourishing. The natural pastures are also numerous, and their rank luxuriance sometimes so great, as to make journeying across them almost impossible. Agriculture is necessarily restricted to a few favoured spots, as both climate and animals fit for proper tillage are wanting. It is, however, said, that on the S. slopes, near the village of Kiliaba, are seen patches of rye and potatoes and also stems of hemp of the tallest growth. He adds, that both summer and winter-wheat, barley and oats, thrive so well that were the surrounding plains carefully cultivated, they could furnish enough to supply the greater part of the inhabitants of the peninsula with bread-corn. In the same neighbourhood also he got ruber and finer flavoured cow-milk than he had ever tasted.

The wild animals were at one time very plentiful but have been much thinned by the hunters. Among them may be mentioned reindeer, wild sheep, bears, otters, beavers. The skins annually obtained consisting chiefly of those of the fox and sable, have been estimated at 30,000. Wild fowl abound. Ducks, of which at least twelve kinds are enumerated, are seen in all quarters, and lakes which, from being fed chiefly from hot springs, never freeze are the winter resort of flocks of swans. The rivers and coasts teem with fish. In the former are several varieties of salmon, some of them peculiar to the peninsula, and on the latter are shoals of herrings and cod. Large numbers of seals are caught, and whales occasionally make their appearance.

Great attention is paid to the rearing of the sledge-dog a pack of which, consisting of six to twenty, every Kamtschadale justly regards as one of the necessities of life. These dogs are strongly built, rather long with a high step and short smooth hair, of a colour varying between yellowish fawn and jet black. They are very sagacious, and seem to enter into the very feelings of their masters. In summer they are set loose, and become their own purveyors, but with the return of frost their working season commences when, harnessed two and two, in trains perhaps of forty dogs, to sledges called *arvats*, consisting in their most primitive form, of a box of boards about 3 ft. long, and 1½ ft. in width and height, fastened to wooden runners, they often travel, at a rapid pace, 40 m. a day.

Though the extent of Kamtschatka is nearly equal to that of Great Britain, the inhabitants are estimated at not more than 5000. Of these, about a third are Russians. The remainder, forming the native population, consists of Korjaks and Kamtschadals. The former belong to the nomadic tribes of the N., and appear to have chosen Kamtschatka as a asylum after their defeat by the Tchukchi. The W. coast, from Tigil northwards and indeed the whole peninsula beyond

lat. 55° N., is occupied by them. They are of middle stature, dark and slaty, with black, smooth, and rather long hair. Their language differs so much from that of the Kamtschadals as to indicate a different stock. Their great occupa-

INHABITANTS OF KAMTSCHATKA — From *Litke's Voyage autour du Monde*.

tion is hunting the reindeer. The Kamtschadals present considerable diversity both of speech and exterior, and the Sedankens on the W. regard themselves as a different race from the inhabitants of the valley of Kamtschatka. One of the best features in the national character is the love of hospitality. The stranger is always sure of a welcome reception.

NATIVE HOUSE, KAMTSCHATKA — From *Litke's Voyage autour du Monde*.

The inhabitants are nominal converts to Christianity but in some parts, particularly in the N. E., the old superstitions are said to linger. There evil spirits, and what are called *Kutchas*, are the objects of worship. The trade is very limited, the only export being furs, and the imports chiefly sugar and spirits to the latter of which the natives have become greatly addicted. — (*Green's Notes on the Kola* in 1828-30, vol. iii.)

KAMTSCHLOWA, or KAMENLOV is in the Buzan, gov. and 250 m. E. S. E. Perm, say circle of same name, on the Pyschma. It is wholly built of wood and contains a church. Pop. agricultural 1925. — The climate, generally flat, is extensively covered with wood has good arable and pasture land, and in the higher districts, is rich in copper and iron. Area, 4804 sq. m. in Pop. 140,800.

KAN-CHOW, a seaport in China, prov. Shantung, E. coast, near Shao so or Te-shan-so, with a market for Indian and European merchandise.

KAN KIANG, a large river, China, prov. Kiangse, which it traverses S. to N., dividing it into two nearly equal parts, and ultimately falling into the Poyang lake by numerous mouths. The banks near the lake are flat, and not highly

activated, but the scenery becomes more varied and agreeable the further the river is ascended. Some rapids occur about lat. 35° 30', but they are not so formidable as to obstruct navigation seriously except at low water. The shores here are exceedingly beautiful, being lined with bold rocks fringed with wood, while the stream itself is perfectly transparent. The silty banks are in many places covered with the *Camellia* shrub, whose white blossoms give them the appearance of snow when the plant is in flower.

This river forms one of the great internal lines of communication in China.

KAN TOW a city China, prov Kiang-soo, near the junction of two considerable rivers, one of which has banks so high that stone terraces are needed for the support of the wall built on the summit; lat. 25° 55' N lon. 114° 00' E. Trees producing varieties of the finest quality grow in great numbers in the vicinity.

KANADEN, a in Russia, gov. of, and 62 m. S.S.W. Sambruk, l. bank Syr-Darya. It contains two churches. P (1851) 2582

KANAGA, or **KONNAGA** one of the Aleutian isls. lat. 52° 4' N, lon. 176° 50' W (a.) It is from 21 to 24 m. long, by half that breadth. The N part of the island exhibits a high smoking volcano, one of the highest in the chain; the rest of the island is not very high.

KANARA, prov Hindoostan See CAHARA

KANARAK, or **KANRANCE**, an emporium vi Hindoostan presid. Bengal prov Orissa, 50 m. S.S.E. Cuttack, situated amidst sand-hills close by the shore. Here are the remains of an ancient temple the sun called by Europeans the Black Pagoda, one of the most remarkable edifices in India. It is constructed of prodigious blocks of stone, and massive beams of iron the walls are 60 ft. high, and in some parts 20 ft. thick. Several of the iron beams are nearly a foot square, and from 12 to 18 ft. long.

KANARY ISLES, a cluster of small isls. S. Partic Ocean, Pith Passage, and at the S. entrance to the Gihilo Passage, off the N. end of the island of Miquel. The larger or Grand Kanary is in lat. 14° 8' N, lon. 129° 54' E. (a.) They are flat, and covered with trees, but uninhabited. On its S. side fresh water may be obtained also anchorage to six or seven fathoms.

KANATHIA, one of the most E. of the Fœles isls., S. Pacific Ocean, lat. 17° 16' S. lon. 179° 9' W from S to 4 m. in length N to S., by 24 m. E. to W. It rises into numerous verdant and fertile hills has a central peak, sharp and lofty formed of basaltic columns, is surrounded by a reef with low summits, and has on the N. a break. P 800

KANAWHA (GREAT) a navigable river, U. States. It rises in the Alleghenies, in N. Carolina, on the borders of Virginia, flows first N.E. into Virginia, then turns abruptly in a N.W. direction, which course it continues till it falls into the Ohio, at Point Pleasant, 202 m. below Pittsburgh. Total course, 800 m. About 100 m. from its mouth are the great falls, 50 ft. perpendicular. It is navigable to Kanawha, 60 m. from its mouth, where are salt-works, producing 1,500,000 bushels annually; the salt is obtained from brine springs. The chief tributaries of the Kanawha are the Green River, the Elk, and the Coal.

KANDABOU, or **KANTAVU**, the most S.W. of the Fœles Islands lat. 19° 5' S., lon. 177° 57' W (a.) It is 25 m. long, and throughout its whole length is high and mountainous, except a small part at its centre, where it is nearly divided into two—the isthmus being so low and narrow that the natives frequently transport their canoes over it. On the W. end of the island is the peak of Kanabou, a mountain in the form of a cone, very much truncated at the summit, and the sides descending with a direct and rapid inclination to the sea; height estimated at 2000 ft. The island is well covered with pine timber resembling the New Zealand Kanri pine; and west of the large canoes used in the Fœles are built here. Many white ships stop here for supplies. There are 48 houses or villages on the island. Pop about 10,000.

KANDAHAR, in CANDAHAR, one of the chief cities of Afghanistan, the capital and stronghold of the Doormans, on a fertile and well-cultivated plain, 2484 ft. above the sea, near l. bank Urganah, 300 m. S.W. Cabool lat. 31° 37' N lon. 65° 28' E. It is in the form of an irregular quadrangle, enclosed by a mud wall, 37 ft. high with a large tower at each of the four corners, 54 second-cylindrical bastions, and a broad and deep ditch in front, capable of being filled with

KANDAHAR.—From the Palace of Jahangir

water from the river. There are six gates, each protected by double bastions. The circumference of the city is nearly 4 m. It is regularly built, the two principal streets crossing each other at right angles, with a circular space, formed of shops, and about 45 yards in diameter at the point of intersection. Within this space, which is covered with a dome, proclamations are read, and the bodies of criminals exposed. The houses, seldom more than two stories high, are built of mud, and have a white appearance. Those of the wealthier classes are enclosed with high walls, and have several courtyards, with gardens and fountains. The public buildings, mosques, and caravanserais, are underscoring of masonry, with exception of the tomb of Ahmad Shah, which, however, though superior to the other structures of a similar kind is so very remarkable, being built of coarse stone, intermixed with sun-dried bricks, and having a coating of stucco outside, gaudily painted. The town is well supplied with water which is conveyed in conduits, both above and below ground, to almost every street and the site of the town is so moist, that water may in any part of it be obtained by digging down 5 or 4 ft. The women, as in Cabool wear the burqa when they go abroad. Fuel is scarce and dear which is severely felt by the inhabitants, as the winters are rigorous, although the summer is extremely hot; the thermometer sometimes reaching 110° in the shade. Provisions are abundant, cheap, and of excellent quality, with a profusion of fruit, which is sold at extremely low prices several pounds of grapes being obtainable for a sum not exceeding a halfpenny. The population being composed of a number of different races, an extraordinary diversity of costume is exhibited in the bazars and crowded parts of the town. The principal business is the transit trade. The commercial transactions are generally managed by Hindus, but these are probably neither very numerous nor extensive, as the town appears to be sinking into poverty and decay, many of the houses and gardens within the walls are in a ruinous condition, although the streets still continue to be thronged with a noisy, bustling population. The country, for several distances around the city, is fertile, and produces grain and fruit in abundance. The present town was built by Ahmad Shah, but a large town has always existed in the vicinity from the most remote antiquity. The population consists chiefly of Afghans, with a mixture of Persians, Uzbeks, Baluchians, Jews, Hindus, and other races. The number of inhabitants has been stated at various amounts from 25,000 to 100,000, but is believed to be actually about 50,000.

KANDAKASKA, a bay of N Russia, formed by the W part of the White Sea, and penetrating deeply into Russian Lapland; greatest length, S.E. to N.W., 180 m.; average breadth, nearly 40 m. It receives the waters of numerous rivers and lakes; and many small islands line its shores.

KANDEL, CAHME, or KANSEN-KAWOI, a market in the Bantam-Bawian, circle of, and 10 m S.E. London, on the Dürbach, with a local court. Pop. agricultural, 8600.

KANDERN, a ta. Baden, circle Upper Rhine, on a hill 54 m S.W. Freiburg, with a church, a savings bank, iron-works, tile-works, manufactures of woollens and silks, paper, oil, saw, and other mills, a bell foundry, and several iron smelting furnaces. Pop. 1880.

KANDILI, a vil. Asiatic-Turkey on the Bosphorus, about 5 m. N by S Bontari. Its situation is singularly beautiful, the houses on the heights commanding the most exquisite views on the Bosphorus embracing at the same time both the upper and lower mouths of the channel, the Black Sea, and the Sea of Marmara.

KANDLER, a vil. Saxony, circle Zwickau, half of and near Chemnitz, with two bleachfields, a cotton and three other mills. Pop. 933.

KANDY, or KANDY [Cingalese, *Maha Nuwara*, 'great city'], a city, Ceylon, near the centre of the island, 72 m N.E. Colombo; lat. 7° 21' N lon. 80° 48' E on the margin of a fine artificial lake, in a spacious and fertile valley 1467 ft above sea-level, surrounded by beautifully-wooded hills and mountains. This ancient capital of the Kandian kings has been greatly improved since it came into the possession of the English in 1815; many new and commodious houses have been erected, new streets have been formed, and the old ones widened. It now consists of three principal streets two stretching E and W, and the third N and S the chief bazars being situated at the point of intersection. There are also a number of handsome houses and villas dispersed over the face of the lower hills, about 300 ft. high, immediately overlooking the town. At the N.E. extremity of the town stands the pavilion, the residence of the governor the finest structure in Ceylon. Near this edifice is the residence of the major-general, a large and commodious building. The king's

or two mosques, two public libraries, and an agricultural society. Provisions are abundant, but dear, much more so than at Colombo; and betes-vents are high. In the bazars and shops there are exposed for sale tea, woollen shawls, rice, salt-fish, curry stuffs, crockery, and cloth, for which a considerable demand exists, Kandy furnishing all the supplies for the labourers on the surrounding estates. In the immediate vicinity of the town is the royal cemetery, enclosed by a wall, and having a small temple. Here were deposited, through many generations, a long line of native kings and heroes but the ancient tombstones, and other monumental erections which marked their places of sepulture, have been nearly all destroyed or removed. The lake of Kandy, a beautiful sheet of water, adding much to the appearance of the town, is about 1½ m. in length, and from 100 to 600 yards in breadth, it was formed by the late king out of a number of paddy fields, and is 1680 ft. above the sea. Notwithstanding the beauty of its situation and appearance, Kandy is not without its drawbacks. Situated in a basin, and on soil exceedingly pervious to wet, the streets are extremely unpleasant in rainy weather and at no time can it be considered particularly clean or healthy. The climate is generally much cooler than that of Colombo, but much more variable and trying to some constitutions, the range of the thermometer being from 54 to 87°, the mean about 74°. Deposits of magnesian limestones exist in the vicinity of Kandy, from which good lime for building purposes is obtained. Bricks and tiles are baked to some extent by the natives, and there is a very extensive brick kiln kept constantly at work by Government, elephants being employed to tread the clay. Pop., exclusive of the military estimated at about 7000.—(Fridman's Ceylon, *Oriental Interpreter* &c.)

KANDYAN, or KANDYAN PROVINCE, a general appellation for such districts in the interior of Ceylon as were formerly under the dominion of the kings of Kandy, but which now form a part of the British empire. They were estimated to comprise 14,144 sq. m. with a pop. of only 288,486. The kings of Kandy were possessed of absolute and uncontrollable authority and assumed great state. The last of these barbarous princes, remarkable for his ruthless ferocity and cruelty, so oppressed his people as to induce them to solicit the interference and protection of the British Government, a request which was the more readily complied with, that this sovereign had a short time previously caused to be murdered in cold blood several hundred British troops, 120 of whom were in hospital at the time, the others his prisoners. Having been captured by a party of his own subjects, in Feb. 1815 he was delivered into the hands of the British who had invested his capital, and kept a state prisoner in Vellore, near Madras till his death, which occurred in Jan. 1833.—(*Gleaner of Ceylon*.)

KANE, a par. Incl. Louth 750 ac. Pop. 801.

KANEM, a territory, Central Africa, N.E. side of Lake Tchad, and comprising the whole of its banks on that side, between lon. 14 and 19° E.

KANEV, a ta. Russia, gov. of, and 89 m. S.E. Kiev, a bank of the Dnieper. It was formerly a place of strength, and stood on lon. 14 and 19° E.

repeated sieges. It contains a castle, three churches, and a Greek monastery. Pop. (1843) 4465.

KANGAROO ISLAND, a large id. of S Australia, at the mouth of the Gulf of St. Vincent, 96 m. long, E. to W, and, with exception of a narrow point projecting from its E. end about 26 m. broad; area, 7,500,000 ac. Mount Torrens, a height at its W. end, visible at a distance of 40 m. at sea, is in lat. 35° 50' S. lon. 136° 38' E. It contains some very fine pasture and timber, though in some parts the soil is composed of sand, left by the retreating sea, mixed with a small portion of vegetable mould. The want of rain upon land so dry renders it impossible to produce vegetables, except during the rainy season. About 300 or 500 yards from the sea, good soil is found, where young potatoes, plants,

PALACE OF THE KING OF KANDY

palace, and buildings connected with it, now used as government offices, occupies a considerable space of ground and the front, which was about 200 yards long still presents an imposing appearance. The other public buildings, exclusive of the churches, are the principal Buddhist temple of Deleda Malagala [place of the tooth], a lofty but unpretending structure, into the sanctuary of which day-light never penetrates; the medical hall, and post-office, the jail, barracks, and offices of the bank of Ceylon, and the Oriental bank; and the military magazine, situated in the middle of the lake. The places of worship are, an Episcopalian a Scotch Presbyterian, a Baptist, and a R. Catholic. The Church Missionary Society has a neat residence and school-house, used as a place of worship on Sundays. There are also one

and pass, will thrive, but no sooner is the rain over than the earth is so heated, that every vegetable perishes. Nine miles in the interior there are belts of iron and limestone running through the island. Kangaroos were once numerous here, as the name implies, but are now very scarce. The other animals are the wallaby, a creature of the kangaroo species, only of a smaller kind, the opossum, the bandicoot, or Australian rat, the Norway rat, and the guinea. Snakes, tortoises, scorpions, and the ant-eater, are numerous. There are several bays in this island, the principal of which is Napan Bay, at the E. end, capable of accommodating some hundreds of vessels; its N.W. side is formed by Point Marston lat. 33° 38' S. lon 127° 41' E. (s.)

KANGELANG or CAROLAN, an isl. Java Sea lat. (N.W. point) 6° 50' S. lon 116° 15' E. (s.) It is of irregular form, about 26 m. long and 8 m. broad. On the E. coast it is indented with several bays. It is well wooded surrounded by numerous islands and rocks, which render landing difficult, and is much yielded by glass. Inside an isl. on the W. side, is a good harbour, capable of containing 20 to 30 ships. Pop. 1500.

KANIA a tn. of W. Africa dist. Koranko N E Sierra Leone, on the route from Rokoto to Fala, lat. 8° 5' N. lon. 11° 9' W. It is remarkably neat and clean, the outside of the houses being whitewashed, and the premises tastefully enclosed with wicker-work.

KARISA several places, Hungary particularly—1 (O-Komac, or Alt Komac) a market in the Bacs, in a very fertile district on the Theiss, have crossed by a ferry opposite to Turkish Kanis. It contains a R. Catholic and a Greek non-united church, a synagogue and a Pietist gymnasium and has a trade in corn, tobacco and cattle and several annual fairs. Pop. 3070—2 (Aggy or Aggyab-Komac) a market in Thaur Donau, co. Szabol in a marshy district on the Kanis, a small affluent of the Mur, 21 m. N. N. E. Kopolnicz. It contains a parish church, Protestant academy, townhouse and Pietist gymnasium and a large trade in fat cattle, for which important markets are held here. Pop. 6897—3 (Am or Torak Komac) a vill. Thaur Thaur. co. Terontal, 65 m. W. N. W. Temesvar on the Theiss, over which there is here a ferry. It stands in a very fertile district, and has a trade in cattle, wine, and tobacco. Pop. 1817

KANIXA or KANIXA, a vill. Austria, Slavonia, geographically Peterwarzin, near the Rava, and about 14 m. from Puden, with a parish church. Pop. 1100

KAN'KAN, a tn. and dist E of Senegambia. The town carries on a profitable commerce with Sego and Tambouco and is said to have a pop. of 6000.—The distance lies between lat. 10° and 11° N. and about lon. 8° and 9° W.

KANAKARI, or KANAKU, a tn. and dist. Asiatic Turkey, pers. Anadolia. The town 70 m. N.E. Angora lat. 40° 55' N. lon. 34° 5' E. on a small affluent of the Kizilirmak is of considerable extent, containing about 2000 houses, 8 large and several smaller mosques, six khans and four public baths. There is a castle on a height close by, a barracks, and a singular and ancient Mahometan building, called the Mejid Tash, which appears to have been a convent of dervishes, and a burial-place for holy men. Pop. 18 000.—The distance is composed of a cold upland of gypsum, interspersed with volcanic cones and some cultivated valleys amongst the latter of which that of

Tosyah is remarkable for its fields, gardens, and vineyards. KANKHUL, a large and handsome tn. Hindostan, prov. and 100 m. N. E. Delhi r. bank Ganges, lat. 29° 56' N., lon. 78° 5' E. Many wealthy natives reside here.

KANAGAREKKY a tn. Hindostan, presid. Bombay. Wanan's dominion, prov. Bedjore, in a valley between two wooded ridges, and encompassed on two sides by the rocky bed of a rivulet, 190 m. S.W. Hyderabad, lat. 15° 35' N. lon. 76° 30' E. It was formerly the capital of a Hindoo principality, and a place of considerable note, but many of the buildings have gone to decay. The principal street traversing the town, E. to W., is remarkably spacious, and terminated at

one extremity by a magnificent pagoda, dedicated to Krishna. Several other temples have been converted into dwelling-houses or stables, by the Mussulman inhabitants. The neighbourhood is rich in remains of Hindoo sculpture.

KANNETADT a tn. W. Germany. See Garmstadt.

KANO a tn. Central Africa, W. Sudan, prov. of same name lat. 12° N. lon. 8° 40' E. It stands upon, or rather is divided into two parts by a morass, the margins of every hand of filth, including even the dead bodies of slaves, which renders it extremely unhealthy. The town is of an irregular oval form about 15 m. in circumference, and surrounded by a clay wall, 50 ft. high, with a dry ditch along the inside and another on the outside. There are fifteen gates, made of wood and covered with sheet-iron, which are regularly opened and shut at sunrise and sunset. Although, however the walls are of the extent above mentioned, not more than a fourth of the space they enclose is occupied by houses, the remainder being laid out in fields and gardens. The houses are built of clay and are mostly of a square form, in the Moorish fashion, and have many conveniences and accommodations which could scarcely be looked for in so barbarous a city. It is a place of great trade, and a general mart for all sorts of merchandize, Arabs and Moors from Barbary resorting to it in considerable numbers for commercial purposes. The market, which is crowded from sunrise to sunset every day, is well supplied with every necessary and luxury in request among the people of the interior and particular quarters are appropriated to distinct articles. Transactions are conducted with the utmost fairness, and the regulations of the market strictly and impartially enforced. Kano is celebrated for the dyeing of cloth, for which process there are numerous establishments in the town. Tanning and the manufacture of Southern Jute, in which some ingenuity is shown, are also carried on to a considerable extent. Kano is supposed to occupy the site of the ancient town of Garama, some centuries ago the chief seat of the Arabian power in Africa. Pop. estimated at 50 000.—(Lander's Records, Clapperton and Denham's Travels)

KANOJE, or KUNJOSE, an ancient tn. Hindostan prov. Agra, once the cap. of a powerful empire, on a plain about 2 m. W. from r. bank Ganges, about 70 m. W. N. W. Lucknow lat. 27° 8' N. lon. 79° 47' E. By means of a canal, the Ganges has been brought close to the citadel. The modern town consists of one tolerable street, with several smaller

TONES OF MUSSULMAN SAINTS, KANOWTA.—From a drawing by Capt. E. Smith, 40th Regt.

lanes branching off, and covers a considerable space of ground; but the ruins of the ancient city extend over several miles. Many of the buildings are of brown stone, with beautiful carving, but in a very heavy style of architecture. Scarcely are commended in a better taste, with the light, airy pavilions so characteristic of the East. They consist chiefly of the tombs of Mahometan saints. The ancient language of Kanika is said to be the basis of the modern Hindostani.

KANOWTA, a tn. of W. Hindostan, Ameer 11 m. S. W. Jaggoor. It is mostly built of stone, and contains several temples one of which is curiously adorned with mythological paintings.

KANSAKI, a vil Japan, in the valley of Sakai-bara, in Kin-sai. It contains about 1000 houses.

KANSAS, a river, U States, an affluent of the Missouri, formed in Kansas territory by the union of the Blue River, Republican Fork, Smoky Hill Fork, and other streams. From the sources of the Smoky Hill Fork, which may be considered the main stream to its mouth in the Missouri, 150 m. W. by W. Jefferson, its course is about 1200 m. It is 690 yds. wide at its mouth and is navigable for 900 m.

KANSAS, a ter, U States, named from above river and formed by act of Congress, May, 1854. lat. 37 to 40° N. lon. 94 30 to 107° W. length 680 m. E. to W. greatest breadth, 208 m. area, 114,798 sq m. Bounded N by Nebraska, E. by state of Missouri, S. Indian ter and New Mexico, and W. New Mexico and Utah from the latter of which it is separated by the Rocky Mountains. Pop. (1850), 3500.

KANSK a tn. Anaton Russia, gov. Yeniseisk, cap. circle, 1 bank Kaza, 180 m. E. Krasnoyarsk on the road from that town to Irkutsk. It was once fortified, and still bears the name of Ostrog or fortress. It has important animal furs. Many of the inhabitants are convicts. Pop. (1850) 1730.

KANSUO or **KANSON** (Voluntary reverence), an island prov. in the N. of China, bounded N. and N. E. by the desert of Gobi and Mongolia, E. by Shensi, S. by Szechuan, S. W. by Koko-nor and the desert. It extends between lat. 33° 30' and 40° N. and between lon. 98° 30' and 106° 36' E. and comprises a large part of the ancient kingdom of Tangut, area, 86,606 sq m. The country is mountainous, some of the peaks rising more than 10,000 ft. above sea-level. The principal chain is a spur from the Fohi ling or Lung mountains, which running N. E., bounds the valley of the Yellow River on its E. side, and forces its waters N. it also forms the E. watershed of the Wei, and other tributaries of the Yellow River in Shensi. The Yellow River flows through the province in a N. E. direction and receives a few large affluents in its course. Near the termination of the great wall a range of hills, called Ki lien shan forms the water-shed between the valley of the Ta-tung and a number of small rivers which flow N. into the desert. The climate of Kansuo is rather cold, and the inhabitants make use of skins and furs in their clothing. The soil is in general sterile, but the country E. of the Yellow River is fertile, and produces wheat, barley, millet, &c. Wild animals abound, and large stocks and herds are also maintained by the Tartars living within the province. In the mountains copper, jade, gold and silver are met with. The trade of Kansuo is very considerable, and has greatly increased of late years. Lan-chao-foo is the cap. Pop. 15,103,125.

KANTA, or **KANT**, a vil Austria, Transylvania, co. Ober-Woessburg on a stream opposite to Kesh Vasmehely and about 44 m. from Kronstadt. It is a very stirring place, and has two churches, and a gymnasium. Pop. 1109.

KANTALICOUNDA, a vil of W. Africa, r. bank Senegal, lat. 13 33° N. lon. 13 51° W. There is here an English factory at which various commodities, and especially salt, are given to the natives in exchange for skins, ivory, and wax. The inhabitants of the district are Mandingoes, organized after the manner of those of Bambock, and suffer much from the incursions of the Fula of Djallon. The willow of Europe is common in the neighbourhood of Kantalicounda, and is made into various articles of wicker-work.

KANTAVU, an isl. Red Sea. See **KANDARU**.

KANTURK, a market in Ireland, co. of and 26 m. N. W. Cork, at the confluence of the Affin and Ballin, by which it is traversed. It consists chiefly of several short streets, irregularly built, but of late years its appearance generally has been much improved. The public buildings are a sessions house, and a large brewhouse, a neat parish church and a handsome cruciform R. Catholic chapel. The churches command a dispensary, a free, and several other schools. There is a brewery in the town, and in the immediate vicinity are extensive holding mills. Pop. 5602.

KANUM, a city, Central Asia, Balkh, r. bank Upper Sulaj, lat. 31 37° N. lon. 78° 33' E. nearly 9000 ft. above the sea. The houses are flat-roofed, and clustered together; some of them 7 or 8 stories high. There is here a Lama temple, and an excellent library, said to contain a copy of every work to be found in the great library at Chocho-lo-nun boo. The table-land on which the city stands is fertile and well cultivated.

Vol. II

KANYABAC, one of the Bessagos lala, W. coast, Africa, between the ul. of Orange and the mainland, from the latter of which it is distant about 16 m.; lat. (S. end), 11° 10' N. lon. 15° 40' W. Like the other islands of the same group, it is of volcanic origin, and is covered with luxuriant vegetation. The natives rear large herds of cattle, of small size, but well proportioned and in excellent condition. Elephants and hippopotami, the latter of great size, abound in the island. There is a bay on the island, called Demason Bay, where wood and water may be easily obtained, and in any quantity.

KANYALAZA, or **KALHERET**, a vil Hungary, Thither Thales, co. Szathmar, about 18 m. from Aranyos-Magyar, in a fertile district, with a Greek church. Pop. 1063.

KAO, a prefix to the names of many ts. in China, amongst which the principal are—1 (**Kao-Tsien**) prov. Quingtung, l. bank of a river, and about 38 m. from the sea, and 170 m. S. W. Canton lat. 21° 50' N. lon. 110° 48' E. The river is navigable up to the city, which is enclosed by walls, and has manufactures of nankeens. The surrounding district is fertile, and produces a species of marble or Jasper—2, (**Kao Tseng**) prov. Kiang-soo, r. bank of the Imperial Canal, 65 m. N. E. Hankow—3, (**Kao-Hsiang**), prov. Quingtung, r. bank of a small stream, that falls into the most S. branch of the Canton river in the delta, 40 m. W. by E. Canton—4, (**Kao-Tsueg**) prov. Homen near r. bank Hoang-Ho or Yellow River lat. 34° 42' N. lon. 115° E.

KAO one of the Longs lala, a vast conical rock N. E. of Tufona, 5000 ft. high lat. 19° 48' S. lon. 175° W. (s.)

KAPIL LA a mountain range Austria, Croatia, which forms the connecting link between the Julian and the Dinaric Alps, and consists of two distinct parts, the Great and the Little Kapella. The former the more elevated of the two, has its culminating point in Mount Klack and has a length of about 35 m. The general direction of the range is from N. W. to S. E. and nearly parallel to the Wallatitz mountains, which skirt the Adriatic.

KAPELHA, a vil Austria, Slavonia, co. Veroco, on the Karaszeva, about 24 m. from Siklos, with a Jewish church and a mill. Pop. 930.

KAPL, or **KAPUSARY** a vil Hungary Thither Thales, co. Szathmar, 12 m. E. Nagy-Banya, with a R. Catholic church, the ruins of an old castle, situated on a precipitous height, and a trade in corn and cattle. Pop. 1046.

KAPINI, an isl. S. Pacific. See **CLAR'S ISLAND**.

KAPITO an isl. New Zealand. See **ENTRY ISLAND**.

KAPLITZ GAPPITZ or **WOLANNA**, a market in Bohemia, circle and 17 m. S. Budweis, 1 bank Mulochs with a church, chapel, townhouse, school, infirmary, hospital, and brewery. Pop. 1892.

KAPLOVY, a vil Hungary, Thither Thales, co. Szathmar, about 2 m. from Nagy-Karoly. It has a Protestant, a Greek, and a R. Catholic church and a Franciscan monastery with a church and chapel. Pop. 1049.

KAPNIK BANYA (Latin, *Cupanea*) a mining tn., Hungary, co. Szathmar, 12 m. E. Nagy-Banya, with two churches, and mines of gold, silver, and lead. Pop. 8000.

KATNINO, a tn. Russia, gov. Vladimir circle of, and 18 m. W. W. Pereslavl Zaleskoi, on the Trubesh, with manufactures of linen and linen yarn, and a paper-mill.

KAPOLNA a vil Hungary Thither Thales, co. Heves, on the Tharsa, 13 m. S. W. Ecsan, with a church, and a trade in corn. Pop. 1247.

KAPOLITZ, a vil Hungary, co. Szathmar, about 12 m. from Tapoleza. It stands in a mountainous district; and has a church and a trade in corn and wine. Pop. 1290.

KAPORNAK (Nagy) a market in Hungary, Thither Thales, co. Szathmar, about 9 m. from Eszter-Egerseg, with a church, and a trade in corn and cattle. Pop. 883.

KAPOS (Nagy and Kis) two nearly contiguous vils., Hungary Thither Thales, co. and 13 m. N. W. Ungvár with two Protestant churches, cavalry barracks, and magazine several good manor houses, and a trade in corn and timber. Pop. 1294.

KAPOSVAR, a tn. Hungary, Thither Domb, cap. co. Szathmar on the Kapos, at the foot of a hill, 80 m. N. W. Fünfkirchen. It has a R. Catholic church, a handsome townhouse, the ruins of an old castle, and a trade in wine and tobacco. Pop. 3900.

7

are numerous. Large quantities of geese and ducks frequent the lakes. Fish abound in almost all the small rivers, and fresh water is plentiful.—3, A bay, in the S. side of above id. It penetrates 9 m inland, with a breadth of 4 to 8 m. It receives the river Karaga; the mouth of which is in lat. 39° 5' N. lon. 126° 59' E.

KARAK, or KARAVON, an isl. Persian Gulf coast of Persia, prov. Bas. lat. 39° 17' N. lon. 50° 30' E. (ch) about 44 m long, N.W. and S.E., of moderate height. Water is to be had on the N. side of the island, firewood is scarce. Fish, which are plentiful, and dates form the principal food of the inhabitants for they have no grain but what is imported, and very few vegetables. Bullocks, sheep, and poultry are to be procured but at exorbitant prices.

KARAKAKOPO, a lay Hawaii. See **KALAKAKOPO**. **KARAKALPAK**, a tribe of Turcomans, inhabiting a strip along the E. shore of Lake Aral, and along the Syr-Daria, which though treeless and shrubless, affords excellent pasturage for the cattle which form the chief riches of these nomads. The Karakalpak likewise work in iron and make good arms. They are divided into two sections and many of them have spread out into the khans of Khiva. They are said to count 25 000 warriors.

KARAKITIA, or PAMAGE ISLANDS, a group of five isls., and several rocky islets, Indian Archipelago lying between the S. end of Fungar and Rao lat. 5° 14' N., lon. 125 44 E.

(a) The westernmost island is high, and the E. one, called Pala, projects out on a low point to the E.

KARAKOOL, a tn. Bokhara I. bank Zer-Afshan 88 m S.S.W. Bokhara lat. 29° 30' N. lon. 6° 45' E. Pop. estimated at 30,000.

KARAKORAM PASS, a pass Central Asia, Chumise Turkistan between the towns of Ith and Larkand, in what has been called—there being no native name—the Mustang or Kemsala range of mountains, situated in lat. 35° 50' N., and about 10° 44' E. at an elevation of 18 200 ft. above the sea-level, described by Dr. Thomas Thomson the only European who has visited it as a rounded ridge connecting two hills which rise somewhat abruptly to the height of perhaps 1000 ft. above it. Vegetation and snow are entirely wanting on the top but the loose scum with which it is covered is unfavorable to the growth of plants otherwise no doubt, which at least would have been seen. Large ravens were circling about overhead apparently quite unaffected by the rarity of the atmosphere as they seemed to fly with just as much ease as at the level of the sea. Towards the N. there is no direct view. On that side, the descent is steep for about 500 yds. beyond which distance a small streamlet occupies the middle of a very gently sloping valley and disappears to the left, at the distance of half a mile behind a stony ridge. The rocks in the neighbourhood are a dark-blue slate, containing much pyrites, and a hard limestone.

KARAMAN (anc. Laranda), a to Asiatic Turkey pass Karamania, in an extensive valley to the N. of Beldier-tag a lofty mountain in the chain of the Taurus lat. 37° 12' N., lon. 35° 5' E. Every house being surrounded with a garden makes the place appear much more extensive than it really is. The Turkish castle consists of a square keep with several round and square towers, surrounded by an outer wall, within which there are about 100 houses. In the town are a large and handsome Armenian church and several ruined mosques, of graceful Saracenic style. One of them of marble, ornamented with arabesques, and supported in the interior by rows of columns. Most of the houses are in a ruined and dilapidated state, and the houses are very indifferently supplied. There are southernly manufactures of blue cotton and other cloths and an active trade is carried on with Smyrna, Kalesiah, and Taurus in cotton goods, lilies, and nut galls. Karaman was founded by Karaman Oglu in the 14th century and is built out of the ruins of the ancient Laranda. It was formerly the residence of the Pasha, who still retains the title of Pasha of Karaman, though he resides at Ioudum. The houses are 3000 to 3000, and the pop. probably near 13 000.

KARAMANIA, KARAWANIA, KARAWAN, or KHARAND and from its capital also KONTA or KONIKER, a pass Asiatic Turkey Asia Minor, between pass. Ithid or Adams S. Anadolli and Sivas W. and N. and Marash E. lat. 37° to 39° 40' N., lon. 38° 30' to 38° 50' E. area, 27,652 sq. m. A large portion of it is mountainous, the Taurus

range traversing its entire length, E. to W., separating it in part from pass. Ithid and forming the greater portion of its S. boundary. Its principal rivers are the Kizil-Irmak and the Syrtoun. In the S.W. portion are numerous small lakes. The mountains are covered by forests of oaks, and some species of pines rising 100 ft. in height. The vine and fig-trees exhibit the most luxuriant vegetation, the laurel myrtle, and distants, together with numerous odoriferous shrubs, flourish in profusion, and abundant harvests are reaped from its rich deep soil, while the climate is so genial, that the inhabitants can pass three-fourths of the year under the shade of the trees. The scenery in the mountainous districts is singularly fine. The houses throughout the pashas are constructed of earth or of bricks baked in the sun, and many of them are miserable dwellings, but the villages of the Turcoman shepherds are composed of neat huts, covered with skins. The rivers, and numerous small streams by which the country is intersected abound in fish, but the inhabitants, it is said, will not be at the trouble of taking them. Tobacco, silk, cotton, saffron, and excellent fruits are raised but the principal occupation is rearing live stock. It is divided into seven sanjaks. Principal towns Koma, Kalesiah, Ak-ehshir, Beg-ehshir, Nigehi, and Karaman. It includes ancient Lyonnania, and a portion of Phrygia Major Galatia, and Cappadocia and it formerly included the maritime pashas of Ithid or Adams which in its turn is composed of ancient Cilicia, Isauria, and Pamphylia.

KARAMASY, a to Central Asia, Khansat and 20 m. E. Khiva, on a canal of same name, led from the Amoo-Daria. It is surrounded by a dilapidated wall, and consists of about 200 houses, inhabited by Uzbeks, Barts, and Persian slaves who have obtained their freedom. It is very subject to inundation, the water often standing high in the streets. The ground is not fertile but the cultivation of it, partly as gardens, is the chief employment.

KARAMY, a river Russia, which rises in the W. of governor, about 100 m. N.W. Y Kamshin pursues a very circuitous course of about 70 m., first E. then N. and then W. and joins I. bank Medveditska at the village of Karamsh.

KARANZ, Kaser, a vil. Hungary on Voegrad about 6 m. from Buda. It has a R. Catholic parish church an elegant castle, and a trade in corn and timber. Pop. 980.

KARANG ARAH, a native state, Indian Archipelago, N. coast isl. Bali. It is the most powerful state in the island mountainous but fertile and well watered the principal streams running in the Gigit. Through the port of Padang near its S.W. point, it carries on a trade in krises, pikes, daggers, salt cotton and silk, with Chinna, Macassar, and Bugia. Pop. 200 000.—Its CAPITAL of same name, lat. 8° 25' S., lon. 115° 34' E. is the most important town in the island and has a good harbor, the only one in which large ships can anchor.

KARASIBBS, a tn. Hungary Banat, co. Krasso in a fertile district r. bank Temis, 50 m. S.E. Pomeran. It has two churches a synagogue, and a small school. It is the seat of a Greek bishop, the seat of military commissaries, the headquarters of a Wallachian Illyrian government, and has a gold washing and a considerable transit trade in Turkish wares, for Transylvania. Pop. 5400.

KARANTS, a vil. Hungary Thutler Danube, co. Baranya, in a fertile district, 48 m. S.E. Plofirkoben, with two churches, and a trade in corn and excellent wine, the produce of the district. Pop. 2561.

KARASICA, a river Hungary, Thutler Danube, which rises in co. Bacsanya, to the N. E. of Plofirkoben, flows first S., then E., and joins r. bank Danube at the S. extremity of the island of Margitsa, after a course of about 50 m.—S. A river Slavonia, which rises near Vuchin, to the N. of Mount Papuk flows easterlyly E. S. E., and joins r. bank Drava, about 9 m. N.W. Essek, after a course of about 55 m. Its chief affluent is the Vuconia.

KARASUBASAT, a tn. Russia, in the Crimea lat. 45° N., lon. 24° 40' E., r. bank Karak, near its source, in a fertile valley, surrounded by hills, about 90 m. E.N.E. Sinferopol. Morasses in the neighbourhood, and bad water make it rather unhealthy. It is built of bricks, in the Asiatic manner; houses, in general, mean, and the streets narrow and crooked. It has several mosques a Greek, an Armenian and a R. Catholic church an extensive bazaar, and a great number

of shops. It is a place of considerable trade is celebrated for its manufactures of morocco leather, has a considerable weekly market for cattle and a great annual fair. P. 15,000

KARASLO (Aino), or **KARAKA**, a vil. Hungary. Further Thulea co. Ugeon, in an open valley, the Betsova, 14 m. N.W. Hums, with a parish church, and has some trade in corn and cattle. Pop. 1219

KARATAT, a vil. Central Asia, Khanat, and 56 m. N.E. Khiva, 1 bank Amoo-Darya, over which there is here a ferry. It is inhabited by Uzbeks, who trade in salt and timber.

KARATOGH, a co. and river. Central Asia, in the Pamir table-land. The town is in lat. 38° 50' N. lon. 70° 5' E. about 200 m. W. by R. Chaghar, on the 1 bank of the river of the same name. The latter is an affluent of the Upper Oxus, rises about 80 m. N. from the town and flowing S. falls into the Oxus a little E. of Kurgha-kappa, or lat. 37° 40' N. lon. 68° 55' E. after a course of about 110 m.

KARATOVA or **CARATOVA**, a small in Turkey in Europe, Macedonia, 1 bank Egredra, at its junction with the Brannista, 35 m. S.E. Uskup. In the vicinity are silver and copper mines.

KARATSCHEV, a tn. Russia, cap. circle of same name gov. of, and 47 m. W.W. Orsk lat. 53° 5' N. lon. 84° 50' E., traversed by the Sargol. It is built of wood, and has some wooden churches, besides three of stone. The inhabitants are sustained chiefly by agriculture, the ordinary handicrafts, and sheep-rearing. Hops and twine are made to some extent for exportation. It has several fairs. Pop. (1851) 8174. — The circles as rich both in woodland and arable land and raises a considerable number of cattle.

KARAYUKOVA, or **KARAYUKOVA**, a vil. Hungary. Further Danube co. of, and m. N.W. Beck, is a marshy district, near 1 bank Hoon, with a R. Catholic church. Potatoes and hemp are extensively grown, and some wine is produced in the vicinity. Pop. 1949

KARBACH, a vil. Bavaria, circle Lower Franconia, dist. of and near Rothmühle, with a R. Catholic church and several other mills, and a trade in corn, wine, and fruit. Pop. 1190

KARHILZ, or **KARHILZ**, a Bohemia, circle of and 12 m. N.W. Leitmeritz, with a handsome parish church, many features of castles, the works several dwellings and mills and near it a mine of lignite. Pop. 1541

KARLUACH KREUTZBURG, a tn. Bohemia, circle of and 18 m. S.E. Tabor in a plain, where a stream issues from Lake Karbach. It has a parish church and school an old castle now used as a courthouse, and a townhouse, manufactures of linen tile-works, and several mills. Pop. 2035

KARLSZAG or **KARLSZAG-UR-SZALLAG**, a market in Hungary Great Comana, on the E. side of the lake of the same name on the road from Szabolcs to Dobozs, 88 m. W.S.W. Dobozs. It is a large, straggling place, contains a Protestant, a R. Catholic and a Greek non united parish church, and has a considerable trade in corn, cattle, wine and fruit, particularly melons, which are here in great abundance, and of excellent quality. Large numbers of tortoises are taken in the vicinity. Pop. 11,424

KARFIS, a race inhabiting all the mountain regions of the S. and E. portions of Russian proper and all parts of the Transcaucasian provinces, extending into the W. portions of Islam, and thence E. amongst the Shyans. Their numbers cannot be well ascertained, but have been estimated at about 33,000

KARGOPOI, a tn. Russia, gov. Olonets, 1 bank Onega, 310 m. E.N.E. St. Petersburg. It is of great antiquity, well built, contains 20 churches and two convents, makes great quantities of tallow has a cordage manufactory and several tanneries. Pop. (1849), 1681

KARIKAL, a tn. Hindostan, presid. Madras Carnate, dist. Tanjore, on the coast of Coromandel, near the mouth of one of the branches of the Carvee and about 8 m. S. Tran. quarter lat. 10° 55' 3" lon. 79° 52' E. In the Carnatic wars, it was a place of considerable importance, and it still occupies a considerable space. It was ceded to the French by the Rajah of Tanjore in 1789; taken from them by the British, in 1803 and restored by the treaty of Paris, in 1814. The French have been making efforts to renew its importance, and the trade, particularly in rice, is said to be considerable, but there is a large bar across the mouth of the river by which the navigation is much obstructed. Pop. 15,000

KAPITENA, a tn. Greece, Moros, r. bank Roupas, 17 m. W. Tripolizza. It lies near the centre of the Moros, and is one of its most important military points, occupying the side of a hill the summit of which is lofty and precipitous, is covered by a castle which was long the stronghold of the celebrated Klephtic chief, Colocotroni. Pop. 1000.

KARKELANG one of the Tatars, Indian Archipelago lat. (N point) 4° 22' N., lon. 137° E. of triangular shape latly towards the V and E, but the greater part is flat. It contains 10 villages. Pop. 2970

KARKANA ISLANDS, a cluster of low isls, Mediterranean N.W. coast of Africa Tunis at the entrance to the Bay of Gabes lat. 34° 35' N. lon. 11° 30' E. The most W.W. is called Fera-Lakalia, having a tower erected on its W.W. end. The middle island is large and irregularly formed with seven villages on its W. side, and three on its E. side the principal of these is called Shraga, which frequently gives its name to the whole island. The other islands are smaller but they are all inhabited. They are dangerous to approach.

KARKISSA, **KAKISSA**, or **KARKISSIA** (anc. Caracorum) a tn. Assatie Turkey peak. Bagdad, 1 bank Euphrates, near the junction of the Abshier 160 m. S.W. Meadi lat. 33° 12' N. lon. 40° 30' E. It is now called Ab-Shera (Father of palaces) and is built on an extensive heap of ruins.

KARKOCZ, or **TARKOVITZ**, a vil. Hungary, Further Danube, co. Neutra, about 4 m. from Galgoc, on the road to Tyrnan, on the Danube with a R. Catholic church. P. 995

KARLHURG or **ONOVIVAS** (anc. *Vetus Gerulata*) a market in Hungary, co. Wieselburg, in a beautiful and fertile district, on an arm of the Danube 37 m. E.S.E. Vienna. It contains a Protestant and a R. Catholic church a synagogue, and an elegant castle, with fine gardens and has a trade in corn and several annual fairs. Pop. 2095

KARLEBY — 1 (*Qumla*), or *Old Karleby* (Finnish *Karkkila*) a small seaport tn. Russia Finland, Gulf of Bothnia, 71 m. N.W. E. Vasa, on a spacious bay. It is well and regularly built, contains a Church, and has buildings-yard, several tanneries, and pitch-ovens and a considerable trade in pitch butter, tallow and provisions. Pop. 2627 — 2 (*Isy*) near a tn. S.W. of the fortress on the Lapok the mouth of which runs into the Gulf of Bothnia. It has a considerable trade in tar. Pop. 2000

KARLENBURG (Gross and Klein) two nearly contiguous villa. Bavaria Palatinate, com. Grunstadt with a Protestant and a R. Catholic church, and several mills. P. 1680

KARLOVIMICH a vil. Austria, Belovitsa, generalship Peterwardein, about 9 m. from Golubintz with a Greek non-united church. Pop. 934

KARLOVITZ (Loj) a vil. Austria, Belovitsa, generalship Peterwardein, about 5 m. from Boskha, with a Greek non-united church. Pop. 1200

KARLOWITZ, a tn. Austria, Moravia, circle of and 37 m. E.S.E. Pseuau on a high hill near the frontiers of Hungary. It contains a church and a custom house, and has glass-works and several mills. Pop. 2437. See **CARLOWITZ**.

KARLSBAD a tn. Bohemia. See **CARLSBAD**.

KARLSBURG, a tn. Transylvania. See **CARLSBURG**.

KARLSHAMN, a tn. Sweden. See **CARLSHAMN**.

KARLSHAVEN (originally *Skjerv*) a tn. Hesse-Cassel cap. hall of same name, in a deep valley enclosed by red sandstone cliffs on the Weser at the confluence of the Diemel here crossed by a bridge 23 m. N.W. Canal on the railway thence to Hanover. It consists of two large and of two small quarters, separated from each other by a canal, which is partly walled up. It contains a church, attached to a house of invalids, a merchant-house, and several large magazines, belonging to the Elector and has manufactures of soap, leather, and tobacco a foundry vinegar-works, and several distilleries a considerable trade in corn and colonial products, and three annual fairs. A great many of the inhabitants are descendants of French Hugonots, who, having been driven from their homes, settled here in 1599. Pop. of tn. 1703; of hall 7416.

KARLSKRONA a tn. Sweden See **CARLSKRONA**.

KARLSRUHE, a market tn. Prussia, prov. Silesia, gov. of, and 18 m. N.W. Oppeln. It has a dual castle, a Protestant and a R. Catholic church manufactures of potash, tile-works, and Hemiclins. Pop. 1513

KARLSTAD, a tn. Sweden. See **CARLSTAD**.

KARLSSTADT—1, A. in Bavaria Lower Franconia, on the Main, 15 m. N.W. Würzburg. It has two churches, a chapel, Capuchin monastery hospital, and the ruins of an old castle; manufacture of leather and some trade in fruit and wine. Pop. 2160.—2 (or *Karlstadt*) A. in Czecho. See **KARLSSTADT**.

KARLSSTADT, a vil. Austrian Silesia, circle and about 32 m. W.N.W. Troppau, on the Gold and Kobel, with many factories of linen, and a paper and two other mills. Pop. 1144.

KARMEI, a vil. Punjab, 6 m. N.W. Ramnagar lat. 32° 28' N. lon. 78° 34' E.; bank Chenab, which, when fullest, is here 1 m. broad. There is a considerable traffic across the river by the ferry at this place.

KARNAK, ruins, Egypt. See **THEBES**.

KARNTHEIN a duchy Austria. See **CARINTHIA**.

KAROLY (Nagy), a market in Hungary, cap. co. Szathmar 40 m. E.N.E. Debreczin. It contains a large market-place, a R. Catholic, two Greek, and two Protestant churches a castle, with fine gardens, a synagogue, Piarist monastery gymnasium, head national school, and county buildings; and has a trade in corn and cattle, and several important annual fairs. Pop. 12,055.

KARPATHEIN mountains. See **CARPATHEAN**.

KARPFEN a. in Hungary co. Solod on the Kremlina, 12 m. N.E.E. Schenau, finely situated at the foot of lofty hills which shelter it from the N. blasts. It has two churches a townhouse, a Piarist college, and school, and a considerable trade in wine, which is extensively grown in the district. Karpfen is one of the oldest free towns in Hungary. P. 3800.

KARROOS, table-lands or extensive plains between the mountains-ranges at Cape Colony (see **CAPE** or **GOOD HOPE**, vol. I. p. 592). They are exuberantly fertile for a time but, as this period is of short duration, the repair of cattle to graze on them forms a sort of holiday with the Dutch, Boers, and their servants, as giving variety to their usually monotonous existence and the expression of a Karroo life has come to be considered in the colony synonymous with whatever is frolicsome and merry-making, and relieved from woe and restrictions. During the dry season they become parched arid deserts. The *Kloof* a sort of companion name to the karroo is the name of the longitudinal valleys extending between the ranges of the deserts mentioned. Some of them are of great extent, the *Long Kloof* or *Long Valley* being upwards of 100 m. in length.

KARS, a city Turkish Armenia cap. pash. of same name, picturesquely situated on the Karz, in an elevated plain, about 6000 ft. above the sea, in a rocky amphitheatre of black basaltic hills, 90 m. N.E. Erzeroum lat. 40° 22' N., lon. 48° 10' E. The houses are all built of black basalt, and this circumstance combined with the total want of trees, gives the town a dismal appearance. It stands on both sides of the river. On the E. side is the Armenian suburb built on a gentle elevation, and nearer the river rises a lofty hill, crowned with the Turkish citadel, now in ruins. A good bridge leads to the other side, where the town, properly so called is situated, and is surrounded by a wall. It suffered greatly from the attack, and subsequent occupation of it by the Russians. Pop. 12,000.—THE **PASHALIK**, bounded N. by pash. Akhalzik, N.E. by Russian Armenia, S. and W. by pash. Erzeroum, lies between lat. 40° 8' and 41° 18' N. and lon. 43° 28' and 45° 34' E. It forms part of the Armenian plateau, is surrounded by lofty mountains some of which are covered with perpetual snow, and has a severe climate, and a soil sterile and stony in the mountains, but rich in the valley. It is watered by the Aras, and several of its tributaries, as the Karz and Arpaehak. Cattle and silk worm rearing form the chief occupation of the inhabitants, who are Turks, Armenians, and nomadic Turcomans.

KARSOON a. in Russia, cap. circle of same name, gov. of, and 65 m. W. Simbirsk, 1. bank, Barab, where it joins the Karamanka. The manufacture of common and shaggy leather employs the most of the people. A considerable fair at Easter, sometimes about a fortnight. Pop. (1851) 8000.

KARFTASANA, a market in. al Java, prov. Kediri, 1. bank Kediri, 40 m. W.N.W. Soerabaya. It has a fine bazaar, a neat mosque, and carries on a good trade in rice. Pop. 4000.

KARTHALS, a. in Prussia, prov. E. Prussia, gov. Danzig, cap. circle of same name, with a chapel an old

Catholic monastery, and a paper-mill. Pop. 510.—The climate is well watered but not very fertile. Area, 417 geo. sq. m. Pop. 37,883.

KARTOUM a. in Nubia. See **KHARTOUM**.

KASUN (anc. *Silene*), a river Persia, having its sources in the mountains of Awa, prov. Irak Ajem, gov. Luristan, lat. 32° 15' N. lon. 50° 40' E. From its source, the Kasun is a large river. At first it flows due W. but when about to enter the province of Khuzestan, bends round to the S., traverses that province nearly at its centre, till it approaches the coast, when it takes a S.E. direction, and falls, by two outlets, into the Persian Gulf about lat. 29° 55' N. It is perfectly easy of navigation, at all seasons, to vessels drawing 4 feet water, and admirably adapted for steam communication to within 6 m. of Shuster 150 m. from the sea.

KARYSTO, a. in Greece, on the S. extremity of Peloponnesus, 40 m. E. Athens. It is situated on a rock near a small bay and defended by a fort, is the see of a Greek bishop and has a small harbour which, lying exposed to violent winds is visited only by a few coasters. Pop. 8000.

KASAN **KASAN** or **CASAN** a gov. E. Russia, bounded N. by gov. Viatka, E. by Orenburg S. by Simbirsk and W. by Nijni-Novgorod lat. 54° 30' to 56° 45' N., lon. 46° 40' to 51° 40' E. Length averaging 215 m., and breadth 125 m. Area about 25,000 sq. m. On entering the district from the W., the ground descends at first gradually, but afterwards more rapidly almost to the level of the Volga, and spreads into a plain clothed with the richest green, intersecting an elevated plateau on the E. bank of the Volga, and terminating 3 or 4 m. E. in a range of hills. From this point the ground on the E. bank of the Volga rises rapidly, and strikingly contrasts with the low plains on the opposite side. The summit of the table-land thus formed is covered with well grown oaks which form the commencement of an extensive forest. Many of the hills consist of a brilliant white silty limestone the strata of which have a considerable dip, and are occasionally pierced by natural passages, one of which about 230 ft. long terminates in an alabaster cavern 60 ft. wide. Though the surface is thus occasionally diversified by hills, and a low branch of the Ural Mountains comes in upon the E., the general appearance is that of an extensive plain watered by large navigable rivers. The Volga, proceeding from the W., winds along in a tortuous course for nearly 180 m., the Kama, from the E. after a course of nearly 100 m. joins the Volga, whose united streams, occupying a channel 900 miles wide, proceed S. In addition to these are numerous smaller tributaries and lakes, which though individually not of large extent, are scattered throughout the district. The climate, on the whole is mild. Winter is keen but not protracted. Both spring and summer are usually serene, and in autumn all the vegetable productions of the same latitude come freely to perfection. Among others, apples peaches cherries plums, and apricots, abound. Agriculture is extensively carried on, but not in a very perfect form. In some parts, however, the Tartars seem to be careful husbandmen and are particularly attentive to the harvesting of their grain. Hemp is grown to a great extent, and of excellent quality and the oil obtained from its seeds, and from a kind of pistachio nut which abounds, forms an important article of commerce. Flax, both in quantity and quality, is deficient. The inhabitants generally seem fond of horticulture. Almost every cottage has its garden and patches of tobacco are often seen, particularly in the neighbourhood of the Tartars, who raise it for their own use. The raising of cattle forms a profitable employment in the meadows and pastures of the rich flats which border the numerous streams. There, also, much attention is paid to the dairy the cows yielding a rich milk, of which large quantities of butter and cheese are made. The Russians form nearly a half of the whole population. The greater part of the remainder are Tartars, Cherenkies, and Chuvashes. The Cherenkies, who are most numerous in the W. part of the district, are much smaller and weaker than the Russian peasantry and are characterized by a peculiar chronic both of look and demeanour. Their dress, which is the same for both sexes, consists of white linen trousers and an upper garment of the same material fastened round the loins with a girdle, and generally embroidered in various colours on the breast and shoulders. Strips of cloth which they wind round the leg from the foot to the knee, are always black. Both men and women allow their long black

half to hang about them in the wildest disorder. The dress of the Chuvashes very much resembles that of the Cherenkows, the chief difference being in the female, who wear a plate of copper hanging from the girdle behind, and strung with all kinds of metallic ornaments, which keep tinkling as they walk. The Chuvashes are remarkable for timidity. This quality, which the first accounts of these nations as their most striking feature, seems still, notwithstanding of their long intercourse with Russia, to continue unimpaired. In the neighbourhood of Kasan the Tatars predominate, and are easily distinguished from the Russians by the dark colour of their lean muscular and, as it were, angular visage, by the close-fitting cap on their closely-shaved skull and a certain smartness of gait and demeanour. They have made considerable progress in civilization, and often contrast favourably with the Russian peasantry. The inhabitants of the district, generally are active and industrious. Besides agriculture and wood-cutting fishing, in the numerous lakes and rivers of the district, is a profitable occupation, and employs a great number of hands. The district moreover possesses numerous manufactures, and has an extensive trade both internal and external, which the large navigable rivers greatly facilitate. Indeed boat and barge building for the traffic of the Volga, is not an unimportant branch of trade. Pop. (1856) 1,370,000.—The kingdom of Kasan comprehended the govs. of Kasan proper, Yarkut, Perm, Sankhsk, and Pensa. It was originally peopled by Finns, who were vanquished and driven out by the Tatars. These in the 13th century established the extensive khanat of Kaptlak, which, in the 14th century was subdivided into four khanats, of which Kasan was one. In 1552 Ivan Vasilevitch II. by the taking of Kasan destroyed the Tatar power and annexed the territory to Russia to a kingdom. In 1753, Peter the Great subdivided the kingdom into the five govs. mentioned above.

KASAN or **KAREN** a fortified city Russia, cap above gov., 460 m. E. Moscow, lat. 56° 47' N. lon. 49° 20' E.; between 1 bank Kazanka and its tributary the Bulak, occupying a tongue of land which gradually rises, like an island, to a considerable height above low plains liable to inundation. It covers a space nearly 6 m. in extent and properly forms three towns—the kremlin or citadel the middle town, and the lower town, or rather suburbs. The citadel, which occupies the highest position presents a very picturesque appearance. It is still surrounded by a stone wall of great height, which was built by the Tatars, and is flanked by 14 towers. The buildings in it most worthy of notice are the palace of the governor and the archbishop, the barracks, prisons, and workhouses for criminals, and more especially the great paladium of the place, the cathedral of the Kasan Mother of God. A picture kept here is held in the highest reverence and is believed to possess miraculous powers. In many parts of Russia, churches have been built for the Holy Mother of Kasan, and copies of the picture set up, and alleged to have powers almost as miraculous as those of the original, a faded and smaltlike painting with a drapery of rich and fantastic ornaments, wrought in metal, and set with precious stones. Many of the other 35 churches contain specimens of an architecture even more elaborate than those of Moscow. Among them may be named as remarkable edifices, the cathedral of Nikolski, that of the Annunciation a Byzantine structure and the cathedral of Peter and Paul more modern than the two last named. It has also 9 convents, and 16 mosques. Among the former the monastery of St. John the Baptist is an extensive edifice of an imposing aspect. In the middle town which adjoins the fortress, the grand appearance of some of the private houses, and the great extent of the bazaar or *Gostinny Dvor*, attest the high importance of Kasan at an early period. The bazaar is surrounded by lofty buildings, chiefly of stone; and exhibits an immense quantity of furs piled up in the fur stalls, an immense variety of vegetable productions and fruits, both grown and dried, and great supplies of fish, brought from the different provinces bordering on the Volga. The chief object of interest in the lower town is the university built of white hewn stone, and its principal fronts adorned with Corinthian columns. It was founded to be a school of modern civilization in a semi-barbarous district, and well fulfils its purpose. Besides the different branches of natural sciences the study of Eastern languages in

carried on at the very source; while that of national history is encouraged, not only by the peculiar character of the library but also by a remarkably rich collection of Russian and Tatar coins. In addition to the usual branches of manufactures,

CATHEDRAL OF VIRGOLIN, IN THE GREAT BAZAAR, KASAN.
From Driedel's Travelling Photographs at Antiquities in Russia.

Kasan has some which are peculiar to itself. One is the preparation and staining of Russian leather a business in which the Tatars are particularly expert and another the making of a particular kind of soap called mudo which cut into small pieces, and packed in boxes, is sent over all Russia. Kasan is well situated for a transit trade, carrying the manufactures of Europe to and from Asia and bartering them for the peculiar productions of those regions. In this way particularly by the trade in furs and in u.s., many of the storerooms of Kasan are said to have accumulated great wealth. Kasan was originally built by the Tatars, and, under them was almost as large as the present city. The walls were 28 ft. thick, and were formed of two parallel wooden fences, having the space between them filled with wood and clay. In 1552 it was attacked by Czar John Basilvich, at the head of a numerous army. For six weeks it made a vigorous resistance but was ultimately taken, scarcely any of its valiant defenders surviving the event. Since then, it has experienced several dreadful conflagrations the last in 1815, by which more than the half of it was destroyed. It has, however, quite recovered from the disaster. Pop (1840) 41,804.

KASANLIK a in European Turkey. See **KASAPKAR**.

KASHAWAT a in Asia, Khanat, and 20 m N Kharva, on the canal of same name led from the Amoo-Darya. It lies low and is partly surrounded by a wall contains a mosque and 25 shops, and is inhabited by Persian slaves who have been freed, and live by agriculture and trade.

KASHFK a vil Russia, in the Caucasus Mountains, and occupying both sides of the Terek, lat. 42° N; lon 40° E. It stands at the foot of Mount Kasbek, is inhabited by Georgians, and has a church built, six centuries ago, by the Georgian Princess Tamara, who converted her subjects to Christianity.—Kasbek, the mountain forming part of the chain of the Caucasus, is about 14,000 ft. high. Its higher regions are usually covered with snow and glaciers, which, in grandeur and extent, equal, and even surpass those of Switzerland. On its E. slope is a monastery of Georgian monks.—(Wagner's *Kaukasus*.)

KASHIN, n. to. Perm. See **GABRIEL**.

KASCHAU or **Kaschau** (Latin *Cassovia*) s to Hungary, Higher Theres, esp. Abtweiss, beautifully situated in a valley enclosed by sloping vineyards, r bank Hernad, at the confluence of the Csernel, 124 m N.E. Pesth. It consists of the town proper nearly in the form of an oval, intersected by the Csernel which here forms an island crossed by several bridges and of several suburbs and in proportion to its size, is one of the best-built towns in Hungary. Its principal buildings are the cathedral, a large and venerable structure in old Gothic, with a lofty tower covered with copper and adorned internally with fine gildings, carvings and sculptures the church of St. Michael also Gothic but of small dimensions the Protestant church, neither handsome nor well situated, the old Jesuit church, surmounted by two towers, the court-house, the townhouse, commandant's house the bishop's palace and several splendid mansions of the nobility the Ursuline convent, the gymnasium normal school, schools of design and music, a large and handsome infirmary a public library of 10,000 vols a theatre, and several hospitals. The manufactures and trade are not of much importance. The former consist of leather work, cloth, hats, tobacco, stone-ware, paper, and gunpowder and there are also brick and stonework, limekilns, stone and slate quarries. The trade is partly in these articles of manufacture, but chiefly in wine. Kaschau is the seat of a bishop and the seat of several superior courts and public offices. It was first surrounded by walls in 1270, and has repeatedly suffered both from war and from fire. Both German and Latin are said to be generally spoken here in great purity. Pop (1846) 18,700.

KASHAN, s to Persia, prov. Irak Ajem: 90 m S. Isfahan lat. 34° N. lon 51° 30' E, in a fertile and productive plain. It is about 8 m in length E to W and upwards of 15 m in breadth, and contains a royal palace, many fine mosques, bazars and caravanserais. Coloured and flowered silks of great beauty are manufactured here also carpets and cotton cloth. All kinds of copper utensils are made, and the artists are skilful workers in gold and silver. The houses are infested with scorpions. Pop. 80,000.

KASHGAR, s to Central Asia. See **CASHGAR**.
KASHIN, s to Russia, gov. of and 80 m N.E. Tver lat. 57° 25' N. lon 37° 35' E, on the Kashtuka a tributary of the Volga. Though old and ill built, it is rather a stirring place. The chief employment is tanning, and there is also a manufacture of some tannin, which produces a kind of paint used in the tanneries. It has no fewer than three monasteries, and 25 churches, though its population is only 4947.

KASHIRA, s to Russia, cap. circle of same name gov. of, and 60 m N.N.E. Tula, on the Kashtka, a small stream which joins the Oka. Pop. (1850) 5133.

KASHMIR a country, Asia. See **CASHMERE**.

KASHINA, **CASHWA**, **KASHKHA** or **KATSWA** s to Central Africa, cap. princip. of same name, 85 m. N.W. Kano, lat. 12° 59' N. lon 8° 30' E. It is surrounded by clay walls, enclosing a very extensive space, of which not more than one-tenth is built upon the rest being laid out in fields or covered with wood. Most of the houses are in ruins, in consequence of the preference given to Kano, since the Fallah conquest of the Kashtuka, about 4 m. E. of the other buildings, resembles a large village. The manufactures are chiefly tanned bullocks hides, and various articles in leather; and the trade, though greatly decayed, is still considerable. The inhabited houses number about 700.

KASKAKTIA,—1 A tn, U States Illinois, on the fork near the junction of the Kashtuka and Mississippi lat. 37° 50' N. lon. 89° 50' W. It contains a courthouse, jail, R. Catholic church, a nursery and female boarding-school, with 800 dwellings.—2 A river same State. It rises about lat. 40° 50' N. lon. 89° 50' W. flows S.E. and falls into the Mississippi, lat. 37° 48' N. lon. 89° 40' W. after a course of about 200 m. It is navigable, in high water up to Vandalia, 150 m.

KASMARK, or **KEMARK** (Latin, *Forum Cassorum*) s to Hungary, co. Zips, pleasantly situated r bank Poprad, not far from Mount Tatras, the most elevated of the Carpa. Tatras, 11 m. N.W. Leutschau. It is an ancient place, once surrounded by double walls, and still entered by three gates and consists chiefly of a number of long streets, lined by tolerably well built houses. It contains a R. Catholic church, a handsome structure, with a fine crucifix and high altar, a handsome church, a Protestant church, large, but only of

wood, a townhouse, with an elegant tower, an old castle, in ruins, a Protestant lyceum, with library and cabinet of natural history, and a R. Catholic high school, and has important manufactures of linen and linen prints, of which about 800 000 sets are annually exported, and a considerable trade also in wool and wine. The removal of the old walls, and the occupying of their site by orchards and gardens, have made the environs very pleasant. Pop. 5000.

KASPI LA, a river Russia, which rises in the W of gov. Simolensk, flows W. N.W. past Porotshok, enters gov. Vitebsk, and joins the bank S. Dwina, at Saraj after a course of about 80 m, the greater part of which is navigable.

KASSABA s to Asiatic Turkey, push. Karamania, 50 m N. Konia. It is built of stone, is surrounded by a wall flanked by redans and has some handsome gates of Saracenic architecture. It has a well supplied bazaar.

KASSATUTCHY one of the Aleutian isls. It is a mountain rising at once out of the sea. The crater on its summit is said by the inhabitants to be full of water.

KASOGOWITZ, or **KASOWITZ**, a market in Bohemia, circle Psekau, 31 m N.W. Pluck, with a church, school, townhouse, hospital, the ruins of the old cast. of Kaschitz, and a trade in cattle. Pop. 1251.

KASSEI a vil. Bavaria, Lower Franconia, dist. Orb, with a church and oil bark, and flour mills. Pop. 1036.

KASSIMOV s to Russia, cap. circle of same name, gov. of and 70 m P.N.E. Ruzan lat. 54° 50' N. lon 41° 20' E. It stands on a height formed by the bank of the Oka, which here takes the name of Balinka, and is surrounded by a wall along which a walk has been formed. The streets are narrow and crooked and though there is excellent building-stone in the neighbourhood the houses are of wood. Its manufactures are ropes, virtual leather and particularly, earthenware. Many of the inhabitants are Tatars, who carry on a considerable trade with the East by way of Bokhara, in furs, and silk and cotton goods. Under the Tatar dominion Kasimov had the name of Goroletsk, and was a place of note as is shown by numerous interesting ruins in the town and neighbourhood. Pop. (1849) 7781.

KASSON a country W. from Senegambia traversed by the Fouta-Ng of Bambar, intersected by lat. 14° 30' N. lon 11° W. It was formerly a powerful state, formed by colonies of Foulas from Fouta-Jallon but is now a prey to anarchy the inhabitants, particularly on the bank of the river being exposed to the oppression and depredations of the Bambaras, the scourge of the country. The Foulas of Kasson are far inferior to those of Foulon, in religion, manners, and every other estimable quality. Thieving and assassines are their prevailing vices. Having little agriculture, or industry of any kind, they are very scantily supplied with the necessities of life. Some of the more adventurous engage in hunting the elephant or go in caravans into the neighbouring countries, bringing back articles wanted for export to Europe.

KASTAMUN, s to Asiatic Turkey. See **CASTAMUN**.
KANTELELORIT Asiatic Turkey. See **CANTERIDGE**.
KASIELLUIT, or **CANTLELUIT** s to Tyrol. See **CADRETT**.

KATORFA, or **KASHIN** (anc. *Chalcedon*) s to European Turkey, Macedonia, on a peninsula stretching into Lake Kastoria, 28 m. S. Monastir. Pop. 1800.

KATRI a vil. Greece. See **DALMATIA**.
KASIRIKUM or **CARTICUM** s to vil. Holland, prov. N. Holland, 16 m. S.W. Amsterdam. It has a neat church, with a heavy tower surmounted by a spire and a council house, with a school under the same roof. Near this village the British and Russian met the Dutch and French troops, on 6th October 1799 and, after thirteen hours fighting, and heavy loss, were obliged to retire.

KASZA, **Koma**, or **KOENKA**, a market in Hungary co. of, and 12 m. N.E. Tretschin on the Wag here crossed by a stone bridge. It has a R. Catholic parish church, a castle, and manufactures of linen. Pop. 1083.

KASZON (Miso or *Masyan*) a market in Hungary, co. Boregh 18 m S.W. Munkacs, with two churches P. 1477.
KATA (Nagy) a market in Hungary, co. ut, and 31 m. E.S.E. Fesh with a R. Catholic church, a castle, and a trade in corn and wine. Pop. 851.

KATAFANGA one of the smaller Foege isls. lat. 17° 30' S. lon 179° 2' W (s.), of volcanic formation, and

about 150 ft. high, isolated during the turtle season only. On its N. E. point are some bays, and it produces in abundance sugar-cane, fruit, and vegetables.

KATAGUM, or **KATASOOM**, a tn. Central Africa, Senegal, cap. prov. of same name, about 230 m. W. Lake Tchad lat. 12° 17' N., lon. 11° E. It is in the form of a square, the sides facing the cardinal points, with four corresponding gates. It is defended by two parallel walls of red clay and three dry ditches, one without, one within, and the third between the two walls, which are about 30 ft. high, and 10 ft. broad at the base gradually decreasing upwards. The house of the governor which stands in the centre of the town, and those of the principal inhabitants, are built entirely of clay that rots, with square or semicircular openings for windows. Pop. 7000 to 8000.—The province is bounded E. by Bornu, and W. by Kano. Its principal productions are grain and bullocks which with slaves from the adjoining territories, are the staple articles of trade. It can send into the field 4000 horse and 20,000 foot, armed with bows and spears.

KATÁLINFALVA, or **KATÁRMEFELD**, a vil. Hungary, Thibster Thess., co. Torontal, in a fertile district 11 m. N. E. Batschke, with a R. Catholic church. Pop. 1864.

KATÁNSKA a river Amur Russia, which issues from a lake in gov. Yeniseisk, lat. 68° N. lon. 96° E. flows first E. N. E. then N. E. past the town of Katamka, and falls into a bay of the same name in the Arctic Ocean after a course of about 600 m. Its principal affluents are—on the r. the Pajugal and on the l. the Medvaja and the Noraja.

KATCHA a river Russia, gov. Taurida. It rises on the N. side of the mountains of Edla, in the S. of the Crimea flows W. N. W. and, after a course of about 45 m. falls into the Black Sea, below Manaschak, and 18 m. N. Sebastopol.

KATCHALLA, or **KATCHEMUL**, one of the Nicobar islands, Bay of Bengal S. W. from lat. Camorta, lat. 8° N. point 8° 1' N. lon. 93° 38' E. about 13 m. long N. W. to S. E. and about 9 m. in greatest breadth. On the N. E. side is a deep bay but greatly encumbered with coral reefs as is also all the E. side, and indeed to a greater or less extent, the whole coast of the island. On the S. side a heavy surf beats, but on the S. W. side is a deep bay which, though also partly filled with coral reefs is clear in its N. part, and presents anchorage. On the shore here are some villages, but elsewhere, the island being thickly covered with wood, seems uninhabited.—*Siem Hild. Bericht über die Reise der Corvette Galathea im J. 1843* (1844-47).

KATHARINENBERG, several places, Bohemia, particularly—1. (for *Katerberg*) a mining tn. circle of, and 24 m. N. N. W. Saaz, among mountains, on the Schwitz. It contains a parish church and has several mills and smelting furnaces. There are mines of silver and copper in the hill on which the town stands. Pop. 1250.—2. A vil., circle Bunzlau, on the Raxa Nidse, at the foot of the Drachenberg in a wild, romantic district, surrounded by steep, but well-wooded hills. It has a school and worked and cotton mills. Pop. 617.

KATHEB, prov. India beyond the Ganges. See **CANARY KATHU**, a tn. Barnah, r. bank Irrawadi, 154 m. N. Aye. It is a thriving and increasing place, of about 400 houses, and its bazaar is well supplied with vegetables, fresh and salt fish, pork, dried cotton-seeds, sugar-cane, and rice. It is also supplied with British goods and inferior stock. There is a large wooden, beautifully carved *kyoung* or monastery on the banks of the river which are bare lofty and not more than two fathoms apart.—*Four Asiat. Soc. Journ.* (April, 1857).

KATIF, or **KU-KATIF** a dist. and seaport, Arabia, on the Persian Gulf, in lat. 26° 25' N. lon. 50° E. about 85 m. N. W. Bahrein. The bay, on the W. side of which stands the town of Katif is formed N. by a long, narrow, sandy neck, and S. by a flat, sandy plain. The bay is 70 m. wide at the entrance—the points terminating it respectively being Ras-el-Tamrah and Zaharan and in the middle is the island of Tarik, 10 m. long N. W. to S. E. well watered, and covered with date-trees. A bank, projecting from the island, divides the bay into two channels, of which the E. is extremely shallow. The anchorage in the R. channel is well sheltered, but on a sandy bottom, and a long way from the town. On the S. side of the bay, where there are several villages, the water is so shallow that, even from boats, people must land by

means of camels or horses. Respecting the town of Katif, we have only obsolete accounts by Arab writers. The place is so unhealthy that it is thought dangerous to spend even a single night in it. It contains some good houses and outside of it is held a weekly market, well supplied with meat, grain, dates, and water-melons. About 3 m. off, in the S. side of the bay is a fort. Wheat and barley are here less abundant than rice, to the cultivation of which is ascribed the subsistence of the place. In the gardens, between the desert and the sea-shore, are numerous bakhets. The fruits cultivated are figs, pomegranates, mangoes, apricots, grapes, citrons, and lemons.—The district embraces nine walled and seven open villages, containing a population of 25 000; of which number 6000 belong to the town and suburbs. The place is said to have little trade, Bahrein having engrossed all the commerce of the coast.—(Capt. Sadler *Trans. Asi. Soc. Bombay*.)

KATILABUGA, a lake, Russia, prov. Bessarabia, 18 m. E. N. E. small greatest length 18 m. greatest breadth 8 m. It communicates with Lake Tschupran, Sulfan, and Kodschegol and sends its waters to the Danube.

KATRAGAM, or **KANDIRKANAM**, a celebrated place of Hindoo pilgrimage in Ceylon 118 m. E. S. E. Colombo. Here within two enclosures, are a number of temples erected to Hindoo deities and two belonging to the Buddhists. The principal temple is that dedicated to Skanda the god of war and so great is the veneration in which the shrine of this deity is held, that pilgrims from every part of India resort to worship it, frequently bringing with them pots of water from the Ganges at Benares.—(*Ceylon Gazetteer*.)

KATHINE, **CATERAN**, **KATERNER**, or **KETHOR** (Loom), a lake Scotland, on Perth 5 m. E. Loch Lomond, and 8 m. W. Callander. It is of serpentine form 10 m. long, in some places 2 m. broad, and remarkably deep with an island near its E. end and commonly called the Lady's Isle. It is enclosed by lofty mountains, and rocky ravines clothed with trees, and receives numerous mountain streams. At its E. end is the celebrated pass of the Trossachs, rendered famous by Scott's *Lady of the Lake*. Through this pass a stream flows, carrying the surplus waters of the lake to Loch Achray.

KATSCHALINKA, a tn. Russia, gov. Don Cosacka, l. bank Don, 36 m. N. W. Tzaritsin lat. 49° 5' N. lon. 40° E. Its only importance is as an entrepot for the produce of N. Russia, which, brought by the Volga to Donbavia, is carried by land to Katschalinak, and thence by the Don. P. 4189.

KATSCHER or **KATZES**, a tn. Prussia, prov. Sillesia, gov. and 41 m. S. Oppeln, on the Dreybach. It has two chateaux a synagogue, and hospital, manufactures of cotton and woolen cloth; several dye-works, a tobacco factory a weekly market and five annual fairs. Pop. 3639.

KATT, a tn. Central Asia, Khelat of, and 27 m. N. Khiva, on the canal of Jernynash surrounded by a dilapidated wall, and consisting of houses which are almost all ruinous. It contains about 40 shops. Inhabitants chiefly Tartars.

KATGESAT, or **KATGEAT**, a large arm of the N. Sea or German Ocean. In a more general sense it sometimes includes the Skager Rack, but is more properly confined to the sea, which has Sweden on the E. and Jutland on the W. united by the Slinger Rack on the N. and communicates by the Sound and the Great and Little Belts, with the Baltic on the E. Thus restricted, its length, from N. to S., is about 150 m. and its central breadth nearly 90 m. It is of very unequal depth and is not only very shallow towards its shores but has a number of sandbanks—one of them near its centre, and dangerous to navigation. The only islands of any consequence it contains are Læsø, Anholt, and Samsø.

KATTYMAR, a vil. Hungary Hither Danube, co. of and 45 m. N. Bacs, with a R. Catholic parish church and a trade in corn wine, and cattle. Pop. 5440.

KATTYWAR, a dist. Hindoostan, Golewar's dominions, peninsula of Gujarat, near its centre. It contains no town of any consequence. It derives its name from its inhabitants, called Kattys. The name is also at times applied to the whole peninsula.

KATUNGA, or **EXBO**, a tn. W. Africa, esp. Yoruba, 61 m. S. Boom lat. 5° 59' N. lon. 4° 25' E. situated on the side, and around the base, of a small range of granite hills, huge masses of which threateningly overhang the valley below. The town is surrounded by a wall and ditch, the

former of mud, and 20 ft. high, with 10 gates. There are seven different markets, which are held every evening, and where the chief articles exposed to sale are yams, corn, plantains, bananas, vegetable-butter, seeds of the cocoyam, which form a great article of food, sweetmeats, goats, fowls, sheep, and lambs, also native cloth, and various instruments of agriculture. Near the town are the houses of the king and those of his women, which occupy 1 sq. m., and have two large parks attached.

KATWIJK AAN DEN RIJN a vil Holland, prov S. Hol land, 4 m. N.W. Leyden, intersected by the Rhine, here crossed by a fine stone bridge. It is a neat wall built place; has a Calvinistic church, townhouse, weighhouse and two schools. Pop. agricultural, 1906.

KATWIJK AAN DEN RIJN a vil Holland, prov S. Holland 8 m. N.W. Leyden, on the sea-coast, at the mouth of the Rhine. It has a Calvinistic church orphan hospital and two schools, is inhabited chiefly by seamen and fishermen, possesses four herring-boats, which fish mostly on the English coast, off Yarmouth, and has sloven herring-curing establishments. Some support themselves likewise by gathering shell fish and by cultivating potatoes. Pop. 3204.

KATZBACH a river Russia, prov Silesia. It rises near Schöna, flows N past that town to Goldberg when it turns E.N.E. passes the towns of Irgnitz and Farchwitz, and about 5 m. below the latter joins 1 bank Oder, after a course of about 40 m. On its banks, in 1813, the Prussians under Blücher defeated the French.

KATZENFLENNBOGEN a market in Nassau, 16 m N.W. Wiesbaden. It has an old castle, in which the counts of the name were wont to reside, four mills, and a smelting-furnace supplied from iron mines in the vicinity. Pop. 902.

KATZHTUL a vil Germany, principally Schwarzburg-Rudolstadt, at the confluence of the Katze and Schwarz. It contains a parish church, and has a blast-furnace, and other extensive iron works. A lead mine is worked in the vicinity. Pop. 1185.

KATJEBUREN, a town in Latvia, circle Swabia, cap. dist. of same name on the Werth, here crossed by a bridge, 48 m N.W. Mithua. It is surrounded by walls has a court of justice, several public offices three churches, four chapels, to one of which pilgrimages are made, a Latin in- dustrial and agricultural school, an orphan, and ordinary longtail manufactures of linen cotton and woollen dye- works, bleachfields, paper and iron mills and a trade in corn and cattle. Pop. 12,405 dist. 77 717.

KALFUNGEN (Osnab.), a town in Hesse-Cassel, Niederhessen, circle and 5 m S. Cassel, on the Looze with alum pits, coal mines, and paper-mills. Near it is the ancient abbey founded by the Empress Kunigunde in 1008 and suppressed in 1527. Pop. 2800.

KALNITZ, or **KONICE** a vil Bohemia, circle and 8 m N.W. Karzin with two churches, a castle, school and hos- pital manufactures of potash, and several mills. P. 1148.

KALZEM a town Bohemia, cap. circle and on a stream of the S.E. of Prague. It consists of the town proper surrounded by a wall, and of several suburbs, con- tains a deservy church, two chapels a townhouse, hospital, and porthouse, and has a trade in cattle. Pop. 2170.

KAUTH, **GAUTZ** or **KAUTZ** a vil Bohemia circle of and 20 m W. Hlaton, with a chapel school courthouse, and cattle manufacture of linen and several mills. Pop. 1063.

KAUTOKIYNO a vil and par. Norway. Russark on the Alten, about 180 m. S.W. Hammerfest. It consists of small wooden houses generally well constructed and is visited by the merchants from Torsh, who barter articles of hardware, and other necessaries, for the skins of reindeer, birds, sealers &c. furnished by the Lapland inhabitants.

KAYALA [anc. *Nepolia*] a maritime town Turkey-in- Europe, in the S.E. of Macedonia, N side bay of same name, 80 m. E.N.E. Salonika; lat. 40° 55' N, lon. 24° 25' E. It is surrounded by a wall in bad repair, and defended by a fort, situated on a rock. The chief objects of notice are the market-place, which is of great extent; and an aqueduct, which supplies water from the neighbouring mountains. The harbour is small, but a considerable trade is carried on in tobacco and cotton. Pop. 4000.

KAYEN, or **CAZVETZ ISLAND**, Marshall's Archipelago, Caroline Islands, N. Pacific Ocean. This group, consisting of

64 islands, is 80 m. long, N.W. and S.E., and 11½ m. broad. Kaven, the largest, 2½ m. by ½ m. is in lat. 8° 54' 21' N; lon. 170° 48' E. Good water may be obtained in some of the islands, but provisions are not abundant.

KAWBCHANI a town Russia, prov Bessarabia, cap. circle of same name, 1 bank Botna, about 12 m. S. Bender. It is walled, but poorly built consisting of wooden houses, and narrow ill-lighted streets. It has a Greek and an Armenian church a synagogue, a mosque, and mineral springs, with several bathing establishments. A great many of the inhabitants are Jews, who engross nearly all the trade which is carried on. Kawbchani was once a large and flourishing town of nearly 20 000 inhabitants, but is now in a very decayed condition.—The climate though of great extent, is thinly peopled and remains in a waste and deserted state.

KAYIB, an isl. N Pacific, Russian America lat. 59° 48' N lon. 144° 28' W (n). Viewed from the E. it presents the appearance of two islands. The E. is a high table- rock, free from trees or vegetation and of a whitish hue the other is moderately high land for this region with three low peaks, its lower parts being well wooded. Towards the sea, the island terminates in a kind of bare, sloping cliffs, with a narrow stony beach at their foot and interrupted with some gullies, in each of which is a rivulet or torrent, and the whole surmounted with a growth of smallish pine-trees.

KAYS RHEIG [anc. *Cassio Rhod*] a town France dep. Haut-Rhin 7 m. N.W. Colmar, agreeably situated near the source of the Welsch, which issues from Lake Hottent. It has manufactures of coarse cottons, as well as cotton, flax and hemp-spinning mills dye works, and tanneries, and some trade in the wines of the district, which are of good quality. Kayserberg was anciently a place of great strength, and in 1293 was declared a free imperial town by Adolphus, king of the Romans. Near it a hill which rises over Lake Rhod is crowned by the ruins of the castle of Kayserberg. Pop. 8056.

KAYTS, a seaport and vil, in Mandchouree or Leydon, off N coast in Ceylon Palik a Strait, at the extreme end of a harbour which is formed by an opening, about ½ m. broad between Karadive and Mandetree, connecting the lake of Jaffa with the sea. Its harbour affords safe anchorage for shipping at all seasons of the year and is much frequented by country craft and small vessels. The village contains a small Catholic church and a convent. The greater part of the inhabitants are fishermen. Fish is exceedingly plentiful and there was formerly a depot for clankers here.

KAYVA a market in Russia, gov. Orenburg, circle Omsk, near the S.W. frontiers of the gov. It carries on an active trade. Pop. 1800.

KAZA, or **KAZO** a vil Hungary Thither Theloz, 10. Bored about 30 m. from Mikotom, on the Sajó, with a Pro- testant church, and a trade in corn, wine, and timber. 1 4553.

KAZAN a town gov. Russia. See KASAN.

KAZANKA a river, Russia. See KASANKA.

KAZANKSAIA, a town Russia, gov. Don Cossacks 1 bank Don, on the frontiers of gov. and 150 m S.S.E. Voronez. It has a large church, and a great number of well furnished shops, and is famous for its cutlery particularly sabres.

KAZBEK, Caucasus. See KASAKK.

KAZEMBE, or **KAZEMBE**, the title of a sovereign in the interior of Africa, whose dominions occupy a very important position in the geography of that country as viewed under the relations of intercourse and commerce. The capital, or residence of the Kasembe, is named Lescenia, and stands in the land of Kuchinga, in about lat. 9° 30' S lon. 29° 16' E. It occupies a position easily defended and selected probably on this account, being nearly surrounded with water. At a little distance to the N.W. and S.W. flows the river Luapula, N.E. to the lake Nyassa on the E. close to the town, in the marsh or lagoon called Moiva, which, being connected with the Luapula river down forms a protection on the E. while the Bengeli, Cassoga, and other streams, running into the Luapula and Moiva, impede the access from the W.

Position, Extent, &c.—The extent of the Kasembe's domi- nion can be traced, on express authority only in the directions W. and S.E., but the outline may be completed by probable inference with little risk of error. About a month's journey W. of Lescenia is the highland of Luboko or Lubulu, through which the road continues W. as far as the river Catanga,

where it turns to the N.W., nearly in the meridian of 24° E. Some parts of the territory of the Kazembe, 850 m. W. of his capital, and that of the Munyema begin. The highest of Leburi, which seems to have an extent of 80 or 80 m. W. to E. is remarkable on two accounts, first, it is at the head of two great valleys running in different directions, namely, that of the Laila (the main branch of the Zambezi) which goes N.W., and that of the Luviri, which falls into the Laila, and runs easterly to the E.; and, secondly, it produces in abundance two of the most important articles in the traffic of the African interior, namely salt and copper. Numerous streams run S. or E.W. from these heights, and are collected by the Lualaba, which joins the Laila. The distance between the Lualaba and Luviri is about 150 m. Many rivers cross the road between them but to which valley they hasten is not known, there is reason however to suspect that the separating ridge in this latitude (10°) between the basins of the Laila and Luviri is near the meridian of 24° E. Towards the S.E. the authority of the Kazembe reaches about 150 m. to the Zambezi (called, by the Portuguese, the New Zambezi) which river descending from the highlands round the S. extremity of the lake, takes a curvilinear course, N.W. and N., till it enters the Luviri. There is no reason to believe that the sway of the Kazembe extends beyond or N. of the Laila in the neighbourhood of his capital nor yet to any distance E. for in that direction the Kafue, and beyond them the Munyema, on the shores of the lake, are his determined enemies. S.W., or along the course of the Zambezi, and up the Luviri, we have no information beyond vague indications of a vast extent of marsh. But the relative importance of an African king would be imperfectly estimated from the superficial extent of his territory. The Kazembe is master of a large portion of the established line of communication across the African continent. This line, marked out by nature and the only route across hitherto distinctly traced proceeds from Congo up the valley of the Laila and then down that of the Luviri to the lake, round which, but chiefly on the E. side, is a great demand for the salt and copper of Leburi. At the S. end of the lake, and in the hilly country S. of the new Zambezi, are tribes wholly mercantile, who continue the traffic to the coast. In the interior of Africa, where the people travel on foot, it is evident that there can be no frequent road where there is not a line of population, and the Kazembe is sovereign of such a line for 500 m., it is probable not only that his authority reaches but a short distance laterally from this line, but that it diminishes also as the distance from the capital increases so that the chiefs near the Lualaba and Zambezi are rather his unwilling tributaries than obedient subjects and while they acknowledge his sovereignty exercise, in most respects, a complete independence.

Face of the Country.—Of the 350 m. of territory to the W. 250 seem to be highland or elevated plains but the descent into the valley of the Luviri conduces to a totally different region which extends, with slight exception nearly to the Zambezi, and presents low swampy tracts, stagnant waters and sluggish streams and occasionally traces of great size and luxuriance, which reminded the Portuguese traveller Lucinda, of the forests of Brazil. The most intimation of rocky heights and rugged grounds comes in reference to the copper mines, which are situate near the W. limit of the Kazembe's empire. There, we are told the ground is all strewed with green stones (copper ore). On the high ground between the Lualaba and Luviri, game, antelope, zebra, and water-fowl, particularly geese, seem especially numerous they assemble in thousands round the sumnerous shallow marshes. Elephants, on the other hand, frequent the low and well-wooded country along the Zambezi. The country immediately N. of Lucinda was, at the end of the last century infested by lions to such a degree that the villages were all deserted.

Zemba.—The rivers within the Kazembe's line of territory are extremely numerous but it will be sufficient here to enumerate those which are not fordable, though we cannot answer for the constancy of this condition. The Lualaba is 400 yards wide at the town of I uburi, which stands apparently on high ground, and where it is at least 1500 m. (allowing for windings) from the point where it reaches the sea. The Luviri has a width of 25, the Luviri of 112 yards at the

factory; we have no account of its magnitude near Lucinda, after it has been increased by the numerous rivers of the plain. From Lucinda N.E., the lowlands are overgrown in the wet season with lagoons, which the traveller is obliged to wade through for hours at a time. The rivers, though many, are fordable. The new Zambezi, though a great river during the rains, is ordinarily but 50 yards wide, and easily forded. The Zambezi, a branch flowing nearly parallel to it on the N., is deeper and more violent, though narrower. From the Zambezi to the Kazembe half way to Lucinda, extends the populous country of the Fimo Lipido, nominally a vassal of the Kazembe.

Climate and Vegetation.—The climate of Lucinda and the surrounding country is extremely insalubrious, the air being constantly loaded with the exhalations of stagnant waters, into which is periodically swept the decomposing waste of a rank vegetation. Fever, dysentery and ophthalmia are the prevalent complaints, and so severe their attacks at times, that the site of the town has been changed in consequence more than once, though never removed beyond the limits of the malarious region. When strangers complain of the cold climate of Lucinda, they really mean to describe the chilling sensation produced by an atmosphere loaded with humidity the uniform heat of the climate is attested by its vegetation. Palm wine is in the greatest abundance, bananas of several kinds, growing wild everywhere, the sugar-cane is common Sesamum and some other oil-plants are cultivated as well as batatas, pumpkins, and various fruits but the chief food of the people is manioc or cassava, which like their field produce they reap and sow indifferently at all times of the year—the ordinary practices being when they pull a stem, to plant another in its stead. The rains are abundant and regular beginning, probably in October and continuing till March.

Cattle, &c.—The Kazembe regards the possession of horned cattle as a royal prerogative. His subjects have only a few goats but to make up for the want of domestic quadrupeds, they breed fowls in abundance and take great quantities of fish as well as game cattle here graze for browse perhaps only by night and sleep during the day. The chief does not kill his cattle for beef because he looks upon them as Fimo (that is, nobles) his himself never does he give them to others for that purpose because he requires all their blood for his medicines.

Trade.—The chief source of the Kazembe's revenue lies in the produce of his salt pans and copper mines. There are several salt marshes at Curucurigi and Payenge, in the low country N. and S.W. of Lucinda, resembling probably the more famous salt marsh of Quigila, at the confluence of the Luviri and Lualaba. But the salt of Quigila is nothing more than an alkaline lye, obtained by washing the ashes of saline plants that grow in the marshes and are burned during the dry season. There is said, however to be a deposit of rock salt in the same district, which may explain the reputation of those mines, as they are called. It is remarkable that the Kazembe's people, who take fish in great abundance in their lakes and rivers, are ignorant of the art of salting it and thus lose a great resource, for salt fish is in constant demand in the interior and reaches Lucinda from both coasts. The copper is made into small bars, which with green stones (malachite and other copper ore) are carried across the lake in great quantity. With these productions, the Kazembe and his people satisfy all their wants. Among the treasures of the former are silk robes, shawls chinaware and printed cottons. These, with beads, cowries, and various trinkets, assorted by the Bantus, chiefly arrive from Kilwa and Zanzibar. He also possesses a few muskets and ammunition.

Race, Manners, &c.—The nation who possess Lucinda and its neighbourhood and who may be regarded as the Kazembe's own people, are the Arunda or Alunda (in the singular Arunda), whose original seat was at the head of the valley of the Luviri, between the Catemba and Lualaba. In the original country of the Arunda the soil is left uncultivated, the industry of the people being confined, by unmemorial custom, to the mines of salt and copper. Such a custom obviously implies a commerce of equal antiquity, and the Arunda, in their new settlements, exhibit, in their want of domestic animals, and in their agriculture confined merely to the necessary supply of food, the continued influence of ancestral habits. With trade, on the other hand, they are acquainted,

and having seized its main channel, they exhaust by luring impostors on it. They are described as tall, strong, and well made Negroes, who within six days, nor more, nor mark themselves with incisions. In war they are rendered formidable by a certain degree of military discipline and organization. Their arms are a spear, a broad-bladed knife, and an oblong shield of very light wood. They acknowledge a creator of the world, but worship only the shades of their ancestors. The dread of witchcraft, and of the acconations springing out of the belief in it, keeps them in perpetual alarm. Every month the Kasembe's doctor compounds the great medicines which he to preserve the chief insect from witchcraft, mixing with it the blood of a human victim. This medicine in the form of a thick ointment, is smeared on the points of horns of various kinds, which are hung up within and around the Kasembe's dwelling. The ordinary dress of the M'vunda is a cotton cloth or wrapper from the waist to the knee bordered with red and fastened with a broad leathern belt. On great occasions a handsome kind of shirt is worn with a broad red-coloured border, and gathered with ample folds in front, the arms are loaded with beads and rings of copper, the feet covered with string shells, and the hands adorned with plumes of handsome feathers. The women, on whose fall all the labour of the house and field, and who are no better than slaves, are physically inferior to the men. Polygamy is allowed and indeed the social rank of a M'vunda depends chiefly on the number of his wives. There are no marriage ceremonies, beyond carrying home the bride, riding on a man's back. Funerals are celebrated with great pomp and expense. When the Kasembe dies, he is buried with all his property, including some wives and slaves and there is a license to rob on all his lands for several days. But such occasional license is counterbalanced by habitual rigour, death and mutilation, particularly loss of the hands, are ordinary and frequent punishments, and those who become obnoxious to the king or people, even without criminality are easily sacrificed by the charge of witchcraft.

History.—It was about the year 1740 according to the native traditions, that Ganga Ahluonda, who, originally a slave, had been appointed lord of the salt marshes of Quilete, carried his arms E. and expelling the Yafira occupied the land of Kasembe. Perhaps it may be inferred from this account that the officers (slaves) of the M'vunda, boldly adventuring with utruqa and fustian (C'unga means priest or wizard) and breaking bounds in the direction suggested by the active trade which he witnessed rendered himself at once independent. The new sovereign, however, while appropriating the mines entrusted to his care, nominally acknowledged the supremacy of the M'vunda and the latter is still styled Father (that is, superior) by the Kasembe whose title seems to signify Little King or Viceroy. In 1798, Colonel Lacerda, an experienced and accomplished traveller was selected by the Portuguese government to visit the Kasembe, respecting whom information had been received through Creole traders settled on the Zambezi. That zealous officer after a three-months march, reached his destination but died of fever before he entered the town. His followers, a very numerous body remained ten months in Luanda and owing to their miscomport, suffered much on their return. The Kasembe compensated their much solicitation, to allow two soldiers to pass westwards to Angola, but this arrangement never took effect. In 1803, two Janissaries or native mercenary travellers started from Angola with instructions to proceed to the E coast. Delayed by the jealousy of various chiefs, they did not reach the Kasembe till the last day of the year 1806. They afterwards proceeded S.E. to Tete on the Zambezi, delivered their letters, and returning by the same road arrived in Angola in 1814. In 1831 a second Portuguese expedition, numbering 480, was dispatched from Tete to the Kasembe, with whom it remained four months, but of its results nothing has been divulged. We only know that Colonel Monteiro, the leader of the expedition, described the Kasembe as 'a robber, who charged the highest prices for his provisions' but there is reason to believe that the Kasembe could retort with perfect justice in language equally severe. His father, who received Lacerda's followers—a body far too numerous for the scanty resources of African hospitality—manifested towards his turbulent and dissolute visitors such lenience generosity,

and consideration. When alarmingly ill, he particularly requested that, in the event of his death, his people would not hurt the M'vunda (white man), who were merchants and strangers. The direct communication across the continent, the establishment of which was among the objects of the Portuguese expeditions, is diametrically opposed to the policy of the native chiefs, who prefer a trade from hand to hand, each striving for monopoly.—(Bovdwin's *Discoveries of the Portuguese*, Das Neves, *Uncovering the secrets of the Portuguese*, do; 1880; *Annuaire Maritime y Colonies* 1842-6.)

KAZBROUN, a tn Persia, prov Fars, 60 m W Shiraz, in a rich and fertile valley, 30 m long by 7 m or 8 m wide about 2800 ft above sea level; lat. 29° 37' N lon 51° 35' E. It takes its name from Kazz fortresses, its fortifications being strong and the gates covered with iron. It is surrounded with date plantations, and consists of a central portion, composed of houses clustered round the residence of the authorities, and numerous houses scattered in gardens round about. Though once a place of great importance, and containing 50 000 to 60 000 inhabitants, its population is now under 5000. The ancient Shapur or Chapur stood in the immediate neighbourhood, and is still indicated by numerous ruins of great interest to the antiquary.

KAZIMIERZ, several places, Russian Poland, particularly—1 A tn w Poland, 37 m N Kunin, surrounded by walls and having an old Bernardine monastery. Pop 1126.—2 A tn w Poland and 25 m W W Lublin between rocky heights, near a bank Vistula. It has some general trade, and was the scene of an action between the Poles and Russians, April 10 1831. Pop 2189.

KAZINCZ, or KAZO, a vil Hungary, Elther Theles, co. Rorled 12 m N W Makolok with a Protestant church, synagogue and the ruins of an old castle. Pop 1031.

KECEZ, a vil Hungary co. and 85 m W Pesth with a church and a trade in corn, wine, and cattle. P 3089.

KEDDAH, or **QUNDA**, a state and in Malay peninsula. The state lies to the south of the Caran river, lat. 5° to the Talavay river, lat. 7° N. It is thus 140 m. in length, with an average breadth of 50 m. It is traversed by numerous streams, generally flowing in a W direction, among which are several navigable by the common trading vessels of the Malays. The coast is studded with islands, but owing to the shallowness of the water large vessels must keep at a considerable distance. It contains several lofty mountains—the highest, Gunung-Darat or Keddah peak, a mass of granite, rises to a height of 3000 ft. N from this mountain is an immense plain, almost level with the sea, and covered near the coast with a belt of rising mangroves, from $\frac{1}{2}$ m. to 1 m. in breadth. The plain is of gentle elevation, bounded to the E. by a small chain of hills, 16 or 20 m. inland. Out of this plain rises abruptly a remarkable one called Elephant Hill of an oblong shape, about 1 m. in length, and $\frac{1}{2}$ m. in breadth, composed of cavernous limestones and calcareous breccia, containing fossil shells. It presents on every side bold and craggy precipices, between 300 and 400 ft. in height, with a number of needle-like pinnacles, shooting up like the spires and turrets of a cathedral. Gold, tin, and iron, used to be found formerly in Keddah. Rice, coco-nuts, plantain, betel nuts and fruit-trees of different kinds, are amongst the vegetable productions of this territory but at present the state of agriculture here is in most places at a low ebb. This state was conquered by the Siamese in 1821. Pop. estimated at 21,000.—The town the capital of the state, stands on both sides of the entrance of the river of that name on lat. 6° N. lon. 100° $50'$ E. to 1'. The river has sufficient depth of water within for sloops and brigs to anchor and is navigable for 10 or 12 m. further up.

KEDDINGTON, par Eng. Lincoln 1190 ac. P 166
KEDDI a vil, W Africa, Fouta Damga, 1 bank Senegal lat. 15° $46'$ N. lon. 13° $2'$ W. It is inhabited by a small number of very laborious families, who cultivate millet.

KEDGEBEF, or **KIKIAN** a vil Hindoostan prov Bengal x bank and near the mouth of the Hooghly here almost 9 m. across lat. 21° $52'$ N. lon. 88° $16'$ E. where, during the rainy season, freshets are often obtained by long freshets. In the banner many of the tropical fruits and other refreshments are to be procured.

KEDINGTON or **KEITON**, par Eng. Suffolk and Essex, 2542 ac. Pop. 772

KEDIRI an E. prov. lat. Java, S coast esp. of same name bounded, N by provs. Rembang and Soerabaya, E. Pannoorocan, S. the Indian Ocean, and W. provs. Patjutan and Madelon. Its S. coast is comprised of steep, rocky cliffs, in which a few edible birds nests are found. The interior of the province is well watered by the Kediri or Brantas and numerous other streams and torrents and yields rice, sugar and cinnamon, as its chief products. It is well wooded, formerly beset with tigers, and has several good roads. Pop. 460,000

—The town, 60 m. S.W. Soerabaya, 1. bank Kediri, here crossed by one of the most beautiful bridges in Java, is the residence of the governor has a small bazaar, and a mosque, built from the ruins of a temple. In the environs are numerous remains of an antediluvian and prehistoric age—probably of temples destroyed by the Mahomedans to preserve materials for mosques. To the E. are the considerable ruins of Sencol and Pseudong. Pop. 6000.—The river, Kediri or Brantas is formed of two streams, the one rising in prov. Pannoorocan, and flowing W. and then N.W. meets with the other which, rising near the S. frontier of prov. Patjutan, flows E. and N.E. the united stream formed about 20 m. S. Kediri, flows N. and E., and falls into the strait of Madura. One arm at Soerabaya, the other 25 m. further E. at Bangli. It is one of the most considerable streams in the island, and flows through a beautiful and fertile country. Tidal course, from junction of the two head streams, about 100 m.

KEDJE, a vil Belochistan, cap. prov. Mekran, 1 bank Dunes, or Moockaev; lat. 26° $12'$ N., lon. 67° $12'$ E. The chief or cap.—which from its being also called *sest* or *palace*, was probably intended both as a fortress and the residence of the chief—stands on a high precipice, naturally so strong, that the natives consider it impregnable. The ruins is at the base of the eminence on which the fort is built, and surrounds it on three sides. It was once a place of some importance, and carried on a considerable trade with Kandahar, Kelat, Shir-

poor &c., but the insecurity of property and commerce under the reign of Kadir, has driven away the Hindoo and other opulent traders, and the town, and at one time to have contained 8000 houses has much decayed.

KEDLESTON, par Eng. Derby, 950 ac. 1 op 83

KEDOE a prov Java. See KADOB
KEDROV or **KEDON** a brook Asiatic Turkey Palestine, near Jerusalem. It flows through the valley of Jehoshaphat, but is dry in summer, and sometimes even for years. It flows S.E. from the city, towards the Dead Sea, through a magnificently wild gorge.

KEDYWARRE, an offset from the W. side of the Sata, the great E. mouth of the Indus (Sunda) lat. 24° $7'$ N. lon. 67° $28'$ E. It is broad and shallow, but, excepting the Huzarara branch, is the only navigable channel by which access can be gained to the main stream.

KEKEKO MODRI KAMER, or DWAGENWEIS a market in Hungary Hither Danube. Co. seograd in a narrow valley 1 bank Kőrös, 1½ m. S E E Kapfen, in a district extensively covered with chestnut plantations. It has a fine old castle and five annual fairs. Pop. 1645

KELAN, or **KALAN** a small Isl. Indian Archipelago, off the W extremity of Ceylon lat. (W pond) 5° 12' S. lon. 127° 40' E. (N.), 20 m. in circumference. It contains good timber but its vegetable produce, as a whole, is scanty and its inhabitants few.

KELAT LAIAT or KHAIAT the cap city of Beloochistan and of prov of same name, and residence of a khan on the E declivity of a hill called Shah Miran, 6000 ft. above the sea, lat 29° 8' N lon 65° 45' E. Its form is an irregular oblong 600 yards long N to S and 500 yards wide E.

THE KANDAHAR GATE AND FORT OF HERAT—From Sir A. Keith Johnston's *Thames to Afghanistan*

to W surrounded by a mud wall about 18 ft high, flanked, at intervals of 250 yards, by bastions, and pierced with innumerable loopholes for muskets, but not surrounded by cannon, because scarcely able to support their weight. The wall has

three gates and near the W side, where it skirts the summit of the ridge, stands the *Mari* or Khan's palace, which, although of some antiquity dating from the time when the country was governed by Hindu princes, is only an irregular collection of mud buildings, with flat terrace-roofs. The town has a miserable appearance, houses wretchedly built of mud, strengthened by wooden frames, and streets filthy in the extreme. The bazaar occupies nearly as much space as the town, and is well supplied with wares and provisions both cheap, and of excellent quality. There are two suburbs, one to the S., and another to the N W. in which the houses consist of half burnt bricks with wooden frames, and project so far into the streets, that the opposite upper stories almost meet. To the W of the town for a considerable distance, are ravines and low barren hills, to the E. a cultivated plain about 1 m. wide, with numerous gardens, which produce large supplies of fruits—apricots, peaches, grapes, almonds, pomegranates, figs, quinces, &c. A large number of Afghan merchants are domiciled at Kelat and derive a considerable transit trade between Sindh, Bombay and Kandahar. There is also a little retail trade, and a few manufactures, a steady making of muskets, swords and spears. The trade and prosperity of the country have suffered much from the introduction of a debased coinage to which the necessities of the rulers have tempted them to resort. Kelat was stormed by the British in 1839 when the khan was killed fighting sword in hand. In the following year, it was recaptured by some intrepid Belooches, from a weak garrison of Sepoys and the British officer in command put to death, but was soon after taken again by the British. Pop. in and suburbs, 12 000.—The province bounded N N E and W by Saravac, and S and S.E. by Jalalwan; lat. 28° 32' to 29° 12' N lon. 65° 25' to 66° 50' E, is about 100 m. in extreme length, by 40 m. in extreme breadth, area, 2000 sq m. No part being below 5000 ft. above sea-level it is extremely cold in winter though sufficiently agreeable in summer. In the former season, a piercing N. E. wind blows without intermission, and, often with great violence bringing heavy falls of snow aloft, and rain.

KELAT I GURZAI (Port of the Ghilgies a fort, Afghanistan, 63 m. N. Kandahar on the route to Ghazni, lat. 33° 30' N lon. 65° 45' E. It occupies a conical and very steep hill, about 800 ft. high having on its summit spaces for a considerable fortress, and two abundant springs of water. It was garrisoned by the British, who successfully resisted all attempts to dislodge them and were withdrawn without loss, on the evacuation of the country, in 1842.

KELBRA, a town Russian Saxony gov and 43 m W by N Merseburg, on the Helme and Golden Aue, with two churches, and an old and other mills. White and red slate, susceptible of a fine polish are found in the vicinity. P. 1073.

KELHAM par Eng. Notz 1885 as 1. 157

KELHFIM a town Lower Bavaria, cap. dist. of same name, on a height above the Ludwig Canal where it joins the Danube which is here crossed by a bridge of 14 arches, 11 m. S W Regensburg. It consists of the town-proper and two suburbs is entered by four gates, and wall built. It contains four churches and an infirmary, and has manufactures of potash, several mills and quarries, a building yard, and a trade in corn. Pop. in 1809, dist. 17 141

KELIOUB a town and dist. Lower Egypt, both in the upper part of the delta of the Nile. The town is 10 m. N Cairo, r bank Nile, lat. 30° 10' N; lon. 31° 17' E. It has a large government cotton factory and iron foundry. The district, or province of which it is the capital, is mostly on the 1 bank of the Damietta branch, and between it and the most E arm of the Nile.

KELSO a tn. New S. Wales, co. Roxburgh on the Macquarie river near Bathurst 112 m. N. W. Sydney.

KELSO a market in bor of Harrow and par Scotland co. Roxburgh. The town is beautifully situated near the confluence of the Tyne and Tweed, on the bank of the latter which is here crossed by an elegant stone bridge of five arches 88 m. S. E. Edinburgh, a station on the Berwick and Kelso railway. It consists chiefly of four streets, paved and lighted with gas, diverging at opposite points from a spacious square, used as a market place, houses mostly of freestone and in general handsome. It has a respectable townhouse in the Grecian style, two established churches, one of which is a fine Elizabethan structure with a quadrangular tower 70 ft. high, a Free, and two L. Presbyterian churches, a small but neat Episcopal chapel, and place of worship for Reformers, Presbyterians and Original Seceders, a number of good schools, including a grammar and several other schools, a dispensary, three public libraries, two new-rooms, a school of arts, and a physical and antiquarian society possessing a valuable museum. Being situated in the midst of a populous and wealthy agricultural district, its retail trade is considerable, forming in itself its chief dependence. Still it has some manufactures, of which those which are sent to all the neighbouring parts of the English and Scottish, for the most important branch. A good trade is also done in dressing sheep and lamb skins, and in currying leather. There is a large iron foundry, and some woollen, linen, and stockings are manufactured but to a limited extent. Races are held in spring and autumn. In the outskirts of the town are the magnificent ruins of Kelso abbey founded and endowed by David I. in 1128 for Trinitarian monks. It is in the form of a Latin cross, and is a fine specimen of the early Norman style of architecture. It was twice burned during the contest between Bruce and Balliol, suffered severely at the hands of the English in 1523 and 1545, and what remained of its furniture and decorations were entirely destroyed during a popular tumult in 1550. In the immediate vicinity of the town, also, is Flenas Castle, the seat of the ducal family of Roxburgh. Kelso was originally a kind of suburb to the ancient borough of Roxburgh, destroyed by James II. in 1600 which stood on the opposite bank of the Tweed. It owes its rise to the foundation of the abbey. Pop. 4783. Area of par 4400 ac. Pop. 5634.

KENDAL, or KIRKBY KENDAL, a yard bor., market tn., and par, England, co. Westmorland. The town is agreeably situated in a valley 16 m S.E.W. Appleby, a bank Kent, here crossed by three stone bridges, and on the Lancaster and Carlisle railway. It is the site of three principal streets, one of which is 1 m. long, and several subordinate streets or lanes, most of which are Macadamized, have foot-paths paved with

pebbles, and are kept in good order. The houses in the former are handsome edifices of hewn limestone, roofed with blue slate, those of the latter are mostly in the old style of rough stone plastered over. The town is well lighted with gas, and amply supplied with water. It has an elegant town-hall and assembly rooms, an ancient, but large, and a handsome modern Established church, and places of worship for various Dissenting bodies, a Friends meeting-house, a R. Catholic chapel, a free grammar, and other endowed and charitable schools, a widows' hospital, two nurse-houses, a mechanics' institution and library and a natural history society, with a valuable museum. The principal manufactures are coarse woollen cloth, lumpy woolsey, knitted stockings, and Guernsey frocks. Carpets of various sorts and valentia and other fancy articles for wastecots are also made to a considerable extent. There are, besides, tanneries, corn, paper, gunpowder and other mills, and many persons are employed in manufacturing combs, fish hooks, and wool-cards. The market obtained in the neighbourhood is esteemed excellent, and the working and polluting of it form an important part of the trade of the place. Kendal returns a member to the House of Commons. Registered electors (1851) 8801 Pop. 11,229 Area of par, 68,380 ac Pop. 18 323.

KENT.—1, A maritime co. W. Avarilla, about 68 m. E. to W. and varying from 22 to 50 m. in breadth. Its coastline is extremely irregular being serrated with points and capes, and deeply indented with bays and curves. In the N W part of the county is a lofty mountain called Kynningmont about 2500 ft high. 2 A maritime co. Van Diemen's Land, bounded N. by the river Hoon and D'Entrecasteaux Channel, and on the E. and part of the W. by the Southern Ocean. County town, Margate.

KENT a maritime co. England bounded N. by the Thames and German Ocean, E. and S. E. by the latter and the Strait of Dover S. by Sussex, and W. by Surrey and having, on its E. and S. coasts, the N. and S. Forelands and Dungeness. Area 953 580 ac. of which 940 000 are arable, meadow and pasture. On that part of the coast bounding the estuary of the Thames, there are numerous examples both of the gam and low land by the sea. The cliffs on the Isle of Sheppey which is situated here, and which are from 60 to 80 ft high decay rapidly so as having been lost in 20 years, between 1810 and 1880 and the church at Minster now near the coast, is said to have been in the middle of the island in 1780. Similar ravages are going on at other parts of the coast. Off the E. shore lie the well-known Goodwin Sands (see Sand), between which and the mainland is the equally well-known realistic called the Downs. Kent may be designated a jolly county, being divided by two nearly parallel chains of chalk hills, which traverse the county W. to E. terminating in lofty chalk cliffs at Dover Folkestone, and Hythe. Many of these hills rise from 400 to 550 ft. above sea level. The district between the chalk range and the estuary of the Thames is mostly occupied by the plastic clay which immediately overlies the chalk. The space again S. from the range or between it and Sussex is called the Weald, and was formerly an immense forest. This portion of the county comprises Romney Marsh which occupies its S. E. corner and consists of about 24,000 ac. The climate of Kent is in general mild and genial. The soil may be divided into the gravel, chalk, and clay which produce where they mix in due proportion an extremely fertile loam. The alluvial soils along the Thames and Medway, and in Romney Marsh, produce some of the richest pastures in the kingdom. Generally speaking the soil of the F. division is believed to be superior to that of the W. Agriculture, particularly in the former is in a very advanced state. Kent is the principal hop county in England, and wheat, barley, peas, and beans are raised in large quantities. Canary raddish and Spanish seed, &c. are very extensively cultivated and fruits and garden vegetables are abundant. The Weald contains a great deal of natural grass land producing a vast quantity of excellent hay. The pastures in the marshes are of considerable extent and are appropriated to the fattening of cattle and sheep the latter including a peculiarly fine breed known as the Romney Marsh sheep, which fattens early and produces long combing wool. I. culture of every sort is large and fine and game, including hares, pheasants, and partridges, numerous the pheasants being esteemed the largest and finest-flavoured in the kingdom. The principal towns in Kent are Canterbury Rochester Greenwich, Deptford, Woolwich Gravesend Dover Maidstone Hythe &c. all of which are connected with London by railway. 1 spec. of all kinds is manufactured in the county but the writing papers are more especially noted for their quality, cotton manufactures to a limited extent, are likewise carried on, and there are silk, compass, and calico-printing works, distilleries, and gunpowder mills. Julius Caesar's first landing in Great Britain was in Kent. Kent returns 18 members to Parliament, of which four are for the county. Registered county electors (1861) E. district, 6997 W. district, 6280 Pop. 515,766.

KENTSTOWN, par. Irel. Munster; 2331 ac. Pop. 289.

KENTUCKY, one of the U States, bounded N by Ohio and Indiana, N W by Illinois, N by Missouri; E by Tennessee, and E by Virginia; lat. 36° 22' to 39° 10' N; lon. 81° 40' to 89° 44' W; greatest length, E N E to W S W, about 400 m., breadth, 170 m.; area, 40,500 sq. m. The surface, though somewhat mountainous in the S E, has in general little elevation and may be considered as an inclined plane, sloping gradually towards the Ohio, on the N, and the Mississippi, on the W. Along the banks of both these rivers is a low alluvial tract, overflowed when the water is high and behind this tract is another, from 5 m. to 20 m. wide, which is hilly and broken. In the S W, a third tract, situated chiefly between the Green and the Cumberland rivers, is called the Barrens and, though not so bad as its name would seem to indicate, cannot be called fertile. With these exceptions, the whole state is gently undulating, and possesses an excellent soil, either covered with forest, in which the black walnut, black cherry, hickory, white maple, mulberry, ash, cotton wood, and white thorn, are prevailing trees, or under regular cultivation, producing excellent crops of wheat, tobacco, and hemp, which are the staple productions, and also abundance of Indian corn, rye, oats, barley, buckwheat, flax, and potatoes. The most common fruits are apples, pears, peaches, and plums and the pastures rear vast numbers of horses, horned cattle, sheep, and swine. The vine grows wild, and is partially cultivated; the cotton plant also thrives well and a large quantity of sugar is produced. Few states are better provided with water communication. The Ohio forms the boundary, on the N and N W, for 637 m. and receives from within the state numerous tributaries, of which the most important are the Cumberland, Kentucky, and Tennessee the Mississippi, after receiving the Ohio forms the boundary on the W. The most valuable mineral products are iron, coal, salt, and lime. The last is found in almost every part of the state, at the depth of about 8 ft. below the surface, and forms the predominant geological formation often presenting stupendous precipices along the banks of the rivers, and containing numerous remarkable caverns, of which one, called the Mammoth Cave, 130 m. from Lexington, on the road to Nashville, has already been explored to a distance of 18 m., which is believed to be scarcely a beginning of its vast extent, it is said to contain 226 avenues, numerous rivers and catacombs, and to be filled with enormous stalactites and stalagmites. The manufactures of this state are not yet very largely developed. Besides domestic manufactures, they consist chiefly of woollen and cotton goods, iron and brownware, gunpowder, leather, soap, and spirits; and the most important articles of trade are grain, tobacco, hemp, salt, sugar, livestock, bacon, and lard. Kentucky originally formed part of Virginia, but was separated from it in 1792 and admitted into the Union in 1792. Its government consists of a senate of not more than 35, and not less than 24 members, elected for four years, or one-fourth annually and of representatives elected annually and apportioned every four years among the counties according to the number of electors. The governor is elected, for four years, by the people, and a lieutenant-governor, to take the place of the governor in case of absence or death and to preside in the senate, is elected at the same time. For administrative purposes, the state is divided into 104 counties. The seat of government is Frankfort, but the oldest and finest town is Lexington; and the largest and most commercial, Louisville all of which are connected by railway with the N and E states. Pop. (1840) 779,814. slaves, 122,258 (1850), 293,844, slaves, 211,227.

KERTUCKY, a river, U States, which rises in the state to which it gives its name, being formed, in the Cumberland Mountains, by three principal branches, called the N, middle, and S Forks. It flows easterly to N W, past the town of Frankfort, and, after a course, which directly is only 112 m., but indirectly 260 m. joins I bank Ohio at Carrollton. When the water is high, it is navigable by steam-boats of 800 tons to Frankfort; and, though its course is generally through a deep rocky bed in some places overlying by limestone pre-laps 800 ft. high, its navigation has been so much improved, that vessels drawing less than 6 ft. can proceed at all times up to the junction of the S Forks.

KERKEI (Nagy), a vil. Hungary Thutlar Thutlar, co. Bihor on the little Körös, 14 m. from Groszwardeln, with a parish church, and a trade in corn and cattle. Pop. 1050.

KERENK, a tn. Russia, gov. and 91 m. W S W Pensa, on the Volg, esp. of a fertile and well-wooded dist. of same name. It has five churches and manufactures of sailcloth. Pop. 6984, dist. 40,008.

KERENZEN, a vil. and par. Switzerland, gen. and 6 m. N N E Glarus. It has an ancient parish church, considerably resembling a castle, and some trade in fruit and dairy produce. Pop. 1535.

KERERA, a isl., W coast, Scotland, co. Argyll, off Oban, and forming between it and the mainland, the beautiful Sound of Keren. It is about 4 m. long, and 2 m. broad, with a rugged surface exhibiting a singular combination of primary rocks, and trap rocks, and contains the ruins of a Danish fort. Alexander II. died here in 1249, when on his expedition for the invasion of the Western Isles, then under the dominion of Norway, and a few years later, Haco of Norway was met here by the island chiefs, who agreed to assist him in his descent on the coasts of Scotland.

KERESLEY, a hamlet, England, co. Warwick, about 3 m. N N W Coventry, with a neat church, a Wesleyan chapel, a school, and a number of neat residences, belonging to people of business in Coventry. Pop. 440.

9

KERESBOON, or **KERABOON** [anc. *Pharosia*] a seaport to, Asiatic Turkey, S. coast of the Black Sea, 75 m. W. Trabzon, lat. 40° 57' 15" N., lon. 38° 34' E. (a) on the extremity of a rocky promontory, crowned with the masthead by a few wooded ridges of a pleasing and picturesque appearance. On the highest point of the former are the ruins of a Byzantine fortress, from which a strong wall with Hellenic foundations, stretches down to the sea on both sides. The town, at present in a ruinous condition, consists of 700 or 800 houses inhabited by Turks, Greeks, and Armenians and has some trade in exporting copper, alum, oats, and the wood of the walnut tree.

KERESZI (Neczi), a market in Hungary, Hither Danube, co. Bacs, on the Urn, here crossed by a bridge about 14 m. from Léva. It has a parish church an elegant castle with gardens, and a trade in fruit and cattle. Pop. 955.

KERESZTES several places, Hungary particularly.—A vil. Thutler Danube, co. and 5 m. N. W. Stuhlweissenburg with a church and several mills, Pop. 1289.—2 (Meczi) A market in Thutler Thesau co. Borsod, in a somewhat marshy plain 15 m. E. S. E. Erlau, with a church, a national school three mills, and a trade in corn and wine. Pop. 6737.—3 (Meczi) A vil. Thutler Thesau co. Bihar 12 m. N. W. Grosswardein with a church and considerable trade in corn and cattle. P. 2037.

KERESZTI, R. with prefixes, numerous places, Hungary particularly.—1 A vil. Hither Danube, co. Bacs, 10 m. J. Perth with a church, and a trade in cattle. Pop. 2741.—2 (Nemci) or *Hilgen Kereszt* A market in Thutler Danube, co. and 4 m. S. Oedenburg with a church, a synagogue, and a square turkoid castle chalybeate springs with a bathing establishment, which is much frequented, and a trade in wine. Pop. 2602.—3, (or *Hilgen Kereszt*) A vil. Thutler Danube, co. Eisenburg 23 m. S. W. Eisenburg-Ager on the Leysen with a church. Pop. 970.—4 (*Heiz*) A vil. co. Tereosol on the Thesau 5 m. from Szegedin with a church, and a trade in cattle and swine. Pop. 1062.—5 (*Szoci*) A vil. co. Borsod in a plain on the Hajó, 8 m. from Makoloz with a church, and a mill. Pop. 1363.—6 (*Sar*) A vil. Thutler Danube, co. and 10 m. from Stuhlweissenburg on the morass of Szaroth, in a flat waste and sheep district with two churches. Pop. 1785.—7, (*Tóth*) A vil. Thutler Danube co., and 20 m. from Oedenburg with a church. Pop. 562.—8, (*or Kóly*) A market in Thutler Thesau co. Szabolcs, 94 m. S. E. Kacsau with a Protestant church. Pop. 1461.

KERESZTUFULVA, or **KERESTOOR** a vil. Hungary Transylvania, Szekler Udvarhely etabli on the great Kócsi 12 m. E. N. E. Schiburg with three churches and a school. Pop. 1279.

KERET a lake, Russia, in the W. of gov. Archangel, about 15 m. E. of Lake Topozero lat. 56° N., lon. 32° 30' W. It is about 20 m. long by about 9 m. broad, and contains a large island.

KERQUELEN'S LAND or **DEMOLATION ISLAND**, an isl. Indian Ocean, extreme W. point, Cape Louis lat. 49° 3' S. lon. 68° 18' E. (a) It is about 100 to 120 in length 60 in breadth at the widest part, is, perhaps, the most barren spot in either hemisphere, at the same distance from the pole. It is deeply indented by bays and bays, the most remarkable of which is Christmas Harbour at the N. extremity of the island. It is in the form of a horse-shoe, the shores on each side are formed of steep rocks rising, in a succession of terraces, to the height of above 1000 ft., and the bend of the bay is a level beach of fine dark sand. The accompanying map of it is taken from a height of 600 ft. The surface of the island is intersected by numerous small lakes and water-courses the latter when swollen by heavy rains, rushing down the sides of the mountains, and along the ravines, in countless impetuous torrents. The N. extremity of the island is entirely of volcanic origin and some of its bold headlands present a striking appearance from the sea, the trap rocks of which they are composed form a succession of various nearly

horizontal. Basalt is the prevailing rock, assuming the prismatic form, and passing into gneiss and the various modifications of amygdaloid and porphyry. The general direction of the mountain ranges inclines to the S. W. and N. E.

CHRISTMAS HARBOUR, KERQUELEN ISLAND.—From Sir J. Ross's Antarctic Expedition.

varying in height, generally from 500 to 2500 ft. Several of the hills have crater shaped summits, which have evidently once been volcanic vents, but the most remarkable geological feature in the island, is the occurrence of fossil wood and coal imbedded in the igneous rocks. Debris, produced by disintegration from atmospheric causes, is accumulated at the base of the hills in many places to the height of 200 or 300 ft. The climate, although rigorous, supports a perennial vegetation and scarcely any of the plants, even the grasses can be called animals. Though in a comparatively low latitude its vegetation is decidedly antartical, and consists of comparatively few species. Of flowering plants, it has only 18 species, less than the number in Melville Island, in the Arctic Sea, and three times less than the number even in Syntberg. The whole known vegetation of the island only amounts to 150, including sea weeds. The Pringlea, a kind of cabbage in high favour with men, is peculiar to it and grass together with a plant similar to the *Bohax* of the Falkland Islands, covers large tracts. About 20 species, only of lichens and mosses are found here. No land animals have been seen on the island, or are known to exist on it and seals, formerly plentiful have been annihilated, or driven from the coast. Sea-fowl are numerous, and of great variety of species.—(From a *Antarctic Expedition*.)

KERIS, or **KRIS** a vil. Built on Little Tibet, on a large alluvial flat just above the junction of the Shayuk and Indus, 89 m. N. W. Serinagar or Cashmere. It is the largest vil. place in that part of the valley of the Shayuk, and is surrounded by a very extensive belt of fine irrigated clay, of which a section exposed to the E. of the village is at least 50 ft. thick. The prevailing rocks of the district are granite and slate.

KERJETZ, a river, Russia, which rises in the S. of gov. Kostroma, enters that of Nijni-Novgorod, flows S. E. and after a course of above 150 m. joins the bank Volga, about 3 m. above Makarev. Its chief affluents are the Saakia, Kozlotz, and Mochna.

KIRKA Taro, or **TITRE** [anc. *Tarus*], a river, Hungary, Delmatia, which rises in the Erakozaberge belonging to the mountains of Topoglia, about 12 m. E. Ktn, flows W. past that town, then, easterly, S. S. W. to Scardona, where it forms a lake, it subsequently forms a second lake, and falls into the Adria, near Sebenico, after a course of above 32 m. It is navigable to Hradovo by vessels of 20 tons, but above that town, is much encumbered by rocks and water-falls. Some of the latter are very picturesque. The principal affluent of the Kerka is the Gocla.

KERKENI [anc. *Cervena*]. See **KARINKA**.
KERKHAH, a river Persia. See **KERAN**.
KERKINET (Gur or), Black Sea, N. coast, on the N. W. side of the Crimea, and between that peninsula and the

mainland. The gulf is about 45 m. wide at its entrance, gradually diminishing to about 10 m. Entire length, about 80 m. On the N side of the Gulf, and near its entrance, is the long sandy peninsula, called *Djeragatah*, extending S.E. and about 30 m., and enclosing an extensive harbour on turning from the E. where it is 4 m. broad, with a depth of 4 to 8 fathoms. This peninsula is a year after year growing larger. The gulf becomes very shallow at its N.E. end.

KERKOOK, or **KIRKOOK**, a v. in Turkish Kordistan, 146 m. N. Bagdad, lat. 35° 27' N.; lon. 44° 27' E., on a plain. The greater part of it is in ruins, but a number of mosques still remain in the town and suburbs. There are also several R. Catholic and Armenian churches. Streets narrow and filthy. It manufactures coarse calico and has a considerable trade in gall-nuts. There are numerous naphtha pits in the vicinity. Pop. about 13,000.

KERKRADE, a v. in Holland, prov. Limburg, 16 m. E. Maastricht, with a church and a school, and a convent, used as a normal school. Pop. 580.

KERKIKEN, a v. and com. Belgium, prov. F. Flanders, 16 m. S.S.E. Ghent, with extensive manufactures of linen, and a flour-mill. Pop. 1,277.

KERLOGH, par. Irel. Wexford; 280 ac. Pop. 37.

KERMAN, or **KIRMAN** (anc. *Carmanan*), a large prov. S.E. Persia, bounded N. by Khorasan, N.E. by Afghanistan E. and S. by Baluchistan. E. by Persian Gulf, and W. by Farsistan and Laristan, lat. 25° 30' to 31° 15' N.; lon. 54° 30' to 60° 25' E. Greatest length, N. to S., 980 m., greatest breadth, from E. to W., 545 m., area, about 500,000 sq. m. It is naturally divided into desert and habitable regions. The former lies to the N., and particularly to the N.E., where is the Desert of Kerman a barren frightful waste, in which whole armies are said to have perished. There is no water and the ground is so impregnated with salt that vegetation is absolutely extinct. For a stretch of 90 m. not a blade of grass is seen. The S. region is generally mountainous. A chain of mountains, proceeding from the N. of Laristan stretch almost across the country in the direction of Baluchistan, and throw off ramifications to the S., where, after skirting the coast, they retire for a considerable space, and make room for a plain which is very fertile, and is called by the natives the Paradise of Persia. The most fertile portion of the province is Noor-mahdi, in the E., which, contrary to what may be considered as the inveterate case with the other districts, is tolerably watered by mountain streams, and, consisting of rich black mould yields an abundant produce. Along the coast are numerous date plantations, for which, indeed, the district of Mogestan is so famous, as to be called the land of dates. The crops raised, where land fit for them can be found, are oats, maize and barley. Excepting the dates and the grapes which, in particular spots, is said to be remarkably fine, the fruits are of indifferent quality, but white roses succeed well and are cultivated for their attar. There are also occasional tracts of wood with numerous trees which yield a gum equal to that of Arabia. Cattle and sheep are raised in some tracts the wool of the latter is fine, and the hair both of the goats and camels of Kerman has long been celebrated for its length and fineness. Considerable attention is paid to the silk worm, and the quality of the silk is said to be excellent. The inhabitants on the coast are much employed in fishing but the pearl fishery, once so famous, has ceased to exist. Metals are abundant. Gold is mentioned, but only iron and copper have yet been wrought. Sulphur also, of excellent quality is plentiful. The inhabitants consist of Persians proper, who occupy the W. N. and middle districts Guebres or Parsees, whose number does not exceed 40,000. Uds or wandering tribes, including Baluchians, who have their locality in the E., in the district of Noor-mahdi, and several tribes of Arabs, chiefly in Mogestan. The province is governed by a beglar-beg, who resides at the town of Kerman, and has several bakins under him, but Mogestan belongs to the Imam of Muscat. Pop. about 600,000.

KERMAN GHERIZAR, or **SINDJAI**, a to. Persia, cap. above prov., at the W. extremity of an extensive plain, and so near the hills, that two old forts built upon them completely command it. lat. 30° 45' N. lon. 56° 35' E. It is surrounded by an earthen wall, and besides the citadel, containing the palace in which the beglar-beg resides, it has numerous mosques and baths, eight large, and a great number of smaller excavations, and

a well-furnished bazaar. Its manufactures consist of shawls of camels hair, carpets, and muskats, for which it has long been celebrated. Though the trade is still considerable, it is small compared with what it formerly was when standing as a kind of centre between the Persian Gulf, the Indian Ocean, and the countries to the N.E. and W. It was the greatemporium for the trade of all these various regions. The greatest blow to its prosperity was the decay of the port of Gombroon, which Bushuk has, in a great measure, superseded. In 1794, it was taken by Aga Mahomet Khan, and given up to pillage. The most fearful atrocities were then committed, and not fewer than 80,000 of its inhabitants were carried into slavery. Its present pop. is still estimated at 20,000.

KERMANSHAH, **KIRMANSH** or **KIRMANSHAH** a to. Persia prov. Irak Ajemi, occupying two or three small hills at the W. extremity of a broad plain, near the bank Khurrah, 280 m. W. S.W. Teheran, lat. 34° 30' N. lon. 48° 37' E. It is surrounded by an earthen wall nearly 3 m. in circumference, has five gates and contains few buildings worth notice the most conspicuous being the bazaar, which is very extensive, and the mosque of the assembly. The town has comparatively little trade, but the routes from Bagdad, Shuster in the desert, Isfahan, by way of Hamadan, and Sulimash all meeting it, cause a considerable traffic through it, though much of it is not commercial, but funeral, consisting of friends bearing the embalmed bodies of relatives to be entombed in the sacred district of Karbala. The carpets and muskats made here have long been celebrated. Pop. (Kilman, 1810), 12,000 (Southgate 1884) 30,000.

KERNIASCHTJELVÄS, a v. Austria, Salvozana, about 6 m. from Gollumbus with a Greek church. Pop. 1990.

KERNS, a v. and par. Switzerland, on Unterwalden in a beautiful and fertile district watered by the Aa, 1 m. N.E. Schams. It is well built, and has a handsome church, with an elegant facade, and a spire 237 ft. high. Below Kerns the Kernsvald commences, and here the boundary between the Obwald and the Nidwald. Pop. 2395.

KILIANUK, a to. Borneo, near 1 bank Shary, 180 m. S.S.W. Kouka, lat. 11° 7' N., lon. 10° 29' E., cap. of the country of Loggan. The market is plentifully supplied with provisions by the Rhousa, for which they are paid in tobes and blue cotton in stripes, which the people of Loggan dye of a beautiful colour. Pop. 15,000.

KERNYAJA, or **KERKATA**, a v. Hungary Hither Danube, co. Bacs, in a plain near Mount Tescsaka, 6 m. from Zombor with a church, and a trade in corn, maize, hemp, and wine. Pop. 2810.

KERTEN, a v. in Khamsh Prussia, 40, and 15 m. W. S.W. Cologne, with a court of justice, a R. Catholic church, and manufactures of ironware, and a dyework. Pop. 1920.

KERI LAYES, or **KERPEMDOU**, a v. Hungary Transylvania, co. Nieder Weissenburg, about 48 m. from Karlsburg, with a Greek church. Pop. 819.

KERRY par. Wales Montgomeryshire, 21,480 ac. 1. 1930 **KERRY** a maritime co. Ireland S.W. coast, prov. Munster bounded N. by the estuary of the Shannon E. Limerick and Cork S. Cork and the Atlantic, and W. the Atlantic. Greatest length 60 m., N. to S., breadth 58 m. Area, 1,159,556 ac. of which 414,614 are arable. On the W. and S. it is rugged, rocky and mountainous, with deep valleys intervening but the N. and E. are remarkable for richness and fertility. Some of the mountains rise to considerable elevations, Carr Tual, the highest in Ireland attaining a height of 8404 ft. above sea-level, while several others reach 3000 and 3000 ft. These mountains are chiefly composed of red or gray conglomerate and sandstone, supporting banks of silicious flags, and overlaid in the low districts by fields of fossil limestone. Iron-ore is abundant in some of the mountains, and copper and lead also exist in the county. The subsoil is slate and red sandstone, with limestone in the low districts. Slate of a superior kind, and flagstone, are obtained in great quantities in the island of Valentia, on the S.W. coast. The counties of Kerry are remarkably and deeply indented with bays and inlets; the principal of which are the bays of Tralee, Brandon, Dingle, Ballysheehan, and the estuary called Kenmare river. There are also several islands on the coast, the chief of which are Blasket, off Duncannon Valentia, and the Skellig Rocks, on one of which there is a light-house. There are several considerable rivers

is the country of which the most important are the Fudo, falling into the estuary of the Shannon; the Mang, with its affluent, the Fudo; and the Lemo, the latter forming the Lakes of Kilmurry and both falling into Oostmans lake, and the Boughy, the estuary of which forms the upper part of Kilmurry river and several beautiful lakes, including those of Kilmurry—(which soil—enclosed on all sides by mountains, and, though small, singularly picturesque. The climate is cold and moist; the arbutus flourish in the open air, and vegetation generally is extremely luxuriant in the central parts, where the soil also is remarkably fertile, producing large crops of grain, and containing some excellent pasture land, which yields better of the finest quality obtained from the milk of the Kerry cow, which is noted also for its rapid fattening qualities. Oats and potatoes are the principal crops, though barley, beans, rye, wheat, turnips, &c., are also grown but agriculture generally is in a wretched state. Large flocks of goats are reared in the mountains. The fishery districts are Valentia, Dingle, and Listowel, together comprising 243 m. of maritime boundaries, which had, in 1860, 1093 registered fishing vessels, employing 4916 men and boys. The Irish language is almost universally spoken in this country, and ancient customs and superstitions preserve their ascendancy in a remarkable degree. In 1850 the number of children attending school was 21,254. The chief trade consists in exports of agricultural produce, mostly oats and butter. Linen and coarse woollens are manufactured in some extent, the latter chiefly for home consumption. Kerry is divided into eight baronies—Clannaree, Coraghery, Danheron, Glenarough, Inaghmore, Iveragh, Magalloway and Traughmore—and eighty-seven parishes, and returns three members to Parliament—two for the county and one for the borough of Tralee. Principal towns, Tralee and Kilmurry P (1841), 235,760 (1861) 258,239.

KERRY HEAD, a lofty promontory Ireland, co Kerry, S. of entrance to the Shannon.

KERLEY par Eng Suffolk 1510 ac. Pop. 714.

KERTUJ (non. *Pinnogues*), a tn. Russia, in the Crimea, on a tongue of land forming a peninsula of the same name, on the Strait of Kertle connecting the sea of Azof with the Black Sea, 130 m. E.N.E. Simferopol lat. 45° 30' N. lon. 34° 30' E. It is regularly and beautifully built, chiefly of stone obtained from the fine quarries of the neighbourhood, and possesses great natural advantages for commerce. In 1827 it was declared a free port, and an extensive lazaretto was built, at which all the vessels coming by the Black Sea perform quarantine. The number of vessels which touch at it in passing out the sea of Azof averages 400 and the number of coasting vessels is from 500 to 600. The greater part of the inhabitants are employed in commerce. It exports building stone, and large quantities of salt, obtained from neighbouring lakes, and its herring and sturgeon fisheries are very productive. Its site is that of the ancient Pantikapum, the residence and burial-place of Mithradates. The modern town is of very recent existence, and has risen up as if by magic and, by its increase, has prejudicially affected some of the other ports. Pop (1834) 3000, (1842) 10,000.—(Wagner's *Rundschau* Hommes de Hell Les Stages de la Mer Caspienne.)

KERTULÓ a vil Hungary co. and 24 m from And, with a church, a mill, and a trade in timber. Pop. 1227.

KERVEN a vil Rhineish Prussia, gov Cologne, circle Rhenish, with a R. Catholic church, manufactures of hardware, and dye-works. Pop. 1920.

KERVENEIM a tn. Rhenish Prussia, gov Düsseldorf, co. the Miers about 18 m. S.E.E. Cleves, in a marshy district, with a church. Pop. 300.

KERVENEIM a vil. Bavaria, Palatinat, near Gillingen, with a Protestant church. Pop. 1092.

KERVEN (French *Chervin*) a vil and par Switzer land, can. and 11 m. N. Fribourg, on a fertile hill above the Mosa. It is a very ancient place, and is supposed to have derived its name from the Latin words of *carverus*. It has a church and in the district a good deal of corn, wine, rapeseed, and tobacco are grown. Pop. 1008.

KESÉLYMEZŐ, or Keszövény a vil. Hungary, Tethys Thal, co. Marosvás, in a plain on the Nagys, 80 m from Szeged, with a Greek church. Pop. 1170.

KESGRAVE, par Eng Suffolk 1610 ac. Pop. 66.

KESHAN, or Kowsoo, a tn. European Turkey, Rumelia, 26 m. N. Gaship, a thriving place, consisting of about 300 houses, with a considerable trade. It lies at the edge of the valley or plain of the river Mariza, on the slope of a hill forming the S.W. termination of the range of Tekir Dagh, and at the junction of the great roads leading to Edne, Gallipoli, Saloniki, and Constantinople.

KESHIN, a small port, S. coast Arabia, prov Hadramout, about 460 m. N.N.E. Aden, a bay of same name. It is a straggling place, stretching $\frac{1}{2}$ m inland, and having a long sea front. It is the residence of a sheik, and carries on a small trade with Zanzibar and the Malabar coast, sending salt-fish to the former and money to the latter, and receiving in exchange millet, rice, cotton, cloth, dates, sugar, and coffee. It is one of the ports in which boats are laid up during the S.W. monsoon.—(Saunders's *Survey of the Coast of Arabia*.)

KESIL-BANI MOO, a lake, Chinese Turkestan, near the sources of the Irtysh lat. 46° 30' N; lon. 87° E. Length about 80 m. Greatest breadth, 25 m. It receives a considerable river on the N.E., but has no outlet.

KESIMARK, a tn. Hungary. See KESMARK.

KESKIE, a vil and com. Belgium prov and 18 m. E.S.E. Antwerp, on the Great and little Nibbe. It has manufactures of linen, two breweries, two flour-mills, and a trade in wood and coal. Pop. 1678.

KESSELD, Loo, a vil and com. Belgium, prov Brabant, on an affluent of the Dyle 15 m. E. Brussels. The inhabitants are chiefly employed in agriculture, selling their produce at Louvain. Pop. 1601.

KESSELDORF (Ossan and Kissen) two nearly contiguous vil. Prussia, prov Silesia, gov Lignitz, circle Löwenburg, with a R. Catholic church, a stone quarry, and several mills. Pop. 832.

KESSELDORF a vil. Saxony circle, and 6 m. W. Dresden, with a church, and some trade in wine and fruit. The Saxon and Austrian forces were here defeated by the Prussians in 1746. Pop. 446.

KESSELSLAIDT a vil. Hesse-Cassel, prov and scarcely 1 m. W. Hannau, a bank Mann, with a parish church manufactures of calico several distilleries, and a gypsum quarry. The castle of this county is in the vicinity. Pop. 610.

KESSENIEH, a vil. and com. Belgium, prov Limburg on the Mosa, 24 m. N.E. Hasselt. Pop. agricultural, 1067.

KESSERTI (Ese), a vil. Hungary co. Bihar on the Er 5 m. from Székelyhíd with two churches, and some trade in corn and wine. Pop. 1461.

KESSING isle. Indian Archipelago. See KESSING.

KESSINGLAND, par Eng. Suffolk, 1601 ac. P. 777.

KESTEBEN a vil. Holland, prov Gelderland, 14 m. W. W. Nijmegen, on the Rhine dikes, with a good-looking old church and a school. Pop. 532.

KISTEVEN one of the three parts into which Co. Lincoln has long been divided the other two being Lindsey and Holland. It comprehends the S.W. part of the county, extending N. and N.E. to the Foss Dyke and the Witham, and E. to a line drawn S. from the Witham, at the junction of the Kyme or Reaford, to the Witham, between Deeping and Croxland. Its most remarkable feature is the steep slope of Cliffe Row overlooking the valley of the Witham. Area of Kesteven, 710 sq. m. Pop. 92,897.

KESTOLOCE, or Keszövény, a vil. Hungary Euthar Danube. co. and 5 m. E. Gran, in a hilly district near Momi Pila. Pop. 1053.

KESTON, par Eng Kent, 1474 ac. Pop. 644.

KESWICK, a market tn. England, co. Cumberland, 22 m. R.W. Carlisle, most romantically situated on the Greta, in a valley surrounded by hills. It has many neat and commodious dwellings, a market house, handsome church in the early English style, and places of worship for Wesleyans and Independents. Blankets, hosiery, and other coarse woollen goods, are manufactured to a considerable extent, as are likewise black lead pencils, made of the well-known material obtained in the neighbourhood. On the Greta are several corn-mills, and a manufactory for spades, scythes, and other agricultural implements. The inhabitants, however, depend chiefly upon the visitors to the Lake of Derwentwater, and the romantic scenery in the neighbourhood. At Greta Hall, the immediate vicinity Robert Southey spent the latter years of his life, and died in March, 1843. Pop. 2618.

KESWICK, par. Eng. Norfolk; 799 ac. Pop. 194.
KESZLI, two places, Hungary.—1. (Mén-Keszli). A vil. Thibier Thales, on Borneo, on the Thales, 20 m. from Mikolok, with a church, a factory, and a trade in wine. Pop. 1108.—2. (Thel-Keszli). A vil. Thibier Danaba, on Tolna, 15 m. from Bismontoria, with a church, and a trade in corn, wine, and cattle. Pop. 1419.

KESZNETEN, or **Keszmeten**, a vil. Hungary. Hither Thales, on Zemplin, dist. and 13 m. from Tokay, at the confluence of the Tisza with the Thales, with a church and an active fishery. Pop. 1517.

KESZNETZ, or **Keszmetz**, a vil. Hungary. Banat, co. and 33 m. N. E. Temesvar. It has a church, and stands in a fertile wine district. Pop. 3675.

KESZTHELY, a market tn. Hungary. Thibier Danaba, co. Szabol, near Lake Balaton, and at the source of the Szabol, 87 m. S. W. Veszprém. It has an elegant castle, church, synagogue, a gymnasium, normal and other schools, manufactures of cloth, a sulphur spring, a trade in corn and wine, and quarries both of marble and basalt. Pop. 7410.

KET, a river, Assam, India, which rises in gov. Yant selak, about lat. 26° N. flows N. W. enters gov. Tonak, and joins r. bank Old about 18 m. above Naryn, after a course of above 500 m. Its banks are covered with dense forests.

KETIA, a river, Asiatic Russia, which rises in gov. Yenisek, in lat. 68° N., and lon. 90° E., flows first N. E., then nearly due E., and joins r. bank Khatanga, after a course of nearly 800 m. Its chief affluent is the Boganda, which it receives on the left.

KETOYIYAZA, a vil. Hungary. Thibier Thales, co. Bihars, 19 m. S. E. Cuhai. It has three churches and a castle, with fine gardens and a trade in corn and cattle. Pop. 8163.

KETEMBE, one of the Key islands (see text).

KETHEI Y, several places, Hungary, particularly.—1. A vil. Thibier Danaba co. and 18 m. S. Comorn, with two churches, a flour-mill, and a trade in cattle. Pop. 627.—2. (or *Meserodny*). A market in Thibier Danaba, co. and 18 m. S. S. W. Oedenburg; r. bank Rapce, with a church. P. 1960.

KETLE Y, a township, England, on Selkirk, par. and 1 m. E. Walsingham, containing an elegant church, ironworks and coal pits, smelting furnaces and quarries, producing a fine and durable stone. Pop. 2643.

KETOY, one of the Kurile islands. lat. (S. extremity) 47° 17' 30" N., lon. 152° 24' E. It is high and mountainous, and about 8 m. in circumference. Some rocks and islets extend for a considerable distance off its N. E. and E. sides.

KETNA, a vil. Hungary. Banat, co. Torontal about 20 m. N. W. Temesvar with a church, and a trade in cattle. P. 2482.

KETTEL, a vil. Hungary. Banat, co. Temesvar about 6 m. from Orsoyev with a Greek church. Pop. 3284.

KETSKEL, two places, Hungary.—1. A vil., on Puth, about 18 m. from Katakemet, with a Protestant church. Pop. 1569.—2. (Tz). A vil. near the former, with a R. Catholic church. Pop. 1690.

KETSKHMET or **Kucskemet** (Latin *Egypolis*) a market tn. Hungary. Hither Danaba co. and 60 m. S. E. Puth. It is one of the largest, if not the largest of the market towns of the kingdom, and is poorly built, consisting of ranges of long, narrow streets of low houses. It contains a R. Catholic, Greek non-mixed, and two Protestant churches, a synagogue, a Parast monastery, and gymnasium, and a head national school and has an extensive trade in horses and cattle, and five much-frequented annual fairs. The district around, which takes the name of the Katakemet basin, is part of a vast sandy tract or steppe, stretching for about 200 m. through the country of Puth and Little Ouzenna, between the Danube and the Thales. One may ride half a day in many parts of it without seeing a house or a tree. Pop. (1848) 40,000.

KETSHING, a market tn. and par. England, co. Northampton. The river, 15 m. N. E. Northampton, on the declivity of a hill is irregularly laid out, not very well built, but is amply supplied with water lighted with gas, and has of late years been greatly improved. It has an elegant church in the perpendicular style, with a lofty tower and spire; places of worship for various Dissenting bodies, a Friends' meeting-house, a free grammar, national and British school, and several private schools, and a dispensary. Tanning and currying of leather, boot and shoe-making, chiefly for the army and navy, the making of stick along for hats, brushes, pendants, and slugs, are

the chief branches of industry. Area of par., 3840 ac. Pop. 5198.—(Local Government).

KETTERINGHAM, par. Eng. Norfolk 1680 ac. P. 209.

KETTINS, par. Scot. Forfar, 42 m. by 8 m. Pop. 935.

KETTLE, a par. and vil. Scotland, co. Fife. The latter 5 m. S. W. Cupar is chiefly inhabited by weavers, and has a handsome parish church, a Free and a U. Presbyterians church. Sir David Wilkie, the painter was a native of the parish. Area, 6875 ac. Pop. 2601.

KETTLEBASTON, par. Eng. Suffolk 1063 ac. P. 189.

KETTLEBURGH, par. Eng. Suffolk 1433 ac. P. 348.

KETTLESTONE, par. Eng. Norfolk, 1189 ac. P. 309.

KETTLETHORPE, par. Eng. Lincoln 3290 ac. P. 541.

KETTLEWELL, par. Eng. York (W. Riding), 6485 ac. Pop. 607.

KETTON, par. Eng. Rutland 2740 ac. Pop. 1188.

KETTIG, a tn. Rheinland Prussia, gov. and 11 m. N. E. Düsseldorf, on the Ruhr with two churches, and manufactures of woolen and linen cloth a dyework, and a tannery. P. 2602.
KETZLEBORG, two places, Bohemia.—1. A vil. dist. and 80 m. S. E. Chrudim, in a fat valley at the source of a stream of same name, with a church, parsonage, and school. Pop. 1621.—2. A vil. curia and 27 m. N. Küniggrätz, in the midst of hills, with a church and school. Pop. 1236.

KEUCHE, a vil. Prussia, par. Farstent, near Pilsnab, with gates, a hamlet, some good looking houses, and about 1500 inhabitants.—(Flandin.)

KEULA or **Grosse-KEULA**, a market in Schwabach-Burg-Sonderhausen about 18 m. S. Hollenstedt, with a parish church a castle, and a large annual fair. Pop. 910.

KEVASHINSK, a vil. Siberia, gov. and about 220 m. N. Tobolsk, on the E. side of a large island formed by the Ob, inhabited by Ostyaks, who live by fishing and the chase.

KIVELAFR, a tn. Rheinland Prussia, gov. and 81 m. N. W. Düsseldorf, on the Niers, with a R. Catholic church, and manufactures of linen leather and hats. Pop. 1820.

KLEVERMERS, a vil. Hungary. Thibier Thales, co. Tarnad 11 m. from Bakhony with a handsome castle, and a trade in horses and cattle. Pop. 1903.

KEVILAR, E. (St.) par. Eng. Cornwall 9680 ac. P. 2469.

KEW (St.), par. Eng. Cornwall, 7514 ac. 1 ep 1837.

KEW, a vil. and par. England co. Surrey. The village is agreeably situated 7 m. W. by S. London r. bank Thames here crossed by a handsome stone bridge, connecting it with Brentford. It is well lighted with gas, has a handsome church, a free school, and in the vicinity are numerous elegant villas. It is chiefly noted for the royal palace, the favourite residence of George III. but still more so for the magnificent grounds and botanic gardens attached to it, comprising an area of 130 ac., adorned with a Chinese pagoda 168 ft. high, and some imitations of temples and mosques, and possessing numerous conservatories, and the most complete collection of exotic plants in Europe. The palm-house measures 800 ft. by 90 ft. An observatory is attached to these gardens, which are now public property. Area of par. 280 ac. Pop. 1009.

KEWSTOKE, par. Eng. Somerset, 4008 ac. P. 560.

KEKHOLM, a tn. Russia. Finland, ep. circle of same name on two islands in the Wozza, near its mouth, on Lake Ladoga, 48 m. N. E. Wiborg. It is of a triangular shape, and defended by a castle contains a Greek church, a commandant's house, and an arsenal and has an unimportant trade with St. Petersburg. Its streets are clean and lined with houses one story high. Pop. 1134.—The circle is extensively covered with lakes and morasses and has very little good arable land. Area, 1947 sq. m. Pop. 27,308.

KEY, or **Ki**, a group of Isles, Indian Archipelago, about 80 m. W. the Aru Islands, and about 70 m. from the S. W. coast of Papua, lat. 2° 30' S. and lon. 132° E. They consist of the Great and Little Keys, Koyvatsia, Verdool, Katschur and a few other coral islets. They have rather an elevated surface, and are covered with rich and luxuriant vegetation. The Great and Little Keys, the largest of the group, are of very irregular shape the former consisting of a long and narrow belt stretching N. to S. and covered by mountains which attain the height of 8000 ft.; the latter, on the contrary, is comparatively low, and surrounded by extensive shoals. The inhabitants of the Great Key profess Mohammedanism; those of the Little Key are composed of a mixture of Malays and emigrants from Corem, fugitives from Banda, Malaya, &c.

They are usually visited by sailing vessels from the Mediterranean Sea, and the Times report, for the purpose of purchasing troops, tortoise-shell, birds nests, &c. This trade is wholly conducted by barter. At Ella, on the N.E. coast of the Great Key a considerable number of barks are built for navigating the adjoining seas. They are substantial, well constructed, and composed of a fine hard and durable timber—(Tumbeck, *coupe d'ail ou l'Inde Néerlandaise*).

KEYINGHAM par. Eng York (S. Hindang) 1890 ad. Pop. 745.

KEYMER, par. Eng Sussex 5588 ac. Pop. 1006.

KEYNE (St.) par. Cornwall 944 ac. Pop. 218.

KEYNSHAM a tn. and par. England, co. Somerset.

The town, pleasantly situated on a slight acclivity on the Avon, 4½ m. S.E. Bristol, consists of one long, well-laid, but somewhat irregular street. It has a spacious church, in the later English style, Baptist and Wesleyan chapels, a national and other schools and some small churches, an extensive brass-work, and flour and log-wood mills. Keynsham was once famous for the army founded by William, Earl of Gloucester, in 1170. Area of par. 4171 ac. Pop. 2818.

KEYS or KEYS, the name given to different islands and rocks in certain parts of the W. Indies, including—1 The Great Key and a group Bahama. See CAYMAN. 2 The Cat Keys or Keys, a group of isles on the Great Bahama bank distinguished as the Dog, Wolf and Cat Keys lat. 26° 33' N lon. 79° 10' W—3, Florida Keys See FLORIDA—4, Nassau rocks lielets along the shores of Honduras and the whole coast of Central America.

KEYSOL, par. Eng Bedford 3664 ac. Pop. 804.

KEYSTON par. Eng Huntingdon 2533 ac. Pop. 109.

KLYZED or KLYZER a market in Hungary Transylvanian, near Stuhlbach, on an affluent of the Great lake, 47 m. N.W. Kronstadt. It contains a Protestant church and an old castle, situated on a height. Pop. 4900.

KEYWORTH, par. Eng Nottingham 1030 ac. P. 567.

KIZANLIL, or KAZANLIK, a tn. European Turkey

Rumelia, at the base of the Balkan Mountains, which separates Rousia from Bulgaria, 55 m. N.W. Adrianople. Alt. of ruins is unascertained to a great extent. Pop. 10,000.

KIZDI VASARUTZ (Lau), Scythopolis, a market in Hungary Transylvanian, on Haroscsuk, in a valley, 66 m. E.S.E. Schiburg. It is well built, has a Protestant church a gymnasium, and an active trade. Pop. 7780.

KHABUN two rivers, Asiatic Turkey—1 Base at Ras-al-Ain, pass. Diarbekir lat. 36° 25' N lon. 40° 30' E flows S.E. to about 36° N when it bends round to the S.W., and falls into the Euphrates at Kalkin, lat. 36° 12' N, lon. 40° 30' E. after a course of about 140 m. Its principal tributary is the Al Hundi by which it is joined at Kalkin lat. 36° 40' N. The Khabur forms throughout a large portion of the course, the boundary between the pashas of Diarbekir and Bagdad.—2 Has its sources in the Niphates Mountains—partly in pass. Van, and partly in that of Diarbekir, about lat. 36° 25' N flows generally S.W., passes through the Kordistan Mountains and joins the Tigris, about lat. 36° 55' N.

KHAFALOO, a tn. Belts See KHAFALU.

KHAI FUGO, a city China See KAI FUNG.

KHAI HOA, or CHAI HOA a tn. China, prov. Yunnan, lat. 23° 25' N lon. 104° 25' E. near the frontier of Tonquin.

KEAHBAR, a Arabia, Hedjaz, 100 m. N.E. Medina, lat. 36° 30' N lon. 40° 20' E. It was situated and taken by Mahomet, after a siege of 10 days.

KHALKAS, country See KALKAS.

KHALAL, or COPPER ISLAND, an isl. Sea of Marmara, 14 m. S.E. Constantinople possessing fine scenery. Many of the Franks who reside in Constantinople have their country residences on this and the neighbouring islands.

KHALKHA, or CHALCHU. See KENOPORT.

KHAMIL, or HANG a city Chinese Turkistan, lat. 43° 15' N lon. 95° 45' E. on the N.W. edge of the Desert of Gobi. It has an extensive trade with China Proper on the S. by various routes through the desert, and by Kailash, on the E. being a central point between these two countries.

KHIANA-A-BAD a tn. Central Asia, Khelat, and 12 m. S.E. Khoundos, a bank Ak-Bural, here crossed by a stone bridge; lat. 36° 20' N lon. 69° 30' E. It contains 600 mud-built houses, an ill-constructed fort, two colleges, and the governor's residence.

KHANDLISH a prov. Hindostan. See CANNES.

KHANDUTIA a prov. Asiatic Russia, which descends from the W. side of the Shamovoi Mountains, in gov. Okhotsk, flows S.W., and joins the bank Alder, after a course of about 100 m.

KHANIA a tn. Crete. See CANIA.

KHANOE, or KINER, an anc. and poor in Turkey in Asia, pass. and 55 m. S.S.W. Erzerum, at the bottom of a deep ravine with precipitous sides of rock, 5686 ft. above the sea, and consisting of about 180 houses, overlooked by an antiquated castle, a well built mosque, and a mosque.

KHAPPOOR, or KHANPOOR, a commercial tn., N.W. Hindostan, principally and 70 m. S.W. Balasore

near the Indus with which it is connected by a navigable canal lat. 28° 55' N lon. 76° 40' E. Excepting a few brick buildings two stories high, all the houses are of clay and the streets narrow, unmade, and very dirty. It has a good roofed bazaar and a lofty and beautiful mosque. The district around is populous, irrigated by a canal 15 yards wide, and though rather of a light quality, produces good crops—grain, cotton indigo, sugar-cane, melons &c. Pop. (Thomson), 80,000 (Vol. 6, 1846).

KHAPALU a vl. of Buls or Little Tibet, on a considerable stream at its junction with the lake Khyak; lat. 32° 8' N lon. 78° 20' E about 98 m. N.E. Serinagar or Cashmere. It stands on a thick bed of alluvium of great extent and sloping steeply from a triangular recess in the mountain behind it, and has a fort perched at a great height on a remarkable projecting scarp rock. The ground around, for not less than 2 m. is cultivated, and abounds with fruit trees. The height of the bed of the Shyarak at Khapal, above sea-level is roughly estimated at 8000 ft. In the beginning of November the shade maximum of temperature is seldom higher than 50°, but during night the thermometer falls more than 14° below the freezing-point. A little below Khapal, the sand of the Indus is washed for gold, but apparently yields little.—(Thomson's Travels in the Western Himalaya.)

KHARAMOUKOTAN one of the Karles. See CHA.

KHARAKOTAN.

KHARAN, a tn. Beloochistan, prov. Sarawan, cap. dist. of its own name, at the foot of the Sagar Mountains, about 110 m. S.W. Kolat lat. 23° 11' N lon. 64° 30' E. It is of considerable size, and fortified. The fort which resides in it, can muster about 600 soldiers.—The district rises small quantities of wheat and barley, but on a generally arid and barren soil. It exports a sweet gum called Khakar gum, which exudes from a species of tamarisk and is liquefied in the ordinary temperature of the atmosphere. In Kharan it is used as a condiment, and as Kelat as a luxury being dissolved in water and drunk as sherbet. The camels of Kharan are much celebrated.

KHARAK KAHAK, or CHAHAK an isl. Persian Gulf, 25 m. N.W. Bushire, lat. 29° 19' N lon. 50° 30' E. 18 m. in circuit and consisting chiefly of coral rocks. The S. side, being more level than the rest, admits of being cultivated, and produces fine grapes, figs, dates, &c. The Dutch formed an establishment upon it in 1748 but were driven from it by the Arabs, in 1765. It afterwards passed into the hands of the Persians and in 1839 was taken possession of by the British, to whom it is of considerable importance, as commanding the navigation of the Persian Gulf. The inhabitants, chiefly Arabs, are subject to opthalmia. Pop. about 1000.

KHARGEH (El) a tn. Upper Egypt, N. part of the great Oasis, which sometimes takes its name and of which it is the principal place lat. 26° 29' N lon. 30° 28' E. It is a halting-place for the caravans from Egypt to Darfur and Senaar, and, although burning hot in summer, there is an ample supply of sweet water dates and rice, to be had. Throughout the oasis are numerous architectural and sculptural remains the most important of which is the great temple of Khargeh, nearly 2 m. from the town, about 148 ft. long, by 65 ft. broad and 50 ft. high. Pop. 3000.—The oasis yields wheat, rice, liquorice, gum, dates, and various other fruits. Pop. 4590.

KHARJIAH a tn., S. Arabia, two days journey inland from Bas Makdalah, which is in lat. 14° N lon. 48° 30' E. situated between the first and second range of the Wahbi Mountains. It is in a fertile country, abounding in date-groves, and excellent pasture-land, affording food for num-

rous herds of cattle, which enables the inhabitants to ship large quantities of cheese. Pop. about 8000.

KHARKOV, CHARKOV, or KHOROSOV, UKRAINE, a gov. Russia; lat. $49^{\circ} 10'$ to $51^{\circ} 18' N$; lon. $34^{\circ} 20'$ to $38^{\circ} 20' E$. Bounded N by Kozlov, W and S by Poltava & Kharkov, E by Voronezh, area, about 17,450 sq. m. The country is for the most part open, the woodland covering only a few spots of dry partly of a strong and loamy, partly of a light and sandy nature, but usually fertile. It is divided into two basins, the larger occupied by the Donets, and the Oskol, a considerable stream which joins it from the N the less by tributaries of the Dnieper. The climate is very mild, though the winter is rather severe than is usual in the same latitude, in consequence of there being no shelter from the N wind. The rivers freeze about the beginning of December and break up in March. Summer is often very hot. Agriculture is carried on to a considerable extent and, with the rearing of bees, cattle, and horses, forms the chief employment of the inhabitants. Principal towns, Kharkov (capital), Akhterka, Bogodukhovo &c. Pop. (1850) 1,497,000.

KHARKOV or CHARKOV in Russia, cap. above gov., 400 m. S.W. Moscow lat. $50^{\circ} N$; lon. $36^{\circ} 25' E$. at the confluence of the Kharkov and Lopan. It is not well built, the streets being narrow, crooked, and without pavement, and the houses mostly of wood, which however from being whitewashed, have a gay clean appearance. It contains a cathedral, and many other churches, two convents, a university with a library of 21,000 vols. a museum, and botanical garden. The inhabitants carry on a considerable trade in soap, candles, and leather. Pop. (1840), 29,955.

KHARKOVA a river Russia which rises in the S. of gov. Kourm, enters gov. Kharkov flows S.W. receives the Lopan, and, after a course of about 50 m. joins the bank of the Dnieper, 62 m. N.W. Diabirsk lat. $28^{\circ} 18' N$; lon. $80^{\circ} 56' E$. It has a great Arsen, an affluent of the Euphrates. It stands on an immense and overlooks an extensive fertile, and highly cultivated plain about 36 m. long and 4 to 6 m. broad. Grains, grapes, wine of a superior quality and oil, fruit seeds and cotton, are grown in the vicinity. Inhabitants mostly Turks and Armenians.

KHARTOUM or KARZOMA, a modern but flourishing town, on the Nile, at the Delta of Atrek, and within 2 m. of its junction with the Nile at Abad, the two great branches of the Nile, on a bare and sterile-looking plain lat. $15^{\circ} 40' N$; lon. $32^{\circ} 45' E$. Khartoum, the largest town in E. Sudan and capital of Senaar, has sprung up into a town since about 1830, when it was made the residence of the governor of Sudan. It is a scattered place, with irregular streets full of deep runs. Most of the houses are constructed of millet-stalks, and resemble small wheat-stalks or bee-hives a few are built of mud and in numerous instances small groups of them belonging to one proprietor, are surrounded with a mud wall, or a hedge. It has a mosque, built of turck bricks; a military hospital, and a bazaar with coffee-house attached. Being favourably situated at the junction of two large rivers, and on the highway from Abyssinia, Senaar and Kordofan to Egypt, Khartoum possesses a considerable commerce. The caravans from Kordofan and Senaar bring negro slaves, gold ivory gums, medicinal plants, ostrich feathers, giraffe and leopard skins, &c. while those from Abyssinia fetch Abyssinian and Galla slaves, and large quantities of excellent coffee. From Khartoum caravans proceed to Dongola, Egypt, and to Senakin, in the Red Sea. Many Egyptian produce and European goods are taken in return these last bearing in Khartoum a most enormous price. The goods adapted for the market of Khartoum are broadcloth, calico, chinams, pistol balls, saddles, and saddlery, bristles, rice, tea, sugar, soap, sweetmeats, shoes, razors, crockery, hardware, lanterns, &c. Most of the sailing is conducted by means of crews, who act the part of swimmers, each article being disposed of to the highest bidder. The climate is very unhealthy. The inhabitants, chiefly intolerant Mahometans, consist of native Babori, Dongolians, Fungis and Arabs. Of strangers, the negroes are the most numerous, and are here to be met with from the farthest parts of Africa. Fine caravans, when watered, are fertile. Pop. 39,000.—(*Illustrations of the Nile*).

KHARAB, or KARAB (Bairah), a bay Arabia, prov. Oman, at the entrance to the Persian Gulf; lat. $26^{\circ} 25' N$,

lon. $65^{\circ} 20' E$. Good water is plentiful, fish are abundant, and cattle, &c. may be obtained. The shores are fertile, yielding wheat, barley, onions, dates, &c. There is a large strongly-built fort in the bay.

KHAKH or KHATUN, a town Afghanistan, 1 bank river of same name lat. $31^{\circ} 35' N$; lon. $68^{\circ} 40' E$, about 180 m. W. S. W. Kandahar. Pop. about 3000.—The river runs in a range of lofty mountains about 70 m. S. E. near lat. $34^{\circ} 10' N$, lon. $68^{\circ} 27' E$ whence it flows nearly due S. till it joins the Helmand at Koonestun, lat. $31^{\circ} 20' N$, lon. $63^{\circ} 20' E$. total course, about 195 m. It is subject to great floods, which detain caravans for weeks together. The country through which it flows is rugged barren, and desolate.

KHATANGA, a river, Asiatic Russia, which issues from a lake in gov. Yenisek near lat. $65^{\circ} N$ and lon. $96^{\circ} E$, flows first E, then N. E. and falls into a gulf of same name in the Arctic Ocean after a course of nearly 700 m. Its chief affluents are, on the r. the Munlaga and Popaga, and on the l. the Kala.

KHAIMANDOO, CATMANDOO, or KATHMANDU in N. Hindoostan, cap. Nepal, 1 bank Bogmati, on a plateau between the sources of the Gandruk and Conla, 4784 ft. above the plain of Bengal 150 m. N. by W. Patna lat. $27^{\circ} 42' N$, lon. $85^{\circ} E$. It is a large and important place, and becomes conspicuous at a distance by its numerous glittering temples and towers. It is surrounded by a wall, and entered by a massive gateway. The streets, though narrow, are broader than those of Huaraz, tolerably paved, and so clean as to contrast favourably with most Oriental towns and the houses are well constructed, generally with angular projecting balconies, and much wood-carving, open fronts used as shops, and a second story for residence. The most striking part of the town is the great square, containing the Durbar or royal palace and several Chinese pagodas. The former all the w. of vast extent, but very irregular in shape, and of little architectural merit. The latter, composed entirely of wood, have three or four roofs, supported by grotesque representations of deities and other figures, and presenting a confused mass of green, gold leaf, and varnish. They are approached by flights of steps, at the bottom of which are usually a couple of lions well carved in gray sandstone. From the bustling activity of the streets and the number of purchasers in the shops a considerable business seems to be carried on. The regular inhabitants are Nepewi many of whom live in high and gloomy though not elegant mansions, the Parbhatyas, by whom the town is much frequented occupy straggling villages, the houses of which are only earthen tiles usually painted white and red, and not deficient in neatness. Pop. sometimes estimated as high as 50,000 but probably not much above 20,000.—(*Ritter's Erdkunde*, Oliphant's *Journey to Kathmandoo*).

KHAVA a river Russia, which rises on the S. frontier of gov. Tombov enters gov. Veremj flows S. W., and joins 1 bank Ussuri, after a course of nearly 45 m. about 20 m. S. E. Veremj.

KHAWAK, the most E. and most accessible of the explored passes over the Hindoo Kooch, 13,200 ft. high lat. $3^{\circ} 42' N$, lon. $89^{\circ} 55' E$. 10½ m. E. by S. from the top of the pass is the fort of Khawak, 9500 ft. above the sea, lat. $35^{\circ} 37' 30'' N$.

KHELIDONIA a cape, Asiatic Turkey, S. coast, near Anatolia, forming the W. point of the Gulf of Aden, lat. $1^{\circ} 30' N$, lon. $50^{\circ} 25' E$. (s.) Off the cape are a cluster of small islands, five in number, two of which, Kheledona and Granbouna, are high, and contain some creeks, within which small vessels may be concealed, the other three are barren rocks.

KHEMLASRA, a town Hindoostan pres. Bengal, prov. Malwa, 240 m. S. W. Allahabad. It is a place of considerable extent, surrounded by walls and defended by a fort.

KHERKIN or KHERKIN a maritime gov. Russia, bounded N. by Poltava and Kopy N. W. Fokilev, W. by lat. $46^{\circ} 10'$ to $48^{\circ} N$, lon. $29^{\circ} 20'$ to $34^{\circ} 10' E$; greatest length N. to W. 240 m.; greatest breadth, N. to S., about 160 m., area, 19,596 sq. m. With the exception of that part of the government which borders on Podolsk, and consists of the last ramifications of the Carpathians, and a tract of hilly land on the banks of the Dnieper, the whole surface

is one uninterrupted slope, destitute of trees, but covered with long grass. The soil consists generally of a mixture of loam and sand, not unfavourable to vegetation. The fertility increases toward the sea, but ceases on approaching the hills. There is some good ground on both sides of the Bag, but between that river and the Dnieper and along the shores of the Black Sea, a dry barren sand prevails. In many parts the soil is strongly impregnated with salt-petre. The chief rivers of the government are the Dnieper, which waters both its N and its S. frontiers; the Dniester, which separates it from Bessarabia and the Bag, which traverses it a little to the W of its centre. Its chief lakes are the Beloua, Jakole, and Bayal. The climate is diversified, and subject to great fluctuations. In winter the rivers are frozen for a short time, and in summer the heat rises to 53° Foh. Even this heat is often followed by cold nights, and by keen blasts from the N., which injure vegetation. Still both the vine and the small berry thrive. Among the hills of the N good timber grows, and is extensively used by the navy of the Black Sea. Agriculture is in a defective state, but considerable attention is paid to gardening, and cherries, melons, and all kinds of vegetables are plentifully raised. Pasture being both good and extensive, the rearing of cattle may be regarded as the staple employment. There is easy communication by the Black Sea smaller Khazars to carry on a good transit trade, particularly by the port of Odessa, but its own exports are only wool, tobacco, tallow butter, cheese, caviar and cattle. Principal towns, Khevon (the capital) and Odessa. The inhabitants are chiefly of Russian descent, including Cosacks, but the number of Germans has been estimated at 25,000 and there is a considerable mixture of other races, as Moldavians, Wallachians, Tartars, Armenians, Greeks, Jews, &c. Pop 1850 550,000.

KHEBSON, or **CHERSON**, a Russian, cap. above gov. r bank Dnieper about 15 m above its estuary inlet (Co-ordinates 46° 37' 42" N. lon. 33° 38' E. (n.) It is a place of great extent, and regularly built, but is in a very dilapidated state, and has lost almost all its former importance in consequence of the rise of Odessa. It is divided into four parts—the citadel, the admiralty, the Greek, and the military suburbs. In the first are the different government offices, and the residences of the governor and other officials, the courts of justice, the arsenal, the hospital, and barracks. In the second are extensive docks, building yards, and store-houses, which have almost ceased to be used. The Greek suburb is inhabited chiefly by citizens, and contains three churches (a Greek, a R. Catholic, and a Russian), and an extensive market-place. The military suburb has only three streets, one church, and a number of mean houses, excepted chiefly by mechanics and sailors. The port, owing to neglect, has become difficult of access, and its trade, with exception of that in timber which is still extensive, is chiefly transit to Odessa. The chief public works are establishments for the washing and clearing of wool. One of them employs 500 persons. Howard, the philanthropist, died of fever here (Jan 30 1790). Over his grave, about 3 m N of the town, is an obelisk erected by the Emperor Alexander. Kherson was founded in 1778 by Prince Potemkin. Pop (1846) 30,000.

KHESLERBIA a Russian, gov and 70 m N.E. Kherson, on the Inguleta, in the midst of a steppe. It has some gunnery trade, but the inhabitants are chiefly employed in agriculture. Pop 1300.

KHILON, a river, Asiatic Russia, which rises in the W side of the mountains of Dauria, flows N.W., then S.W., and, after a course of about 480 m, joins r bank Solonga, about 30 m below Belmghutsk.

KHIN YAN, or **KIN YAN**, a Chinese, prov Kansoo, cap. of same name, on the Ma-tso-ho, 220 m E Lan chao-foo, lat 26° 5' N; lon 107° 23' E. It has strong fortifications, and an active trade in silk, obtained from neighbouring mountains.

KHIN YUAN, or **KIN YUAN**, a Chinese, prov Quingao, lat 24 25° N, lon 108° 40' E; surrounded by steep mountains, which produce a great variety of medicinal plants.

KHINI, a river, Asiatic Turkey, west, and 40 m N. Diarbekir, 224 m above the sea. The inhabitants are all engaged in spinning and weaving cotton-yarn and coarse cotton cloth, producing annually 30,000 pieces of cloth, which are chiefly sold among the neighbouring villages. The

Armenian inhabitants deal to a small extent in fruit, grown in their gardens and vineyards. In the town is an abundant spring of water, the source of a river called the Ashur Khini contains 200 Mahometan and 150 Armenian families.

KHION, an Isl. Asiatic Turkey. See SICILY.

KHIVA, **CHIVA**, or **KHIVA** (anc. *Chorasmia*), a khansate of W Asia, Independent Territory. In its largest extent, or including all the territories tributary to the khan, it has nearly between lat. 37° and 45° N, lon. 50° and 63° E, stretching N to the N. slope of the plateau of Ust-Urt and the river Beldir; E. to the sandy desert of Kizil-kum, and the khansate of Bokhara; S. to the districts of Merw and Herak, S.W. to the headwaters of the Elkhra, extending W from Merw and back to the Little Balkan; and W. to the E. shores of the Caspian Sea. But the extensive tracts lying within these limits consist, for the most part, of deserts thinly inhabited, or altogether uninhabitable, and very little known, and hence the same Khansate of Khiva, properly so called is usually confined to a much more limited territory, forming what has been called the cultivated case of Khiva, situated about lat. 37° to 43° 30' N, lon. 57° to 63° E; bounded N by the E. shores of the Sea of Aral, E. by the desert of Kizil-kum and the mountain chain of Sobek-dachek. S. and S.W. by the Turan desert and W. by the plateau of Ust-Urt, &c. The whole area of this oasis is estimated at 10,700 sq. m. but not more than one-third of it can be considered under cultivation. Almost the whole of the surface is composed of a low alluvial tract, terminated on the E. by the Sobek-dachek and traversed through all its length, from S.E. to N.W. by the Amoo. The mountains attain their greatest height to the E. of the town of Kiley and are composed of crystalline rocks, partly greenstone, intersected by veins of white quartz. At their base, secondary strata of sandstone appear. Further S., opposite to the town of Gurkan, limestone and marble are found, and mines of copper were at one time actually worked. Gold, also, is said to exist and when the resemblance of many parts of the Sobek-dachek in geological structure, to that of the Ural Mountains, is considered its existence, though not yet ascertained, may be esteemed very probable. Towards the N. where the range subsides very rapidly it is composed of low hills covered with loam and sand. The most conspicuous of these hills is that of Teshlyik, to the N. of the town of Kiley, which the Amoo (anc. Oxus), which receives the whole drainage of the khansate, small portion reserved directly to the Sea of Aral is closely hemmed in, on its E. or bank by the Sobek-dachek itself, on the W. or bank is bordered by a low marshy plain, which is often inundated, and across which a great number of canals have been formed, partly for carrying off the superfluous water and partly for irrigation. In the N., before terminating its course in the Sea of Aral, the river sends off several branches, the largest of which, the Landan the Kunnalik, and the Kara-bull, enclose, between the main stream and the Sea of Aral, extensive swamps, which have the form of islands, but are generally so much under water as to have both the appearance and the name of lakes. To the S. are similar lakes of more limited extent, among others, the Poren the Ak-kei, and the Berek-ak.

The climate is remarkable for the brightness of its sky which, with exception of January and December, when mists prevail, is generally without a cloud. The greatest cold is in December when the Amoo and the Sea of Aral are usually covered with a thin coating of ice. Night frosts are frequent in March, and often extend into April, but towards the end of the latter month vegetation becomes very rapid, and the heat increases so much as to become almost insupportable in June and July. In August the heat gradually declines, and in October night frosts begin again to occur. The W. wind is frequent in spring, but, at other times, the E. wind is by far the most prevalent, and, in general, in summer, forms a tolerably strong breeze. The soil consisting of a rich alluvial loam, is of the greatest natural fertility but, owing to the great dryness of the atmosphere, soon becomes so stiff and hard that it cannot be penetrated by any ordinary implement. For this the obvious remedy is irrigation; and, accordingly, from the earliest period, a mode of culture resembling that of Egypt has been practised. Large teams from the river with numerous water-buckets, intercept every part of the surface, supplying moisture where it is wanted, or removing it where it is in excess, and securing the most luxuriant crops of wheat,

maize, rice, barley, and legumes. Cotton and madder are also generally cultivated. Vine is confined to particular tracts, chiefly in the N. The vine thrives well, but requires to be defended against the winter cold by a covering of straw and earth; all the ordinary fruits, moulding apples, plums, cherries, apricots, figs, and pomegranates, are common melons are so abundant as to constitute the principal summer food of the poorer classes. The ground, being generally arable, is seldom occupied as pasture, and very little attention is paid to the rearing of cattle.

Manufactures are very unimportant. The only articles of any consequence are earthenware and bricks. A glazed description of the latter, remarkable for beauty of colour and fine nose, are in great demand for covering the interior of mosques, some cotton and mixed goods are woven but they are said to be among the worst which come from the East. Trade is far less extensive than might be expected, from the favourable position of the khana. It is almost confined to the immediate wants of its inhabitants, and those of the surrounding nomads, and is carried on chiefly with Russia. The principal exports are raw and spun cotton, in return for which are received various articles of European manufacture, as metals and ironware, woollen, cotton and silk goods &c. From Bokhara also are obtained cotton and silk goods, green tea, raw tobacco, Chinese porcelain, turquoise, and ornamental. These are sometimes paid for in money, but more frequently in Russian silver. The government of Khiva is, in the strongest sense of the word, an unmitigated despotism. The greater part of the inhabitants are Sarts or Tadshiks, and Lezbeks, in nearly equal numbers. After these are Persians, of whom two-thirds are slaves. Karakalpak, Janshids, and Turcomans. The number of Kirghiz families is only about 800. The total number of families is about 33,600 which at the average of four each, makes the pop. 374,400. — (Gens. Zschachnig des Chantel Chaves, Baunier a Reles nach Chama.)

KHIVÁ, **LEVIA**, or **KHIVA** is an independent Tartary city above Khiva, on an elevated flat at the junction of the Khan's and the Hissar's Canal 50 m. W 1 bank Amoo lat. 41° 04' N, lon. 60° 30' E. It is enclosed by a dry ditch, and an earthen wall about 30 ft. in height and thickness, and is entered by 12 gates the masonry of which is built of brick. The whole space thus enclosed forms an irregular circuit of about 4 m. A considerable part of it is occupied by alleys, gardens and cultivated fields and within it, near its centre, is a rectangular space 540 yards long, by 400 yards broad, enclosed by another earthen wall about 20 ft. high, by 30 ft. thick, entered by three gates, and containing the personal government and other buildings. The streets, besides being narrow have often deep rats and filth in them, and are so extremely dirty that the air, in many places, becomes tainted, and almost pestilential and the houses have a very gloomy and lifeless appearance, consisting for the most part, of earthen built, presenting rows of blind walls, without either windows or chimneys, and with no opening except the door. Among the principal buildings are two palaces of the Khan, differing little from the other houses, except in being surrounded by higher walls and having a water cistern 17 metres, generally small and unightly only two of them being of brick, and surrounded by cylindrical minarets, one 60 and the other 70 ft. high 22 schools or Madrasas, of which nine are of brick several castles, belonging to the principal officers of the state a merchant-house, caravanserai, and bazaar. The goods exposed in the last consist chiefly of English, Russian, and inland cotton cloths, cotton bed-covers, striped and bright coloured mixed silk shawls, silk handkerchiefs, Russian cloths, of a very inferior description; China tea-cups, and other kinds of pottery, sugar in small parcels of from 4 to 6 lbs. imported from Russia tea, needles, silk, and a few other minor articles. At the markets held twice a week, the chief articles for sale are corn, fruit, sheep, cattle, fish, plums, horse harness, boots, nails, &c. and provisions, both raw and cooked. The inhabitants are mostly Sarts or Tadshiks holding a considerable number of Persian slaves. The Jews number about eight families, who are chiefly employed in dyeing. Pop. about 8000

KHO-DAMHAN, or **KHO-E-DAMHAN**, an elevated valley Afghanistan, prov. Badk. 10 m. N. Cabool, about 30 m. long by 15 m. broad other authorities say 80 m. by 7 m., in general over 7000 ft. above the sea. At its upper extremity

rise the snowy peaks of the Hissar Koh while those of Paghman overlook it on the W. Remarkable for the purity of its air the luxuriance of its groves and orchards, and the picturesque of its scenery, the Kho-Damhan is a favourite country residence of the wealthy inhabitants of Cabool and as, in consequence, almost as thickly studded with residences as with gardens.

KHODABAD a ruined town in Scinde, 25 m. N. Hyderabad, 1 bank Indus lat. 25° 48' N. lon. 68° 32' E. covering 3 sq. m. of ground, with its remains. A few tombs are the only buildings in even tolerable preservation, one of them, the mausoleum of Fird. Ali, is small, yet neat. Khodabad was a favourite residence of the Talpurs, chiefs of Sindh, and here many of them have been interred. In the beginning of the present century it rivalled Hyderabad in size and population.

KHODOREKOW a tn. Russia gov. and 80 m. S.S.W. Kiew, 1 bank Irpen, with a trade in cattle and some general trade, chiefly in the hands of the Jews, who form a large proportion of the inhabitants. Pop. 2800.

KHOL, a tn. Persia, prov. Azarbaijan in a lovely plain, near the Kotura, over which there is a bridge of seven arches lat. 38° 37' N. lon. 48° 16' E. It is large and well fortified houses generally of one story, not higher than the town walls. The streets are generally narrow excepting those in the centre of the town which are wide and regular with trees on each side. Among the buildings may be noticed the Khan's palace, a handsome caravanserai several mosques, which are without minarets, and have domes scarcely higher than the houses, and numerous baths. The trade carried on by means of the caravans from Tauris to Erevan, is considerable in the neighbourhood, in 1514, Shah Ismail with 30,000 Persians actually defeated 800,000 Turks, headed by Selim I. Prop. about 20,000

KHOJEND a tn. Independent Tartary Khanate of Kokan 1 bank Sar or Shkon near the confluence of the Khogend, 90 m. W. Kokan lat. 41° 33' N. lon. 62° 42' E. It stands on elevated ground, and is surrounded by a decayed wall and ditches. Coarse cotton goods are manufactured here, and a considerable trade carried on in these and Russian merchandise.

KHOJUBAN, an ancient city, now in ruins, khanaate and 25 m. W. Bokhara, on the verge of the desert

KHOKAN a khanaate and in Asia. See **KOKAN**

KHOLM a tn. Russia, gov. and 60 m. E. S. E. Pskov at the confluence of the Khol with the Lovat, which is here navigable. It contains two churches. Pop. 2000

KHOLMOGOBY, a tn. Russia, gov. and 23 m. E. S. E. Arhangelsk, esp. circle of same name on an island of the Dwina, with a church, a navigation school, and a building dock for merchant vessels. Inhabitants live chiefly by fishing and feeding cattle. Pop. 1191. — The climate is flat, and much occupied by woods and morasses, and has good pastures, and feeds great numbers of cattle

KHONI, a tn. Russia, beyond the Caucasus Imeretia, 15 m. W. N. W. Kizlia. It is the residence of the Archbishop of Imeretia, and stands in a fertile district, in which much silk, tobacco, hemp, wine, and fruit are produced. Pop. 1640

KHONSAR, a tn. Persia, prov. Irak Ajloun, 80 m. N. W. Isfahan, with manufactures of cotton, cloth, and excellent cedar. The women of Khonsar are famed for their beauty. Pop. 18,000

KHOCHAN a tn. and fort, Persia, Khorasan, 90 m. N. N. W. Mashed lat. 37° 7' N. lon. 56° 10' E. The fort is a place of great strength built of mud

KHOOLOOM, or **KURUM**, a tn. Bokhara, 40 m. W. Balkh; lat. 38° 38' N.; lon. 68° E., on the road to Khoondooz and Cabool. It is pleasantly situated, being surrounded by numerous beautiful gardens, filled with fruit trees. It contains several caravanserais. Pop. about 10,000

KHOONDÖÖZ, a khanaate, Independent Tartary, lat. 35° to 38° N., and lon. 68° to 72° E., having Afghanistan S. Bokhara W. and the Bolox Mountains E. The greater part of the surface is mountainous, but there are many fertile tracts, which yield abundant crops of grain, principally wheat and barley while the meadow grounds, which are very extensive, produce good crops of rice. Fruit, also, is plentiful, as are, generally, all the necessities of life. But the climate is very insubstantial, being extremely hot in summer and cold in winter, snow lying for three months in that season

In humblity, however it is no doubt owing, in greatest measure, to its marshes which are in many parts so unstable, that the roads have to be constructed on piles of wood. A traffic in slaves is carried on here also an active trade with Turkani and Bokhara, and from which European goods are obtained in return.

KHOND00Z, a tn. Independent Tartary cap. above Khamsa, in a valley bet. Beschen, and the junction with the Goren. lat. 39° 45' N. lon. 69° 31' E. It is a wretched place, consisting of 500 or 600 mud hovels. Gardens and corn-fields alternate in its suburbs, and extend even into the town. Overlooking the E. end of the latter is the fortress a mound of an oblong figure and considerable extent, strengthened by a mud wall and a dry ditch. The wall is in a dilapidated state on all sides but the E., on which is the principal entrance, by the basar gate. On the N. E. of the fortress is the citadel, the winter residence of the Khan. It is an irregular structure of kiln-dried brick, surrounded by a moat, with loopholes for musketeers. Pop. about 1500.

KHOPLE a large river Russia, a tributary of the Don it runs in the marshes in the N. of gov Saratov, flows S.W. of Bolotov into gov Voronezh and then S.E. to gov Don Cosackia, and joins the Don on its E. bank near Ust-Khoperek. Principal affluents, the Voronezh and Buzuluk. Total course above 300 m. the last 100 m. of which are navigable.

KHOPLEISK—1 (Jassy) a tn. Russia gov and 110 m. S.E. Voronezh r. bank Khoper with some boat-building. 2 r. the Black Sea. Pop. 1800.—2 (L.) a vil. Russia, gov Don Cosackia. 185 m. N.E. Novo-Tcherkassk r. bank Don.

KHORASAN an extensive prov. occupying the whole of the N. E. of Persia, bounded N. by the khans of Khiva, W. by prov. Irak Ajem, S. by Farsistan and Kerman E. by Afghania lat. 31° 10' to 35° 20' N. lon. 53° 10' to 61° 30' E. The surface is much diversified by plains and mountains, and is to a great extent unhabitable, consisting of sand rocks and salt or arid deserts, destitute of fresh water and vegetation, except at a few fertile oases. The mountains of Elburz enter the province on the W., and stretch across the N. part throwing off various ramifications to the S. S. of this extensive range Khorasan is an elevated table-land a great proportion of which belongs to the Great Salt Desert named by the natives *Kahzer*. This desert which covers more than 40,000 sq. m. is desolate almost beyond imagination. In some parts, a few plants which love a salt soil maintain a sickly existence in other parts, a crackling crust of dry earth is covered with saline efflorescences. Where the level is lower water often accumulates in winter and being afterwards evaporated in summer leaves a quantity of salt, deposited in ridges, on a bed of mud. In other districts, sand, lying loose on the plains, or in wavy hillocks, is easily moved by the wind, and drifted into heaps in which the traveller not unfrequently finds a grave. The most fertile districts of the province are in the S. W. and N. E. In the former is the rich but limited, district of Astrabad, bounded on the N. by the Caspian Sea and in the lower valley of Mashed which, varying in breadth from 12 m. to 80 m. stretches almost unintercepted beyond Mashed for 50 m. and contains, in addition to Mashed, several towns and dependencies, with a great extent of cultivated land. Among the minerals the only one which has been turned to account is iron, but both lead and copper are said to exist. About 35 m. W. N. W. of Meshapoor are celebrated turquoise mines, from which from time immemorial, the chief supply of that gem has been obtained. In the same neighbourhood are salt mines, of beautiful white salt, which are successfully wrought. Where the ground admits of cultivation, all the ordinary grain and pulse crops of Europe are raised. The return in parts of the valley of Mashed, is said not unfrequently to be twenty fold. Cotton, hemp and tobacco also grow freely and the aromatic plants and drugs are so numerous as to form a considerable commerce. The manufactures consist chiefly of silk and woollen stuffs, rich carpets, muskets and sword blades, which are highly valued. The inhabitants consist of Tajiks, or Persians proper forming about two-thirds of the whole, Turcomans, Kurds, and other nomadic tribes, who keep large herds of cattle, and, at the same time, indulge in the most predatory habits. Pop. estimated at 2,000,000.

KHOBOL—1, A tn. Russia, gov and 65 m. W. N. W. Farsistan, cap. circle, and r. bank river of same name, with a

trade in agricultural produce. Pop. 3735.—The climate has much the appearance of a steppe, is sparingly wooded, and not fertile. Pop. 123,000.—2 A river Russia, which rises in gov Kharkov, about 15 m. N. W. Lebedin, flows S. W., enters gov Poltava, joins Khvorol, and, turning S. E., joins r. bank Psel, after a course of about 140 m.

KHOKRAM ADAN, a tn. and fort, Persia, prov. Irak Ajem, 1 bank Koon 95 m. S. by W. Hamad.—The river consists of about 1000 houses, has a lofty brick minaret, and a curious massive stone pillar inscribed all round with an Arabic inscription.—The river which overlooks the town, occupies a steep rock, about 1000 yds. in circumference, and is surrounded by a double wall at the base and the summit, where the palace an elegant structure is built, is strongly defended. A magnificent reservoir has been formed within it, also a garden of some extent.

KHOSRAI SHAH a vil and valley, Persia, prov. Amshir, S. W. Teheran. The village is now an insignificant place though said to have been formerly an important city.—The valley is one of the paradises of Persian poetry and is described as presenting a continuous succession of the most beautiful groves and gardens, and enjoying, at all seasons, a most delightful climate.

KHOSRAI a village in the N. E. of Hindostan, m. Sidhet, to the S. and E. of the Drahmapoots. lat. (W. end) about 25° 18' N. lon. 91° E. and stretching E. into Kunsipoot. It has an average height of about 4000 ft. and overlooks a cascade 6000 ft. In edges, instead of sloping down gradually are very precipitous, and the valleys which intersect it have a similar character and are very deep. In some parts trap and granite appear but the prevailing rocks are sandstone and limestone, belonging partly to the carboniferous formation good coal being found at the height of 4500 ft. but in situations so inaccessible that it cannot be turned to account. The rivers are numerous, and are often seen tumbling over immense precipices. In one place there is a fall of 1500 ft. One very remarkable circumstance connected with the climate is the quantity of rain which falls. Dr J. Hooker estimates the annual quantity at no less than 500 in. During his residence 180 in fell in one month, 85 in in 24 hours, and 10 in daily during sixteen successive days. The temperature in September was from 70° to 73°. This heat and moisture cause a very luxuriant vegetation. The loftiest summits, indeed are bare, and few trees are seen except on the banks of rivers, but much of the surface is occupied by a fine grass sward, and the flora is remarkable both for its beauty and variety. The Orchids are apparently from about one-tenth of the whole phanerogamous plants but are outnumbered by the grasses, of which Dr Hooker found on an afternoon's walk of 7 m. no less than fifty species, at the height of 4500 to 5000 ft. and almost all belonging to tropical genera.

KHOTEN LIETZ LIETZ, or LIETZ, a Chinese Turkestan cap. dist. of same name on an extensive plain, near 1 bank river of same name 290 m. S. E. Yarkand lat. 37° N. lon. 80° 55' E. It is large and populous has two gates, broad streets, and a considerable trade in the various products of the district chiefly jade copper silk and cotton stuffs, and horses which last are much esteemed. A fair is held here every week, which is sometimes attended by 30,000 persons.—The district embraces all the country S. of Oksa and Yarkand, along the N. base of the Koushian mountains, for more than 300 m. E. to W. Its principal river is the Khoson, which flows through the centre of the territory and falls into the Tarim, near lat. 40° N. It is an elevated tract, mostly in the E. part, and little known. Near the town, a large district is under cultivation, producing rice, wheat, millet, cotton, hemp, fax, and excellent grapes. Large quantities of silk, of the first quality are also collected. Among the domestic animals the yak is numerous, and also horses and sheep. The people are peaceable and industrious, mostly of the Buddhist faith. They are governed by two high officers and a detachment of troops.

KHOTIN or CHOKCHIN a fortified tn. Russia, gov Bessarabia, 7 m. S. S. W. Kamenka; lat. 45° 27' N. lon. 26° 25' E.; near r. bank Dniester. Its fortifications are said to contain indications of having been constructed by the Gosses; who, by means of this fortress, and those of Bender and Akerman, long continued masters of the navigation of the Dniester Pop., exclusive of the garrison, 4000.

KHOTMYJSK a tn. Russia, gov and 80 m. S. S. W. Kozmuk, 1 bank Volga. It is surrounded by an old earthen rampart, and has three churches. Pop. 3000.

KHOTMYJSK, a walled tn. Russia, gov Kharkov on the Melajet-Koidan, an affluent of the Volga, with three churches, and some general trade. Pop. 1678.

KHOULLUM **KHOULUM** or **GHOULAM**, a tn. Afghanistan, near border of Bokhara, 1 bank river of same name, 45 m. E Balkh, lat. 36° 40' N, lon. 68° 4' E. It is surrounded by hills on three sides, and defended by two earthen walls well built, generally of brick, trade considerable, great numbers of horses are annually sold. Pop. 10 000.

KHOUM a tn. Persia. See Koox.

KHOZDAR, a tn. Beloochistan, prov Jhalawan, 100 m. S. E. Kelat lat 27° 50' N lon 65° 28' E, beautifully situated on a plain of same name; bounded, E and S. E., by high hills of abrupt and singular outline. The town, which is enclosed by a mud wall has long been bustling to do so, and now contains only some 90 mud built houses although, in the beginning of the present century, there were at least 600. Close to it is a ruinous fort. The plain of Khondar is fertile, well watered, and highly cultivated, yielding large quantities of superior wheat, and a great variety of vegetables and fruit. The hills in the vicinity abound in rich lead ore, which is smelted by the natives to make bullets.

KHURD-KABOOL, or **KHURD-KABOOL**, a vil. Afghanistan about 10 m. S. E. Cabool 7450 ft. above sea-level in a pleasant valley, among the Kuristan mountains, where the Khotkhan dells terminate, and that of Tanguo-Turko begins. Here in 1841 the British troops, retreating from Cabool to Jelalabad became completely disorganised, and were murdered without resistance by the Afghans and here in 1842 General Pullock encamped, after the decisive defeat of the Afghans at Terzon.

KHUSLEV PASHA, or **VENA KRAY** a tn. Asiatic Turkey near Anatolia, 53 m. W. by W. Kootay, at the summit of a beautiful mountain pass. Inhabitants engaged in rearing silk-worms. Pop. 700.

KHUSISTAN, a prov. Persia, lying between lat 30° and 35° N and lon 45° 50' and 61° 30' E. having Farsistan to the N. Asiatic Turkey W, the mountains of Laristan to the S. and the Persian Gulf S. greatest length, N. W. to S. E. about 280 m. greatest breadth N. to S. 140 m. Like all the other countries bordering the Persian Gulf the S. or coast portion of Khuzistan consists of a flat arid desert. In winter a swamp in summer parched by a burning sun. Further in land extensive plains occur, some of them miserable wastes, uninhabitable in summer from want of water and in winter from the inundations caused by heavy and continuous rains. Others, again are fertile, being composed of rich alluvial deposits well suited to general cultivation. Of this description is the plain of Behbahan which, in spring, is clothed with flowers. The whole of the S. E. portion of the province is crowded with mountains, as is also its entire N. margin, amongst which many beautiful and fertile valleys occur. Vast marshes and swamps fill the overgrown the greater part of the N. W. portions of the territory. The only inhabitants are a few wandering Arabs, of the tribe of Beni Lam. The principal rivers are the Kerkah, and the Jerrah. The Tigris and Euphrates also flow along, and indeed form first separately and afterwards conjointly, two-thirds of the W. boundary of the province, the remainder being defined by the Mandell. The chief towns are Shushahr and Distul.

KHYALINSK, a tn. Russia, gov and about 120 m. N. E. Saratov, cap. circle of same name, 1 bank Volga, with an important fishery, and a considerable trade in corn with Astrakhan. Pop. 2268. The climate, chiefly on W. side Volga, is undulating, very fertile, producing much corn for export, and rearing great numbers of cattle. Pop. 41 900.

KHYBER MOUNTAINS and **PAM**. The Khyber or Toora Mountains occupy a portion of the N. E. corner of Afghanistan, connecting the most S. and lowest range of the Hindoo Kooch with the Sulfid Koh, the Salt Range, and the Suliman mountains. Their highest summits do not exceed 5100 ft above sea-level, and 3500 ft. above the plain of Peshawar which they close on the W. The breadth of the range may be stated at about 20 m. The range is intersected at various points by four different passes, but the most level, and the only one practicable for cannon, is the Khyber Pass, 2375

ft. above the sea, and 2300 ft. above Peshawar. This pass is called, with reference to Hindostan, the key of Afghanistan in the N, as the Bolan Pass is for the S. Its whole length, from Kadam, 10 m. W. from Peshawar, on the E, to Duka, at the entrance to the plain of Jelalabad, on the W, is about 60 m. It has for the most part through slate rock, and along the bed of a torrent, liable to be filled with a sudden fall of rain and then so violent as to sweep away everything in its course, and enclose on each side by precipices, rising to the height of 800 or 700 ft., in some places to 1000 or 1200 ft. The Khyber Pass was the scene of obstinate and sanguinary conflicts during the war in Afghanistan. It was forced by the British after their first occupation of Cabool. A similar attempt, made after the disastrous retreat from that city failed, with great loss; but, subsequently though obstinately defended by a large body of men it was again forced in April 1842. The E. entrance of the pass is at lat 33° 08' N; lon 71° 30' E.

KHYER DIVER See KYER DIVER.

KHYERPOOR, or **KHYERPOOR**, a tn. Seinde, about 15 m. E. from 1 bank India, 150 m. N. Hyderabad lat 27° 51' N lon 68° 45' E. the chief residence of the Amers of N. Seinde, and cap. of an extensive district of same name. It is merely a large collection of mud hovels, with a few houses of a better description scattered about, and contains a palace and some bazars, but presents little else worthy of notice, excepting a mosque crowned with a spire covered with gaudy lacquered tiles of various hues. It is extremely filthy and, from dirt and other causes, is unhealthy. Weaving and dyeing coarse cottons are carried on to a small extent, but there are no other manufactures of any kind. Pop. estimated at 15 000.

This district bounded N. by Bahawalpore and district of Meerpore W. the Indus S. district of Hyderabad and E. the Rajpoot principality of Jessamner lat 26° 50' to 28° N lon 68° to 70° E; is subdivided into a number of minor districts, and, before its recent subjugation by the British was shared in sovereignty by seven princes, the chief of whom is Amer of Khyrpoor. The surface is generally low and is fertilized by the annual inundations of the Indus. The soil is generally rich and produces abundant crops of all the kinds of grain and pulse common in India. Also sugar-cane, opium, cotton and indigo. The yield of the last two is considerable, but the quality is inferior. Among domestic animals are dromedaries and asses, which constitute the principal means of conveyance, cattle, sheep, and goats of a superior description. In the N. part of the district, immense herds of buffaloes are grazed on the banks of the Indus.

KHYRABAD or **KHYR-ABAD** a tn. Hindostan prov Onda, cap. dist. of same name, in an angle formed by two affluents of the Gomty 50 m. N. W. I. Jucknow. The district, though of a light soil, which during the monsoon ascends in clouds of dust is not infertile and produces good crops of barley, wheat, tobacco, and small grain. There are also some fields of sugar-cane, but their culture is very imperfect.

KHYERGAON a tn. Seinde, 1 bank Kooch, a branch of the W. Narra; lat. 26° 55' N lon 67° 50' E. It has seven mosques and a handsome bazaar, well supplied with cottons. Pop. 2000 to 3000.

KHYRPOOR, a tn. Hindostan principality and 40 m. N. N. E. Bahawalpore 3 m. E. 1 bank Indus, lat 29° 34' N lon 72° 7' E. On the P. side, the streets terminate in a dreary waste of mud which is continually advancing, and threatening the town itself with annihilating large portions of the on trampled ground in the vicinity having been already overwhelmed by it. The houses are of unburned brick, but a great many of them are in ruins. There still remain, however decaying mosques, with cupolas, one of which is embellished with varnished tiles of various colours. It has a tolerable bazaar containing 400 shops, and is a small mart to which caravans resort from the desert.

See KHYR.

KIACHTA **KIAMITA**, or **KIAMITA** and **MAIMACHEN**, a tn. Sibiria, or more properly two towns on the boundary between gov Irkutsk and the Chinese territory of Mongolia, 170 m. S. N. Irkutsk, the one town called Kiachta, belonging to Russia, and the other, called Maimachen, to China. lat. 50° 15' N; lon. 108° 46' E, 2320 ft. above sea-level. It stands on a small river of same name, and was founded in

1723, on the conclusion of a commercial treaty between the Russians and the Chinese. It derives its importance from being the only recognized exception to the trade between the two countries, and presents a singular exception from the striking contrast it exhibits. In the Russian portion of the town, the houses of merchants of the better class have stairs and balconies in front, occasionally painted and embellished with architectural ornaments. Towards Maimaichen, or the Chinese portion, a narrow door opens in front of a long wooden building and leads into the inner quadrangle of a Russian warehouse. On the opposite side, a corresponding door opens upon a wooden barricade, and this barricade is the barrier of China, the door of which is closed at noon, when Chinese and Russians must betake themselves to their respective quarters. The Russian side has an angle above it, with the cypher of the reigning emperor. The Chinese side, forming the entrance to Maimaichen, is surrounded with a cone or pyramid. The effect produced on passing it is described by Ehren as almost magical. The sober hues of the Russian side are, all at once, succeeded by fantastic, gaudy finery. The streets consist of a bed of well-busted clay kept nearly swept, but are so narrow that two carrels can scarcely pass each other. On each side are walls of the same clay with perforations, forming windows of Chinese paper. These walls are the sides of houses, but are not easily seen to be so, in consequence of the flatness of the roofs, and the gaudy paper lanterns and flags with inscriptions, which line the streets, and stretch across from roof to roof. There are two Buddhist temples in the town containing five colored images and numerous smaller idols. The trade carried on is very extensive. The Russians receive tea to the extent of 4,700,000 lbs annually, silk, musk, porcelain, sugar-candy, tobacco, rhubarb, and much, and in return the Chinese receive furs, skins, leather wools and linen cloth, cattle, and sundry items, from which a pelisse is obtained that forms a much-esteemed delicacy among the Russians. The Russian sales annually approach £700,000.—(*Edinburgh's Travels in Siberia*).

XIANA a. w. Africa, cap. of a petty state of same name, 56 m. S. S. W. Boma lat. 9° 36' N. lon. 8° 45' E. Straggling and ill built, composed of circular thatched huts, and surrounded by a wall of clay. It has an extensive direct trade with Dahomey and various other neighboring states. The inhabitants have obtained the character of being the greatest thieves and robbers in all Africa, but Capt. Clapperton, who was hospitably treated by them, doubts the justice of this unfavorable representation. Pop. estimated at 30,000.

XIAN-CHANG a city China, prov. Kiangsoo, on an affluence of the Kan-Kiang, 67 m. S. E. Nan-Chang lat. 27° 37' N., lon. 116° 30' E. It has manufactures of brandy and rice.

XIAN-G-HUNG, an important town, on the face of a hill, N. bank Ma-nan-kong or Cambodia River, near the frontier of the Chinese prov. Yunnan, about lat. 21° 56' N., lon. 100° 30' E. It is the capital of a large province, extending along both banks of the river has no fortifications, houses, about 500 in number generally good. There are several Chinese merchants settled in Kiang-Hung, who import, mainly for the Chinese market, gold thread carpets, birds' nests, trepang, dates, ivory &c. The chief articles of export from this place are tea and cotton, which grow on both sides of the river. The Ma-nan-kong is here about 300 ft. wide; it is not fordable, nor is it navigable to any distance downwards, its course being interrupted by falls two or three days below this town.—(*Ann. Acad. Sci. Bengal*, April, 1857).

XIANG-TUNG, a town Laos, about 5 m. from N. bank Nam Lee an affluent of the Ma-nan-kong, lat. 21° 47' N. lon. about 99° 39' E. It is built on some low undulating hills, surrounded by high mountains; is poor, thinly peopled, and surrounded by a mud wall so badly built, that it is constantly falling down. The dry ditch round the town is, at some places, 70 ft. deep, being dug from the base of the wall on the top of the hill, to the level of the swamp below. It is one of the principal towns in Laos, capital of a petty state of the same name and exercises rule over several neighboring petty states.—(*Ann. Acad. Sci. Bengal*, April, 1857).

XIANGSEE, an island prov. China, bounded, N. by Hsueh, E. by Yekien, S. by Quangtung, and W. by Hsueh, lat. 24° 35' to 29° 50' N. lon. 115° 40' to 116° 50' E.; area, 75,176 sq. m. It is hilly and rugged, composed chiefly of the limestone of the Kan-kang, by which river and

its affluents, most of which rise in the province, it is both well drained and watered. In form Kiangsee is oblong, sloping S. to N. towards the Poyang Lake, into which the Kan-kang flows by numerous mouths. The country round the lake is swampy. The soil, generally, is productive, and large quantities of rice, wheat, silk, cotton, indigo, tea, and sugar are grown and exported. It shares, in some degree, the manufactures of the neighboring provinces, especially in nankeen cloth, great quantities of which are woven and it greatly excels them all in the quality and amount of its porcelain. The mountains in the S. and S. E. yield camphor, varnish, oak bark, &c. and other trees. Nan-chang-fu, the provincial capital has walls 6 m. in circumference, and is accessible by water from all sides. The province is divided into 18 departments. Pop. 30,426,993.

XIANGSOO a maritime prov. China, lying along the sea-coast N. W. to S. E. bounded, N. by Shantung W. by Nghanool, and S. by Chekiang, lat. 30° 40' to 34° 43' N.; lon. 116° 15' to 124° 40' E. Area about 45,000 sq. m.; cap. Nanking. There are no hills of any consequence in the province, and the lower portion of it is covered with irreclaimable marshes. It is intersected by the Yang-tse-kiang, the Hoangho, and the Imperial canal, and has numerous smaller streams, and a considerable number of lakes of which Hung-tai, about 200 m. in circumference is the largest. Other large lakes are Kanyu and Panying both S. of Hung-tai and on either side of the Imperial canal. Another large lake is Tai-hu, partly in this, and partly in the adjoining province of Chekiang; its shores are picturesque and romantic, and it contains numerous islets resorted to by fishermen who derive their subsistence from the produce of its waters. This province is of great fertility and is esteemed one of the most productive portions of China. The sea-coast between the rivers, being low is rendered arable by constructing dykes to prevent the overflow of the ocean. The staple productions are grain, cotton, tea, silk, and rice, of which it exports more than any other province in China, and various kinds of manufactures, which are here carried to great perfection. The inhabitants of Kiangsoo are reputed to be remarkably intelligent and, although the province has long ceased to be the seat of a court, its cities still present a gay appearance and are adorned with better structures, than any others in the empire. Pop. 57,843,501.

XIATKHITA, a town Siberia. See XIACHTA.

XIBAR, a vil., W. 11bet, 13,800 ft. above the sea on the Fidi, in a narrow valley, surrounded on all sides by lofty mountains lat. 33° 25' N. and lon. 78° E. It occupies the summit of a limestone rock, and has a pleasing appearance, all the houses being built of stone and not of mud or unburned brick, commonly used in other parts of the valley. The prevailing cold around the village and in its vicinity is heavy.

XIRWORTH BRADCHAMP per Eng. Leicester 3220 m. Pop. 1753.

XICHINEV or **XICHENAV** a town Russia cap. gov. Rostomir, lat. 47° 8' N. lon. 39° 50' E. On the Bank, a tributary of the Danester. Formerly only a small miserable town, it is now adorned with numerous handsome buildings, both public and private. It has 14 churches, a gymnasium, and 10 other schools a library and extensive manufactures of woollen cloth, &c. Pop. 19,449, 42,955.

XIKION-ERRI or **XIKYIERRI** a town Ashantee country, lat. 6° 37' N. lon. 1° 20' W. It has an agreeable appearance, houses badly planned, but well built, and, being painted white, neat and clean looking. The people are very hospitable. There is a good deal of ironstone in the neighborhood. Pop. 12,000.

KIDDERMINSTER, a port town and market town, England, co. and 18 m. N. Worcester, 1 bank Stour, about 3 m. above its confluence with the Severn. It is principally composed of small humble dwellings constructed without any regard to regularity; is paved, and lighted with gas, and has an ample supply of good water. It has a townhall, and a prison, three churches, one ancient, the other two handsome modern edifices; and numerous Dissenting places of worship, a Unitarian, and a R. Catholic chapel, a free grammar and other schools, almshouses, &c. Kidderminster is famed for the manufacture of Brussels carpets and tapestry which forms the staple trade of the place. Various other woollen fabrics,

however, are also made and in the town and neighbourhood are several extensive worsted spinning-mills, and dye-works. Damask silk goods, for upholsterers, are also made and tanning, currying and brewing are carried on. It lies on the Staffordshire and Worcester canal, and the Oxford, Worcester, and Wolverhampton railway. Kiddington returns one member to the House of Commons. Registered electors (1851), 471. Pop (1851) 18,462.

KIDDINGTON, par Eng Oxford, 3450 ac. Pop. 808.

KIDIRA TATA, a vil W Africa, Bondou, 1 bank Falemé lat 14 27' N lon. 15° 16' W. It is almost totally occupied by refugees Kasouké, and consists of houses which are partly isolated from one another in the midst of cultivated fields, and partly arranged in a circle, more or less regular, the centre of which is indicated by a large tree. These houses, in general are constructed with solidity and neatness, and kept very clean. Kidira-Tata is the supposed site of the French fort of St Pierre.

KIDIRA TOUNGANT, a vil W Africa, Bondou, 1 bank Falemé lat. 14° 58' N lon 12 18' W. The huts are huddled together in numerous groups; and the inhabitants composed of Foulahs and of some Kasouké, are devoted to fishing and tillage and appear to enjoy some degree of prosperity and comfort. Pop. above 1000.

KIDDINGTON par Eng Oxford 5000 ac. P 1994
KIDROS, a vil Greece, Iwadia, near the W shore of the gulf, and 83 m. S.W. of the town of Salomiki. In its vicinity are ruins, supposed to be those of the ancient Pydna.

KIDWILLY or **CORWULW**, an incorporated market in and par, 8 Wales co and 6½ m. S. Carmarthen. The town is divided into the Old and the New Town by the Gwendraeth Váth, here crossed by a handsome stone bridge and has three principal, tolerably straight, but indifferently kept streets houses thatched, and of rather a mean appearance; an ancient and imposing oratory church, with a square tower, surmounted by a lofty spire. Several Dissenting places of worship, a national and other schools, and several minor charities. A dangerous bar at the mouth of the river has reduced it to a mere creek to the port of Llanelly. Kidwilly however still exports coal and agricultural produce to a considerable extent. It is a place of great antiquity. The remains of the ancient castle, which stand on a bold rocky eminence on the W side of the Gwendraeth, are still in good preservation and form an interesting monument of the early style of English architecture. Area of par, 5170 ac. Pop in 1855 par 1848.

KIEBLINGSWALDE, a vil Prussia, prov Silesia, gov Breslau, circle Habelschwerdt, with a parish church, a limestone quarry an oil saw and several other mills. Pop 967.

KIECHLINGBERGEN, a vil Baden, circle Upper Rhine, bail and near Breisach, on the Kaiserstuhl, with a parish church. Pop 981.

KIEDRICH, a vil Nassau, bail and 3 m. W Eltville, is a beautiful valley. It has a church, and near it are the ruins of the old castle of Scherfhausen, with a fine summer residence, and gardens laid out in the English style. Kiedrich has numerous mills. Pop 1875.

KIEFERSTADT, or **CONKOWOW**, a tn. Prussia, prov Silesia, gov and 36 m. S.E. Oppeln, with a R. Catholic church synagoga, hospital, and manufactures of tin spoons, tile-works, and several mills. Near it are iron mines. Pop. 827.

KIEL (Latin *Kio* or *Chio*) a tn Denmark Holstein, beautifully situated on a deep bay of the Baltic, which presents all the appearance of a lake, and has finely wooded banks, 84 m. N by E. Hamburg, whither it is connected by railway. It is tolerably well built, and has straight and well-paved streets, is the place of meeting for the Schleswig and Holstein States, and the seat of a superior appeal court for Schleswig, Holstein and Lauenburg and possesses a university, founded in 1855, with an attendance of about 800 students, a library of 60,000 volumes, a museum of natural history, an anatomical theatre, an observatory and a botanical

garden. At the E. end of the town is a castle, rebuilt since 1888 and the residence of the Duke of Holstein-Glücksburg. Kiel possesses also four churches, of which that of St. Nicholas, near the spacious and picturesque market-place, has a

THE MARKET PLACE, KIEL.—From Schleswig-Holstein, Thiergart

lofty tower several public and private schools an orphan hospital, and infirmary, and is admirably situated for trade, the whole bay on which it stands forming a safe roadstead and its spacious quays admitting vessels drawing 16 ft. Upwards of 3000 vessels arrive, and as many depart annually the tonnage each way being about 250,000 tons. More especially since the completion of the railway connecting it with Hamburg it has entered into formidable competition with Lübeck, and is rapidly rising in importance. Besides shipping, Kiel has sugar soap machine, and several woollen factories, iron-foundries oil mills, tan-works, and tobacco and vinegar works, &c. During the bathing season and also in winter it is a general resort of the nobility and gentry of the district, and in its environs are fine walks, commanding beautiful views of the Baltic and the surrounding country. Pop 14,000 or, including the vil. Brunsbüttel, properly a suburb, 15,000.

KIELCE, a tn. Kingdom Poland, cap woiwód Cracow, 105 m. S.W. Warsaw. It is well built & is the see of a bishop has several public offices, a collegiate and three other churches, a nursery finely situated on a height an episcopal palace, another palace, now converted into an hospital a diocesan seminary, a gymnasium a mining and two elementary schools, a theatre, a casino manufacture of hardware, and a considerable trade in it and in corn. In the vicinity are copper, iron, and lead mines. Pop 5000.

KIELDERKEI, a vil and com. Belgium, prov E Flandre, near the frontiers of Holland, 26 m. N. Ghent. It has two breweries, a lannery, a flour-mill, and a fishery and has a trade in agricultural produce and cattle. Pop 2660.

KIEN-CHANG-FOU, a city, China, prov Kiangsoo, lat. 27° 34' N, lon. 118° 30' E. Extensive rice-ware is made here, and a species of linen, made from hemp, is manufactured, and much used by the Chinese as a summer dress.

KIEN-LUNG or **CHEN-LUNG** a tn Tibet, on the N slope of the Himalaya, r bank Hutley lat. 31° 6' N and lon 80° 50' E. It occupies the summit of a recess, about 200 ft above the level of the river, and consists of about 100 small houses, built of unburnt bricks, and painted red and grey. It is inhabited by Uliyas. On the opposite side of the river there is a cavern, through the top of which water strongly impregnated with sulphuric acid, percolates; while sulphureous vapours, hot enough to cause copious perspiration, issue from crevices in the floor.

KIEOU KIANG, a city, China, prov Kiangsoo, r bank Yang-tse-kiang, 10 m above its junction with the lake Poyang, lat. 29° 38' N, lon. 115° 43' E. It is of considerable size, and enclosed with a wall. The harbour is commodious, and an active trade is carried on.

KIEV, Kiev *Kiiev* or *Kiow* a gov. Russia, bounded N by Minsk, W by Volhynia and Podolia, S by Podolsk and Kamenets, E by Tchernigov and Poltava, from which last two gov. it is separated by the Dnieper; lat. 48° 20' to 51° 30' N. lon. 28° 25' to 33° E. length 210 m. average breadth, about 170 m. area, 90,000 sq. m. The surface is in general flat and monotonous, but undulating, intersected occasionally by acclivities and hills of moderate elevation, along the course of the Dnieper and other streams. The Dnieper hills extend into Podolia, where they merge into the Carpathians, of which they may be considered the last manifestation, and draw off a branch, which, taking a W direction, traverses the whole of the E. district. S. of this branch the soil is rich, consisting of a loam, in which clay and sand are so happily mixed with vegetable mould as to yield the most abundant crops. S. of these hills the land is poorer, inclining to sand and moss, but even these rich tracts are not unfrequented. The slope of the country is chiefly in two directions, the larger towards the Dnieper which is the chief, and indeed the only navigable stream, and runs along the E. and N.E. confines of the district above 250 m. the other in the direction of the S.W. towards the basin of the Bug. Both of these rivers have several tributaries in the government. There are no lakes of any extent. The climate is remarkably mild and dry. The rivers freeze in December and are again open in February. In summer the heat is so great, and the quantity of rain so small, that the channels of many streams become dry. Large crops of all kinds of grain are raised, and much attention is paid both to the rearing of cattle and the dairy. There is a large export of grain, cattle, honey, wax and tobacco. The forests are not very extensive, but the timber is of excellent quality. Pop. (1850) 1,539,000.

KILB *Kilb* *Kilb* or *Kilb* a gov. Russia, cap. above gov. 6.0 m. S. St. Petersburg lat. (palest) 56° 28' 5.4" N. lon. 20° 25' 44" E. (L). It stands picturesque, crowning several heights of undulating ground, a bank Dnieper here crossed by a magnificent suspension-bridge (see Dnieper) and properly consists of three towns, each of which has its separate fortifications and suburbs. The first is Petcherak, or, as it is called, the New Fort, which crowns a rugged steep to the S. and is a place of strength, having a rampart with nine bastions and regular outworks. Besides the barracks, magazines, and official residences connected with the garrison, it contains several churches, of which the most remarkable is that of St. Nicolas Thaumaturgos, which is built of wood, and stands near the tomb of Oskold, a celebrated prince and saint, who is said to have been converted to Christianity in Greece. In the same neighbourhood stands the famous monastery of Petchersk, surrounded by a wall 1100 yards long, so called from the Russian word *petshera* (a cavern) in which the monks are said to have dwelt before the monastery was built. This cavern and to have been hollowed out by St. Antony, contain a number of catacombs, forming a kind of labyrinth

filled with the bodies of saints and martyrs. The second town is Kiev proper and occupies a height towards the N. lower than that on which Petchersk stands, and less regularly fortified. It contains the venerable cathedral of St. Sophia, founded, in 1037, by the Grand Duke Jaroslav Vladimirivich to commemorate a victory. The chief object of interest in it is a marble tomb of its founder, the only one of the kind known in Russia, and said to give a good idea of the art there in the 11th century. Most of the houses in Kiev proper belong to this church and the convent of St. Michael. The third town, called Poddol, occupies the lower ground, and is inhabited chiefly by the middle and lower class. Kiev has in all 30 churches, its streets are generally broad, and it contains an archbishop's palace, prison, town and military hospital, a university founded in 1833, attended by about 1500 students, an academy, a gymnasium and a printing-press, for the Scriptures and ritual books of the Greek church. It has some manufactories of leather and pottery and a tannery, and is celebrated for its confectionery. Its trade has become extensive, particularly since Odessa was built; and it has a large annual fair in January, which lasts for three weeks. Kiev possesses considerable historical interest, as the spot on which Christianity was first planted among the barbarous hordes of the steppes of Russia, and as having, for a long time, the recognized capital of all Russia. Pop. (1840) 47,494.

KIEVO, a vil. Dalmatia, acrole Zara, dist. and about 14 m. from Kun in a mountainous district. It is a well-built place, and has a parish church. Pop. 1140.

KIGHTAGHOUA a vil. Russian America, r. bank Oumalikit. Having direct communication, by two small streams, with the river Jouna, it has become the centre of the local commerce. The houses contain but one room.

KII ISLANDS, a group, situated N. of Port Beloungton, N. Australia. The E. island is high steep, and well wooded with deep water close to the W one is lower but equally well supplied with wood and water. Some coco-nut oil is made on these islands, and the inhabitants build a great number of small prahs for the natives of the adjacent islands.

KIEPU a tin. Amn. prov. Tonquin, on a mouth of the Tongkue river 100 m. E. Cochao. It is well fortified, has regular and regular streets, is intersected by canals, and has a large palace, immense magazines of rice and numerous bazars.

KIKINDA (KAWT) a market N. Hungary Banat, on Torontal in a fertile district, 85 m. W N.W. Temeswar, for a townhouse, a Greek non-united, and a R. Catholic parish church, a trade in cattle, and an important annual fair. Pop. 12,844.

KIL, or **KILY** [Celtic, *Cill*, from Latin, *Cella*, meaning a burying-ground or a chapel] a prefix to the name of some town places in Scotland and Ireland. The following Table contains all the parishes in the two countries having this prefix, excepting those noticed in separate articles, along with towns of the same name:—

SCOTLAND

| Parish. | County. | Area in Acres. | Pop. in 1851. | Parish. | County. | Area in Acres. | Pop. in 1851. |
|------------------------------|----------|----------------|---------------|-----------------------|---------|----------------|---------------|
| KILBARROCK and KILCRATHAN | Argyll | 17 m. by 5 m. | 2215 | KILMARTY | Argyll | 6 m. by 4 m. | 508 |

On the brow of a hill are the remains of a monastery, founded in the 6th century some curiously sculptured stones, and the dilapidated stump of a round tower. Pop. 1086. Area of par 7245 ac. Pop. 2214

KILCULLEN BRIDGE, a market in Ireland co. and 74 m. E by Kildare, on the Liffey here crossed by a stone

THE ISLAND OF KILDA.—From Wain's Terrace round the Coast of Scotland.

bridge. It has an Established church, a R. Catholic chapel a dispensary a fever hospital and a school. Pop. 865

KILDA (Sr) a small and lonely island Atlantic Ocean belonging to Scotland lat 57° 49' N lon 8° 34' 45' W (N) 113 m. W from the Butt, or N extremity of the island of Lewis. It is about 3 m. long by 2 broad of an irregular form, having a wide and deep indentation at its N E. end called East or Village Bay and a smaller at its S W extremity called West Bay. The former is a beautiful and spacious harbor almost land locked with a long rugged promontory or rather island named the Dun forming the S.E. side of the lay

The highest point, Lonsheban, 1980 ft. high consists of a granite trap, but the larger part is a dark green sandstone. The whole appearance of this rocky site is sufficiently wild and impressive. A great portion of it is a front being composed of perpendicular precipices which in some parts rise to a height of many hundred feet, exhibiting here and there vast dark caverns excavated by the action of the sea alternating with groups of rugged pinnacles of the most fantastic forms wrought by the same powerful agency. In the interior a verdant turf covers most of the island giving way on the higher elevations to moss. The soil is good and an improved cultivation has of late years found its way even to this remote and solitary isle. The arable land is chiefly had not in small rigs of barley, of which in ordinary years, a sufficient quantity is raised for the consumption of the inhabitants who however, amount only to 105 persons. vegetables do not thrive and there is not a tree on the island. At the head of East Bay is the only village on the island on an elevation sloping gently towards the sea the whole encompassed by a stone fence and containing about 40 acres of arable land with some beautiful but somewhat steep green hills in the background. The number of dwelling houses in the village amounts to about 50 many are of rather curious construction, resembling at a little distance a Hottentot kraal without its regularity but having a somewhat similar kind of semicircular roof. Considerable improvement has been made in the construction of the houses within these few years particularly in their internal arrangements and furnishing, but they still retain much of their primitive character, and some portion of their primitive filth, although this also has been much amended. The inhabitants, whatever may have been their origin, have all, without a single exception Highland names and speak the Gaelic language.

They are of low stature, but stout, active, and intelligent simple-minded and kind hearted. The prevailing dress is a small flat blue bonnet, coarse yellowish white woollen jerkins, and trousers also of coarse woollen stuff of a mixed colour. Their principal occupation is catching wild fowl, which here within the rocks with their countless numbers and in the taking of which the most appalling feats of daring are performed. The fowler being suspended over perpendicular cliffs of many hundred feet in height by a single rope, held by a

single person on the margin of the precipice. There were, a few years since, about 50 cows on the island, of small size, but yielding a delicious milk, and about 2000 sheep. The people pay their rent, about 250 chiefly by means of feathers, for which they are allowed at the rate of 5s. per stone. There is a clergyman on the island, and a small place of worship adjoining the manse—(Wilson's *Fogge round the Coast and Isles of Scotland*, Anderson's *Guide to the Highlands*, &c.)

KILDALY, par. Eng. 3rd (N. Riding) 5° 30' ac 1 145. **KIL DARE**, an island co. Ireland prov. Limerick bounded N. by Mouth, S. by Dublin and W. by Carlow W. by Kings, Queens, and Westmeath par., length, 40 m. breadth, 27 m., area, 414 415 ac., of which 300 787 ac. are arable. The surface is generally flat, or gently undulating, swelling here and there into low hills, and covered with the most delightful verdure. The soil is mostly a rich loam, resting on limestone or clay slate. Nearly in the centre of the county is the well-known Carragh of Kildare a vast, unbroken black plain, containing of 4858 ac., the property of the Crown and appropriated to racing and coursing—the adjacent proprietors having the privilege, under certain restrictions, of grazing sheep on it. (Wheat, potatoes, wheat and turnips, are the principal crops. Oats are in general use both for draught and the plough. The only manufactures are of cottons and woollens, but to a very limited extent. There are also some paper factories, but the chief occupations are agricultural. Principal rivers—Barrow, Liffey and Boyne. Chief towns—Naas and Athy. Kildare is divided into 14 baronies, and 110 parishes, and returns two members to Parliament, both for the county. Registered electors (1851) 774. Pop. (1841) 114 498 (1851) 95,724.

KIL DARE, a market tn. and par. Ireland co. Kildare. The town on an eminence 30 m. S.W. Dublin, on the road thence to Cork and Limerick has an air of respectability and importance. It is a cathedral city, the church of which is used as the parish church, and contains the burial vault of the Earls of Kildare, a R. Catholic chapel, a Carmelite friary and a presbyterian convent, with a chapel attached to each national and other schools an infirmary and a dispensary. Near it is the extensive common known as the Carragh of Kildare on which races are run in April, June, September and October. Kildare gives the inferior titles of Earl and Marquis to the Duke of Leinster. Pop. 1798. Area of par. 9216 ac. Pop. 2279.

KILDONN, a tn. and par. Ireland co. and 25 m. N. Cork with a parish church a R. Catholic chapel and a dispensary. Area, 2337 ac. Pop. 1436.

KILDOWICK, a par. England co. York (W. Riding) comprehending the v.l. of same name and several townships. Inhabitants chiefly engaged in stuff manufacture. Area 22 079 ac. Pop. 111.

KILDYSART or **KILLDYBERT** a tn. and par. Ireland co. Clare. The town 13 m. S.W. Ennis is irregularly built, but, for its late years, being considerably improved. It has a parish church and two R. Catholic chapels, three schools, a constabulary police barrack, and extensive agricultural produce to Limerick receiving building materials groceries, &c. in return. Area of par. 12 859 ac. Pop. 3993.

KILLENOIRA a decayed market tn. and par. Ireland, co. Clare. The town 14 m. N.W. Ennis has an old cathedral, used as the parish church a R. Catholic chapel and two public schools. Pop. 887. Area of par. 10 777 ac. Pop. 586.

KILFINCHAN, a market tn. and par. Ireland, co. and 22 m. S. by E. Limerick. The town consists of two principal, and several subordinate streets, and contains many commodious and respectable houses, an Established church, with the ruins of an ancient castle close by a R. Catholic chapel two public schools, and a spacious fever hospital with a dispensary attached a market-house, and a constabulary police station. The weaving of cotton and linen is carried on to a small extent and in the neighbourhood are several oatmeal mills but the inhabitants, generally, are employed in agricultural labour. Near the town is the 'Dunns fort', a mound 130 ft. high encircled by seven earthen ramparts 20 ft. apart. Area of par. 6457 ac. Pop. 8049.

KILGERHAN, a tn. and par. S. Wales, co. Pembroke. The town is beautifully situated on the Zefyr, 2 m. S.E. of Cardigan, and consists principally of one long straggling, and irregular street of mean-looking houses. Besides the church,

there are several Dissenting places of worship and a school. On the edge of a perpendicular rock rising from the bank of the Zefyr are the ruins of an old castle. Area, 8673 ac. P. 1268.

KILGWRRWG par. Eng. Monmouth 650 ac. P. 154. **KILHAM** a vil. and par. England, York (E. Riding) The village 7½ m. W. S.W. Burlington consists of one irregular street extending more than 1 m. E. to W. and has two Dissenting chapels. Area of par. 7880 ac. Pop. 1947.

KILIA a tn. Russia gov. Bessarabia, on a height, a bank, and near the mouth of the principal branch of the Danube about 40 m. E.N.E. Ismail lat. (cathedral) 45° 28' S. N.; Lon. 29° 18' 27" E. (L.) It carries on a very considerable trade, being the chief mart for the productions of Moldavia, Wallachia, and Bulgaria. Its principal exports are tallow, hides, wax, wine, wool and grain. Pop. about 7000.

KILIANSTEDT a vil. Hesse-Cassel prov. and near Hann. with a parish church, a manor-house, a mill, and a trade in wine. Pop. 951.

KILIE-AYRAU par. Wales, Cardigan; 1914 ac. P. 302.

KILIMA-DJARO a mountain E. Africa. **SE. AFRIKA**. **KILITHI** or **FRANZSDORF** a vil. Hungary Hiller D. nebe co. and 12 m. from Presburg on the Danube, over which there is a ferry. It has a parish church, a fishery, and a trade in corn and cattle. Pop. 896.

KILITTI a vil. Hungary Thutur D. nebe, co. Slungm in a plain, on the Sio, 2 m. from Sio-Pok with two churches. Pop. 1357.

KILKEE a thriving watering-place, Ireland co. Clare 8 m. N.W. Kilmash in the creek of Malby. It is built close to the sea, is of a semicircular form and has elegant baths, a constabulary police force, and a coast-guard station. Near it are several chalybeate springs of high reputation. P. 1849. **KILKEEL**, a tn. and par. Ireland co. Down 164 m. N. E. Newry. It has a commodious parish church three R. Catholic chapels and several Dissenting places of worship. Pop. 1163. Area, 47,883 ac. Pop. 13,825.

KILKENNY an island co. Ireland prov. Limerick bounded, N. by Queen's co. E. by Carlow and Wexford E. by Waterford and W. by Tipperary greatest length 46 m. breadth, 24 m. area, 791 sq. ft. or 506,883 ac., of which 470 102 ac. are arable. The surface is generally level, with some mountain, chiefly situated between the More and Barrow, consisting of a nucleus of clay slate surrounded by sandstone. The soil is chiefly limestone, with clay-slate and sandstone in the higher parts. The general colour of the limestone is a bluish grey which near the town of Kilkenny passes into a fine black marble, susceptible of a high polish, and containing a great variety of shelly impressions. These beds are extensively quarried, and the blocks dressed on the spot. The coal formations are nearly co-extensive with the lilly districts but the coal is of very bad quality and consequently little used. The principal rivers are the Barrow, Nore, and Buir the first forming the E. boundary the last the W. at its E. extremity and the Nore flowing through its centre N. to S. The soil is of various qualities in a few places it is moorish, particularly in the coal tract but, for the most part, it is light and dry, some valleys being extremely fertile. The chief crops are wheat, oats, barley, bere, rye, pease, beans, potatoes, turnips mangold-wurzel, carrots, and parsnips, some cabbage, and a little flax. Some of the best wheat and meadow lands in Ireland are situated in the level tract along the Buir. Dairy husbandry also is extensively practised particularly in the Walsh Mountains, and the S. part of the Castlecomer tract. Farns here are of various sizes, but generally small, there being comparatively few above 50 ac. and although one of the highest rented counties in Ireland, its farm-houses and other accommodations are, for the most part, very inferior. The county contains 10 baronies, and 145 parishes, and returns two members to Parliament. Registered electors (1851), 5056 and Kilkenny city the capital, returns one. Pop. (1841) 183 540, (1851) 188 778.

KILKENNY a city par. bar., and so. of itself Ireland, locally in co. of same name, of which it is the cap., 61 m. S.W. Dublin, with which and with Waterford it is connected by railway, delightfully situated on both sides of the Nore, here crossed by two handsome stone bridges. It consists of five principal, and several subordinate streets, well paved, and lighted with gas. Many of the houses and shops, most of which are built of stone, have a highly respectable appearance.

ance. Water of excellent quality is abundant. The city combines several interesting ancient edifices, which tend to give it a venerable and picturesque appearance. These structures consist of the cathedral, the castle, now modernized, and several abbies. The places of worship comprise the cathedral already mentioned, two churches belonging to the Establishment, one Presbyterian church, one Methodist meeting-house, and six R. Catholic chapels. The other modern public buildings are a city and county jail, a court-house, infirmary fever hospital, urban poor-house, house of correction, and numerous constabulary police stations. There are several schools, the most important of which are Kilkenny college a grammar-school, in which Swift, Congreve, Farquhar Bishop Berkeley, and other distinguished characters, received the early part of their education the college of St. Kyrus, a R. Catholic seminary for the education of young men intended for the priesthood; and numerous other public and private schools. The literary and scientific institutions comprise an archaeological society and the Kilkenny literary society. There is also a diocesan library adjoining the cathedral, and containing about 4000 vols. Kilkenny was formerly the seat of extensive manufactures, most of which, however have either entirely disappeared, or have greatly fallen off. The manufacture of coarse woollens has recently begun to revive and some little business is done in tanning and making the working of Kilkenny black and foreign marbles into chimney-pieces, monuments, tables, and other articles. In the manufacture of starch, carpentry, carding implement and flour mill machinery metal founding and mill wright works, but none of these branches are carried on so extensively as formerly. A considerable trade is done in salt, flour, ale, porter and harem for which the town still maintains a high reputation. Kilkenny gives the title of Earl to the family of Butler and returns one member to Parliament. Registered electors (1851) 604. In the vicinity of the city has been discovered a species which is considered beneficial in various diseases. Pop. 19 978. — (Local Correspondent).

KILKERRAN BAY an indentation W coast Ireland so. and 25 m. W Galway extending inland about 11 m. situated with islands, chiefly inhabited by fishermen.

KILKHAMPTON par Eng Cornwall, 8273 ac P 1221

KILKISHEN a vil. Ireland co Clare 4½ m. N 8½ mile-bridge, with an Established church a R. Catholic chapel, and near it the remains of Kilkishen Castle. Pop. 559

KILLA I BKANNA, a collection of walled via Alghemistan, about 86 m. S W Glasgow, on the road thence to Shawl in a large and fertile valley bounded by lofty mountains on the N, but more open on the S. The road through it, though crossed by several water-courses, is good.

KILLALALA, a market tn., seaport, and par Ireland co Mayo. The town agreeably situated on the bay of same name 26 m. N N E. Castlebar contains a small but ancient cathedral, also used as the parish church a R. Catholic chapel, and a Methodist meeting-house a free and a national school, a dispensary and an ancient round tower 84 ft. high. The manufacture of coarse linen was formerly carried on here to a considerable extent but the principal trade now consists in the export of grain and provisions, and in the import of herrings, sugar, plank and iron. Pop. 970 Area of par 5634 ac. Pop. 2819. — The bay which receives the Moy in its upper part, extends about 8 m. inland, and has a breadth of 3 to 5 m.

KILLALOE, an ancient market tn. and par Ireland, co Clare. The town is picturesquely situated 13 m. N E Limerick, on a hill r bank Shannon has crossed by an ancient bridge, leading to the suburb of Ballina, on the l. bank of the river. The streets are in general steep and narrow houses indifferently built, but still the town has a cheerful and prosperous appearance. The principal buildings are the cathedral, of the 13th century, which is used as the parish church, a Wesleyan meeting-house, and a R. Catholic chapel. Near the cathedral are the remains of a stone-roofed oratory one of the most ancient ecclesiastical edifices in Ireland. There are various public and private schools, a dispensary and several benevolent and friendly societies. Foreign and native machines are manufactured here into chimney-pieces, monuments, and other ornamental articles. Frames, coarse linens, and flannels are made to a limited extent, and 200 to 300 lads are engaged in the neighboring extensive alms

quarries. Many of the inhabitants are also employed in the extensive works of the City of Dublin Steam Packet Company for the manufacture of busts, boilers, &c. Area of par, 9978 ac. Pop. 2819. — (Local Correspondent).

KILLAMARKEE, par Eng Derby 1846 ac Pop. 1070
KILL ARNEY a market tn. and par Ireland co Kerry. The town is situated in the midst of the most beautiful scenery within a mile of the celebrated lakes to which it gives its name 4½ m. W by N Cork on the high road thence to Tralee. The principal streets are straight and well paved and the houses in general substantially built of stone supply of water ample. It has a handsome parish church, a small Methodist meeting-house a R. Catholic chapel and a magnificent R. Catholic cathedral in the Gothic style; a convent of the Presentation where 300 female children are gratuitously educated by the ladies connected with the establishment a convent of the Sisters of Mercy containing a house of refuge for the relief and instruction of adult females. There are two free schools a dispensary and fever hospital a lunatic asylum and a poorhouse. In summer Killarney is thronged with visitors to the lakes and the delightful scenery in the neighborhood. Fancy articles of wood particularly of arbutus which attains to great perfection in the environs are made to a considerable extent, and are in great request by tourists. Flour is also manufactured extensively. Pop. 5595 Area of par 34 769 ac. Pop. 14 155. — The lakes three in number are all connected with each other. The lower lake is about 4½ m. long by 2 m. broad the middle, 1½ m. long by ½ m. broad the upper 8 m. long. They receive several streams, are interspersed with numerous islands which as well as the sloping and lofty sides of the lakes are richly wooded, presenting the loveliest scenery anywhere to be met with. — (Local Correspondent).

KILL ABHANDSA a market tn. and par Ireland co Cavan. The town, 9 m. W by N Cavan is delightfully situated on a gently rising ground near the Croghan and is surrounded by a succession of romantic lakes. The principal street is spacious well kept and has many good houses with a handsome market-house in the centre. It contains a parish church a R. Catholic chapel and Presbyterian meeting-house numerous public schools and a dispensary. A considerable trade is carried on in linen and many of the inhabitants are employed in the manufacture of it. Pop. 982 Area of par 23 167 ac. Pop. 2949.

Presbyterian meeting-house, numerous public schools, and several corn mills. Area of par 18,866 ac. Pop. 5,007.

KILLIS, a tn. Adjoins Turkey Bay, and 40 m N. Alagoa, with a considerable trade in galls, wax, and inferior cottons. Pop about 2,000.

KILLOUGH, or **ST ANNE'S PORT**, a tn. and seaport Ireland, co. Down. 6 m S.E. Downpatrick, on the bay of same name lat 54° 15' N. lon 5° 37' 30" W. It has a handsome parish church with a square tower, a R. Catholic chapel, and a Methodist meeting-house. The harbour is a safe refuge for coasters and other small craft, and is much resorted to by vessels engaged in the fisheries off the coast. Killoogh exports corn and cattle and imports coal and salt. Pop 651.

KILL PLUCK, par Eng Hereford 2135 ac. Pop. 239. **KILLUCAN** a tn. and par Ireland co. Westmeath. The town 9 m E. by 6 Mullingar has an elegant parish church two R. Catholic chapels, several public schools, and a dispensary. Area of par—35,590 ac. Pop. 7,892.

KILLIBEGGS a market tn. seaport, and par Ireland co. Donegal. The town 14 m W. Donegal near the head of a beautiful creek of same name in Donegal Bay has a well sheltered and safe harbour with anchorage for large vessels, a parish church R. Catholic chapel free school and a dispensary. It exports agricultural produce and imports timber coal and groceries. Area of par 15,384 ac. Pop. 420.

KILLISLEIGH a market tn. seaport, and par Ireland co. Down. The town lies on a gentle declivity W. above Newgrange Lough 6 m N.E. Downpatrick. The principal streets which are well kept, form a cross having 6 m or 6 m smaller ones lying parallel to them. Many of the houses are well built of stone. It has a handsome cruciform church with a tower surmounted by a well proportioned spire, two spacious Presbyterian meeting houses, a small R. Catholic chapel five schools a library and serene society and an extensive flour mill employing 450 hands. The harbour has been recently improved and the shipping business is increased. The principal exports are grain and other agricultural produce imports—wool cotton iron coal salt and general merchandise. Dr Hans Sloane the celebrated physician and naturalist and founder of the British Museum was born here April 18, 1666. Area (f par 11,100 ac. Pop. 5,045—(Local f correspondence).

KILLARNEY a tn. and par Ireland co. Donegal. The town 6 m N.W. Letterkenny contains a very ancient parish church, a R. Catholic chapel a Presbyterian meeting house several public and private schools, and a dispensary. Area of par 37,011 ac. Pop. 7,771.

KILLMATTOMAS a small tn. Ireland, co. and 13 m W. by R. Waterford on a steep hill on the Mahoe here crossed by a stone bridge. It has three schools and a dispensary and is inhabited chiefly by agricultural labourers. Pop 1,057.

KILLMAINHAM a vil Ireland co. and 2 m W. Dublin of which it is a suburb. It contains a military hospital county court house, and jail and has manufactures of fine woollen cloths. Pop 473.

KILLMANKIN a tn. and par Ireland co. Limerick. The town 15 m S. Limerick on the Liscase was formerly a place of importance, surrounded by a strongly fortified wall, portions of which still remain and had numerous well built houses of hewn stone several castles and noble mansions, only two of which now remain. From the dilapidated appearance of the town when contrasted with its original magnificence Killmankin has been styled the Baileob of Ireland. Since 1816, the principal street has been improved by the structure of several good stone houses. It has an ancient and spacious, but much decayed church, a R. Catholic chapel a dispensary a library and some extensive flour mills. Area of par 40,742 ac. Pop. 5,108.

KILLMARTIN K. a par and municipal bor and market in Scotland, co. Ayr. The town 19 m N.W. Glasgow on the Glasgow and South Western Railway near the confluence of the Kile water with the Irvine. The principal street is upwards of 1 m long and contains many handsome buildings houses generally of freestone obtained from quarries in the neighbourhood the streets generally are wide and airy and the town is well supplied with water. Near its centre, on a bridge across the Kilmarnock in the townhouse, and at the cross is a fine marble statue of Sir James Shaw, Bart., a

native of the vicinity who had been lord-mayor of London. It has three handsome Established churches, three Free, three U. Presbyterian one of which has a fine tower and spire, and several other dissenting churches, numerous schools, including an academy an elegant building an exchange, a mechanics institute, a philosophical institution, a public library two reading rooms, a dispensary, and several benevolent societies. Kilmarnock has long been famed for the excellence of its woollen manufactures formerly consisting chiefly of broad and other bonnets, and striped cowls but now of carpets, which have become the staple, and printed worsted shawls, made to a great extent, &c. There are also manufactures of machinery tobacco, candles, hats, and hosiery besides several extensive tanneries; and a considerable business is done in the making of boots and shoes for exportation. Kilmarnock unites with Dumbarton, Port-Glasgow, Renfrew and Rutherglen in returning one member to the House of Commons. Pop 21,387.

KILMARTIN, a small vil and par Scotland co. Argyll. The village, 8 m N.W. Lochgilphead at the head of a fine glen, contains the parish church, a handsome Gothic structure a parish school and the ruins of an old castle. Along the valley of Kilmartin are a number of large circular cairns, containing stone coffins, in which human skeletons of a large size have been found, together with silver coins one of which bore the name of Ethelred. Area of par 24,529 ac. Pop 1,144.

KILMALLARS, a bor of barony and par Scotland, co. Ayr. The town pleasantly situated on bank Carmel, 2 m. N.W. Kilmarnock, has parish Free, and U. Presbyterian churches, and three schools. Cotton weaving and shoemaking are carried on to some extent. Par 6 m long by 2 m. broad. Pop 2,144.

KILWA or QILOA, a coast with a fine harbour and cap. of a petty kingdom P. east Africa. It stands on a small island, lat. S. 67° 5. lon. 89° 37' E. in a noble estuary into which flow many streams. The chief of these are the Kufi (in early writers Quao, Quabo and, by further corruption, Quao), from the N.W. and the Kufi from the S.W. This sea is here unfathomable till close to the shore which is formed probably by a bank of coral. The banks of the estuary and of the rivers present to view a great deal of low alluvial land intersected by sluggish canals and overgrown with mangrove. The town has a pretty appearance at a distance, the white-washed houses, domes and minarets rising in a thick grove of coconut-palm and other palms. The island is about 5 m. long E. to S. and 3 m. wide. Though it supplied with water it still supports a population of 6000 or 9000, but the town no longer retains the commercial importance and opulence that once distinguished it, and memorials of which still remain in the extensive ruins of stone buildings wrecked over the island and the adjoining mainland. The fort, built of brick and mud, and white-washed looks well from the sea, but mounts no guns and could offer no resistance to a European army. A mosque still standing has 25 domes, and is said to have had 865. It is entirely covered with a luxuriant growth of creeping plants, and is shaded by some huge Bombax or cotton trees. The town of Kilwa is now but a wretched group of huts, and the once powerful king is at the present day, tributary to the Sultan Ben Sâid (of Muscat), residing in Zanzibar.

When Ibn Batutah visited Kilwa in the earlier half of the 14th century (about 1380), he found it a large and flourishing town, though built only of wood, and inhabited chiefly by Zungu, that is, by indigenous blacks. But when a little more than a century and a half later the Portuguese arrived there, it was a handsome stone-built city, the houses of which resembled those of Spain and Italy. The date and authors of the stone buildings, scattered in ruins for some hundreds of miles along these coasts, are now undecipherable; but certain it is that our voyagers are in ascribing them to the Portuguese. These conquerors do not appear to have been zealous propagators of art and improvement; they destroyed much more than they erected. They took and pillaged Kilwa in 1507, and subsequently disturbed its commerce, as well as that of the whole coast. They probably contributed to hasten its decline, though so long as the slave-trade flourished in Mauritius, Kilwa was enriched by it. In the beginning of the present century the island was taken by the Bakalea pirates from Madagascar who held it for some time. They were at length expelled by a force sent from Zanzibar; but the prosperity of Kilwa was then gone, and it has never returned.

The name Kilwa is more extensively applied than is commonly supposed. The island just described is Kilwa Majidja, and may be considered as the Kilwa of history. But about 12 m. further N. in a bay facing the N.E., is Kilwa Kivini or Old Kilwa, a village of about 700 huts, and now a

much more busy and important place than the island. Kilwa Kufi on the river of this name, is probably a market for the natives of the interior, and dependent on the island. Kilwa Takfi on the E. bank of the Kufi is remarkable chiefly for the immense number of wild beasts that grow about it. Kilwa Ugoa, about 10 m. S. of the island on the coast, has, we believe, in its neighbourhood, extensive salt-pans, the produce of which is exported.

The noble harbours at Kilwa Majidja, within the estuary and sheltered by the island, remain unfrequented in grand and savage solitude. Whatever symptoms of civilisation may be found on the sea-coast of E. Africa unmitigated, malignant barbarism, unchanged by foreign sway or intercourse still prevails everywhere within a few miles of the shore. The native traffic along the rivers is of little value but it deserves to be mentioned that canoes, laden with fruit and vegetables, descend the Kufi frequently from the country of the Den garka who dwell on the S. banks of the Lufi, in houses raised on stakes so as to be secure at once from the floods and from wild beasts. From this it would appear that the Kufi, if it be not a branch of the Lufi at least drains a portion of the country inhabited by that river. Hence the Kufi or Quao as it was called was formerly believed to issue from the great lake of the interior wherein the chief rivers of Africa, the Nile included, had their sources, according to the then prevailing systems.

The mouths of the Lufi, all narrow and difficult of approach owing to the numerous coral reefs and islets, with strong currents between them, that beset these coasts, the W. of Mafia Island that which bears the name of Lufi or Huru being in lat. 7° 08' S. about 70 m. N. of Kilwa. As the mouths of the Lufi are situated on a part of the coast which is always avoided by European navigators, they remained long quite unknown, and have but recently found a place in our charts. Hence all the accounts received of the great river were referred to the Kufi at Kilwa. This river though its principal entrance is not above 800 yards wide, is said to exceed a league in breadth within and during the floods it has a width of several leagues. The estuary through which it flows is populous and fertile producing two crops a year of rice, millet, &c. besides plantains, oranges, and other fruits. The people dwelling on the sea-shore at the mouths of the river are the Ma'afia above them are the Dengariko, already mentioned and beyond the delta, the left or N. bank of the river, along which the road passes, is occupied by the Gatu and W. of these again, are the Waza, in whose country about 80 days' journey from the coast, the river divides into several branches. The Kidget comes from the N.W. The Swidha, from the W. is by some considered as the chief branch of the Lufi, while others give this name to a river joining the Swidha from the S.W. The Lupozi also, and another great river fall into it lower down from the same side. All these rivers rise in the N.E. slopes of the great ridge extending S.E. and N.W. at the opposite or S.W. foot of which lies that river like lake, of extraordinary length which is called, on the coast, Ziwa (fresh water lake) and by the tribes dwelling round it S. and Nyasal or Nyassa (the sea). The sources of these rivers, the river respecting which we possess most information, are probably between the seventh and eighth parallels of latitude, and at least 550 m. from the sea. The natives on the coast, indeed, believe that the Swidha issues from the lake, but this opinion is open to strong objections. See NYASSA. From Dwea, above the sources of the Lupozi and some other districts S. of the Swidha, iron is brought down to Kilwa. The country which lies on the E. side of the lake from the Lufi northward, is called Monomoezi. Crocodiles and hippopotamuses are very numerous in the waters of the Lufi, and the latter are thought so formidable in the lower part of the river that the Arab traders who ascend the river a month's voyage, are said to arm their boats with long iron spikes, to keep them at a distance.

The valley of the Lufi, viewed in connection with Kilwa, forms a very remarkable feature in the geography of Africa; for here we can trace not only a great river descending a distance of 500 or 800 m., its numerous branches being spread over a territory of at least 300 m. in width, and the various tribes occupying its vast basin all speaking one language, but we see also the commerce between the coast and the interior

have fully established, systematically carried on and not insignificant. The Monmouths visit the coast annually in large bodys, from 8000 to 10,000. Formerly Kilwa was their destination, at the present day the majority of them encamp on the coast opposite to Zanzibar but a considerable number still resort to Kilwa. See MONMOUTH. And this well-developed native system of intercourse has existed at least three centuries and a half; indeed there is reason to believe that at that period, when the chief foreign merchants on the coast were the peaceable Banjara, the traffic with the interior was far more active than it is at present.

But the countries of the interior the traffic of which is, or was in better times, directed upon Kilwa, are not confined to the basin of the Luifu. All the tribes on the E. side of the lake, S. of the Luifu and round the sources of the Lirivina, resort to that place and as the S. end of the lake is the channel of an active carrying trade, much of the ivory and other produce of the remote interior reach Kilwa from that quarter. The mouth of the Lirivina or Riviana is situated in lat. 10° 26' S. a few miles S. of Cape Delgado. According to the reports of natives, this river may be navigated, a long way up, by large ships. About eight or nine days up from the sea—above the delta, for it has several mouths—it increases in width and is a mile broad its banks richly clothed with superb timber. The canoes of the Lirivina, hallowed out of a single trunk, are capable of containing 30 people. The general course of the river seems to be S. W. by W. The traders route from Kilwa, going S. W., crosses the Lirivina at the end of 30 days' march and soon after enters the territory of Ido, or perhaps Jao, a half well-watered country fertile and populous the capital of which, Lokolingo, is six weeks distant from Kilwa. From Lokolingo to the lake, the journey is of 14 days the road going W. over Njessa a mountain densely peopled, not in villages, but with cottages and gardens and small hamlets, uniformly spread over its sides and summit. From Njessa may be seen Njassa, or the sea, glittering in the W. with five rocky islands, and the little river Mungu running down to it. The natives of Jao this Wado of Zanzibar the Monjoo of Monambuco) also make regular annual visits to Kilwa, going on arge bodys, and sometimes 10,000 in a season. They carry down ivory wax and gum-copal, and not a few slaves, but their slave trade is generally quite free from atrocity. The great majority of the Wado sold annually in Kilwa and Zanzibar (some thousands) go voluntarily into servitude or service (as they conceive it) to seek their fortunes and, if they fall into the hands of a Mahometan master their end is gained, and their condition invariably improved.

On the N. borders of Jao, about 80 m. from Lokolingo, and on the river Bengo probably an affluent of the Lirivina, dwell the Mungu, who are described on the coast as white people. A Mungu woman is prized in Zanzibar above an Abyssinian. The men are rarely seen in captivity being much superior to their black neighbours in courage and the arts of war. The natives of the coast at Kilwa are Marfina, the same tribe or nation who peopled, at an early age, the Querimba, Angosa and Bambari islands to the S. Behind them, up the Kwananggo, are the Mandi. The coast between Kilwa and the Lirivina is occupied by the M. were beyond, or S. of the Lirivina, are the Wamra. The Mashinga and Mungu are on the road to Jao.—(Capt. W. F. W. Owen, *Narrative of an Exploring Voyage to the E. coast of Africa, 1833*. Capt. Thos. Botscher, *Narrative of a Voyage de, 1835*.)

KILWINNING, a tn. and par. Scotland, co. Ayr. The town is pleasantly situated on a gentle elevation, r bank Garrock, 21 m. S. W. Glasgow on the railway thence to Ayr. It consists perpetually of one narrow street about 1 m. long, and contains a parish and a Free church, two Dissenting chapels, several schools, various benevolent and charitable institutions, and an archway club of very ancient foundation. The inhabitants are chiefly employed as hand loom weavers, or in the mines and quarries in the neighbourhood. A considerable number of females are engaged in needle-work. With the exception of the abbey of Kilwinning, founded, it is believed, in 1140 now a fine ruin is ascribed the introduction of true masonry into Scotland. Area of par., 11,200 ac. Pop. 6859.

KILWORTH a market tn. and par. Ireland, co. Cork. The town 22 m. N.E. Cork is pleasantly situated on the Faneeshoe, here crossed by a handsome stone bridge, about

1 m. above its confluence with the Blackwater. It consists of one irregular indifferently kept street, and contains a market-house, manor court-house parish church, R. Catholic chapel, and two school houses. The people are, in general employed in agricultural labour. Area of par., 5468 ac. Pop. 1948. (Local Correspondent.)

KIMBOLTON — 1 A market tn. and par. England, co. Huntingdon. The town, 9 m. W. S. W. Huntingdon contains a handsome church surmounted by a lofty spire various Dissenting places of worship and an ancient endowed grammar school. A few females find employment in lace making, but the inhabitants generally are employed in agricultural labour. Kimbolton castle the mansion of the Duke of Manchester was the residence of Catherine of Aragon after her divorce from Henry VIII. Area of par., 5061 ac. Pop. 1655. — 2 A par. Eng. Hereford 4061 ac. Pop. 702.

KIMCOTE par. Eng. Leicestershire 1710 ac. Pop. 608.

KIMTO, an isl. Russia, S. W. coast Finland about 25 m. S.E. Abo. It is nearly in the shape of a triangle, the upper part of which is in a manner inserted into the mainland, from which it is only separated by a very narrow channel, greatest length, N. E. to S. W. about 20 m. central breadth, nearly 11 m. The nucleus of the island appears to be granite, but the strata above it contain beds of limestone, which is quarried. There is also a mine of iron. Pop. including that of some adjoining islets, 6500.

KIMPFREDIGH, par. Eng. Dorset 1670 ac. P. 178.

KIMOLA, isl. Greece. See ARGENTINA.

KIMPINA a tn. Wallachia, dist. Frutova, r bank R. heva, 50 m. S. Bucharest with several churches, a convent, and numerous mills, and a considerable transit trade, being the entrepot for all the merchandise coming from Locustul. Near it are salt mines, which are extensively worked. Much bitumen is also obtained.

KIMPOLUNG or KAMPOLUNG (MOLDAVIAN) a market tn. Austria, Bukowina, on the Moldau 67 m. S. W. Cernowitz. It is one of the principal stations of the military frontier. Pop. 2625.

KIMPTON two pars. Eng. — 1 Hants 2° 33 ac. Pop. 371. — 2 Herts 5375 ac. 1 pop. 922.

KIN on isl. Russia, in the N. E. of the Gulf of Riga, about 12 m. from the coast of Livonia. It is nearly of an oval shape, and is about 7 m. long by 5 m. broad.

KIN CHOO, or KING TCHOU a tn. Chinese empire, Man chowia, near the head of the Gulf of Leontung lat. 41° N., lon. 121° E. L. bank of a river which falls into the Gulf. It is a considerable emporium and is celebrated as a market for drugs, pease, and flour. Upwards of 1000 junka trade with the town.

KIN HOA a city China prov. Chinkiang lat. 29° 18' N., lon. 107° 20' E. It is a great trade in dried plums and lard which are exported to all parts of the empire.

KIN KUN (Karakul island), an isl. China, prov. Kiangsoo, in the Yang-tse-king. It rises like the summit of a mountain above the waters, and is covered with house temples, trees, and flowers. Its sides are clothed with trees shading streets of light and fantastic forms.

KINAMI a vil. W. Africa, r bank Niger 23 m. S. by E. Egga lat. 8° 25' N. lon. 6° 21' E. It consists of seven different clusters of huts, built on a bank about 8 ft. above the river, inhabited by Kusa or Yaka people. Pop. 1000.

KINARI par. Ire. Kerry 5002 ac. Pop. 709.

KINAWLFY, par. Ire. Cavan and Fermanagh 51,004 ac. Pop. 19,521.

KINBURN a fortress, Russia, gov. Taurilla, on a narrow tongue of land, at the mouth of the Dniester. It is prettily and strongly situated, being surrounded on three sides by the waters of the Black Sea and the estuary but consists of the fortress itself, with the necessary buildings, and a few fishermen's huts outside. In the vicinity in 1787, the Turks were legally defeated by the Russians under Suwarrow.

KINCARDINE, a tn. and several pars. Scotland, 1. A bar of barony and seaport, co. Perth, r bank Perth. The

over 21 m. by V Edinburgh, has narrow and irregular streets, and the older houses generally of one story and roofed with tile; the more modern of two or three stories and slated. It has a parish, a Free, and a U Presbyterian church. The port is advantageously situated for trade. The quay and harbour are commodious; the latter is secure and admits vessels of 800 to 400 tons. Coals are exported, and timber and other articles from Russia and Sweden imported. Ship-building is carried on to some extent. Pop. 2697—2, A par, co. Aberdeen 5 m. by 20 m. Pop. 1898—5 (J. Hall) A par co. Aberdeen 7 m. by 5 m. Pop. 2098—4, (as Montell) a par co. Perth 7500 ac. Pop. 1198

KINCARDINESHIRE, or the *Mearns*, a maritime co. Scotland E. coast, having Aberdeen N and W Forfar S. and W and the North Sea E. greatest length, 32 m. breadth, 24 m. area, 244,480 ac., of which 1280 ac. are water, about half the county is supposed to consist of cultivated land wood land improvable moor &c. The Grampian mountains, by which it is traversed N E. to S W occupy a large portion of its surface, but their highest summit within the county is Bannock, only 911 ft. above sea-level. The more elevated regions of the county are sterile but there is a considerable proportion of comparatively low fertile, and generally well-cultivated land. The geological formations of the county comprise large proportions of red sandstone, gneiss, and granite, with narrow, parallel bands of mica and chlorite slates, running N E. and S W. On some parts of the coast, the cliffs, consisting of alternate beds of fine sandstone and conglomerate with occasional veins and masses of trap rising to heights varying from 150 to 800 ft. nearly if not altogether inaccessible. In these rocks many curious caves and natural arches occur one of the latter being 150 yards long. The principal rivers are the Dea, North Esk, Bervie, and Dye. The arable land consists chiefly of a tract called the *How of the Mearns*. It contains about 60 000 ac. of comparatively low fertile, and generally well cultivated land, with about 7000 ac. of thriving plantations. On the E. the *How* is sheltered by a range of low hills which separate it from the coast district. The latter contains about 65 000 ac. of which about 38 000 ac. are in a high state of culture. The other arable districts consist of the narrow glen or valley lying along the Dea. The principal crops are wheat, barley, oats, beans, peas, turnips, potatoes, and flax. Cattle and sheep are reared also to a considerable extent. The manufactures are confined to some linen weaving and to the making of a peculiar kind of woaden stuff boxes of beautiful workmanship, carried on in the village of Laurencekirk. Kincardineshire contains 19 parishes, and one royal burgh—Bervie or Inverbervie, and sends one member to Parliament. Stonehaven is the principal town. Pop. (1841) 28 075 (1851) 34 598

KINCALVEN, par Scot. Perth 5 m. by 2 m. P. 831
KINDBERG, or KINDEBERG a market in Austria, Styria, above and 11 m. N E. Bruck, r. bank Mura, about 2000 ft. above the sea. It contains a number of well built houses, a parish church, poorhouse, hospital and cattle and has many features of arches and other articles in iron. Pop. 710

KINDELBERG, a m. Prussia, prov Saxony gov. and 19 m. N. Brier, r. bank Wipper with a church tile-works, a saw and other mills and a trade in horses and cattle. Pop. 1604

KINDERHOOK, a vil., U States, state and 19 m. S. New York in a plain, 5 m. E. the Hudson with a Dutch Reformed and a Baptist church, and an academy. P. 1400

KINDNIG a market in Bavaria, circle Middle Franconia, dist. and near Kipfenberg with a parish church a brewery a trade in cattle, and a paper, a saw and a flour mill. Pop. 738

KINEAGH, par Ire. Carlow and Kildare 6299 ac. Pop. 225

KINEL a river Russia, which rises in a ramification of the Ural mountains, in the W. of gov. Orenburg flows first W N W to Bogovoslan then circuitously S W enters gov. Simbirsk, and joins r. bank Samara, about 20 m. above the town of Samara, after a course of nearly 170 m. It is remarkable for the impidity of its water

KING—1, An island co. New S. Wales, 72 m. in length, breadth varying from 11 to 38 m. area, 1781 sq. m. or 1 150 840 ac. It is watered by several rivers, of which the Narrara is the principal. The chief towns in Gunning, 153 m. S.W. Sydney—2 Several places, China particularly, a city prov. Chihli, 165 m. S. Peking with a pagoda, three triumphal arches and a tower 11 stories high

KING BAY, a beautiful bay Van Diemen's Land, at the upper or N. end of Oyster Bay from which it is separated by a low sandy neck of land. The Great Swan Port River flows into it. lat. 42 10' S. lon. 148° 7' W.

KING CHARLES SOUTH LAND an isl. Tierra-del-Fuego, about 170 m. N. to S. and 250 m. E. to W., area, above 20 000 sq. m. On the N. and E. the surface is level, with occasional hills of low elevation but the S. and W. parts are occupied by mountains, of which the highest, Mount Sacramento lat. 54° 27' 12" S. lon. 70° 51' 30" W. (N.), rises 6800 ft. above sea-level, and is covered with snow for nearly two-thirds of its height.

KING EDWARD par Scot. Aberdeen, 11 m. by 5 m. Pop. 3749

KING GEORGE III'S, or STIKIA ARCHPELAGO an isl. group, Russian America, discovered in 1741 by Alexei Tschirikow second in command of Balm's expedition. It lies chiefly between lat. 56 and 58 N. and includes the isle of Baranoff Admiralty Chelagoff &c.

KING GEORGE ISLAND two isls. R. Pacific Low Archipelago, about lat. 14° 22' S. lon. 144° 58' W.

KING GEORGE'S SOUND Australia, S.W. coast lat. (entrance) 33° 6' 20" S. lon. 118° 1' E. formed on the S. side, by a promontory called Bald Head. It is a good roadstead and is partially sheltered from the prevalent E. winds by two islands which lie at its entrance. It receives King and Kalapong rivers, and on its shores is the town of Albany. King George's Sound was discovered in the year 1792 by Capt. Vancouver

KING ISLAND Marquis Archipelago 18 m. off Tasmania coast lat. (R. end) 12° 15' N. lon. 85° 25' E. about 23 m. long by 10 m. broad. It is inhabited and affords plenty of large straight timber fit for masts and several parts of ships. Tigers and snakes abound in it.

KING WILLIAM'S TOWN a m. Cape Colony British Kaffraria, l. bank Bush or Gwokoza about 4 m. from its junction with the Buffalo river 62 m. N. W. Graham's Town, lat. 33° 10' S. lon. 27° 20' E. It has the aspect of an Eng. lish village, but has been much injured by the Kaffre wars.

KING-CHUOT FOU a city China, prov. Houpe, l. bank Yang-tse-kiang lat. 30° 29' N. lon. 111° 37' E. It is large, populous, and well fortified, with a numerous Tartar garrison, and is considered from its situation one of the keys of the empire. There are numerous lakes in the vicinity abounding in fish.

KING-ET TAO cap. Corea. See HAW YANG

KING-EE CHING, a m. in China, prov. Kiangsee, l. bank of a river that flows into the R. E. and of Lake Poyang lat. 29° 15' N. lon. 116° 52' E. It is regularly built, but the streets, as usual are extremely narrow. The inhabitants are formerly entirely devoted to the manufacture of porcelain, which was considered the best in China. The pop. has been estimated at 1 000 000

KINGAN FOU a considerable city China, prov. Kiangsee, l. bank Kan-kiang lat. 27° 7' N. lon. 114° 22' E. A great portion of the space within the walls is occupied by gardens. The suburbs are the most thriving and commercial part. Extensive cotton and linen manufactures are carried on here.

KINGARTH par Scot. Bute 8325 ac. Pop. 1007

KINGAVAR or KUGAVAR, a m. in Persia prov. Irak-Ajemi, 92 m. S. W. Hamadan. It was once a place of considerable importance, and is still entered by gates, though it has dwindled down into insignificance. It contains a small mosque and a bazaar and has in its vicinity ruins, supposed to be those of an ancient temple of Diana. Pop. about 1300

KINGERRY par Eng. Lincoln 1435 ac. Pop. 106

KINGS COUNTY in Ireland, an Irish par. Leinster bounded N by Westmeath, E by Kildare, S by Queen's County and Tipperary W by Tipperary, Galway and Ros common greatest length, 45 m, breadth, 39 m area, 772 sq. m., or 493 985 ac. of which 827½ ac. are arable. A large portion of the N and E. part of this county is covered with the bog of Allen and of the b. with the Silver Blower Mountains the extent of coniferous occupied by both being estimated at 145,536 ac. The former into all the other bogs have reference on limestone gravel the latter consists of a nucleus of claystone, supporting banks of sandstone they do not rise to any great height, the loftiest summit being only 1669 ft high. They extend, N. E. to N. W. through a distance of about 15 m. Crumlin limestone occurs in the N. W. of the county and has been quarried. The soil is in some places very rich, but in others it is light and gravelly at an average, it may be reckoned of a medium degree of fertility. A hill called Craghan Hill, which consists of a protruded mass of trap conglomerate, is almost all under cultivation, and yields the most abundant waste and green crops without any manure whatever. The general produce is oats, wheat, and potatoes. The tillage farms are generally small but there are some extensive grazing ones. The occupations are nearly altogether agricultural manufactures being only for home consumption. The latter include some linen frozes and sergees. King's County is divided into 12 baronies and 51 parishes and returns two members to Parliament, both for the county. Registered electors, 1851, 25,377. The principal towns are Bir or Person's Town, 10,141; 146,897, (1851) 112,080.

KING'S ISLAND — 1 At the N entrance to Euxine Strait, about half way between Van Diemen's Land and Australia lat. (N point) 32° 52' S. lon. 153° 37' E. It is 35 m N to S, and 13 m E. to W, and is a continuous ridge of granite. The S. E. shore is steep, and the ground which rises abruptly over it, is almost denuded of wood. The soil is everywhere inferior and is overrun with dense scrub and impenetrable thickets, a few patches only of clean land being to be met with. There are three vast lakes of mangroves on the island and plenty of wild fowl on some of the lagoons. It is much frequented by seals, and is the permanent residence of some of them — 2, An is. of the Pacific, off W. coast, N. America lat. 52° N. lon. 113° W. It is of considerable extent, and forms the N. W. side of Barrow's canal. Its N. W. corner is named Point Edward which is opposite to the entrance of Baffin's canal, and has to the N. W. of it Cascade canal, on the N. E. shore of which there are some magnificent cascades. This island was visited by Vancouver, who gave it his name, and about a month after by Sir Albr. Mackenzie, after his perilous journey across the continent. — 3 A small is. off the coast of Bengal, in the mouth of the Nubbarnooty river, lat. 11° 24' N. and lon. 85° 40' E. vessels anchor under it in 6 or 7 fathoms, sheltered from all winds — 4, An is. belonging to the group of the Maldives, but better known by the name of Male, much smaller lat. 4° 10' N. lon. 72° 35' E. (N.).

KING'S LANGLEY or **LANGLEY KING**, a vil. and par. England, co. Hertford. The village, 17 m W. S. W. Hertford, has an ancient church, in which is the tomb of the fifth son of Edward III. a paper manufactory, and a station on the London and Birmingham railway. Area of par., 346½ ac. Pop. 1599.

KING'S NORTON or **NORTON KING**, a vil. and par. England, co. Worcester. The village, 5 m. E. S. E. W. Birmingham, has an ancient church in the decorated English

style, with an elegant tower surmounted by a finely proportioned spire two chapels belonging to Baptists and Wesleyans and a school, founded by King Edward VI. The inhabitants are principally engaged in agriculture. Area of par. 12,132 ac. Pop. 7759 — (Local Correspondent.)

KINGSBARNH, par Scot Fife, 4 sq. m. Pop. 693.

KINGSBRIDGE, a market in and par. England, co. Devon. The town 1½ m S. S. E. Plymouth is agreeably situated on a rising ground at the foot of the eastern of two hills and separated on the N. from Dulbrook by a small rivulet called the Dod. The principal street is well kept, and the houses of great elegance are well built of stone. It has an ancient church with an unadorned tower surmounted by a spire three Dissenting chapels, and a Friends' meeting-house; free grammar and several private schools a literary and scientific institution, several friendly societies and a farmers club and handsome public rooms in the Indian style, where the petty session and county court are held, and in which are a new-room and corn exchange. The woollen manufacture was formerly carried on here to a great extent, but has been discontinued for several years, the last factory having been converted in 1845 into a large steam corn-mill. There are here two foundries a manufactory of agricultural implements, and a number of maling establishments. At the quay coasting vessels of 160 to 200 tons burden receive and deliver cargoes of coal, iron timber and general merchandise. Area of par. 350 ac. Pop. 1679 — (Local Correspondent.)

KINGSBURY, three parcs. England — 1 Middlesex 1765 ac. Pop. 606 — 2 Warwick, 5070 ac. 10 p. 1416 — 3 (Kingsbury) Somerset, 8446 ac. 10 p. 1857.

KINGSGATE, a market in, and par. England. Middlesex.

The town 10 m N. W. of London contains a fine old cruciform church, with a large square tower and a handsome new church, with a lofty spire several Dissenting chapels, an endowed school and various other charities. Near it are four saw-mills. Area of par. 19,917 ac. Pop. 2865.

KING'S COVE, a N. S. Australia, bounded on the N. by the point of land which separates the Bay of Shuals from Seal Bay. It is the principal settlement of the S. Australian company.

KINGSCOTE, par Eng Gloucester 1810 ac. P 297.

KINGSGATE, a market in Ireland co. and 20 m N. E. Cavan consisting of one long spacious but irregular street, formed of substantial stone houses roofed with slate. It contains a handsome and commodious market-house a neat parish church and a Catholic and Wesleyan Methodist chapels a dispensary and several minor charities. 1 1143.

KINGSTON a N. U. States state and 57 m S. by W. New York, 3 m W. the Hudson, with a court-house, jail,

academy, four churches, and some manufactures of iron, tobacco, and leather. Pop. 2800.

KINGSTON, the capital of Isl. Jamaica, co. Surrey S. coast lat. 17° 55' N. lon. 76° 50' W. on a gentle slope. The streets are long and straight, and laid out with great regularity. The houses are generally built of brick and are two stories high, having the fronts shaded by a piazza below and a covered gallery above; the latter, from 12 to 14 ft. wide,

gaily painted with green and white, and formed by the roof projecting beyond the brick walls or shingles of the houses. Where the houses are contiguous to each other the piazzas form a covered way affording grateful shelter from the sun. In the upper part of the town every house stands detached from its neighbour in its little garden, filled with vines, fruit-trees, and stately palms, with a court of negro houses and offices behind. The principal public buildings are the English and Scotch churches the former which stands in a commanding position is a large and elegant structure, with four aisles and a handsome tower and spire, several chapels, two synagogues, an hospital, and various other charitable institutions, court-house, free school, theatre, workhouse, new penitentiary commercial subscription rooms, barracks, and jail. The market-place is in the lower part of the town, near the water-side, and is plentifully supplied with butcher-meat, poultry, turkeys, fish, fruits, and vegetables. The fruits include the finest pine-apples, and the vegetables nearly all those known in Europe. The harbour which is 6 m. long by 2 m. wide, is completely land locked, being separated from the sea by a narrow slip of low land along which there is excellent anchorage for vessels of any size. The entrance to the harbour and the harbour itself, is defended by several formidable forts. The inclined plain on which Kingston stands is enclosed on the N by the loftiest ridge of the Blue Mountain chain and the intermediate space agreeably diversified with country residences, and, near the mountains with sugar estates. A railway between Kingston and Spanish Town, 10 m. W., was opened in 1844. Pop. estimated at 35,000.

KINGSTON is a town, Upper Canada, Midland District, on Navy Bay the N.E. corner of Lake Ontario, 199 m. S.W. Montreal about lat. 44. 14 N; lon. 76. 30 W. The streets are regularly laid-out at right angles to each other; and the houses, although in general having no pretensions to elegance, are, for the most part, substantially built of stone. The market-house is a spacious structure, containing news and reading rooms and various public offices. The places of worship are three Episcopal two E. Catholic, one Presbyterian, two Methodist, one Baptist, and one Irvingite. There is also a collegiate institution belonging to the Presbyterians, together with a medical institute, an hospital, and other charitable establishments. The trade of the port is very considerable, and the harbour, which is commodious and well sheltered, is accessible to ships not drawing more than 18 ft. of water. Its entrance is defended by two batteries. There are some valuable mineral springs in the town and neighbourhood. Kingston was founded in 1785 on the ground formerly occupied by Fort Frontenac and it was incorporated in 1838. P (1853), 11,565.

Vol. II.

KINGSTON-UPON-HULL, a town England. See HULL.

KINGSTON-UPON-THAMES, a municipal bor., market town, and par., England, co. Surrey. The town, 10 m. S.W. London, is built on a hill, and is connected by an elegant bridge, of five elliptical arches, with a station on South Western railway. It is well paved, lighted with gas and amply supplied with water. The streets of late years have been greatly improved, and near the railway station a new town is in course of erection. The public buildings include a town hall market-house and jail. It has an ancient cruciform church various Dissenting places of worship a Friends meeting-house, a free grammar-school a blue coat school and other charities a large brewery and distillery, several flour and oil mills and a considerable trade in malt. Kingston is a place of great antiquity and numerous interesting Roman remains have been discovered in the neighbourhood. Pop. 6279. Area of par., 4765 ac. Pop. 12,144.

KINGSTON three para. Eng. —1 Hereford; 1891 ac. Pop. 510. —2 Kent 1535 ac. Pop. 510. —3 Somerset, 5477 ac. Pop. 308.

KINGSTOWN a seaport in Ireland co. and 6 m. S.E. Dublin with which and with Belfast it is connected by railway. It lies on the S. shore of Dublin Bay and has regular streets, partly paved, and well lighted with gas, and contains some fine terraces, and other elegant houses. The Established church is a spacious structure. There are also a E. Catholic chapel two Dissenting chapels, and several public schools. It has a magnificent harbour of refuge, commenced in 1816, after designs by Rennie, consisting of two piers and a breakwater. The E. pier is 3500 ft. long and the W. 4860 ft. with an entrance 550 ft. wide and including an area of 250 ac. with a depth of from 15 to 37 ft. A wharf of 500 feet long extends along the breast of the harbour opposite the entrance where ships of any burden may receive or discharge their cargoes. Kingstown has regular steam-boat communication with Holyhead Liverpool and Dublin. It has become a favourite resort of the wealthy citizens of Dublin and is much frequented during summer for bathing. The imports consist of coal, iron and timber, while grain, cattle, lead-ore, and granite of excellent quality obtained in the neighbourhood are exported. Upwards of 2000 vessels, averaging more than 200,000 tons burden, enter and leave the harbour annually. Pop. 10,459.

KINROSS, a tn. and par. Scotland no. Kinross. The town is pleasantly situated at the W. end of Loch Leven 20 m. S. by W. Edinburgh formerly a nice-looking place but of late years greatly improved by the erection of new buildings lighting the streets with gas, &c. It contains a county hall and church, both handsome edifices a Free and two L. Presbyterian churches a parochial and some other schools, a savings bank and various benevolent and charitable institutions. Cotton-weaving, and the manufacture of tartan shawls, plaids and other articles, are the principal branches of industry. Pop. of tn. 2590 of par 3227

KINROSS-SHIRE, a small island co. Scotland W. of Fife, and entirely surrounded by that county and Perthshire length, 11 m., breadth 10 m., area, 50,560 ac., of which 4460 ac. are water constituting principally of Loch Leven. The borders are hilly but the interior is generally level or slightly varied by gentle elevations. In the lower districts to the N. and W. of the lake, the soil is clayey sandy and tolerably fertile but in the more elevated parts it is unproductive being mostly moorish and mossy the former however affords excellent pasturage. Oats constitute the principal crop grown. The general geological formation of the district is red freestone, but the higher hills are whinstone or basalt. There are quarries of limestone and freestone, but no coal. The county contains several lakes the principal of which is Loch Leven (which see) covering a surface of 1200 ac. Then, and some of the other lakes, abound in fish. The principal streams are the Garry the S. and N. Quich all of which fall into Loch Leven. Kinross, the county town, and Milninchert, are the only towns in the county. Kinross-shire contains seven parishes, and unites with Clackmannanshire and certain parishes in the S. W. part of Perthshire, in returning a member to the House of Commons. Pop. (1841) 8765; (1851) 8914.

KINSALE, a par. bar. export, and market tn., Ireland co. Cork. The town 12 m. S. E. Cork, is agreeably situated near the mouth of the Brandon, which here forms a magnificent harbour about 2 m. long, with a medium width of 6 m., accessible, at almost all times of the tide, to ships of the heaviest burden. It is built on the acclivity of a steep hill, and the streets, which run in an irregular manner, are inaccessible to carriages, except from the summit of the hill,

and the houses, many of which occupy sites excavated in the solid rock, while others are perched on the summits of rocky crags, present a singular and picturesque appearance. The public buildings include the townhall and jail an infantry barracks, a union workhouse, a fever hospital, and dispensary and several public schools. The parish church is a venerable and spacious cruciform structure, with a tower surmounted by a spire; the R. Catholic chapel is a spacious edifice, and richly decorated within. It also has a convent of the Sisters of Mercy, and a Carmelite monastery; to the latter of which a chapel is attached. The only other place of worship are meeting houses for Wesleyans and Primitive Methodists.

From its proximity to Cork and Queenstown Kinross, notwithstanding its advantageous situation possesses a very limited trade. A good deal of business is, however done in butter and mulling and brewing are carried on to a considerable extent. There are also large corn mills. The exports consist chiefly of agricultural produce, and the imports, of timber coal iron, and salt. The fishery employs a great number of the inhabitants, who are reckoned the most expert fishermen in Ireland. Kinross is much resorted to in summer as bathing quarters. It is a place of great antiquity, and was for a long period the most important resort on the S. coast of Ireland. It has been frequently besieged and in the reign of Charles II. a strong fort was erected, which completely commands the harbour and town and, together with the barracks already mentioned is capable of accommodating 2000 men. Kinross gave the title of Premier Baron of Ireland to the De Courcy family, descendants of the Duke of Normandy and whose representative is entitled to wear the lion in the royal prerogative; a privilege asserted by the late Baron Kinross at Dublin castle before George IV. on his visit to Ireland in 1831. It returns a member to the House of Commons. Registered electors (1851) 189. Pop. tn. and bar 5506

KINSALE (OLD HEAD OF) a headland Ireland, co. Cork 5 m. S. W. the entrance to Kinross harbour projecting about 4 m. into the Atlantic, and having a fixed light, 294 ft. high. lat. 51° 38' 45" N., lon. 8° 23' 15" W. (N.)

KIRCHENTELLINGSFURT a vil. Württemberg circle Schwabwald, in a fertile district, with a church, a trade in corn, and sandstone quarries. Pop. 1447

KIRCHENFRUMBACH, a market tn. Bavaria, Upper Palatinate, on the Thambach 15 m. S.E. Burauk, with two churches, a townhouse, castle, and posthouse, and a fishery. Pop. 730

KIRCHET a vil. and par. Switzerland, on Bern, near Meyringen; named from a remarkable hill which stretches

across the valley of Heali, and appears to have at one time summed up the Aar which now flows its way through a dark and narrow ravine, the sides of which in some parts almost meet. The top of the hill of Kirchet is 760 ft. above the Aar and 5900 ft. above the sea-level. Pop. par., 1362.

KIRCHHATTEN, or **HATTEN** a vil. Oldenburg, circle and near the town of Oldenburg with one of the oldest churches in the duchy. Pop. 814.

KIRCHHAYN,—1 a tn. Prussia, prov. Brandenburg, gov. and 64 m. S.W. Frankfurt, on the Little Elster. It has a church, a townhouse, and manufactory of woollen cloth, carriage-wheels, and leather. Pop. 3990.—2 a tn. Hesse-Cassel, Oberhessen, cap. circle of same name, at the confluence of the Werra and Ohre, 43 m. S.W. Cassel. It was once a place of considerable strength, and is still walled, contains a church, and has the works, and a trade in cattle. Pop. in 1819 circle area, 104 sq. m. Pop. 30,304.

KIRCHHEIM three places, Württemberg.—1 (Unter-Teck) a tn. circle Danube, cap. bail of same name, 30 m. N.W. Ulm. It is well built, and surrounded with planted boundaries, contains two churches, a castle, Latin and grammar-school, and hospital, and has manufactory of articles in straw and a trade in wool and wine. Pop. in 1856 bail area, 64 sq. m. Pop. 27,596.—2 (see Necker) a vil. circle and 1 bank Kocher, here crossed by a ferry, 8 m. S.W. Heilbronn. It lies in a fertile wine valley, and has an elegant town-house. Pop. 1944.—3 (see der Eger) a vil. circle Kocher bail, Nuremberg, on the Eger with two elegant churches, and near it a Cistercian convent, founded in 1207. Pop. 1011.

KIRCHHEIM,—1 a vil. Baden circle Lower Rhine, bail, and near Heesberg, with a parish church. Pop. 1811.—2 (see der Eder) a vil. Bavaria, Lower Franconia, dist. Würzburg, with a parish church. Pop. 1041.—3 a vil. Bavaria, circle Straubing, on the Elz, 53 m. W. N. Würzburg. It belongs to the Counts of Pfalz-Turnheim, contains their castle, a parish church, and Dominican monastery, and has an oil-mill, and a trade in corn and cattle. Pop. 792.

KIRCHHEIMOLANDEN a tn. Bavaria, Palatinate, cap. dist. of same name, 30 m. N.W. Speier. It has a justice-of-peace court, and other public offices, a R. Catholic and two Protestant churches, a castle, and a Latin school, manufactory of musical instruments, iron-works, two mills, and mines of tin and quicksilver. Pop. in 1800 dist., 61,537.

KIRCHSCHLAG, a market tn. Lower Austria, in the valley of the Eder, 45 m. S. Vienna, surrounded by old walls, fortified with towers. It has a large and handsome Gothic church, and an old castle. P. 1040.

KIRCHSPILLWALDVIEL, a vil. or rather number of separate vils. Rhodish Prussia, gov. Düsseldorf, circle Kempen, with a parish church. Pop. 1497.

KIRCHWÄNDER, a vil. and par. Hamburg, on the free Eder, opposite to Harburg and 9 m. S.E. Hamburg. It forms the most S. of the Verleden, and contains a parish church. Pop. 3029.

KIRCHWOBIS, a vil. Prussia, prov. Saxony gov. Erfurt, circle Weimar, with a R. Catholic church, a black-fell, and a mill. Pop. 895.

KIRCHZELL, a market tn. Bavaria, Lower Franconia, dist. Amberg with a church manufactory of linen, and flour, saw bone, and oil mills. Pop. 990.

KIRCHZIN, a market tn. Ireland, co. Down, S. shore Strangford Lough, 10 m. S.E. Newton-Ards. It has a neat market-house, and a brown-linen hall, and manufactory of straw hats and bonnets. Pop. 621.

KIRKPURB, par. Eng. Sussex, 12 275 m. Pop. 1965.

KIREGHA, a river, Asiatic Russia, which runs to the W. side of the range which skirts the W. shore of Lake Baikal, gov. Irkutsk, flows N. through a mountainous district, and joins r. bank Lena, a little below Kyzent, after a course of nearly 200 m.

KIREN-N, a tn. Asiatic Russia, gov. and 400 m. N.N.E. Irkutsk, cap. circle of same name, in a wild but picturesque and wooded district r. bank Lena, at the confluence of the Kirenga. It consists of wooden houses of a black colour and has several churches, a valuable fishery, particularly of sturgeon, and a considerable trade in cattle, salt, and furs. Pop. 400.—The country has an undulating surface, continuously broken by lofty hills, rises great numbers of cattle, and produces valuable salt mines.

KIRGHIE (THE LAND OF THE), a vast region of Asia, continuous with S.W. Siberia, and embracing, under one loosely applied name, the territories or hands of two wholly distinct nations, namely,—1, The *Steppe* of the Kirghis-Kasaks, who are the Kirghis of European travellers and geographers, though Asiatics never confound them with the Kirghis properly so called, but name them simply Kasaks. If we trace the N.E. shore of the Caspian Sea to the river Ural and ascending this river to the Russian frontier near Orenburg, follow the actual boundary-line of the Russian empire N.E. and S.E., to the frontiers of Chinese Tartary, we shall have so far marked out the limits of the Kirghis steppe. To S. limits escape Turkmen, Beldars, and Khiva, are probably understood and at all events pass through countries of which Europeans know but little. The steppe, at its most N. point approaches the L. bank of the Irish river (Ural) in lat. 55° N. It extends from lon. 55° to 76° 30' E., or about 1200 m. W. to E. In the S., the nomades hardly ever go beyond the 43d parallel. The superficial extent of the region thus indicated, cannot fall much short of 300,000 sq. m. It terminates in the S.E. at the Altai mountains, where—2, the *Haute* of the Kara-Khán (Black Kirghis) commences. These latter are the people to whom the name Kirghis is confined by Asiatic historians. They are called Kirghis by the Mongolian, neighboring Baidar or Irghis. Their possessions extend over the Altai, Moutan and other mountains about Koken Kashgar and Yarkand, and are occasionally met with much further to the E. but the obscurity which still involves that part of the earth does not permit the attempt to define their limits. Here we shall conform to the language of European geography and confine our attention to what is called the steppe of the Kirghis.

Aspect.—It must not be supposed that the steppe is a level tract. It is collectively an undulating country presenting different aspects and characters in different sections, and at several portions of which bear but a small proportion to the whole. In its N. portion, along the Russian frontier and chiefly towards the W. it embraces several well watered valleys capable of cultivation. Further S.W. also, the hilly country K. and E. of the river Ural, offers in many places all the advantages of wood, water, and good soil. Thence S.E. the plain grows continually more sterile and dreary. The N.E. shores of the Caspian Sea are, for a hundred miles, thickly overgrown with reeds, which gather the drifting seeds so that the land here gains constantly on the sea, and a low sandy waste, interspersed with salt-marshes, extends a long way S.W. Immediately above this desert, on the E. and S.E. rises the Ust Urt or high plain which stretches between the Caspian Sea and the Sea of Aral, and terminates S. to a precipitous fall generally inaccessible. The greatest absolute elevation of the Ust-Urt is 730 ft. It forms bald, lofty cliffs everywhere along the W. side of the Sea of Aral. It borders the Caspian for only 60 m. along the gulf of Türk Kessan (lat. 44° to 46°). S. it extends to lat. 41° 30' N. N. of the Sea of Aral are the *Samarsk* known as the Great and Little Sands of Aral. Thence to the E. and N. the Kirghis steppe is a black arid waste, varied only with occasional salt-pools, till the hills on its E. borders are approached, when running waters, trees, and fresh herbage reappear. S. the sands in crease. The desert of Kara-Kám (Kám means sand), of area of 10,000 sq. m., occupies both banks of the Syr Daria, which falls into the Sea of Aral and further S., the desert of Kuzil-Káas has perhaps an equal extent.

Mountains.—Of the mountains lying within the steppe, the following deserve mention.—The Uting, or great mountain, in lon. 67° E. and stretching N. from lat. 46° N. said by the Kirghis to be the highest in their plans. They seem to be connected with the chain of the Dzhaghtai (i.e., uninterrupted) mountains further E. Still further E. are the Irund mountains. The Ak-tau (white mountains) are known only by name. The Kara-tau (black mountains) separate the steppe from Turkmenia, and abound in mines of iron and copper. Few of the mountains within the steppe have an elevation exceeding 2000 ft.

Sea and Lakes.—The Sea of Aral (which see) is encompassed on three sides, W., N. and E., by the two rivers of the Kirghis, the great Caspian, the Hyrcanian Sea of the Atlantic, following in a hooked figure round the great peninsula of the Ust Urt. Salt lakes are scattered over the parts

of the steppes so thickly as to defy enumeration. In the E., towards the mountains of Turkistan, their rim and importance increases. Lake Balkhash has a length of 120 m., and is fed by the Ili, and other rivers from Turkestan. Lake Kalasu receives and gives a passage to the Irish one of the greatest rivers of Siberia. The lakes Ak-Sai and Barbi form a remarkable group, about five days' journey N. E. of the Sea of Aral and with the reed thickets that separate or environ them cover an area of some hundreds of sq. m.

Climate.—A region so extensive as the steppes of the Kirghiz, must necessarily present varieties of climate, depending on latitude or local circumstances, yet, with all these shades of difference, the steppes are everywhere characterized by immediate temperature, or excessive heat and cold. In summer, the heat of the bare arid plains is insupportable; the thermometer rises, in the shade, to 110° Fah. and even on the banks of the Ural, in the latitude of Paris, the sand becomes hot enough to roast eggs. In winter, the cold is equally intense, frost having persisted of old on the banks of the Syr Daria, in the latitude of Bordeaux (45°) and on the Ust-Urt, the mercury of the thermometer is often frozen. The transition from one of these extremes to the other is, at certain seasons, immeasurably rapid. Nor must we omit the fury of the winds. The hurricanes of the steppes sweep off houses, trees, and cattle irresistibly, sheep, in particular, are often blown away for miles, till buried in a snow drift. Another prevailing character of this climate is its excessive dryness: rain seldom falls in the steppes, except near the mountains, and there only during the autumnal months.

Produce.—The several low ranges of mountains which stretch from the Uralian chain into the Kirghiz steppes, are all said by the natives to contain gold, but hitherto no deposits have been found so rich as to remunerate for the labour of washing them. Silver ores, also, are said to be rich and abundant near the little Nura, and on the banks of several streams falling into the Irtish. Copper mines exist in the same quarter. Iron is still more plentifully distributed throughout the steppes. One of the richest known deposits of iron occurs on the banks of the Chirchik, Dorduk which joins the Irtish. But these ores have little value in a country thinly populated, and in general ill supplied with fuel. Nor is the force of this remark materially lessened by the discovery of coal in the Ilek, about 20 m. from the river Ural and also near the lake Isderakoe. The deficiency of wood in the steppes is the necessary consequence of the want of rain. It is only in the vicinity of the Ural and of the Irish that forests occur. Further S., and in the interior of the steppes, trees disappear totally; and the clayey soil is thinly covered with herbaceous plants, among which chrysantheums are conspicuous. Towards the Ust-Urt, a small shrub—a species of tamarix—makes its appearance, growing continually more vigorous towards the S. This is the maxow of the Kirghiz, which attains its greatest development at the Syr Daria, where, as a small tree, it forms considerable forests. Among the plants of the steppes, there are none more important or remarkable than the reeds (*Juncus typus*) which, on the shores of the Caspian, Sea of Aral lakes of Ak-Sai, and elsewhere, attain a height of from 30 to 80 ft. and form compact thickets. In the midst of these, the Kirghiz often pitch their tents for the sake of shelter and fuel. The same thickets conceal the wild boar, which here attains an immense size. The tiger also haunts the reeds of the Syr Daria. The wild buffalo prefers the mountains; the wild horse the naked plains of the Ust-Urt. The wild antelope, resembling a roe-buck, and the hare, are both numerous; and the latter so free from timidity, that it may sometimes be taken with the hand.

Densities and Population.—Though the Kirghiz-Kazaks retain nomadic habits, they do not wander without limitation. In order to avoid feud and contention, each nation, tribe, and even each subdivision of a tribe, contains itself, as much as possible, in a particular country or district. They have been long divided into three border (jork, a tent or encampment),

namely the Great, the Middle, and the Little Horde; which are again subdivided into tribes and sections. But their flocks and herds being numerous, they generally make up in small encampments or sals (owl), consisting of the members of a single family. The Little Horde resides from the river Ural, N. of the Caspian and the Aral, to the Syr Daria, and the sands of the Kizil-Kum. The Middle Horde extends N. E. of the preceding, along the left bank of the Irish. The Great Horde encamps on the rivers Chui and Ili, and thence S. to Turkestan, where it comes into contact with the Khor-Khor or Hindis. The attempt to estimate the numbers of these hordes is rendered exceedingly difficult, not only by the migratory habits of the people but also by their determined hostility to a census, against which they always revolt. It is only, therefore, by way of loose approximation, that the whole nation is supposed to consist of 400,000 tents or families of which number 75,000 belong to the Great Horde, 165,000 to the Middle, and 160,000 to the Little. This would give, for the whole population, from 2,000,000 to 2,500,000 of both sexes.

The People.—The dwelling of the Kirghiz is the yurt or hemispherical tent, the frame of which is of the boughs of trees, the covering of felt. An opening at the top serves, in good weather, for window and chimney. The ordinary yurt is about 9 ft. high, and 18 ft. in diameter but the rich Kirghizes often have them much larger. The erection or removal of the yurt is the work of half an hour. In choosing a place for it, shelter from the winds and from snow drifts is the first consideration. In summer the nomadic Kirghiz leads a life of pleasure. In winter he is often a slow paces in his tent, annoyed by the smoke of a fire which scarcely warms him, and constantly dreading the violence of the howling tempest. For home wants, they carry on some domestic manufactures such as weaving cordage-making from horse or goat's hair; soap and leather making, &c. They make, likewise, in a very coarse manner, various metal ornaments such as are used in horse furniture, &c. In the autumn they carry on a barter trade with the Chinese at Ili, and with

KIRGHIZ MERCHANT AT BISHKEK—From *Revue des Deux Mondes*.

the Russians at Omsk, Semipalatinsk, &c., exchanging horses, camels, horses, sheep, goats, wool and goats-hair skins, and antelope horns, for iron and copper implements, cutlery, velvet, silk, mirrors, &c., with the Russians, and for silver, silk, porcelain, painted goods, and tea, with the Chinese.

The Kirghiz are in general below the standard of European stature. It is said that those of the Great Horde are taller than the rest. In features, they hold a middle place between the Turkish and Mongolian races. They have the prominent cheek bones and small oblique eyes of the latter, without, however, being so broad or so flat in the face as the Kalmyks. They are obviously a mixed race; the frequency of contacts from all the surrounding countries. They show a decided preference of Mongolian physiognomy, and prefer Kalmyk and Bashkir wives. They are remarkably healthy and

vigorous—the result of a life without care, in the open air, and on horseback. The Kirghis knows nothing of bread. His food is chiefly mutton and horse-flesh, with kumys, or sour mare's milk. From the kumys he also extracts an intoxicating spirit. The salt lakes abounding in salt, and so numerous in the steppes, offer him no temptation. He neither fishes nor hunts, nor makes any higher luxury than kumys, and the smoked leg of a young horse. The use of tea is extending among the herds, and particularly of what is called brick tea. The dress of the Kirghis consists of one or more loose frocks, called chaps, wide pantaloons, girdle, a white-felt coat (not hat) in summer, a furred cap in winter and pointed boots. The poorer people wear coarse cloth or felt; the rich have the outer chaps of Chinese silk or velvet, and display their wealth in costly fur, or in unbuttoned pantaloons and boots. The female costume differs little from the male, but the woman's frock or chaps is always closed in front, and from the top of her high-felt cap, a veil hangs down over the back and shoulders. The Kirghis are professed Mahometans, but they have little regard for the precepts of the Koran. They know nothing of prayer or abstinence and indeed their religion goes little beyond this—that being Muslims, they hate the Parsees, as Shilaks, and conscientiously kidnap them when they can. They are extremely indolent and peaceful, some dangerous in the steppes from their rapid movements, they fly from the show of firm resistance. Though violent, they are not gay though insatiable of industry they are contented with adversity. Their hospitality often ends in treachery and they are, moreover, frightfully vindictive. The women, however are said to be morally much superior to the men. To all the labours of the house—the making of clothes included—they add at least half of the out-door toil. To these, therefore, belong three-fourths of all the industry of the nation, while the men give themselves up in the same proportion to sword and conquest and horse husbandry.

The subjection of the Kirghis-Kazaks to the empire of Russia, as far as roving bandits in the desert can be said to be subjected, has been effected within little more than a century and more by managing the fiefs of the tribes by direct force. The title of Khan of the Little Horde ceased, in 1812 to be connected with political power that of Khan of the Middle Horde became extinct in 1816—the election of a successor to the deceased prince being by some invisible influence, indefinitely postponed. A large body of Kirghis are settled on the bank of the Ural in the government of Astrakhan. The steppe in general are included in the government of Omsk.—(Akhie & Lervins, *Description des Herbes et des Steppes des Kirghis-Kazaks*, etc. 1840, Helms, *Reise nach dem Ural und der Kirghistansteppen*, 1841.)

KIRIA or KIRKIA is a Chinese Turkistan, on river of same name, 3° 5' S.E. Khotan, having a trade with Yarkand in silk, gold-dust, grapes, and rubies; and with Russia in broad-cloth, breeches, furs, and steel, in return for tea, rhubarb, and muskamelles. The gold mines here are wrought, and the province monopolized by the Chinese Government.

KIRILOV is a town in Russia, and 370 m. E.N.E. Novgorod, cap. circle, between three lakes. It has three churches, a monastery and general trade. A great number of the inhabitants gain their livelihood by making pictures and similar articles, used as the decorations of the Greek church. Pop. 2165.—The church, more than half of which is covered with wood has also good arable and meadow land. P. 55,489

KIRIN-OLIA, or KIRIN-OLIA is a maritime port and in Manchuria. The province is bounded N. by the Amoor, E. by Corea, E. by the Sea of Japan, and W. by the Mongols. It is upwards of 700 m. long and 300 m. of median breadth. It is covered with forests, abounding with wild animals. The climate is so severe, notwithstanding its latitude (43°-48°) that no grain excepting oats and millet, can be grown with advantage. The most esteemed plant produced in the province is ginseng. It is thence produced, and contains three virtues only.—The capital, a bank and near the sources of the Songari lat. 43° 45' N. lon. 126° 34' E., is not a place of much importance, but is the residence of the viceroys, and the head-quarters of the troops.

KIRKATCHE, is a town, gov. and 60 m. W. Tashkent, on bank river of same name. It has a church and a handsome monastery. Pop. 800.—The river flows E., and joins a bank Kishinev, after a course of nearly 60 m.

KIRK with affixes, several pars. England.—1 (*Andover*—*Eden*) Cumberland 1050 ac. Pop. 131.—2 (*Andover*—*Eden*) Cumberland 17,345 ac. Pop. 1298.—3 (*Andover*—*Eden*) Cumberland 2502 ac. KIRK ARAH or KIRKASARAH is a village Turkey, near Andol, 55 m. N.E. Smyrna. It is a large, industrious, and populous place; with a considerable trade in cotton, which is largely grown in the vicinity.

KIRK-DARAZ, a mountain range, Asia Minor, near Eozon about lat. 41° 30' N. and lon. 85° E. extending S.E. from the Kirik Irtak to the hilly district containing the diversities W. of Maralran. The summiting point of the range is about 8990 ft. and from it the slope gradually descends to the lofty plain of Chorum, which is only 780 ft. below. The nucleus of the mountain is later schist, but the prevailing rocks on the surface are breccias and tilted-up limestone. Parts of the chain are well wooded with oak and pine.

KIRK KILISSA is a European Turkey Roumania, and 110 m. N.W. Constantinople. It is a large but ruinous place on a slope, enclosed by walls has numerous mosques and baths and a trade, principally in wine and corn, and in the manufacture of a peculiar kind of conserve composed of the impregnated juice of boiled grapes turned into rolls, containing walnut kernels.

KIRKBY LONDAL, a market in par. Eng. England, co. Westmorland. The town 27 m. S.W. Appleby, pleasantly situated on a bank Lane, here crossed by a very old but picturesque bridge of three lofty arches is a station on the Whitehaven and Furness railway. The principal streets, which diverge from a central market-place, are handsome and well lighted houses built of white lava stone, and roofed with slate. It has an ancient church, with a square tower 60 ft. high three Dissenting places of worship, a free grammar school and manufacture of coarse woollens and linens, calicoes and ginghams. Londale gives the title of earl to the family of Lowther. Area of par. 25,569 ac. Pop. 4164.

KIRKBY MOORUM, a market in par. Eng. England, co. York, N. Riding. The town on the Dove, 23 m. N. by E. York, is irregularly built; has a neat Established church, several Dissenting chapels, a Friends' meeting-house, a free, and a national school. Near the town are corn-mills, with limestone and sandstone quarries. Area of par. 21,261 ac. Pop. 2415.

KIRKBY STAPTON, a market in par. Eng. England, co. Westmorland. The town situated in a fertile plain, 1 bank Eden, 9 m. S.E. Appleby is kept remarkably clean, houses well built of stone, obtained in the vicinity. Water abundant.

It has a spacious Established church, in the early English style, with two Dissenting chapels, a grammar, and three other schools; and some small in agricultural produce. Area of par. 27 981 ac. Pop. 2758. (*Local Correspondent*).

KIRKCALDY a royal and parl. bor and seaport, Scotland, on Fife, on a spacious bay N shore Firth of Forth, 10 m. N Edinburgh. It consists principally of one long irregular street, which, including suburbs, extends for about 8 m. W to E. The W part of this great thoroughfare stretches along the shore, which is a low, sandy level, but towards the E, the main street, as well as some of the lanes diverging from it, is built on an acclivity. The streets are kept in good order, well paved, and lighted with gas; the more modern houses are generally neat and substantial freestone structures. It has a handsome townhall, with an elegant spire; an Established, Free, and two U Presbyterian churches, and Episcopalian Baptist, and Independent chapels a burgh school, Philip's institution for educating and clothing the children of the poorer classes belonging to Kirkcaldy and some of the neighbouring towns and numerous well-conducted private seminaries, an infant school, a societies association, and two libraries. In Kirkcaldy, and the district around it, there are 18 fax-spinning mills. Bed ticking, canvas, and other linen fabrics, are the staple manufacture of the place, amounting to the annual value of about £200 000. There are seven bleachfields, connected with the linen manufacture, and there are flour-mills, breweries, a vitrol-work, distillery and machine-factory. The harbour has been of late years greatly improved, and although it is completely dry at low water it is capable, at full tide, of admitting vessels of very considerable burden. The trade of the port is extensive. The imports are principally from the Baltic, Germany, and Egypt, and consist of flax, timber, corn, and other articles; the exports are linen, yarn, corded herrings, and coal, to the annual amount of about 50 000 tons. The N whale fishery is also carried on to some extent. The number of ships belonging to Kirkcaldy, on Dec. 31 1840 was 74, tonnage 9876. Kirkcaldy unites with Dysart in sending a member to H of Commons. Adam Smith author of the *Wealth of Nations*, was born here in 1723. The par. of Kirkcaldy is 34 m. long and covers 1 m broad P bor and par. 5719. (*Local Cor*).

KIRKCOLM par Scot. Wigton, 6 m by 4 m P 5018.
KIRKCONALL par Scot. Dumfries 15 m by 8 m Pop 1245

KIRKCOONAN par Scot. Wigton 15 m by 6½ m P 1541
KIRKCUDBRIGHT (Stewarton) par Scot. a maritime co. Scotland, and, with exception of Wigtonshire, the most S bounded, N by co. Ayr, W Wigton, E Dumfries, and S by the Solway Firth, length about 48 m. breadth, 17 to 30 m., area, 558 760 ac., of which about one-fourth is supposed to be arable, and 110,000 ac. under cultivation. The coast-line generally bold and precipitous extends from the head of Wigton Bay to the Nith, a distance, exclusive of bays and inlets, of about 45 m. The W part of this line is considerably indented—the larger openings being Fleet Bay, Wigton, and Auchencroft Bays, and Urr Water. The surface in the interior is generally hilly, and in extensive districts mountainous; the chief elevations in the latter reaching the height of 2000 to 3000 ft. The greater part of the country is composed of transition strata. Granite, however, is met with in several localities; the most conspicuous being Criffel, in the E. part of the county, comprising the hill of that name and the surrounding group, the former is 1821 ft high, situated within about 2 m of the W shores of the Nith. Kirkcudbrightshire contains numerous metallic veins. Veins of copper ore have been found in many places, but are not now wrought. The principal rivers of the county are the Dee and the Lrr. Lakes numerous, but generally small, with exception of Loch Ken, a beautiful sheet of water, of great length, but very tame. The climate, in the lower districts, is very mild; but in the upper or mountainous districts it is not unfrequently rather severe. Although the general surface of the country may be characterised as rugged and barren, there are yet many beautiful and fertile, though small valleys, along the courses of the Urr and Dee. Arable husbandry has been greatly improved of late years but the principal attention is paid to the rearing of cattle, which are mostly sent to England. The breed of horses, peculiar to this and the adjoining county of Wigton, known as Galloways, is now almost extinct, its

place being supplied by horses of a larger size, and more suitable for draught. The sheep on the moors and high grounds are mostly black-faced. In the lower districts, Caverly, South Down, and Laimsters prevail. Oats constitute the principal crop, potatoes are also extensively cultivated, and turnips rapidly extending. The salmon fisheries of the Dee and Urr are very valuable, especially the former. The county returns one member to Parliament. Registered electors (1851) 1818. It contains 35 parishes, and forms, with Wigtonshire, the district known by the name of Galloway. The principal towns are Kirkcudbright (the capital), and Castle-Douglas. Pop. (1841) 41 119 (1851), 48 131.

KIRKCUDBRIGHT, a royal and parl. bor seaport, and par. Scotland emp above co. The town is on 1 bank Dee 6 m. N from its confluence with the Solway Firth, 25 m. S.W. Dumfries. It is an clean, well-kept, and lighted with gas has a commodious and elegant Established church a Free, and a U. Presbyterian church, R Catholic chapel, jail, with court-rooms adjoining, academy rooms with a portico in front; and a number of schools, a news-room, and several benevolent societies. Its manufactures are few and unimportant, but many of the inhabitants are in comfortable circumstances. The harbour is good, but the trade is almost entirely confined to the exportation of agricultural produce, and the importation of coal and lime. Steamers ply regularly to Liverpool. Kirkcudbright unites with Dumfries, &c. in returning a member to Parliament P 1577 Area of par 15 000 ac. P 3655

KIRKWALL, a royal and parl. bor. airport, and par Scotland, co. and cap. Orkney on the bay of same name E. of the Firth of Forth 1st 58°59'12" N., lon. 2°57'15" W.

The principal street which is nearly 1 m. long is narrow and ill kept, and the houses have an antique appearance, with their gables towards the street but a new street formed parallel to the former contains many respectable houses and handsome shops. The principal building is the cathedral of St. Magnus, a magnificent old structure, in the mixed Gothic and Norman style, founded in 1158 and the choir of which has been used from time immemorial as the parish church. The other public buildings are the town-hall, jail, and assembly-rooms. Besides the parish church there is a Free and a U. Presbyterian church; an endowed grammar-school of ancient foundation, and several other schools a female clergy and an infant school two libraries, and several friendly and benevolent societies. The plucking of straw for hats and bonnets is the chief branch of manufacturing industry having superseded the manufacture of kelp. The fishery is also of considerable importance. The harbour is commodious and secure, and has been much improved by the erection of a pier It is frequented by coasters, and occasionally by vessels from foreign ports chiefly from Norway and the Baltic. Agricultural produce, cured fish, and cattle are exported in considerable quantities. Steamers ply regularly to Leth. Lerwick &c. Kirkwall was created a royal burgh by charter, from James III. of Scotland and union with Wick, &c., in returning one member to the House of Commons. It was formerly a place of great importance, having been the residence of the Bishops of Orkney who acted a conspicuous part in the early periods of Scottish history and whose palace, although fast crumbling to decay is still in a tolerable state of preservation. Adjoining the cathedral are the ruins of the bishop's palace,

in which King Haco died. Pop. 2451. The par is 6 m. by 6 m. Pop. united par of Kirkwall and St. Olaf, 3990

Lincoln, on the Manchester and Sheffield Railway, and on a railway on the W. side consists of a number of crowded, ill-paved town houses generally of ironstone, well supplied with water and upon the whole, improving. It has an ancient parish church; several Dissenting chapels a national, free and an infant school a bridewell, and a minor court-house. The inhabitants are principally employed in agriculture. Area of par., 4210 ac. Pop. 1948.—(Local Correspondent.)

KIETORF, a t. in Ham-Darumstadt, Oberhausen, 26 m. N. E. Gelsen, with a church, townhouse and school; and several mills. Pop. 2270.

KIS-BASZAR a vil Hungary co. and 4 m. from Raab on a height in a fertile district, which produces good wine, and is famous for its cherries. Pop. 1293.

KIS-BAZ, a market tn. Hungary co. and 22 m. S. E. Komova, with a R. Catholic church, a handsome castle, with English gardens and manufactures of linen, glass, and pottery, and a trade in wood and wax. Pop. 2200.

KISAMOR, a gulf, N. W. coast Isl. Creta; lat. 36° 38' N. lon. 28° 38' E. Having Cape Spada on the E., and Cape Bazo on the W., the latter is high land, and visible at a considerable distance. The gulf is about 5 m. wide at its entrance, and about 6 m. in length inland. It takes its name from a village and castle in ruins at the head of it.

KISARHAN a tn. Syria. See CAMAKIA.

KIRSCHNEW, a tn. Russia. See KIRSCHNEV

KISFALUD numerous places, Hungary, particularly:—
1. A vil. Thither Danube, ca. and 24 m. from Oedenburg, on the Little Raab, with a church. Pop. 1500.—2. A vil. Thither Danube, ca. and 6 m. from Banya, on the Konstans, with a Greek un. church. Pop. 1490.

KISHENAGUR, a tn. Hindoostan prov Bengal, 1 bank of the Jellinging branch of the Ganges, 62 m N by E Calcutta; lat. 25° 36' N; lon 88° 55' E. It is the place of residence of the judge, collector and civil establishment of the district in which it is situated.

KISHENAIU a tn. Russia See KISHENAY

KISHENGHUL, a tn. Hindoostan presid Bengal prov and 19 m E.N.E. Ajmer. It is surrounded by stone walls, and defended by a castle seated on a mountain top, among gardens fenced in by the prickly pear. The principal building is the rajah's palace, a large but rudely built fort, on the banks of a lake.

KISHENGUNGA a river Assam, which rises on the N slope of the Himalaya, near lat 24° 20' N and lon 78° E. flows first W., and then S.W. and a little below Mazharab, joins a bank Jallim, nearly doubling its volume after a course of about 120 m. The upper part of its course is imperfectly known.

KISHM [anc. Orakel], the largest isl in the Persian Gulf about 9 m S Bender Abbas lat 26° 55' to 26° 48' N lon 55° 22' to 56° 20' E. length, 80 m but breadth, at the widest, not more than 12 m. It stretches along the Persian shore, from which it is separated by a channel that is navigable for the largest ships but is very intricate and tortuous, and varies in width from 12 to 3 m. A range of hills, stretching E to W, occupies all the S side while the N part consists chiefly of arid plains, sometimes incumbered with a saline effluence and deep ravines. Earthquakes are not uncommon. There is a good deal of wood, in which jackals are numerous. Antelope, partridges and rock pigeons abound. The N part contains several tracts of black loam on which wheat, barley, grapes, melons, &c., are raised in sufficient quantities for the consumption of the inhabitants. Dates also are abundant. The people are chiefly occupied in fishing, weaving, and the culture of the soil. There are three towns on the island—Kishm, Laft, and Rasool. Kishm, the largest, lies near the sea, at the E point of the island. It has walls flanked by towers, and appears to have formerly been of greater commercial importance than it is at present. Native vessels frequently touch here for wood and water or to engage pilots for the Kishm channel and consequently the island has a bustling appearance. Some boat-building is carried on. Pop. of isl., 5000.

KISHON a river Asiatic Turkey pass Acre Palestine. It has its sources in Anti Libanus, about lat 32° 30' N, flows in a N.W. direction, and falls into the Mediterranean a little S. from Acre.

KISHTAWAR, a tn Hindoostan Punjab, on the slope of the Himalaya, on a small plain near 1 bank Chenab lat. 33° 15' N, lon 75° 45' E. 5000 ft. above sea-level. It is a small town of ill built, flat-roofed houses, with an insignificant bazaar and a fort. Some coarse woollens and shawls, of inferior quality, are manufactured here. The Chenab here rushes through a ravine, having precipitous sides of gneiss-rock about 1000 ft. high.

KISKA, an isl Aleutian Archipelago lat. 52° 23' N lon 177° 50' W (n). It is hilly, excepting its E. part, which is low. Length, N to S., 25 m.

KISLITGURGY gar Eng Northamp. 2170 as P 690.

KISLOVODOK, a celebrated Russian watering-place, in the N. of the gov. of Caucasus, and on the confines of Circassia, 1 bank Eikoutchan, in a rocky gorge, surrounded on all sides by lofty mountains. It consists entirely of a few houses and a fort. The waters are acidulated, and contain a large quantity of carbonic acid gas.

KIMAYOO, an isl, E. Africa, off the coast of Zanzibar, lat. 0° 44' S, with a village on its N.W. side. Near to its S. point, there is a channel nearly 2 m wide, leading to a spacious bay or harbours where ships may anchor in four or five fathoms, close to the S.W. part of the island.

KISSE, or Kuma, an isl Indian Archipelago Banda Sea, lat 6° 5' S; lon. 137° 7' E (n). 21 m. N.N.W. the N.E. end of Timor about 20 m. in circumference. It produces sandal-wood, betel wax, pearls, tortoise-shell, trepang, &c. II.

edible birds' nests, Indian corn, rice, and vegetables with buffaloes, sheep, goats, hogs, and fowls to be obtained by barter, in exchange for cotton cloth, brass-wire, iron, chopping knives, and coarse cutlery. The principal village on Kisse contains a large and well built church, and a school. The greater portion of the natives are Christians. Pop. 7000 to 8000.

KISSINGEN, a watering-place, Bavaria, Lower Franconia, cap. dist. of same name, pleasantly situated 1 bank Saale, here crossed by a handsome bridge, 80 m N.W. Würzburg. It is surrounded by walls, flanked with towers, contains a church, synagogue, townhouse, and poorhouse and has a bathing establishment, on a very complete, and even magnificent scale. There are five springs all of them saline, and containing a large quantity of carbonic acid gas; all are more or less acid and one has a decidedly chalybeate taste. The waters are used both internally and as baths, and are much recommended in chronic affections, gout, and stomach and chest complaints, and annually attract above 2000 visitors. About 500,000 bottles of water are annually exported. A little N. of the town, up the valley of the Saale, are copious saline springs, from which 1500 tons of salt are annually made. An artesian well, 2000 ft. deep, was completed here in 1822. By the action of a sulphuric stream of carbonic acid gas, it throws up a column of water 15 inches in diameter 78 ft. above the surface, discharging 95 to 100 cubic ft. per minute. The water so thrown up contains 8 per cent. of salt, which, being concentrated to 8 per cent. is forced down a tube sunk in a stratum of rock salt at a depth of 1740 to 2000 ft. Dissolving the rock salt, it charges itself with 27 per cent. of salt, and in this state is again thrown to the surface, or rather 80 ft. above the surface by the action of the carbonic acid gas, as before, into a reservoir whence by a natural fall, it goes to feed the salt-works in the boiling-houses. It yields an exquisitely pure white crystalline salt. Pop. of tn., 1600, of dist., 11,205.

KISTNA, or KURNIA [Black or dark lion an incarnation of Vishnu] a river Hindoostan in the Deccan. It rises among the W. Ghats, prov Bejapoor not above 42 m. from the Malabar coast, flows first S.E. and then generally E. passes through the S. part of the Nizam's dominions, in which it receives its two largest affluents, the Beemah, on the left, and the Tungabhadra, on the right bank. It forms the frontier line between the Nizam's dominions and the Guntoor country, which it crosses and falls into the Bay of Bengal lat. 15° 50' N 800 m N Madras. Its course, including windings, is estimated at 700 m. Besides the affluents already named it receives the Warmah and Gutpurah, in the upper and the Musay in the lower part of its course, and many other smaller streams. Flowing for the most part through a mountainous country its channel is much broken by rapids and varying much in depth in different seasons, is not well adapted for inland navigation though after entering the Guntoor District, it is termed by large boats. The Kistna is perhaps richer in gases than any other river of Hindoostan. In the dry season diamonds, cat's-eyes, onyxes, and chalcidolites are said to be found, as well as a minute portion of gold.

KIZUCZA, a river in the N.W. of Hungary which rises near the junction of the W and E Carpathians flows first N.W. then S.E. and, after a course of about 40 m and receiving the Blaticza, joins a bank Waag nearly opposite Zolna.

KITAI a tn Independent Territory, Khanate and 46 m N Khiva, in a low situation, on the coast of Karakum. It is surrounded by a good wall contains a castle of the khan and about 25 shops and has two weekly markets.

KITT'S (8r) an abbreviation of St. Catherines, one of the British W. India Islands Leeward group highest summit Mount Misery 2711 ft. above sea-level, in lat. 17° 29' N lon 63° 48' W (n). In form it somewhat resembles a bottle, the neck of which forms its S.E. termination. Entire length, N.W. to S.E. about 21 m, breadth throughout the broadest part or for about two-thirds of its length 5 m. The remainder under 1 m. occupying at the extreme S.E. point, where it again expands to a breadth of about 5 m. area, 44,000 ac. The centre presents a number of high and barren mountains, intersected by rocky precipices, almost impassable, and abounding with hot springs. The coast on the S. and S.E. is bold but, in the other directions, the hilly and broken country in the interior is succeeded, towards the sea, by an

inclined plane which terminates in a low level tract. It has been estimated that one-half of this island is barren and unfit for cultivation but the soil of the plain is said to be superior

to that of any of the other W India islands for the production of sugar which consequently forms the staple article for exportation though a little coffee, cotton, and arrow root are also raised. Fruits of various kinds abound including oranges, lemons, blackberries, etc. Exports, in 1849 £101 3 3/4 imports, £110 4 1/2 in 1858 £17 1/4 and £16 1/2 respectively. The revenue for the latter year was £22 2/3 and the expenditure £31 7/2. The administration of the island is vested in a lieutenant-governor, council and house of assembly. There are nine Episcopal churches and two chapels one R. Catholic church 12 Wesleyan chapels and two Moravian. The established church has in connection 14 public schools, the Moravian mission four and the Wesleyan eight. The principal town is Basseterre (which see). St. Christopher was discovered by Columbus in 1493, and was said to have obtained from him the name of bearn. No settlement however was made in it till 1624, when Sir Thomas Warner occupied a colony there. It was subsequently captured in part by the French but when the British settlers a series of disputes took place which ended in some temporary conflicts. The island was finally ceded to Great Britain at the peace of Utrecht in 1713. P. 1861 24 3/4

KITTSBORD pop Eng. Somerset 952 ac 1 1/2
KITTEL or **KOTTEN**, a market tn. Hungary co. W. Hungary 4 m S.W. Freudenau, with a R. Carl the church and a fine castle and gardens belonging to Prince Esterhazy. Pop 8100

KITIL, a tn. Hindostan, prov. and about 45 m N.W. Delhi. It stands on the banks of a shallow lake, is enclosed by a ditch and a good brick wall and defended by a lofty fort.

KITZBUHTEL, or **KITZBUHTEL**, a tn. Austria, Tyrol, circle of Unterinntal cap dist of same name, 1 bank Cressbach 47 m E.N.E. Innsbruck. It has a court of justice, a church Capucine monastery on a hospital and a trade in cattle wool and cheese. Near it are mines of copper silver and iron. Pop. 1780 Area of dist. 223 sq. m. 1 op. 15 712

KITZINGEN a tn. Bavaria, Lower Franconia, cap. dist. of same name 10 m. E.S.E. Würzburg. It consists of the town proper on the right, and a suburb on the left bank of the Main which communicates by a handsome bridge, and are both surrounded by walls, flanked with towers as on the whole well built, contains three public squares two churches, three chapels, a townhouse, Latin school and hospital and has manufactures of cotton prints basket-work, gunpowder vinegar and dye stuff, some shipping, a fishery, a large general and retail trade, numerous mills, and a textile and corn markets. Pop. 5770 dist. 10,918

KIUNG-CHAU or **KIUNG-TSOU** a city China, cap. lat. Hainan. It is situated at the S. end of the island lat. 20° N lon 110° 22' E, at the mouth of the Liang, a wall built, and surrounded by a strong wall. The harbour is good, and much frequented by Chinese junka from Macao, Siam, and Singapore. Pop. estimated at above 100,000

KIURU or **XIMO**, the most S., and also the most W. of the five large islands of Japan; lat. 31° S 24° 1' N lon 129° 50' to 132° E. separated N. from Niphon by a narrow strait, about 14 m wide and 1/2 E from Bilibid by a channel 9 m in breadth. It is about 240 m long and 60 m broad, area, 17,200 sq m. This island is almost inaccessible at every side from its coasts being surrounded with rocks and shallows, and exposed to a wild and dangerous sea. Nagasaki to capital is the only point in the island and even in the whole empire of Japan where Europeans are allowed to land. Japan, like the other large islands of Japan is traversed throughout its length by a chain of lofty mountains, many of them formidable volcanoes. On April 1 1826, a most disastrous eruption occurred of one of the largest of them, namely Fudogawa, occasioning immense loss of life and property. There are a great number of rivers in the island the principal of which is the Kameyama and, excepting the E. coast, which is barren the country is exceedingly well cultivated. In several places, there are considerable manufactures of cotton

cloth silk goods and paper. Kipur is divided into nine provinces—Toku-no-Fusa, Toku-no-Fusa, Buzen Satsuma, Bungo, Fige Fiyoga, and Oosumi. Its most important towns are Nagasaki, Kara and Kokura.

KIZ **KIZIL**, or **KIZIL** **KIZIL** [see **KIZIL**] a vil. Turkey, prov. Karamania, 100 m E. Konya on a low mound in the middle of a plain. It contains numerous salt petre-works, that substance being collected in large quantities from the soil and about the place. Many interesting remains of the ancient city Tynan still exist here. About 2 m S. from Kizil is the fountain of Anasabon a small lake or pool about 40 ft in diameter full of brackish turbid water babbling and boiling though quite cold.

KIZIL-IRAK [see **KIZIL**] a river Asiatic Turkey which rises near Kizil-irak and about 36 m E. from this point it flows W. with a deep S. bend, to lat. 39° 30' N when it proceeds N. with a winding course to the Black Sea into which it falls at lat. 41° 40' N lon. 36° E. between Europe and Samsoni its whole course being upwards of 500 m. Of its numerous affluents the principal is the Kara Su which flows from the W. joins it at about lat. 41° 28' N. At Samsonik, about 120 m from its mouth it has a breadth of only about 160 yards. It is nevertheless, a fine river but it does not equal what would be expected from a stream of such a long course and fed by so many tributaries.

KIZIL, Kuz an extensive sandy desert, Asia, to the F. of Lake Aral, occupying nearly the centre of Independent Tartary between lat. 41 and 44° N and lon 61 and 67° E.

KIZIL-IRAK a river Persia, which rises in Kurdistan 20 m N.W. Senna, about lat. 25° 36' N, flows S. by E. forms part of the S. boundary of Azerbaijan and then turning to the E. skirts the prov. of Gilan till it reaches lat. 36° 45' N when it traverses that province in a N.E. direction, and finally falls into the Caspian Sea, about lat. 67° 22' N. In some parts of its course, the river winds through tremendous chains and ranges, its rocky boundaries rising to a height of 1800 ft. above the level of the stream.

KI/LIAR, a tn. and fort, Russia gov. Caucasus. 1 bank Terek 50 m above its mouth, lat. 43° 50' N lon. 46° 45' E. It is dull and sombre a few of the houses are of brick, but the greater part are of wood the situation being low, and exposed to inundations, is very unhealthy. The inhabitants are chiefly employed in agriculture Kuslar being an entrepot for the traffic between Azerbaijan and Persia, carries on a prosperous trade, which is wholly in the hands of the Armenians. The exports are wine, honey, silk, gumme, cotton, and silk stuffs. Pop. exclusive of garrison, about 10,000.

KJESTEMINDE, a support tn. Denmark, on a small and shallow bay, N.E. side of Funen, 12 m E.N.E. Odense. It has a winter haven of the fourth class, admitting vessels drawing 12 ft., at which a considerable trade in corn is carried on. Many of the inhabitants live by fishing. Pop. 1800

KJOBENHAVN, cap. Denmark. See **COPENHAGEN**

KJØGE a seaport in Denmark, E shore of Zealand, at the mouth of a small stream, a bay of same name, 20 m S.W. Copenhagen. It has a church, an hospital, manufactures of carpets, and a harbor of the fourth class, admitting vessels drawing from 10 to 11 ft. but possessed at present, of very little trade. The bay of Kjøge has good anchorage, and is sometimes used as a station by ships of war. Within it, in 1877 a signal victory was gained by the Danish over the Swedish fleet. In the vicinity of the town, in 1807 some Danish militia were defeated by a body of English under the command of the Duke of Wellington, then Sir Arthur Wellesley. Pop. 2200.

KLAASWAAL, a vil. Holland, prov. S. Holland, 11 m S. Rotterdam. With a neat church an elegant school house, and a benevolent society. Pop. 651.

KLABAT — 1 An active volcano, 4000 ft. high, and a village, Isl. Celebes, near Menado. — 2 A dist. and bay, N.W. side of Isl. Borneo.

KLADEK, or KLOM, a vil. Austria, Moravia, circle, and 34 m N. Omitz with a church, potash works, lime-kilns, a saw and other mills. Pop. 818.

KLADDO, a Bohemian circle Rakowitz, 15 m. W.N.W. Prague with a church, townhouse, school and castle. Many factories of potash, and tile-works. Pop. 1295.

KLADOVA or KALOYVA, two places Hungary: — 1 A vil. Hungary, Thither Thessa go and 16 m E.N.E. Arad in a deep valley, has a Greek non-anted church in the vicinity built silver and copper are worked. Pop. 1737. — 2 A vil. Thither Thessa co. Kremova, 14 m from Lugos with a parish church. Pop. 727.

KLADUHA a vil. Bohemia, circle, and 17 m W. S.W. Pilsen on the Elbe. It has a handsome church one of the largest in Bohemia adorned with sculptures in marble a slate and several stone quarries and a coal mine. Pop. 1249.

KLAGENFUERT or KLANZ, a vil. Austria, Styria, gov. and 40 m N.W. Laybach, cap. circle of same name, on the (Hantoch and Glan, connected with Lake Wotter by a canal its fortifications once strong having been destroyed by the French in 1809 their site has been converted into an agreeable promenade. It is built in the form of a square consists of the town proper and four suburbs, and has several hand some squares, some of them adorned with obelisks and statues and spacious streets, lined with houses generally from two to three stories high. It contains seven churches among which the cathedral with a good altar-piece and the town church stand conspicuous, the latter by its belfry and tower 280 ft. high the Landeshauptmanns, an ancient building of the 13th century in which the Estates of Carinthia held their meetings the old castle, an interesting edifice the palace of the Bishop of Gurk, a handsome structure with fine frescoes, some good collections, and a fine park, thrown open to the public the townhouse, library with a library of 30 000 volumes gymnasium, normal and other schools, general infirmary and several hospitals and benevolent institutions. The manufactures consist chiefly of fine woollens, silk goods ribbons, muslin, and white lead, and the transit trade is of considerable importance. Klagenfurt is the see of a bishop and the seat of a superior appeal and criminal court, with jurisdiction over Styria and Carinthia. It is of early origin, and is supposed to stand near the site of the Roman Tiburnia, but its early history does not possess any interest. It first became a place of importance in the beginning of the 16th century, when the Emperor Maximilian I. fortified it, and gave it important privileges. Pop. (1846), 15,054. The circle is well wooded, and rich in minerals and though much broken by hills and mountains, has some tracts of fertile land Area, 1360 geo. sq. m. Pop. 175 000.

KLAMATH, a river U. States, which issues from a lake of same name, on the S.W. frontier of Oregon, flows circuitously W. S. W. receiving several affluent the most important of which, rising near Mount St. Joseph, in Upper California, joins it on the left, and falls into the Pacific in lat. 41° 30' N. It is a very rapid stream, with a depth, near its mouth, of 17 ft., it is navigable for steamers for at least 40 m. Considerable quantities of gold have been found in it.

KLAR, a river which rises in the Dovrefield Mountains in the S. of prov. S. of Trondhjem Norway forms Lake Fæmnd, the greater part of which is situated in the Hedemark in Sweden, flows S.E. E. through stult län, under the name of

Tyrillid, enters the Klar, where it first takes the name of Klar continues to flow S.E., and falls by three mouths into the V. shore of Lake Wener at the town of Larstad, after a course of about 200 m. Its principal affluent is the Söta, which it receives on the right, shortly after quitting Lake Fæmnd.

KLARFHTZA, or CHIAHRENA [anc. *Ostione*] a small seaport in Greece, on a bay of same name, in the N.W. of the Murea, 6 m S.W. Gætum, consisting of a few houses, and a fortress picturesque crowning a height. It is the usual landing place from Zante. The title of Gierena in the royal annals of England is derived from this town, which was anciently the capital of a principality of same name.

KLATTAU, a vil. Bohemia, cap. circle of same name, on a steep height, in the beautiful and fertile valley of the Elbe, 75 m S.W. Prague. It is surrounded by double walls and ditches, has three suburbs, is well and regularly built, and well paved contains a handsome deanery church, a Jesuit college now converted into barracks a townhouse with a lofty tower, and a very large and fine-wooded hall, a Dominican monastery the buildings of which are used as a gymnasium; several other schools, and two hospitals and manufactures of woollen and linen cloth and homespun. It is an ancient place, suffered much during the Thirty Years War and has six times been almost burned down. Pop. 5457. The circle, traversed in all directions by ramifications of the Elbe, is watered by several streams of which the Radbus is the largest has a bleak climate and contains both iron and coal. Area 736 geo. sq. m. Pop. 184 764.

KLAUSEN a vil. Austria, Tyrol circle, and 15 m N.E. Bozen, on bank Eltsch on the Sonnenburg, in a narrow pass, about 1700 ft. above the sea. It has three churches and a Capuchin monastery with a good library. Pop. 1078.

KLAUSENBURG anc. *Clanau* or *Clanopolis* Hungarian (*Colosvár*) a city Austria, cap. of Transylvania and of same name, on the Little Szeana, in a romantic valley 72 m N.N.W. Hermannstadt, lat. 48° 44' S. lon. 23° 34' E. It consists of an inner town or town proper, and six suburbs. The inner town, surrounded by ancient walls flanked with towers and entered by six gates is subdivided into the old and the new town. The former is situated close to the river or is of small extent and has dark and narrow streets. It was founded by a German colony in 1173, on the site of the Roman town of *Clanau* or *Clanopolis* and it is even supposed that part of its existing walls are of Roman construction. The new town is much more regularly and handsomely built, and may be described as consisting of a large central market-place, 500 yards long, and 600 yards broad from which almost all the streets, generally spacious run off at right angles. The principal street called the Mittel gasse (middle street) 640 yards long by 71 yards broad, is lined by handsome buildings and has a very imposing appearance. In other quarters the houses, though well built, are but only of one story and never more than two. The principal public edifices are the cathedral an ancient Gothic structure situated in the market-place, and of considerable architectural merit, though destitute of any tower and somewhat obscured by the shops crowded round its base Trinity church with two towers crowned by two conical domes; and two other R. Catholic, a Greek a Lutheran, a Unitarian, and two Calvinistic churches. Three monasteries the governor's residence, and other public edifices the townhouse an academy of physics, with a public library and interesting collection of minerals, a Protestant and a Unitarian college, a R. Catholic gymnasium and seminary, an infirmary a workhouse, and several well-endowed hospitals. Many of the nobility also have palaces here. The manufactures consist chiefly of woollen and linen cloth delft-ware, and paper, and there is a beet-root sugar factory. The trade, as well as the manufactures, though once important, have greatly declined Klausenburg having become the seat of the government of Transylvania, which was transferred to it from Hermannstadt in 1790 has several important public offices, and possesses a better society than is usual in provincial towns. The inhabitants are very much mixed, consisting partly of the descendants of the old Saxons, modern Germans, Hungarians, Armenians, Greeks, Wallachians, Slovaks, and Jews. To all of them not excluding the last, the rights and privileges of citizenship are open. Pop. (1846), 25,500. The country

of Klausenburg also called Kaloa, is tolerably fertile, both producing much corn and rearing many cattle. It also possesses valuable minerals. Area 1302 sq. m. P 160,000

KLAUSSTHAL, a tin. Harvor, 49° 20' N, 10° 30' W. A small town of 1000 inhabitants, opposite the mouth of the Rhine, is connected with it by a bridge. It may be regarded as its suburb, 49 N. 8.E. Harvor. It is the principal mining town of the Harz, and stands on the top and side of a hill, in a block distant, about 1000 ft. above the sea. Having been repeatedly burned down, it has been rebuilt with considerable regularity but the far greater part of the houses are only of wood, covered with sludge. It contains a church, churchhouse, tint, grassmoss, forest and mining school, with a good collection of models of mines and minerals, and the museum of minerals connected with the working of the mine, from which is obtained gold, silver and copper. The descent is by a tunnel cut through the mountain, and 6 m. in length. One of the mines is 2000 ft. below the level of the Baltic. They have been worked from the 11th century. *Prof. Klaussthal paper 8789* *melanite Zellerfeld 14,245.*

KLIECHOW, or KLECHOW in Prussia, prov and 26 m. N.E. Posen, between two lakes with three churches and a synagogue, and a trade in horses and cattle Pop. 1078

KNAREBOROUGH a tn and market town in Eng. land on York W Riding, beautifully situated 1 bank Nidd 17 m W by N York, with which it is connected by railway.

It contains a spacious market-place, from which several streets diverge the latter well paved and lighted with gas houses in general neat and substantial and principally of stone.

The church is an elegant and commodious structure in a mixed style of architecture, with a tower. There are also a chapel of ease two places of worship for Dissenters a R Catholic chapel, and a free grammar and several other schools.

The only other public buildings are the courthouse and jail.

This town was formerly the seat of extensive linen and cotton manufactures but these branches of industry have now almost entirely disappeared.

The environs of the town are remarkably beautiful, and abound with objects of interest, including the ruins of the castle founded in 1170 which afforded shelter to the murderers of Thomas à Becket and formed a temporary prison for Richard I the dropping will possessed of powerful petrifying properties and several curious excavations in one of which Eugene Aram a schoolmaster in Knareborough, committed the murder for which he was executed 14 years afterwards.

Knareborough returns two members to the House of Commons. Registered electors, 1851, 280. Pop. 5596.

KNOTT, a market tn. and par. England co. (Derby) The town 23 m. N. E. by E. Chester has generally a mean appearance but it has a most parish church and several dissenting chapels a free grammar and several other schools. The thread manufacture, which formerly flourished here has been supplanted by cotton and silk hand-loom weaving which is carried on to a small extent but the inhabitants generally are engaged in handicraft trades, and derive their principal support from the numerous opulent gentry in the neighbourhood. Area of par. 4632 ac. Pop. 4375

KNOTT, a vil. and par. Switzerland, can. and 9 m. N. W. Lucerne. It has a handsome church, and a bathing establishment, erected over sulphurous and chalybeate springs, which have been known since the 16th century. Pop. 1803

KNYSSYN, a tn. Russia, prov. and 18 m. N. N. W. Bialystok with manufactures of woollen and linen cloth, and several mills. Pop. 1699

KO, a tn. and harbour, Gulf of Oman. The island is 30 m. S. E. by E. the mouth of the Banak river about lat. 1° 12' N. lon. 100° 55' E. 7 m. long, and 3 m. broad, moderately high and hilly clothed with trees, and has a fine stream of fresh water. The mountain, formed by this island, and another about half its size, called Ko-Gram, is sheltered from the wind and sea in every direction, except the N. **KOANGSI**, a city China, prov. Kiangsu, 127 m. E. by S. Nanhang

KOBABA, a vil. Austria. Belovana, generalship Peterwardein on the Sava, about 9 m. from Orizava; with two churches, and two mills. Pop. 1,106

KOBBE, or **COBEE**, a tn. Central Africa, cap. Darfur, on a plain; lat. 14° 11' N.; lon. 36° 55' E. It is more than 3 m. long, but extremely narrow; each of the houses occupies a distinct enclosure, in which a well is dug, and is separated from its neighbour by a considerable extent of waste ground. The town is thickly interspersed with trees of various kinds and has two mosques, and five public schools and is inhabited almost entirely by merchants or strangers. In a great square, on the S. E. side, a market is held for the productions of the country and for articles imported from Egypt. A title to the E. is a mountain or rock of the same name, which is a retreat of lycums and jackals. In the neighbourhood are several considerable villages. Pop. 8000

KORDO, a city and territory Mongolia. See **LOBOO**.
KÖBLN, a tn. Prussia, prov. Rhine, gov. and 38 m. N. W. Bielefeld 1 bank Oder with two churches, hospital, and castle and a trade in cattle. It was nearly burnt down in 1844. 1 pop. 1261

KÖFERSDORF or **KAMOL**, a market tn. Hungary, co. and 12 m. W. S. W. Oedenburg, with two churches, a gymnasium and an old castle of a circular form, and mineral springs. Pop. 1780

KOBI, a Russian fort and vil. gov. Georgia, among the mountains of Caucasus near the point where three valleys which furnish the chief sources of the Terek, unite and form the large valley of Khval lat. 42° 32' N.; lon. 44° 35' E. The inhabitants are Ossetes, and profess Christianity. A church has been built for their use

KOBILJAKI, a tn. Russia, gov. and 33 m. S. W. Poltawa, 1 bank Worokla with 10 churches a considerable general trade, and four important mineral fairs. Pop. 7000

KOBLENZ, a gov. and city Prussia. See **LORENZ**.

KOBOR, or **ATREX**, a vil. Austria, Transylvania, Székelys, on a height, close to Székelys, and about 12 m. from Sarkany with a Protestant parish church. 1 pop. 1019

KORBYN, a tn. Russia, gov. and 102 m. S. by E. Gradus bank Machovra a tributary of the Bug with a Greek abbey. Pop. (1850) 6057

KOBUIG, a tn. and duchy Germany. See **COLOMB**.
KOBYANKA, a vil. Galicia, circle Jaslo on the Rappa. It has a church and a castle and in its vicinity a chapel annually visited by about 50,000 pilgrims, from Gallic Hungary and Poland.

KOBYLIN, a tn. Prussia, prov. and 48 m. S. S. P. 1000, on the Orla with two parish churches, a Barnardine monastery, and manufactures of leather and potash. Pop. 2087

KOCHCZUŁ, a vil. Prussia, prov. Rhine, gov. Oppeln, circle Lublinitz with a castle, glass works, tile works, lime kilns, a saw and several other mills. 1 pop. 1007

KOCHFM or **COLOMB**, a tn. Rhine, Prussia, gov. and 30 m. S. W. Coblenz, cap. circle, at the confluence of the Endert with the Moselle. It is poorly built has a court of justice and several public offices a church two hospitals a synagogue, a gymnasium, the ruins of the old castle of Winneburg, belonging to the Metternich family, and manufactures of linen and red leather a potash work some ship-building, and a trade in wine and cattle. Pop. 2555. — The circle is hilly and black and is watered by the Moselle, and numerous small streams. Area, 145 geo. sq. m. Pop. 35,484

KOCHER, a small river Würtemberg which rises near the village of Kochersberg, circle Stuttgart, flows first N. N. W. through a wild but well wooded country passing the towns of Aalen, Gail, and Hall, then N. to Künigsheim, when it turns W., passes Tübingen and after a course of about 80 m. joins the bank Neckar about 6 m. N. Heilbrunn

KOCHSTEDT, a tn. Prussia, prov. Saxony, gov. and 31 m. S. W. Magdeburg, at the foot of the Havel. It is walled, poorly built, and has a church, a townhouse, tile-works, and several mills. Pop. 1557

KOCK, a tn. Russian Poland, about 40 m. S. Silesia, r. bank Vistula. Pop. about 1900

KOCUBIA, a vil. Hungary, co. Bihar, on the Black Kiskis, 12 m. from Bacsana. It stands in a tolerably fertile district, and has a Greek non-united parish church. P. 1041

KODA, a tn. Siam, 28 m. S. W. Khyatong, lat. 27° 55' N., lon. 68° 55' E. Pop. 2300

KODIAK, an Isl. Alutian Archipelago. See **KADIAK**.

KODJ HANNA, a tn. Asiatic Turkey path Karamania, 85 m. N. E. Konia, consisting of about 150 or 200 houses at

the mouth of a ravine, amidst some rugged hills and about 900 ft. above the surrounding plain. There are some extensive ruins of a former city, consisting of fragments of columns, of white and variegated marble, and other architectural sculpture, all apparently Byzantine. Near it is the salt lake of Toss Ghioel, remarkable for the high specific gravity of its waters, and the great amount of saline matter they contain both in the former and latter considerably exceeding those of the Dead Sea.

KOLDAAG, with sedices, several rivers, Java, prov. Pasarsari. They are Kolding-Galos, Jervah, Bawa, Segoro Alom, and Segoro-Sorung all flowing to the Indian Ocean.

KOEDJIK, a vil. Holland, prov. N. Holland, 8 m. N. Alkmaar, on the Great N. Holland Canal. It has a church, and a school. Pop. 631.

KOLICHOVO, or Kwi-tchoo, an inland prov. China, bounded N. by prov. Sochen E. Moan, S. Quangoe, and W. Sochen and Yunnan; lat. 24° 30' to 29° N. lon. 104° to 110° E. Area, 64,554 sq. m. It has a mountainous surface, and is drained by several rivers, of which the Wu, an affluent of the Yang-tse-kiang, is the largest. It produces rice, wheat, tobacco, timber and cassia, with quacksilver, copper, iron and lead. Horses, and other domestic animals, are reared in considerable numbers. The inhabitants are extremely poor, lawless, and illiterate. It is divided into 13 departments. Provincial cap. Koyang. Pop. 5,288,219.

KOLKELBERG, a vil. and com. Belgium, prov. Brabant, about 2 m. N. W. Brussels. It has manufactures of linen, and a trade in agricultural produce. Pop. 2582.

KOEPANG, a tn. of Timor. See **COORANG**.

KOESLIN, a in Prussia. See **Koalis**.

KOEYORDIN, or Koryuwan, a tn. and fortress Hol. land prov. Drenthe, 24 m. S. E. Assen, at the junction of three streams. It has a castle, arsenal, townhouse, two churches, a synagogue, school and orphan hospital. 1881.

KOLWACHT, a vil. Holland, prov. Zeeland, 6 m. S. Axel, on the Belgian frontier the boundary line passing through it. It has a school, and near it are two breweries.

Pop. 1342.
KOLWALA DAV, a tn. Indian Archipelago, S. coast, Isl. Langue, about 6 m. from the mouth of a considerable river. It is the capital of the island, and residence of the Sultan, and is a large, prosperous, and populous place well built, chiefly of wood surrounded by a palisade, and possessing a mosque.

KOLF THUSA, a vil. Hungary co. Heves, 1 h. bank Theiss in the vicinity of Tiszafüred with a Protestant parish church, a fine chateau, a mill and a trade in cattle. Pop. 1984.

KOLJ, a prefix to the names of several islands, Gulf of Ben on the E. coast.—1 (*St. Chong*) a larger and lesser isl. near the head of the gulf lat. (largest) 13° 30' N. lon. 104° 59' E. 7 m. long and 8 broad moderately high and hilly, and clothed with trees.—2 (*Nok*) 15 m. S. W. the former.—3 (*Krom*) 16 m. S. E. the latter, about 5 m. long and 2 broad with a fishing village, and a small white temple on an eminence.—4 (*Pha*), Three small isls. about 2 m. S. W. Koli Kram.—5, a cluster of small isls. grouped around Cape Liant, the larger of which are called respectively, Koli San, Koli San, and Koli Kah.—6 (*Sasse*), lat. 13° 30' N. lon. 104° 37' E. surrounded by a number of smaller islands.—7 (*Kach*) lat. 11° 35' N. lon. 103° 37' E.—8 (*Chang*) about 2 m. S. from the latter 6 m. long by 2 broad.—9 (*Kong*), lat. 9° 30' N. lon. 104° 30' E. (a).—10 (*Cham-sou*), about 1 or 1½ m. S. E. Koh Kong.—11 (*Dud*, or *Phu-Koh*) Hastings Archipelago lat. (S. point) 9° 56' N. lon. 104° 4' E. (a). With exception of Tanchalem, in the opposite coast, this is the largest island in the gulf, being about 36 m. in length, but not above 2 m. broad throughout half its length the remainder varying from 10 to 30.—12 (*Koh*) 30 m. S. E. Koh Dud, having a number of small islets on the N. E. and S. E. sides.—On the W. 1 (*Krok*, or *Carel*) lat. 8° 30' N. lon. 101° E.—2 (*Sasse*, or *Carson*), lat. 9° 55' N. lon. 100° E.—3 (*Phang-on*, or *Socorro*) 70 m. N. E. the latter.—4 (*Kas-tu*), A group of small islets in lat. 11° 57' N. lon. 99° 28' E.

KOKI HARA, a range of lofty mountains Afghanistan at the S. W. extremity of Hindoo Kooh, extending along lat. 34° 30' N. and between lon. 67° 30' and 68° 50' E. or about 60 m. Greatest height, between 16,000 and 18,000 ft.

KOKI DAMAN. See **KNO DAMAN**.

KOK KANIES, a lofty summit Hindoo Kooh in Afghanistan, about 20 m. N. W. Jeldakel between the rivers Alahung and Alghur about lat. 34° 45' N. lon. 70° 10' E.

KOHAT OM, a Transylvania. See **Kare**.

KOHAT, a tn. Punjab, near in N. W. limit, 54 m. S. S. E. Peshawar, lat. 33° 32' N. lon. 71° 27' E. It is beautifully situated on an eminence in a valley of same name, and is walled in, enclosing a dilapidated citadel furnished with a garrison. It is mostly built but has a good bazaar and a mosque in which are some conspicuous baths filled by springs which gush from the rock on which the building stands. Some manufactures are carried on particularly that of silk barrels these made here being much esteemed. In the neighbourhood there are many gardens which produce the fruits of both warm and cold climates, but not very abundantly nor are the fruits themselves held in much esteem. The valley of Kohat, about 7 m. in diameter is populous, and well cultivated, producing wheat and maize both of excellent quality.

KOHISTAN [The land of mountains].—1 An extensive division of Beloochistan, of a triangular shape occupying the N. W. portion of that country. It extends about 180 m. N. to S., nearly as many E. to W. as the base or broadest part, and contains two principal districts Mydasee or Maudan, the plain, and Kohukee or Kohak, the hills. In the former are permanent towns and villages, whilst the latter has only groups of felt tents here and there along the valleys. There are two sandy deserts in this territory each about 25 sq. m. Between them is an oasis or fertile slip of land about 6 or 7 m. broad and 30 long well watered by numerous springs and producing grain in such abundance as to supply most part of the surrounding countries.—2 The mountain country of Afghanistan N. of Cabool.

KOHLEA JAKOWITZ, a tn. Bohemia, circle Kaurzin, 32 m. S. E. Prague with a church a saw and three other mills. Pop. 1450.

KOHKASAR, or KOK HIRAK, the ruins of an ancient city Asiatic Turkey near, and about 45 m. S. Y. Diarbekir. The walls were built of square stones of brown basalt, and flanked by square and round towers and enclosed a nearly square space of about 700 yards on the side. The whole of this space, with exception of a large mound on the E. side, is filled up with ruins of houses, which had been built of brown stone, with semicircular arches and intervening masonry. Outside the walls is a burial ground, which must have been an splendid necropolis each tomb built of massive stones forming a separate chamber one in front, and one on each side. The origin of this city is unknown, but the more lofty ruins, apparently of churches and the crosses inscribed on the tombs, show that it was occupied by Christians.

KOHRI, a tn. Prussia, circle and 24 m. S. E. Leipzig with a court of justice an hospital the ruins of an old castle, an industrial school, manufactures of earthenware and straw plait, and two mills. Pop. 1070.

KOIBOU, a river which rises on the N. slope of the Caucasus, in E. Circassia, flows W. N. W. near the frontiers of Daghestan, then turning E. forms two branches, which fall into the Caspian—the more northerly under its own name and the other under that of Sulak. Its principal affluents are the Kizilars and Akia. Total course about 300 m.

KOJETH, a tn. or Koenigs in Austria, Moravia, circle and 9 m. S. W. Prerau on the Blatawitzer with a church, townhouse, and charitable endowment. Pop. 325.

KOJRO or Koro, a vil. Hungary Thutier Theus, co. Zips, in a valley about 35 m. from Leutau. It has two churches and an iron and a copper mill. P. 933.

KOJUK PASS, in Afghanistan across the Amran mountains, from the valley of Pishcen, on the E., to the plains of Kandahar, on the W. lat. 30° 45' N. lon. 66° 30' E. The level of the pass is 9335 ft. above sea-level, and the summit 7449. This pass was found by the British to offer much greater obstruction to the march of troops than the famous Bolan Pass. The mountains here are in general of plate, and overlying sandstone and where not too steep and bare of earth for vegetation are covered with grass flowering shrubs, &c.

KOKA, a vil. Hungary, Hiltzer Danube, co. and 23 m. E. N. E. Pesth with a handsome R. Catholic church. P. 9109.

KOKABONI, or KUKABONIA, a tn. Bernice, r. bank Ycuu, lat. 12° 52' N. lon. 18° E. P. 5000.

KOLIN, a tn. Bohemia. *See* COLLEN

KOLKEK, a vil. Hungary, Thither Danube, co. Baranya, 2 m. from Mohacs, at the confluence of the Deljevt with the Danube. It has a church. Pop. 1500.

KOLKEI, a tn. Russia, gov. Volynia, circle and 80 m. N. E. Lank, r. bank Siv., with a trade in agricultural produce. Pop. 1500.

KOLLAROVECZ, a vil. Hungary, Hither Danube, co. Trantochin in a mountainous district, 20 m. from Sillian, with a R. Catholic church and a trade in timber, particularly deals which are here sawn up in great numbers. Pop. 2065.

KOLLEDA, a tn. Prussia, prov. Hanov., gov. and 85 m. W. S. W. Meweburg on the Loozbach. It has a court of justice, a church and a courthouse, tile works, lime-kilns, several mills, and a trade in cattle. Medicinal plants are cultivated largely in the vicinity. Pop. 3091.

KOLLIKEN, a vil. and par. Switzerland, can. Aargau, cap. circle of same name, in a beautiful and fertile valley 4 m. S. Aarau. It has a church, a large school, and manufactures of cotton. Pop. 1547.

KOLLINLTZ, a tn. Bohemia circle, and 14 m. from Klattau with a church, a castle, townhouse, school, and a paper mill and flour mill. Pop. 991.

KOLLUM, a market in Holland, prov. Friesland, 16 m. N. E. Leeuwarden. It has two churches, a school, potteries, tineries, rope-works, oil-mills, and a manufacture of calico. Pop. 2068.

KOLLUMPRZWAAG, a vil. Holland, prov. Friesland, near Kollum, with a church and school and some limited manufactures. Pop. 513.

KOLN, a gov. and city Prussia. *See* COLOGNE

KOLQ, a tn. Russian Poland 40 m. N. E. Kalisch, on a hill almost enclosed by the Warta. It is walled, has three churches, a synagogue, an old Benedictine monastery, and manufactures of woollen cloth and hats. Pop. 2000.

KOLOKATHIA [*anc. Colocassus*] a gulf, Greece, in the S. of the More, now better known by the name of the Gulf of Marathon. Its W. entrance is formed by Cape Matapan and its E. by the sale of Steri or Elephenis. It is about 80 m. wide, by 35 deep. On its W. shore is a small seaport of same name occupying the site of the ancient Cithium which, though 40 m. distant from Sparta, was its port.

KOLOMIA, a tn. Austria, Galicia, 160 m. S. E. Lemberg, cap. circle, r. bank Pruth with a R. Catholic church, a high school and a trade in cattle. Pop. 6980. — The circle is generally mountainous, and depastures great numbers of horses and cattle. It is watered by the Pruth and Dniester. Area 913 geo. sq. m. Pop. 227,700.

KOLOMNA, a tn. Russia, gov. and 60 m. S. E. Moscow, cap. circle of same name on the Kolomenka, a small affluent of the Moskwa, on a height. It is surrounded by brick walls, of great height and thickness and flanked with towers is divided into two parts by the river and tolerably well built, though most of the houses are only of wood. It is the see of a bishop, and the seat of several public offices and has 18 churches, one of them a cathedral, a monastery, a nursery, a diocesan seminary, a superior school manufactures of woollen, cotton, linen, and silk goods, leather earthenware, and a famous marmalade, called *postilla*, numerous tallow smelting establishments and tile-works, and an important trade in cattle, salt provisions, fish, hemp, hemp-oil and hides. Pop. 12,598.

— The circle has an undulating surface, and is densely wooded, but is only of medium fertility. Area, 482 geo. sq. m.

KOLOLO, or BALANZARA, a market in Transylvania, cap. dist. of same name, 13 m. E. Klausenburg, with three churches, and valuable salt mines. Pop. 8180.

KOLFINA, a market in Russia, gov. St. Petersburg on the Ischura, with a church several saw and cement mills, manufactures of copper and ironware, a foundry &c. Pop. 1500.

KOLVA, a river Russia, which rises in the N. of gov. Perm, W. slope of the Ural Mountains, flows very circuitously, first W. S. W., then E., and, after a course of about 170 m. joins r. bank Vishera a little below Tobolsk. Its principal affluent is the B. Yelka.

KOLYMA, a river Siberia, gov. Irkutsk, which rises in lat. 61° 30' N., lon. 146° E., in the Mountains of Stanovoi-Krabet. After a course nearly N. E. it falls into the Polar Sea in lat. 69° 40' N. The first 300 m. it is very rapid but subsequently as it widens, it becomes more tranquil.

At 11

quill. The right bank consists generally of steep bluff rocks of slate, intersected in some places by veins of hardened clay and chlorite slate. Sometimes the slate is black and pure without admixture, and sometimes, also, it is interspersed with argillaceous chalcaceous crystals of staurolite, and large specimens of rock crystal. The vegetation of this bank is tolerably rich. Among the plants are the *Epilobium latifolium* and in abundance, a species of *Sanguinaria*, the roots of which are used by the natives for food. The left bank is more flat, the whole country lowering gradually towards the sea, till it becomes one enormous *tundra* or level zone. The chief tributaries are the greater and lesser Aulaj and the Omolok, which join the left bank not far from the sea. Above the mouth of the Omolok, an arm of the Kolyma, forms a swampy island, on the S. of which stands Nijel Kolymsk. Still lower the river divides into two branches and forms the island of Merchogonow whose greatest breadth is about 7 m. The E. branch called the Kammeysa or stony Kolyma is about 4 m. wide the W. the Pukodakaja is little more than 2 m. Still lower there is a third smaller branch. The three form the embouchure, which is about 60 m. across. The stony Kolyma has sufficient depth for any vessel, but the navigation especially at the entrance is rendered dangerous by shifting sandbanks. The Kolyms abounds in fish. — (Vrangeli)

KOLYVAN or TASHKA, a tn. Siberia, gov. and 116 m. N. W. Tomsk, finely situated at the confluence of the Berda with the Obi. Pop. 1850; 2172.

KOLIG, a vil. Prussia, prov. Sillesia gov. Liegnitz, ball Grünberg, with two churches, and tile works. P. 974.

KOMADE or KOMADI, a vil. Hungary, Thither Thesus, co. Bihar on the Kura and the Silet Er which here lose themselves in the extensive morasses of Serrut, 21 m. W. Grosvardain. It has a Protestant church, a bakery and a trade in horses, cattle, and swine. Many cray-fish are taken and great quantities of corn cut here. Pop. 2093.

KOMAROM several places Hungary. — 1 (or Komaron or Asad) A market to Thither Danube, co. Szabol near Lake Balaton, 45 m. E. N. E. Veszadnu, with a church, and a trade in corn. Pop. 1857 — 2, (Mest), A market in, co. and 27 m. S. E. Veszprim, on the Sio with two churches a trade in corn, and a flour-mill 1 up 1327.

KOMJATH (MAOTVA and MASV) a vil. Hungary Thither Thesus, co. Ugrova on the Balaton 11 m. from Nagy Szellus, with a church. Pop. 1988.

KOMJATHY or KOMJATHONY a market in Hungary Thither Danube co. and 11 m. S. E. Nantia, on the Neutra with a castle a handsome parish church a house of correction, a mill and a trade in corn and cattle. Pop. 2084.

KOMLO, a vil. Hungary Thither Thesus co. Heves in a fertile district, 20 m. S. S. E. Erlau, with a church. P. 1591.

KOMLOD, two places, Hungary. — 1, A vil., co. Tolna, on the Danube 8 m. E. E. Balca. Pop. 1166 — 2, (or Komlog) A vil. Thither Danube, co. and 23 m. from Komorn Pop. 1090.

KOMLOS, several places, Hungary. — 1 (or Komos) A market in Thither Thesus, dist. and 12 m. S. Nagy Szent-Miklos with a church and a trade in corn. Pop. 4900 — 2 (Zol) A vil. Thither Thesus, co. Bakos, 13 m. S. E. Oroshaza, with a church a flour-mill and a trade in corn. Pop. 7898.

KOMMA, or KOMXIA, a vil. Austria, Moravia, circle Hradisch, near Svietichau. It has a church and is the birthplace of the famous Anna Comana. Pop. 307.

KOMORN or COMORNA, a co. Hungary Thither Danube, bounded N. by co. Neutra and Bata, E. by Gorn, S. by Stahl weissenburg, S. E. by Vassarin, W. by Raab and N. W. by Pressburg, area, 856 geo. sq. m., cap. Comorn (which see).

The surface, with the exception of a part of the S. which is traversed by the mountain-ridge called Vertes in throughout low and flat, belongs wholly to the basin of the Danube, which divides it into two nearly equal parts, and receives within it the Waag and the Zaira. There are numerous small lakes and stagnant pools, and several extensive meadows, but the soil is generally of great fertility producing corn, of which considerable quantities are exported. Tobacco also, is extensively grown and much wine, of excellent quality is produced. The forests yield excellent timber much of which is sawn up and sent to Vissna. Sturgeon-fishing forms an important branch of trade. There are several quarries of fine marble. Pop. 188,680.

KOMORZANY, a vi. Hungary, Thidder Thidder, on the border, 18 m. from Annyan-Maggyr, with a Greek church. Pop. 1888.

KOMUTAPOOH, a village in Hindostan, prov. Bengt, once cap. of the Hindoo kingdom of Omtrop. The ruins are of an oblong form, 19 m. in circumference. It was protected by formidable fortifications, and three of its gates still exist.

KOMPOLTH, a vi. Hungary Thidder Thidder, on the border, about 1 m. from Komutapooh, in a fertile district, with some trees in culture. Pop. 1210.

KONBO, a lake, Russia, gov. Archangel, Lapland, to the N. of the Gulf of Kandalakia, into which it discharges itself by two outlets, one at its S.E., and another at its N.W. extremity. It is about 85 m. long, by 7 m. broad.

KONDA, a river, Asiatic Russia, which rises in the N. of circle Turinsk, gov. Tobolsk, flows S.E., and then N.E., its whole course, of about 350 m., forming nearly a semicircle, and joins L. bank Irtysh, about 80 m. above Stenarova. Its chief affluents are the Kama, Tura, and Irtys.

KONDINEK, a vi. Asiatic Russia, gov. and 260 m. N. Tobolsk, r. bank, and nearly opposite to the N. extremity of a large island, formed by the Obi. It consists chiefly of a number of clean and well-built peasants' houses, clustering round a convent, to which they belong, and which is a low structure, in the simplest style, and only distinguished from the other houses by the stone wall which encloses it.

KONG MOUNTAINS, a mountain range, Africa, commencing at Kint Kint, about 200 m. S.E. Sierra Leone, lat. 9° N., lon. 9° 25' W., and stretching E. through the Mendi country along the N. frontier of Ashantee, and across Dahomey. So far as has been ascertained, some of the peaks are above 2500 ft. high. They consist of granite, marble, and ironstone, but little is yet known regarding them.

KONGEN a. Württemberg circle Necker, hall, and 5 m. S.E. Esslingen, on the Neckar, here crossed by a bridge, with a castle. Pop. 2038.

KONGSBERG a. Norway prov. Agderhus, hall Bhusvold, beautifully situated on the Lauen, R. of Mjøsa, Johnskunden, which towers up to the height of 3064 ft., 45 m. W.S.W. Christiania. It contains a large brick church, one of the handsomest in the country. It is the seat of a mint and a mining director, and has manufactures of fire-arms, government powder-mills, and important smelting works for silver ore and cobalt, obtained from mines about 1 m. distant, and first worked in 1634. The deepest mine is about 180 fathoms; and out of it was taken a mass of silver, now in the museum of natural history at Copenhagen, measuring 6 ft. long, 2 ft. broad, and 8 in. thick. In the Lauen, about 1 m. above Kongsberg, is the magnificent waterfall the Lærdal-fos. Pop. (1840) 8285.

KONIA, **KONIK**, or **KONIKEN** [anc. Joniken], a city Asiatic Turkey, path. Karamania, in the centre of a great and partly marshy plain, lat. 37° 56' 30" N., once renowned for size, population, and wealth now in a miserable state of decay; although, from a distance, its appearance is still striking and impressive, giving little idea of the deserted scene within—of its heaps of ruins and dilapidated mosques. Its walls, 3 m. to 5 m. in circuit, and 50 ft. high, are surrounded by large, well-cut blocks of stone, and surrounded by a moat seven, some of them richly ornamented with corridors, arcades, towers, and minarets, and Arabic inscriptions. The gateways are also handsome, some of them decorated with statues, and also-olive figures. The houses are the only inhabited portion of the central city; they are Turkish, and appear to be of the same date and style as the handsome ornaments over the gateways. On the E. and S. sides of the city, and beyond its walls, are extensive suburbs, not much less populous than the city itself. The most remarkable building in the town, Minaret Djami (the mosque with the minaret reaching to the stars), with considerable dilapidation of tower, steeple, and minaret. Another interesting ruin is the old Turkish prison resembling a Gothic castle with its raised towers, battlements, and keep. There are still, besides several handsome mosques in the town, and several magnificent chapels that are objects of veneration, and even of pilgrimage; but, generally speaking, they are crumbling into ruins, as are, also, upwards of 50 minarets, or minarets, and as many mosques, with and without minarets. The latter, like many in Persia, are chiefly of glazed tiles and bricks of various

colours, amongst which red and blue are predominant. Outside the town, on the N.W. side, is the burial-ground. A great part of the population is employed in the manufacture of carpets, and in the preparation of leather, cotton, wool, and

KONIA THE GATE OF THE BAHAMA.—From Tait's Description of the Bahama.

hides. The gardens attached to the city produce a variety of fruits, and an adjoining plain, a part of which is inundated annually, supplies grain, flax, &c., in addition to an abundance of pastures. Pop. upwards of 40,000.—[Hamilton's Asia Minor.]

KONIK, a. to. Asia Minor. See KONIA.

KONIG, a market in Hesse-Darmstadt, prov. Starkenburg, r. bank Mithling, 18 m. S.E. Darmstadt. It has a church, castle, and two schools, tile-works, and several mills. Pop. 1478.

KONIGSBRATZ, a. in Baboia, cap. circle of same name, l. bank Elbe, at the confluence of the Adige 64 m. E.N.E. Prague. It consists of the town proper and three suburbs, and is a place of great strength being not only regularly fortified but possessed of means of laying the surrounding country under water. It is the seat of a bishop, and the seat of several important courts and public offices; contains an ancient cathedral, three other churches, an episcopal palace, townhouse, diocesan seminary with a library, a gymnasium, theatre, infirmary, hospital and military hospital, and barracks; and has manufactures of woollens, serges, silk, and a trade in cattle. Pop. 5455.—The castle has a diversified surface, consisting partly of hills, belonging to the Blumengraben, and partly of level plains. Area, 980 geo. sq. m. Pop. 339,609.

KONIGHEIM a. in Baden, circle Lower Rhine, hall and 5 m. W.S.W. Biebrichheim, in a beautiful valley on the Brühl; with the woods. Pop. 2105.

KONIGSHOF, a. in Bohemia, circle and 14 m. N.W. Koniggratz, on the Elbe, with a church, manufactures of woollens and linen cloth, and a tannery. Pop. 4610.

KONIGSBAAL, or **KONIGSBAAL** [Lat. Asia Minor], a. in Bohemia, circle Bzenau, at the confluence of the Elbe and Matka, 6 m. S. Prague, with a church, in which King Wenzel II. is buried; and manufactures of chemical products, a sugar refinery, and a brewery. Pop. 1008.

KONIGSBACH a. in Baden, circle Hesse Elbe, on the Elbe, 6 m. S.E. Carlsruhe, with a church, and manufactures of copperware and vinegar. Pop. 1690.

KONIGSBERG, a. gov. Prussia, prov. E. Prussia, bounded N. by the Baltic, E. gov. Gumbinnen, S. Poland, and W. gov. Marienburg and Danzig. It is the largest of all

the Prussian groye, but only ranks sixth in respect of population. It consists almost of an extensive plain, belonging wholly to the banks of the Balda, along which the sea-level extends for about 180 m.; though of this not more than 40 m. belong properly to the mainland, the rest consisting of narrow bays and tongues of land, by which the large lagoons, the *Christen-Haff* and *Frische-Haff*, are separated from the sea. The principal rivers are the Memel, the Pregel, the Frische, and the Passarge, with their tributaries. Of the lakes, which are numerous, the most important are the Drowna, Murna, Gabeln, Demowen, Schilling and Gesecht. Much of the surface is covered by meadows and swamps, but along the banks of the rivers are extensive tracts of the richest alluvial soil, good loam occasionally occurs, but sand and clay more frequently prevail. The corn produced in the government considerably exceeds its consumption, hemp and flax also are extensively grown. Wood abounds in every district, and is largely exported. The minerals are few and of little value, being chiefly confined to bog iron-ore, and amber which is found on the shores of the Balda. Manufactures have made considerable progress, and include woolen and linen cloths, sailcloth, hosiery, hats, leather, paper, iron, steel, and copper ware, earthenware, soap, candles, sugar, alcohol, &c. For administrative purposes, the province is divided into twenty counties. Principal towns, Memel Königsberg, and Braunsberg. Area, 4530 sq. m. Pop. (1846), 847,952.

KÖNIGSBERG [Latin, *Mons Regius*, Pollak, *Królewicz*, Lithuanian, *Karalaukas*], a seaport in E. Prussia cap. gov. of same name on the Pregel, about 4 m. above its mouth, in the N.E. extremity of the Frische-Haff, lat. (observatory) 54° 45' 46" N., and lon. 20° 30' 15" E. (N.) It was once the capital of Prussia Proper, including the provinces of both E. and W. Prussia, and the residence of the Electors of Brandenburg and still ranks as the third city in the Prussian dominions. It is surrounded by walls and ramparts, and has recently received important additions to its fortifications on the plan of detached forts. It consists of the town proper, and of four suburbs. The former is divided into three parts, the *Altstadt*, or Old Town, situated on the W., *Lehnort* on the E., and *Kneiphof*, situated on an island formed by the Pregel, which before situated the town from the E. divided into two arms. The communication between the island and the opposite banks is kept up by seven wooden bridges. The *Altstadt* and *Lehnort* are well situated on an elevated and rugged piece of ground, forming seven small hills, but the island on which *Kneiphof* stands is so low and swampy that the houses are built upon piles. Viewed from a distance, Königsberg presents both an imposing and a pleasing appearance, but the impression produced by the interior is not favourable. The houses are for the most part indifferent, and are huddled together without any semblance of regularity, in narrow and crooked streets. The principal public buildings are the cathedral, an ancient and interesting Gothic structure, situated on the *Kneiphof*, and containing among its tombs a fine marble monument of the Margrave Albert; the *Hamburger Kirche* a very conspicuous and handsome church the *Soldaten*, or palace a large ugly building, now converted into a government house, but historically interesting, both as the residence of the grand masters of the Teutonic order and the asylum to which the late king and queen of Prussia fled when driven by Napoleon from Berlin; the *Schloßkirche*, occupying a wing of the palace, and remarkable as the spot where Frederick, Elector of Brandenburg, placed the crown on his own head, and thus became king of Prussia, the old citadel of *Frederichsburg*, presenting among other interesting objects, its old Armour Chamber and hall of the *Masovites*; the university, founded in 1544 by the Margrave Albert, and hence called the *Albertine*, attended by above 800 students, and having attached to it a library of above 50,000 vols., a zoological museum and other valuable collections an observatory, which the labours of Bessel has rendered famous, and a botanical garden, a gymnasium, an ecumenical academy, and various other interesting schools; two fortresses; a handsome cathedral, a theatre, a lunatic asylum, an infirmary, a widows', an orphan, and several other hospitals and benevolent establishments. The manufactures consist chiefly of woolen, silk, and mixed silk, glass, tapestry, leather, and articles in tinware, silverware, copper, steel and ironware, needles, earthen

and stoneware, liquors, and artificial mineral waters. There are also sugar and silver refineries, important breweries and distilleries, and building-grounds, in which a considerable number of vessels only of small size are built and fitted out. Owing to a bar across the mouth of the Pregel, with nowhere than from 5 ft. to 6 ft. water, larger vessels bound for Königsberg had at Pillau, which is accordingly considered its port. The trade, notwithstanding this disadvantage, and a considerable decline from what it was in earlier times, is still important. In 1846, the principal exports were grain, about 80,000 qrs., of which 7240 qrs., consisting of rye, were sent chiefly to the *Scandinavian* and *Norway* and at least two-thirds of the remainder, consisting of wheat, barley, oats, peas, beans, and vetches, were sent to Great Britain; flax, hemp, and rapeseed, 6080 qrs.; flax and flax tow, 1254 tons; hemp and hemp tow, 237 tons; oil-seeds, 436 tons; bones, 363 tons; timber wool mats, and feathers, in comparatively limited quantities, the principal imports, colonial produce, iron in pigs and bars, coal, cotton wool, cotton trash, wine, spirits, and unrefined sugar, in the same year the number of vessels entered at Pillau was 334, 84,804 tons, and cleared, 376, 94,857 tons. Of these 278 entered, and 276 cleared, were British.

Königsberg is the seat of the provincial and government, and of many important courts and public offices. Its society is superior to that of most provincial towns, and is long numbered among its residents the celebrated philosopher, Kant, and the geographer Gaspert. Its most distinguished natives are the naturalist Klein the painter Willman, and the anatomist Walther. It was founded in 1256, when Prunaviv I came to assist the Teutonic knights against the *Silvanians* and advised them to build a strong castle, which was accordingly done, and bore his name. It occupied the present site of the palace, which afterwards became the residence of the Grandmaster. In 1655 Königsberg became a member of the *Hanse League* in 1638 was surrounded with walls and, in 1657, received a strong additional defence in the citadel of *Frederichsburg*, though the object of the *Margrave*, who built it is said not to have been so much to defend the town as to overawe its citizens. It suffered much during the Seven Years War by the occupation of the Russians from 1758 to 1764, and sustained more severely from the French, who entered it in 1807, after the battle of Friedland, and laid it under heavy contributions. Pop. (1846) 75,324.

KÖNIGSBERG a town Prussia, prov. Brandenburg, gov. and 41 m. N. Frankfurt, on the Oder, cap. circle of same name, at the confluence of the *Zerbst* with the *Rheike*. It is walled, has several courts and public offices, two churches, a courthouse, gymnasium, and hospital, manufactures of woolen and linen cloths hats, and hosiery, a distillery, and a trade in cattle. Pop. 6110.—The climate is generally flat, possesses numerous quarries, and has good arable and pasture land. Area, 442 sq. m. Pop. 78,682.

KÖNIGSBERG, three towns, Austria.—1, A. to *Bohemia*, circle and 10 m. W. S. W. *Elbogen*, a bank river, an elevated site, with a parish church, a castle, a brewery, and flour-mill. Pop. 2890.—2, A. to *Silesia*, circle and 22 m. W. N. W. *Teschen* with a church and a castle. Pop. 900.—3, (or *Gy-Boguel*), a town Hungary, on *Beas*, a bank river, 34 m. E. N. E. *Regina*. It occupies a large space, almost every house having a garden; contains two R. Catholic churches, a courthouse, and tavern-houses and has manufactures of glass, and a number of breweries, at which good beer is made. Pop. 800.

KÖNIGSBROUN a vill. Württemberg circle *Jaxt*, hall, and 4 m. W. *Heddenheim*, with a parish church, distillery, and other iron-works, and a market. Pop. 1182.

KÖNIGSBRUCK, or *Königsberg*, a town Saxony, circle *Bautzen*, 1 bank *Pulsnitz*, 17 m. N. E. *Dresden*. It possesses two churches, a castle, and six hospitals and distillery. Pop. 1741.

KÖNIGSEE, —1, A. to Germany, principality *Schwabenburg-Rudolstadt*, cap. hall of same name, on the *Elbe*, 34 m. S. E. W. *Wernau*, with a church, townhouse, and hospital; manufactures of woolen cloth, tapestry, and white-linen; several mills, and a trade in cattle. Pop. m. 3050. Area of hall, 40 sq. m. Pop. 18,400.—2, (or *Barchenhausen*), a lake, in the S. E. extremity of *Saxony*, about 5 m. long, N. to S., by 1 m. broad. It has steep and picturesque banks, and abounds with excellent fish.

KÖNIGSEGG, or **Kunzau**, a *ts.* Bohemia, circle and 35 m. S.E. Tabor, with a church and a townhouse, three saw and five other mills, and a trade in linen. Pop. 3562.

KÖNIGSFELD, or **Kunzau**, a *ts.* Austria, Moravia, circle and 2 m. N. Brünn, with a church, a court-house, and a barracks. Pop. 1407.

KÖNIGSHAIN.—1. A *vil.* Prussia, prov. Silesia, gov. and 51 m. W. Liegnitz, with a church and a castle, a granite quarry, and several mills. Pop. 1283.—2. A *vil.* Saxony, circle Bamberg, 60 m. E. Dresden, with a church and a mill. Pop. 1457.—3. A *vil.* Saxony, circle Leipzig, ball. Rochlitz, with a church. Pop. 1064.

KÖNIGSHOFEN.—1. A *ts.* Baden, circle Lower Rhine, at the confluence of the Umpfer with the Tauber, which is here crossed by a handsome bridge, 17 m. S.E. Wertheim. It has a church and two breweries. Pop. 1396.—2. (see Großfeld), A *ts.* Bavaria, Lower Franconia, on the Saale, here crossed by a bridge, 44 m. N.E. Würzburg. It is walled, and defended by outworks; it has three churches, a townhouse, two hospitals, and Capuchin hospital; iron and other mills, granite quarries, and trade in corn and cattle. Pop. tr. 1702. Area of dist. 64 sq. m. Pop. 14,850.

KÖNIGSHOVEN, a *vil.* Rhodan, Prussia, gov. and 20 m. W.N.W. Cologne, with a church, and manufactures of linen and lace. Pop. 1235.

KÖNIGSHÜTTE.—1. A *vil.* Hanover ball and 15 m. S.E.E. Kassel, with important iron-works and blast-furnace, at which 500 persons are employed.—2. (Königsberg or Hainich), A *vil.* Prussia, prov. Silesia, gov. and 49 m. S.E.E. Oppeln, with a court of justice, mining directory, a fire and four iron smelting furnaces, and other iron-works. Pop. 689.

KÖNIGSLUTHER, a *ts.* Brunswick, circle Hildesheim, cap. ball. near l. bank Schönteich, 14 m. S.E.E. Brunswick. It has four gates, two churches, in one of which are the tombs of the Emperor Lotharius II. his queen Richenza, and Duke Henry of Bavaria; a superior bourgeois school, and manufactures of linen, hyacinths, dillflowers, and the works. P. 2520.

KÖNIGSTADEN, a market in Lower Austria, in a mountainous district, 73 m. from St. Pölten, with a castle, and celebrated for the maturity of its air. Pop. 978.

KÖNIGSTADT, or **Winnert-Königsberg**, a *ts.* Bohemia, circle and 15 m. W. S.W. Březnice, on Lake Střez with a church, townhouse, and school, manufactures of cotton and linen, a cotton print, and several mills. Pop. 1747.

KÖNIGSTEIN a *ts.* Saxony circle and 18 m. S.E. Dresden, at the confluence of the Elbe with the Elzbe. It has a church, and paper saw, and other mills. On the l. bank of the Elbe, N.W. of the town, a mass of rock rises majestically to the height of about 800 ft. above the river and is crowned by the ruin of Königsstein. Being surrounded on all sides by perpendicular escarpments, which make ascent impossible, and not being commanded by any adjoining heights, it has never been taken, and is deemed impregnable. The platform on top includes a space of several acres, which is partly cultivated and water is supplied from an inexhaustible spring, cut through the rock to a depth variously stated at 613 ft., 725 ft., and 1220 ft. Pop. 2519.

KÖNIGSTEIN a *ts.* Kassel, cap. ball. of same name, 15 m. W.N.W. Frankfurt, with a church and the ruins of a strong fortress, which belonged to the archbishop-electors of Mainz. On a steep wooded height opposite to the village are the ruins of the castle of Falkenstein. Pop. 1409.

KÖNIGSWALD two places, Bohemia.—1. A *vil.* circle Leitmeritz, in a valley on the Elbe, 10 m. from Teichitz, with a church, a school, and several saw and other mills. Pop. 1282.—2. A *vil.* on the Kooche, in a valley between the Jitschberg and the Kooche and Lohndenberg, 7 m. from Nürnberg, with a school and two mills. Pop. 2165.

KÖNIGSWALDE.—1. A *vil.* Prussia, prov. Brandenburg, gov. and 73 m. N.E. Frankfurt, between two lakes, with a church, manufactures of molasses and steam cloth, a cotton mill, three saws, and a trade in cattle, and the mineral lake. Pop. 1332.—2. *vil.* Saxony, circle Barchitz, ball. Thriditz, with a church and outworks, manufactures of wools and lace, two iron, several oil, saw, and other mills, and some general trade. Pop. 1775.

KÖNIGSWARTZ, a *vil.* Bohemia, circle and 15 m. S. Střezberg, with a fine castle in a very romantic valley, mineral springs, and a bathing establishment. Pop. 1646.

KÖNIGSWARTZ, a *vil.* Saxony, circle Barchitz, 53 m. S.E. Dresden, with a castle, five wind, and an iron, saw, and other mills. Barclay de Tolly defeated the French here in 1813. Pop. 851.

KÖNIGSWINTER, a *ts.* Rhodan, Prussia, gov. and 30 m. S.E.E. Cologne, r. bank Rhine, at the foot of the Drachenfels. It has three gates, a justice-of-peace court, a church, and four mills, some shipping, and a trade in wine, corn, and stone. Pop. 3132.

KONIG, a *ts.* Russian Poland, l. bank Warta, 100 m. W. Warsaw; with two churches, a synagogue, an old monastery, a castle, manufactures of woollen and linen cloth, hosiery, and leather. In 1794 the Poles were here defeated by the Prussians. Pop. (1841) 4659.

KÖNIGSHOYCKT, a *vil.* and com. Belgium, prov. and 13 m. S.E. Antwerp, in a damp and marshy district. It has manufactures of linen, and a trade in horses and agricultural produce. Pop. 2023.

KONIGSKA WOLA, or **KONCOWOLA**, a *ts.* Russian Poland, walled, and 57 m. N.W. Lublin, near l. bank Vistula, with a church, and a cemetery with a number of interesting monuments. Pop. 1190.

KONITZ, a market in Austria, Moravia, circle and 18 m. W. S.W. Olmütz, with two churches, a castle, and a trade in cattle. Pop. 1773.

KONITZ, or **CONITICA**, a *ts.* Prussia, prov. W. Prussia, gov. and 58 m. W. S.W. Marienwerder cap. circle. It has three churches an Augustine monastery, gymnasium, and hospital; a court of justice, and several public offices; and a trade in cattle. In 1435, the Teutonic Knights here secured a victory over the Poles. Pop. 3244.—The country is flat and sandy, but has some good arable land, and excellent pastures. Area, 694 sq. m. Pop. 46,672.

KONITZ to *Asiatic Turkey* See *Koma*.

KONIZ a *vil.* and par. Switzerland, com. and 2 m. S.W. Bern, in a valley of its own name, with a castle, a trade in cattle, and dairy produce. In the vicinity are the ruins of the old castles of Aegerter and Bubenberg. Traces of silver and copper have also been found. Pop. 548.

KONIGEN, a *ts.* Prussia, prov. Saxony, gov. Meissenburg, circle Suhl; with a church, an hospital, lincolin, and four mills. Pop. 2714.

KONKON CONDORE on the China Sea, off the S.E. coast of Anson, lat. 5° 40' N. lon. 105° 59' E. in the form of a crescent, with high peaks. It produces the milk and tar tree; and is well inhabited. In the beginning of last century the English established a colony and built a fort here, but soon after abandoned it under very unhappy circumstances.

KONUTOP a *ts.* Russia, gov. and 96 m. W. (nom. gov. cap. circle, on the Jemtschka. It is walled, and has six churches. Pop. (agricultural), 9000.—The country, though somewhat sandy, produces in abundance corn, hops, and linseed, and possesses great numbers of cattle. Pop. 24,000.

KONOVITZ, on the Koneva, Finland, near the W. shore of Lake Ladoga. It is densely wooded, and has a monastery upon it. A stone of extraordinary magnitude is also shown as which, in heathen times, the inhabitants were accustomed to offer horses in sacrifice.

KONRADSHUTTH or **CONRADSHUTTH** a *vil.* Bavaria, Upper Franconia, 17 m. N.E. Bamberg, with a Protestant church, two castles, and a mill. Near it is a serpentine quarry. Pop. 1070.

KONRADSWALDAU, two places, Prussia, prov. Silesia, gov. Liegnitz.—1. A *vil.* circle Silesia, with two churches, a castle, lincolin, and saw and flour mills. Pop. 856.—2. (Mittel), a *vil.* circle Landau, with two churches, and several mills. Pop. 675.

KONRAKAIA, a river Russia, which rises in the S. of gov. Ekaterinow, flows circuitously W., forming the boundary between civil government and that of Tartaria; and, after a course of about 150 m., joins l. bank Donkowsk at Nikolai.

KONRIE, a *ts.* Poland, walled, and 50 m. S.W. Warsaw, on the Dravie, about 20 m. W. S.W. Barchitz. It is formerly well built; and has three churches, manufactures of wools, and several forges and iron mills. Pop. (1841), 4659.

KONSTADT, or **Worms**, a *ts.* Prussia, prov. Silesia, gov. and 26 m. N.E. Oppeln, r. bank Rhine. It is walled; has three gates, a church, an hospital, a castle, and several mills. Pop. 1594.

KONSTANTINOGORESK, a fort, Russia, gov. Caucasus, about 22 m. S.W. Georgievsk, near I. bank Podkumok. It lies on part of the military line of the Kuban, and has thermal springs, with a bathing establishment.

KONSTANTINOGORAP, a tn. Russia, gov. and 40 m. S.E.E. Potem, on a circle of same name at the confluence of the Dniepr with the Orel, and is well surrounded by an arched rampart. Inhabitants chiefly agricultural. P. 2382.

—The caucasi is generally an unbroken plain, over which vast herds of cattle roam at large.

KONSTANTINOV (Stano) in Russia, gov. Volynia, cap. of the circle, I. bank Stukha, 90 m. S.E.W. Jitomir. Inhabitants live principally by sheep-rearing. Pop. 3880.

KONSTANTINOV, a tn and lake in CONSTANTINOV, gov. KONTWIG, or KONWIS, a vil. Bavaria, Palatinat, about 5 m. E. Zwenberghaus, on the Rhine; with two churches, and manufactures of steel. Pop. 1378.

KONUDEI, a vil. Senegambia, Fouta-Djam, I. bank Senegal, lat. 15° 54' N.; lon. 13° 7' W. Near it is a sand-bank, which the natives can easily render impassable by artificial barriers of wood or stones.

KONY, a vil. Hungary, Thither Danube, co. and 13 m. from Raab with a church. P. 1293.

KONTAK, a vil. Hungary, Thither Theiss, co. Bihar, about 6 m. from Fatai, with a church. P. 2794.

KONYA, or KUTZ, two places, Hungary —1, A vil. Thither Theiss, co. Marmara, in a plain on the Tis, 28 m. S.E. Balghat with a church, a synagogue, and several salt springs. Pop. 901 —2, A vil. Thither Danube, co. Fehérvár with a church. Pop. 1494.

KONYL, a vil. Hungary, Thither Danube, co. Tolna, on the Koppány 82 m. W.S.W. Fek with a church, a mill, and some trade in corn, wine, and cattle. P. 1543.

KOFOU a tn. W. Africa, Honza, 52 m. S. by W. Kano surrounded by a circle wall. The ground in the vicinity is a tolerable state of cultivation. Pop. about 30,000.

KOOG-AAN-DE-SAAK, or DE KOOG, a vil. Holland, prov. W. Holland, 7 m. N.W. Amsterdam, on the Zaan. It has two churches, two orphan hospitals, a poorhouse, and two schools; with manufactures of starch, oil, and white-lead. Logwood, oil, saw, and other mills, some host-building, and a considerable trade. Pop. 2096.

KOOKUBUNDA, a tn. in Hindoostan, prov. Candahar, 7 m. S.W. by W. Kandahar, 7 m. S.W. by W. Kandahar. It is a place of considerable size. The river, which in the hot season is only knee deep, and 150 yards wide, covers a channel of nearly 1/2 m. in the rainy season.

KOOM, KNOON, or KUN (see Chomel), a city Persia, prov. Irak Ajem, sep. dist. of same name, on an extensive plain, 80 m. S.E.W. Teheran, near the small river Gooher, which, after a short course, E. loses itself in the sand, lat. 34° 38' N.; lon. 50° 56' E. It is said at one time to have contained 100,000 inhabitants; and its present magnificence is still attested by the ruins and splendid sepulchres with which the neighbourhood abounds. It has sunk into insignificance, and its chief importance at present in the high regions which it holds in Persia as a place of holy resort and ascription. Pop. probably not more than 6000.

KOOMESHIAH, or KOOHGHAN, a tn. Persia, prov. Irak Ajem, 50 m. S.E.E. Isfahan, in a valley one side of which is overhung by Mount Dozla. It was a large and flourishing place under the Saffids, and still occupies an extensive space enclosed by walled gardens, but is almost a heap of ruins. Pop. about 6000.

KOONCH, a tn. Hindoostan, prov. Agre, sep. dist. 100 m. S.E.E. Gwalior. It is a large place, and as well as its district, is included from the possessions of the British, though under their administration.

KOONDOOZ, a khanda and tn. See KNOODDOOZ.

KOORDISTAN or **KOORDISTAN** [land of the Kurds or Kurds], an extensive territory of W. Asia, comprehending the greater part of the mountainous region which terminates the W. side of the great plateau of Iran or Persia, and stretches W. till it overhangs the low plains of Mesopotamia on the S.W., and reaches the sources of the Turkish provinces of Diarbekir and Bagdad on the N.W. As it does not form a separate political division, its exact limits are not ascertained; but the E. part of it forms the Persian districts of Ardalan and Maragheh, and the remainder, constituting the far larger

portion, is in Turkey where it forms the principal part of the pachalik of Van and a considerable part of that of Bagdad. Its limits, as thus defined, lie between lat. 34° and 39° N., and lon. 43° and 47° E., and must enclose an area of nearly 40,000 sq. m. The surface is very mountainous, and is traversed by lofty ranges stretching N.W. to S.E., in directions nearly parallel. The principal range connecting it far from the banks of the Tigris, near the town of Jousak, in Diarbekir where its elevation does not much exceed 1000 ft.; gradually rises as it proceeds E. till near the middle it attains in the El-Khar mountains, 3000 ft., and still further E., in Rowandiz, on the frontiers of Persia, at least 10,000 ft. The spaces between the mountains are sometimes intersected by deep valleys, but more frequently form a rugged table-land, white, in some parts, has a height of 6000 ft. to 7000 ft. The higher parts of the mountains consist of argillaceous rocks, shaly argillaceous and hercynitic in immediate contact with which are extensive deposits of old red sandstone and mountain limestone. In many places secondary rocks of a more recent origin occur, more especially near red sandstone, and to abound as usual with siliceous deposits. The whole surface on the W. of the Persian frontier being situated between the Tigris and the Euphrates is drained by these two rivers and their tributaries. The Tigris receives the far larger share, both directly and by its important affluents the Great and Little Zab. The Persian portion belongs to the head of the Karah, but not wholly as a small portion of its drainage is carried N. by the Kuzi-outan. Except Lake Van is considered as partly within the territory, there are no lakes of any consequence. Owing to the general elevation of Koordistan, it escapes the scorching heats by which Mesopotamia suffers so severely. Its higher summits are, for the most part, covered with fine forests of oak, and other hard timber, while at lower heights magnificent walnut trees abound. Many of the valleys and long terraces, lining the mountain sides, are under regular culture, producing fine corn-fields, orchards, and vineyards. Hemp, flax, and tobacco, are also largely grown; and in the lower valleys the mulberry for rearing silk-worms, and the cotton plant are successfully cultivated. Melons and pumpkins grow to an enormous size, and, among the multitude of flowers, the giganthea rose is conspicuous. One of the most remarkable vegetable productions is manna, extensively called in Turkish *Kandak-Adasos*, or the *Darke socmact*. It is found chiefly on the leaves of the dwarf oak *Quercus agrifolia*, and of inferior quality, or those of the same oak, and some other plants and occasionally on the sand, and on rocks and stones. It is gathered before sunrise by plucking cloths under the trees and shaking them, and is eaten as food both in its natural state and as an ingredient in sweetmeats. Among domestic animals the first place is due to the horse, which is of a remarkably fine breed, is used extensively for riding, and is in great demand by the Turks and Persians for cavalry. The chief beast of burden is the ox, of which great numbers of a large size are kept, the ruggedness of the ground very much limits the use of the camel. Sheep and goats, the former remarkable for the excellence of their wool, are kept in large flocks.

The Kurds to whom the territory owes its name, are not confined within its limits, but are found in considerable numbers eastward in Khorsan and over the hill region of Mesopotamia as far W. as Aleppo and the Taurus. They are a stout, dark race, well formed with dark hair, small eyes, wide mouth, and a fierce look. Almost every man is mounted, and is provided either with javelins about 5 ft. 9 in. long, or a bow of horn nearly 6 ft. long, and a well-supplied leather quiver. The sling which Xenophon saw when he passed through the country with the 10,000 Greeks, is still in use. Many of the tribes continue to lead a migratory life and though there are numerous small villages seated generally on the sides of hills, the inhabitants to whom they belong quit them after seed-time for the mountains, and there remain pasturing their herds and flocks, till the recurrence of harvest invites them to return. The language is of the same stock as the modern Persian, but has degenerated more, from not having been fixed by writing. The great body of the Kurds are Mahomedans, but allow their women a much greater liberty than the Koran sanctions. A veil is worn by the higher but dispensed with by the middling and lower classes. As the Kurds have few wants, they are very indifferent about trade. They send,

however, chiefly to Kiekkok, which is their principal entrepot, but partly also to Hamsden, Bagdad, and Hamat, galena, saltpetre, honey, sheepskins, and cattle; obtaining, in return, coffee, rice, leather, and clothing, chiefly cotton goods.

Kiekkok. — From the Chinese Embassy, sent to Peking through Shanghai.

The Koords were known to the ancients under the name of Capcheli. Under the ancient Persian monarchy they were included partly in the province of Anaxura, and partly in that of Media. After the time of Alexander their territory formed part of the kingdom of Syria, but was discovered from it by the Parthians about three centuries before the Christian era. They afterwards formed part of the new Persian empire, and, on its destruction, passed to the Caliphs of Bagdad. The famous Sultan Saladin was a Koord. It is very difficult to form even an approximate estimate of the whole Koord population; the Turkish portion is supposed by Chenevix de Laube to amount above 2,500,000.

KOORDMURULEH a vil. Persia, prov. Mazandaran in a valley of same name, about 33 m. W by N Astard. Its houses are scattered in groups, in a wood composed chiefly of large forest and fruit trees. Several of the houses, with white-washed walls and verandahs, have a neat and cheerful appearance; and among the public buildings are a school, and two baths. Pop. 1000.

KOORGHINOOR, or **AKANT-UGUL-KUM**, a lake, Anatolia Russia, in the E. of prov. Orsk; not far from the frontiers of China, between lat. 45° and 46° N. and lon. about 100° E. It contains three islands, receives several rivers, but has no outlet.

KOOHIA, Morocco. See *Crota Marna*.

KOOJIAH a small tn. Hindostan, prov. Bengal, prov. Agra, 7 h. S.W. of Delhi, lat. 28° 18' N.; lon. 77° 51' E. It has a small, but rather elegant pagoda, adorned with some grotesque figures on the outside, and the ruins of several Mussulman temples. Near the town is an old fort.

KOOTWEY, a tn. Hindostan, prov. Malwa, cap. of a small independent Poonja state, on the Betwa, 240 m. S.W. Allahabad. It is surrounded by a dilapidated wall, and defended by a fort, which stands on the opposite side of the river, and is considered a place of strength, having never been taken, though often besieged.

KOORHAN a mountain, China, prov. Fokien, about 40 m. S.W. Foochow. It rises suddenly to the height of 3000 ft. above the valley of the Min, and terminates in a peak, which is much visited by the Chinese to see parties. For this purpose, the ascent is usually made by torch-light, after passing the previous night in a celebrated Buddhist temple, sit-

uated on the mountain side, about 1000 ft. below the summit. This temple, in which numerous pilgrimages are made, consists of three principal buildings, with above each side, and a number of houses placed at right angles to them, and occupied by the priests, who are above 100 in number. The great attraction of the temple is a large white substance, apparently stone, about 6 inches square, exhibited within an iron grating, and said to be one of Buddha's teeth. There is also a library with an extensive assortment of religious books, carefully locked up in presses, and seemingly seldom used. — (Fortune's *The Dialects*.)

KOOSHE, a vil. and fort, Afghanistan, on a river of same name, and at the W. base of Mount Khyoo, about 40 m. N by E. Herat, on the road to Marva. Both village and fort are in a very dilapidated state, the former consisting of a few mud huts, and the latter looking like a ruinous forward enclosure. — The river, which rises at lat. 34° 55' N., and lon. 63° 35' E., pursues a course not very accurately known first N.W., and then N.E., and joins the bank Moorgash, or Awhi Moor, at lat. 36° 15' N., and lon. 63° 35' E., after a course of about 180 m.

KOOTEN a vil. Holland, prov. Friesland, 11 m. E. Leeuwarden, with a church and school, a gin-distillery, a boat-building yard, and two grain-mills. Pop. 637.

KOOTUBDEA, an isl. Bay of Bengal, W. coast, Chittagong, lat. 21° 56' 50" N., lon. 92° 45' E.; low and woody and about 12 m. in length, N by E., and S. by W. Extensive sands project from its S. part.

KOPACE, a vil. Hungary, Thither Danube, co. Bazanya, 5 m. from Ezerk; with a church. Near it are several large lakes, in which very productive fisheries are carried on. Pop. 1564.

KOPCHAN a vil. Hungary Thither Danube, co. Neutra near the March 3 m. from Holles, with two churches, and an extensive breeding-stand, with magnificent stables. Pop. 1918.

KOPCHENY, or **KREZZA**, a market tn. Hungary Thither Danube, co. Wieselburg, about 4 m. from Pressburg, with a Greek church, and a castle. Pop. 2447.

KOPENICK, or **COVENANT**, a tn. Prussia, prov. Brandenburg, gov. and 22 m. S.W. E. Potsdam, on an isl. formed by the Havel. It has an old royal palace, now used as a military depot, with chapel and gardens, a justice of peace court, manufacture of woollen and silk goods, carpets, and chemical products, blacksmiths, and a trade in cattle. P. 2632.

KOPETNEH, or **KAPATZEH**, a vil. Austria, Transylvania dist. Fogaras, about 14 m. from Sibiu. It has a Greek united parish church, and is inhabited by Wallachian frontier soldiers. Pop. 970.

KOPHAZA, or **KOLASOW** a vil. Hungary Thither Danube, co. and 4 m. from Galatzburg, with a church, and a flour-mill. Pop. 1198.

KOPIDINO, a tn. Bohemia, circle and 10 m. N.W. Bilschew; with a castle, church, and school; a distillery, and tile-works. Pop. 1010.

KOPFANT (Kopfa) a market tn. Hungary, Thither Danube, co. Semegh, on a small stream of same name, 50 m. N.E. Kopravitsa. It was long possessed by the Turks who surrounded it with walls and bastions, of which only some traces now remain and has a church, and a trade in wine and wool. Pop. 948.

KOPRINITZ, or **KAPRITZKA**, a tn. Austria, Croatia Thither Sava, co. and 16 m. N.E. Koprivitsa, in a plain. It is walled, defended by a strong castle, and has two churches, a Franciscan monastery, and high school. Pop. 3626.

KOPRILLI, a tn. European Turkey Macedonia, 2 h. S. of Verder, a little above the junction of the Peto with that stream, 23 m. S. by E. Uskup.

KOPREY WICHA, a tn. Russian Poland, 10 m. S.W. Bialystok, on the Wrona, near the junction with the Vistula. It has an old Christian abbey, and some general trade. P. 1076.

KORUL, or **GORATZ**, a tn. Hindostan, prov. Bombay, prov. Deccan, 190 m. W.S.W. Kurnool. It is fortified, and was once reckoned among the strongest places in India. In 1790 it capitulated to the Mahratta army, after six months' siege; and in 1819, when in possession of a rebellious governor, was starved by the British.

KOPUTTELLA, or **KORUMUTTELLA**, a tn. Punjab, 35 m. S.W. Amritsar; lat. 31° 24' N.; lon. 75° 37' E.

EGYPT, a to. Nubia, gov and 55 to. S.E.W. Midek, formerly the cap. of a duchy. It has a church. Pop. 1000.

EGYPT, a to. Nubia, gov and 80 to. N. Midek, cap. church, 1 bank. Dendera, with three churches and a synagogue, and some small towns. Pop. 11,165. 1898; circle 64,306.

KORANDERREH, a to. Persia, prov. Isfahan, in a beautiful valley of some name, between the towns of Casbin and Sahagayeh, among numerous gardens.

KORANA, a river Austria, which issues from Lake Pilschitz, on the S. slope of Mount Little Kapella, in Military Croatia, forms part of the boundary between it and Turkish Croatia, and after a very circuitous N. course of nearly 60 m. joins the bank of the Danube.

KORANKO, or **KORANKO**, a little known territory of W. Asia, E. of Sierra Leone, which may be said to lie between lat. 8° 30' and 9° 30' N.; lon. 9° 40' and 11° 30' W. The natives are, in general, indications they cultivate cassia, spinach, small onions, and tamar, an herb which, when dried and beaten, serves as a substitute for snuff; and manufacture some cloth, about 9 inches broad. The greater portion of which is disposed of at Sierra Leone. But the staple article of trade is sawwood, which is sent down to the coast, in great quantities, by the numerous and other streams. The language and dress of the Korankos are nearly the same with those of the Mandingos.

KORH, a vi. Württemberg, circle Neckar, ball. Wallingen, with a church, and a trade in wine, which is largely grown in the district. Pop. 1236.

KORHACH, a to. Germany, principality Waldeck, cap. ball, on the Rhar, 28 m. W. S.W. Cassel, with two churches, a townhouse, and gymnasium, and a trade in cattle. P. 2239.

KORDOFAN a country of E. Africa, in the dominions of the viceroy of Egypt. It is bounded W. by Senaar and E. by the country of Beni Fashar tribes, separating it from Darfur, and may be estimated as comprehended between lat. 13° 30' and 15° 30' N. lon. 39° 20' and 51° 30' E. though its exact limits are by no means precisely known. Its capital is Omdur, or El Omdur. See Omdur. The country generally is flat, although not altogether destitute of mountains, which occur in several parts, particularly on the S.W., with a sprinkling of isolated hills in the extreme N. portion, but none of them attaining any great elevation. During the rainy season a few scattered streams are formed, but these dry up quickly as they approach the sea. There are, however, several small permanent lakes in different parts of the country; and, in the rainy season, sheets of stagnant water are numerous but soon evaporate. The soil of Kordofan is, upon the whole, fertile, when abundantly watered but, in the dry season, gives little indication of the productive capabilities which it really possesses. With the rainy season, vegetation springs up from the earth as if by magic, balsam odors fill the air; the trees shoot forth fresh buds, and a variety of flowers is spread over the whole country. But in the dry season, which lasts nearly eight months in the year, the plants are burnt up, and the eye rests only on desolate and parched plains. The climate is extremely unhealthy, especially during the rainy season, which lasts from June to October. In the dry season, again, though disease disappears, the heat is intolerable, the thermometer standing, in the shade at 111 to 122 Foh. while the nights are so sharp and chill that it is necessary to take every precaution against the effects of cold. In this season, frightful hurricanes occur. Among the natural vegetable productions of the province are many useful trees, including the gum tree, the tamarind, and the apple, which produces a fruit of the size of a plum, of a yellowish color, and pulpy consistence. The gum produced by the trees of Kordofan is of the finest description. Cultivation is almost wholly confined to dock, a species of grain resembling millet, but with a stalk 7 ft. or 8 ft. high. It is the only species of grain used by the inhabitants, and is indispensable to them for their bread. Wheat, Indian millet, and cotton, are given in very considerable quantities.

The domestic animals are the horse, camel, ass, mule, cow, sheep, dog, cat, fowls, and pigeons. Among the wild animals are lion, leopard, panther, two varieties of hyena, jackal, about 10 species of antelope, monkey, wild cat, fox, elephant, and rhinoceros are occasionally seen, and reptiles and insects abound. Eagles, vultures, parrots, a variety of aquatic birds, ostriches, bustards, and the like, are the chief birds.

There are few manufacturers in Kordofan, and the only description of artisans are weavers of calicoes, muslins, tannery, and pottery. The quantity of manufactured cotton produced is not sufficient for the supply of the country; the deficiency being imported from Dongola, Egypt, and Europe. The natives are industrious workmen, and fabricate all the necessary household and agricultural implements. The natives excel in tanning sheep-skins, to which they impart various bright colours. The potters manufacture one single kind of vessel, called *barra*, in form of a bowl, but with rather a wider neck, a kind of plate, called *sopa*, for baking bread, and pipe heads. The women plait some very ornamental articles from the foliage of the *Dodon* plant, also bread baskets, covers for dishes, mats, &c. beautifully coloured, and elegantly designed.

The articles of export from the province are gum, hides, senes leaves, ivory, rhinoceros' horns, cattle, tamarind, ostrich feathers, ostrich eggs, gold, in rings and in grain, water-bags, salt, tobacco, and slaves. The first three articles named are the most lucrative and are monopolized by the Government. The imports consist of spices, sugar, coffee, sulphur, rice, soap, cotton and linen ordinary cloths, wine, bread, roselle, vinegar, oil, dry cheese, shot, guns, pistols, double-edged swords, camel bells, antimony, arsenic, iron and brass wire, mirrors, finger rings, glass beads, &c.

The population of Kordofan consists of three distinct races, the negroes or aborigines, the Arabs or free people, and those who have emigrated from Dongola. The negroes are of a very amiable disposition, hospitable and much attached to their children. The Arabs, as they call themselves, though of doubtful descent, differ entirely in disposition from the negroes being proud, suspicious, and unwilling to intermingle. The Dongolans are the most opulent of the inhabitants, and nearly the whole of the export trade by caravan is in their hands, they are represented as being notorious liars, ungrateful, and dishonest. The people are of simple habits, and, on the whole, extremely good-tempered the traveller meeting everywhere with a kind and hospitable reception. The women are of an exceedingly lively disposition and are generally much more industrious than the men. Kordofan was subdued by Mahomet Ali in 1820. Pop. estimated at 400,000. (Palmer's Travels in Kordofan, &c. de. 1829.)

KORH, a vi. Hungary, circle Themas, on road 11 m. S.E. Hengst, on the Themas, in the middle of a marsh, with a church, and a trade in cattle and hemp. Pop. 1234.

KOREA. See Corea.

KOREE, an arm of the sea, on the S.E. extremity of the sea-coast of Seinde. It is supposed to have once been the estuary of the most E. branch of the Indus, which still during high floods, discharges part of its waters into it. At Omdur, 20 m. from the open sea, it has a width of 7 m.

KORENICA (Oman and Uman), two nearly contiguous vias. Austror Croatia, and 80 m. S.E. Cassel, on a small stream of same name, with a church and several mills. Pop. of Ober Kornenica, 1854. Unter-Kornenica, 1870.

KORETZ, a to. Basia, gov. Volsynia, circle Ostrog, on the Karak. It is well built, and has several churches and manufactures of porcelain. Pop. 1600.

KORGO a small vi. Persian Gulf, coast of Persia, prov. Fars, 2 m. N. of Karak, lat. 25° 25' N., lon. 50° 17' E. (a.) low and sandy, 4 m. long, and 1 m. broad, surrounded by a bank of coral rock, excepting on the N.E. side where the best anchorage is, and where there is also a watering-place.

KORJAKOV, a vi. and fort. Asiatic Russia, gov. and 250 m. S.E. Omak r. bank Irtysh, near a salt lake of same name from which great quantities of salt are obtained.

KORITSCHAU a market to. Austria, Moravia, circle Hradisch, 80 m. S.E. Brunn, with manufactures of starch, several saw and other mills, and glass-works. Pop. 1462.

KORK, a vi. Baden, circle Middle Rhine, cap. ball, on the Kinzig, and the railway from Appenweiler, 3 m. E. Steinburg. It has manufactures of vinegar, and a copper-rolling. Pop. 1100. Area of ball. 24 geo. sq. m. Pop. 11,328.

KORLAITH, several places, Hungary — 1, for Korlaund & vi. Either Themas, on Abanyur, 5 m. from Vinyo, with a church, a number of well-built houses, and a trade in wine. Pop. 1136. — 2, for Omdur, a vi. on Moravia, on the Mlava, 22 m. from Mollen, with a church, and mineral springs, lime-kilns, a saw and a flour mill. Pop. 766.

ROBLIN, a tn. Prussia, prov. Posen, gov. and 17 m. S.W. Końskie, with a church, an hospital, manufacture of woollen, linen, and serge, a bakery, and a trade in cattle. Pop. 2861.

ROREND, a tn. Hungary. Thither Danube, on Eisenburg at the confluence of the Palka with the Raab, 15 m. E. Selmestenberg. It has two churches, a synagogue, handsome warehouses, an aggregation of old castles, belonging to Prince Bathyany with fine collections and extensive gardens. It often suffers much from inundation. Pop. 9400.

KORNA, a fortified tn. Asiatic Turkey, push Bagdad, and 46 m. N.W. Basorah, at the junction of the Euphrates and Tigris. It is walled, and surrounded by date forests and is the residence of an officer appointed to let the imports from vessels navigating the rivers. Pop. 4000.

KORNEGAL, or **KORNEGALLAN**, a tn. Ceylon, 55 m. N.E. Colombo lat. 7° 27' N lon 80° 27' E. Some native prisons formerly existed here, and the vestiges of their pillars may still be traced.

KORNELMÜNSTER, a vil. Prussia, Posen, gov. and 4 m. S.E. Albrecht, on the Inde, with a church, and manufacture of linen and saunders, on iron-mill on iron and a lead furnace, and important stone quarries. Pop. 800.

KORNEUBURG, a tn. Lower Austria, 1 bank Danube, 8 m. W. Vienna, on the railway to Stockholm. It is well built, has a large public square, adorned with two fountains, a handsome Gothic church and, adjoining it, an Augustine church, with a fine altar and furnace, a large townhouse, courtyards, a military and a high school, two hospitals, and two poor-houses. The trade is considerable. Pop. 2470.

KORNEHAUS, or **KORNEHAUS**, a market tn. Bohemia, circle Rakowitz, 24 m. W.W. Prag, with a church, school, tile-works, lime-kilns, and saw and other mills. Pop. 1045.

KORNYE [anc. *Quirinus*] a vil. Hungary, Hither Danube, on Komorn, about 7 m. from Tala with a church, two mills, a fish pond, and extensive preserves of game, particularly pheasants. Pop. 915.

KOROLEVETZ, or **KOROLEVETZ**, a tn. Russia, gov. and 100 m. E. Chernigov, on the Dobry-Vody with four annual fairs, one of them considerable. Pop. 1350.

KOROMPA (also), or **URZEN KORPA**, a vil. Hungary, on Frassburg 5 m. from Tyrnau, with a church, an elegant castle, a synagogue, tile-works, and a trade in wine. P. 1003.

KORON a seaport, Greece. See *Coron*.

KOROF, a tn. Russia, gov. and 80 m. E. Chernigov on a stream of some name, near its confluence with the Desna, with good transit trade and several annual fairs. Pop. 3225.

KORORAREKA, a bay and vil. New Zealand, N.E. coast, North Island, Bay of Islands lat. 25° 15' S lon. 174° 10' E. The bay is small with a shingly beach in front, and a swamp behind; off the village the depth is 44 fathoms, with bottom of mud and sand. The village extends along the shore, and contains several general stores but is reduced in size, having been burnt down by the natives in 1845. Live stock is plentiful here, but the prime moderate. The greater part of the country about the village is covered with fern, and the country here (*Leptocarpus*)—the latter a low shrub, with lanceolate white or pinkish flowers.—(*Page of the Settlements*).

KOROS, numerous places, Hungary.—1. (*Upp*), a vil. Thither Danube, on Szeged, in ailly district near Lake Balaton, with two churches, and the remains of an extensive monastery and other buildings. Pop. 1089.—2. (*Kis*) a market tn. Hither Danube, on 61 m. S.E.E. Pesth, with two churches, and a trade in corn, wine, and cattle. Pop. 1488.—3. (*Med*, *Als*, and *Fels*, or *Jenőp*) a vil. on the Danube, on the Black Theiss, near the frontiers of Galicia, 83 m. N.E. Seged; with three churches, and a saw and other mills. Pop. 3856.—4. (*Upp*), a market tn. Hither Danube, on 46 m. E. Pesth, in a fertile but somewhat marshy district. It contains a number of handsome buildings; a Protestant, Greek, and R. Catholic church; a synagogue, and a Protestant gymnasium, with library, and has a considerable trade in wool and cattle. Pop. (1846), 18,800.—5. (*Upp*), a vil. Transylvania, on Harmanak, on the Alana, 14 m. from Kerevendi, with 10 churches, R. Catholic, and Greek-union churches. Pop. 1000.

KORON (Latin, *Coron*) a river Hungary sometimes called the Theordol Kirt, becomes formed by the union of

three streams—the Selva, or *Szilaf*; the Fehér or White; and the Fekete, or Black Kirt. The Selva-Kirt, the largest of the three, rises in Transylvania, about 20 m. S.W. Klausenburg flows first N.W. into Hungary, and then almost W. past the town of Grosswardein, and joins the Fehér Theiss, near Oszegrad, having received on the right its principal affluent, the Berettyó, about 36 m. N.E. that town. The Fehér and Fekete Kirts, rising the former in the W. of Transylvania, and the latter in the E. of Hungary, were nearly parallel W.W.W. course, until at Bekes, 40 m. W.W. Grosswardein, and join the Selva-Kirt about 13 m. after the junction.

KOROS-BANTA or **ALAKHURU**, a tn., on Szard, on the Kirt, 30 m. N.W. Deva; with three churches, and near a gold-mine. Pop. 2200.

KOROTCHA or **KAROTCHA**, a tn. Russia, cap. district, gov. and 70 m. S.E. Koursk, a bank river of some name. It is tolerably well built, has six churches, manufactures of salt-petre, and a considerable trade in apples, for which the district is famous. Pop. (chiefly agricultural), (1849) 7280.

KOROTIAK, a tn. Russia, gov. and 50 m. E. Yaroslavl, at the junction of the Korotok with the Don. It has four churches, a convent, and a trade in hulk and cotton-goods. P. 7279.

KORPO an isl. Russia, at the S.E. entrance of the Gulf of Finland E. of the Åland group, in lat. 59° 8' N lon 21° 50' E. It is about 20 m. in circuit and contains a small town of some name, and several villages.

KORABAD, **KORABAD**, or **KORABAD**, a vil. Turkey in Asia, push, and 5 caravan routes N.E. Mosul, on a hill above a bank, Khamsar Hara Botta, in 1843 discovered the ruins of a large building containing Assyrian sculptures and inscriptions, but nearly buried up. This was the first discovery of the antiquities of Nineveh, to which the labours of Layard and others have lately given so much interest.

KORÖBT, a seaport tn. Denmark, at Seeland on the Great Belt, 64 m. W.S.W. Copenhagen. It contains the remains of an old castle, and a church on which a telegraph is fixed, communicating with Nyborg, and has good docks, and a harbour admitting vessels which draw from 17 to 18 ft. and defended by a fort. Steam and other boats ply regularly between Koröbt and Nyborg this being the principal ferry between Seeland and Funen. Pop. 1600.

KORTGENE, or **KORTGENE** a vil. Holland prov. Zeeland, lat. N. Beveland, 5 m. N.W. Goes. It has an elegant church, a school, and a harbour. Pop. 921.

KORTVELLES, numerous places, Hungary.—1, A vil. Thither Theiss, on Eszterhazy about 3 m. from Fekolt, with two churches. Pop. 1571.—2, A vil. on Eszterhazy, about 2 m. from Raba-Karostur, with a trade in corn, wine, and fruit. Pop. 814.—3, A vil. Hither Theiss, on Torna, on a small stream about 19 m. from Romenau, with two churches, and a trade in wine, cattle, and timber. Pop. 580.

KORWESTHEIM, a vil. Württemberg, circle Neckar, hall Ludwigsburg with a church, a sulphur spring, a bathing establishment, and a trade in horses. Pop. 1841.

KOB, lat. and lon. Asiatic Turkey. See *Co.*

KOBLENTIN, a vil. Prussia, prov. Rhine, gov. Upper, circle Lublin; with a castle, distilleries, oil and other mills, and a limestone quarry. Pop. 1454.

KOSCHETTITZ, or **KOSCHETTITZ**, a vil. Bohemia, circle Caslau, 4 m. from Hornpau, in the middle of a forest between the Fekle and Koelchitz, with a parish church, school, synagogue, castle, and several mills. P. 594.

KOSCHING, a market to, Upper Bavaria, on an old Roman road, 20 m. W.S.W. Heilbronn, with three churches, a townhouse, and manufactures of salt-petre and potash, numerous breweries, and several mills. Pop. 1188.

KOSCHLAN, a market to Bohemia, circle Rakowitz, with a parish church. Pop. 1390.

KOSCHMIN, or **KOSMIN**, a tn. Prussia, prov. and 46 m. S.E.E. Posen, on the Odra; with two churches, a synagogue, a monastery; manufacture of woollen and linen cloth, and a trade in cattle. Pop. 2405.

KOSCHIBERG MOUNT, a mountain, Australia, Victoria, 2600 ft. high, and forming the highest summit of the Werrogon or Australian Alps, at the head of the river Murray.

KOSD, a vil. Hungary, Hither Danube, on a mountain near the Danube, and near Feny, with a church, and a trade in good wine, largely grown in the district. P. 1326.

KOSCEL, a tn. Prussia, prov. Posen, gov. and 34 m. S.W. Bydgoszcz, cap. circle of same name, 1 bank Oder, here crossed by a bridge, and on the Upper Silesian railway. It is surrounded by walls and otherwise fortified. has several government offices, three churches, a synagogue, hospital, barracks, and tile-works. Pop. 1859.—The canal, for the most part, level, is watered by the Oder and is fertile. Area, 190 sq. m. Pop. 58,070.

KOSCHUTZ, a tn. Russia, gov. and 80 m. S.W. Cherdyn, r. bank Oder. It is defended by a small fort, surrounded by an earthen rampart and palisades; and has a considerable general trade. Pop. (1849) 2028.

KOSHLAR, a tn. Russia, gov. and 80 m. S.W. Kaluga, cap. circle, at the confluence of the Druzhna with the Shcheta. It is one of the handsomest and most regularly built towns of the government, consisting of a number of broad streets, and a spacious market-place. It contains four stone and three wooden churches, two porches, and a large stone bazaar supported by 84 arches forming an arcade, and has a coal-derivate trade. Pop. (1850), 8879.—The climate is flat but fertile. Area, 572 sq. m. Pop. 77,723.

KOSKELLA, a tn. Prussia, Westphalia, gov. and 20 m. W. Münster, cap. circle. It is entered by three gates, has two castles, three churches, and chapels, a synagogue, gymnasium, and hospital, a court of law and several public offices, manufactures of linen and leather, tile-works, iron-works, several mills, and a trade in cattle. Pop. 3610.—The climate is hilly but has some good arable land, and rears great numbers of cattle. Area, 219 sq. m. Pop. 40,104.

KOSKI ISLANDS, Japan lat. 31° 40' N; lon. 139° 42' E., surrounded by rocks on all sides.

KOSMA, a tn. Japan lat. 41° 21' 30" N lon. 139° 46' E., of volcanic origin, 10 m. in circuit, and composed of black, rocky mountains.

KOSINCHANG ISLANDS, Gulf of Siam. See Kori.

KOSLIN, or **OSLIN**, a gov. Prussia, prov. Pomerania, bounded N. by the Baltic, E. by the Danzig and Marienwerder, S. by the Danzig and Frankfurt, and W. by the Baltic, area, 4185 sq. m. It is a dead mountainous flat, excepting toward the coast, where a few sandy hills occur, and is watered by numerous streams and lakes. Of the former, the principal are the Rega, Parnowa, Wprawa, Biebia, Lapa and Lera, of the latter, the Jamna, Biebia, Viteja, Viteja, Gardes, and the Loba. The soil, though generally inclining too much to sand, is tolerably fertile, and raises good crops of corn. The pastures also are extensive, and rear large numbers of cattle, sheep, and swine. A large portion of the surface is occupied by forests, which furnish good timber, chiefly pine. Manufactures have not made much progress. For administrative purposes the gov. is divided into nine circles—Kalin or Pommern, the capital—Belgard, Drenburg, Lauenburg, Neustadt, Rummelsburg, Schellin, Schwau, and Sulpe. Pop. (1850), 454,140.

KOSLIN, or **OSLIN**, a tn. Prussia, prov. Pomerania, cap. above gov., in a low and level plain, at the foot of the Gottenburg, 4.5 m. from the Baltic, and 55 m. N.E. Stettin. Having been nearly destroyed by war and fire, it was rebuilt with great magnificence in 1730. It is entered by three gates, contains a market-place, with a monument to Frederick William I., four churches and chapels, an old castle, townhouse, gymnasium, several schools, and three hospitals; is the seat of several courts and public offices, and has manufactures of woollens, flannels, and silks, linens, soap, and tobacco, distilleries, a trade in cattle, and four annual fairs. Pop. 5753.

KOSLOW, two places, Russia.—1. A tn. gov. Taurida, on the Crimean, 3. A tn. gov. and 55 m. W.S.W. Tambov, on the Leningrad. R. contains three wooden and five stone churches, and a monastery, and has a considerable trade in cattle, hides, and salt provisions, and several important annual fairs. Pop. (1851), 12,022.

KOSMIDZELANSKI, a tn. Russia, gov. and 105 m. S.W. W. Russia, r. bank Volga, opposite the junction with the Volga. It has six churches, and several mills, making hardware, and various other articles, and weaving last made, are carried on. Pop. (1851), 4157.

KOSMIDZEL, or **Kosmidz**, a neighbor to Upper Egypt, on the Red Sea; is 54° 7' N. lon. 34° 31' 55" E. (N.) It lies at the junction of the Egyptian coast from Egypt to Suez, is an old desert; is composed of loosely-built clay houses.

VOL. II.

defended by a small fort and is very inadequately supplied with water. The harbor is only insufficiently sheltered, except from the S. Numerous pilgrims take shipping here for Mecca; and a considerable trade is done in exporting Egyptian wheat, and black and white cotton, to the S. Pop. 2000. About 10 m. N.W. are some ruins, named Old Kosmidz.

KOSSEN a vil and par., Tyrol on the Achen, and the frontiers of Bavaria, in a valley of same name, 16 m. from St. John; with a parish church a country, and other townships. Pop. 1371.

KOSMANNOR, or **Kosmannor**, a vil Bohemia, circle and 8 m. N.E. Roudon, on the Elbe; with a church, two chapels, a school, and a large and handsome castle; and a large cloth and calico factory. Pop. 1310.

KOSOVGO, or **Kosovgo**, a tn. European Turkey Servia, dist. and 7 m. N.E. Pristina, celebrated for a battle fought near it in 1389, between the Turks and the Serbians in which the defeat of the latter cost the life of their prince Koss Lassa, and ended the Serbian monarchy.

KOSTAINITZ, or **Kostainitz**, a tn. Austrian Croatia, at the foot of a mountain, in a narrow valley, on the Unna, 63 m. S.E.E. Carinatz. It is built for the most part of wood, has two churches, a custom-house, and Franciscan monastery, and an extensive trade in Turkish wares. Pop. 3150.

KOSTFL, or **Kostfl**, a tn. Austria, Moravia, circle Hradisch, on a little height above the Thaya, and on the Northern railway, 28 m. S.E.E. Brunn. It is an old place, and contains a deanery church. A great many bee-hives are kept here. Pop. 1700.

KOSTFLETTZ, several places Bohemia, particularly—1. (*see Adelsberg*), A tn. circle and 17 m. S.E.E. Kolinitz, consisting of the town proper on r. and a suburb on l. bank Wda Adler and communicating by a long wooden bridge. It has a deanery church, castle, townhouse, school, and two hospitals, breweries, tile-works, and several mills. Pop. 2605.—2. (*see Adelsberg*), A market tn. circle Kolinitz, about 5 m. from Nachod, with a handsome church and school, manufactures of linen; a trade in linen and yarn, and several mills. Pop. 1163.—3. (*see Adelsberg*), A tn. circle and 21 m. N.W. Kolinitz on a large island formed by the Mollachitz, an arm of the Elbe. It consists of the town proper, and of two suburbs, situated on the opposite side of the river, and connected with it by a long stone bridge; contains two churches, a townhouse, and cavalry barracks, and has several mills. Pop. 1495.

KOSTEL LIZ a tn. Austria, Moravia, circle and 12 m. S.W. Olmitz with a church, and a corn market. It was almost entirely burned down in 1839. Pop. 1856.

KOSTELY (RADO) a vil Hungary, on Krasova, on a small which crosses the Rado with the Tamas, 4 m. from Lugos with a church, and a trade in wine. Pop. 1439.

KOSTEN a tn. Prussia, prov. and 21 m. S.W. Posen, cap. circle, 1 bank Odra. It is walled, well built, has two churches, an Augustine and a Bernardine monastery, a court, and several public offices, and extensive manufactures of linen. Pop. 3793.—The climate is marshy but well-wooded, and tolerably fertile. Area, 589 sq. m. Pop. 50,583.

KOSTENDIL, European Turkey See GENEVOVA.

KOSTIANSK, or **Kostiansk**, a tn. Russia, r. bank Don, gov. and 22 m. S.W. Voronezh, with a extensive factory on the banks of the Don near it; Omoln, in 1768, found a great number of elephants' bones, very little decomposed.

KOSTRITZ, a vil. Germany principality Rhenus-Gera, 1 bank Elster, here crossed by a bridge, 4 m. N.W. Gera, at the N. foot of the Dillenburg with a church, on a height, two castles, and a rich charitable endowment, and several breweries and distilleries. Near it is the fine summer residence of Electoralpalace. Pop. 1300.

KOSTROMA, a gov. Russia lat. 59° 25' to 59° 25' N; lon. 40° 25' to 45° E. Bounded N. and N.W. by gov. Vologda, W. by Jaroslavl, S. by Vladimir, and Nijni-Novgorod, E. and S.E. by Viatka, greatest length, 370 m.; breadth, 170 m., area, about 30,000 sq. m. It consists of wide level plains, varied only by gentle undulations, and elevated river banks. The N part is cold, humid and swampy. Many of the swamps are covered with wood, and some of them contain bog-iron ore. What is arable is cold, and of indifferent fertility. Occasionally there are considerable extents of heathy ground.

partly covered with wood. The S. part near the Volga rises again and descends, consisting mostly of clay loam, and sand, but still only of moderate fertility. The climate is severe; winter is long, and the weather stormy; summer short, and frequently misty. The chief river is the Volga, which, shortly after entering the gulf in the S.W., is joined by the Kostromskaya from the N.; then, after a short turn to the S.E., proceeds about due E., when it receives the important tributary, the Ilma, and soon after, by a S. course, joins the government. There are numerous lakes. Of these the Galits is 16 m. by 5½ m., and the Tobolskoye is above 5 m. in diameter. Many

the gov. flows W., then S., forming part of the boundary between govt. Kostroma and Jaroslavl, and, on reaching the town of Kostroma, joins I. bank Volga, after a course of about 140 m. It is navigable for above 160 m.

KOSVA, a river, Ruzhka, which rises in the W. slope of the Ural Mountains, gov. Perm, flows first S.W., then W., and joins I. bank Kama, after a course of nearly 180 m. KOSWITZ, a co. Germany, Anhalt-Bernburg, cap. Ball, on a height above r. bank Elbe, 10 m. W. N. W. Weissenberg. It is wooded, has three gables, two churches, a synagogue, cattle, and numerous manufactures of cloth a worsted-mill, breweries, a fishery and some shipping. Pop. 2,800, built 1790.

KOSZEGH, several places, Hungary:—1, A free tn., co. Eisenberg. See GÖMÖR.—2, (or Keszthely), a vil., co. Baranya, on the Danube, 10 m. from Moines, with a church, and an important fishery, particularly of sturgeon. Pop. 1436.

KOSZTOLAN (NAGY), or VESZÉK-KOSZTOLAN, a vil. Hungary, Hither Danube, co. Nitra about 10 m. from Galgóc with a church a synagogue, and a flour-mill. Pop. 1298.

KOSZTOLNA, or KOSZTOLNAYVA, a vil. Hungary, Hither Danube, co. and 83 m. N.E. Nitra, with a bishop's castle, and a Protestant church. Pop. 1546.

KOTI KANOA an extensive hill fort, in the N.E. of the Punjab, among the mountains in the lower ranges to the S. of the Himalaya, on the top of an eminence, about 150 ft. above the Ban Ganga, near its confluence with the Beas, lat. 31° 57' N.; lon. 76° 42' E. The height on which it stands is about 5 m. in circuit, bounded, for the most part, by precipices, nearly perpendicular and in places of less declivity rendered inaccessible by masonry and ramparts. In the beginning of the present century it was defended for four years against the Ghorkas, by Runar Chaud, who gave it up to Ranjot Singh. In 1846 it came into the possession of the British government by the treaty

FOUR HOUSES OF THE SOUTH FROM KOSTROMA TO JAROSLAV
From Kostromsk, Volga, (Petersburg on Bank).

of the houses in this gov., and, indeed, through all the S. and E. of Russia, are constructed of timber and have very peculiar forms. An interesting example of such structures is shown in the accompanying wood-cut. Large quantities of flax and hemp are raised. These two crops form an important element in providing employment for the inhabitants. Indeed, the governments of Jaroslavl and Kostroma may be considered as the chief seats of manufacturing industry, from which E. Europe derives its supplies. Dyeing and linen weaving, with the numerous processes connected with them, give employment to a large population, both in the towns and throughout the district. Russia leather also, both red and black, the former of cow, the latter of horse hide, is made in large quantities, and of first-rate quality. The big-iron raised is usually smelted by the inhabitants themselves in small furnaces, and formed into the various implements required for their own use. The forests, scattered over the district, employ many hands in felling trees, cutting them for timber, fire-wood, or charcoal. Even the bark of the linden-tree is turned to profitable account, being largely employed in making soap, for which the district has long been celebrated. The fishing also, a very productive. Pop. (1860) 1,076,206.

KOSTROMA, a tn. Russia, cap. above gov., on an elevation near the Kozma, at the point where it joins I. bank Volga, 200 m. N.E. Moscow; lat. 57° 40' N.; lon. 41° 15' E. It is of great antiquity, having been built in the 13th century, and, as is usual with all Russian towns, is surrounded by a rampart of earth, of which advantage has been taken to form a promenade. It is pleasantly situated, and, being the seat both of the civil and military government of the district, contains a great number of public buildings. It has 69 churches, a monastery on ecclesiastical village, and a synagogue. Its manufactures, among which that of coarse leather, has long been famous, make it one of the most important towns in the Volga. Pop. (1861) 11,619. — The river flows in the N. of

KOTI-KANOA.—From the Hon. R. G. Johnston's Resolutions of India.

of Lahore, but in May of the same year, resistance was offered to our taking possession of it by the Lahore Khilafat or governor. Koti Kanwa is famous for a peculiar original opium, namely, the production of new opium, for those who have sufficient wealth of their feature, by dipping the material from the skin of the forehead. The good-looking men are supplied to by the affected from all parts of India.

KOTAN, a tn. Hindustan, cap. principally, gov. Afsar, r. bank Chindal, here deep and narrow with rocky banks, 300 m. S.W. Agra, lat. 25° 5' N.; lon. 76° 5' E. It is a large city built, but surrounded with stone walls, situated

with bastions; has numerous temples, but no edifice of any note, except the rajah's palace. The houses are handsome and well-kept. The square of substantial private dwellings is unusually great. An active trade is carried on, and much of the other articles are manufactured for native consumption. —The *suburb* is a compact territory, of about 5000 sq. m., generally mountainous, and not of great fertility; has some traces in the S.E., and beyond the Mokimban pass, are cultivated like a garden.

KOTL-GRAV, or **KOTL-GRAV**, a vil. Hungary, on Bihar, on the Gyepes, between Szekes and Szekes, with a Protestant parish church. Pop. 1576

KOTL-GRAV, a vil. Hungary, on Hares, 1 bank Teles, 5 m. from Buda. With a church and an old castle. P. 1311

KOTL-NITZ, a vil. Hungary, on R. R. 10 m. S.W. of Vukovar, cap. circle, on the W. bank. It is built on the ruins of Kottarow an old fortress of the Tschernomors, which the inhabitants of Novgorod destroyed, and has some general trade. Pop. 3415. —The *circles* are well wooded, fertile, and well cultivated. Pop. 125,900.

KOTL-NITZ, an isl. Adria Russia, in the Arctic Ocean, between lat. 74° 30' N. and 76° 10' N. and lon. 138° and 142° E.; greatest length, N to S, 180 m., central breadth, about 75 m. It is the largest of the group in the archipelago of L'Anjou, is nearly of an oval form, and is generally very rocky and mountainous.

KOTL-NITZ, a vil. in the N. of Hindostan, on the steep slope of a ridge overlooking the S. valley of the Sutlej 25 m. N.W. of Simla. It is a masonry establishment, and was once a military station, which in consequence of the peaceable state of the population, has been abandoned. Kotkuri is surrounded by an extensive forest and, though 4000 ft. above the Sutlej is within hearing of the deep roar of its rapid stream. —(Thomson's *Trek* in the N. Himalayas.)

KOTKIN, or **KOTKIN**, a vil. the cap. of duchy Anhalt-Köthen, not far from the R. R. station, and a central station on the railroad, where the line from Berlin Magdeburg, Bernburg, and Leipzig meet 80 m. S.W. Berlin. It consists of the town proper, surrounded by walls, with five gates and of three suburbs, consists of a church, with three towers, in which the Duke resides, three churches, a synagogue, townhouse, theatre, hospital, library, picture-gallery, cabinet of coins, medals and minerals, and a museum, and has manufactures of leather, yarn, glass, and refined wax, a distillery, and several mills. In the neighbourhood are several fine walks, and part of the railway station, not much to the honour of the Duke, is fitted up as a gaming-table. Pop. 6136.

KOTI, **KOTI**, **KOTI**, or **KOTI**, a little known dist. or state, lat. Borneo, E. coast, on the Strait of Macassar, cap. same name extending, probably, from lat. 1° 10' S. to 1° N., and lon. 118° to 118° E., at its broadest part. The coast is low, and, during the rainy season flooded the climate is very hot, and unhealthy; and storms are frequent. Excellent rice, betelnut, alone, pepper, coconuts, various kinds of honey, and camellia, are the chief products. —The *climates*, Koti, on an isl. in the chief arm of the river Koti, 6 m. from its mouth, lat. 0° 38' S., lon. 117° 10' E., has a sort of fortress, in which stands the rajah's palace, and a port, frequented annually by 700 to 800 vessels. —The *river* rises in Mount Lina, Malacca, about lat. 2° 20' N.; lon. 114° 30' E. flows S.E., receives several affluents, and falls into Koti bay, on the Strait of Macassar, by numerous mouths, total course, about 300 m.

KOTKIN, a vil. in Bohemia. See *CHOTKIN*.

KOTKIN, or **KOTKIN**, a vil. in Bohemia, circle and 17 m. S. by N. Christian, on a height, surrounded with orchards; and with large the works near it. Pop. 1091

KOTKIN, or **KOTKIN**, a vil. in Bohemia, circle and 18 m. from Pilsen. It contains a parish church and school, an elegant castle, and convent; and has manufactures of potash, and several mills. Pop. 1656.

KOTKIN, a river, Russia, which issues from Lake Koto, in the S. of gov. Jaroslavl flows N.W., and, at the town of Jaroslavl, joins the bank Volga, after a course of nearly 50 m., great part of which is navigable. Its chief affluents are, the Lakota and the Ustia.

KOTKIN, a vil. in Hindostan, gov. Malwa, on the Gujran, an affluent of the Nerbudda, about 30 m. E. by S. of Simla. It is a large place, and stands on the line of separation be-

tween the territories of Betrola and the acquisitions made by the British, in 1818, from Betrola and the Nagpore rajah.

KOTKIN. —1. A vil. Solde, 1 bank Indus, nearly opposite to, and 4 m. W. Hyderabad, lat. 26° 22' N.; lon. 68° 30' E. It is, from its position, a place of some military importance. —2. A vil. Solde, 30 m. N. Hyderabad, on the route to Rore, lat. 28° 30' N.; lon. 68° 45' E. —3. A vil. Balochistan, prov. Dutch Gundava; lat. 28° 24' N., lon. 67° 27' E. It is one of the largest towns in the province, and has a good bazaar, and a fort.

KOTKIN, a vil. Hungary, Hither Danube, co. and 12 m. S.E. Komorn with two churches, church barracks, and a considerable trade in wine. Pop. 2503

KOTKIN, a vil. Hungary, co. and about 28 m. from Tolna; with a church, a building used for quartering soldiers, three mills, and a trade in corn, wine, and cattle. P. 1558.

KOTKIN, a vil. Hungary, Hither Thales, on Smith mar, 9 m. from Valsaj, with a handsome church, and a synagogue. Pop. 1943

KOTKIN, a vil. Hungary, a vil. N. coast of Dorset Dutch province of the S. and E. district, and on a river of its own name, lat. 3° 47' S.; lon. 111° 21' E. It has a good harbour, and carries on a considerable trade. —The *river* rises in a lake in the interior, and, after a S. by W. course of 85 m., falls into the Java Sea, 14 m. below the town.

KOTKIN (Ober and Nieder), two nearly con- guous vil. Bohemia, circle Bielehow, 3 m. from Arnau, with a handsome church, and several mills. Pop. 956.

KOTKIN, a market to Bohemia circle and 4 m. from Omslau, 1 bank Brolau, with a church and school both handsome buildings, manufactures of linen, and a trade in agricultural produce. In 1745 a battle was fought here between the Austrians and Prussians, and the town was burnt down. Pop. 1158

KOTKIN, a vil. on the Baltic, Russian America, between Cape Esplanade and Krasnenski lat. (Cape Esplanade S. point) 60° 22' N.; lon. 163° 28' W.

KOTKIN, a vil. Saxony circle and near Dresden. A town, concluded here in 1645 was followed by the peace of Westphalia. Pop. 1062

KOTKIN, a vil. at Lower Bavaria, cap. lat. at the confluence of the White and Black Rhine, in the N. E. of Ratisburg. It has a court of justice, two churches, two chapels, two castles, a townhouse, and hospital, manufactures of linen several saw and other mills and a trade in wood. Pop. 1438. Area of dist., 128 sq. ac. m. Pop. 23,549

KOUAV, three villages, Boudou. —*Kouav-Boudou*, lat. 18° 58' N., lon. 11° 22' W., with *Kouav-Finot*, a little to the N.E. of it and *Kouav-Duval*, a short distance to the N.W. They are all inhabited by Fenis.

KOUAV, a river Russia. See *KOUAV*.

KOUAV, a vil. Russia in the N. part of Lapland, in a narrow valley 53 m. W. N. W. Dardard. It looks more like a fortification than a town all the houses being loop-holed, and entered by an outer stair to which the only approach is by a narrow path. It has 12 mosques; manufactures of woollen cloth, slaves, fire-arms, and sword cutlery; and a considerable trade, chiefly in the above articles of manufacture. Pop. almost entirely Mahometan, 6000

KOUAV, a river Russia, which rises in a small lake, in the W. of gov. Volodga, flows easterly and S.E. to Chudskoye, then S.W. past Borok and Ilkuk, and falls, by two mouths, into Lake Kholmok; total course about 170 m.

KOUAV, a lake Russia, in the S.W. of gov. Volodga, stretching S.E. to N.W. for about 45 m. mean breadth not above 5 m. It receives the Kouava and several other streams, and discharges itself by the Subara, one of the main branches of the N. Dvina. It also communicates with the Roubeka, and, through it, both with Lake Blau and the Volga. It contains several islands, is deep, and well supplied with fish.

KOUAV, or **KOUAV**, a vil. Chinese Tartaria, 400 m. N. E. Yarkent lat. 41° 27' N.; lon. 83° 45' E. It is defended by 10 forts, and is about 3 m. in circuit. It trades with silk in copper, sulphur and saltpetre, which, as well as enormous quantities of gunpowder, are obtained in the vicinity. It has some manufactures of linen, and on the horizon, unless irrigated, district around, a few fruits and vegetables are raised, notwithstanding the dryness of the climate.

KOUCHVINSK a vil Russia, gov Perm. circle and 57 m. S. Verkhotoiour, on the Tura. It has four blast furnaces, and other iron works. Pop. 1600.

KOUDEKKERK a vil Holland, prov S. Holland 8 m. S.E. Leyden. Bank Rhine. It has two churches, a weigh house, an orphan hospital, a school, and a considerable amount of transit trade, the traffic on the river being very animated. Pop. 1750.

KOUDEKEI KE a vil Holland, prov Zeeland, [a] Walcheren, 3 m. S.W. Middelburg. It has a church and a school, and formerly had several castles near it, which now either no longer exist or are converted into houses, &c. Pop. (agricultural) 1211.

KOUDUM a vil Holland, prov Friesland 25 m. S.W. Leeuwarden, with two churches, a corn and a falling mill. Pop. (agricultural) 925.

KOUEN-LUN KUEHUN or KWANLUN a mountain range, Central Asia, forming the N. boundary of Tibet, separating it from Yarkand and Khoten, and stretching eastward into regions which are almost unknown but it is understood, about lon. 92° E., to divide into two ranges, one of which under the name of Hanyan-Kars diverges 8 b. through Koko-nor, the other trends N., near the source of the Yellow River and under various names, passes through the Chinese provinces of Kamsu and Szechu. The W. part, frequently distinguished by the name of the Harik wun and Mustang Mountains, commences not far from the point where the Hin doo Conch becomes linked with the Himalaya, near lat. 30° N. and lon. 75° E. and pursues a course nearly parallel to the Indus apparently forming its W. watershed. Its principal axis ascends far above the limits of perpetual snow attaining a height of 21 000 or 22 000 ft. and sends off numerous elevated ramifications towards the Indus, forming valleys down which immense glaciers descend. The ramifications forming these valleys are five in number and separated from one another by large rivers. The height is so great, that it is impossible to pass from one lateral valley to another. The ramifications E. of the Shyank are comparatively few and small glaciers but to the W. of that river they appear to be on a still more gigantic scale than those of the Himalaya. Those of Saseur terminate at about 15 000 ft. but the level diminishes rapidly in proceeding W. One overhanging the valley of Yakra, terminates at 14 700 ft. that of Batur, itself, at 13 000 ft. and still farther W. they descend to about 10 000 ft. The greater part of the rocks are plutonic and metamorphic. The latter are penetrated in all directions by granite veins, proceeding from vast continuous masses, and, generally near the point of contact, are thrown into such confusion that the direction of their stratification cannot be traced. In more distant localities free from disturbance the usual dip is between N.W. and N.E., and N.W. and S.E. The known passes across the Kouen are only four. The most W., which in Urdu is called the Mustagh Pass, is at the source of the right branch of the Shyank an affluent of the Indus and leads to Yarkand. It was formerly much frequented by merchants, but has been almost abandoned owing to the horres of robbers beyond it. It is said not to be practicable for horses. The second called the Alibranze Pass, is at the head of a tributary which joins the Shyank opposite to Khatapi. It runs over an enormous glacier and presents such obstacles to the traveller that it is not easy to see why it is considered a pass at all. The third pass, the only one now frequented, and extremely easy though very elevated, is the Karakoram (which see). The most E. one occurs on the road between Beshik and Khoten. —(Thomson's *Travels in the W. Himalaya*).

KOUJAI-NIK, two rivers Russia, gov Kherson. The larger called the Great Kouzianik, with a S.E. course of 65 m. falls into a lake of same name. The other called Middle Kouzianik after a similar course of 50 m. falls into Lake Gadzhbeykoy, which discharges itself into the Black Sea.

KOUKA a tn Horren, S.W. side of Lake Tchad from which it is about 10 m. distant lat. 12° 45' N. lon. 14° 15' E. It was the residence when Denham and Clapperton travelled in Africa, of the black of Horren, and was a place of great importance. At least 15,000 persons are here gathered together on market days, some of these coming from places two and three days' distant. Slaves, sheep, and buffaloes, the latter in great numbers, are the principal live

stock for sale. Wheat, rice, and gusash, (amaranth in the pod, butter, honey, ground nuts, indigo, leather, and wooden bowls from Soudan, form a part of the articles on sale. Kouka is reckoned the most healthy part of the kingdom.

KOUKOU Koukou a tn Mongolia, 40 m N.W. the great wall of China, lat. 40° 45' N. lon. 111° 15' E. It forms two distinct towns called the New and the Old Town, or Commercial and Military Town. The New Town is surrounded by a brick wall with battlements. It is regularly built, and contains a handsome and spacious street, by which it is traversed from E. to W. The houses are low and constructed after the Chinese fashion. A military commander resides here with 10,000 Manchou soldiers. The Old Town, which is about 2 m. distant from the preceding, is surrounded by kilnshut gardens, and enclosed by ramparts, which formerly marked its limits, but do not now include half the town. Here are some famous Buddhist monasteries, which attract crowds of Mongolians from the most distant countries. Tanning is carried on to a great extent and the town is a place of much commercial importance. The Mongolians bring great flocks of oxen, horses, sheep, and camels with skins, maulrouzes, and salt, the sole products of the deserts of Tertiary in return for which they receive, among other articles, brick tea, saddles, and some calumny utensils. The annual market, which is held on a large square, is a scene of indescribable confusion. The population is numerous, but its exact amount is unknown. —(Hue, *Sous d'un Roy Tibet* &c.).

KOULFO a tn W. Africa, lat. 6° 58', 220 m. S.W. Kano r bank Mayarow about lat. 10° 10' N. lon. 6° 45' E. It is surrounded by a high wall and is the most important trading place in Yoffe. Daily markets are held attended by traders from a considerable distance. Slaves, horses, asses and horned cattle, goats, turkeys, pepper, red wood, &c., are brought from different quarters, and silk, cotton, nutmeg, benise, turpentine, scarlet caps with a great variety of other articles, both of native and foreign manufacture, are here exposed for sale. Inhabitants generally Mahomedans, but addicted to drunkenness, deception and falsehood. Pop. about 15,000. —(Lander's *Records*).

KOULOI a river, Russia, gov Archangel formed by the Sotka and Yolda 25 m. N. E. Pines. It flows circuitously N. N. E. and falls into the Bay of Mezen, in the White Sea, total course, 150 m. principal affluents, the Sonno.

KOUNG-KOUN a vil Siam, r bank Irawadi, 165 m. N. Y. It is surrounded by a ditch and by a double pall sals of lamboons, with sharp stakes placed between them and has the remains of a brick redoubt overlooking a pagoda, and contains about 200 houses. It is noted for the defence made by its Burmese garrison against a large invading force of Chinese. —(Hue *Asiat Soc. Bengal*, April, 1837).

KOUNGLEI a vil W. Africa, Lower (Gambia) bank Senegal lat. 14° 11' N. lon. 12° 22' W. consisting of three distinct parts and all remarkably dirty. The central part which is the most considerable, is situated on a quartzite hill rising from the river and is surrounded by an earthen wall so as to form a kind of citadel, to which the inhabitants of the other two parts of the town, situated on a level low ground on each side retire on the alarm of danger.

KOUNIA a river Russia, which rises in the S. of gov Pskov, flows N., and joins r bank Lovat at Kholm, after a course of nearly 100 m.

KOUNIK a gov Russia lat. 50° 18' to 52° 25' N. lon. 38° 30' to 39° 20' E. bounded N. by gov Orlov, E. by Smolensk S. by Poltava and Kharkov E. Voronej. Greatest length, W. to E. 170 m. breadth N. to S. 150 m. The surface is undulating, with numerous little hills and gentle acclivities consisting of a rich fruitful soil, and is studded over with towns and villages. The soil consists of shell marl, limestone and sandstone, and on the banks of almost all the streams layers of chalk appear. The chief river is the Dnieper which, rising on the E. confines of the district, traverses it E. to W. on its way to join the Dniester. The Donets also has its source here and waters part of the S. The climate is mild and dry and the rich and productive arable crops, at comparatively little trouble and expense. Apples, plums, and cherries abound. Agriculture, and its usual attendant, the rearing of cattle, employ the greater part of the inhabitants, and leave only a small surplus for other occupations. These are chiefly manufactures of array clothing and other coarse

stuff for the use of the peasantry. The exports are grain, cattle, leather wax and honey. Pop. (1850) 1,714,000.

KOURSK, a town in Russia, cap. above gov. bank Tunka, near its junction with the Rn. 280 m S by W Moscow, lat 51° 40' N, lon 36° 25' E. It has the remains of an ancient fortress and the earliest transport with which the town was surrounded has been formed into an agreeable promenade. There are no public buildings of any consequence, and the streets are ill paved narrow and crooked. A considerable trade is carried on both with St. Petersburg and Moscow. To the former are sent honey wax, tallow, leather tow hemp oil, fox and wolf skins, to the latter, large numbers of cattle and horses. The environs contain numerous gardens and orchards. Pop. (1840) 80,469.

KOURSIAN, one of the most frequented passes of the Hindoo Kooch, lat. 55° 37' N, lon 68° 55' E. Summit estimated at 15,000 ft high. The upper part steep, difficult, and dangerous and impassable by wheeled carriages.

KRONSTADT, or **KRONEN** (anc. *Brassov*) in Hungary, Brassov. Dutch *Kronstadt*. A in Austria, Transylvania in the Burzenland cap. dist. romantically situated in a narrow valley formed by a triangular opening in the mountains which separate Transylvania from Walachia, 70 m. S. E. S. F. Hermannstadt lat. 45° 28' 30" N. lon. 25° 33' 53" E. (t.).

The town is occupied partly by old crumbling castles seated on lofty and rugged heights, partly by pretty villas surrounded by well kept gardens, and immediately in front of the principal entrance is a large esplanade, ornamented with avenues of trees and a Turkish bath, and forming the principal places of public resort. The town itself consists of the inner town in the form of a square, surrounded by walls flanked with towers and entered by five gates, and of three large suburbs, called the Altstadt, Bürgenau and Bulgarien. It is well and regularly built. The principal streets, six in number, are tolerably spacious, clean and well paved. The market place is large, and adorned with two fine fountains, and the houses, generally of two stories, have a substantial and comfortable appearance. The city is most deserving of notice are the citadel, a modern fortress of some strength occupying the summit of an isolated hill, the Protestant parish church, a venerable Gothic structure, of the 15th century with several fine doorways, a simple but imposing interior and a lofty tower, the K. Catholic church of St. Peter and St. Paul, the townhouse, the buildings connected with the college or gymnasium, the large W. A. station church, built in 1751 by the Russian empress, Elizabeth, the bazaar or *basar*, the Franciscan monastery the mint, several workhouse hospitals, refinery, theatre, and concert-rooms. Besides the gymnasium already mentioned, which belongs to the Protestants, and has a good library, the K. Catholics have a superior academy, and there are military, grammar, and other schools. Both manufactures and trade are of considerable importance. The former consist chiefly of coarse woollens, of which large quantities are annually sent into Turkey, a kind of maple wood dyes, of which about 80,000 are annually made, linen, leather paper, and refined wax, and the latter includes, in addition to the above articles of manufacture, cattle, wine, corn, and salt. The greater part of this trade is a monopoly in the hands of a Greek company. The earliest printing-press of Transylvania was established here by Hantzsch, a disciple of Melancthon. The establishment still exists, and is chiefly employed in printing books in Walachian. P. (1846) 28,000.

KRONSTADT a seaport, Russia. See **CHESBOSTADT**.

KROPELN a in Germany Mecklenburg Schwerin, 23 m. N. E. Schwerin, with an old church, townhouse, and hospital. P. 1975.

KULMBURG, or KULMBURG, a vil Holland prov. Overijssel, 23 m. N.W. W. Zwolle, viere the Lunde and Kulmburg fall into the Zuider Zee. It has two churches a school and a convenient townhouse and weigh house 1 (agricultural), 820.

which took place here between the Allies and the French, very much to the disadvantage of the latter. It has a handsome church and a fine castle with a park. Pop. 620.—3 (Oden and Urtica), two nearly contiguous vils. Switzerland, on Aargau, r bank Wilmsee 6 m S S E Aarau with a church, a cotton mill and a trade in corn. Pop. 1786.

KLJ MHACH, a vil. in Bavaria. See CULMBACH.

KUJ NA, a vil. India. See OCHLA.

KULON or DALAI a lake, Chinese Empire, in N E Mongolia, not far from the Russian frontier, lat 48° 30' N, and lon. 115° 35' E; greatest length N N E to S S W, 40 m., mean breadth about 15 m. It is formed by an outflow of the Karun or Le-Khin, and discharges itself into the Arghun which unites with the Shilka in forming the Amour.

KULPA [anc. Colapage] a river Austria, which rises in Croatia, at the junction of the Julian and Dinaric Alps flows easterly W forming part of the boundary between Dalmatia and Croatia, and passing Carlsbad and Petrina and, after a course of about 100 m., joins r bank Sava. Its principal affluents are the Korana, the Gline, the Lachna, Commeza, Rapa, and Odra. It begins to be navigable at Carlsbad, and, being connected by excellent roads with Fiume and Trieste forms the great outlet for the produce of the S. of Hungary.

KULI LIN a vil. Hungary Either Danube, on the river Petruvay, with a church, and a trade in corn and cattle. P. 1693. KULSHILM, a t. Baden circle Lower Rhine bail Tauber-Kreisheim with a church and a castle, has manufactures of red leather, dye-works, breweries, and several mills. Pop. 2046.

KULU, a principality in N E of Punjab among the lower slopes of the Himalaya bounded N by Lahul and E by Bussahir lat 31° 30' to 32° 40' N lon 76° 40' to 77° 40' E. is generally rugged and mountainous, and the Himalaya Joth has above 13,000 feet high. It is traversed partly centrally by the Beas and is watered by several of its affluents flowing through valleys containing numerous fields and villages, surrounded by orchards of peach apricot, quince and walnut trees, while the hedge-rows and woods abound with wild pomegranates, peaches, figs, and grapes. Cedars, cypresses, and various kinds of plants occupy the sides of the Beas and the adjacent heights. In the lower grounds some rice is cultivated, but, as the country ascends, the yield of its growth is reduced and buckwheat is substituted for it. The climate is and to be unhealthy. Every second person has a gout and leprosy is not uncommon. Brahminism is the prevailing religion and numerous pilgrimages are made to several springs. Its capital is Saitanpore.

KULUJIL, or KHALATY, a large vil. Central Asia, Tadshik r bank Upper Indus which has here a rocky channel only 25 yards wide lat 34° 20' N lon 76° 44' E. The cultivated ground in the vicinity is of good quality though rather incommensurately laid out in terraces. The grain sown ripens in three months and a second crop of buckwheat or tarpsin is obtained from the same soil.

KUMA, a river which runs near the centre of Ciscaissia, flows N into the Russian gulf Caucasus, then N N E past Georgievsk, to the frontiers of Georgia Astrakhan, forms part of the boundary between these two governments, and, after almost disappearing among sands, finds its way to the Caspian Sea, which it enters by three mouths. Total course, 400 m. Its principal affluents are the Irdnak and the Bayvala.

KUMAYD a vil. Hungary Either Tiesla, on Turon lat about 6 m. from Meleznica, with a church and a trade in wheat and hay. Pop. 2434.

KUMANIA or KUMANIA (Great and Little) [German, Kumanen two districts, Hungary, the former situated on a tributary to the S. E. of each, between coas. Szabolcs, Hovas, Csengrad, and Bekes and the latter bounded by coas. Pesth Csengrad, and Bacs-Bodrog. Area of Great Kumania 323 sq. m. Pop. 81,106. Area of Little Kumania, 758 sq. m. Pop. 68,508.

KUMAUJ or KANAU a large district of N India, in the N E prov. of Delhi bounded N W by Garhwal S. Delhi. E. the Cal which separates it from Nepal, N E. the Himalayas; lat 29° 30' to 30° 55' N lon. 78° 30' to 81° E. Area, 7000 sq. m. The country consists of a succession of mountain ridges, which intersect each other and gradually become more elevated towards the N. Deep, and irregular dells intervene between the ridges, but so narrow

as scarcely to deserve the name of valleys. Extensive tracts of table-land occur forming a kind of savannah which are covered with high rosy grass, with scarcely a tree, or even a shrub. As the hills are approached the few jungle becoming thicker and a belt of it skirts the Kumaon hills, containing groups of sand, auro and other trees and as the altitude increases, the vegetation changes with the changing temperature, till it becomes European. Throughout the lower part of the district the tea plant grows wild, but is said to possess an emetic quality which renders it useless. The S E near Almora is open, bleak, and naked. Though the jungle is not very extensive, there are numerous. The game most common is the wild pheasant, partridge, and chukars. Copper iron and lead are worked to some extent. The ordinary kinds of grain and pulse grow freely and there are occasional patches of rice. In recent years, the E. Indian Government has successfully introduced the tea culture into this district. The shrubs are managed in the Chinese system and succeed well. The manufactures are few and coarse, but a considerable trade is carried on the traders often descending far into the S, and exchanging their minerals, dyes, drugs, and roots, for coarse shawls, cotton, sugar, &c. The country is thinly peopled. A host 8000 families of Dravid are supposed to be scattered throughout the district. Among the hill tribes, one of the most numerous classes is the Khas ayes. (See GURJAWAL.) The climate has been supposed so well adapted to reinvigorate the European constitution when attacked by tropical diseases, that the Government has formed a regular establishment at Almora for the accommodation of invalids.

KUMTA GUAN a range of firs, N E. of Punjab and not far from L. Lachhwa, lat 31° 41' N lon 76° 37' E. They are built on several sandstone peaks, which extend N and S about 3 m. and are partly constructed out of the natural rock, and partly of masonry. The principal strong hold is an isolated rock, with precipitous sides rising about 100 ft. above the other peaks.

KUMTA a river Lunan, which issues from a lake in the S. of Finland flows N W past the town of Kuusko and falls into the Gulf of Bothnia by a wide estuary near the town of Björnsborg after a course of about 100 m.

KUN HONOR, a t. Hungary Either Thassa Great Kumania, on the Thassa 73 m. W. Pesth, in a very fertile district with a church, and a townhouse. Pop. 6183.

KUN SAKT MARVOY a vil. Hungary Either Thassa 1 bank Kurta. 72 m. S E. Pesth, in a very fertile district with a church and a trade in corn and wine. Pop. 6280.

KUN SAKT MISTOE, a market in Lunan, Little Kumania, on both sides of the Buker an arm of the Danube, in a fertile district, 84 m. S. E. k. 1 with two churches, and a considerable trade in agricultural produce. Pop. 5580.

KUNASHIR, one of the S. Kuril islands, close on the N E coast of Yesso, Japan lat 44° 30' N lon 144° 30' E. about 70 m. in length, and 25 m. in breadth. It is mountainous in the centre but contains many valleys capable of cultivation and abounds in fish and wild animals. It is but thinly inhabited. The Japanese have settled on it and the adjoining islands, and introduced agriculture.

KUNAWUD or KACHAW, part of the upper valley of the Sutlej in the W Himalaya, on the border of Little Tibet and E. of the Punjab. It forms a district in the Bussahir rajahship and is bounded N by the district of Fiti E. Chitral S. Simla, and W the rajahship of Kul.

lat 31° 30' to 31° 51' N lon 77° 47' to 78° 45' E. Its general level above the sea is 8000 ft. and some of its mountain summits are covered with perpetual snow. The greater part of the valley being composed of hills and abrupt chasms or narrow valleys is unconvertible but along the lower banks of the Sutlej the soil is very fertile, and yields all the ordinary grain and pulse crops in abundance. Of tuberculous plants, the turnips are particularly celebrated. The ordinary fruits grow freely and a tree called sazon, which bears excellent almonds. The vine is cultivated on the hilly slopes. The mountain pastures are browsed by numerous flocks of sheep, which yield a wool fine enough to be wrought into shawls of middling quality. There is much limestone, and good iron is made. The inhabitants of this mountain valley are chiefly traders, and are said to be honest. They export corn, wool, sazon almonds, and iron. The chief import is

sals, of which the district is destitute. It is brought from a great distance. Most of the people are Hindoos, but many are Buddhists. Numerous kamas reside in the different villages but the chief lama has his residence at Kanam, which is the principal town, and has been called the Benares of Kham. The language is said to have very little affinity with that of Hindoostan. Polyandry is not uncommon.

KUNCHIN-JUNG, a town, KUN-KUN-JUNG, or KUN-KUN-JUNG, one of the loftiest summits of the Himalaya mountains in the Tibetan Himalaya, about lat. 27° 45' N. lon. 86° 12' E., between Bootan and Nepal. It has two peaks, one of which, the W. is 28,178 ft. high the other or E. 2,826 ft.

KUNDA a small seaport to Russia, gov. Esthonia N. shore Gulf of Finland, in a little bay at the mouth of the Neema, 66 m. E.N.E. Navel. The bay is sheltered from almost all winds, and has good anchorage. There is also a small harbor at which a considerable trade is carried on in bread, corn, and dross, the last are sown up at extensive mills erected on the banks of the Neema. Pop. about 400.

KUNDAPUR or **COORAPPOOR**, a seaport in Hindoostan, prov. Lacar, on the Malabar coast, at the mouth of a small river 52 m. N. by W. Mangalore. It is not large, but possesses some importance in the time of Tippoo, who constructed docks on the N. side of the river opposite to this town.

KUNDICZ, a khamite, Central Asia. See KUNOORDOZ.

KUNERSBURG a vil Bohemia, circle and 12 m. N. W. Brannau on the Zwickau with a large church, a handsome stone manufacture of linen several lines and yarn bleach-works, a spinning mill and a trade in flax. P. 1796.

KUNEWALD a vil. Austria, Moravia, circle and 18 m. N.E. Preuss with a church, school, a large and elegant castle, with a library of 20,000 vols. and a cabinet of natural history manufactures of linen, a dye-works, and several mills. P. 1757.

KUNGUR, a town, Russia, gov. and 50 m. N.E.E. Perm cap. circle, near the confluence of the Irtyz and Syrt. It has five churches, a convent, soap works, and tanneries and a considerable trade in corn. It is the seat of a mining director for gold, silver and iron. Near it are fine quarries of alabaster and some remarkable grottoes. Pop. (1851) 17,677.

—The circle is well wooded and fertile, and has valuable mines of both iron and copper. Pop. 24,000.

KUNGUAD, or **KONGUAT** a town Independent Tartary, khamite and 90 m. N.W. Kham, a bank Amoo, about 50 m. above its mouth in Lake Aral. It lies low and suffers much from inundation. It contains a castle of the khan with a garden, seven mosques, and more than 300 shops, and is inhabited by Uzbek, who carry on an important trade with the surrounding tribes.

KUNGUL, a small walled town, Hindoostan, prov. Bengal, and 82 m. S. by W. Begapur situated in the midst of a little tract of cultivated and enclosed country. It has a thriving appearance and is populous.

KUNKA or **KENKABALA**, a town Hindoostan prov. Orissa, on a low unwholesome tract near Point Palmyra, about 80 m. S.E. Cuttack.

KUNLAL, a town Hindoostan, prov. Delhi, a bank Ganges, about 2 m. N. Haridwar. It is almost entirely composed of huts and huts, stone edifices, built for the accommodation of pilgrims resorting to Haridwar intermixed with fantastic Hindu temples and gardens.

KUNTSCHITZ, several places, Germany —1 (Gross and Klein), two nearly contiguous vils. Moravia, circle Preuss near Hochwald with a church. Pop. 1603. —2 A vil Bohemia, circle Kunggratz, about 2 m. from Geiersberg with a mill. Pop. 818.

KUNWALD (Oma and Erren) a vil Bohemia circle and about 17 m. from Kunggratz with a church, a school, a saw and several other mills. Pop. 1773.

KUNZLSHAU, a town, Württemberg, circle Jaxt cap. bail on the Kocher 44 m. N.E. Stuttgart with two castles two schools manufactures of tobacco and tobacco, dye-works tanneries and a trade in cattle, fruit and wine. Pop. 2600. Area of bail 119 sq. m. Pop. 81,232.

KUNZENDORF several places Prussia, particularly —1 A vil, prov. Silesia, gov. and 27 m. N.W. Breslau with the works, saw and other mills, a bleach-field, and a hydrostatic establishment. Pop. 1247. —2 (Jandelsbush or Gross) A vil gov. Breslau, circle Habelschwerdt, with a church, and a castle; lime-works, and oil, saw and other mills

Pop. 1336 —3, (Wachtel), A vil gov. Oppeln, circle Neustadt; with a church, a castle, and a bathing establishment. Pop. 1040 —4 (Ditt) A vil gov. Oppeln, circle Naisau with a castle. Pop. 1266 —5 (Nieder-und Ober-) Gov. Oppeln, circle Krenzburg, with a church. Pop. 1614.

KUNZENDORF a vil Moravia, circle Olmütz, about 6 m. from Grünau with a church. Pop. 1642.

KUOPIA, a town, Russia, Finland, gov. circle, agreeably situated on a peninsula, W. shore of Lake Kallaves, 225 m. N.W. St. Petersburg with a church, gymnasium, elementary, and a superior school, a printing-office, and a considerable trade in exporting resin and timber, for the sawing up of the latter numerous mills have been erected in the vicinity. Pop. (1848) 2500. —The cratic consists generally of extensive sandy plains, diversified by lofty hills, lakes, and forests. Area. 14,985 sq. m. Pop. 144,450.

KUPCHINA DOLYA a vil Austria, Croatia on a stream of same name, 12 m. from Carlsbad, with a church, and five flour mills. Pop. 1505.

KUPENSKA, or **KOUPIANSK** a town, Russia, gov. and 61 m. S.E.E. Khar'kov cap. circle at the confluence of the Kupianska with the Oskol. Pop. (1842) 2460. —The circle is thinly peopled, and not fertile. Pop. 82,000.

KUPFERBERG —1 A town Bavaria, Upper Franconia 13 m. N. Naumburg with two churches an hospital, and a serpentine quarry. Pop. 920 —2, A town Prussia, prov. Silesia gov. and 23 m. N.W. Legnica with two churches, and a castle. Pop. 874.

KUPFERKELL, a vil Württemberg, circle Jaxt, on the Kupfer 37 m. N.W. Ellwangen, with a church and five castles. Pop. 1287.

KUPINOVA a vil. Austria, Sclavonia, abt 16 m. from Gollubince, near the Save with a parish church. P. 1835.

KUPIL a town (Oma and Erren) a vil Prussia, prov. Silesia, gov. Legnica, circle Lanbau with a church a castle saw and other mills. Pop. 1644.

KUPI a vil, WAGL, a town Hindoostan, prov. Bombay, gov. General 81 m. N. Ahmedabad lat. 21° 2' N. lon. 73° 9' E. It is walled and has many well built stone houses, and manufactures of soap, bangles, armlets or anklets, and durbars to hid ghia. Pop. about 10,000.

KUPS a town Bavaria, Upper Franconia, 26 m. N.E. Bamberg with three churches, three castles, and a trade in wood. Pop. 1053.

KUPUSZINA formerly KAPUSZIN a vil Hungary, Hither Transylvania, on the Danube, in the midst of a marshy district, 4 m. from Zombor with a church, the remains of an old monastery and a trade in grain, particularly wheat. Pop. 2579.

KUR (anc. Cyrus or Cyrus) a large river of W. Asia. It has its sources in Asia Minor Turkey, prov. Karam about lat. 40° 40' N. lon. 42° 30' E., from which it flows N.E. traversing the Arabian prov. of Akalkah, and entering Georgia about lat. 41° 50' N. lon. 43° 20' E. continuing this direction to about lat. 44° N. when it bends round to the S.E., passes Tiflis, and holds on this course to about lat. 39° 46' N. at which point it turns nearly due S. and ultimately falls into the bay or gulf of Kizil Agach, on the S.W. coast of the Caspian Sea, by three mouths, after a course of upwards of 400 m. It has numerous large tributaries flowing from both the N. and S. of those the principal is the Aras or Araxes which joins it about 60 m. from its mouth. The other chief affluents are the Alazan and Yori, both from the N.

KURAU, or **KOUZOUW** a vil Bohemia, 32 m. S.E. Chrudim with a church a school, manufactures of linen a bleach-field, a saw a spinning and several other mills. 1 1116.

KURD a vil Hungary, Thutler Danube, abt 16 m. from Tolos, on the Kapos, with a chapel, barracks, and a trade in corn, wine, and cattle. Pop. 1043.

KURDISTAN a country W. Asia. See KOUZOUW.

KURDIAI a town, Siberia, gov. and 220 m. S.W. Tobolsk, cap. circle, in a beautiful and fertile district, on the Tobol was founded towards the end of last century and has not yet made great progress. P. (1842) 1781. —The circle is mostly flat, extensively covered with pine forests, and has large tracts of arable land. 1 m. 108,000.

KURGOOMA, or **KURGOOMA** a town Hindoostan, 160 m. S. by W. Benares, a bank Ganges, lat. 25° 9' N. lon. 83° 55' E.

KURGOON, or **KURGOON**, a town Hindoostan, Holkar's dominions, 25 m. S. Mithy lat. 21° 50' N. lon. 75° 40' E.

of the chincoteers and other mammals and dried fish. The E. India Company have proposed to establish a general depot here as a mart for the interchange of goods with Baluchistan, Afghanistan &c. The low sandy shore on which the town is built extends to some distance into the interior and is destitute of all vegetation there being scarcely a vestige of a shrub or date-tree to be seen. Corn is procured from Hyderabad and rice, which is the principal food, is brought from Cutch and the Malabar coast. The water is brackish and ill-tasted. The pop. of the town and suburbs, of which one-half are Hindus, is increasing rapidly. In 1850 it was 25,000. The district of Amreeba is one of the three divisions into which the country was factually divided when the country was subjected to British authority. The other districts are Hyderabad and Shikarpur.

For the park is embosomed in fruitful landscape but in its centre a market place, in the form of a large amphitheatre for the urban lads lounge away much of their idle hours. The city elects a seminary with 100 pupils and a public garden centre-daily last out. In the residence of a governor and a nobleman. The inhabitants consisting of a mixture of the great and the small, the rich and the poor, are chiefly employed in wine and estate culture. Pop. 3217. —The ancient town, Cotacac, or Cotacachi, is on the r. bank of the Rion de la W, and is reached by a stone bridge over the river. It is little more than a heap of ruins, among which however lie broken columns, and capitals covered with maxipordons. The ruins are of the Incas, and are named Incahuasi or Incahuasi. The ruins are of the Incas, and are named Incahuasi or Incahuasi. The ruins are of the Incas, and are named Incahuasi or Incahuasi.

KUTAYA, KONYA, KUTAHIAH or KUTAHAN (anc. *Coteyra*) is a in Asiatic Turkey prov. Anadolu, and 180 m. N.E. Smyrna, lat. 39° 23' N; lon. 30° 21' E., on the route between Constantinople and Konia. It lies on the Fırsak at the entrance of a valley, and at the foot of the Fırsak Tağ. W side of an extensive upland plain, nearly 50 m. long by 20 wide, and probably more than 4000 ft. above the level of the Black Sea. It contains a number of mosques, minarets, baths, fountains, libraries, and about 10,000 houses.

L

I A BATHIF [Latin *Bastis*] a vil and com. France, dep. Sarthe, 10 m N W. Mantes. It has an ancient church, and the remains of an old castle. Pop. 1097.

LA BALCH [HP. *Latris, Balco*] a vil and com. France, dep. Savoie. It has 11 churches and 10 from Chambéry with an ancient church, a castle and a school. Pop. 1460.

LA BLOU [Latin *Belletum*] a vil and com. France, dep. Savoie. It has 11 churches and 10 from Chambéry with an old Gothic church and some manufactures of linen and cotton stuffs. Pop. 1460.

LA FALETTE, numerous places, U. States the more important are—1, a city, Louisiana, 2 m. W. by S. New Orleans, on the railway thence to Carrollton, with a court-house and other county buildings; three churches, three schools, and a market house. Pop. 2307.—2 A vil Indiana, 70 m N W Indianapolis, on the W. abash, here navigable for steamers. It has a courthouse, jail, market-house, seven churches, an academy, a paper and carding and fulling two flour and two saw mills and is connected by canal with Lake Erie. Pop. 2000.

LA GELZE, a vil and com. Belgium prov. and 19 m. S.E. 1 liège, on the Amblève. It has three flour mills, and a trade in agricultural produce. Pop. 1464.

LA LA, or **LA LA**, a vil. Lower Austria, on the Thaya, 76 m N Vienna. It has a church with old massive square towers, a burgher hospital, a townhouse and the remains of a strong castle. Pop. 1378.

LAAR, or **LAAR**, a vil Hungary. Hither Danube and 12 m. from Ebersburg. It has a church and several flour-mills. Pop. 1277.

LAAR, or **BUCHENLAAR** [Latin *Leopold*] a vil Austria. Hither, circle and 13 m. N. W. Lybich. It is valued for cattle, in 1 milne, com. manufactures of linen, thread and leather and a trade in linen and horses. Pop. 1800.

LAAL AND OR LAAL [pronounced *Laland*] an isl Denmark, S. of Iceland lat. 54° 38' 50" to 54° 58' 25" N. lon. 11° 21' 50" W. washed on the N. by the Wordenberg. Danneboer forming a continuation of the Great Belt. E. by the narrow Guldbjerg and separating it from Falster. S. by the Baltic, and W. by the Langebeldt separating it from the island of that name. Greatest length S.E. to N.W. 96 m. breadth varying from 9 m. to 17 m. area, 344 sq. sq. m. The surface, as implied by its name, meaning low land is so very little raised above the sea, that parts of it along the coast are subject to frequent inundations and for a considerable distance around it, the water is so shallow that there are few places in which vessels drawing 8 ft. can approach it without danger. Mists are frequent, and the climate is not healthy at least to strangers. The soil consists generally of a heavy loam, is very fertile, and yields excellent crops of corn, beans, hops, and hemp, are extensively grown. Wood, also including reeds and others of the bog varieties of hard-wood timber is abundant. The principal stream the Hvidebeldt Ave has a length of only 3 m. but there are several lakes, of which that of Maribo, near the centre, is of considerable extent. For administrative purposes it is included with Falster in the bailiwick of Maribo, of which with some small adjoining islands it forms four horden or districts, and 21 parishes. Maribo is its capital. Pop. (1851) 55,769.

LAAL AT or **LAAR** an isl Indian Archipelago N.E. of Timor Lant, lat. 7° N. E. point, 7° 10' S. lon. 122° 18' E., about 35 m. long, and nearly as many broad.

LAAL, a vil Tyrol circle Bozen, dist. and near Seckelander with a church a chapel and a marble quarry. P. 1200.

LAALPHIL, a vil Rhodanus Prussia gov and 58 m. S.E. E. Arensburg. It has a church, blast-furnaces, and other iron works manufactures of cloth, and a trade in cattle. Pop. 2060.

LAAL, or **LAKI** a vil Hungary. Hither Danube, co. and about 34 m. from 1 retschin. with a church. Pop. 1833.

LAAL, a river of N. Circassia which flows on the N. side of the Caucasus. flows N. W. and, after a course of about 170 m., joins 1 bank Kuban, a little above Ust Labinsk.

LABASHIKEDA, a vil Ireland, co. Clare, 10 m E by S Kilrush, on a bay of same name, in the Shannon. Near it is a large handsome R. Catholic chapel. Pop. 808.

LABASTI, a vil Hungary. Thither Thence, co. Temesvár about 18 m from Lipova with a church. Pop. 1118.

LABASTIDA, a m. Spain, Buxay prov. Alava, about 30 m. from Vittoria. It has a large and handsome church a courthouse, and primary school, several flour-mills, a valuable fishery in the Ebro, and a trade in wine and brandy. P. 1639.

LABATLAN, a vil Hungary. Hither Danube, co. Komorn, 2 m. from Roudorf, with a church, and a marble quarry. Pop. 898.

LABS, a m. Africa, Senegambia, about 280 m N.E. Sierra Leone lat 11° 10' N., lon. 8° 30' W. It is said to be 8 m. in extent, to have manufactures of cloth and various articles in silver from wood and leather, and to carry on a trade with Timbuctoo. Pop. about 5000.

LAHER, or **LAARER**, a market in Bavaria, Upper Palatinat, 18 m W. W. Regensburg on the Lahr with two churches, a castle salt-petre-works, and iron, paper powder and other mills. Pop. 654.

LABS, a m. Prussia, prov. Pomerania, gov. and 48 m. N.E. E. Steinhilb bank Raga with a courthouse, and manufactures of woollen cloth and serge. Pop. 3207.

LABIAL, a m. Prussia, prov. E. Prussia, gov. and 26 m. N.E. E. Königsberg. cap. circle, on the Dnieu and the Curische-Haff. It has a law-court, several public offices, a church, manufactures of linen and leather and a trade in cattle. Pop. 3595. Area of circle, 394 sq. sq. m. Pop. 45,822.

LABISCHIN, a m. Prussia, prov. Posen gov. and 14 m. S.W. Bromberg, on an isl of the hette. It has two churches, and a synagogue, manufactures of linen and woollen cloth and a trade in wood and cattle. Pop. 2220.

LABOUER, a small rocky, well wooded isl Indian Archipelago about 18 m off N.W. coast of Timor Lant. It has good water and W. of it lie numerous islets and banks.

LABRADOR, an extensive peninsula E. coast of British N. America lat 50° to 62° N. and lon 66° to 78° W. bounded N. by Hudson's Strait, E. by the Atlantic, N.E. by the Strait of Belle Isle, separating it from Newfoundland, S. by the Gulf and River St. Lawrence and Canada, and W. by James Bay and Hudson's Bay. Area estimated at about 420,000 sq. m. The interior is very imperfectly known, and the coast is almost throughout rugged bleak, and desolate in the extreme. Towards the centre the surface rises till a mountain range, partly known by the name of the Wotobah mountains, appears to form the principal watershed, sending the waters which gather on its sides W., N. and E. The principal rivers are the E. Main or St. John, which flows nearly due W. into the S.E. extremity of James Bay the Great and Little Wharfe, which flow in the same direction, and fall into the S.E. extremity of Hudson's Bay, the Kattogovik and Kokovik which flow respectively N.E. and N.W. into their streams and fall into Lugava or S. Bay, off the S.E. of Hudson's Strait, and the Meschickeman or N.W. river which flows P. into the Strait of Belle Isle. The lakes are very numerous almost every river forming several by expanding during its course. The largest are Clear Water in the W., which discharges itself by a stream of same name into Hudson's Bay. Mistassimie, in the S., and Meschickeman an expansion of the above river of same name. The prevailing rocks on the coast are granite, gneiss, and mica slate. Above these, in some parts, is a bed of old red sandstone, about 200 ft. thick, followed by secondary limestone. Towards the interior the secondary formations disappear, and the primary become more dominant. The surface, when seen at a distance from the sea, has a green and alluvial appearance, but is found, on examination, to be covered with moss and stunted shrubs. In the valleys where the soil is sandy and the temperature considerably above the average Juniper, birch and poplar trees are found growing in a kind of forest, which are burned during summer, by deer, bears, wolves, foxes, martlets, otters &c. till the approach of winter drives them to the coast. The climate

Mexico and the Philippines, the Spaniards being now few in numbers, and the aborigines having nearly altogether disappeared.

LAE-CROW FLO, a seaport in China, prov. Kwantung S.
shore, Gulf of Petchili lat. 37° 15' N lon. 119° 50' E. It is
a place of considerable coasting trade, and has a fort and
high craggy cliffs a little to the eastward and some islands
directly in front.

LAEKEN a tn and com Belgium prov. Hrabant about
2 m N Brussels, and a station on the railway thence to
Mechlin. It contains a great number of beautiful seats but
they are all eclipsed by the magnificent palace in which the
royal family usually reside during part of the summer. It
stands on a hill called Schoonenberg commanding a view of
Brussels and its environs. The park and gardens are beauti-
fully laid out. Area, nearly 250 ac. In this palace Napoleon
signed the declaration of war against Russia. The church of
Laeken is large handsome and richly adorned. Pop. 2382

LAEH, two places Prussia.—1 A vil. gov. Danzig circle
Marienburg, with a church and a trade in cattle. 1 1020
—2 A vil. Rheland Prussia, gov. and near Münster with a
handsome manor house. Pop. 896

LAEPEKE, a vil and com Belgium prov. E Flanders,
6 m E Ghent, with a church, several schools, a brewery
oil mill and two flour-mills. Pop. 3770

LAFOUILLIE, a river U. States, Louisiana, an outlet of
the Mississippi, which it leaves above Donaldsonville, and
flowing S.E. 90 m falls into the Gulf of Mexico.

LAGA AN a river Sweden, which issues from a small
lake about 15 m S. of Jönköping flows S., expands into Lake
Vidsterna, turns W. passes Loholm, and about 4 m. below,
falls into the Bay of Loholm, in the Kattegat, after a course
of about 110 m.

LAGARTE a vil., W side Isl. Gran Canaria, in a very
displanted state with a church, a primary school, two mills,
and some trade in fruit, particularly figs and oranges. P. 2062

LAGAN, a river Ireland, rises in the Shere Groob
Mountains, on Down, and, after a course of 85 m first W
and then N.E., falling into Belfast harbour. It has been
rendered navigable beyond Larnarn, whence it communicates
by a canal with Lough Neagh.

LAGARTIA a tn in Spain New Castle, prov. and 70 m
S.W. Avila. It is a poor place indifferently built, and very
dirty, but has a tolerable square, a church, a large and well
built townhouse and prison three schools, a ruinous hospital
manufactures of woollen and linen cloth, and a trade in wool
cattle, and agricultural produce. Pop. 1681

LAGARTO, a tn Brazil, prov. Sergipe, 70 m. W S W
Rio Cristoval with a church, a trade in oxen and cattle and
in great quantities of excellent quality, obtained in the neighbour-
hood. Pop. dist. 2004.

LAGF two tns Germany.—1 Principality Lippe Det-
mold, on bank Weser, 6 m N N W Detmold with a church,
synagogue, courthouse, and the ruins of an old castle. Pop.
1500.—2, Mecklenburg-Schwerin on bank Regnitz, 14 m S.E.
Rostock. It is walled, has a tollhouse church a townhouse,
manufactures of paper, and several mills. Pop. 1634.

LAGEA, a tn. Brazil prov. Santa Catharina, 140 m. W
Desterro, on the high road between Prov. São Pedro de Itua
Grande, and São Paulo. It has a church and a trade in
timber hides, sugar, and rum. Pop. dist. 5000

LAGGAN, *per* Scot. Inverness, 256,000 ac. P 1928
It contains Loch Laggan, 19 m N.E. For. W. Inverness, 8 m
long, by 1 m broad, in which are two small islands.

LAGNABO a vil and com Italy, Piedmont, div. Com.
prov. Saluzzo, with a church a handsome modern and three
old feudal castles a charitable endowment, a school, and a
trade in corn cattle, fruit, and silk. Pop. 1931

LAGNI-RENI LAGNO or LAGNO a river Naples, which
rises near the frontiers of Principato Ultra, flows W and

N N W through Terra di Lavoro, past Acerra and falls into
the Mediterranean, previously sending off a small branch into
the Lake of Patria. Total course about 60 m.

LAGNIEU [*anc. Lugnace*] a tn. France, dep. Ain,
28 m S.E. F. Lyons, and near x bank Rhone, here spanned
by a suspension wire bridge. It manufactures Tuscan bon-
nets, has several tanneries and cotton-mills, and some trade in
red wine and spun hemp. Pop. 3214.

LAGAY and **Lemance**, a tn. France dep. Seine-et-
Marne, 1 bank Marne, 15 m. E. Paris. It dates almost from
the foundation of the French monarchy and owes its origin to
an abbey first founded, in the seventh century by a Scotch
noblesman and afterwards richly endowed by the Counts of
Champagne. It has a handsome church, and a considerable
trade in corn, flour, cheese (milked *fromage de bre*), poultry,
cattle, wood, and hemp. Alexander and gypsum are exten-
sively worked in the neighbourhood. Pop. 3033

LACO, a tn. Naples prov. Calabria Citra dist. and 14 m
S.E. S. Paola, 4 m. N. Y. Amantea, with some quarries P. 7800

LAGO DI AMASANTO [*anc. Amaseno Velice*] a lake, Naples,
prov. Principato Ultra, near Rocca St. Felice, about 25 m.
N. E. Naples, at the entrance of a mountain valley. It
occupies a rhomboidal space about 30 yards long by 30 yards
broad and is remarkable for the incessant motion of its water
which keeps continually bubbling up over a large portion of
the surface, and with an explosion resembling distant thunder.
The mephitic vapours especially when borne in one direction
by a high wind, sometimes prove fatal.

LAGO-MAGGIORE a lake Italy. See MAGGIORE

LAGO—1 A tn. Brazil. E. part of Isl. Santa Catha-
rina with a church a primary school, and numerous disti-
heries of rum. Pop. dist. 3000.—2 A *lago* A tn and
par. Portugal prov. Algarve, com. and 27 m W N W Faro
Pop. 3100

LAGO SANTA, a vil. Brazil, prov. Minas-Gerais, on
a lake of same name 10 m N. E. Sabara. It owes its existence
to the number of patients attracted to it by the medicinal
properties of the water of the lake and contains a parish church
and a primary school. The lake is about 4 m long by 1 m
broad, and abounds with fish. The water which is perfectly
clear contains a proportion of sulphuric acid.

LAGONICHI or **LAGONO** a tn. Naples, prov. Re-
politana, 38 m N. S. Potenza, at the foot of the mountain near
the small lake of the same name. It has an old castle, two
convents, an hospital three establishments for the support of
the poor and manufactures of woollen cloth and caps. P. 5000

LAGON—1 [*anc. Lagonia*] A tn and seaport, S coast,
Portugal, prov. Algarve N W shore of Lagos Bay, at the
mouth of a small navigable stream of same name, 110 m R.
Lisbon. It is well built has three churches, one of them
Igreja da Misericordia, very handsome three convents, a
civil and a military hospital an almshouse, grammar-school
and a fine aqueduct, which supplies several fountains.
The harbour, which admits only small vessels, is defended at its
entrance by two forts and there are other two nearer the
town. The fishing, particularly of tunny and sardines, is
carried on to a great extent. Pop. 6340.—2 (*San Juan de
los*) A tn. Mexico dep. Jalisco, 40 m E. by N Cusadalaizara,
in an extensive and well-cultivated valley, 6300 ft. above the
sea. It is a mean-looking place composed of mud houses,
but has an elegant church. In December there is a fair,
which lasts eight days attended by all the planters, &c., for
300 m round about.—3, A slave-trading station on a river
and lagoon of same name, on the Slave Coast, right of Benin,
lat. 6° 20' N, lon. 8° 30' E. It is the capital of a territory
of same name, tributary to Dahomey and was one of the most
notorious slave stations on the W coast of Africa. The
British consul having been fired upon, when attempting to
negotiate a treaty for the abolishing of the slave trade with
the reigning chief (Nov 1851) thought at the time under a
flag of truce, Lagos was attacked by a party of 160 or 180
from the *Blackwood* steamer. Fifteen lives, however, had to re-
live, with the loss of two officers and 10 men. But, on Dec 24
and 25 following, a well-organised and successful attack was
made upon the place, which is strongly fortified by stockades,
and was defended on this occasion by 5000 men. Lagos
was taken, after a desperate engagement, 57 guns destroyed,
and a treaty signed prohibiting the slave-trade putting down
human sacrifices, and securing not only the freedom of com-

marcs but the liberty to diffuse Christianity. The arven pours out at half ebb, each a volume of surface foam, of a deep brown tint and of a mackerel odour as to spread over a sweep of 4 m., the edge of which is marked by a well-defined margin. European trading vessels do not attempt to pass the bar at the mouth of the harbour, but land their goods on the water beach whence they are carried by canoe to the inner lagoon on which are the shorehouses and agents dwellings. — 4 A small river N.W. Africa, Ivory Coast lat. (embouchure) 5° 7' N lon 5° 40' W

LAGOSTA (anc. *Lashoon* or *Lashoon*) an rd. Austr., in the Adriatic off the coast of Dalmatia 63 m W W W lagoon length E to W 6 m breadth, 3 m. On the E side it has 30 larger and smaller islands known by the name of Lagonet and on the W the island of Marcaru and several other islets. The interior consists of valleys enclosed by rugged hills several of which are continued to the shore and form precipitous cliffs. Occasionally their opposite sides stretch along creeks, and furnish good harbours. The chief products are wine and oil but only in sufficient quantities to meet the home consumption. The great employment is fishing. Pop. 1200

LAGUIN (VEN. *San*), a small seaport in France, dep. Calvados, on the English Channel 11 m. N. Caer with a church interesting from some peculiarities of structure, and surrounded by a tower apparently of the 14th century. Pop. 1907

LAGUANA a small id. Philippines, off N coast of id. of Samar and S.W. of that of Ilocos. With its N.W. side it form. part of the port of Palapa and has a village of same name near which vessels anchor in from 6 to 7 fathoms between it and the Samar shore

LAGUARDIA a town Spain Biscay prov. Alava, about 14 m. from Vitoria. It is regularly built surrounded by a wall with five gates, has two parish churches a contributive prison two primary schools, an oil and numerous flour mills, and a trade in wine and silk. Pop. 1742.

LAGUIMBA or **LAKEMBA**, one of the Feejee isls the largest of the F group lat. 18° 14' N. lon. 178° 51' W. It is of volcanic formation about 5 m. long, by 2 m. broad highest peak 714 ft. high. It is extremely fertile has rich valleys or rather ravines grade a ly rising and contracting until they reach the hills. There is a town on the S. side, which contains two-thirds of the population of the island, or about 1000

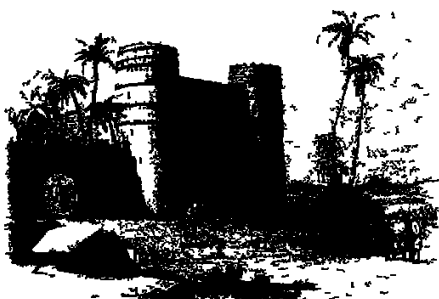

LAGUNA (—) (*San*) (*Trinidad*) A. tn. Cantabria, N. P. shore ul. Tenerife on a beautiful plain 2000 ft. above the sea. It is well built has two large and four small squares, and regular and spacious though ill paved streets. It is the see of a bishop contains two churches, one of them a cathedral a oil larder and several other schools a register-office for the whole island, several suppressed monasteries two handsome man. houses or palaces, a 5 m. and two other hospitals some manufactures of woollen, silk and linen goods brick works pottery, mills and lime-kilns and a trade in fruit and agricultural produce. Pop. 6537. — 2 A. tn. Herzi prov. Santa Catharina near the mouth of the Tubera, 45 m. N.W. W. Deutscher. It has a townhouse with prison attached and a church. The principal crops cultivated in the district are manioc, new flax, and millet, of which, as well as timber there is a considerable export. Pop. 1090 dist. 6000

— 3 A small tn. and port Yucatan (lat. Carmen Bay of Campeche at the mouth of Lake Terminis) — 4 A tn. Ecuador prov. Maynas, on the border of a small lake, near the E bank of the Huallaga, an affluent of the Amazon lat. 5° 10' N. lon. 75° 40' W. — 5, (*de Negritud*) A tn. Spain, prov. and 25 m. from Leon with two churches, a castle in ruins, a primary school, and manufactures of woollen and linen cloth, and a trade in wine and cattle. Pop. 1455. — 6, (*del Medio*) A lagoon, Texas, inside the Isla de Padre and stretching along the coast, from the Rio Grande del Norte to the mouth of the Rio Grande. lat. 26 to 27° 30' N. It is separated N. by Corpus Christi Bay and communicates with the Gulf of Mexico by three narrow and shallow inlets. Length, 130 m. breadth, 7 to 10 m. — 7 A prov. Phillip-

ines, in the S.E. of Luzon, bounded N. by prov. Tondo and Nueva-celja, W. by Cavite N. by Batangas and Tayabas and S.E. and E. by the Pacific Ocean. Near a half of the whole area is occupied by Lake Bay, to which it owes its name the remainder of the surface is occupied partly by steeply-wooded mountains, abounding with game, and partly by lower grounds, generally under good cultivation and very fertile. The principal stream is the Pang, by which Lake Bay discharges itself into the sea. It is one of the best peopled provinces of the Philippine Isles, and is subdivided into 33 districts. Pop. 167,654.

LAGUNILLA two places, Spain — 1 A tn. Old Castile, prov. and about 12 m. from Logroño, with a church, court-house, a suppressed monastery a Latin and a primary school, a four-mill, and a trade in wine. Pop. 1129 — 2 A vil. Leon prov. and about 5 m. N.W. Salamanca, with a church a palace belonging to the Bishop of Coria, a primary school manufactures of linen, and several oil and flour mills. P. 1027

LAHISA Arabia. See FI. ALA

LAHN, a river, Germany, which rises in gov. Arnaburg Rhoden I. russia, on the N. frontiers of Nassau, flows first E. to Marburg in Hesse-Cassel, next S. E. to Gießen, then very circuitously W. S. W., across the duchy of Nassau passing the towns of Weilburg, Wilmar, Linburg, Dietz, Nassau, and Ems, and joins r. bank Rhine, between Ober and Nieder Lahnesten, about 8 m. above Coblenz, total course, about 110 m. Affluents, right the Salsboden, Dille, Elz, and Aue left, the Otum, Wiesloch, Wul, Elmbe, Aar, and Muhl. It is navigable for about 20 m.

LAHN or **LENA**, a r. in Prussia, prov. Silesia, gov. and 25 m. S. W. Liegnitz, 1 bank Bohemian with two churches, an hospital and the ruins of an ancient castle. Pop. 339.

LAHNSTEIN (Ossa and Nizom), two vils Germany Nassau r. bank Rhine, on either side the mouth of the Lahn, 5 m. S. E. Coblenz. Ober-Lahnstein has an iron foundry, and near it is the ruined castle of Lahnestein. Pop. 1764. —Nieder-Lahnstein has some trade on the Rhine, and near it are iron-works, the Church of St. John, and the Hill of the Saints (Allerheiligenberg) with a chapel in which pilgrimages are made. Pop. 2065.

LAHOL M., a r. in Swedan, 10 m. and 15 m. S. E. Halmstad. 1 bank Laga, here crossed by a bridge, and a little below falls into the Cattegat. It has a church, and the remains of an old castle, manufactures of hosiery and gloves, a small harbour very much sanded up, and a trade particularly in salmon, here taken in great numbers. Pop. 980.

LAHORE the cap. city of the Punjab, 1 bank Ravee 280 m. N. W. Delhi and lat. $31^{\circ} 30' N$, lon. $74^{\circ} 15' E$. It is about 8 m. in circumference, surrounded by a brick wall 25 ft. in height, with indurated bastions and a broad moat. It contains several elegant and important buildings, but in no part of India are the contrasts between magnificent structures and miserable huts more striking than in Lahore. The streets are narrow, dirty, and unpaved, with a kennel running down the middle, which renders them almost impassable in rainy weather. They are further obstructed by the movable awnings which project over the shops, and nearly occupy the entire breadth of the narrow way. The houses are high built of brick, with flat roofs and have a mean appearance,

into slaughter-houses, and their courts into stables. There are, besides these, many tombs, mosques and Hindoo temples, mostly, however exhibiting symptoms of decay. On the opposite side of the river, about 5 m. W. the town, at the Shah Dara or mausoleum of the Emperor Janghaer, built of red sandstone, but adorned with a profusion of marble ornaments, arranged in elegant masses, representing flowers and texts of the Koran. It is of a quadrangular shape, sixty paces on each side and has a minaret 70 ft. high at each corner. Three miles N. E. the city is the garden of Shah Jehan, called also the Shahimor or H. cas. of Joy. It is $\frac{1}{2}$ m. long, has 450 fountains, constantly throwing up water which is received in marble tanks but these, as well as its gay pavilions are much dilapidated. S. of the city and between it and the river is another remarkable building, the tomb of Anurkail. In the neighbourhood of the city are many large and delightful gardens filled with fruit-trees and flowering shrubs and plants and extensive Mahometan ruins are numerous. Lahore, though possessing crowded streets a bustling population and some trade, is a dull city as regards commercial vitality. Amritsar having become the great mart for the Punjab but its manufactures of silken and shawl-like acquired wares and silks, more especially gorgeous shawls flavoured with gold and silver thread. Lahore was taken in 1523, by Sultan Ibadur and became for a time the favourite seat of the Mogul empire, during which time its extent and population were much greater than at present. In 1748 it fell into the hands of Ahmad Shah the first Durrane emperor and in 1799 Zeman Shah invested Runjeet Singh with the government of Lahore, and the title of Rajah. His energetic prince made himself master of the Sikh monarchy and made that city one of his favourite places of residence. In 1849 Lahore fell into the hands of the British after the final overthrow of the Sikhs. Pop. 100,000 to 120,000. —(Higginson Mission Bureau &c.)

LAHR, a tn. Baden circle Middle Rhine cap. hdl., r. bank Rheine 18 m. S. S. P. Strassburg. It is walled, has a collegiate church a gymnasium museum, industrial school, and hospital, manufacture of woolen, cotton, and flax goods, smelting of iron, leather, cutlery, vinegar, playing cards, glue, wax, lead tobacco, and tobacco boxes and a considerable trade in wine, fruit and colonial produce. Pop. 6100. Area of hdl., 80 ges. sq. m. Pop. 29,298.

LAHUL, **LAHOL**, or **LAHUL**, a territory in the N. E. of the Punjab lat. $32^{\circ} 30' N$ to $33^{\circ} 20' N$ and lon. $75^{\circ} 30' E$ and $77^{\circ} 30' E$, and bounded N. by Ladak, E. by Bussaher S. by Kulu, and W. by Chamba. greatest length N. W. to S. E. about 60 m. central breadth about 40 m. area 2000 sq. m. It is surrounded on the N. E. and N. by lofty ranges of the Himalaya, and is watered by numerous torrents two of which the Saray bhaga and the Chandra bhaga, unite at Pandi in forming the Chenab, which thereafter traverses Lahul in a N. W. direction. Owing to the great elevation of the surface the vegetation is scanty but a good deal of grain is grown, and many cattle are reared. LAUL Tencor or LAH-LAHOO Foo (Balthia plant etc.) a fortified city and seaport, Chinn prov. Shantung S. coast Gulf of Petcheloo lat. $37^{\circ} 18' N$ lon. $119^{\circ} 50' E$ (a.), on a promontory bounded on one side by the sea, and on the other by mountains. It has an extensive coasting trade.

LAIRACH, in Austria. See LAIBACH. **LAICHEV** a tn. Russia gov. and 80 m. S. E. Kassa, r. bank Kassa. It has extensive meadows, in which the salt of Perm is lodged previously to its disposal among the inhabitants of the surrounding districts. Pop. (1851), 2377. **LAICINGEN**, a vil. W. Strasbourg, circle Darnheim, hdl. and 11 m. E. N. E. Munsingen, with a church, manufacture of linen, and a trade in cattle. Pop. 2000.

LAIGI P. in France See AIGLE (P.). **LAIGUEGLIA**, or **LAIGUEGLIA** [lat. *Langola*] a vil. and com. Santhum States, div. Genoa, prov. and 5 m. S. E. V. A. Ithanga, on a small bay near Cape Mela. It has a large church, a literary, hospital, school, and a saltery. Pop. 1451.

LAH. KEYBY TO LAHORE.—From the Hon. G. S. Hardinge's Recollections of India.

sometimes in part released by the elegant carving of the wood balconies and low windows. The bazaars are numerous and animated. Goods of great value are met with in these marts, but eatables form the staple commodity. The more remarkable buildings are the mosques, Palahis, Vialer Khan, and the Sonara or Golden Mosque. The first is of red sand stone, with lofty minarets and cupolas, the second, or Vialer Khan, has also tall minarets, and is entirely covered with painted and lacquered tiles, inscribed with Arabic sentences. The Sonara or Golden Mosque is a large and handsome structure, with gilded minarets and domes. The first two, however, have long since had their lower apartments converted

LAMPION (anc. *Scila*) an isl in the Mediterranean forming a dependency of Sicily one of the isles of the Pelagie about 8 m. W by N Lampodusa greatest length N to S, 600 yards breadth about 200 yards. It contains several vestiges of buildings and fragments of a marble tesselated pavement

LAMILOUGH par Eng Cumberland 8454 ac. P 518

LAMPONG, **DI-LEI-Y'S** (Tum), a prov, in Siam, forming its S.E. extremity bounded, N by prov Palanang from which it is separated by the river Massey, S. by the Java Sea, E. by the Strait of Sunda and the Indian Ocean and W by prov Neneonlan, about 128 m N to S by 100 m E to W, area, 12 926 sq m Its E coast is pretty uniform, but in the N coast are two deep indentations, Lampang Bay stretching inland 80 m by 10 m in breadth and Panungka Bay with island of same name at its mouth stretching 42 m. inland and 15 m. broad The E coast is low and flat, but the S. coast and W frontier are hilly The mountains stretch in three nearly parallel lines S.E. to N.W. along the S. coast but do not penetrate far inland they are wholly volcanic and from them flow, in almost parallel lines to the E. coast, all the rivers of the province. After these rivers, the principal of which are the Poelung, Langboeng, and bekomp, among the various districts are named thus, Lampang Poelung, &c. In the wet season, all the rivers overflow their banks, and inundate the great expanse of flat country lying between the mountains and the E. coast, so that in some districts, only the tops of the trees are visible. but the soil being sandy is dry and sterile in the dry season. The climate is very unhealthy The forests furnish the timber, of numerous species the Dammar pine, casoutchou, and various other plants yielding gums and resins, and some rice, pepper tobacco cotton, and coffee, are cultivated all of which are, to some extent, exported. Salt and linen are the chief imports. The elephant rhinoceros tiger, hippopotamus, tapir, and argus pheasant are native and numerous, and alligators swarm in the rivers. Buffaloes and goats are the chief domestic quadrupeds. The natives build their houses, at a considerable elevation, upon iron wood posts in thatched, they resemble the Chinese they are Mahometans, speak Malay and are universally indolent. All kinds of crimes, even murder may be atoned for by money Human life is held cheap and revenge by murder is of common occurrence. From these causes, and the numbers killed by wild animals, the population is only 85,905.—(Van der Aa, *Jour Annals Arologie*, 1851)

LAMPORCICCHIO a m. Tuscany, div Florence, on the W side of Monte Albano about 8 m from Pistoia. It is tolerably well built, consisting of several streets and small squares, and has a church the remains of an old castle and some trade in corn chestnuts, oil, and wine. Pop. 2018

LAMPORO (Latin *Lamporeus*) a vil and com Italy Piedmont, div Novara, prov Vercelli, 2 m N (recently) with a modern and rather elegant church, two chapels, and a trade in corn millet, and rice. Pop 1187

LAMPORI par Eng Northampton 1440 ac. P 228

of moss. It was considered an irreclaimable bog, but, by skill and perseverance, with exception of a few patches, it has been turned to arable account. The most important mineral product of Lancashire is coal which occurs abundantly in the S and S.W., the field including nearly all the manufacturing districts of the county. Excellent freestone is quarried near Lancaster. Limestone occurs abundantly. In the N of Furness, numerous quarries of blue slate are wrought. Copper occurs in Conistone Fells and mines of this metal are probably worked in the Old Man Mountain, where the ore is found tolerably rich, and in great abundance. Ironstones, lead ore, coarse slate, flag-stones and scythe-stones brick clay and pipe clay are also found. The climate is temperate, but in general extremely humid, especially on the W side. A great part of the county, especially E. of the Lancaster and Preston railway is chiefly under grass, and let as dairy farms. The soil varies considerably but with exception, perhaps of the Fylde, which is comparatively rich cannot be called naturally fertile. The principal crops are oats, wheat, barley turnips and especially potatoes for the cultivation of which Lancashire was early noted. A large quantity of cheese, also, is made in the S and W parts. But Lancashire owes its celebrity mainly and population to its manufacturing and commercial and not to agriculture. It is the grand seat of the cotton manufacture, which has increased since 1770 with a rapidity altogether unparalleled in the history of industry and caused an extraordinary increase of population and wealth. Woolen flax and silk factories are also numerous.

The manufacturing population suffered heavily from the failure of the cotton supply from 1861 to 1865. The great majority of the mills stopped entirely and the remainder worked only short time. In January 1865 no less than 232,992 operatives were out of employment, and with their families dependent upon the charitable relief which flowed in from all parts of the country. The total amount contributed was £1 864 121 of which £404 224 was raised in the manufacturing districts themselves, besides £173,108 in value of clothing provided, &c. The effect upon the cotton-manufacture was to raise the price of fair Orleans from 8d per lb in 1860 to 8½d in 1864 and was in Nov 1866 17d showing that the rise is likely to be permanent.

Manchester is the principal centre of the cotton manufactures, and Liverpool of the shipping trade of the country. The former however is carried on also to a great extent in numerous other towns in the county including Preston, Bolton, Oldham, Ashton, Blackburn, Bury, Chorley, Wigan, &c. Woolen goods are also largely produced at Rochdale and Manchester as are also silks hats paper and a vast variety of other articles and a third part of the soap made in Great Britain is manufactured in Liverpool and its vicinity. A complete network of railways, and several important canals, afford extensive means of rapid conveyance to all parts of the kingdom. Lancashire which is a county palatine returns 26 members to Parliament of which five are for the county and the remainder for its various boroughs. P. (1841) 1,667,054 (1851) 2,081,288.

LANCASTER a municipal and parli bor and river port, England cap above to 1 bank Lune over which there is an elegant stone bridge, 549 ft in length, with five elliptical arches, 45 m N by E Liverpool lat. 54° 3' N lon 2° 46' 15" W (4). It is a station on the railway from Preston to Carlisle, and communicates by a direct line with Leeds, &c. It occupies a gentle slope the streets most of which are narrow but a few tolerably spacious and well paved rising from the river towards the S. On the summit of the hill, on the W side are the castle, now used as a prison, measuring 380 ft by 380 ft within the walls, built in the reign of Edward III, but with a keep supposed to be Saxon and the church a venerable and spacious structure, in the later English style, with a square tower. Nearly the whole town is built of freestone, from quarries in the neighbourhood. The houses are generally substantial, and many of them handsome, of the latter class are some fine old mansions, once the residences of nobility. The public buildings comprise the town hall the custom-house, assembly-rooms, and a commodious building, formerly the theatre containing a music hall, and the museum, &c., of the Natural History Society. There are several other Episcopal churches, besides the one above referred to; places of worship for Baptists, Independents, Wesleyans, Primitive

Vol. II

Methodists, Presbyterians, the Society of Friends, and R Catholics, a free grammar and charity schools, a dispensary, almshouses, and other benevolent institutions. The manufactures of the town consist chiefly in the making of mahogany furniture, cordage, sail-cloth, and cotton goods, for which last there are six factories, a silk mill and a woollen mill are also in operation. The foreign shipping trade of Lancaster is now almost wholly removed to Liverpool, but its coasting trade is still considerable. The communication with the sea is greatly obstructed by shoals in the river, which prevent vessels of greater burthen than 250 tons from approaching the town. Those of larger size unload at Glasgow dock, 5 m below. The canal to Preston passes over the river at a short distance from the town. Lancaster sends two members to Parliament. Registered electors (1851), 1873 Pop 14,694.

LANCASTER, a city U States New York, 60 m W Philadelphia, with which it is connected by a railway. It is regularly laid-out, with wide streets, crossing each other at right angles. The streets are well paved and kept clean. It has ten churches, a grammar and several other schools, two public libraries a reading-room a pretty extensive commerce, and manufactures of iron and machinery, tanneries, potteries, ropewalks, breweries, distilleries, and a cotton factory Pop (1840) 8417 (1850) 12,382.

LANCASTER SOUND, a passage leading from the N W of Jaffins Bay W to Barrow's Strait about lat. 74° N lon 80° W Its E. extremities are formed by Cape Hornburgh on the N and Cape Walter on the S, and its central breadth is about 65 m.

LANCAVA a group of three large islands, off N W coast, Malay Peninsula, extending N W and S E lat. (approx) 6° 20' N lon 99° 50' E. They are high and bold, intersected by makes of great size, and a numerous for passes.

LANCIANG the cap city of Laos N bank Mekong lat. 17° 37' N lon. 104° 52' E about 800 m E N E Bangkok.

LANCHESTER a vil and par England, co Durham. The village 7 m N W Durham though now small was once a place of considerable importance. It has a venerable church in the early English style, and occupies the site of a Roman station (1753 Area of par. 38 567 ac. P 158).

LANCIANO (Lancione) a m Naples prov Abruzzo-Cam 18 m E E Caserta. It is the see of an archbishop and has a cathedral and several other churches and a seminary. Its trade, once considerable, has greatly decayed. Pop 11,888.

LANCING par Eng Sussex, 2363 ac. Pop. 878.

JANCSAK a vil Hungary co Baranya, 4 m W Mohacs with a church 1 op. 1467.

LANCUT or LANCUT a tn Austria Galicia circle Koszow 84 m W by N Lemberg with a castle manufactures of linen and blackfields Pop 1863.

LANDAK a small state, at Borneo with cap of same name, the seat of a Dutch resident, and in the Dutch prov of the W coast. It is bounded N by Sambar, E Sarang and Tjauang S Pontanank, and W Manupawa lat 0 to 1° N lon 109° 26 to 110° 35 E. It yields diamonds gold and iron. One diamond obtained from the mines here in the end of last century weighed 367 carats in the rough. The mining operations and commerce generally of Landak, were carried on chiefly by Chinese settlers till the year 1841. At that period, however, they were attacked by the Dutch, 700 of them slain and the remainder driven out of the country the oppression exercised by the Chinese on the natives was given out as the cause of the attack.—The town, 46 m N E Pontanank, on river of same name, is fortified and contains a castle of the rajah, seated on a rock.—The river has a S W very crooked course of 80 m direct distance, and falls into the estuary of the Kapuas opposite Pontanank.—(Van der Aa).

LANDAU three places, Germany.—1 A fortress Bavaria, Palatinate, cap. dist on the Queich 47 m N N E Strasbourg. It belongs to the Germanic Confederation, and is regularly and strongly fortified. It consists of substantial houses, and has strong and tolerably spacious streets with a R. Catholic, and two Protestant churches. Latin, agricultural, and industrial schools an arsenal barracks, and other military establishments, an hospital, house of correction manufactures of tobacco and fire arms, and oil and other mills. Landau has been an object of contest, in every great European war,

core, fruit, and wine. But taking in the whole department, perhaps the most valuable product is the sea pine, which, besides the essential service, already mentioned, of distilling the resin, often becomes a subject of trade, yields good timber and fuel, and supplies raw material to numerous works in which resin, pitch, and tar are manufactured. Some coal, and a good deal of iron-ore, are raised, and the latter is also smelted. Good building stone and marble are quarried, and potter's clay, of a superior description, is found. Glass, earthenware, porcelain, paper and leather, are manufactured. In the more secluded and desolate tracts, the inhabitants have peculiarities both of dress and modes of living, which give them a strong resemblance to half-savage and nomadic tribes. Lander is divided into three arrondissements, 28 cantons, and 225 communes. Its chief town is Mont de Marsan. Pop. (1846) 296,230.

LANDESBERGEN a vil. Hanover principality Osterode, bail. Stolzenau, with a parish church. Pop. 1168.

LANDECK, a vil. Spain, New Castile, prov. and about 28 m. from Orense, with a parish church, an hospital, a primary school and sulphurous springs, said to be efficacious in cutaneous and similar affections. Pop. 791.

LANDEWEDNACK, par Eng. Cornwall, 1999 ac. Pop. 480.

LANDFORD, par Eng. Wilts 1669 ac. Pop. 944.

LANDFORDIAN, a to France, dep. Finistere, 28 m. N.E. Brest. It is well built, has regular spacious and well-paved streets, a church with a fine portal, and an elegant spire, and manufactures of linen and leather. Pop. 1810.

LANDKEY par Eng. Devon 3163 ac. Pop. 758.

LANDLA, a vil. Austria, Styria, circle Bruck, dist. and near Gallenstein with a church. Pop. 1369.

LANDPORT, a suburb of Portsmouth, England, on Hamoia, in which is the S. terminus of the London and S. coast railway. It comprises all the buildings beyond the fortifications of Portsea town, and between the suburbs of Gosport, and Mile-end, Newton. It has on level ground, has straight and well-kept streets, a large and handsome Established church, air discharging chapel, hospital, female penitentiary, several schools, Watt's machines and a Young Men's Improvement Association. The industrial establishments comprise three large shipyards, and many manufactures, which give employment to several hundred needle-women. A limited business is done in the building and repairing of ships. (—Local Correspondent.)

LANDQUAST a river Switzerland rising in the Silvretta, in the N.E. of can. Grisons. It flows N.W. traversing the Pradig, and joins a bank Rhine by several branches, a little S. of Mayenfeld, after a course of about 45 m.

LANDRAKE-WITH St. Eover par Eng. Cornwall, 5745 ac. Pop. 825.

LANDRE, a legion, France dep. Basses du Rhone, 16 m. S.E. Arles, about 9 m. long, and 1 m. broad. It receives the waters of two canals.

LANDRECHES (ann. Landreches), a to France, dep. Nord, 20 m. E. Cambrai on the Sambre. It possesses fortifications which were improved and extended by Vauban, a church, and barracks, glass-works, and a considerable trade in corn, hops, fax cloths, cattle charcoal and slates. From 1815 to 1818 it was occupied by the Prussians. Pop. 3423.

LANDRIANO a to and com. Italy Lombardy prov. and 10 m. N.E. Pavia, near the Lambro. It has a court, and several public offices, two churches, and a trade in corn and rice. Pop. 2117.

LANDREND (ann. Bolerum) a celebrated promontory, on Cornwall, the most W. head of England, 266 m. S.W. London. It is formed of granite cliffs, of considerable height. About 1 m. to the W. are a number of dangerous rocks, on the largest of which is a light-house, with a fixed light 83 ft. above sea-level; lat. 50° 4' 0" N.; lon. 5° 44' 45" W.

LANDRENG or GOSLOW, a to Prussia, prov. Silesia, gov. and 84 m. N.E. Oppeln, 1 bank Pross; with a church, and an hospital. Pop. 1693.

LANDREBERG, numerous places, Germany, particularly —1, A. in Upper Bavaria, esp. dist., a bank here have crossed by a bridge, 51 m. S.W. Munich. It is walled, flanked with towers, well built, and has two churches, a Latin school, hospital, and orphan asylum, manufactures of paper, a bell foundry, several mills, and numerous breweries. Pop. 2625. Area of dist., 28 sq. m. Pop. 22,575.—2, A. to Prussia,

paper, Zeitschrift, gov. and 37 m. N.E. Frankfurt, cap. circle on the Wartburg, here crossed by a handsome bridge. It is walled, well built, has a court of law, and several public offices, three churches, a gymnasium, a poorhouse, lunatic and orphan asylums; manufactures of woollen and linen cloth, hosiery, and leather; paper and other mills, and some shipping trade. Pop. 1846, 12,811. Area of circle, 300 sq. m. Pop. 64,357.—3. (46) s. in Franconia, prov. Brandenburg, gov. Potsdam, 12 m. E.N.E. Berlin. It is walled, has three gates, three churches, two hospitals, and an orphan asylum; manufactures of woollen and linen cloth, a distillery and a brewery. Pop. 1507.

LANDSKRONA, a town and port, Sweden. See **LANDSKRONA**. **LANDSHUT**—1. A town in Lower Bavaria, cap. dist. r bank Isar, here crossed by two bridges, 38 m. N.E. Munich. It is partly surrounded by old ramparts and ditches, and, though in a salient place, and mostly built of brick, has two good squares, and two regular and spacious streets opened into by others of an inferior appearance. A court of law, and several public offices. The principal buildings and establishments are the palace, castle, townhouse, nine churches one of them St. Martin's, a noble Gothic structure, with a steeple 450 ft.

ST MARTIN'S CHURCH, LANDSHUT.—From Lange, *Ansichten von Deutschland*.

high, two monasteries, and a convent; a lyceum, gymnasium a Latin, agricultural, industrial, and bathing school, and an hospital. It has manufactures of leather, starch, tobacco, paper, cards, copperware, and surgical instruments several mills, and numerous breweries. Landshut was early a place of importance, because a ducal residence, and had a university, by the removal of which to Munich, in 1528, the town has suffered severely, and lost much of the lively appearance it once had. Pop. 2007. Area of dist., 172 sq. m. Pop. 31,108.—2. A town in Franconia, prov. Silesia, gov. and 37 m. S.E. Liegnitz, cap. circle, romantically situated at the foot of the Riesengebirge, r bank Bober, near the confluence of the Elzeder. It has three churches, a fine old convent, a courthouse, and hospital manufactures of linen, blackbills, dye-works, tile-works, flax, and other mills, and weekly markets, at which great quantities of linen are sold. In 1760, the Prussians were here defeated by the Austrians. Pop. 3598. Area of circle, 115 sq. m. Pop. 32,500.—3. A town in Austria, Moravia, circle, and 44 m. S.W. Kremsitz, on the March, and on the Hungarian frontier; with a church, and a saw and a flour mill. Pop. 1337.

LANDSKRON, two towns in Austria:—1. Bohemia, 97 m. E. by S. Prague, on the Sazawa, and the railway to Vienna. It is walled, has a castle, three churches, a poorhouse, extensive manufactures of linen and calico, blackbills, and dye-works. Pop. 4818.—2. Gallia, 18 m. S.W. Cracow; with a church, and a castle. Pop. 1508.

LANDSKRONA, a seaport in Sweden, the Malmö, on a tongue of land which projects into the Sound, 13 m. N.E. Copenhagen. It is a place of considerable strength, being both fortified, and defended by a citadel, it is well and regularly built, contains a handsome church, and an assembly-house; and has a secure and spacious harbour, naturally one of the best on the coast, but very much silted up; bedding-yards, a sugar-factory soap-works, dye-works, tanneries, and an important annual fair. The chief exports are corn, fish, tar, pitch, timber and alum. Pop. 3976.

LANDSGORT, a small village, in the Baltic, off S. coast of Stockholm, lat. 59° 44' 30" N.; lon. 17° 52' 42" E. (n.); with a revolving light, 145 ft. above the sea.

LANDSFUHL, a town in Bavaria, Palatinate, 39 m. W. N. W. Spire, with a church, manufactures of potash, and a trade in cattle. In early times, the Counts of Sickingen, whose castle, in ruins, still overhangs the town, resided here. The abbot's Count of that name, the friend of Luther, was killed here during a siege, and is buried in the church. Pop. 1907.

LANGDORF, a village and com. Belgium, prov. Brabant, on the Demer 34 m. N.E. Brussels with a flour-mill, and a brewery. Pop. 1983.

LANGEOAC, a town in France, dep. Haute-Loire, r bank Allier, 20 m. W. Le Puy. It has manufactures of lace, and, near it, quarries of building-stone and white-stone, and a coal-field, occupying the valley of the Marnasse. Pop. 3247.

LANGELAIS (now **LANGUEDOC**) a town in France, dep. Haute-Loire, r bank Loire, 14 m. S.W. Tours. It is said to be one of the first towns in which Christianity was preached by St. Martin. Its castle, an extensive Gothic structure, of the 13th century, flanked with towers, is in good preservation. Langueais has manufactures of linen, glass, and paving stones, and a trade in corn, oil, fruit, and wine. Pop. 1981.

LANGENDORF, par Walz, Glanergau; 6710 ac. P. 350.
LANGELAND, an isl. Denmark, forming a long and comparatively narrow belt, stretching between the Great Belt on the N., and the Baltic on the E. and separated on the W. from Lolland by the Langeland Belt, and on the W. from Funen and several smaller islands, by a channel of no great width, but very deep; greatest length, N. to S., 38 m., average breadth, not more than 4 m., area, about 80 sq. m. The E. and W. coasts are low, but rise gradually toward the centre, which is occupied by a low ridge of heights stretching N. to S., but nowhere attaining a height exceeding 150 ft. The water round the island is generally of great depth. The E. coast, along which a strong current runs, exhibits an unbroken line, without a single harbour; but the W. coast is free from currents, is deeply indented, contains many excellent harbours, and fisheries, throughout, on great roundness, in which the largest vessels may at all times find safe anchorage. The island is very healthy, well wooded, yields heavy crops of cereals, and much valuable dairy produce. It belongs to the Funen group, and is included in bailiwick Svendborg, of which it forms two *herreds* or districts. It contains 16 parishes. Pop. 1831, 17,368.

LANGELSHIM, par Elm, on the Rensselaer, on the Rensselaer, above r. bank Hudson. It has manufactures of linen, potash, soda, and several silver furnaces, supplied from mines in the neighbourhood. Pop. 1847.

LANGEMARSH, a vil. and com. Belgium, prov. W. Flanders, on the Hamme, 24 m. S.E. W. Bruges. It has manufactures of linen, which form its staple comp., vining clothy starch, and tobacco, a tannery bleachfield, rope-works, breweries, and oil and flour mills. Pop. 6191.

LANGEN, a market to Hesse-Darmstadt, prov. Starkenburg, 7 m. S. Frankfurt. It has several public offices, a church, town-house, two schools, district prison, and numerous tile-works and mills. Pop. 3508.

LANGENHAGEN, a vil. Baden, circle Middle Rhine, on the Neckar, 6 m. S.E. Karlsruhe with a church and several springs with a bathing establishment. Pop. 1120.

LANGENHAGEN, a vil. Württemberg, circle Danube, 17 m. E. Esslingen, with a church, old Capuchin monastery, ruins of a castle, manufactures of lead pencils and tinware, and a small harbour on the Lake of Constance. Pop. 1100.

LANGENAU, numerous places, Germany:—1. A vil. Württemberg, circle Danube, on the Neckar, 10 m. N.E. Ulm. It has several public offices, three churches, and considerable manufactures of linen and tinware. Pop. 3418.—2. (Juden) A small watering-place Prussia, Silesia, gov. Breslau, about two m. E. Habelschwerdt, with a castle, a large bathing establishment, and near it tile-works and tar-furnaces.—3. (or *Staden*). A vil. Bohemia, circle, and 28 m. N.E. Leitmeritz, with a church, a school, manufactures of linen, and extensive glass-works. Pop. 2147.—4. (Ober- and Nieder-) A vil. Saxony, circle Dresden, bail. Freiberg. It consists of two distinct parts, the former of which has pop. 1086, and the latter pop. 777.

LANGENBACH, a vil. Germany, princip. Roman-Gern, bail. and near Gern, with a church, a mill, and a cattle-market. Pop. 1042.

LANGENBERG, two pls. Rheland-Prussia:—1. Gov. and 16 m. E.N.E. Düsseldorf. It is a wall built, and has manufactures of woollen, cotton, and silk goods, cutlery and ironware, an alum-works, several tanneries, and paper-mills, and a trade in wine. Pop. 2242.—2. A gov. and 85 m. S.W. Minden, with a church and a trade in cattle. Pop. 2290.

LANGENBELAU, several pls. Prussia, prov. Silesia, gov. Breslau, circle Reichenbach. They are Gross and Klein, Mittel, Nieder, and Ober Langenbelau, and form a long line of straggling villages, nearly contiguous to each other. They contain a castle, two churches, and have numerous saw and other mills, several bleachfields, and limestone quarries. United pop. 9195.

LANGENBRUCK, a vil. Bohemia, circle Budweis, about 5 m. from Lohobau. It has a church, a school, and several mills. Pop. 1366.

LANGENBRUCK, a vil. Prussia, prov. Silesia, gov. Oppeln, circle Neumark, with a church and several bleachfields, a tannery, and other mills. Pop. 1008.

LANGENBRÜCKEN, a much-frequented watering-place, Baden, circle Middle Rhine, on the railway, and about

18 m. E. Karlsruhe, with 14 springs, strongly impregnated with sulphur, the water in taste and smell, is very similar to that of Aix-les-Bains, 50° to 80° Fah. used in catarrhs, rheumatism, and nervous affections.

LANGENDIERBACH, a vil. Hesse-Cassel, prov. Hann., on the Fulda, with a little old castle, a synagogue, and manufactures of linen. Pop. 1539.

LANGENDORF, or Wawers, several places, Prussia:—1. Several nearly contiguous pls. prov. Silesia, gov. Breslau, circle Wartenburg, with a castle and a church, and several mills. United pop. 545.—2. A vil. prov. Silesia, gov. Oppeln, circle Tost, with a church, a castle and manufactures of pottery tile-works, and a trade in cattle. Pop. 1185.—3. (Ober- and Nieder-) A vil. prov. Silesia, gov. Oppeln, circle Neuma, with a saw and several other mills. Pop. 1548.

LANGENDORF (Ober- and Unter) two nearly contiguous pls. Austria, Moravia, circle, and 16 m. N.W. Olmütz, with a church, a castle, and a blast-furnace. Pop. 2102.

LANGENERRINGEN, a vil. Bavaria, circle Swabia, dist. Schwabmünchen, with a church, a chapel, and an infirmary. Pop. 1179.

LANGENFELD or LUNGENFELD, a market to Lower Austria, 6 m. N. Krems, with a church, a castle, tile-works, and a trade in wine. Pop. 1355.

LANGENHAGEN, a vil. Hanover, principality Calenberg, 8 m. N. Hanover with a church and a considerable trade in horses and cattle. Pop. 1410.

LANGENHESSEN, a vil. Saxony, circle Zwickau, bail. Werden. It has several mills. A good deal of yarn is hand-spun here. Pop. 1064.

LANGENHOF par Eng. Essex 2104 ac. Pop. 168
LANGENHORN a vil. Denmark, duchy, and 30 m. W. A. W. Schleswig, with a church and important horse and cattle markets. Pop. 2000.

LANGENLEURA,—1. (Oberheim) A vil. Saxony, circle, and about 30 m. E. Leipzig, with a handsome castle, a bleachfield, a trade in cattle, and several mills. Pop. 1154.—2. (Niederheim), A vil. Saxe-Altenburg near the town of Altenburg, with a church and five mills. Pop. 1636.

LANGENLOIS, a market to Lower Austria, 7 m. N.E. Krems, with a burgher hospital, and a considerable trade in excellent fruit and indifferent wine. A great part of the town was burned down in 1846. Pop. 8150.

LANGENUNGWITZ, Saxony, see Lönnewitz (Oder).
LANGENÖL (Mittel and Unter) a vil. Prussia, prov. Silesia, gov. Legnica, circle Lebus, with a castle and two churches, tile-works, and all other mills. Pop. 3875.

LANGENSALZA, a pl. to Prussia, prov. Saxony, gov. and 18 m. N.W. Erfurt, cap. circle on the Saale. It is walled, has six gates, a castle, three churches, four hospitals, a Latin school, bride-well, poorhouse, and orphan asylum; several courts and public offices, and manufactures of these goods, serge, honory starch, tapestry, and gunpowder and several dye-works and distilleries. Pop. (1846), 5389. Area of circle, 118 sq. m. Pop. 23 154.

LANGENSCHWABACH, Nassau, see SCHWABACH.
LANGESCHWARZ, a vil. Hesse-Cassel, prov. and 16 m. N. Fulda, with a church and a castle; inhabitants chiefly weavers. Pop. 1026.

LANGENSELD, a vil. Hesse-Cassel, prov. and 7 m. N.E. Hamm, cap. bail. on the Gröden, with two churches, a castle, and a synagogue, several distilleries, and a trade in cattle and wine. Pop. vil., 2549 bail. 6400.

LANGENTHAL, a vil. and par. Switzerland, cant. and 25 m. N.E. Bern, on the Langglen, in a fertile plain. It is well built, has a handsome church, conventual, and a large weigh-house, in which much butter and cheese are sold, and near it is a bathing establishment. Pop. 5180.

LANGENWEDDINGEN, a vil. Prussia, prov. Saxony, gov. and 4 m. S.E. W. Magdeburg, with a church, numerous quarries, and several mills. Pop. 1386.

LANGENWETZENDORF, a vil. Germany, Roman-Schlesien, on the Leube, 5 m. W. N. W. Grotz, with a church, manufactures of wool, several mills, and some general trade. Pop. 1704.

LANGHEIM, a vil. Baden, circle Middle Rhine, 11 m. N.W. Mannheim, on the Neckar, was crossed by a bridge, with two churches, manufactures of silk-ribbons, hosiery, and caps, and a trade in hops. Pop. 1980.

LANGHE-OGE, or **JANKE-OGE**, a name sometimes applied in common to three islands in the North Sea, off the coast of Norway, but more properly applied to the smallest of the three, which is in the centre, having the others, called *Westenrode* and *Osterrode* respectively on the W and E. It consists of sand and is surrounded by mudbanks.

LANGHEK a vil. Holland, prov. S. Holland 11 m N N W Grootenham, on the Lek, here crossed by a ferry. It has a large elegant church. (Pop. agricultural) 657

LANGHEWEHR, a vil. Rhensish Prussia, gov. and E. from Aix-la-Chapelle, with a church, polishing-mills, and large waterfalls. Pop. 1051

LANGSHUND, a seaport in Norway prov. Agderhus, built Brøderberg on a small bay of same name, 13 m W S W Lærviig, with a safe and commodious harbor at which a good deal of timber is exported.

LANGTIEBIE, or **DELAUNA TIEBOWA**, a vil. Bo hemia, circle Chruštin, on the railway from Vímna to Prague about 13 m. from Landekron with a school and a mill. P. 1253

LANGFORD several par. Eng.—1 Bedford 3100 ac. Pop. 883.—2 Berks and Oxford 4600 ac. Pop. 723.—3 Essex 1078 ac. Pop. 372.—4 Norfolk, 1405 ac. Pop. 41.—5, Nottingham, 3181 ac. Pop. 148.—6, (Duchess), Somerset, 1853 ac. Pop. 377.—7 (Ald.) Wilt 1011 ac. Pop. 35.—8 (Staple) Wilt 5841 ac. Pop. 634

LANGHAM, several par. Eng.—1 Essex; 2896 ac. Pop. 863.—2 Norfolk 1950 ac. Pop. 416.—3, Rutland 3350 ac. Pop. 639.—4, Suffolk 351 ac. Pop. 261

LANGHEIM (GROSS and KLEIN) two nearly contiguous vils. Bavaria, Lower Franconia, 18 m. Würzburg with a church, a chapel, important cattle-markets, a trade in dried fruit, and several mills. Pop. 2433

LANGHIRANO a vil. and com. Italy duchy and 13 m. S. Parma 1 bank Parma, with a primary school, tanneries and a trade in corn, cattle, wood, and hides. Pop. 4865

LANGHOLM—1 A bor. of harony market in and par. Scotland, co. Dumfries. The town on the Ekt 30 m. E. by N Dumfries, is well built, has a townhall and jail, an elegant parish church a Free and two U Presbyterian churches and a school. In the market place a monument to Sir Fultener Malcolm and on Langholm Hill is one to his brother Sir John. Pop. 1406 Area of par. 14,320 ac. Pop. 2990.—2 (New) A vil. adjoining the above, near the confluence of the Ekt with the Wanchope. It is lighted with gas; has a library, and woollen and linen manufactures. Pop. included in the parochial return.

LANGLEY several par. Eng.—1, Essex 1617 ac. Pop. 693.—3, Kent; 1474 ac. Pop. 860.—3, Norfolk 2728 ac. Pop. 813.—4, (Burwell) Wilt 1726 ac. Pop. 697.—5, (Mewes), Bucks, 3895 ac. Pop. 1874

LANGLOAN, a vil. Scotland, co. Lanark, 8 m. E. Glasgow with five iron smelting-furnaces. Pop. 1111

LANGNAU, three places, Switzerland.—1 A vil. in and par. cant. and 16 m. E. Bern on the life a tributary of the Emme and the most important place in the Emmenthal. It has a good-looking townhouse partly used as a school some weaving, and a considerable trade in linen and cheese, and near it is a very large wooden building used as an hospital and posthouse. Pop. 5681.—2, A vil. and par. cant. and 6 m. E. Zurich, on the Sihl, here crossed by a covered bridge. It has a church a blackfield, and a spinning and a flour mill. Pop. 1108.—3 A vil., cant. and 90 m. N W Lucerne in a flat and fertile district, 1 bank Wyger. Pop. 1574

LANGØEN, an isl. off N W coast Norway, Lofoden group, lat 69 N, and 14° 30' E, 15 m. N E to S W; breadth, about 5 m. Its coast is much indented, and near the centre, the island is nearly divided into two portions by arms of the sea, almost meeting from either side. Pop. 860

LANGOGNE [anc. *Langon*], a tn. France, dep. Lozère, near the source of the Allier 27 m. S Le Puy. It has an old church manufactures of woollens, and brass candlesticks, and a trade in mules and cattle. Pop. 3387

LANGON [anc. *Langon*], a tn. France, dep. Gironde, agreeably situated 1 bank Garonne, here crossed by a suspension-bridge, 34 m. S E Bordeaux. It is walled, and is built, but has fine walks; manufactures of silks and leather; and a trade in the excellent white wines of the district, in brandy, and ship timber. Pop. 2697

LANGOSCO a vil. and com. Italy Piedmont, div. Novara, prov. and near Lomellina, with a handsome church, a good courthouse, and elementary school, and a trade in corn, fruit, wax, honey, and silk. Pop. 1455

LANGPORT *LANGPORT*, a market tn. and par. England, co. Somerset. The town 10 m. S E. Bridgwater 1 bank Parret has two Established churches, an Independent chapel, free grammar and national schools a public reading-room, and subscription library; a considerable manufactory of gloves, and a good trade by the Parret, here navigable for barges of 40 tons Area of par., 171 ac. Pop. 1117.—(Local Correspondent)

LANGRES [anc. *Andemantum Langones*] a tn. France, dep. Haute-Marne, near 1 bank Marne, 17 m. S S E. Chaumont. It occupies a steep hill commanding the entrance from the basin of the Saône into that of the Seine and has the highest level of any town in France, except Brimont. The town is nearly oval, and is generally well built, with wide, regular and clean streets. Its cathedral and to date from the year 880, is of mixed styles, chiefly Romanesque but partly Gothic. It has also a handsome modern townhouse, a museum occupying the old church of St. Didier, a library of 7000 volumes, and a fine promenade. Langres is the seat of a bishop and has a mercantile court and a communal college manufactures of excellent cutlery, which has procured it the name of the French Sheffield, breweries and vinegar-works and a considerable trade in corn, flour, wax, flax, hemp, cattle, whestones, &c. There are few French towns in which a greater number of Roman remains have been found. Pop. 7636

LANGRIDGE par. Eng. Somerset, 650 ac. Pop. 91

LANGRUNE-SC-MEX [Latin *Longrunum*] seaport tn. France, dep. Calvados, 10 m. N. Caen, on the English Channel with an interesting parish church, built in the 13th century and a bathing establishment. Pop. 1307

LANGSIDE, a vil. Scotland, co. Renfrew 3 m. S. Glasgow remarkable as the scene of the defeat in 1558, of the troops of Queen Mary by those of the Regent Murray

LANGUEDOC [anc. *Narbonensis Prætor*] an extensive and beautiful prov. France, now forming depts Aude, Tarn, Hérault, Lozère, Ardèche and Gard, as well as aronde, Toulouse and Villefranche, in dep. Haute-Garonne and aronde Puy and Yvelingaux, in dep. Haute-Loire Under the Romans it was one of the seven provinces of Gaul which had the freedom of Italy. The Goths obtained a grant of it from the Emperor Honorius, and retained possession for nearly two centuries. The Saracens afterwards became its masters, but were expelled by Charles Martel in 720. From the Counts of Toulouse it passed to Philip the Bold, and was finally united to the French crown in 1381

LANGWATHEY or *LONGWATHEY* par. Eng. Cumberland 1887 ac. Pop. 392

LANGWITTH Urry, par. Eng. Derby 1600 ac. P. 196

LAÏO, a river China, which rises in the Mountains of Iochan in Mongolia, flows S S E into China passing traverses the N E. of pref. Potosi, passing the town of Yung-Ping, and falls into the Gulf of Potosi near its E. entrance, after a course of about 800 m., during the upper part of which it bears the name of Chantou. It receives a number of important tributaries chiefly on the left.

LANHYDROCK, par. Eng. Cornwall 1755 ac. P. 231

LANHORN-EGAN, par. Eng. Cornwall 2369 ac. Pop. 410

LANIVET par. Eng. Cornwall 5398 ac. Pop. 1140

LANJARON, a tn. Spain, Andalus, prov. and 24 m. S S E. Granada. It is well built, has a spacious central square, a disfigured church, two chapels a substantial townhouse, prison, two schools, a stonehouse and manufactory of linen, ribbon, lace, soap, brandy, wine and oil, some transit

trade in metals and other merchandise; but chiefly noted for its salt, asphaltum springs and baths. Pop. 3236.

LANLIVIER, par. Reg. Cornwall 6790 ac. P. 1719.
LANLIVIER, a vil. France, dep. Finistère, 21 m. N.E. Brest, with two churches of the 11th century. Pop. 820.

LANNIGN (anc. *Lannion*), a seaport in France, dep. Côtes-du-Nord, 86 m. W.W. St. Brieux, on bank Gize, a little above its mouth in the English Channel. It is built on a hill, with steep and narrow streets; has a court of first resort, an agricultural society, and a commercial college; and a harbour of easy access, carries on a considerable trade in corn, hemp, flax, thread, hampstead, butter, tallow, wool, cotton, timber, and colonial produce; and has manufactures of linen, hats, ropes, hampstead, and calicoes. P. 5491.

LANNOY, a tn. and com. France, dep. Nord, 9 m. E.N.E. Lille. It was once fortified, and regarded as one of the keys of Flanders. It has a church, the remains of an old castle, manufactures of cotton and woollen stuffs, a brewery, and several cotton and silk mills. The soil is much cultivated in the vicinity and fetches high prices. Pop. 1855.

LANNEATH, par. Reg. Cornwall 4678 ac. P. 603.

LANSALES, par. Reg. Cornwall, 2986 ac. P. 690.

LANSDOWN, an elevated plain, England, or Somerset, 2½ m. N.W. Bath, noted for its excellent breed of sheep. It gives the title of marquis to the family of Petty.

LANSHIRE, a vil., U. States, New York, 10 m. N.N.E. Albany, on bank Hudson. It is regularly laid out has seven churches, an academy, a copper and iron foundry, all floor-cloth, brass, gun and rifle factories, several mills, and a mill, and some trade on the river. Pop. 3330.

LANITZ, a market in Hungary, Hither Danube, on and 7 m. from Pressburg on the Schwarzwasser. It has a parish church, a castle with three gilded towers, and a trade in wine. Pop. 2060.

LANLFOUR, a tn. France, dep. Savoy, prov. and E. Maurienne, on bank Arve, at the foot of the N. slope of Mont Cenis. It is completely enclosed by mountains, covered with pine forests and has two churches, an hospital, and some trade in cattle and dairy produce. Pop. 1650.

LANIADILLA, a tn. Spain, Leon, prov. and 24 m. N.E. Palencia, on bank Pisuerga here crossed by a magnificent bridge of nine arches. It is poorly built, containing for the most part of wooden houses, and has a church, a courthouse, primary school and hospital; manufactures of linen, a flour-mill, and a trade in agricultural produce. P. 1040.

LANIAO, or **LANIAO**, an isl. China Sea, at the mouth of the Canton river about 10 m. W. Hong Kong. 15 m. long, and 5½ m. broad. It is protected by a small fort; and at its S.W. extremity is the village of Tyho, where is a creek, or rivulet, into which a boat may go at high water.

LANTEGLAS, two par. Reg. Cornwall—1, (dep. Cornwall), 3061 ac. P. 1740—2, (dep. Cornwall) 3120 ac. P. 1260.

LANTEBNE, a river France, which rises near a hamlet of same name, frontiers of dep. Vosges, enters dep. Haute-Saône; and, after a S.W. course of 28 m., of which about 15 m. are extensively used for forage, joins the bank Saône.

LANTOUCA, a vil. and com. France, dep. Alpes Maritimes, 20 m. N. Nice, on bank Var, with four churches, a convent, an hospital and some trade in cattle. P. 2245.

LANTWIT Lower-Jetty-Strait, par. Wales, Glamorgan, 10,990 ac. P. 1992.

LANTWIT MAJOR, a vil. and par. S. Wales, on Glamorgan. The village, 4 m. S. by W. Cowbridge, irregular well kept, is built generally of the Manselton has a church, and is said to be the oldest in Wales. There are also various interesting places of worship, a national and a British school and a reading association on old townhall, in the Tudor style, several antique houses, and the ruins of many ecclesiastical and other buildings. Area, 5238 ac. Pop. (chiefly agricultural) 1071. (Local Correspondent.)

LANUSEI, a tn. Isl. Sicily, 4½ m. and 30 m. N.N.E. Cagliari, cap. prov., on an elevated plain. It is indifferently built, streets above are generally ill paved and dirty and has a parish and three small churches, a convent, a primary school, and a trade chiefly in wine and agricultural produce. Pop. 1783.

LANKADOTE, the most N.E. of the Canary Isles, about 20 m. from the coast of Africa; lat. (N. W. point) 29° 2' 45" N.; lon. 15° 45' W.; greatest length, N. E. to S.W., 64 m.;

mean breadth, about 15 m. It is lined on the N.E. and E. by a number of rocky islets. The surface, though not elevated, on the whole presents a very bold face to the sea.

Its basaltic cliffs in some parts rising to the height of 1600 ft., and it contains several mountains, the loftiest of which, Western Hill, is 3000 ft. They are all of volcanic origin, and several of them still are, or have recently been active. The most celebrated of them, called Tennyss in 1790, commenced a series of eruptions, which, continuing with intermissions for seven years, spread devastation over the most fertile and best cultivated part of the island; and, in 1894, three other volcanoes burst forth. The cultivable part of the surface consists of the low hills, and some considerable plains; and being formed of decomposed lava, is of extraordinary natural fertility, producing the most luxuriant crops in rainy years. Unfortunately, however, these return only at intervals; and the drought often is so extreme, and continues so long, that the crops, and almost all vegetation, are entirely destroyed. There are no perennial springs, all the fresh water is collected in cisterns, when rain happens to fall. The principal products are barley, wheat, maize, rye, vegetables, potatoes, and wine.

Of the last, in good years, about 1500 pipes are produced, some of it equal, if not superior, to any other wine grown in the Canaries. The chief minerals are ironstones, sulphate of soda, and sulphate of iron, none of them of much economical importance. A considerable number of the inhabitants used to be employed in collecting and preparing brimstone for export; but in recent times that branch of trade has almost entirely ceased. There are no manufactures of any consequence. The inhabitants are in general robust and laborious, but for the most part are very indolent, churlish, and extremely ignorant. Lankadote is subdivided into eight parishes.

Teague, in which the governor resides, is considered the capital, but almost all the trade is carried on at Arevalo, which, in 1822, was declared a free port. Area, 824 sq. m. Pop. 10,570.

LANZO (Lat. *Lancum*) a tn. Italy, Piedmont, div. and 16 m. N.W. Turin, on bank Tanio, and on bank Stura, here crossed by a very ancient and lofty bridge, at the entrance of three valleys of same name. It has a court of justice, a handsome parish and several other churches, a convent, a college, and manufactures of ironware; and a trade in iron, hides, wax, cheese, and cheese. Pop. 5335.

LAODICEA, five places, Asiatic Turkey—1 (old *Lazium*), now called by the Turks *Kala Mazar*, (Old castle) an ancient ruined city, Asia Minor, once cap. of Greater Phrygia, 120 m. E.S.E. Smyrna, lat. 37° 56' N. lon. 29° 15' E. the site of one of the seven primitive Christian churches of Asia. Nothing but very extensive ruins of inferior architectural merit remain to point out the locality of this interesting city. They comprise three theatres, one of which is 450 ft. in diameter; a stadium, a gymnasium, and an agnecus, but the principal remains are the vast walls. "Nothing," says Mr. Hamilton, "can exceed the suddenly appearance of the site of Laodicea, no picturesque features in the nature of the ground on which it stands relieve the dull uniformity of its surrounding and barren hills."—2, (old *Mure*). See **LAODICEA**.

—3, (Constantinople) See **LAODICEA**.—4, (old *Lazium* or *Laodicea*), an ancient city of Syria, founded by Seleucus Nicator, which stood to the N.E. of Damascus, in a plain watered by the Marous.

LAON (anc. *Belva Sanctonensis*) a tn. France, cap. dep. Aisne, 74 m. N.E. Paris, situated on an isolated height in the midst of a large and fertile plain covered with verdure. It is surrounded by walls and ramparts, which are about 4 m. in circuit, and afford a beautiful promenade, but the town is insignificant, and for the most part, very poorly built, though many recent improvements have been made. The principal edifices are the cathedral, of very large structure, probably of the 12th century, surmounted by two square towers, but not of much architectural merit; the church of St. Martin, of the 12th century, with an extremely simple interior, the Hotel de Prefecture, once a monastery, which had seven churches within its enclosure, and was occupied by 100 monks; the Hotel Dieu, an extensive and well-furnished hospital; the public library, containing 15,000 volumes, and some rare MSS.; the townhouse, college, theatre, barracks, &c. The chief manufactures are silk, lace, common woollen cloths, blankets, and women's caps; the trade is in corn and wine, and there are 4 animal skins. Lace is an important art, and pro-

houses a court of first resort a communal college, an ecclesiastical seminary, besides other educational and several charitable establishments. The most distinguished natives are Lothairs.

LAOS CATHEDRAL.—From *Revue Vagabonde* d'Anthonie Fournier.

king of France in the 10th century. St. Remy, archbishop of Rheims, and Mocheux, the celebrated conjuror of Delanbes in the trigonometrical survey. In 1411 it was taken by the Duke of Burgundy after a three days siege and in 1419 it was taken by the English, who were expelled from it in 1429. In 1594 it was taken by siege by Henry IV. Bonaparte sustained a defeat here in 1814. P (1846), 804c.

LAOS or LAO a very little known country of S.E. Asia, the limits of which though not precisely known, are generally considered to be lat. 15° to 24° N. lon. 97° 47' to 106° E., having the Chinese prov. of Yunnan N., Assam E., Siam and the Tennessean provinces S. and Burmah W. It is intersected N. to S. by various mountain ranges between which are extensive alluvial plains, watered by large rivers flowing parallel to the mountains, and having their source in China and Tibet, and terminating in the Gulf of Siam and the China Sea. The principal rivers are the Me-nam-Kong or Mekon, the Man-ton and the Menam, all of which are joined in their courses by numerous large tributaries. The mountains are said to be rich in gold, silver, iron, tin, lead, and rock-salt, while rubies and emeralds are found in the vicinity of Loumbeng, the capital. The plains are covered with swamps and stagnant pools, arising from the frequent overflows of the rivers, yet they are fertile, yield excellent rice, not mixed, however, in sufficient quantity for the population, and the crops of which, and of other vegetable produce, are often destroyed by the floods. The forests are extensive, and contain many magnificent trees, among which are the varnish tree and the palm, the former of which stains here the almost perfection. The principal domestic animals are bullocks and horses; the former are numerous and strong limbed though small, and the latter much esteemed. The wild animals include the royal tiger and the rhinoceros deer also abound in the forests. We have no account of the manufactures of the country, or whether they have any beyond the domestic weaving of silk and cotton stuffs for family use, and the preparation of lacquered wares, in which they excel. The silk worm is reared in the country, but the produce is coarse, the best silks being imported from China. Laos carries on a considerable trade with Siam, Burmah, and China, exporting slaves, ivory, gold, silver, tin, lead, precious stones, lac, gum, benzoin, silk, hides, opium, wax, &c., and receiving in return from Burmah, teacup, pepper, yellow and red sandal wood, cotton cloth, chinaware, turpentine, opium, &c.; and from China, large quantities of silk, partly for re-exportation to Burmah but much is also used in the country, the richer classes never being without a full dress of the finest silk. The natives are peaceful and industrious. — (*Geographical Journal*, Dec. 1890.)

LAOUR, a m. Hindostan, prov. Bengal, on an affluent of the Ganges, 110 m. N. N.E. of Calcutta. It has a considerable

trade with Garrows in salt and other articles, and has, in the hills in the vicinity, innumerable beds of limestone, from which Dolgal is chiefly supplied.

LAPAK, one of the Sooloo Is., lat. 5° 55' N. lon. 151° E., length N. N. E. to S. S. W. about 6 m. It is of triangular shape, lofty and well wooded, and, with Silanai, W. of it, furnishes a roadstead, with shelter from the S. W. and N. E.

LAPFORD par Eng. Devon 8819 ac. Pop. 766

LAPIO a m. Naples, prov. Principato Ultra, 14 m. W. N. W. St. Angelo dei Lombardi, on a hill. Pop. 2820.

LAPLAND (native, *Saamen*, Swedish, *Lappmark*, Russian, *Lapland*), an extensive territory in the N. of Europe, stretching between lat. 64 and 71° N. and from the shores of Norway E. to those of the White Sea, area, about 180,000 sq. m., of which more than a half situated E. of the Turell and by tributary Murien, belongs to Russia, and the remainder is shared, in nearly equal proportions, between Sweden and Norway. As Lapland is not the name of any great political division a particular description of its different portions must be looked for under the names of the states to which they belong and it may therefore be sufficient here to observe, in general, that both from geographical position and physical conformation Lapland is one of the most forbidding regions of the globe, consisting either of rugged mountains, some of them covered with perpetual and many of them only for a short period free from snow or of vast monotonous tracts of moraine wastes. This extensive territory appears to have been at one time wholly occupied by the people to whom it owes its name but its S. and better portions have been gradually encroached upon by Norwegians, Swedes, and Finlanders, till the Lapedians proper have in a great measure been scooped up within the Arctic circle. There they retain their distinctive features and ancient customs and find ample scope to follow their favourite mode of life either as Fjeld-Finners, Mountain Lapedians, leading a nomadic life, and pasturing large reindeer herds or Sjö-Finners, or shore Lapedians, who, too poor to possess such herds have been obliged to fix their

THREE LAPEDIANS. S. S. MOUNTAIN LAPEDIANS. From the *Illustrated Traveller*, through Sweden, Norway and Denmark.

residence upon the coast, and subsist chiefly by fishing. The origin of the Lapedians, as a race, has greatly puzzled ethnographers, in consequence of their possessing a combination of physical properties not possessed exclusively either by the Mongolian or the Caucasian stock, but belonging

ply to the one and partly to the other. The prevailing opinion, however, is, that they are only a variety of Tschade, or Flena. Their chief characteristics are—low stature, seldom exceeding 4 ft. 9 inches in height; great muscular power, exhibited both in their agility and in a strength of arm enabling them to bend a bow which an ordinary Norwegian could not touch; a large head; dark, long, and glossy hair, small brown eyes, obliquely placed, and without eyelids, high cheek bones, with small, with ill-defined lips, a sandy beard and a skin of a yellow dingy hue, probably rendered deeper than nature has made it, from living in smoky cabins, and neglecting habits of cleanliness. Their dress, at least that of the Mountain Laplanders is composed almost throughout of reindeer skin. With the hair turned outwards, it forms an upper cap, a kind of trowsers, sandals and shoes, gloves and a couical cap. In summer, the reindeer skin is often exchanged for a woollen coat, which, in the female, is converted into a kind of pelisse, and reaches to the ankles. The cap of the female also is distinguished by its leather peak, and some attempts at ornament; and her shoulders are not unfrequently covered with a small shawl or pelt, on occasions of display. The Laplanders are not deficient either in intellectual or moral capacity. They are simple-hearted, hospitable, and apparently inclined, as far as their knowledge goes, to practice the duties of Christianity which they all profess, under the form of Lutheranism in Norway and Sweden and that of the Greek Church in Russia. The greatest exception to this practice, is an excessive fondness for ardent spirits. A more heinous vice is the excessive use of tobacco. The number of Laplanders is not supposed to exceed 20 000 of all descriptions. Probably one-third of them are nomadic.

LAPLEY, par Eng. Stafford 2450 ac. Pop. 962

LAPLOS, or **LARVA**, a river Austria, in the N. of Transylvania. It flows W. N. W. and, shortly after entering Hungary joins r. bank Sannos, about 2 m. N. E. of Erdős heads; total course, 40 m.

LAPOG-HARTY, or **BRZANZURU**, a vil. Austria, Transylvania, near the source of the Lajos, 20 m. E. R. E. Nagy-Banya, with a church, and near it iron mines. Pop. 1019

LAP8 (Pezán), a vil. Hungary Hither Thale, on Elpe, in a mountainous district, about 45 m. from Leutschau with a church. Pop. 1015.

LAPWORTH par Eng. Warwick, 2971 ac. P. 682

LAR, a la Perma, cap. prov. Larutan, 178 m. S. E. Siam, on the great route thence to Behobochian lat. 21° 20' N; lon. 101° 55' E. The houses in general are conical, and mostly thatched, and the houses which is very noted; it is said to be one of the handsomest structures of the kind in Persia. The khan, or governor resides here in a mansion surrounded by a strong wall, and flanked with towers. Behind the town, on the summit of a hill, are the ruins of a castle. Arms, gunpowder, and cotton fabrics, are manufactured here to a small extent. Pop. estimated at 12,000

LARACOE, par. Ind. Month, 8335 ac. Pop. 2254.

LARAGHETAN par Ind. Month, 8041 ac. P. 2721

LARAH par Ind. Month, 7123 ac. Pop. 3678.

LARANEIRAS, or **LA RAVI**, prov. Savigne, L. bank Goulis, 15 m. from the Atlantic, with a church, hospital, two primary schools, and a bar-horn assemblage to shops, which lead with cotton, linen, and other produce. Pop. dist. 3000.

LARANTOEKA, a N. Indian Archipelago, E. and lat. Flores, on the Flores Strait, inhabited by native E. Catholics. The inhabitants of Timor, the Bugis, &c., carry on a good trade here, obtaining rattan-wood, wild cinnamon, and birds nests, which they convey chiefly to Singapore.

LARAT, an isl. Indian Archipelago, one of the Tondian group, off the N. E. coast of Thauri Lani, with which it is connected by a reef. It is about 25 m. long by 10 m. broad. On its N. W. side is the village of same name; the only other village is named Kokobor.

LARAX, a river France, which rises in a ramification of the Pyrenees, in N. E. of cap. Huesca-Pyrenees, flows N. N. E. across dep. Gorn, enters Tarragona, and joins L. N. E. Girona; total course, 70 m.

LARENET par Ind. Month, 2700 ac. Pop. 6006.

LARENA, a river Italy which rises near Santho, Duchy of Parma, flows N. N. E. and joins r. bank Po, 7 m. S. Cremo, total course, 25 m.

LAREDO, a tn. Spain, Old Castile, prov. and about 8 m. from Logroña, L. bank Ebro; with a church, primary school, hospital, several oil and flour mills, and a trade in corn and fruit. Pop. 1985.

LAREDO, a tn. and port, Spain, prov. and 20 m. E. Santander r. bank Arca, on the Bay of Biscay. It is well built, defended by a fort and bastions, has three squares, many churches, some casap; a Latin and three primary schools; a handsome and spacious town-house, custom-house, hospital, prison, convent; and manufactures of linen, wool-lens, hats, chocolate, socks, fish-hooks, &c. Fishing is actively carried on, but the trade of the port otherwise is unimportant. Pop. 3156.

LAREK, LARABE, or LAREHSE, an isl. Persian Gulf, 5 m. S. E. the E. end of Kish; greatest length, 54 m.; breadth, nearly 4 m. It is of an elliptical form, tolerably elevated, has a barren soil, and very few inhabitants.

LAREN, two vils. Holland 1-1, Prov. Gelderland, 9 m. E. N. E. Enghien, with an elegant church and a school. Pop. 512-3, Prov. N. Holland, 15 m. E. S. E. Amsterdam; with two churches, and a school. It has manufactures of linen, half-cloth, and cottons, and some trade, but the main occupation is agriculture. The brothers Roland and Pieter van Lare, the painters, were born here. Pop. 1955

LARGENTIERE [anc. Argentina] a tn. France, dep. Ardèche, on the Ligne, 20 m. S. E. W. Privas. It has a Gothic church, adorned for its simplicity, and eight airy apartments; manufactures of silk, and silk thread, and leather, and a trade in silk wine and cattle. Largentiere has obtained an unenviable notoriety, from the active part it took in the wars of the Albigeans; its name is derived from silver mines formerly worked in the vicinity. Pop. 2700.

LARGO, a par. including two vils. Scotland, on Fife, 1-1, Lower Largo, a small vil. Situated at the head of Largo Bay, Fifth of Forth, 11 m. S. W. St. Andrews. It is much frequented for sea-bathing and has a harbour, with steamboat communication to Newburgh. It has formerly a considerable shipping trade, but this has long since languished. Largo is noted as the birth-place of Alexander Selkirk, the Robinson Crusoe of Da Fro, who was born there in 1676-2, Upper Largo, or the Kirkton, a little N. E. from the former, contains the parish church, an ancient Gothic structure, and as hospital for twelve old men. Sir John Leslie, the mathematician, was born in Upper Largo. Area of par., 6820 ac. Pop. 2800.

LARGO, a small port, and much frequented sea-bathing in Scotland, co. Arg., on E. shore Firth of Clyde, 23 m. W. S. W. Glasgow. It is composed chiefly of a line of handsome houses, many of them elegant mansions; facing the sea, and a number of narrow, sometimes tortuous, and frequently dirty streets, to the rear of the sea-front, with the burying ground near the centre of them. It has a parish, a Free, a U. Presbyterian, and an Episcopal church several schools, a reading-room, and baths. A considerable number of the inhabitants are hand-loom harness weavers, and in comfortable circumstances, many of the females are employed in sewing muslins, and the white silk and herring fishery are actively prosecuted. The boats are daily being increased by steamers, with Glasgow &c., the harbour is small, and chiefly frequented by barrow-boats, and other small craft. In 1365, Alexander III. defeated the Norwegians, under Haco, in the vicinity. Pop. 2234. Area of the par., 24,160 ac. Pop. 2715

LARH, 1-1, a tn. Tuscany, 15 m. E. Leghorn; with a court of justice, a church, and an old castle. Pop. 1901-3, a tn. Africa, Egypt, on a height, above the N. W. shores of Lake Tihah. It consists of round huts, with conical roofs, and fenced round with ram enclosures. The women are generally employed in spinning cotton, and the men in fishing on the lake. Pop. about 1000.

LARINU a tn. Naples, prov. Salerno, 22 m. N. E. Campobasso. It is the see of a bishop, and has an annual fair.

LARISSE (Turkish, Zender), a tn. European Turkey, cap. prov. Thessaly, 87 m. E. by N. Trikala; lat. 39° 29' N; lon. 22° 40' E. (c.), r. bank Hellespont, or Salsaputra [anc. Parnus], here spanned by a handsome stone bridge of 10 arches. It is well built but contains chiefly only a number of shops, warehouses, and fifty churches, and a small number of carpenter and wooder houses. In the vicinity of the town is an open area.

in which are several basins, indifferently supplied, particularly with meagre good. It has two or three mosques, a Greek metropolitan church, three baths, a khana, and manufactures of cotton, silk, and morocco leather, and dye-works, noted for their red colours. Larina is supposed to occupy the site of the ancient city of the same name, one of the most flourishing in Thessaly. Pop. estimated at 20,000.

LARISTAN, a maritime prov. Persia, lat. 26° 30' to 28° 30' N.; lon. 52° 30' and 55° 00' E., bounded N and W by prov. Fars, E. by Kirman, and S. by the Persian Gulf; greatest length, E to W, 210 m., greatest breadth N to S, 120 m. A range of mountains stretches along its N. boundary S.W. to N.E. It has few rivers—the Nahon, the principal stream by which it is watered, merely passing through its S.W. corner. The lower or S. portion of the province is an arid desert, diversified by rocky mountains and valleys of sand and salt. In the upper or N. parts, there are some fertile tracts, which produce dates and other fruits, and also grain. The coast is inhabited by independent Arabs, who subsist chiefly by piracy. Its capital is Lar.

LARKER, a river, England, rises in co. Suffolk, and flows N.W. to the Ouse near Ely, in Cambridgeshire. It is navigable from its confluence with the Ouse to Eury.

LARKHALL, a vil. Scotland, co. Lanark, 12 m. S.E. Glasgow, with an Established and a U. Presbyterians church, and two schools. Pop. (chiefly weavers), 1809.

LARKHANA, a tn. Bunde, on a great canal, 150 m. N.W. Hyderabad; lat. 27° 30' N., lon. 68° 18' E., in a fertile and highly-cultivated district, forming probably the finest tract in Bunde. It is rudely fortified, having, at its W. end, a mud fort or citadel, which was once the head depot of the artillery of the Amers of Hyderabad and has a large and well-supplied bazaar containing nearly 400 shops, manufacturers of silk and cotton, and an important trade greatly favoured by its situation on the great route from S. Bunde towards the Bolan Pass. A little E. on the banks of the Nara, is the ruined fortress of Mahuta, occupying a high mound. Pop. about 12,000.

LARKING prov. Eng. Norfolk 1548 ac. Pop. 319.

LARNE, a large market town, co. Down, Ireland, on Antrim. The town, on N. shore of Lough Larne, 18 m. N. by E. Belfast, is composed of one long, regular and some narrow and badly kept streets, with very slung and uncomfortable-looking houses. It has an Episcopal church, a R. Catholic school, and several dissenting places of worship, a national school, and a dispensary. The manufacturing and bleaching of linen are carried on, both agricultural produce and lime are exported; and coal timber, and slate are imported, but manufactures and trade have suffered from the growing importance of Belfast. The quay are on both sides of the Lough, about 1 m. below the town, the depth of water not being sufficient to float vessels higher up. Larne is now much resorted to during summer as a watering-place. Pop. 3245. Area of par. 3210 ac. Pop. 8561.

LARNICA, or **LARNAGA** [anc. *Oikumen*], a tn. S. coast of Cyprus, lat. 34° 55' 12" N.; lon. 32° 37' 45" E. (a.), 25 m. S.E. of Nicosia, on a marshy plain about 1 m. from the shore, and consisting of an upper and lower town. The latter, commonly called the Salina of Larnica, is chiefly occupied by warehouses and houses, and by the houses of the merchants and traders, common, portico, and houses; a convent, a mosque, and a chapel. In the upper town are a cathedral and a convent. The houses in both have a green appearance, and the streets are commonly in a filthy condition which together with the pestiferous exhalations of the neighbouring marshes, render Larnica an exceedingly unhealthy place of residence. The intermediate space between the two towns is occupied by gardens and meadows, amongst which many families of ancient walls and other remains are met with. There is here a dilapidated citadel of a square form, in which a few pens are kept for milking vessels. Water is scarce, what supply there is, is conveyed into the town by an aqueduct. The roadstead is open, but the ground good. An embargo to be laid in from 20 to 30 dhams. The trade is limited; exports—wheat, cotton, silk, wine, and drugs; imports—rice, and sugar from Egypt; cloth, hardware, and colonial produce from Malta, Smyrna, &c. Pop. 6000.

LAROCHE, a tn. Belgium, prov. Luxembourg, on a flat, surrounded by rugged heights, one of which is covered by

an old ruined castle, r. bank Ourthe, 40 m. N.W. Arlon. It was once the capital of a county of same name; contains a church, with six chapels, a courthouse, and an hospital and has manufactures of mattresses, two breweries, a tannery, a saw and a flour mill. Pop. 1515.

LAROGES, a vil. Spain, Andalusia, prov. and about 50 m. from Granada with a church, two hermitages, a primary school, courthouse, wretched prison, two distilleries, two oil and four flour mills. Pop. 1249.

LARRAGA, a tn. Spain prov. Navarra, on a height crowned by a castle of the Duke of Alba, 21 m. S.W. Pampeluna. It has a church, townhouse, hospital, primary school, a flour-mill, and a trade in corn, oil, and wine. Pop. 1494.

LARRINGE, a vil. and com. France, dep. Haute-Savoie, prov. Chablais 3 m. from Evian, with a church, ancient castle, and a trade in fruit and cattle. Pop. 1141.

LARUNE, a tn. France dep. Basses-Pyrénées 16 m. S.E. Oloron. Fine woods, and other marine timber, are hewn on the neighbouring mountains, and brought down here preparatory to removal. Pop. 1464.

LARVEGO, a vil. and com. Italy, Piedmont, div. Genova near the heights of the Bormio. Pop. 2844.

LASALLA, a tn. France, dep. Gard, 19 m. from Nîmes with manufactures of hosiery and worsted silk, tanneries, silk mills, and valuable gypsum quarries. Pop. 1844.

LASHGIRD or **LASHKARD** a tn. Persia, prov. Khorasan dist. Semnan, 106 m. E. by S. Teheran, in a fertile basin. It is defended by a mud fort. The inhabitants live chiefly by gardening and agriculture.

LASHAM, par. Eng. Hants 1769 ac. Pop. 258.

LASK, a tn. Poland, 49 m. S.E. Kielce, on the Niewolna with two churches, a synagogue, and hospital, manufactures of coarse woollens and hats, and some general trade. Pop. 1850.

LASKAFALL, or **LASKAFELD** a vil. Hungary, Thither Danube, co. Banya, 5 m. S.W. Darda, with a distillery, brewery flour-mill, and a trade in corn and cattle. P. 1019.

LASKO a vil. Hungary Thither Danube, co. Banya, among marshes, 9 m. N.E. Esek with a church, a saltery and a sugar-mill. Pop. 1361.

LARNE (LARNIA or LARNER) a vil. and com. Belgium, prov. Brabant, 12 m. S.E. Brussels, with manufactures of linen, a brewery, and a flour-mill. Pop. 1868.

LAROE an isl. Denmark, in the Kattegat, off N.E. coast of Jutland, lat. 57° 18' N., lon. 11° E. 13 m. N.W. to S.W. breadth, 4 m., area, 32 sq. m. It lies low is surrounded by shoals and, being in the direct line of the navigation of the Kattegat, is extremely dangerous to shipping. It is, in many places, covered by loose and which has nearly overwhelmed the whole parish of Hald, and left only part of the church steeple visible to form a landmark. The men of the island are chiefly employed in fishing and leave the cultivation of the ground to its women. It is divided into three parishes. Pop. 2400.

LASSA, or **LASSA** (*Lao-San*, Seat of the Divine Intelligence) the cap. city of Tibet, in its E. division, Wa Tsang, on both sides of the Galdan, a tributary of the Dang-po, in a fertile plain, enclosed on all sides by lofty heights, lat. 28° 30' N., lon. 91° 40' E. The city proper consists of wide, regular and clean streets, with mostly large houses of several stories, built of stone, brick, or earth, terraced at the summit, and uniformly whitened externally, and the windows and door frames painted with the sacred or *lamegong* colours, red and yellow. But prepossessing as may be their outward appearance, M. Kun, who visited Lassa in 1846, states that internally they are dirty, smoky, comfortless, and in his own words, 'whitened sepulchres.' The suburbs are also filthy. In one of these, the dwellings are odd little huts of the hams of sheep and bullocks, ornamented with lime. All the public edifices, worthy of notice, are connected with Buddhist monasteries, thus being the great seat and centre of the Buddhist religion. In the heart of the city is the convent of Meru, with a large printing establishment, from which numerous religious works are issued; and, on the outskirts, toward the cardinal points, are four other large monasteries—Frasling on the W., Sera on the N., Khalden on the E., and Samle on the S. or S.W. side. About 12 m. N.W. from the city, and connected with it by two avenues of trees, is the Botala, or Buddhist, this is the residence of

the Dalai or Tald, (Grand) Lama, the supposed incarnation of the god Buddha, and the ecclesiastical sovereign of Tibet, and supreme possessor of the vast regions forming central E., and S.E. Asia. A triple-peaked hill here rises sharply out of the plain to the height of 867 ft.; it is covered with convents and cells of monks, and in the centre is the palace of the Tald Lama—a fine edifice, four stories in height, with a vast number of apartments, and a large dome, which, like the columns of the porphyry surrounding the structure, is covered with gilding. The interior is said to be full of idols, treasure, and works of art. Gerbiell remarks:—“There is perhaps no spot on the globe where so much gold is accumulated for superstitious purposes. The offerings are enormous; the treasury, unlike that of W. nations, increases every year and the Tald Lama is said to be the most opulent individual in existence. Adjacent to it are several other temples and palaces, obelisks, a pyramid, a lake, on an island in which is an octagonal palace of fine brick, a park belonging to the Grand Lama, and, about 5 m. N., another park of great beauty filled with cedars and yuccas, and where he passes a part of the summer. The Preebong monastery is also very richly decorated; it is resorted to especially by Mongol lamas, who aspire to take ecclesiastical degree, and to it also the Tald Lama usually resorts. The Sera, on a declivity flanked with holy trees, contains three monasteries, each temples several stories in height, half thoroughly fixed with gilding, and a mass of meteoric iron which is the object of much veneration. The Khaldan was founded by the Buddhist reformer Tsong-kaba, in 1409, and the Ramse convent was formerly the residence of the civil sovereign of Tibet. All these monastic establishments have several thousand inmates, being generally resorted to from China, Turkestan, Nepal &c. as schools of philosophy and Buddhism. Their precepts and those of the Buddhists are, are frequented by a silent crowd of students, but within the city proper are all the bustle and activity of a great seat of commerce. Many Cashmerian and some Chinese and other merchants, are settled at Lassa, which is the principal emporium of Tibet and a rendezvous of people from all parts of Asia. Silk stuffs, tea, and all other Chinese produce are here exchanged for Tibetan, Indian, and European goods. Cashmerian shawls shawl wool, musk, yak-tails, sable furs, raw silk, dried fruits, beezars, sugar, sweetmeats, ballion, glass, and cutlery, with woollen cloth, velvet, flannel, roaneries, idols, incense rods, manufactured in the city and previous stores, and polished are principal articles of trade. The most wealthy merchants and bankers are Mahomedan settlers from W. Tibet, and contiguous countries, all the workers in metals, jewellers, dyers, and chemists, are Nepalese or Bootmans: each foreign nation has its allotted quarter. All the petty shopkeepers are women, who expose their wares for sale in the open air and, according to a national custom, disguise their features in public, by covering their faces with a dark varnish. Lassa has its own mint for silver coinage, which, with lagsos of gold and silver, constitutes the sole currency. In the vicinity are many good detached residences of lay nobility, and well-embowered gardens and no other part of Tibet appears to be so fertile as the district of Lassa. The Chinese soldiers maintained in the city are very few, but at Djibed, between 2 and 3 m. N. several thousand troops are stationed, under the command of two Chinese generals. Pop. of city and suburbs estimated at 50,000, a very large proportion of whom are Buddhist lamas, or priests, and students in the monasteries.—[Ritter, *Asia*, *Erskande*, iv, p. 116, *Monasteries d'un Voyage*, &c., Gussell, in *Eng. Geo. Jour.*, 21.]

LASSAN a m. *France*, prov. Fomment, gov. and 29 m. S.E. St. Omer, on a lake of some name, formed by the Prome; with a trade in cattle, and a fishery. Pop. 1078.

LASSAY, a m. *France*, dep. Mayenne, 25 m. N. Laval with an ancient castle, still in good preservation, which was besieged and taken by William the Conqueror in 1064, and long continued in the possession of the English. Lassy takes in corn hemp cheese, poultry and cattle. Pop. 1350.

LASEM or **LAMAM**, a m. Java, prov. Bantam, on a stream of its own name half a mile from the sea. It is populous, and exists on a good trade.

LASHINGTON, Eng. Gloucester, 885 ac. Pop. 50.

LASWADE, a vill. and par. Scotland, co. Edinburgh. The village, 6 m. S. Edinburgh, on the N. Esk, is irregularly

built, and has a handsome church. The manufacture of carpets, gunpowder, and paper—the last, to a great extent, is carried on in the parish and there are corn-mills, iron and brass foundries, and coal mines. Drummond of Hawthorn was born in the parish. Area 8 sq. m. Pop. 5621.

LASTINGHAM, par. Eng. York (N. Riding), 84,063 ac. Pop. 1380.

LASTOCE, a vill. Hungary, co. Zemplin, about 8 m. from Valeyta, with a church, and a trade in agricultural produce. Pop. 1080.

LASTRA a *Sicilia*, or **LASTRA** di *Gianfrancesco*, a m. and com. *Tuscany*, 7 m. W. *Firenze*, 1 bank Arno. It is an ancient place, was once surrounded by walls, of which portions still remain, and has manufactures of straw hats, in which the greater part of the inhabitants male and female are employed, and a trade in wine, oil, and corn. P. 4990.

LASTRES—1, A seaport in Spain, Asturias, prov. and 22 m. E.N.E. Oviedo on the Bay of Biscay. It has a church seven chapels, a Latin and two primary schools, manufactures of linen and ropes, and a coasting and fishing trade. The mole is good and the bay capacious. Pop. 250.—2, A cape, N.E. the town lat. 45° 33' N., lon. 5° 16' W. (a).

LASWAREE, a vill. Hindostan, prov. Delhi on a stream of same name, 56 m. N.W. Agra, memorable for a battle fought in its vicinity, in 1505, when the British, under Lord Lake, signally defeated the troops of Daulat Row Sindia.

LARZIO, several places, Hungary, particularly —1, (*Magyar-Szent* and *Nemeth-Szent László*) two nearly contiguous villa. Hungary, Thiber Danube, co. *Ungvar*, 13 m. from Papa. They contain several good buildings, and have sulphur springs. Good wine is grown in the vicinity. Pop. 1800.—2 (*Szent Venc-László*) a vill. Hither Danube, co. and 20 m. from Pesth with a R. Catholic church. Pop. 1650.

LASZTOMER, or **LASZTOMER**, a vill. Hungary, Hither Thiber, co. Zemplin, on the Laborez, here crossed by a bridge 3 m. from Nagy-Ménly, with a church. Pop. 1080.

LATA, a m. *Assato Turkey*, prov. and 45 m. N.W. Van. It is populous, governed by a bey and garrisoned by 1000 men.

LATAKIA [anc. *Leontoe ad Mare*] a seaport in Asiatic Turkey Syria, pass and 75 m. N. Tripoli on the N. base of a lofty promontory called Cape Zeyret, which projects about

REMAINS OF ANCIENT TEMPLE IN THE BAZAAR, LATAKIA.
After *Recherches*.

14 m. into the sea, lat. 35° 30' 30" N.; lon. 35° 48' E. (a). It was once surrounded by walls, but is now open, and consists of about 1000 well-built houses, pleasantly situated among groves

of myrtle, pomegranate, mulberry and olive trees, and forming two distinct portions—an upper and lower town, the former, as its name implies, occupying the higher ground while the latter, called *La Beale* or *La Marina*, stretches along the shore, in the vicinity of the harbour. This portion is composed of two streets, parallel to the shore, and a third leading upwards from the port, and is inhabited chiefly by seafaring people. The principal buildings are three Greek churches, five mosques, an Armenian convent, and a mass of large estate, but very indifferently supplied. The harbour is well sheltered from all winds except the E. but has a narrow entrance and little depth of water, and though once capacious enough to accommodate 1000 galleys, has become so silted up by mud and sand as scarcely to contain a dozen of merchant vessels. The trade is chiefly in tobacco, which is largely cultivated in the vicinity, and is famous both in the E. and throughout Europe, cotton silk, gall-nuts wool, and wax. The wines, once celebrated, have lost their reputation but the raisins are still delicious. Latacha has suffered severely by earthquakes, and owing partly to them, and to a general decay of trade from other causes, the pop., which once amounted to 50,000, does not now exceed 7000.—(Chenevix's *Sketch, Egypt*. *Pap dans les Cinqs Parties du Monde*.)

LATACHA, a lake, Russia, in E. of gov Olenok, oval shaped, 23 m. long N. to S. and 12 m. broad. At its S. extremity it receives the *Uda*, laden with the waters of Lake Voj, and at its N. E. extremity discharges itself into the Onega.

LATCHINGDON par Eng Essex, 3672 ac. 1 411

LATERA, a tn. Papal States deleg Viterbo, 14 m. 4

LATERINA, a tn and com. Tuesday, 10 m. from Arzano, on a height above the *Regina*, near the mouth of the *Valle del Inferno* with a church and an old castle. P. 1269

LATERIA, a tn. Naples, prov Terra d'Otranto, 24 m. N. W. Taranto, near the source of the Lato. P. 3400

LATHAM'S ISLAND, a coral isl., E. coast Africa, Enguabur, lat. 6° 54' S. lon. 33° 59' E. of oval form, and somewhat less than 10 m. in length and not more than 10 or 12 ft. above the water. It is covered with myriads of sea-fowl, chiefly gannets, of a very large size.

LATHBURY par Eng Bucks 1294 ac. P. 147

LATHURON par Scot. Caithness 140 000 ac. P. 824

LATHWIM, a township, England, co. Lancaster 2 m. N. E. by E. Ormskirk. It has a free school and a magnificent mansion erected on the site of the celebrated Latham house, so heroically defended by the Countess of Derby, when besieged during the civil war by the parliamentary forces, under General Fairfax. Pop. 3291

LATIAKAK or **INDIAKAK**, a vil. Austria, Slavonia, 9 m. from Mitrovica with three churches. Pop. 4000

LATISANA, a vil. and prov. kingd. of Italy, gov. and 40 m. N. E. Vercelli, 1 bank Tagliamento. It has a court of justice, several public offices, a parish church, and several centuries a small harbour in the river, and some trade. P. 4000.

LATORZA, a river Hungary which rises in the S. slope of the E. Carpathians co. Beregh, flows first S. W. and then W., and joins 1 bank Bodrog, a little above Zemplin, total course, 90 m. chief affluent, the *Borsava*.

LATHRONICO, a tn. Naples prov Basilicata, 18 m. E. Lagenagro. It has several springs. Pop. 3200

LATTA ISLE, a group of small isles, Indian Archipelago, in the Molucca Passage, co. small Gilolo, largest, in lat. 9° 14' S.; lon. 127° 0' E. (a.)

LATTAI, a tn. Latvia or Livonia, one of the Pelee isles, lat. 18° 49' S. lon. 174° 35' W. (a.) consisting chiefly of a vast conical hill, 1000 ft. in height, the summit of which has a scorched appearance, but the sides are covered with trees, and slope gradually to the sea. It is surrounded with a lower border of fertile land, affording fresh water and is 6 or 7 m. in circumference, and can be seen 60 m. off.

LATTAKOO (Old and New), two tns. S. Africa, country of the Bechuanas. Old Lattakoo is situated near the sources of the Moshoes, about 800 m. N. E. Cape Town. lat. 27° 5' S., lon. 24° 24' E. New Lattakoo 24 m. S. W. the former is in lat. 27° 30' S. lon. 24° 10' E. At New Lattakoo, or Kru men, there is a missionary station, with a chapel capable of containing about 1000 people. Wood is so extremely scarce here, that the roofing of the chapel had to be brought from a

distance of 200 m. The native towns of Lattakoo, in 1814, contained 5000 persons each.

LATZPONE, a vil. Austria, Tyrol circle Bozen, dist. and near Klausen, with a parish church and the ruins of an old castle. Pop. 1200

LATZHAZA or **LACHHAZA**, a vil. Hungary, Latta Ku mana, 23 m. S. W. Pesth, with a church and townhouse. Pop. 3559

LATZUNAS, a vil. Hungary co. Temes about 18 m. from Vreches with a Greek church. P. 1265

LAUBACH, a tn. Hesse-Darmstadt, Oberhessen, 15 m. E. S. E. Gießen with two churches, a castle, library of 60 000 volumes, a poorhouse, and manufactures of earthenware, and coarse woollens, iron-works and tile-works. Pop. 2032

LAUBAN, a tn. Prussia, prov. Silesia, gov. and 40 m. S. W. S. Liegnitz, exp. circle 1. bank Quana. It is surrounded by a double wall, flanked with towers and bastions, and is entered by four gates. It has a court of law and several public offices three Protestant churches, a Lutheran monastery, with a church, a handsome townhouse, gymnasium, library, museum, with good collections of two hospitals, and an orphan asylum. manufactures of woollen and linen cloth, blacksmiths, pinfields, and dye-works, tile-works, a bell foundry, and several spinning and other mills. Pop. (1848) 6043.—The cranes is mountainous, being traversed by the Sudetes, and has not much fertile soil, but feeds a great number of cattle. Area, 151 geo. sq. m. Pop. 65 645

LAUBENDORF or **LARENDO**, a vil. Bohemia, circle Chrudim, about 8 m. from Blatna with a handsome parish church, a school, and a castle. Pop. 1418.

LAUBHIM (Gause and Klein), a vil. Württemberg circle Danneb, 19 m. S. S. W. Ulm, with a church, two castles, and an hospital. Pop. 2400

LAUCH, a river France, which rises in the Vosges, around Colmar flows E. N. E. past Guebwiller, and joins 1 bank Rhine after a course of about 88 m.

LAUCHA, a tn. Prussia, prov. Saxony, gov. and 17 m. S. W. Merseburg, 2 bank Unstrut with manufactures of linen and various tile-works, and a trade in wine. Pop. 1656

LAUCHSTADT, a tn. 1 russia, prov. Saxony, gov. Merseburg, on the Leuna, 21 m. W. Leipzig with a castle, church, and theatre, saline chalybeate springs, and a bathing establishment. Pop. 1418.

LALDA, a walled tn. Baden, circle Lower Rhine, on the Tauber, with a church. Pop. 1077

LAUBENBACH several places, Germany—1 A vil. Baden, circle Lower Rhine, N. E. from Mannheim with a church, and a trade in wine and cattle. Pop. 1512—2 A vil. Bavaria, Lower Franconia, on the Main with a church, a castle, the ruins of two old towers, bark, oil, and flour mills, and a trade in fruit, particularly cherries. Pop. 868—3 A vil. Hesse-Cassel, Niederhessen circle Witzhausen with a church and several mills. Pop. 862—4 A vil. Württemberg circle Jaxt, bail Mergentheim, with a church, a castle, and a synagogue. Pop. 1180

LAUDER, a royal and part bar and par Scotland, co. Berwick. The tower on the Leader 33 m. S. E. Edinburgh, is irregularly built, of mean appearance, but lighted with gas. It has a townhouse, a parish a Free, and a U. Presbyterian church and four schools. It unites with Haddington, Berwick, &c., in returning a member to Parliament. P. (1851) 1105. Area of par, 37,500 ac. Pop. 2154.

LAUDERDALE, a dist. Scotland, co. Berwick, through which the river Leader flows. It gives the title of earl to the Maitland family

LAUDUN, a tn. France, dep. Gard, 18 m. N. E. Uzes, in a district noted for its wine. Pop. 1860.

LAUBENBURG, a tn. Prussia, prov. Pomerania, gov. Colbin, on the Leba 33 m. W. N. W. Demmin. It is walled defended by two forts and a castle, has a court of law and several public offices, two churches, a poorhouse, and hospital, and manufactures of woollen and linen cloth, hats, and white and common leather. Pop. 3775.—The cranes is flat and well wooded, and contains numerous lakes, but is marshy Area, 548 geo. sq. m. Pop. 49,455.

LAUBENBURG (Dower or), a prov., 1 district, bounded N. by the territory of Lübeck and grand duchy Mecklenburg-Holstein, N.W. and W. by duchy Holstein, S.W. by territory of Hamburg, S. by the Elbe, separating it from Hanover, and E. by grand duchy Mecklenburg-Schwerin; length, N.E. to S.W., about 25 m., breadth, 26 m., area, 804 sq. m., generally flat, but undulating. Towards the centre considerable tracts of sand occur, and along the banks of the Elbe marsh lands prevail. The woods are extensive, particularly in the N.E. in the neighbourhood of lake Müritzer, and in the S.W., on the E. bank of the Elbe, they yield excellent timber, and afford employment to a considerable number of the inhabitants. The S. and E.W. parts of the duchy belong to the basin of the Elbe; the N. and N.E. parts to that of the Baltic which receives its waters by the Trave. Its important lakes are Müritzer, 6 m. by 3 m.; Schaalsee about the same extent but of remarkably irregular shape. The principal crops are oats, barley, rye, flax, hemp, and rape. In the N.E., near the lake of Müritzer, a good deal of fruit is raised and exported. Both houses and cattle are numerous, and of good breeds; there are very few sheep. The duchy, in connection with that of Mecklenburg, gives the king of Denmark a place in the German confederation. For administrative purposes it is divided into four bailiwicks—Ratzeburg, Lauburg, Schwerin, and Steinbock. Pop. 46,686.

LAUBENBURG a *fr. commune*, duchy and sup. bail. of same name, *r. bank* Elbe, where it is joined by the Dalmatene or Steinhaken canal, 20 m. S.E.E. Hamburg. It stands on a level of elevated terraces formed by the bank of the river, has a church, the ruins of an old castle, an hospital and some trade. The toll dues on the Elbe are levied here. Pop. 2800. Area of bail. 40 sq. m. Pop. 6860.

LAUBENSTEIN two places, Germany.—1 A *tn. Saxony*, circle and 20 m. S.E.E. Dresden, on a mountain precipice above *r. bank* Mültitz; with a castle, a church, manufactures of lace, and two saw-mills. Pop. 665.—2 A *vll.* Hanover principality Callenberg, 16 m. W. S.W. Hildesheim with a church, chapel, and ruined castle, a distillery, brewery, and paper-mill. Pop. vii., 1012, bail. 13,032.

LAUF, a *tn.* Bavaria, Middle Franconia, sup. dist., on the Pagania, 11 m. E.N.E. Nürnberg. It has a castle, church, chapel, and hospital, manufactures of steel wire, needles, knives, white and common leather and articles in iron and brass, polishing, saw and other mills. Pop. 2008. Area of dist. 52 sq. m. Pop. 14,153.

LAUFACH, a *vll.* Bavaria, Lower Franconia, bail. Rothemann, on the Vor-Spessart with a church, limestone quarries, blast-furnaces, and other iron-works. Pop. 1077.

LAUFEN a *tn.* Upper Bavaria, sup. dist. 1 *bank* Saalach here crossed by a bridge, 54 m. E.S.E. Munich. It has a castle, church, Capuchin monastery, two hospitals, manufactures of cloth, wooden luxury, and copperware, building mills, tanneries, tanneries, and other mills, and a trade in salt. Pop. 1880. Area of dist. 96 sq. m. Pop. 1497.

LAUFEN, two places, Switzerland.—1 (French, *Leuf*), a *tn.* and *par.*, on and 28 m. N.W. Bern, in a valley of same name, on the road from Basel to Delémont on the Rhine, which is here crossed by a bridge. It is walled, has a church, and manufactures of linen, yarn and hosiery. Pop. 1697.—2 A *vll.* and *par.*, on and 22 m. E. by E. Zürich, with a church and an old castle, both finely situated on a height, but the greater attractions of the place are the celebrated falls in its neighbourhood, and about three miles below the town of Schaffhausen called *r. Fall*. Pop. 1069.

LAUFEN an *Recken*, a *tn.* Württemberg, circle Neckar 6 m. S.W. Heilbronn, *r. bank* Neckar here crossed by one of the finest bridges in the kingdom, communicating with a suburb. It has a Gothic church, chapel, and Latin school. Pop. 4000.

LAUGHARNE, a municipal bor. seaport, market *tn.*, and *par.*, S. Wales, co. Carmarthen. The town 3 m. S.W. Carmarthen, consists of respectable-looking houses, and has a magnificent old cruciform church, in the early English style, a small but neat townhall, various Dissenting chapels, several endowed schools, and other edifices, and carries on, through its port, a little trade in wool and butter. The inhabitants are nearly all employed in agriculture. On a hill, a little way S. from the town, are the extensive remains of the ancient castle, in good preservation. Area, 14,703 ac. Pop. 5011.

LAUGHIAN ISLANDS, a group of nine low islands, S. France, S. point, in lat. 52° 19' N. E., lon. 15° 49' E. They extend 5 m. S. and W., and nearly as much N. and S.

LAUGHTON, several par. Eng.—1, Leicestershire, 1109 ac. Pop. 165.—2, Lincoln 1136 ac. Pop. 68.—3, Lincoln 4898 ac. Pop. 203.—4, Sussex 5075 ac. Pop. 513.—5, (two in Norfolk), York (W. Riding), 8545 ac. Pop. 734.

LAUINGEN, a *tn.* Bavaria, circle Swabia, sup. dist., *r. bank* Danube, here crossed by a wooden bridge. It is well built, has a large square, six churches, one of which has a lofty spire; a castle, townhouse, hospital, and cavalry barracks, manufactures of linen, and some trade, both general and transit. P. 2816. Area of dist. 64 sq. m. Pop. 14,565.

LAUJAR-DE-ATHARAZ, a *tn.* Spain, Andalucía, prov. and 20 m. N.W. Almería, 1 *bank* Andaraz. It is tolerably well built, has several squares, wide, clean streets, a church, chapel, townhall, Latin grammar and two other schools, two prisons, a convent and, in the vicinity, three fine almshouses. Manufactures—cloth, and other woollen fabrics. Here are also smelting-works for lead and antimony, obtained in the Gador hills. Pop. 5454.—(Morocco and Melina)

LAUN, or *Laury*, a *tn.* Bavaria, district Bava, 33 m. N.W. Prague, *r. bank* Elbe here crossed by a stone bridge. It has a handsome Gothic church, and an elegant townhouse. The district is famous for its apples. Pop. 3100.

LAUNCELLS, par. Eng. Cornwall, 6179 ac. P. 728. **LAUNCESTON** the second to of Van Diemen's Land dist. of same name, 102 m. N. Hobart Town; lat. 41° 34' S. lon. 147° 15' E., at the confluence of the N. and E. Esk rivers. The streets are regularly laid out, and many of its buildings handsome. The principal of these are the Episcopal church, the government house, military barracks, jail and courthouses. There are also public schools, a bank, post-office, and several newspaper establishments. Pop. 5060.—The *district* occupying the N.E. corner of the island bounded, N. by Bass Strait, W. and S. by the districts of Norfolk Plains and Campbellton E. by the Pacific, is about 85 m. long by 68 m. broad area, 3800 sq. m. Its shores are a good deal hollowed out by large indentations, especially on the N. coast, where occur Rungaroa Bay and Port Dalrymple, on the E. coast the largest indentation is the Bay of Fires. The surface is generally mountainous, the highest known elevation, Ben Lomond, on the E. side of the district, being 4200 ft. high. It has several considerable rivers, among the principal of which are the Tassar and North Esk, and gold has recently been found in it.

LAUNCESTON, a *par. bor.*, market *tn.* and *par.*, Eng. co. Cornwall. The town, 19 m. N. by W. Plymouth, is generally well built, well supplied with water, and is lighted with gas. It has a remarkably fine church, several Dissenting chapels, two handsome market-places, a grammar, national, and Dutch schools, a mutual instruction society for the working-classes, and various benevolent and charitable institutions. Retail shop trade and agriculture are the chief employment. Launceston returns a member to Parliament. Registered electors (1861) 867. This town was long considered the capital of Cornwall but Bodmin is now the chief town. Area of bor. and par. 2180 ac. Pop. 2897.

LAUNCESTON TARRANT and *MONKTON-TARRANT*, par. Eng. Dorset 3818 ac. Pop. 735.

LAUNTON, par. Eng. Oxford, 2650 ac. Pop. 708. **LAUFEN** a *tn.* Switzerland, on and 10 m. S.W. Bern, on the Rhine, at its confluence with the Saane. It is walled, has three gates, a townhouse, and a castle, finely situated on a height. Laufen is famous for the battle in which, in 1339, the Swiss Confederates, under Rudolph of Erlach, defeated the mailed cavalry of Burgundy and Swabia. Pop. 896.

LAUFERSWEIL, a *vll.* and *par.* Switzerland, on and 14 m. from Bern, on an elevated site, above *r. bank* Emma. It has a handsome church, a school-house, and the ruins of the old castle of Westersburg. Pop. 8494.

LAURAGUAIS, a small ancient dist. France, formerly dependent on Languedoc, and now included in it. The *tn.* is divided into Upper and Lower Lauragais; the latter forming the *diocese* of St. Papoul, and the other that of Lavaur. **LAUREANA** (anc. *Stratola*) a *tn.* Naples, prov. Calabria-Ultra 1, 8 m. E.S.E. Nicotri. Pop. 1600.

LAUREL MOUNTAINS, a mountain-range, U. States, W. of the Alleghenies, extending across Virginia, from Fann-

sylvania to Kentucky, where it takes the name of Cumberland Mountain.

LAURENCEKIRK, a tn. and par. Scotland, co. Kinross. The town, 134 m. S.W. Edinburgh, is built principally of stone, and includes with gov. It has an established, a Free, a Scotch Episcopal, and a Congregational church, several schools, manufactures of wooden snuff-boxes, carried on to a considerable extent, and an extensive brewery, but the inhabitants are mostly employed in handloom-weaving and in agriculture. Dr James Beattie was a native of this parish. Area of par. 5581 ac. Pop. 1469.

LAURENS (87) par. Isl. of Jersey Pop. 2306.
LAURENT (87), a tn. and com. Belgium, prov. E. Flanders, 85 m. N.W. W. Ghent, with three flour-mills. The chief employments are weaving and agriculture. Pop. 8187.

LAURENT (87), numerous small places, France.—1, (*de Corda* or *de Cordone*), a tn., dep. Pyrénées-Orientales, about 18 m. S.W. Carat, with manufactures of linen, vinegar, nails, and some trade in velvet, mercery, iron, and hoops. Pop. 1290.—2 (*de Salomagne*), a vil., dep. Pyrénées-Orientales, 7 m. N.E. Perpignan, r. bank Agly, a little above its mouth. It has a good trade in wine and brandy. Anchovies and sea-fishes are taken in the neighborhood and largely exported. Pop. 3502.—3, (*de Madois*), a vil. and com., dep. Gironde, 35 m. N.W. Bordeaux, with a good trade in wine tar, and (path P 2692)—4 (*des Bains*), a watering-place and com., dep. Ardèche, about 30 m. W. W. Lyons, in a narrow valley, overlooking by lofty precipices. The two springs to which it owes its name have a temperature, the one of 122°, the other of 118°. They are of a saline nature, containing sub-carbonate, sulphate, and chloride of soda, silica, and alumina, and are used, externally and internally, in psoriasis, rheumatism, white swellings, gout, and in all chronic affections.

LAURENZANA, a tn. Naples, prov. Basilicata, 15 m. S.E. E. Potenza, and 13 m. E. N.E. Murolo-Novo. Pop. 7200.
LAURIA, a tn. Naples, prov. Basilicata, 7 m. S.E. E. Lagonegro. It has two churches, two convents, and manufactures of woollen cloth. Pop. 7800.

LAURIOOGHA, a lake, Fern, on the E. slope of the Anish lat. 10° 15' S., lon. 70° 10' W., length, 1/2 N.E. to S.W., about 12 m., breadth, not more than 5 m. It is of a long and somewhat oval shape, and furnishes the source of the Tumpagaga or Mantho.

LAURIEBTON, two vils. Scotland.—1 Strirlingshire, 14 m. E. Falkirk, with a Reformed Presbyterian church and a school. Inhabitants engaged in weaving and nail-making. Pop. 1193.—2, Kirkcubrightshire, 6 m. W. W. Castle Douglas. Pop. 275.

LAURINO, a tn. Naples, prov. Principato-Citra, 8 m. N.E. E. Valle, with two annual fairs. Pop. 2150.

LAURO two tns. Naples, prov. Terra di Lavoro.—1, Dist. Nola, 12 m. E. Naples, with several churches and convents. P. 1838.—2, Dist. and about 16 m. E. Gaeta. P. 1050.

LAUBOT, or Little Polo Laut Islands, a group Indian Archipelago, off the S.E. coast of Borneo, lat. (N. point) 4° 45' S., lon. 115° 55' E. (N.) They have a lofty and rocky shore, and several shelves, on which breakers are seen. Width 1/2 m. of the most E., the depth of water is 16 fathoms.

LAUBVIG, a tn. Norway, prov. Agderhus, beautifully situated at the head of a small fiord of same name, at the mouth of the Lauen, 57 m. S.E. W. Christiana. It is built in the form of a crescent, contains a parish church, a castle, and an hospital, and has an excellent harbour in which the largest vessels can safely anchor. About 800 vessels, ton. 50,000, annually arrive and clear out at this port. In the neighborhood are the Fido iron-works, among the largest, and most complete in Norway. The fishery of the

river, which abounds with salmon, furnishes employment to many of the inhabitants. Pop. (1848) 3537.

LAURANNE (Latin, *Lauranum*, Italian, *Lomane*), a tn. Switzerland, cap. can. Yverd on a spur or lower slope of Mount Jorat about 1/2 m. N. from Orancy, its port on the lake, and 31 m. N.W. the town of Geneva. It is irregularly built on three hills and several intervening valleys. The nucleus of the town is a small hamlet, and the rest of the town is a series of villages, many of which are very steep, while all of them may be regarded as a series of steps and downs. Two of the hills are united by a lofty bridge about 80 ft. high, 35 broad, and 582 long. In the older part of the town the streets are narrow and not well built, and few of the houses stand on one level; but many new handsome houses have recently been erected. The edifice most deserving of notice is the cathedral of Gothic architecture, and at least internally the finest building of the kind in Switzerland. It was founded A.D. 1000 but only a few traces of the original edifice remain in the ground above behind the altar. It is adorned with a lofty tower and a spire

LAUSANNE, from the shore west—After Th. de Mouton.

200 ft. high. From the terrace magnificent views of the surrounding country, the Lake of Geneva, and the Alps beyond it, are obtained. On a platform, behind this terrace, stands the old castle, originally the residence of the bishops of Lausanne, and now the council house of the canton. It is a massive square building, with turrets at the angles. The only other buildings deserving of notice are the church of St. Francis, the college with its museum; the penitentiary prison, theatre, asylum for the blind, and normal school. The education of the college, as of a very complete description, and the cheap rate at which it can be obtained, is one of the chief attractions of the town to its numerous English residents. Among the residents of former times was Gibbon, who here completed his *History of the Decline and Fall of the Roman Empire*, and whose house, much altered now forms the Hotel Gibbon. Lausanne has scarcely any trade and its limited manufactures are confined to leather goods, beer-brewing and cotton and woollen spinning. Pop. almost all Protestants (1850) 30,000.

LAURIGKE, a tn. Saxony, circle and 18 m. S.E. Leipzig with a civil and criminal court, a church, and manufactures of woollen and Manchester goods, linen, &c. Year it is coal mines and saline chalybeate springs. Pop. (1849), 9383.

LAURITZ (Latin *Lauritia*, French, *Laurice*) an ancient territory Germany divided into the margravates of Ober and Nieder Lauritz, and bounded on the S by Bohemia, to which the whole of it originally belonged. It afterwards fell to Saxony, and remained with it till 1815, when Prussia received the whole of Nieder Lauritz—which is now shared between govts. Frankfurt-on-Oder and Merseburg—and the E. part of Ober Lauritz, which has been incorporated with gov. Magdeburg. The rest of Ober Lauritz, remaining with Saxony, is nearly identical with circle Bentzen.

LAUT (Génes Fula), an isl. Indian Archipelago, S. entrance to Macassar Strait; lat. (N. E. point) 8° 25' S.; lon. 116° 20' E. (N.); about 20 m. long, by 10 m. broad, yields a considerable quantity of rice, and is separated from S.E. coast Borneo, by Palo Laut Strait, 5 m. broad, and 7 to 8 fathoms deep.

LAUTENBACH, a vil. Baden, circle Middle Rhine, bail. Odenkirch; with a very beautiful church, and a trade in cattle, wool, fruit, and cherry honey. Pop. 844.

LAUTENBURG, *Kanton* or *Lancosco*, a. in. Franco. prov. W. Prussia, gov. and 48 m. S.E. Marienwerder, 1. bank. Walls; with two churches, manufactures of woollen cloth, linen, earthenware and a paper-mill. Pop. 2034.

LAUTENTHAL, a. in. Hanover, bail. Klenenthal, r. bank. Irmstein, 22 m. S.E.W. Brunswick. It is the seat of a mining directorate and has near it important silver mines, with smelting and refining furnaces. It has also a powder, a paper, and a saw mill. Pop. 2174.

LAUTER, a vil. Saxony, Kreisbau, bail. and 4 m. N.W. Schwarzenberg. It is well built, and has several windmills, wool and pluck ovens, manufactures of embroidery, lace, wicker-work, spoons, nails, and tinware. Pop. 2888.

LAUTERBACH, a. in. Hesse-Darmstadt, Oberhessen, on the Schilt, cap. dist., in the valley of the Vogelsberg, 24 m. N.E. H. Gießen. It has a court of justice and other public offices, two castles, two churches, an infirmary and hospital, manufactures of wax-cloth, red and white leather cutlery, glass, earthenware, and soap, several breweries and distilleries, and a trade in cattle. Pop. 3651; dist. 21,325.

LAUTERBACH, a vil. Saxony, circle Saxe-Weimar, bail. Lauterbach. It has a ruinous castle. Mining is extensively carried on in the vicinity. Pop. 1284.

LAUTERBACH, or **LYTERBACH**, two places, Bohemia—1, A vil. circle Chrudim, on the Louska, 5 m. from Letohrad, with a handsome church and two mills. Pop. 1437—2, A free village town, circle 6 m. S. Elbogen, with a church, manufactures of coarse woollens, several flour and saw mills, and arsenals, at which the tin obtained from mines in the vicinity is smelted. Pop. 1750.

LAUTERBERG, a. in. Hesse prov. Hildesheim, at the confluence of the broad and narrow Lauter 18 m. S.E. Elmsahl. Though of rather a poor appearance, it has several public offices, considerable manufactures of iron and tinware, linen, and nails, several dye-works and a trade in wool and charcoal. Pop. 3216.

LAUTERBURG [anc. *Lautus Castrum*] a fortified town, Franco. dep. Bas-Rhin, on the Lauter a little above its confluence with the Rhine, 41 m. N.E. Strasbourg. It ranks as a fortified town, and has a fine castle. The ruins of a fortress, built by the emperor, still and brick works. P. 2280.

LAUTERBRUNNEN [Wholly sprung] a vil. and par. Switzerland, cant. Bern, on the White Lutschine, about 6 m. S.E. the E. extremity of Lake Thun, 2450 ft. above the sea, in the celebrated valley to which it gives its name, and so hemmed in between romantic precipitous that in summer the sun is not seen before 7 o'clock, and in winter not till 12 o'clock. There are numerous cascades in its neighbourhood, but the most celebrated of all is the Staubbach (Dust stream) one of the loftiest falls in Europe, being 500 to 600 ft. in height, the body of water is comparatively small, falling from such a great elevation, it is dispersed by the wind as it reaches the bottom, and descends in the form of a dust-like spray. The valley of Lauterbrunnen, at the foot of the Jungfrau, is about 15 m. long, and scarcely at any place exceeds 1 mile in width. It is hemmed in between limestone precipitous nearly vertical, down which innumerable rivulets tumble in long threads of silvery foam. Owing to the height, only the hardier species of grain grow and the climate is almost too rough for apples and pears, but cherries ripen. In different patches, potatoes are planted. Parts of the valley, also, are wooded with fine beeches and maples, while myrtles oak clothe the lower mountain slopes. Pop. 1706.

LAUTERBECKEN a. in. Bavaria, Palatinate, at the confluence of the Lauter with the Glen, 48 m. N.W. Speyer; with a justice-of-peace court, two churches, a castle in ruins, and a trade in cattle and wine. Pop. 1155.

LAUTRE, a. in. Franco. dep. Tarn, 16 m. S. Alby, once the capital of a viscounty of Albigeois, and defended by a castle, of which only a few vestiges remain. It has manufactures of coarse cloth and a trade in cattle. Pop. 1060.

LAUTRECHT, or **LAUTRECHT**, a market in Austria, Moravia, circle and 10 m. S. Brün, on the Sava; with a church. Pop. 1040.

LAUVEN, a river, Norway, which rises in Mount Hardanger, belonging to the Hardanger range, on the E. frontier

of S. Bergenhus, flows through Bukerud, first desc. E., then S.E.W., passing the town of Kongsberg, about 1 m. above which it forms a magnificent fall; afterwards turns almost due S., enters the dist. of Laurvig, and falls into the fiord at the town of that name, after a direct course of 150 m. and an indirect of at least 200 m. Its mouth forms one of the finest natural harbours of Norway. It abounds with fish, particularly salmon, and is the best fishing stream in the S. portion of the kingdom. In its course it expands into numerous lakes, but none of its affluents are large.

LAUWER ZEE, a gulf of the N. Sea, Holland, between provs. Friesland and Groningen, stretching inland N. to S. about 6 m., and about 6 m. broad, it receives the Ee with the Dooden-die, die Lauwers, and the Hobe.

LAUWERIE, a. in. Franco. dep. Tarn, 20 m. N.W. Montauban. It has a considerable trade in corn, wine, fruit, and cattle. Pop. 1650.

LAVADORE (*SANTA CRISTINA*), a vil. and par. Spain, Galicia, prov. and about 14 m. from Pontevedra, on the Cam. heas; here crossed by a handsome bridge. It has a church, townhouse, prison, primary school, manufactures of linen and leather and several flour-mills. Pop. 2715.

LAVAGNA a. in. Italy, Piedmont, div. and 25 m. E.S.E. Geneva, near the mouth of a river of same name, in the bay of Ispallo. It is a large place, but only indifferently built, has a court of justice, several public offices, a beautiful parish church, of three naves several other churches, three palaces, one of them with well-laid-out gardens a communal house and small hospital. A trade in mules and cattle, and extensive slate quarries. Pop. 3232.

LAVALL [anc. *Lavallum Vallis Gaudens*] a town in Franco. cap. dep. Mayenne, on an eminence washed by the Mayenne, 134 m. W. S.W. Paris, lat. 48° 24' N. lon. 48° 57' W. (h.) It is surrounded by a chain of many forts, some only in good preservation; and is ill built, consisting of piles of old houses huddled together, or separated by dark, narrow winding streets, some of which are so steep as to be almost inaccessible to carriages. Many of the houses are of wood, and are supposed to be at least six centuries old. Amid these gloomy piles, and near the river are the remains of an ancient castle, of great extent, with a lofty round tower now occasionally used as a jail, the gallery which is of a more modern date, is used for law courts. The other buildings of note are the church of the Trinity, a Gothic edifice, supposed to occupy the site of a temple of Jupiter, the church of the Cordeliers, more interesting still from its painted wooden ceiling and 36 pillars of red and black marble, which adorn its principal altar the churches of St. Venerand and Aventures, two hospitals, founded in the beginning of the 10th century, a public library of 10,000 volumes, and a large and elegant cloth hall. On the opposite side of the river there is a suburb which is nearly as large as a third of the town, with which it communicates by a handsome stone bridge. Lavall possesses a communal college, courts of first resort and commerce, a chamber of commerce, and an agricultural society. Its staple manufactures are linen. Linen thread, also, is spun to a considerable extent, and there are manufactures of damasks, calicoes, bombazines, serges, flannels, and green soap; also, numerous bleachfields, dye-works, and tanneries. The trade, in addition to the articles mentioned, is in clover wine, brandy, wood, iron, and marble. Lavall was taken by the English, under Talbot of Shrewsbury, in 1466, but recovered in the following year. Pop. 15,424.

LAVALL, an id. River, Gulf of Finland, 70 m. W. Cronstadt, 4 m. long by about 1 m. broad; very rocky, but in many parts growing rye, vegetables, and forage. It has three havens, one of which, on the W., though difficult of access, has depth of water for large vessels. Pop. 400.

LAVANT two pars. Reg. Saxony—1, (East); 2884 m. Pop. 421—2 (Mid), 250 m. Pop. 384.

LAVAU [anc. *Favenn*], a. in. Franco. dep. Tarn, 23 m. S.W. Alby, r. bank Agout, here crossed by a handsome bridge. It has a court of first resort, an agricultural society, and a communal college; manufactures of silk flanneling, serges, some coarse stuffs, and silk history; silk and cotton mills, dye-works, and tanneries, and is the entrepot for the silks of Upper Languedoc, which are spun here for Rhemes and Lyons. Near it coal is wrought, and much salt produced. Its castle gave an early refuge to the persecuted Albigeois; but

though valiantly defended, was taken by a horde of barbarous hordes, who marched against it in 1211, and, after taking it by storm, committed horrible atrocities. Pop. 4014.

LAVELANET, *v. l.* France, dep. Aude, 13 m. E. by S. of Foix. It has manufactures of woolens, saw works and mill saws, dye-works, a tannery, and several forges. P. 5710

LAVELLO (anc. *Ladellum*), a tn. Naples, prov. Basilicata, 9 m. N. E. Melfi. It is the see of a bishop, and contains a cathedral and two convents. Pop. 2300

LAVENDON, par Eng. Bucks, 2839 ac. Pop. 768

LAVENHAM, a tn and par England, co. Suffolk. The town 15 m. W. by N. Ipswich, has a handsome parish church, two Dissenting chapels, a free school an endowed national school, and a set of almshouses. Area of par 2887 ac. P. 1811

LAVENO a vil and com. Italy Lombardy prov. and 24 m. W. W. Como, on Lake Maggiore. It has a church and saw and flour mills. Pop. 1048

LAVENTRE a tn. France, dep. Pas-de-Calais, 12 m. N. E. Bethune. It has linen manufactures, and tanneries and rears a great number of bees. Pop. 1380

LAVENZA, a to Modena 6 m. W. Massa di Carrara at the mouth of a space named in the Gulf of Genoa, with a small harbor and a fort. Pop. 1280

LAVINGTON EAST or **MARKET LAVINGTON** a market tn. and par England, co. Wilt. The town 4½ m. S. Devizes, has a parish church, two Dissenting chapels, a national and a British school, and a considerable trade in corn and malt. Area of par, 4721 ac. Pop. 1721

LAVINO (anc. *Lutetia*) a river, Italy, which rises in a branch of the Apennines, 13 m. S. W. Bologna, flows N. and joins a bank Sansepolcro, after a course of about 30 m.

LAVIS, a market in Austria, Tyrol, 10 m. S. 15 m. N. N. W. Trento, on the Adige. It has a church and a trade in silk; the white mulberry being here extensively cultivated for the rearing of silk-worms. Lavis is considered the boundary between the German and the Italian Tyrol. Pop. 2207

LAVORO (FERRA DI) a prov. Naples, bounded N. by Abruzzo Ultra, W. by Frosinone S. W. by the Mediterranean, S. by prov. Naples, and Principato-Citra, and E. by Principato-Ultra and Sanio, greatest length, N. W. to S. E. 86 m., greatest breadth, 70 m., area, about 2000 sq. m. The coast-line, forming an irregular sweep N. W. to S. E., is not much broken by smaller indentations, but contains the large bay of Gaeta. The interior is a good deal broken by the Apennines. The principal rivers are the Volturno the Garigliano, and the Lago-Regi, near the coast are several lagoons, of which the principal are Lakes Fondi, Luno, and Carinola. The part of the provinces not broken by the Apennines, stretches out into plains among the richest and most carefully cultivated in Europe; yielding, in those of Avoro, Capua, and Caserta, 12 to 20 fold. Maize, and all the ordinary cereals, are abundantly raised, also flax, hemp, and a great variety of fruits. Forests are of limited extent, but there are many groves of chestnut and orange numerous vineyards, in which wines of excellent quality are produced, among others the famous *Lacrymæ Christi*. Both the olive and mulberry thrive so well that olive-oil and silk are principal articles of export. The pastures rear excellent cattle, and many marshy tracts are covered with herds of buffaloes. For administrative purposes, Terra di Lavoro is divided into five districts: the capital, Nola, Gaeta, Sora, and Piedmonte; subdivided into 48 circondari, and 230 comuni. Pop. 721 971

LAVOS, a tn. and par Portugal, prov. Douro, 7 hank, and at the mouth of the Mondego, opposite to Figueira, 44 m. S. W. Coimbra. Pop. 5188

LAVRAS no form, a tn. Brazil, prov. Minas-Geraes, 170 m. W. S. W. Ouro Preto. It is poorly built, has two churches, a townhouse, with a prison attached, and a trade in

cotton, rice, millet, and various kinds of fruit. Many of the inhabitants are shoemakers and tailors and a good deal of cotton is spun and woven by women. The mines of gold in the district, at one time very productive, are now all but exhausted. Pop. of dist., 15 000

LAVRIANO a vil and com. Italy, Piedmont, dt. Turin, 4 m. from Castellibonone, 7 hank P. It has a parish and three other churches, an elementary school, and the remains of an old castle and Hunkline. Pop. 1068

LAWE, a vil and com. Belgium, prov. W. Flanders, on the Lys, 37 m. S. Bruges. It has manufactures of tobacco, oil works, breweries and flour-mills. Pop. 2850

LAWRENCE (St.) par Irel. 1 Limerick 380 ac. P. 2188

LAWRENCE (St.) a large isl. Russian America, at the S. W. entrance to Behring's Strait. W. point is lat. 63° 34' N., lon. 171° 45' W. (N.) It is about 100 m. in length, with an average breadth of from 15 to 80 m., excepting at one point, where it narrows to little more than a mile.

LAWRENCE (St.) (GULF OF), a large inlet of the N. Atlantic, British N. America enclosed by the island of Newfoundland on the E., Nova Scotia, New Brunswick, and Canada on the S. and W., and Labrador on the N. lat. 46 to 50 N. lon. 58 to 66° W., length and breadth about 380 m. It commences with the ocean, by the opening between Newfoundland and Cape Breton about 65 m. wide, by the Strait of Bellefleur and the Gulf of Canso. On the N. W. it receives the estuary of the St. Lawrence. It contains numerous islands, the principal of which are Anticosti, Prince Edward's, and the Magdalen. Its more extensive bays are (Chaleur Bay, between New Brunswick and Lower Canada. Miramichi Bay in the former territory and St. George's Bay in Nova Scotia and another of the same name in Newfoundland. Islands of ice are sometimes met with in crossing the Gulf during the summer months.

LAWRENCE (St.) (RIVER OF), a large river of N. America rises under the name of the St. Louis in lat. 47° 43' N., and lon. 93° W. After joining the Lakes Superior, Huron, Erie, and Ontario, it issues from the last by the name of the Niagara, and expanding in the N. E. course into Lakes St. Francis, St. Louis, and St. Peter it is first known as the St. Lawrence at Montreal, whence it runs N. E. into the Gulf of St. Lawrence and terminates in an estuary 100 m. wide at Pointe-aux-Loup. It has a basin of 287,500 sq. m. of which 94,000 are covered with the water of the lakes alone, exclusive of the many lesser lakes with which it is in communication. The entire length of its course is between 1800 and 1900 m., and from Lakes Ontario 650 m. It receives the Ottawa, St. Maurice, and numerous other large streams from the N., but none of any magnitude from the S. The St. Lawrence is navigable for ships of the line as far up as Quebec, and for vessels of 800 tons to Montreal beyond which by the River Ottawa and the Rideau canal navigation is continued to Lake Ontario at Kingston. In part of its course it forms the boundary between the U. States and British N. America.

LAWRENNET, par Wales, Pembroke 3673 ac. P. 898

LAWSHALL par Eng. Suffolk 9969 ac. Pop. 808

LAXA, a river Chili, which rises on the W. slope of the Andes, near lat. 38° 30' S., flows W. between the districts of Rere and Isla-de-la-Laxa enters that of Concepcion, and, turning gradually S. S. W. joins a bank Biobio, after a course of nearly 150 m. during which it forms some lofty cascades.

LAXAS, or **LAXAR**, a river Central America, Nicaragua. It flows W. from the country between the Pacific and the Lake of Nicaragua, falling into the lake about 10 m. S. E. of the town of Nicaragua; and has become of some importance as lying in the immediate line of the canal, which it has been proposed to form between the W. side of the lake and the Pacific, as part of the continuous water communication between the Pacific and the Atlantic Oceans.

LAXENBURG, a market in Lower Austria, 9 m. S. Vienna, with a fine church, but its great attractions are its

palace, and fine parks and gardens, connected by an avenue with the palace of Schönbrunn. The whole grounds are beautifully laid out, and form one of the most agreeable resorts of the citizens of Vienna. Pop. 800.

LAXFIELD, par Eng. Suffolk 3630 ac. Pop. 1147.

LAXTON two pars. Eng.—1 Northampton 1870 ac. Pop. 143.—2 for Leamington North, 3810 ac. Pop. 429.

LAY a river, France, formed, below St. Vincent, by two small streams, the Gers and Little Lay, which, rise in the N.E. of *des Vosges*, proceeding S.W. It begins to be navigable at Marcell, and falls into the Creek of Angoulême, in the Bay of Biscay after a course of about 50 m.

LAYBACH or **LAVACH** (Latin, *Lavaca*) a town, Austria, 117 m., nearly Carinthia, esp. good and sterile, in an extensive plain, on both sides of the river of same name, here crossed by five bridges, 35 m. N.E. Trieste, on the railway to Vienna. It is a small town, 46° 27' N. lon. 14° 30' 45' E. (L.) It consists of the town proper grouped round the castle hill, and of six suburbs, and is for the most part, very indifferently built, with irregular narrow, and ill-paved streets, but has two rather spacious squares. Its principal buildings are the cathedral of St. Nicholas, with fine pictures, frescoes, and carvings, St. James church, the church of the Ursuline monastery a very handsome structure. St. Peter's church, the Protestant church, built since the revolution of 1848 the old Gothic townhouse, the old castle, crowning a height in the centre of the town, and now converted into a state prison and house of correction, the bishop's palace, theatre, barracks, and palace of Count Auerberg. It is the seat of a bishop, the seat of government of Carinthia and Carniola of a military governor and of several important courts and public offices and possesses a museum, a botanical garden, an infirmary with lunatic asylum attached, a deaf and dumb institute, a casino, agricultural and musical societies, a library, lyceum, in which theology, philosophy and medicine are taught, a gymnasium, normal military and agricultural schools, a school of design, industrial school, and various benevolent endowments.

The manufactures consist chiefly of woollen and silk goods, and there are oil, paper and cotton mills, a large sugar refinery, and a considerable iron trade. Laybach is a place of great antiquity and is supposed to occupy the site of the Roman *Lavaca*. It makes a considerable figure during the Turkish wars, and is well known to modern times by the Congress which was held in it in 1809-21. Its site was at one time very unhealthy, from the extensive swamps which surrounded it, but these have been almost completely drained, and the extensive new marshy fine roads and walks. Pop. (1848), 17,857. Area of circle, 845 sq. m. Pop. 164,100. Area of gov., 5524 sq. m. Pop. 750,000.

LAYRACH (Urms) or **VAYRACH**, a market town, Austria, 117 m., gov. and 12 m. S.W. Laybach on a river of same name, which here becomes navigable, though only 3 m. from its source, and joins the Save, about 20 m. below. It contains a church and has manufactures of linen, several mills, some shipping and a trade in wood. Pop. 1460.

LEAMINGTON, or **LEAMINGTON-SPRING**, a town, par. and celebrated watering-place, England, co. Warwick, 20 m. S.E. Birmingham, on the railway thence to Oxford and among thick-wooded slopes, in the valley of the Leam, which is here crossed by a handsome stone bridge, and joins the Avon, about 1 m. below. It consists of an old and a new town, separated by the gardens of the royal Spa. Both parts have recently risen up and extended themselves with great rapidity, and include many new and handsome streets, terraces, crescents, and squares. This rapid prosperity is owing partly to the peculiar mildness and salubrity of the air, and partly to the mineral springs, which present the three varieties of sulphureous, saline, and chalybeate, and attract numerous visitors. For their accommodation, various bathing establishments have been erected, of which the finest is that at the royal Spa, a large and elegant stone structure, with a Doric colonnade. The other principal edifices of the town are the parish church, an ancient building, which has recently been repaired and enlarged, and is in the decorated English style, with a tower and spire, two Byzantine chapels, one of them Gothic, and the other English, with a square embattled tower, crowned by pinnacles; the college, a spacious and substantial building, founded, in 1645, by a proprietary, and affording education of a superior description; the public library, town-hall, assembly-rooms, theatre, music-hall, &c. Besides the above, the Wesleyan and Unitarian Methodists,

Independents, Begians, and E. Orthodox, have places of worship, and there are grammar, national, and industrial schools. Among the prominent institutions, that of the Warfield hospital is conspicuous. The only manufacture of any consequence is gloves. Brass are held twice a year. Area of par., 1720 ac. Pop. 15 692. — (Local Correspondent.)

LEANG, or **LEANG-TSONG**, a city, China, prov. Kansoo, near the Great Wall, which here separates China from the Desert of Gobi, in Mongolia, lat. 37° 58' N., lon. 105° 24' E.

LEAO-TONG CHANG-KING or MOUNKOW, a prov. Chinese township, N. of the Great Wall, and separated by gullies from Mongolia and Corea, lat. 38° 20' to 43° 50' N., lon. 119° 15' to 124° 50' E. It is mountainous, and branches off towards the S. in a long peninsula, called the Begant's Sword, forming the E. boundary of the Gulf of Liao-Tong, into which Liao, the principal river of the province, flows. The climate is temperate and healthy, and the soil fruitful, particularly in wheat, barley, pulse, millet, and buck-wheat. Ginseng and shubert are also found, and the mountains are covered with excellent timber. The administration of the province is partly civil, and partly military. Chief town, Mounkow. — The river is about 110 m. wide at the entrance, and stretches inland about 150 m. The mouth of the Liao, at the head of the Gulf, is in lat. 40° 45' N., lon. 123° E.

LEAU [Flemish, *Leuw* or *Zout-Leuw*] a vil and com Belgium, prov. Brabant, on the Little Gete 33 m. E. Brussels It has a church of the 13th century with an elegant and lofty tower, a townhouse of the 16th century in a somewhat dilapidated state, but with a fine facade, a brewery a flour-mill, and a trade in agricultural produce. Pop. 1548

LEAVELAND, par Eng Kent 373 ac. Pop. 99

LEBA — 1 A vil in Prussia, prov. Pomerania, gov. and 67 m. E. of Chelch, which connects the Lake of Leba with the Baltic. It has a church, a fishery and a trade in wood and salt. Pop. 942. — 2, A lake, near above town, about 10 m. long, by 4 m. broad, and formed by the expansion of the river Leba. It communicates, by a canal, with the Baltic — 3, A river Prussia, which rises in Lake Sennow circle Courland, gov. Danzig, flows first N., forming the boundary between Gouv. Danzig and Chelch, then N.W., and discharges itself into the lake of same name, after a course of about 45 m. It is well supplied with salmon.

LEBADA, a tn. Greece. See **LYBADA**.

LEBANON, numerous places, U States, America — 1 A tn. Pennsylvania, on the Union Canal, 7 m. E. Harrisburg with a courthouse, jail, five churches, an academy, and several schools, and a number of breweries, mills and printing-offices. Pop. 2500. — 2, A vil. Ohio, 70 m. W.S.W. Columbus, with a courthouse, jail, three churches two iron foundries, two woolen factories, and two printing-offices. Pop. 1500. — 3, A vil. Tennessee, 22 m. E. by N. Nashville. It contains a courthouse, jail, three churches, and two academies and near it is a large steam cotton factory. Pop. 1500

LEBANON (Mountains or) [Latin, *Libanus*, German, *Libanon*, French, *Liban*] two nearly parallel mountain ranges, which, connecting in the N. of Palestine, about lat. 34° 25' N., stretch S.S.W., enclosing between them a valley about 70 m. long, by 15 m. wide, now simply distinguished by the name of El-Bukaa, 'the valley, best known anciently by the name of Coela, or Koldi Syria' [Hollow Syria]. To distinguish the two ranges—that on the W. is called Lebanon, and that on the E. Anti-Lebanon; the Arabs, however, call the former Jebel-Lebanon, and the latter Jebel-sh-Shukri Lebanon, which lies almost parallel to the Mediterranean, and at no great distance from it, may be considered as terminating near the coast, a little N. of the mouth of the Litani, between Tyre and Beirut. It is the far loftier range of the two, and presents almost a continuous ridge without any marked break. It has never been accurately measured, but

the loftiest summit—Jebel Sannin, near Beirut, is supposed to be at least 10 000 ft. above the sea. Though under the snow limit, snow and ice remain throughout the year in the ravines around and below its summit, and, at a distance, assumes the appearance of radiant stripes. Anti-Lebanon has a much lower average height, but claims the extraordinary point of the whole chain in Jebel es-Sheikh, which is situated W.S.W. from Damascus, and has probably, a height of about 11,000 ft. At this point, where the two ranges head towards each other, and almost meet, leaving only a small narrow gorge, through which the Litani has forced its way, the chain properly terminates, though a range of lower heights is continued S. as far as the shores of the Lake of Tiberias. The prevailing rock of Lebanon is limestone, of a whitish colour, and from this its name, which means 'white', is supposed to be derived, though others ascribe it to the snows which cover it. The waters which descend from the W. slopes of Lebanon, are carried directly to the sea, without being accumulated into any proper stream, those on the E. slopes of Anti-Lebanon go chiefly to augment the Barada, to which the plain and environs of Damascus owe so much of their fertility and beauty; the slopes of both ranges bordering El-Bukaa send their waters to the Litani, which flows between them in a S.S.W. direction, and, shortly after, escaping from their barriers, turns W. and falls into the sea. In the S. part of the chain, the Upper Jordan has its source. The loftiest summits of Lebanon, presenting lofty precipices and wild narrow gorges, are almost absolutely barren, but at some distance below vegetation makes its appearance, the pastures become verdant, and, by means of artificial terraces, cultivation is successfully carried on upon rugged slopes where it would otherwise be impossible. The forests of cedar, for which Lebanon was anciently celebrated, have almost disappeared, except from some of the more inaccessible crags. It was indeed long supposed that the only cedar-groves upon the chain, was on a lofty summit N. of that of Jebel Sannin, where several trees, remarkable for their size and age, are seen, but others have since been found, and many trees, old and young, are scattered widely in many parts. The other prevailing forest trees are firs and oaks. — (Robinson's *Researches in Palestine*, Wilson's *Lands of the Bible*, &c.)

LEBBEKE, a vil. and com. Belgium, prov. E.landers, 18 m. E. by S. Ghent. It has a church, mills, saw-mills, tan-works, dye-works oil-presses, flour-mills, and a manufactory of chinery. Weaving employs a considerable portion of the inhabitants. Pop. 4376.

LEBDJAN, or **LEBDEJAN**, two tns Russia — 1, Gov. and 111 m. W.N.W. Tambov, on the Don. It contains seven churches, and carries on a considerable trade, having, in particular, four yearly fairs, at which a great deal of business is done in cattle and Cossack horses. Pop. 5082. — 2, Gov. and 77 m. W.N.W. Khar'kov on the Akhechaula. It is surrounded with an earthen wall and ditch, and contains 13 wooden churches. Pop. 3971.

LEBENY or **LEBENY**, a vil. Hungary, Thibier Danube, co. Wieselburg, near the Rapava, 3 m. from Ektivony, having two churches, and the buildings of an abbey, with an old Gothic church. Pop. 2098.

LEBIDA, or **LEBNA** [anc. *Lepta Magna*], a ruined tn. in Africa, on the Mediterranean, 65 m. E.E.E. Tripoli. It contains magnificent remains of columns, inscriptions, basins, an aqueduct, an amphitheatre, and a triumphal arch.

LEBRISA [anc. *Sebrasa*], a tn. Spain, Andalusia, prov. and 28 m. E. by W. Seville, near 1 bank Guadalquivir. It is tolerably well built, and has several squares, wide, though indifferently paved and dirty streets a large church, formerly a mosque, in a mixture of the Arabic, Roman, and Gothic styles, five chapels, a townhouse, college, several schools, a well-endowed hospital, prison, convent and the remains of an ancient castle, with eight towers. Manufactures—cloth, freeze, thread, hempen fabrics, glass, earthenware, soap, chocolate, hats, brooks, tiles, &c. Pop. 6371. — (Madox.)

LEBRISA, or **CARACIVALLA**, a river New Granada, which rises about 80 m. E.W. Pamplona, near lat. 7° N., lon. 73° 40' W., flows N.W., and joins a bank Magdalena, a little below the point where it begins to form the Isla de Morone, after a course of nearly 180 m. Its chief affluents, all of which it receives on the right, are the Baruta, Samaholota, and Oro.

LEBON, a *tn.* France, *prov.* Roumoules, gov. and 7 m. N. *Frankfurt*, cap. *and* 1 bank *Off.* *It* was once strongly fortified, but has become a very insignificant place; with a church and a bakery. Pop. 1748. — The castle is flat, well wooded, and fertile. Area, 470 sq. m. *Pop.* 68,063.

LEBUS [*Latin*, *Lebus*, *Lebus*, or *Lebus*] a *tn.* Naples, *cap. prov.* Terra d'Otranto, 50 m. E.S.E. *Taranto*. It is surrounded by a deep ditch, and walls flanked with towers, and also defended by a castle or citadel. The space which it occupies is the larger than its present population requires, and hence it has consisted of a deserted appearance. It is, however, a regular, well-built town. The houses are large and solidly constructed, though unfortunately of a soft porous stone, which readily absorbs moisture, and is said to be one cause of the general prevalence of catarrh. The most conspicuous edifices are the churches, of which there are 32 almost all Gothic, and deficient in lightness. The cathedral shares in this defect, but its interior is majestic, and does not offend the eye by the gaudy and grotesque ornaments which have been lavished on the other churches. The roof is of wood, shaly carved and gilt. *Lebus* is the see of a bishop, and the seat of a high tribunal, and of a civil court. It also possesses a royal college, seminary, foundling hospital, and theatre. The manufactures consist of woollens, cottons, silks, lace, and particularly of stuff, which is made in a large royal factory and is in high repute throughout the kingdom. This trade is chiefly in stuff and tobacco, cotton, oil, and wine. Pop. 14,456.

LECCO [*Latin*, *Leucus*] a *tn.* and *com.* Italy. Lombardy *prov.* and 18 m. E. N. E. *Lecco*, *cap. dist.* on Lake Como, at the point where the *Adige* issues from it, and is crossed by a handsome bridge of eight arches. It was once walled, and is the seat of a court of justice, contains a church, and has extensive manufactures of iron ware, and of articles in iron and copper, silk and cotton mills, a small haven, at which a trade is carried on, chiefly in silk of the district and transit goods and an important annual fair, which lasts 15 days. Pop. com. 4933. *dist.* 18,427.

LECCO, a *tn.* Spain. *Aragon* *prov.* and 86 m. S.E.E. *Saragossa*, *cap. r.* *San Agustin*, with a church, and a primary school; manufactures of silks, and woolen and linen cloth, and some trade in drugs. Pop. 1191.

LECH, a river Germany, which runs in the Tyrol, in the mountains of *Venezia*, a little E. of *Bladenau*, flows N. E. *autem* *Munich*, and proceeds almost due N. past *Angburg*, to its junction with *r.* *bank Danube*, about 12 m. above *Neuburg*, after a course of nearly 150 m. Its principal affluent is the *Wernich*. Its current is very impetuous, through a deep rocky channel. It forms numerous cascades, and is *workable* *avigable*.

LECHENICH a *tn.* Rhénish *Prussia*, gov. and 10 m. S.W. *Cologne*, at the confluence of the *Erft* and *Kessel*. It is walled, entered by two gates, and is poorly though not irregularly built, has a court of law, two E. Catholic churches, manufactures of linen and a trade in horses. Pop. 1417.

LECHHAUSEN, a *tn.* Upper *Prussia*, *r.* *bank Lech*, here crossed by a bridge, 2 m. N. E. *Angburg*, with a church, manufactures of silk goods and wax-cloth, a trade in cattle, in linen and two other mills. Pop. 3169.

LECHLADE, a *tn.* *England*, *com.* *Gloucester*. The town, *r.* *bank* *Thames*, 47 m. E.E. *Gloucester*, is neatly built, has a fine ancient church, with a remarkably elegant spire, and a Baptist chapel. Area of par. 3542 ac. Pop. 1287.

LECK, a river, *Holland*. See *LEE*.

LECK, *par* *Irel.* *Dougal*, 10,461 ac. Pop. 2811.

LECKFORD *par* *Eng.* *Hants*, 2286 ac. Pop. 256.

LECKHAMPTON, *par* *Eng.* *Bucks*, 2322 ac. Pop. 518.

LECKHAMPTON, *par* *Eng.* *Gloucester*, 1230 ac. Pop. 2149.

LECKFIELD, a *par* *England*, *York* (E. *Riding*), 4680 ac. Pop. 882.

LECKPATRICK *par* *Irel.* *Tyrone*, 18,347 ac. Pop. 5224.

LECKWITH *par* *Wales*, *Glamorgan*, 1902 ac. Pop. 114.

LECHROFT *par* *Scot.* *Perth*, 3102 ac. Pop. 442.

LECTOURE [*Latin*, *Lectura*, *Oratio*, *Lectio*], a *tn.* *France*, *cap.* and *near* *r.* *bank* *Grave*, 30 m. N. *Amek*, standing a lofty isolated rock. Its position is thus at once strong and picturesque, but the town itself is by no means handsome. It has a large and massive church, built by the English, in the

Norman style, an old episcopal palace, now occupied by courts and public offices; and a marble statue to *Marshall Lorne*, Duke of Bellune, who was born here, at a hospital, a court of first resort, a communal college, and an agricultural society; manufactures of serge, coarse woollens, and leather; and a trade in corn, cattle, wine, and brandy. When the Romans invaded Gaul, *Lectoure* was the capital of the *Lecturani*. It afterwards became a Roman colony and contains numerous Roman remains. In modern times, it became a place of importance as a fortress. The Duke of Montpensier was imprisoned in it, in 1695, previous to his execution at *Toulon*. Pop. 5107.

LECZNA, a *tn.* *Russian* *Poland*, 165 m. E.E.E. *Warsaw*, on the *Wipera*, with three churches, and two important fairs. Pop. 1800.

LEDA, a river, Germany, formed by the union of the *Ohe* and *Marka*, on the frontiers of *Oldenburg* and *Hannover*, flows first N. W., then W., and joins *r.* *bank* *Elbe*, a little below *Leine*, after a course of 24 m., of which part is navigable. **LEDARA**, a *tn.* Spain, *New* *Castile*, *prov.* and 59 m. W. S. W. *Caceres*, with a church, townhouse, prison, and two primary schools, and a trade in corn, wine, oil, and cattle. Pop. 1100.

LEDBURY a market *tn.* and *par* *England*, *co.* *Heredford*. The town, on the declivity at the S. extremity of the *Malvern Hills*, 15 m. E. by *R.* *Heredford*, has a handsome ancient church, in the Norman style, with a detached tower, surmounted by an elegant spire; various Dissenting chapels, an hospital, several almshouses, a dispensary, a reading and sewing room, and an extensive circulating library. There were in August. The manufactures of silk and broad-cloth which formerly flourished here, has declined but spinning and weaving are still carried on to a considerable extent, and there is a brisk trade in cheese and other; for the excellence of both of which articles, produced in great abundance in the vicinity the town has long been famed. The traffic of the place is materially benefited by the canal between *Glooucester* and *Heredford*. Area of par. 2184 ac. Pop. 4624.

LEDEN, a *vill.* and *com.* *Belgium*, *prov.* *Flanders*, 12 m. E.S.E. *Ghent*, with a church, townhouse, school, two distilleries, two breweries, a canyary tobacco-factory, two dye-works, and a rope-walk. Pop. 4168.

LEDEBEG a *vill.* and *com.* *Belgium*, *prov.* *Flanders*, at the junction of the railways from *Ghent* to *Tournai*, and *Ghent* to *Courtrai*, 2 m. E.E. *Ghent*, with two castles, manufactures of calico, and distilleries, breweries, oil, flour, and cotton mills. Pop. 2119.

LEDEGHEM, a *vill.* and *com.* *Belgium*, *prov.* *Flanders*, 1 bank *Huile*, 23 m. S. *Bruges*, with manufactures of tobacco and candles several breweries, an oil-mill, and a trade in flax and linen. Pop. 3698.

LEDENITE, or *LEDENIK* (UTTER DEN LANTENEN) a market *tn.* *Bohemia*, *circle*, and 9 m. E.S.E. *Budweis*, with a church, a school, townhouse, distilleries, a brewery, and a mill. Pop. 985.

LEDERMA [*Latin*, *Leidema*], a *tn.* Spain, *Leon*, *prov.* and 20 m. N. W. by *R.* *Salamanca*, on a hill, 1 bank *Tormes* here crossed by a handsome bridge. It is well built, has six churches, two chapels a townhouse, hospital, two schools, and a convent, and manufactures leather and linen. Pop. 1571.

LEDITSCH [*Latin*, *Leidema*], a *tn.* *Bohemia*, *circle*, and 17 m. S.W. *Olomouc*, on the *Samava*. It has a fine castle, a deanery church, a townhouse, burgher-hospital, a school, a brewery, and three mills. Pop. 1948.

LEDHAM *par* *Eng.* *York* (W. *Riding*) 5176 ac. Pop. 1098. **LEE**, three *para.* *Eng.* — 1, *Bucks*, 800 ac. Pop. 126. — 2, (*Nottingham*), *Salop*, 1267 ac. Pop. 302. — 3, (*Nottingham*), *Salop*, 664 ac. Pop. 141.

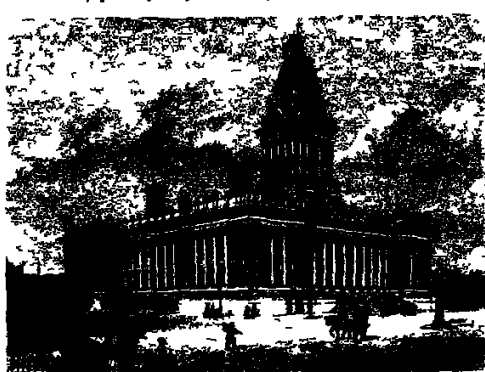

LEE, two rivers, *Ireland* — 1, *Co.* *Cork*, rises in *Lake Gougane-Barra*, and after a course of 2 m., falls into the harbour of *Cork*. — 2, *River* in *co.* *Kerry* and, after a short course, falls into *Trillick Bay*.

LEE, a *vill.* and *par* *England*, *co.* *Kent*. The village, 7 m. S.E. by *E.* *London*, formerly consisted of a few detached houses, but now contains numerous handsome mansions and elegant villas, has an elegant parish church, with a lofty spire; a handsome grammar-school, several almshouses, and other edifices. Area of par. 1975 ac. Pop. 3553.

LEEDS, *par* *Eng.* *Kent*, 1619 ac. Pop. 863.

showed us to have three fronts, one of which, containing the main entrance, has an imposing appearance; and is so arranged as to embrace a new-room, concert-rooms, and various public offices the stock exchange, an ornamental structure of the composite order the court-house, a plain building, with a neat Corinthian portico, and a fine bronze statue of the late Sir Robert Peel placed in front of it, the industrial school, and the new house of recovery, beautiful Elizabethan structures, with highly decorated fronts and octagonal towers; the borough jail a recent erection on improved principles, at an expense of £42,000 the philosophical hall, a handsome building, partly occupied as a museum, and the central market, a spacious covered building, with a Grecian front, spacious shops, and avenues of stalls. But the handsomest edifice is the town-hall, opened by the queen in 1858, and considered

one of the noblest institutions in the kingdom, and numerous other schools in connection with the Established Church or the various bodies of dissenters. Among literary and scientific institutions, are the Church Institute, the Literary and Philosophical Society, and the Mechanics' Institute, the latter one of the most flourishing of its kind in the kingdom; and there are several good libraries, especially the Leeds Library, originally founded by Dr Pease in 1785; and the new subscription library, of much more recent origin. The leading charitable establishments are the infirmary in the benefit of which in-door or out-door patients to the number of about 8000 annually participate and for which a new and splendid building has just been erected in a healthy situation at a cost of £100,000; the house of recovery, intended for fever and other infectious diseases; the dispensary the eye and ear infirmary; several hospitals and almshouses and a variety of philanthropic institutions, as the Tradesmen's Benevolent Society, the Strangers' Friend Society, the Church Visiting Society, &c. There are several public baths that on Woodhouse Moor was opened in 1855, the others more recently.

THE TOWNHALL, LEEDS.—From a photograph.

one of the finest municipal buildings in the kingdom. It is a rectangular pile, measuring 260 by 200 feet, standing on an elevated platform, and presenting four handsome facades enriched with Corinthian columns and pilasters, supporting a bold entablature. Opposite the E. front, which has a deeply recessed portico of 10 columns, and is approached by a flight of 35 stone steps 165 feet long stands a fine bronze statue of the Duke of Wellington. Over the principal entrance, which is through a marble vestibule 70 feet high in the E. front, rises a square clock tower surmounted by a richly ornamented dome and having a height of 225 feet. In the vast block of building are contained two large courts for the West Riding justices, which are now held here, a police court, and other offices and the Victoria Hall a magnificent room, 180 feet long, 75 feet wide, and 75 feet high. The ceiling is arched and divided into panels, the sides are indented by five bays, with coupled Corinthian columns 30 feet in height, and at the N. end is a circular space occupied by an organ which cost £5000. The exterior height of the building is about 65 feet, but the roof of the Victoria Hall in the centre rises to an altitude of 93 feet. Enclosure of the land, fittings, and organ, the town-hall cost about £100,000; it will contain 2600 persons sitting, or nearly 8000 standing. The principal educational establishment in which classical instruction is given, is the free grammar-school originally founded in 1562 and handsomely rebuilt in 1826, and enriched by bequests, so as to have an income of about £2700 and the privilege of an exhibition at Oxford, and four scholarships at Cambridge; the average attendance is over 200; of the income, £550 is applied to the repair of highways, and £400 for the relief of the poor. For a liberer education, a fine place belongs to the industrial school already mentioned, the buildings and grounds of which cover 6 acres, and provide accommodation for 300 children, teachers apartments dining-hall armchairs, and all other requisites, on the most complete scale. There

are also a mechanics' institute school, and numerous other schools in connection with the Established Church or the various bodies of dissenters. Among literary and scientific institutions, are the Church Institute, the Literary and Philosophical Society, and the Mechanics' Institute, the latter one of the most flourishing of its kind in the kingdom; and there are several good libraries, especially the Leeds Library, originally founded by Dr Pease in 1785; and the new subscription library, of much more recent origin. The leading charitable establishments are the infirmary in the benefit of which in-door or out-door patients to the number of about 8000 annually participate and for which a new and splendid building has just been erected in a healthy situation at a cost of £100,000; the house of recovery, intended for fever and other infectious diseases; the dispensary the eye and ear infirmary; several hospitals and almshouses and a variety of philanthropic institutions, as the Tradesmen's Benevolent Society, the Strangers' Friend Society, the Church Visiting Society, &c. There are several public baths that on Woodhouse Moor was opened in 1855, the others more recently.

Leeds stands in the centre of one of the most important coal fields of England, it is accessible from the sea, by the river Aire, by vessels of 150 tons communicates by canals both with the Mersey at Liverpool, and the Humber at Goole and many manufacturing towns; and has become the centre of a network of railways, leaving it almost nothing to desire in respect to facility of transport. These great advantages have been turned to good account, and the prosperity of the town already rapid almost beyond example, continues to increase in woollens, one of the great staple manufactures of the kingdom, it takes a decided lead. For a long time, only the coarser kinds of woollens were manufactured, and the greater part of the weaving was performed by domestic looms. But the valuable improvements in machinery and other processes, in the invention and perfecting of which Mr William Hirst, a native of the place, greatly distinguished himself, have led both to an immense increase of the quantity and improvement in the quality of the goods. Cloths which, for fineness and colour cannot be surpassed are now regularly produced. The most important woollens made here are super fine broad-cloths, coarse sermons, pelton cloth, shawls, Scotch camlets, blankets, &c. The greater part of the cloth is disposed of in the cloth halls. These are two immense and most un-usually brick buildings, in each of which two weekly markets are held, and the goods ready for sale are brought forward and arranged for inspection in avenues of stalls. The one called the White Cloth Hall is for undyed goods; the other is for dyed goods, on which all the processes of manufacture have been performed except shearing or finishing. Goods to the value of between six and seven millions sterling are annually sold by the Leeds merchants. Flax spinning and weaving are likewise extensively carried on and employ almost as many hands as the woollen manufactures. The largest flax mills in Europe are in the suburbs of Holbeck. The manufacture of locomotive steam-engines employs about 5000 hands; there are several tool-making establishments and machine-making is extensively carried on. Other manufactures, of a greater or less extent, are cotton and silk goods, leather, Spanish morocco leather, glass, earthenware, mustard, chicory and tobacco. There are also several extensive oil-mills in the town and neighbourhood. A chamber of commerce, commercial exchange, and a stock exchange have been established for the benefit of trade, and several markets, the principal of which are Kirkgate market, for general produce, and Southside cattle market, supply the domestic and other wants of the district. Ordinary markets are held every Tuesday and Saturday; cattle markets

every Wednesday; leather flies eight times a year; and general fairs in July and November.

Leeds is first charter of incorporation in the 11th of Charles I. and a second, the former having been forfeited, in the 15th of Charles II. The parliamentary borough is co-extensive with the parish, and 30 m. in circuit. It returns two members to Parliament. Registered electors (1884) 8,400. The vicinity of the town is crowded with villages, most of the inhabitants of which are employed in manufacturing for the Leeds market; and adorned with many handsome villas, but the only object possessed of much interest is the fine ruin of Kirkstall Abbey about 2 m. distant. The most eminent natives of Leeds or its vicinity are Emerton, the engineer of Eddystone lighthouse Dr Priestley, Dr Richard Bentley and the two Milners, Joseph and Isaac, both distinguished as theologians, and the former author of a well-known church history.

The population of the different townships which make up the parish or parliamentary borough of Leeds, and of which the town proper is considered as a single township, is exhibited in the following table—

| Townships. | Pop. 1881. | Pop. 1881. | Women in 1881. |
|---|------------|------------|----------------|
| Leeds | 101,281 | 117,698 | 58,908 |
| Hallbeck | 14,128 | 16,824 | 8,881 |
| Hunslet | 10,473 | 33,600 | 5,888 |
| Ardsley | 5,138 | 5,784 | 1,649 |
| Beeston | 1,073 | 2,247 | 543 |
| Bransford | 8,248 | 8,690 | 2,149 |
| Chapel Allerton | 1,487 | 8,883 | 627 |
| Farnley | 4,723 | 8,961 | 628 |
| Hemlingley cum Ilkley | 4,104 | 9,674 | 2,067 |
| with Kirkstall | 1,884 | 1,878 | 87 |
| Potter-Newton | 7,882 | 13,008 | 2,713 |
| Wetherley | 16 | 13 | 3 |
| Hamlet of Goldthorpe | 254 | 271 | 57 |
| Hamlets of Omsandthorpe, Wharfedale, and Thoresby | | | |
| Total population of borough | 171,805 | 207,165 | 104,174 |

The total population, which in 1851 was 165,502, had risen in 1886 to 228,167.

LEEDS, a vil. and com. Belgium, prov. Brabant, on the Voor 13 m. E. Brussels. It has a fine castle and a blast-furnace, the first established in the province. The chief employment is agriculture. Pop. 1722.

LEEK a market tn. and par. England, co. Stafford. The town, 28 m. S. by E. Manchester has well paved streets, and remarkably clean streets; some houses of rather an antique appearance and many good modern buildings, two churches, a R. Catholic and several dissenting chapels, a town hall, a union workhouse, a grammar-school, two news-rooms, a mechanics institute, a dispensary eight almshouses and other charities. The manufacture of sewing silks, twist, ribbons, galleons, and a variety of other small silk wares is carried on to a great extent. Many females also find employment in embroidery. Leek is likewise noted for the excellence of its black dye. Area of par. 34,370 ac. Pop. 18,938.

LEEK (Worcester) par. Eng. Warwick 1860 ac. P. 428. LEER (Dale), a vil. Holland, prov. and 8 m. S.W. Groningen. It is a closely built, flourishing place, with a church and a synagogue. Around it ponds are cut in great quantities, and, with making of beams, forms the chief employment. In winter, skaters come from all parts round about and return with bundles of Leek beams on their heads. Pop. 1084.

LEERDE, a vil. Holland prov. N. Brabant, 6 m. S. E. Eindhoven, on the Kleine Dommel, with a R. Catholic church and three annual cattle fairs. Pop. 619.

LEERD, a vil. Holland, prov. Groningen, 21 m. W. by N. Appingedam, with two churches and a school. Pop. (agricultural), 522.

LEER, a tn. Hanover, E. Prussia, gov. and 17 m. S. Westph. co. hall, r. bank Leida. It is poorly built, has dark narrow streets, two churches, a townhouse, gymnasium, and three almshouses; manufactures of linen, vinegar-works, distilleries and breweries, building-yards, at which a considerable number of vessels are fitted out; and a harbour at which a considerable trade, chiefly in agricultural produce, is carried on. In 1846 680 female entered, and 565 left the port, they were mostly Hanoverian. Pop. 6719; hall, 3086.

LEERDAM, a tn. Holland, prov. S. Holland, 26 m. E.

Rotterdam, 1, bank Linge. It is very regularly built, streets nearly all E. and W. and forms a parallelogram, surrounded by walls now planted with trees, and ditches, and has two churches, several schools, an orphan hospital, scene tanning and glass-blowing, and a horse market. Pop. 1685.

LEERDUM, a vil. Holland, prov. and 15 m. S.E. Utrecht, with church and school. P. (agricultural), 654.

LEESBURG a post vil. U. States, Virginia, 24 m. N. Washington, with a seat court-house, jail, market house, bank, three churches, an academy a female seminary, and 650 houses.

LEEST a vil. and com. Belgium, prov. and 16 m. N. Antwerp, on the Senne; with manufactures of linen, a distillery, a corn and a walk mill. Pop. 1430.

LEEUW (St. Francis) a vil. and com. Belgium, prov. Brabant, 8 m. S.W. Brussels. It has breweries, distilleries, an oil-works, and two flour-mills. Pop. 3814.

LEEUWARDEN (Frislan, *Louswert* Latin *Leopoldia*) a tn. Holland the largest in prov. Frisland 70 m. N.E. Amsterdam, lat 53° 12' 14" N., lon 5° 47' 41" E. (p), in a fertile plain on the Ee, 10 m. from the sea, though once it lay on the shores of a deep bay. It is surrounded by a deep, broad ditch, with an exterior talus planted with trees, and the site of the walls has likewise been formed into a planted promenade. The town is well built, adorned with numerous elegant buildings, both public and private, is intersected by numerous canals, and is rapidly increasing. The principal buildings are the former court of the stadholders of Frisland, a plain looking structure, now converted into a royal palace the Government house, a large, fine edifice, the old Landhuis, now used for the courts of first resort the house of correction an extensive building, in which the prisoners are arranged in four classes and are employed in manufacturing wool into yarn cloth, night-caps, &c; the civil and military prison, completed in 1571 a rich specimen of mixed brick and stone work, the large handsome townhouse, which stands near the palace; the weigh-house, corn exchange, new barracks, and the churches of which there are three Calvinistic, one Evangelical Lutheran a Baptist a R. Catholic and a synagogue. The benevolent institutions include two general and three orphan hospitals two poorhouses and several schools for the poor.

Of other schools there are three Latin, a town a commercial, and numerous elementary and intermediate and there are likewise several learned societies, as the society for Frisian history antiquities, and language a natural history society &c., and also various associations for the distribution of tracts, of Bibles, and other religious purposes.

Leuwarden carries on a considerable trade in the produce of the province. It has a famed weekly market, an annual well-attended cattle market, and two horse markets, for the convenience of all of which there are several large market-places. It likewise has two breweries, eight distilleries, five potteries, seven tan yards, eight boat-building yards, as many rope-walks manufactures of sherry tobacco soap, and linen and saw oil cement, walk, and corn mills. P. (1859) 24,506.

LELUWEN (Cape), the most S.W. point of Australia lat. 34° 32' S., lon 115° 6' E., 174 m. S. Swan River and about the same distance W. from King George's Sound.

LEWARD ISLANDS, the West Indian Islands between lat. 15° and 16° N. See INDIAN ISLANDS.

LEFFE, a vil. Italy, Lombardy, prov. and 12 m. E.N.E. Bergamo with a parish and several auxiliary churches, manufactures of cloth a silk-mill and a steam of lignite, which is worked to some extent. Pop. 1300.

LEFKONIA cap. Cyprus. See NICOSIA.

LEFOUKA or I xepoda one of the Tonga Is., R. Pacific Ocean lat. 16° 48' 12" S., lon 174° 30' W. (a), about 7 m. long and 3 m. broad. The inhabitants in 1890 relied on the privateer *Fort-ne-France*, and measured nearly the whole of the crew.

LEGAA a market in Bavaria, circle Schwab, 15 m. N.W. Kempten, with two churches, manufactures of tobacco-boxes; three mills and a trade in cattle. Pop. 1287.

LEGANES, a tn. Spain New Castile prov. and 10 m. S.W. Madrid. It is indifferently built has three squares, a church three chapels, a townhouse, prison, hospital, two schools, an extensive infanterie barracks, and several handsome palaces and villas of the nobility and wealthy merchants of Madrid. Manufactures—long chocolate, and oil. P. 1865.

LEGANIEL, a vil. Spain, New Castile, prov. and about

28 m. from Casaca. It has 111 formed and irregular streets, a parish church, court-house, prison, primary school, museum, factories of articles in wax, and a trade in wax. Pop. 1104.

LEGAZIA is a town, Italy, prov. Bergamo. It is situated chiefly of a square and a well-paved street, has a Gothic church with three naves, a handsome Lombard palace, a Jesuit primary school, and manufactures of articles in iron and steel, a paper and several flour mills. Pop. 1135.

LEGNHORN, par. Eng. L'Anson, 1910 sq. Pop. 551. **LEGN**, a tn. and com. France, dep. Loire-Inférieure, 22 m. S. Nantes, r. bank Loire. During the war of La Vendée it was almost reduced to a heap of ruins. It has a handsome church, cathedra of granite, and some trade in grain, cattle, wine, and fruit. Pop. 3401.

LEGELSHOFST, a vil. Sweden, circle Middle Rhine, hall. Rorik with a church, and several breweries. Pop. 1405.

LEGEND, a vil. Hungary. Higher Danube, on Neograd, 8 m. from Buda, with a trade in wine. Pop. 1121.

LEGER (Br.), two places Belgium.—1 A vil. and com. prov. Luxembourg on the Ton, 9 m. S.W. Arlon. It has two breweries, several oil, paper, saw and flour mills and a distillery. Pop. 1805.—2 A vil. and com. prov. Hainaut, on the Esplan, 39 m. W. N.W. Mons. It has two breweries, a flour-mill, and a trade in agricultural produce. Pop. 1860.

LEGER (Br.), several small towns France.—1 Dep. Yonne, about 10 m. from Avallon; the birth place of Voltaire in whose untried skill, as a military engineer almost every fortress in France is indebted. Pop. 1833.—2 (near D'Honn) Dep. Saône-et-Loire 12 m. W.S.W. Châlon. Near it are extensive gypsum quarries, and several coal pits. Pop. 1856.

LEGHORN (Br.), par. Sicily, 6480 sq. P. 587.

LEGHORN (Italian, Livorno, French, Livourne, Latin, *Portus Etruscus Livornus*) a seaport in Tuscany, comp. Pisa, on the extremity of a tongue of land which stretches into the Mediterranean; lat. (high tide) 43° 32' 42" N., lon. 10° 27' 45" E. (s.), 50 m. W.S.W. Florence with which, and with Pisa, it is connected by railway. It is built entirely in the form of a square, surrounded by modern walls, with five

towers and establishments are the Duomo, originally only a parish church, and of much limited dimensions, that a new cathedral, on a larger scale, has been begun, but possessed of a facade designed by Luigi Jones and several good paintings; the church of the Madonna, with good pictures by Botticelli and 11 Vallommone; two Greek churches, a synagogue richly ornamented with marbles; a mosque, a dotal palace of little architectural merit; a marble statue of Ferdinand I., by Pietro Tacca; the inscription of San Jacopo, San Jacopo, and San Leopoldo, all well-managed institutions and remarkable structures, particularly the last, which is one of the most magnificent works of the kind in Europe; the Torre de Marzocco, built of red marble, and so called from the Marzocco or Lion by which it is surmounted; a theatre, public library, and aqueduct. The manufactures consist chiefly of articles in coral, of which there is a valuable delivery; woollen and silk goods, straw bonnets, glass, paper, soap, cordage, leather, starch, &c.

Possessing the privileges of a free port, Leghorn has an extensive trade, both general and transit, furnishing the chief source of its prosperity. The harbour is of large extent, but somewhat difficult of entrance, from the numerous shoals which surround it. It is also much silted up particularly in the inner harbour, which is now chiefly used for repairing and building docks. The outer harbour is protected by a sea mark, which extends about 1 m. into the sea. The depth of water at low tide is not more than 18 ft. and diminishes rapidly towards the interior, making it inaccessible by vessels of large burden. The roadstead, lying W. K. W. from the harbour, is protected by a long sandbank, which breaks the violence of the waves; and, though exposed at times to a heavy swell, has good anchorage in ample depth. The principal exports are raw and manufactured, straw, raw and plaited, straw bonnets, huxes and huxes seed, fruit, wine, oil, coral, marble, paper, timber, corn, hemp, aniseed, &c., the principal imports, colonial produce, raw cotton, coarse and fine cotton, woolen goods, dyestuffs, seeds, hardware, earthenware, painted glass, &c. The number of vessels entered in 1862 was 7586, of 831,464 tons, cleared 7616, of 839,514 tons.

Leghorn is the see of a bishop, the residence of a civil and a military governor, the seat of a court of primary resort, a chamber of commerce, foreign consulates, sanitary directory, several important public offices, and library, scientific, artistic and benevolent institutions. Though originally a Roman port it has not a vestige of antiquity, and had dwindled down into a fishing village, when its great capabilities for commerce were discovered by the grand-dukes of the Medici family who surrounded it with fortifications, constructed its harbour and bestowed upon it valuable privileges of which not the least important was full toleration to all nations and creeds. It suffered much during the expediency of Napoleon from his continental blockade, but recovered so rapidly after his downfall that it has more than doubled its population since 1835. P. 83,543.

LEGHORN or **COUNT HENDEN ISLAND**, a group, N. Pacific, Marshall Archipelago, Caroline; the centre is. lat. 9° 51' 30" N., lon. 160° 15' 30" E. On the N.W. of the group are several large islands, well covered with coconut trees. The natives are tall, handsome, robust men, and live chiefly on fish.

LEGER (Br.), a vil. Switzerland, on the Vaud, dist. and about 5 m. from Yverdon. It is surrounded by fine villas, and has a trade in wine, and an important annual cattle market, held in winter. Pop. 771.

LEGNAGO, a tn. Italy, Veneto, prov. and 22 m. S.E. Verona, dep. dist. r. bank Adige, here crossed by a wooden bridge. It is very fertile, has a court of justice, and several public offices, a parish church, and two oratories; a gymnasium, and a civil hospital; manufactures of silk and straw, and a trade in grain. The foundation of the latter makes the vicinity unhealthy. The French were defeated here in 1221. Pop. 5900.

gate, and well built, consisting generally of quays, single and well-paved streets. It is of comparatively recent origin, having been a mere fishing village up to the middle of the 15th century and hence presents few objects of interest in architecture and art. The most remarkable feature

LEGNALJA, a town and com. Tuscany, 1 bank Arno, close by Florence, of which it may almost be considered a suburb. It contains a number of fine villas, and has an extensive iron foundry. Pop. 11,120 com. 9434.

LEGNANO, a town and com. Italy, Lombardy prov and 16 m. N.W. Milan on the Olona, here crossed by two stone bridges, connecting the two portions of the town. It has a parish, and two auxiliary churches an hospital, educational establishment, and manufactures of cotton and silk goods and cotton and silk mills. In 1178, the Emperor Frederick Barbarossa was defeated here by the Milanese. Pop. 4790

LEGRAAD, a market in Hungary, Thibody Comba, co. Szabolcs, 8 bank Drava, at the confluence of the Mar, 94 m. E. Warasdi; with a townhouse, and several mills. Pop. 2337

LEGHBY, par Eng. Lincoln 2886 ac Pop. 555.

LEHJ, or **LA**, a th. in the W Himalaya, cap. of Ladak or Middle Tibet, 3 m from r bank Indus, 310 m. N Simla, lat 34° 11' N lon. 73° 14' E, in a fine open valley about 11,000 ft. above sea-level. It is enclosed by a wall, surmounted at intervals with conical or square towers, and extending on each side, to the summit of the mountains. The streets are very irregular and labyrinthine, the houses vary in height from one to three stories, and are built partly of stone, and partly of unburned brick, and being white-washed, have a lively appearance. They have generally wooden balconies in front. The roads are flat and ill constructed of the trunks of poplars, covered with a layer of willow twigs and this with another of straw, a coat of mud overlaying the whole. The town contains a palace of the rajah, and several temples, all ex-

LEHRBERG, or **LEHREBERG**, a market in Bavaria, Middle Franconia, on the Rems, here crossed by a stone bridge, 26 m. W & W Hildesburg with a castle, church, synagoga and six mills. Pop. 1091

LEHRE, a town, Belopolskian, prov Onitza Gubernia, 168 m. S.E. Kozel; lat 29° 14' N lon 28° 34' E. It is on a site of between 1000 and 1500 houses, and is surrounded by a mud rampart strengthened with bastions. Pop. between 5000 and 6000.

LEHUA, or **OKHESIMA** ISLAND one of the smaller Sand which take off N and N.W. a new barren rock.

LEHIA a town in Punjab, on a small branch of the Indus, about 3 m. E. from the main stream, 204 m. W & W Lahore, lat 30° 59' N, lon. 71° 5' E. It has a large amount of both direct and transit trade, and is, besides, the mart for the produce of the surrounding country which is very fertile. The principal articles of sale are indigo, madder, sugar, silk, cotton, wool, iron copper glue, and grain. Pop. 16,000

LEHICZE, or **LYENICHA**, a town Hungary, Thibody Thoms, co. Zips, 1 m. S. Käsmark; with two churches, a high school, and manufactures of tobacco, ordinary linen, and damask and sulphur burnings, with a tanning establishment. Pop. 2400

LEIBNITZ, or **LEIBNITZ** a town Austria, Styria, 20 m. S. by E Grätz with a church, an old castle, a library and an hospital. Pop. 1100

LEICESTER, or **LEICESTERSHIRE**, an inland co. Eng. land bounded, N by co. Nottingham and Derby W by Derby and Warwick S by Northampton, and E. by Rutland and Lincoln, area, 515,840 ac. of which 480,000 ac. are

arable, meadow, and pasture. Surface varied and uneven; but possessing no bold features. The county is nearly equally divided geologically by the lias and sandstone formations the former occupying the greater portion of the E. the latter of the W side. The coal formation exists to a considerable extent on the W and the clay-slate in Charnwood forest. Besides coal limestone, gypsum, slate, whetstone, and clay are among the chief mineral productions. The principal river is the Soar which flows through the centre of the county. Nearly two-thirds of the county are in permanent pasture, the greater proportion of which is of the lias formation, the corn being chiefly on the sandstone. Along the banks

LEHJ.—from Harcourt and Tuckey's Travels.

tremely rude. Läh is important as the great rendezvous for the intercourse between the Punjab and Chinese Territory, and the principal mart for the sale of shawl wool brought from the latter region. Pop. variously stated from 4000 to 12 000

LEHE, a vil. Hanover principality Stade, dist. Brunen, on the Weser and Gessse, cap. hül. near Brumerhafen; with a church, the works, a trade in horses, and some shipping. Pop. vil. 1546 hül. 6160

LEHRESEN, a town Germany, Saxe-Meiningen, 7 m. S.E. Gumbach; with manufactures of silkworm. Pop. 997

LEHIGH, a river, U States, which rises near Wilkes-barre, Pennsylvania, and, after a S.E. course of about 100 m. joins 1 bank Delaware, at Easton. A canal from Easton to Whitehaven serves to open up an important coal-field.

LEHNIN, a town Prussia, prov Brandenburg gov and 14 m. W & W Potsdam; with a church, the ruins of an old monastery, and the works. Pop. 996.

LEHOTA, numerous places, Hungary:—1 (Péste) A vil. Hither Thoms, on Górház, 23 m. from Moosom with a church, iron mines, an iron-mill, and some transit trade. Pop. 981.—2. (Zene). A vil. Hither Danube, co. Bars, 20 m. from Schenau; with a church, and a trade in fruit and timber. Pop. 981.—3. (Zemly). A vil. Hither Danube, co. Liptov, 12 m. from Vichodna, near the Wamp. Pop. 900.—4. (Ade). A vil. Hither Danube, co. Buhl, 16 m. from Nertohl; with an iron-mill, and a trade in corn and cattle. Pop. 901.—5. (Péste). A vil., close by the former; with a church. P 1168.

of the streams, the pasture is devoted to the fattening of stock, or for meadows white on the higher and colder land, it is chiefly applied to dairy farming and the production of cheese, some of which is of that kind called *Bailton* but various qualities are manufactured. Barley is the principal crop, but wheat, oats, and beans, are all extensively cultivated, and produce excellent crops. The Leicestershire sheep consist principally of the old Leicesters, the new Leicesters, or Dishley breed, and the Charnwood or forest breed. They all produce long, crimping wool. Leicestershire is one of the great seats of the stocking manufacture, which is carried on in all the towns and villages in the county. Silk plants for hosi, lace, agricultural implements, pottery and firebrick are also made here. Owing to the openness of the country and other recommendations, Leicestershire has been long famous as a hunting country. *Milton Mowbray* being the head-quarters of the sportsmen during the season. It returns six members to Parliament four for the county; registered electors (1861), N division, 4029; S division, 5188; and two for the borough of Leicester. Principal towns.—Leicester, Loughborough, and Hinckley. It is intersected by numerous railways and canals. Pop. (1841) 316,867; (1851) 290,008.

LEICESTER, a town England, esp. and near the centre of above co., 88 m. N N London, on the North-Western and S Midland railways, 8 bank Soar, here crossed by a handsome modern and three ancient bridges. It possesses a fine promenade, called the New Walk and consists of a great

number of spacious streets, one of which, forming the principal thoroughfare, stretches from S. to N., above 1 m. in length, chiefly of brick, roofed with slate, are substantially though not very regularly built, and the whole town is well paved, well lighted with gas, and amply supplied with water. The more important public buildings are the church of All Saints, more remarkable for its antiquity than its architectural merit; with an ancient font, a curious clock, and fine wood carvings; St. Margaret's, a large and beautiful structure of the 16th century, exhibiting the different English styles, and surmounted by a lofty tower, with a fine chime of bells. St. Martin's, in the form of a cross, with a tower rising from its centre, and terminating in a spire, a window with beautiful stained glass, and an excellent organ; St. Mary's, with a tower and lofty crooked spire and roof, surmounted in part of intricately-carved oak. St. Nicholas, a very ancient Gothic church, said to have been partly built with the materials of a Roman temple, of which a considerable fragment is still seen in an adjoining wall. St. George's, a handsome modern structure, with a fine tower and spire, 170 ft. high, the guild-hall, the collegiate school, in the Tudor style, the public library and news-room, the corporation, county rooms, assembly-room, theatre, market square, county hospital, and county and borough jails. Besides the above, there are several places of worship belonging to the Established church, and 31 to the Dissenters—concluding, among the latter, nine Baptist, in one of which the celebrated Robert Hall long officiated, two Independent, three Calvinistic, two Wesleyan, and three Primitive Methodist; one R. Catholic, one Unitarian, and one Friends. The educational establishments, in addition to the proprietary college, already mentioned, include a free grammar-school, a school of design, and national, British, and infant schools, and among the more important benevolent institutions are Trinity and Warton's hospitals, a female asylum, and various other charities. The chief literary associations are a literary and philosophical society, with a good museum; and a mechanics institute, with a library of 2600 vols.

The staple manufacture is cotton and worsted hosiery, which furnishes an important export; and both in the weaving and other accompanying processes, employs the far larger part of the population. The other manufactures are shawls, lace, ropes and twines, thread, needles, pipes, and stocking frames. The trade is greatly facilitated by a canal, communicating with various lines of navigation, and more especially by railway. Markets are held three a-week; and fairs, chiefly for horses, cattle, and sheep, 12 times a-year. Leicester is a place of considerable antiquity and was known to the Romans under the name of *Rata*. A variety of Roman remains have been found in it at various times, and some so recently as 1851. Under the heptarchy, it formed part of the kingdom of Mercia; and in 874 was seized by the Danes, who made it one of their chief cities, and retained possession of it till Ethelred, daughter of Alfred the Great, and widow of the Duke of Mercia, expelled them, with great slaughter. It was thence surrounded by walls, and defended by a strong castle, both of which were demolished in the reign of Henry II. It suffered severely during the wars of Leicester and York, and also during the Parliamentary war—having, in the latter, been first taken by storm by the Royalists, and then re-taken by the Republicans. It sends two members to Parliament. Electors (1851) 4027. Pop. (1851), 60,664.

LEIGH, several places, England.—1. A market tn. and par., co. Lancaster. The town, 11 m. W. by N. Manchester with which and with Bolton it is connected by railway, contains an ancient castle, several Dissenting places of worship, and a R. Catholic chapel, a free grammar-school, a national, infant, and other schools; and has manufactures of silk fabrics, feathers, combs, and needles, carried on to a great extent; and now it is famous, glass-works, stone-quarries, and coal-pits. In 1764, Thomas High, rector-maker, of this place, constructed the first spinning-jenny, which he named after his daughter. Pop. 6106. The parish comprises the chapelry of Astley Atherton and Bedford, and the township of Farnham and Westgate, and is noted for its cheese. Area, 13,192 a. Pop. 25,096.—2. A vil and par., co. Bedford. The village, 5 m. S. by E. Clonside, is straggling and irregular, and has a handsome cruciform parish

church, three Dissenting chapels, a free, and several other schools. Inhabitants chiefly employed in manufacturing. Area of par. 7068 ac. Pop. 1674.—3. A maritime vil and par., co. Essex. The village, 16 m. S.E. Chelmsford, on a steep acclivity 1 bank Thaxam, has a parish church and a Methodist chapel, the former, an ancient structure, on the top of the hill on the acclivity of which the town is built; two good schools, and about $\frac{1}{2}$ to distant, is an extensive manufactory of coarse potteryware. A very limited trade is carried on in coals, but the principal occupation of the inhabitants is fishing upwards of 150 boats being employed in the skimming of which from 600 to 1000 gallons are sent to London weekly during the season. Area of par. 3331 ac. Pop. 1370.—(Local Correspondent.)

LEIGH, several par. Eng.—1. Gloucester, 1730 ac. Pop. 470.—2. Kent, 4660 ac. Pop. 1161.—3. Surrey 3710 ac. Pop. 475.—4. Worcester, 6129 ac. Pop. 2343.—5. (upon Mendips) Somerset 1425 ac. P. 581.—6. (West) Devon; 2516 ac. Pop. 508.

LEIGHLIN (Ocho), a vil and par., co. Ireland, co. and 8 m. S.W. Carlow, with an ancient cathedral, in which are some interesting monuments. Area, 9920 ac. Pop. 3511.

LEIGHLIN BARRON, a market tn. Ireland co. and 7 m. S.S.W. Carlow on the Barrow by which it is divided into two almost equal parts, communicating with each other by a bridge. It contains the parish church of Wells, a R. Catholic chapel, a national school and the ruins of Black castle, a strong fortress erected in the 12th century as a defence of the English settlers in Ireland and the remains of a round tower, and of an ancient monastery. Pop. 1392.

LEIGHMONEY par. Kent (Chalk) 2716 ac. Pop. 583.

LEIGHES, two par. Eng. Essex.—1. (Great), 3126 ac. Pop. 874.—2. (Little) 1080 ac. Pop. 164.

LEIGHTON two par. Eng.—1. Huntingdon, 7770 ac. Pop. 465.—2. Salop 2151 ac. Pop. 322.

LEIGHTON BUZZARD, a market tn. and par. England co. Bedford. The town, 16 m. S.W. Bedford, on a bank Ouse, has a market-house an elegant old pentagonal cross, a spacious cruciform church in the early English style, with a tower surmounted by a spire, two dissenting places of worship, and a Friends meeting-house some trace in carried on in timber work, iron, brick, coal, and other articles. The Grand Junction Canal passes near the town and at a little distance from it, on the opposite side of the river is a station on the London and Birmingham railway. A portion of the female population are employed in lace-making and straw plaiting. Pop. 4466. Area of par., 8788 ac. Pop. 6974.

LEIMBACH, a tn. Prussia, prov. Saxony gov. and 30 m. N.W. Merseburg, on the Wipper with a church, a silver and two copper furnaces, and important mines. P. 999.

LEIMEN, a market tn. Baden, circle Lower Rhine, 6 m. S. Homburg, 1 bank Lahn. It is walled, has two churches a town-house, school-house, manufactures of tobacco, and a trade in tobacco and cattle. Pop. 1409.

LEINACH (Ochz and Urzad), two nearly contiguous vil. Bavaria, Lower Franconia, 13 m. N.W. Würzburg.

They have a church, vinegar-works, several mills, and a trade in corn, wine, and fruit. United pop. 2323.

LEINE, a river, Germany, which rises in the Harz Mountains, in the S.W. of Prussian Saxony, to the E. of Heiligenstadt, flows generally N.W., past Göttingen and Hanover, and joins 1 bank Aller, 5 m. below Hildesheim, after a course of nearly 150 m. Its principal affluents are, right, the Bode and Immecke, left, the Ilme, Söhlde, and Wespe. It begins to be navigable at Göttingen, and navigable at Hanover.

LEINERSEHEIM, a vil. Bavaria, Palatinate, dist. and near Germersheim, with a parish church. Pop. 1906.

LEININGEN, a principality, Germany, which was situated between the Lower Palatinate and the bishoprics of Brixen and Verona; area, 104 sq. m. It is now shared between Baden and Rhineland Prussia. The latter having the larger portion. The prison resides in Amorbach. P. 60,100.

LEININGEN (Ails and Rux), two nearly-contiguous vil. Bavaria, Palatinate, dist. Griesbach. They contain a

church and the ruins of an old castle, and have iron-works and several mills. Pop. Alt. 867 Nov. 1908.

LEINSTER, a prov. Ireland, having, S. and E., St. George's Channel and Irish Sea, N. Ulster, and W. Connaught and Munster. Its length, N. to S. or from Carnarvon Point to the head of Carlingford Bay is about 182 m. Its greatest breadth, which is near the centre of the province, is 33 m., its average, 4,354,966 sq. or 69,071 sq. m. The province is divided into 13 counties—Wexford, Kilkenny, Carlow, Wicklow, Dublin, Kildare, Queen's County King's County, Westmeath, Longford, Meath, and Louth. Leinster is the most favoured by nature of the four provinces of Ireland, being little encumbered by mountains, and having the best soil. It is, in general, also well cultivated. Its coast, however, has fewer good harbours than any of the other provinces. Principal rivers, the Boyne, Slaney, Barrow, Liffey, Nore and May. Pop. (1841), 1,978,781 (1851), 1,418,771. **LEINTHALL-STRASSE**, par Eng. Hereford 990 sq. Pop. 143.

LEINTWARDINE, par Eng. Hereford 8576 sq. P. 1607.

LEIPA (Bohemian), or **LEIPPA**, a tn. Bohemia, circle Leitmeritz, 45 m. N. N. E. Prague. It is substantially built of brick and tiles, has several churches, one of them a very ancient, and another a handsome modern structure—an Augustinian monastery, a gymnasium, a superior German and several other schools, extensive manufactures of cloth and cotton, and a trade in cattle. Leipa having been at first built of wood, was repeatedly burnt almost to the ground. The great fire took place in 1830, and advantage has been taken of it to give the town a much improved form, and make it one of the prettiest places in the kingdom. Pop. 5364.

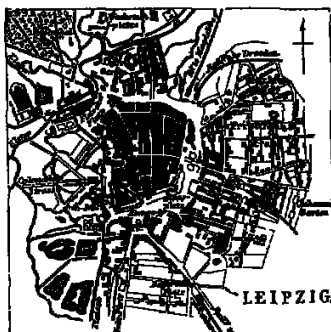

LEIPHEIM, a tn. Bavaria, circle Swabia, r. bank Danube, 11 m. E. N. E. Ulm. It is walled, has a church, chapel, castle, hospital, and a trade in hops, which are largely grown in the district. Pop. 1426.

LEIPNIK, a tn. Austria, Moravia, circle, and 9 m. N. E. Prague, r. bank Bohemia. It is defended by two forts, and entered by two gates. It has a church, Jewish synagogue, with a school; high school, two hospitals, a townhouse, castle, and beautiful cemetery, and manufactures of rearing. Pop. 3900.

LEIPZIG (*Archiepiscopus-leipzic*), a circle, forming the N. W. part of the kingdom of Saxony, being one of the four great divisions of the country. It is bounded N. by Prussia, W. by Prussia and Saxe-Altenburg S. by circle Zwickau, and E. by circle Dresden, area, 1012 sq. ag. m. It lies lower and is likewise more level and fertile, than any other part of Saxony. Its highest ground is in the S., where some ramifications of the Erzgebirge appear, but nowhere rise more than 1850 ft. above the sea. Even there it slopes gradually N. It belongs to the basin of the Elbe, which drains it by its tributaries Elster, Pleisse, Mulde, Strechnitz, Chemnitz, Zschoppau, and Döhlitz. In the N. E. are several lakes, of which the only one of any consequence is the Götterwitz. The circle is generally well cultivated, and yields good crops of corn, and rears great numbers of cattle, and more especially of sheep. The minerals are not important, but both limestone and marble are abundant and a great number of fine pebbles, including amethysts, agates, topazes, and rock crystal are found. Manufactures have made great progress, and include cottons and linen threads, and fine cutlery-ware. The book trade, carried on principally in the town of Leipzig, is perhaps the most important branch of industry. For administrative purposes, the circle is divided into four *hauptmannschaften*, subdivided into 11 *helfvidtsche*. Pop. (1849), 438,533.

LEIPZIG (Latin and Italian, *Lepzig*, English, *Lepso*, French, *Lepzig*), the second city of Saxony, cap. above circle, and one of the chief seats of commerce in Germany, 84 m. W. N. W. Dresden, lat. (observatory) 51° 30' 16" N. lon. 12° 35' 15" E. (L.). Rises in an extensive and fertile plain, on the Elbe, here joined by the Pleisse and Parde, and consists of an old central town, formerly surrounded by fortifications, which have been converted into beautiful walks and shrubberies, called the *Promenaden*, and extensive and rapidly increasing suburbs. In the central town the houses are mostly lofty, some of them quaint-looking; the streets are narrow, but generally straight, and clean, and well lighted with gas; the principal ones open into the market-places, or square, which has a very picturesque appearance; the townhall (Rathaus), built

in 1556, being on the one side, and the others being partly occupied by buildings in the renaissance style. The most principal buildings, within the old boundaries, but some of which are architecturally remarkable, are the churches of St.

Nicholas St. Thomas, St. Paul, and St. Peter the Augustines, an elegant modern edifice, containing the university, founded 1409, with a library of 110,000 volumes, 46 ordinary and 20 extraordinary professors, and about 84 private teachers and language masters, and attended by above 900 students, the bookellers' exchange, used, during the fair, for the arrangement of accounts between the country houses and their agents and correspondents in Leipzig, and, at other times, for exhibitions of paintings, &c. the cloth-hall (Nervendhaus) the town-school (Bürger-Schule), with a collection of antiquities the theatre, and the Pleissenburg or castle, now partly used as a barracks, and containing the observatory. It formed part of the old fortifications, withstood the attacks of Tilly, and is memorable as the scene of the famous Leipzig disputation between Luther and Dr. Eck, though the portion of the building in which that interesting event took place, is understood no longer to exist. Not far from the Pleissenburg, opposite the Peterskirche the only remaining one of the old gates, and in the centre of the Königsplatz (King's Place) is a colossal statue of king Frederick August, who died in 1827. The suburbs, which have doubled the number of houses in Leipzig, since 1840, are composed of lofty elegant, and sometimes rather ambitious-looking buildings, laid off in regular streets, interspersed with gardens, possessing altogether, in this manner with the central town an air of substantiality and comfort. They contain the elegant post-office buildings, the church of St. John, and the R. Catholic church in modern Gothic, by Haudeloff, in some respects the finest building in the city; the Rosenthal (Valley of Roses) a favourite summer evening resort, composed of pleasant wooded walks, and numerous gardens and such-like places of recreation. Besides the university library Leipzig possesses a town library of 80,000 volumes, containing some valuable MSS. Schools of various kinds are numerous and good, including two gymnasia, an academy of designing, painting, architecture, &c., a male school and a commercial school, both, and especially the former, of considerable celebrity, four charity schools, &c. There are eight learned societies, a botanical garden several hospitals, including one for deaf-mutes and numerous baths. Leipzig possesses considerable manufactures, as of cotton-wool, jasper, hats, dikes and half-fillets goods, soap, sealing-wax, tobacco, and numerous metal articles; it has likewise an extensive wool-spinning establishment; has the great feature of the manufacturers is books. There are 120 booksheds, 32 printing-offices, with 700 hand-presses and 40

printing-machines; producing, it is estimated, 30 millions of printed sheets annually; and there are several type-foundries. Though important for its manufactures, Leipzig is still more important for its commerce, carried on especially through its noted fairs, particularly those at Easter and Michaelmas, the one at the New Year being comparatively unimportant. To these fairs are congregated people from all quarters of Europe; from Asia, and from America, in numbers often equalling that of the entire population of the town. Turks, Greeks, Persians, Armenians, Polish Jews, and Hungarians, may be seen walking about in their native costumes. Every house and yard is converted into a place of business; and the central market-place, the main streets, and a large portion of the promenade, are covered with booths of dealers in porcelain, Bohemian glass, lace, linens, domestic and heavy cloths of all kinds, tobacco, pipes, leather shoes, jewellery, hardware, furs, and other articles, too numerous to specify, but the more important portion of the business is transacted in the premises of the many agents of manufacturing houses, both German and foreign, who, either permanently or temporarily, are located here. Goods to the value of 80 millions of thalers (23,000,000) change hands at these fairs, of which 5 millions of thalers (1,500,000) are for books. Though for a time on the wane, the fairs, in recent years, have been rapidly increasing.

Leipzig is the capital of one of the four circles of Saxony, and the seat of several courts of justice. It is of Welsh origin, was destroyed by the Bohemian Duke Wratzslav, in 1082; and after being rebuilt, it was again destroyed by Otto IV., in 1212, and 400 houses were burned down in 1430. It early resisted the Reformation, and has maintained its steadfastness so far that its population is almost exclusively Lutheran. In 1519, the disputation between Luther, Eck, and Carstalt took place in the Pleissenburg. In 1609-31, the plague carried off 3000 people. After this its commerce increased, its fairs became more important, and the seat of the book-trade was transferred to it from Frankfurt-on-the-Main. It suffered much from the Seven Years' War, but soon recovered. October 16-19, 1813, the great battle of the nations

indignant-looking monument to commemorate the victory has been erected near the spot. Excluding some accidental outbreaks in 1830, 1831, 1845, and 1849, the most important events in recent times are the founding and opening of the different railways, of which there are three. One connecting with Dresden and Austria, a second with Berlin, Halle, Magdeburg, Hanover, and Hamburg; and also with Bismarck and Frankfurt-on-the-Main; and a third with Bavaria. Pop. (1874) 44,802 (1848) 54,219 (1849) 55,374; (1872) 75,490. (Huhn's *Lex. Deutschland*; Leipzig, in der *Brustschale* *Stadtsaal* *Jahrbuch*, 1881. Private information.)

LEIRE, par Eng. Leobovier; 870 ac. Pop. 438. LEIRIA (anc. *Callipo*), a town in Portugal, prov. Beira-mar, cap. cantaria, in a fertile district near r. bank Lda, 59 m. S.E. W. Coimbra. It is walled, defended by an old castle, and contains

LEIRIA.—From Victor's Memory of Portugal and again.

a cathedral, two parish churches, a college, diocesan seminary, three convents, and an hospital. A considerable manufactory of rough-wrought iron has been established in the neighborhood, and the general trade is of some importance. Leiria is the see of a bishop, and has repeatedly been occupied as a residence by the kings of Portugal. It was taken from the Moors in 1145.

Pop. 3820; cantaria, 74,890.

LEIGNIG, a town in Saxony, circle and 28 m. S.E.E. Leipzig, cap. bail, l. bank Mulde. It is walled, has several public offices, a church and an old castle, with a chapel, and manufactures of woollen and linen cloths, quilts, and articles in horse-saddling, and other mills, dye-works, silk-works and bleach-works. Pop. (1849) 5185 bail, 80,940.

LEISCHITZ, a vil. Prussia, prov. Silesia, gov. Oppeln, circle Liebstadt, on the Silesia with two mills. Pop. 1497.

LEISTON, par Eng. Suffolk, 4640 ac. Pop. 1680.

LEITENS DORF (Osnab.), a market in Bohemia, circle and 28 m. W.N.W. Leitmeritz, on the Goldkiese. It has manufactures of woollen cloth, cantaria, and hosiery; alum-works, a brewery, a distillery, a mineral spring, and a mine of lignite, which is partially worked. Pop. 3142.

LEITH, an ancient port and post, par Scotland, co. and 3 m. N.N.E. the coast of Edinburgh, of which city it is the port, and almost a suburb, N. shore Firth of Forth, on both sides the water of Leith, and near its confluence with the sea, lat. 56° 55' 54" N.; lon. 3° 10' 20" W. (a) The portion of the town situated on the N.W. side of the river is known as *Great Leith*, that on the opposite, as *South Leith*, the latter situated nearly opposite, being White more than a suburb of the latter, where all the chief business of the town is transacted, and where the sailing-harbour and quays of the

THE MARKET-PLACE, LEITH, during the Fair.

(Villarsbruck), was fought around and in Leith, by which Germany was freed from the French yoke, and in which England received his first decisive defeat, at the battle of the combined forces of France and Austria. The French, on this occasion, lost 25,000 men, as previously, having a larger number slain in battle, and in the retreat, before Frederick's able in attempting to cross the Elbow; and

merchants principally are. The town, on both sides of the river, stands on nearly a perfect level. The streets and lanes in the more modern parts, particularly in the vicinity of the harbour, are narrow, tortuous, and stony; and the houses old, dilapidated, and mean; but the more modern quarters are beautifully spacious, airy, and well built. Here, also, handsome houses line two sides of what is called the 'Links' or downs, a fine large open space on the S.E. side of the town. The principal public buildings are the custom-house, a Grecian structure, with pediment and columns, exchange buildings, new courthouses, Leith Bank, now a branch of the National and the Trinity House. An elegant bathing establishment, at Seafield, within about $\frac{1}{2}$ m. of the centre of the town, may also be included. The parish churches of North and South Leith are also both respectable edifices; the former modern with a spire 158 ft. high, the latter an old Gothic structure, with a turret and spire, recently rebuilt. The other places of worship are St. Thomas church, erected and endowed by Sir John Gladstone; St. John's church or chapel of ease, five Free churches, four U. Presbyterian, one Original Seder, one Methodist, two Congregationalist, one Episcopalian, and one R. Catholic. The chief educational establishments are the Leith High School, and Dr. Dalry's school, the latter on the Madras system of manual instruction, which school is at present (1889) attended by about 700 children. There are two principal libraries in the town—the Leith public library, and the Leith Mechanics' Subscription Library. The charitable and benevolent institutions comprise the Leith hospital, and Edinburgh and Leith Humane Society, the Shipwrecked Fishermen and Mariners' Society, Gladstone's Female Asylum, the Leith Boys' Charity School, a society for the relief of the sick, and several societies of a religious character. The chief manufactures are ropes, cordage, sail-cloth, bottles, soap, candles, paints, and colours. There are one or two breweries, a distillery, several ship-building yards, a sugar refinery, a large establishment preserving meat, several waterworks, saw-mills, cooperages and iron foundries. The foreign trade of the port is chiefly with the N. countries of Europe, particularly those on the Baltic. There is also some colonial, and an important coasting trade, a number of shipping companies being engaged in trading with London, Hull, Newcastle, Aberdeen, and several other Scotch ports. The principal imports are grain, wax, tobacco, lumber, hemp, hides, and tallow.

The following table shows the declared value of the exports in the years 1880 to 1884 and the gross amount of customs duty received at the port in the same five years—

| Exports. | Exports. | Duties Received. |
|-----------------|-----------------|------------------|
| 1880. 1,053,680 | 1880. 2,453,453 | |
| 1881. 1,201,477 | 1881. 4,248,822 | |
| 1882. 1,323,009 | 1882. 466,513 | |
| 1883. 1,653,899 | 1883. 429,796 | |
| 1884. 1,763,441 | 1884. 451,070 | |

In 1886 the number of vessels registered at the port was 167 sailing, tons 16,490; 23 steam, tonnage 3790. In 1885 the number was 129 sailing vessels, of 23,598 tons, and 64 steam vessels, of 17,240 tons. The number of vessels, with their tonnage, due entered and cleared, from and to various countries, in 1884, was as follows—

| Entered. | Sailing Tonnage. | Steam. | Sum. |
|-----------|------------------|--------|---------|
| 1884. 256 | 129,359 | 342 | 135,684 |
| Cleared. | 54,068 | 342 | 145,096 |

Of these above a half in tonnage, and far above a half in numbers, consisted of coasting vessels.

The harbour has been greatly improved of late years by the extension of the pier, which enables vessels to get into smooth water, in E. gales, sooner than formerly, and into considerably deeper water. A W. pier or break-water extends towards the E. pier, but leaves an entrance of 250 ft. width. By this break-water, the harbour is sheltered from N. winds. The harbour has gained considerably in depth, in consequence of the improvements. The average depth at high water, spring-tides, is 17 ft.; and, at neap-tides, 13 ft. in the fairway. There are two wet-docks, each 300 yards in length, and 100 yards in breadth, with basins of 10 ac. extent, capable of containing 150 vessels; and, adjoining to them, three dry-docks, each 100 ft. long. On the W. side of North Leith there is a fine artillery barracks and battery, while the entrance to the harbour is protected by a masonry tower. Leith is mentioned, for the first time, under the name of

Inverleith in a charter of David I., and, in 1239, a charter of Robert I. made a grant of the port and mills of Leith to the city of Edinburgh. It early acquired a considerable trade, but suffered severely by war. In 1544, an English fleet took possession of it, and it was nearly destroyed in 1546. It was occupied by French troops sent to the assistance of Mary of Guise, and, in 1560, it was besieged by a body of English, sent by Elizabeth to assist the Reformers. In 1600, Cromwell repaired Leith fort, and erected a citadel with five bastions, which were demolished at the Restoration. During Cromwell's possession, the inhabitants petitioned him to remove them from the bad condition and most grievous oppressions they lay under from the magistracy of Edinburgh. The petition failed to produce any effect, and the grievances complained of were not finally removed till 1682, when it first obtained a separate and independent magistracy and 1689, when the docks and harbour were put under commissioners, of whom Leith appoints three. Leith communicates with Edinburgh by a branch of the Edinburgh and Granton Railway. Pop. (1851) 30,919.

LEITHMERITZ, a t. Bohemia, cap. circle, beautifully situated on a height above r. bank Elbe, here crossed by a bridge, 34 m. N. W. Prague. It is walled, has three gates, and, though old, is well built. It is the seat of a bishop, and the seat of a civil and criminal court, and several public schools; contains a fine old cathedral, six other churches, a townhouse, in which many curious charters are deposited, an episcopal palace, diocesan seminary, gymnasium, formerly a Jesuit college, a Dominican and a Capuchin monastery, two hospitals, and an infirmary, and has a considerable trade in corn, fish, wine, and fruit, particularly an apple called *Burdock*, which is sent to Berlin and Petersburg. Pop. 4800.—The citadel, on the frontiers of Saxony, though hilly produces much grain, and rears great numbers of cattle. Among the minerals are iron ore, and lignite. Area, 1100 sq. m. Pop. 361,000.

LEI FOMINGCHEI, or LAURACONAN, a t. Bohemia, circle and 24 m. S. E. Chudim, i. bank Lausica, and on the rail way from Vienna to Prague. It is on the whole well built, having, in particular a large ring or market-place, lined by lofty stone houses of good construction and of an elegant appearance. It contains a castle, one of the finest buildings of the kind in Bohemia, built in the 16th century, in the Italian style, in the form of a square, with a tower at each angle, and adorned within with fine sculptures and frescoes, a handsome college church and several chapels, a courthouse, Placet desarmes, gymnasium, a townhouse, a large and massive structure with a lofty tower, and an hospital, and has manufactures of linen, raw and other mule, tile-works and a trade in corn, linen, and flax. Pop. 6395.

LEITHRIM, a maritime co. Ireland, N.E. extremity of prov. Connaught, bounded N. by Donegal Bay and Scot. Donegal and Fermanagh, E. by Fermanagh and Cavan, S. by Londonderry, W. by Roscommon and Sligo. greatest length 51 m.; breadth, 21 m. area, 892,668 ac.; of which 248,850 ac. are arable. 85,199 ac. were under crop in 1850. There are some mountain tracts in the N. part of the county and elsewhere, but in general the surface is nearly flat, exhibiting, for the most part, either green fields or bogs. The substratum is principally limestone, particularly in the valleys, where the soil is fertile, in other parts it is cold stiff, and retentive. The best tracts are along the Shannon, Rinn, and Bonnet rivers. The county is rich in minerals. Iron, lead, and copper were at one time raised but are now neglected. Manganeses, fuller's earth, potter's clay, sandstone, and marble have also been obtained, and coal is raised to some extent on the S. side of Lough Allen. Chalybeate springs are numerous on the borders of the same Lough. There are several small rivers in the county, including a portion of the earlier course of the Shannon; and numerous lakes, of which Lough Allen, which is about 7 m. long, and 1 to 4 m. broad is the largest. The shore along the Bay of Donegal is for the most part a rocky bluff, with a rough stony beach along the foot of it, and is exposed to the whole swell of the Atlantic. Oats form the chief crop, occupying 35,125 ac. out of 85,199 ac.—the whole surface under crop in 1850. Potatoes covered 18,333 ac. The soil was taken up with wheat, barley, beans, &c. &c. But Leithrim is more a grazing than an agricultural county; raising large numbers of young stock, chiefly horses, on the pastures of the S. district. Linen and coarse woollens are

dominate the two the only manufactures, the general trade being almost exclusively confined to the sale of grain, butter, and live stock. The county is divided into two hundred and seventeen parishes, and contains no town with above 5000 inhabitants. In 1850 it possessed 50 national schools, attended by 10,648 children. It returned two members to parliament. Pop. (1841), 155,232; (1861), 111,913.

LEITHEN was two parts. Ireland.—1, Cork and Waterford; 7120 sq. P. 1867.—2, Galway; 4099 sq. P. 1860.

LEITZBAU, a town in Prussia, prov. Saxony, gov. and 9 m. S.E. Magdeburg. It has a law court, two Protestant churches, an hospital, and two mills. Pop. 1407.

LEIXLIP, a market town and par., Ireland, co. Kildare. The town, near the confluence of the Rye with the Liffey, 9 m. W. Dublin, has a miserable and dilapidated appearance. It has an ancient parish church, a small E. Catholic chapel and several schools; limited woollen manufactures and near it are rolling-mills for the manufacture of bar and sheet iron a flour mill, and an extensive distillery. The Royal Canal approaches within $\frac{1}{2}$ m. of the town. Pop. (1841), 1066. Area of par., 8209 ac. Pop. 1696.

LEIZA, a town, prov. Navarra, 20 m. N.W. Pamplona, tolerably well built, with a parish church, chapel, spacious townhouse and prison, public school; and manufactures of iron and copper, leather, paper, and cloth. P. 1724.

LEKE (or Leke), a river, Holland, which branches off from the Old Rhine at Wyk bij Duwardse, prov. Utrecht; flows W by N and then W by N, forming first the boundary between provs. Utrecht and Gelderland, and then between Utrecht and S. Holland, and, at Kampen, unites with an arm of the Meuse. The Netherlands, in the treaty of 1636 for the free navigation of the Rhine, recognized the Lek, politically, as a continuation of that river.

LEKA, or LOKCHERACH, a market town, Hungary, co. Eisenburg, on the Gylygys, 7 m. W. N.W. Güns. It has a castle, an Augustinian monastery, and manufactures of flax, glass-works, and paper. Pop. 1169.

LEKCHA, or LEKVA, a lake, Russia, in the N.W. of gov. Orenburg; forming a long and narrow arched, stretching N.W. to S.E. about 34 m., with a breadth of about 3 m.

LEKENTZ, or LACHNITZ, a vil. Austria, Transylvania, dist. and about 10 m. from Hietzin. It has a church, and a trade in corn, cattle, and wine. Pop. 1121.

LEKKERKERK, a vil. Holland, prov. S. Holland, 9 m. E. Rotterdam on the Lek, with a neat cruciform church, and a school; two boat-building yards, two inns, a corn-mill, a village-work, and a salmon fishery. P. (agricultural), 2054.

LELANE, par. Eng. Cornwall, 4240 ac. P. 9012.

LELEK (Henty), a vil. Austria, Transylvania, about 46 m. from Krasowitz. It has two churches, and is the head station of a military district. Pop. 7730.

LELESE, a market town, Hungary, Hither Thes., co. and 11 m. N.E. Szapolya, with a E. Catholic church, and an old Franciscan abbey. Pop. 1609.

LELUNDA, a river, Africa, Congo, which rises in a mountainous district E. of San Salvador, flows W. and, after a course of above 200 m., falls into the S. Atlantic, about 40 m. S.E. of the mouth of the Soira.

LEMA ISLANDS, the outermost group of the great archipelago (Chinese Sea) that fronts the entrance to Canton river. They consist of three large and one small island, extending E.N.E. and W.S.W. 124 m. The largest, called Great Lema by Europeans, but two-spoken-for by the Chinese, lat. (N. and 23° 4' 42" N.; lon. 114° 18' 50" E., is 6 m. long, and 14 m. broad, and of moderate height. These islands are all steep and rocky on the S. side, and affording a single bay for a boat to find shelter. They have a barren appearance, but a few men reside on them, carrying off from small quantities of breadfruit food between the coasts, which they send to Manoe for sale. Fresh water may be obtained along the N. side of the largest island, at several places.

LEMAN (Laka). See GEMMA (LAKES).

LEMANAUHAN, par. (lat. N. 5° 10', lon. E. 10° 10'). P. 4678.

LEMBECQ, a town and coe. Belgium, prov. S. Brabant, 10 m. S. Brussels, on the railway thence to Maastricht. It has a very old castle, extensive manufactures of glass, hardware, a tobacco-cigar factory, and a paper and a saw mill. Pop. 2666.

LEMBERG, a vil. Hungary, Transylvania, dist. and 8 m. S. Krasowitz, with a church, glass-works, and mills. Pop. 5260.

LEMBERG (Pollak, Leopo) a town, Austria, cap. kingdom of Galicia, in a beautiful and romantic district, 295 m. S.W.E. Vienna; lat. 49° 51' 52" N.; lon. 14° 11' 11" E. It was originally surrounded by walls and ditches, which have been destroyed, and converted into walks and roads, though founded in the 13th century, has all the appearance of a modern town, having increased so rapidly as to triple its population since 1778. This rapid increase has taken place since Austria made it a capital. Besides being the seat of the Government, and the important courts and public offices necessarily connected with it, it possesses three metropolitan sees—Greek, Armenian, and E. Catholic. The buildings most deserving of notice are the Greek metropolitan church, with the archbishop's palace, magnificent structures in the Italian style, finely situated on a height on the W. side of the town, the Latin cathedral, built by Casimir the Great, in 1379, the Dominican church, after the model of St. Peter's at Rome; the Protestant church; three synagogues, one of them a recent erection, of large dimensions, and remarkably handsome, the new townhouse, built on a magnificent scale, at an expense of about 600,000, with a very lofty tower; the university, possessed of a library of 46,000 volumes and numerous collections, and attended by about 1400 students; the Oculistick institute, with a library of 50,000 volumes, relating mostly in Galvanic medicine and literature, 1200 MSS., and 15,000 prints, engravings, antiquities, &c.; the new theatre built at the sole expense of a Count, who bequeathed all his property for its maintenance; the theological and philosophical institute, for the regular clergy; two seminaries, two gymnasia, an academy of arts, a normal and numerous other schools, superior and elementary; a deaf and dumb institute, a general infirmary and lunatic asylum, a large military hospital, an hospital of the sisters of charity a workhouse, penitentiary, and large new house of correction, extensive barracks, a military academy, school and bathing establishment. The manufactures consist chiefly of woollen and cotton textiles, and in the vicinity about 1 m. from the town, there is a very extensive tobacco-factory belonging to Government. But Lemberg depends far less on manufactures than on trade. This, which is very much in the hands of the Jews, who have master to the number of more than 20,000 is very important, and concentrates a great part of the trade of the kingdom. Much of it is merely transit, and extends over the whole year but a considerable portion of the whole is confined to the large fairs which take place at stated periods. One of these, called the Great Khmizh Measa, lasts six weeks, and attracts vast numbers of dealers from all quarters. The quantity of business then transacted is very great. In 1696, Lemberg successfully resisted the Russians, in 1671, it was laid under contribution by the Turks; and in 1704, was stormed by the Swedes under Charles XII. Pop. (1846), 70,970.

The church of Lemberg, though not properly metropolitan, is rugged throughout, and is extensively covered by mosses, or by a thin, sandy, and stony soil of very little fertility. Area, 796 sq. m. sq. m. Pop. 261,500.

LEMERE, a river, Italy, Veneto, which rises near San Vito, par. Friuli, flows S.W., past Forte-Messa, where it becomes navigable, and falls into the Adriatic by several mouths, one of which enters port Fiesanura; total course about 25 m.

LEMPORD, a vil. Hanover, dist. and 10 m. S. Dielbach, cap. hall; with a castle, a custom-house, and an active general trade. Pop. vil., 912; hall, 4814.

LEMPU, a town, principally Leppe-Detmold, in the Reg., 43 m. S.W. Hanover. It is walled, has a very magnificent appearance, and contains many specimens of Gothic architecture, among others a townhouse. It has also three churches, a royal palace, a synagogue, gymnasium, and female institute; manufactures of woollen and fine cloth, leather, and miscellaneous goods, and a considerable book trade. Pop. 4023.

LEMPYNY, or LEMNITZ, a vil. Transylvania, about 50 m. from Krasowitz, with a Greek church. Pop. 1642.

LEMPIE, a vil. and coe. Italy, Piedmont, div. and 8 m. from Turin, in the valley of Lusera, I. bank Orsiera, with a church and quarry, finely situated on a precipitous mass of rock, overlooking the valley. Pop. 2660.

LEMPINGTON, a vil. England, co. Northumberland, par. Wharfedale, W. bank Tyne, containing the extensive works of the Tyne-Iron Company, and also large glass-works.

LEMINGTON (Lowen), par Eng. Gloucester, 855 sq. Pop. 56.

LEMLOOM, or **LEMLON**, a tn. Asiatic Turkey, I. bank Euphrates, push and 113 m. S. by W Bagdad. It has a singular appearance; the houses, of which there are about 400, being entirely of mud, neatly constructed. About 10 m. to 15 m. S. from the town are the marshes of the same name into which the Euphrates spreads. Rice is grown to a considerable extent in the district around.

LEMMER (see), *Aurichius* vil. Holland, prov. Friesland, N shore Zuider Zee, 27 m. S. Leeuwarden; and, after Harlingen, possessing the best harbour in the province. It is a well-built place, with two churches, two schools, two boat-building yards, a rope-walk, tanneries, potteries, herring-drying and saw and corn mills. Its shipping trade has greatly fallen off from what it once was. Pop. 2681.

LEMMONGAN, or **LEMMONGAN**, a volcano, Java, prov. Boekoe, about 60 m. E.A.E. Soerabaya, height, 6561 ft. Eruptions took place in 1818, 1824, and 1848. Around it are several lakes or *terras* of brackish water, of unpleasant taste.

LENNOR, or **STALIKEN**, an isl. Turkey in Europe, in the Archipelago, at the entrance of the Dardanelles, from which it is S.E. about 40 m. lat. 40° N. lon. 25° E.; length, E. to W., about 23 m.; breadth, about 20 m. It is very irregular in shape, and is divided by the port of Paradisi, on the N. end, and that of St. Antonio, on the S. into two parts, united by a narrow isthmus. On the E. it is rendered almost inaccessible by a sandbank but in other directions it presents several good harbours. The interior consists generally of low hills, of a rugged and barren appearance, and, in part, evidently the result of volcanic agency, and the soil is, for the most part, thin and sandy but in some parts, particularly in the W. and S., possesses considerable fertility and produces much corn, oil, wine, fruit, and some cotton. Silk is also obtained. The manufactures are confined to a few cotton stuffs, a great many of the inhabitants are employed in fishing. Grain and wine are the principal exports. The principal town bears the same name. It stands on the W. coast, and is defended by a fort; it is the residence of a Greek bishop, and has three Greek churches, a small well-frequented harbour, and a building-dock. Pop. isl., 8000 to 3000.

LEMPA, a river, Central America. It rises in Guatemala, flows E.S.E., forming the boundary between Honduras and Salvador, turns nearly due N., across Salvador, and falls into the Pacific, 9 m. N.W. the Bay of Conchagua.

LEMPIS (LE ONANI), a tn. France, dep. Seine, 22 m. N.W. Grenoble, with annual fairs. Pop. 1708.

LEMYTIS, a small seaport on Denmark's island, hall, and 23 m. N. Bank'siding, on a bay of the Edinford. It has a small building-yard, an active fishery, and a harbour, which admits vessels drawing 9 m. Pop. 800.

LENA, a river, Siberia, and one of the largest rivers in the world. It rises on the N.W. side of the mountains which skirt the western shore of lake Baikal, lat. 53° N., lon. 106° E., near Orlinsk, gov. and about 70 m. N.E. E. Irkutsk. It proceeds N. to the Kulek, thence E.N.E., passing Kurensk and Vitimsk, where it receives the Vitim, to the town of Yakutsk. Here it suddenly changes its course to the N. and on the E. bank receives one of its most important tributaries, the Aldan; then turns N.W. and shortly after receives, on its L. bank, at Ust-Villouisk, the Villouk, another, and indeed the last, of its important tributaries. Now a mighty stream, it flows generally N., still separating into branches, it forms a great number of islands, and discharges itself into the Arctic Ocean by several mouths, in lat. 78° N., and lon. about 128° E., having then passed over 21° of lat., and 22° of lon. Its direct course, making no allowance for windings, is 1850 geo. m., and its actual course, windings included, 2400 geo. m. Its basin has an area of 364,400 geo. sq. m., and is exceeded in the Old World only by those of the Obi and Enisei, and in the New World only by those of the Amazon, Mississippi, and La Plata.

LENNON, two par. Eng. Worcester—1, (Oxford) 2538 sq. P. 3285—2, (Worcester) 1890 sq. P. 277.

LENNON, a tn. and com. Belgium, prov. W. Flanders, about 15 m. S. Bruges, on the road to Oostv. It has a church, communal-houses, and hospital; manufactures of brass, oil, and tobacco, and a trade in corn and oil-seeds. Pop. 4700.

LENNINARA, a tn. Italy, Venezia, prov. Pola, cap. dist. on the Adigetto, 8 m. W. Rovigo. It is very well built, has a court of law, and several public offices, a hand some park and two auxiliary churches, a court-house, and public library. Pop. m., 3500; dist., 15 000.

LENNIN, a tn. Prussia, prov. Silesia, gov. Oppeln, circle Posen. It contains a townhouse, and has limekilns, limestone quarries, and two mills. Pop. 1440.

LENGEFELD, a tn. Saxony, circle and 80 m. S.E. Zwickau. It contains a church, and has numerous spinning and other mills, dye-works, bleachfields, a trade in cattle, and four annual fairs. Pop. 3774.

LENGENFELD, several places, Germany—1, A tn. Saxony, circle and 11 m. S.W. Zwickau. It has a church, considerable manufactures of woollen and cotton fabrics, wooden and cotton spinning, several dye-works and bleachfields, saw and walk mills, and a trade in manufactures and cattle. Pop. (1848), 4029—2, A market town, Lower Austria, near Krems, with a church P. 1500—3, A vil. and par. Tyrol, circle Inntal, near Sella, with a church. P. 1544—4, A vil. Prussia, prov. Saxony gov. Erfurt, circle Helliggen stein, on the Frieda, with a church, an oil, a saw, and a doer mill. Pop. 1220.

LENGERICH a tn. Rhensish Prussia, gov. and 19 m. N. N. E. Münster, with a church and a synagoga. Heselink, and stone-quarries. Pop. 1429.

LENGFERT, a market tn. Bavaria, Lower Franconia, dist. Markt-Hardenfeld on the Main. It has a hospital, some shipping, a transit trade, and trade in fruit and wine, stone-quarries, and two annual fairs. Pop. 1100.

LENGGLEN, a vil. and par. Switzerland, can. Aargau, cap. circle, 1 hour Aar N.N.E. Aarau, with a trade in corn, fruit, and wine. Pop. 1030.

LENGNAU two places Switzerland—1, A vil. and par. com. and 17 m. N. Bern, with a church and mineral springs having establishments, and extensive stone-quarries. P. 715—2, (Ob- and Nid-) Two contiguous vils. can. Aargau, dist. and near Zuzach. They form a parish of same name, and contain a handsome Protestant church, a synagoga, and a charitable endowment. Pop. 1781.

LENGSFELD a tn. Baze-Wesmar principality and 16 m. S.S.W. Eisenach, cap. dist. It is walled, has two churches, and manufactures of flannel. Pop. 2323. Area of dist., 12 geo. sq. m. Pop. 4600.

LENHAM, par Eng. Kent 6963 sq. Pop. 2070.

LENN, a vil. and par. Switzerland, can. and 83 m. S. Bern, in a valley of same name, on the Emment, in a wild and mountainous district, with magnificent cascades. It contains a fine old parish church, more than 3000 ft. above the sea-level, a handsome parsonage, and a school. Pop. 2328.

LENNKORAN, a tn. Transcaucasian-Russia, Jellik, gov. Sebeimachi, near the Caspian Sea, S.W. of the mouth of the Kur. It occupies a large space, the houses being generally placed apart from each other and surrounded with trees. The roads afford good anchorage, and the Russians have built a fort in the vicinity. Pop. (1850) 2173.

LENNK a river, Rhineland Prussia, with rises in the foot-hills of Waldick. flows W.N.W. and joins the Ruhr 16 m. N.E. Elberfeld, after a course of nearly 60 m.

LENNK a tn. Rhinish Prussia, gov. and 20 m. E. Düsseldorf, cap. circle, in a beautiful valley, watered by the Lennep. It contains two churches, a superior hughes school, and a hospital, and is a principal seat of the woollen manufactures, particularly fine broad-cloth and cassimeres, and shawls. The other manufactures are hats, gunpowder, and ironmongery. The trade in the above articles, and also in wine, is considerable. Pop. (1848), 7234. The canal is watered by the Wupper and Lennep, and being fully, has not much room for navigation. Area, 68 geo. sq. m. Pop. 67,464.

LENNICK, two places, Belgium prov. Brabant—1, (St. Martin), a vil. and com. 9 m. W.S.W. Brussels, with a brewery, distillery oil-mill, and a trade in agricultural produce. Pop. 1281—2, (St. Quentin) A vil. and com. near the former with a flour-mill and trade in wool. Pop. 3481.

LENNO a vil. and com. Italy Lombardy, prov. Como 6 m. from Menaggio. It is celebrated for a number of antiquaries, particularly a small obelisk—temple, with hieroglyphs and Egyptian inscriptions, and contains a parish church, with an ancient baptistery attached. Pop. 1050.

LENNOX—1 An ancient dist. Scotland, comprising Dumfriesshire, and portions of cos. Renfrew, Perth, and Stirling. It gives the title of Duke, in the Scotch peerage, to the Duke of Richmond.—2, (Lennox Hills) A range of hills, Scotland, extending from Dumfriesshire to Stirling. Greatest height, about 1500 ft. above sea-level. They include the Campsie Fells.

LENNOXTOWN a large vil. Scotland, on the Stirling 9 m. N Glasgow on a branch of the Edinburgh and Glasgow Railway, with a parish and a U. Presbyterian church, and a school. Inhabitants employed in the cottons, glass-works, blast-furnaces, and glass-works of the vicinity. Pop. 8104.

LENO, a vil and com. Italy. Lombardy prov. and 13 m. E. Brescia, cap. dist. It has a court of justice, a parish and an auxiliary church, and an hospital; manufactures of woolen and cotton goods, and several silk-mills. P. 3805; dist., 20,902.

LENOLA, a ta. Naples, prov. Terra di Lavoro, dist. and 15 m. N W. Gaeta. It stands on a hill, and contains two churches and an hospital. Its site is supposed to be that of the ancient Freges-Campens. Pop. 2080.

LENOX, a small vil. U. States, Massachusetts, 138 m. W Boston. It is a mainly built; has three churches, a court-house, jail and an academy. Pop. 1213.

LENE—1 [anc. *Lenon*, *Lenon*] A ta. France, dep. Puy-de-Dôme, on the Sèvres, 9 m. K. Arna. It is a place of great antiquity, was at one time strongly fortified and stood repeated sieges. In 1648, the Spaniards were signally defeated by the Prince of Condé, under its walls. Lene has considerable distilleries, tanneries, and soap-works and some trade in corn, wax, and hemp. In the neighborhood are coal-mines, and brick and lime kilns. Pop. 2708.—2 A vil. and com. Belgium, prov. Hainaut, 7 m. N N W. Mons, on the Demure, with one of the finest châteaux in the province. Manufactures and building-stone quarries, a trade in corn, horses, cattle, and poultry. Pop. 2190.—3, (*Saint Remy*) A vil. and com. Belgium, prov. and 9 m. W N W. Liège, on the Geer, with a brewery a steam and a flour mill and a trade in agricultural produce. Pop. 1410.—4, (or *Len*) A vil. and par. Switzerland, cant. Valais, 32 m. N W. Sion. It has a beautiful church, with an elegant tower. Pop. 1622.

LENT, a vil. Holland, prov. Gelderland, on the Waal, opposite to Nijmegen, with which it is connected by a flying bridge. It has two churches, and a school and is surrounded by orchards, which form a favourite summer resort of the inhabitants of Nijmegen. Pop. 1171.

LENTA, a vil and com. Italy. Piedmont, div. Novara, prov. and 12 m. N Varese. It has two churches, with a parish and two other churches and manufactures of agricultural implements. Pop. 1200.

LENTCHER, *LENTICA*, or *LENTIC*, a ta. Russian Poland, 77 m. W W. Warsaw. It is walled and defended by a fort, crowning a steep rock; and has a collegiate and five other churches, several convents, a synagogue, and some general trade. Pop. 3700.

LENTINI, or *LENTINUM* [anc. *Leontium*] a ta. Sicily, prov. and 30 m. N W. Syracuse, r. bank river of same name, near Lake Melus, or Lentini. It is of Greek origin, and is often referred to by ancient writers. It continued even to modern times to be a place of considerable importance, but suffered dreadfully by an earthquake in 1093, and has never recovered since. Most of the inhabitants find employment in connection with shipping in the lake, which are very productive. The district around is remarkably fertile, but the climate is unhealthy. Pop. 7723.

LENTON, a par. and ta. England, co. Nottingham, the latter consisting of the contiguous villages of Old and New Lenton, 1½ m. W by S. Nottingham, of which it may be considered an appendage. It lies on the Leen, near its confluence with the Trent; and has a handsome Gothic church, a chapel of ease, a Baptist and two Methodist meeting-houses, a national and an infant school; manufactures of lace, starch, leather, and hosiery and a station on the Midland railway. Area of par. 5080 ac. Pop. 5509.

LENY, a vil. Westmorland, 8297 ac. P. 1064.

LENZBURG, a vil. and par. Switzerland, cant. Argau, cap. dist., on the Aa, 7 m. E. Aarau. It has 4 churches, an old Gothic castle, on the summit of a hill, now converted into a school; manufactures of shawls, linen, and cotton, blankets, and grasshides. Pop. 1755.

LENNEN a ta. Prussia, prov. Brandenburg, gov. and 19 m. N W. Potsdam, near the confluence of the Havel with the Elbe. It is walled; has three gates, a church and hospital, a court of law, several public offices, a distillery, brewery, and a trade in cattle. Pop. 3571.

LENNINGHAUSEN, a vil. Rhineland, Prussia, gov. Minden, circle Herford; with a church. Pop. 1080.

LEO (St.) a ta. Italy, deling. Urbino and Pesaro, on a hill, 27 m. W Pesaro. It is the see of a bishop, is defended by a fort, near which was found, buried in a large chest, several vessels and masses of gold, a crown of gold, set with emeralds, and a number of jewels. They are supposed to have belonged to king Burgundy, who long defended himself on Mount St. Leo, before he fell into the hands of Otto I. P. 1300.

LEOBARDA a ta., W. Africa, r. bank Niger; lat. 6° 30' N. lon. 5° 45' E., surrounded by an immensely thick wall. The inhabitants are extremely poor, but are contented and happy, and kind and hospitable to strangers. Pop. 6800.

LEOMEN a ta. Austria, Styria, circle and 9 m. W S. W. Bruck, r. bank Mur. It is walled, entered by three gates, has a large and handsome church, adorned with three towers, many secondary churches, town-houses, and theatre, extensive iron and steel works. Both coal and lignite are worked to a considerable extent in the vicinity. Pop. 3000.

LEOBERSDORF, or *LOBERSDORF*, a vil. Lower Austria, on the Trautson about 21 m. S. S. W. Vienna, on the S. railway with a church, manufactures of silk goods, mineral springs and a cotton, saw and other mills. Pop. 1290.

LEOBISCHUTZ, or *LEUBISCH*, a ta. Prussia, Silesia, gov. and 21 m. S. S. W. Oppeln, cap. circle, on the Odra. It is walled, fortified with ten towers, has a law-court, and several public offices; two churches, two chapels, an old Franciscan convent, occupied as a St. Charles gymnasium; and two hospitals; manufactures of woolen and linen cloth, ribbons and leather, and a walk-mill. P. 6072.—The climate is mostly dry, but produces much corn. Area, 207 sq. ac. Pop. 72,393.

LEOCHERLAND-GOSSEN, par. Scot. Aberdeen; 18,440 ac. Pop. 1068.

LEOGANE, a maritime in Hayti N. side of S. W. peninsula, 22 m. W Port-au-Prince lat. 18° 25' N. lon. 73° 40' W. There is good anchorage off the town.

LEOMIA, a ta. and par. Portugal, prov. Beira-Alta, near 1. bank Tago, about 16 m. S. E. Leiria. Pop. 1187.

LEOMINSTER, a par. and market, par. Hereford, co. Hereford, and par. England, co. Hereford. The town, 13 m. N. Hereford, in a fertile valley r. bank Lugg is interested by the Kennet and Finesley; has several antique looking houses, of timber and brick; a spacious church, of various styles, several Dissenting chapels, a Friends' meeting-house, several churches, including a free grammar-school and an almshouse; also a theatre, a townhall and jail, and a reading-room. The wool and hops produced in the neighborhood are much esteemed, and the town has long been famed for the quality of its cider. There is a race-course in the vicinity, on which races are run every August. The bar returns two members to parliament. Registered electors (1851), 428. Area of par., 9290 ac. Pop. (1851), 3314.

LEON, a ta. Spain, cap. prov. and ancient kingdom of same name, on a low and level tract, is the single formed by the confluence of the Tago and the Borgego, each of which is here crossed by a bridge, 176 m. N W. Madrid. It is built in the form of an octagon, surrounded by ancient walls in a somewhat dilapidated state, and entered by 11 gates. The streets are generally narrow, irregular, ill paved and dirty, and many of the houses are untenanted, and in a state of decay. The climate, called *Noro*, and *Plegaria*, or *Beja* de San Martin, however having been recently widened and improved, are decidedly handsome; and there are four principal squares, all of them lined by handsome edifices, while that called the Plaza Mayor, or *Plaza de la Constitucion*, is remarkable for the regularity of its form, and the fine front of balconies. The fountains, also, some of them composed of marble and jasper with allegorical figures, are elegant structures; and a finely placed square, called the *Plaza de San Francisco*, affords a beautiful and most agreeable perspective. The principal public edifices are the cathedral, a beautiful specimen of the gothic style, with a double row of five richly sculptured round arches, and flanked by two semicircular chapels, and lofty towers; the church of San Isidro, an antique specimen

structure, also Gothic, several suppressed convents, among which, that of San Marcos de Leon, is the most conspicuous, four universities; the warehouses, courthouses, and other public offices, occupying a handsome structure with two towers; the episcopal palace, with a fine garden attached to it; the public library contained in an ancient manory a fine old palace, called La Casa de las Plateras; the theatre, several hospitals, the Hospicio mendicant, the gymnasium or institute, which has been recently established to afford a superior general education; the primary, normal, and various other schools. The manufactures consist chiefly of linen goods, once the great staple of the town, but now almost extinct; leather, hats, and earthenware. There is no trade worthy of the name, but there are two weekly markets and three annual fairs, each of which is well frequented, and lasts several days. Pop 7074.

The province of Leon is bounded N by prov. Oviedo, E. by Palencia, S. by Valladolid and Zamora, and W by Lago and Orense. greatest length, E to W, about 190 m. mean breadth, 60 m. The surface in the N and W is covered by the mountains of Asturias, a branch of which proceeding S. divides the prov into two unequal portions an E, the larger of the two, belonging to the basin of the Duero, which receives its waters chiefly by the Esla, Orbiño, Tuerto, Luna, Borma and Torio; and a W belonging to the basin of the Miño, being drained by its tributaries—All, Boma, Barbia, Lina, and Valence. The W portion is generally so rugged as to be far better adapted for pasture than agriculture, but the E. portion, on receding from the mountains, descends by a succession of terraces, and ultimately merges into wide and undulating plains on which the vine is successfully cultivated, and abundant crops of corn, maize, hemp and flax, are raised. The minerals include argentiferous lead antimony, iron, coal, and marble, but none of them, except iron, is turned to much account. Manufactures and trade are very limited. For administrative purposes it is divided into ten judicial districts, of which Leon is the capital. Pop. 266,935.—The kingdom of Leon was founded in 815, by Ordoño II. and in the 11th century was annexed to the crown of Castile, by Ferdinand the Great. It made attempts to resume its independence in the 12th century, but, though still retaining the name of a kingdom, was finally incorporated with the monarchy in the 13th century, by Ferdinand III. As a territory still recognized by geographers, and frequently mentioned by historical and other writers, it is bounded N by Asturias, E by Old Castile, S. by New Castile and Extremadura, W by Portugal and N.W. by Galicia, and comprises the five modern provinces of Leon, Palesna, Valladolid, Zamora and Salamanca.

LEON, a town in Mexico, dep. and 84 m. W N.W. Guanajuato; lat. 21° 8' 58" N., lon. 105° 39' 57" W. It lies 6004 ft. above the sea, has two Franciscan convents, a manory a college, an hospital, and a considerable trade in corn. Pop. about 8000.

LEON, a town in Central America, dep. Nicaragua, occupying the site of a large Indian town, called Buitaba, on a large and fertile plain, nearly equidistant from Lake Leon or Managua and the Pacific lat. 12° 25' N., lon. 86° 57' W. It stands between deep ravines, the numerous springs in which furnish it with copious supplies of pure water, and covers a large area, laid out on a regular plan, in successive streets, with intervening green squares. The houses, built of adobe, are seldom of more than one story, but each encloses a spacious court, planted with trees, and entered by a portal, which is often lofty in the style of the Mayanque arches, common in Spain, and profusely and tastefully ornamented. As first few of the houses had windows looking into the street, and the effect was to give the whole town a gloomy appearance, but the windows have recently become much more numerous, and, projecting 3 or 4 ft. from the wall, are guarded by iron balconies, in which the inmates usually sit in the cool of the evening to breathe and return the salutations of their passing acquaintances. In the disturbances and revolutions which have long agitated the country, Leon has had its full share. Many of its houses have, in consequence, become dilapidated, and even considerable portions are mere heaps of ruin. On one occasion above a thousand houses, in its richest and best built quarter, were burned down in a single night. The public edifices are considered among the finest in Central America, and include a large and massive cathedral, crowned by a lofty, square dome, and two flanking towers, with pyramidal tops, and preceding so much of the appearance as well as the

reality of a fortress, that 50 pieces of artillery were at one time planted on its roof and the indentations made by shot during the repeated bombardments which it has sustained, are visible on almost every square inch of its walls. The Episcopal palace, built of adobe and stone, entered by a well proportioned portico, and surrounded by fine gardens; the churches of La Merced, Recolectora, and Calvario, remarkable for their size and fine facade, and various other churches, the Trinitarian college of St. Ramon, once a flourishing establishment, with professors of law and medicine, and numerous students, but now possessed only of a nominal existence; the government-house, Cuartel General, or head barracks, and the hospital, occupying the old convent of San Juan de Dios. The Indian village of Buitaba is properly part of Leon, though constituting a distinct municipality. It is all that now remains of the larger town which Leon supplanted and has a number of public buildings, among which its church, consisting of three naves, supported by cedar columns, with gilt capitals, surmounted by lofty and well-proportioned towers is conspicuous. The manufactures of Leon, are confined chiefly to articles in dressed leather and cutlery and the trade, owing to its inland situation, does little more than supply its local wants. The markets are well supplied and display fruits and vegetables in great variety and almost boundless profusion. Pop. (1847), 30,000.—(See the *Monrovia*, Bulley's Central America.)

LEON (Lancaster) an Isl. Spain, on which are situated the city of Cadix and the town of San Fernando.

LEON (Lancaster), Central America. See MANAGUA. LEON (New), a dep. Mexico; lat. 23° 50' to 27° 25' N.; lon. 98° to 100° 50' W. enclosed by Zacatecas. San Luis Potosi, Tamaulipas, and Coahuila, area, 25,400 sq. m. The surface is generally mountainous, and is watered by several streams, of which the Tigris is the principal. The soil is fertile, but little cultivated. Horses, mules, and humped oxen, are raised in great numbers and there are gold and silver mines. Salt is also obtained from springs on the banks of the Rio Tigris. The principal towns are Monterey, the cap., Florida, Llaneros, and Saltillo. Pop. 180,000.

LEONARD (St.) [sac. St. Nicholas] a tn. France, dep. Haute-Vienne, 10 m. E. Limoges, on the Vienne here crossed by a handsome bridge. It is surrounded by finely-planted boulevards, and has an ancient parish church, several town houses, and paper-mills manufactures of coarse woollens, blankets, worsted, and copper utensils, and some trade in cattle. Pop. 3508.

LEONARD (St.) two par. England.—1, Devon 179 ac. forming a suburb of Exeter. Pop. 1490.—2, [and St. Michael's] New Walton (N. Riding), 110 ac. Pop. 2241.

LEONARDO (San), two ms. Naples.—1, Prov. Capri-tania, dist. and 17 m. N.E. Egidio, a fortress of the third class.—2, A tn. Sicily prov. and 14 m. S.W. Trapani, N shore of Favignana, with a tunny fishery. Its harbour, which affords good anchorage, is defended by two forts.

LEONARDO (St.)—1, A watering-place and par. England, co. Sussex. The town is beautifully situated on a bay in the English Channel S.W. from Hastings, has hotels and assembly-rooms, a commodious bathing-place, and a fine view of the sea and the cliffs. A parish church a Wesleyan chapel and one in connection with the Free Church of Scotland, a national school a mechanics institute and an infirmary. Area of par. 964 ac. Pop. 1840.—[Local Correspondent].—2, A par. Scotland Fife, 981 ac. Pop. 567.—3, A tn. N.W. Wales, co. Cumberland on the shore of Port Jackson harbour. Pop. 412.—4, [Wesley] A par. England, Gloucestershire 1076 ac. 1 op. 661.

LEONSPRO, a tn. Württemberg, circle Reutlingen, cap. lat., 9 m. W. by N Stuttgart. It is an old but thriving place, has a castle, church, and hospital, manufactures of cloth, and woollen hosiery, several mills, and a trade in cattle. Pop. 2200. Area of bail., 74 geo. sq. m. Pop. 37,800.

LEONSSA a vil. Upper Austria, circle Mähle, about 4 m. from Lina, with a church. Pop. 2220.

LEONSSA a tn. Naples, prov. Abruzzo-Ulton II., dist. and 18 m. N. Civita Ducale, 1. bank Corone. It stands in an amphitheatre, surrounded by lofty precipices, which in winter enclose the sun till mid-day, amidst five churches, four monasteries, and three manors, and two hospitals, the one lasting eight and the other four days. Pop. 7000.

LEONFELDEN an anc. and once fortified market tn. Upper Austria. 15 m. N Linz, with two churches. Pop. 600.

LEONFELT, a tn. Styly prov and 37 m. W N W Catania. It is walled, and consists chiefly of an extensive square, opened into by two spacious well-built streets. Its carves on a considerable trade in corn, wine, and silk. Both asphaltum and sulphur are found in the neighbourhood. The annual produce of the latter is great. Pop. 10,078.

LEONHART several places, Austria.—1 A vil Tyrol, circle Bolzen, in a valley of same name, with a church. Pop. 1560.—2 A tn. Nyrin, circle and 85 m. N E. Klagenfurt. It is walled, and has a remarkable church, a ruined castle and iron-works, supplied from mines in the vicinity. Pop. 700.

LEONI a tn. Naples prov. Principato-Ultra, dist. and 6 m. S St. Angelo del Lombardi with an hospital. P 4100.

LEONIL, a vil and par. Brazil prov. Mato-Grosso, r bank Gampora, about 30 m. above Fort Principe da Beira. It has a parish church and is inhabited chiefly by Indians, who subsist by the chase and fishing. The females make articles of earthenware. Pop. 1000.

LEONTELE, or LEONTELE, in Greece. See LEUTTRA.

LEOPOLD a port. N America near the N W entrance of Prince Regent's Inlet from Barrow's Strait. Lat. 73° 50' N. lon. 90° 10' W. See James Ross, in his search for Sir John Franklin, was frozen up here from September 1846 to August 1847.—2 An isl. Barrow's Straits, N E. of the above port and of Cape Clarence. Lat. 74° 3' N. lon. 80° 53' W. (s.)—3, A cape, W coast Hudson Bay. Lat. 75° 47' N. lon. 75° 10' W. (s.)

LEOPOLD (Sax) a tn. Brazil prov. São Paulo-do-Rio-negro, between the two and Cabo, 30 m. N Porto Alegre. It was founded in 1824 by a colony of Germans, under the patronage of the Empress Leopoldina, wife of Don Pedro I. to whom it owes its name and was making great progress, when its prosperity was arrested by the revolution of 1835 and the troubles of 1840 and 1841. It has again begun to prosper and sends garden staves, milk butter and cheese to Porto Alegre. Pop. dist. 4000.

LEOPOLDINA a vil. Hungary. Banat, on Lake Weiz. Population about 20 m. from Timisoara, with two churches. The inhabitants are chiefly frontier soldiers. P 2255.

LEOPOLDSDALF a tn. Hungary. Thier Danube, co. Neutras, near bank Waag 24 m. S E. Prossburg. It is a place of some strength, being surrounded by walls and bastions, and otherwise fortified. It contains two churches a synagogues hospital barracks and large magazine. Pop. 1666.

LEPANTO or FAKTO (anc. *Nepantua*) a seaport in Greece near Rhodes, N W part of the gulf near the strait of same name 103 m. W W Athens. It stands on the side of a hill and, when viewed from the sea, presents the form of a triangle the apex of which occupying the summit, is crowned by a castle, while the walls diverging down to water, and then skirting the shore, form the three sides. It is at present a very unimportant place, and owing to the sitting up of its harbour has almost no trade, but was an eminently considerable importance stood a siege, in 1475, from the Turks, who, after four months were obliged to retire with a loss of 20,000 men, and is memorable for the naval battle fought within the gulf in 1571 between the Ottoman fleet, and the combined fleets of the Christian States of the Mediterranean, under Don Juan of Austria, when the former consisting of 200 galleys and 60 other vessels, was destroyed. Corrales, author of *Don Quixote* distinguished himself in this battle, and received three wounds, one of which cost him the use of his left arm ever after.—The strait connects the Gulf of Corinth with the Gulf of Patras, and is about 1 m wide at its narrowest part, which is defended by a castle on either side.

LEPANTO (Gulf of) See CORINTH.

LEPI, a tn. and port, Spain, Andalusia, prov. and 12 m. W by R. Huelva, r bank Piedras; with a church, two convents a townhouse, a seminary, hospital, four schools, manufactures of linen, cotton, serge, wax, and oil, and a trade in fruits, salt fish &c. Pop. 3024.

LEPEL, a tn. Russia, gov. and 54 m. W S W Vitebsk, cap. dist. It is traversed by the Barents Canal and, by its means, exports much wood to Riga. Pop. 2000.—The port is level, well wooded towards the E. and covered with small lakes towards the W. Pop. 60,000.

LEPPER'S ISLAND one of the New Hebrides' Isla.; lat. 16° 25' S, lon. 167° 54' E. between the mts. Epiphanis Santo and Aurora.

LEPSENY, or LEPSENY a vil. Hungary. Thier Danube, co. and 17 m. E.S.E. Veszprem with two R. Catholic churches. Pop. 1253.

LEQUEITTO a tn. Spain prov. Biscay, 24 m. E N E. Bilbao on the Bay of Biscay. It has ancient massive walls, with five gates a very ancient and magnificent Gothic church a wall built townhouse, two old convents, a seminary, a veterinary school manufactures of iron, a factory, and a small harbour, with some coasting trade. Pop. 2326.

LEQUIGO or LEQUIGO a vil and com. Kingdom of Italy Piedmont, div. Com. prov. Mondovì between the Tanaro and the Mondavilla with a church, a palace, a communal house a monastery, and a trade in corn, cattle and wine. Pop. 1020.

LEUCHENFELD, or LEUCHENFELD, a vil. Lower Austria, near Vienna as to be properly one of its suburbs. It is well and regularly built, and consists chiefly of wine and beer shops much frequented by the citizens of the capital. It has a parish church and an hospital for wounded officers. Pop. 7680.

LEUEZ (Sax Saxony), a vil and par. Spain Galicia prov. and 5 m. E. Pontevedra, at the confluence of a river of its own name with the Portovedra. It has a parish church a suppressed convent, a primary school, several flour-mills, and a trade in corn, wool and fruit. Pop. 2011.

LEPILLO (Lepil) a tn. Italy Piedmont, div. Genoa prov. Levante E. shore Gulf of Genoa, 67 m. S E. Genoa. It is pleasantly situated but not well built, is defended by a polygonal castle, has a church with some good paintings, a Capuchin monastery with one of the largest churches which that order possesses the buildings of an old Augustinian monastery very beautifully situated on a terrace of land projecting into the sea several palaces, some of large dimensions, and adorned with stuccoes and marble facades an hospital an elementary school and a harbour which though deficient in shelter is much frequented by coasting vessels, and carries on a considerable trade. The fishery on the coast is productive, and employs a great number of the inhabitants. P 5217.

LEPILLO a prov. Spain, Catalonia, bounded N by France, N. E. by prov. Gerona E. by Barcelona S. E. by Tarragona, W by Saragossa, and W by Huesca, area 6141 sq m. It is irregular in shape and mountainous being traversed by ramifications of the Pyrenees the main chain of which separates the province from France. The mountains are usually well wooded and contain iron copper mine, lead, manganese, and coal with quarries of granite marble Jasper gneiss, and lime. The plains and valleys are fertile, yielding grain of all kinds, and fruits and vegetables in great abundance, domestic cattle are reared in considerable numbers, and great attention is paid to the culture of wine and silk worms. The principal rivers which irrigate the provinces are the Segre, Valira, Tixer, Noguera Pallaresa, Noguera Riva-gorosa, with many smaller streams. Linen, W. silk, cotton, and cotton fabrics, are manufactured also leather, paper, soap, iron and copper vessels, hats shoes, brandy &c. The inhabitants are far more industrious, and consequently more affluent, and the country is better cultivated than is generally the case in Spain. Pop. 197,445.

LEPILLO (Catalan, *Lleida* and *Lleida*) a tn. Spain, Catalonia, cap. above prov. partly on a hill on which it rises in the form of an amphitheatre, and partly in a plain, r bank Regre, here crossed by a handsome stone bridge of seven arches, 84 m. W N W Barcelona. Being regarded as the key of Aragon and Catalonia it is one of the most important military points in Spain, and possesses great strength being both surrounded by walls flanked with bastions, and by a very fine, and defended by a castle and several batteries. It is a very ancient place, and, having in recent times suffered much by the ravages of war presents, in many places, a very ruinous appearance. The houses, though very substantial, and composed of three or four stories, are frequently in a very dilapidated state, and the streets, with very few exceptions, are narrow winding, and ill-paved. The principal edifices are the old cathedral, presenting a curious, and rather incongruous mixture of styles—Byzantine, Gothic, and Moorish—with a porch formed of four concentric arches, unusually sculptured columns, and Byzantine windows of great interest, as spoils

ment of early art; the new cathedral, an imposing structure of the Corinthian order, with some good sculptures; the church of San Lorenzo, a very ancient building occupying the site, and supposed still partly to consist of what was originally a Roman baptismal temple, the church of San Juan, attributed to the time of Constantine the Great, and remarkable for its Byzantine porch, the episcopal palace, the townhouse, courthouses, and prison, the gymnasium or *Academy*, the diocesan seminary, the normal and other schools, the theatre, baths, and civil and military hospitals. The manufactures consist chiefly of woollen and cotton goods, leather, earthenware, glass, and paper and the trade, particularly in corn and timber is important. There is also a considerable transit trade, greatly favoured by the advantageous situation of the town on the high road from Barcelona to Madrid.

Lerida, originally the capital of the Illegians, in the wars between the Carthaginians and Romans, adhered to the former, and suffered much from both. In its vicinity Scipio gained a signal victory over the Carthaginian general Hannibal and as a result later period Julius Caesar defeated Afranius and Petreus, Pompey's lieutenants. After the departure of the Romans it fell into the hands of the Goths, during whose domination a celebrated council known by its name, was held at it. It was long held by the Moors, from whom it was taken by Raymond Berenger, king of Aragon, and continued, for several centuries after to be the capital of his kingdom. It has since several regular sieges. Pop 12 236. —[Madox]

LERIN *a* in Spain, prov Navarre, 28 m. S. S. W. Pamplona, 1 bank Ego. It has a handsome parish church, a spacious townhouse, hospital, prison two schools, six chapels, two of which are ruins, and one used as a cemetery, a magnificent palace of the Counts and manufactures of brandy, wine and oil. Pop 2295. —[Madox and Melville]

LEHIAN ISLANDS (Latin *Levian* islands) an island group, France, dep Var, in the Mediterranean, close upon the coast, opposite Cannes. It is composed of the fortified islands of St. Honorat and St. Marguerite (the first the *Lerina*, and the second the *Lero* of the Romans) and several smaller islets, and some shoals. In the castle in the latter long used as a state prison was imprisoned the Man in the Iron Mask and in a monastery in the latter 2 rancis I spent a night on his way to Spain as a prisoner. They are inhabited by the garrison and a few fishing families.

LERMA —A fortified castle Old Castle prov and 21 m. S. Burgos, with three churches, four chapels six convents a town and chapter house, prison, three schools an hospital and other charitable institutions, the ruins of an extensive ducal palace, and manufactures of earthenware and leather and a trade in grain and fish. Pop. 1198.—2 A vil and com. Cardifian States, div Genoa, prov and 10 m. S. S. W. Novi, 1 bank Piotta with a church, an old castle, manufactures of fustian and silk, and a trade in cattle. Pop 1346

LEBO, or Lencos a small Isl Grecian Archipelago, off W coast Anatolia. One of its loftiest peaks, Mount Kilit, 1090 ft. high, is in lat. 37° 10' 43" N. lon 26° 51' 30" E. It is about 10 m long, 2 to 5 average width 4 m. rocky and mountainous, but in some parts tolerably fertile producing grapes, olives figs, wheat, Indian corn &c. It is famous for its honey, as it was in ancient times for its aloes. Great numbers of sheep are reared on its heights. On the E. side is the town of Lero and on the N a commodious port, called Partheni. Pop 2000

LEBS, a river, France, which rises in the S. E. of dep. Ariege, flows very circuitously N. W. forming part of the boundary between that department and Aude enters dep Haute-Garonne and after a course of above 70 m., joins 1 bank Ariege, a little above Castelpagnon.

LEBOWICK a seaport to and par Scotland cap Rhéland Isles, in Bransy Sound, on S. E. shore Mainland, 21 m. N. N. E. of St. Andrew, lat. (fort) 60° 24' N. lon. 1° 8' 45' W. (a) It consists of a principal street, leading to the harbour, and opened into by a number of lanes; and though in general irregularly and rather poorly built, has received many recent improvements, and contains several substantial modern houses. The church, occupying a height in the N. part of the town, is modern, and has a Doric front, and on a island, in the vicinity, are the remains of a castle, supposed to be of Pictish origin. There are no manufactures of any sort.

Vol. II

sequence but the trade, greatly favoured by the fine anchorage in the bay, with easy access both from the N and S, is considerable. The chief exports are fish, butter, hides, rabbit skins, and stockings, the imports—coal cloth grain groceries, and timber. Many of the inhabitants are employed in the fisheries. Pop 3904. The par is about 6 m long, by 1 m broad. Pop 3890

LESINA a tn Naples, prov Capitanata, dist and 11 m. N. N. E. San Severo, S. shore of Lake Lucina. It is the see of a bishop. Pop. 1100.—THE LAKE called also Salto or Salpe the Pantano of 1 lmy forms a kind of lagoon along the Adriatic, into which it discharges itself, being only separated from it by a low and narrow belt of land, length, E to W 18 m. breadth, 8 m. It is well stocked with fish.

LESINA or LESNIA (anc. *Pharia*) —1 An Isl Austria in the Adriatic, off Dalmatia, circle Spalatro, separated from the peninsula of Sabioncello by the straits of Narona on the N. W. lat. (fort) 43° 10' 43" N. lon 16° 27' 15" E. (a) It forms a long and narrow strip, stretching E to W length, about 40 m. breadth, 2 m. to 4 m., and mostly composed of a chain of hills, which descending to the coast form high and precipitous cliffs, and furnish fair harbours. The arable and fertile ground is almost confined to the two valleys of Verbania and Verbania both on the N. side. The climate is remarkably mild, and though the corn raised barely suffices for two months consumption both wine and fruit of exquisite quality are produced. Among the latter may be mentioned figs, and among the former the so-called horse wine (*vin de épagne*). Large tracts are covered with ruscumy from the flowers the minuscule distil a spirit called *spirit de ruscum*, which greatly resembles *essence de Cologne*, and from the leaves they extract an oil, known in commerce by the name of *oleum*

23

LEVAN, formerly **CARTEL** in **LEVVA** a vil and par Tuscany in the Upper Val d'Arno, 7 bank Arno, 28 m S.E. Florence with a church, and a small castle. P 1904

LEVANT a tn, Norway prov and 35 m N.E. Trondheim, on the N.E. shore of the Trondhjemfjord. It was nearly destroyed by fire in 1846, and has been rebuilt houses clean and comfortable but streets unpaved and filthy. The harbour is well sheltered and forms a kind of commercial outlet for Trondheim, and as the fjord never freezes the navigation at all times unimpeded. Hence it is much used even by the Swedes, who as soon as the snow has fallen and made the transport of heavy goods by sledges practicable, proceed to bring them across the country for export. Levant has two large manual saws, at which considerable quantities of iron (per com, dried fish etc are sold. Pop. 145

LEVANT or **SOUTH EAST** a name given to the E part of the Mediterranean Sea, and often extended to the countries which there lie along its shores

LEVANT a prov Italy Piedmont div Cuneo bounded N by France, E by the Apennines, S by Turin, W by the Gulf of Genoa. It is in several mountains and in its much indented coast is the Gulf of Spezia. It is divided into six municipalities and the chief towns are: Imperia, cap. Lerici, Levanto and Sanremo. Area, 450 sq m. Pop. (1848) 78,569

LEVANTINA or **LEVANTINIA**, a dist and valley Switzerland, ca. Ticino, commencing in the N of the canton of Uri, where the valley of Bedretto terminates, and extending N.E. to Basov, near the confluence of the Magno with the Tessin. Its direct length thus defined, is about 16 m its breadth nowhere exceeds 1 m. The Tessin occupies its centre, while its sides are hemmed in between magnificent mountain precipices. At Dazio, a little above Faido the river enters a delta formed by a huge rent in Mount Posio into a fluvial and forms a magnificent cascade. The valley above this point takes the name of Upper Levantina. Here the valley contains only pastures and rich meadows. Lower down fruit trees grow and the soil becomes arable. At the S. extremity both the fig and the mulberry ripen. The district of Levantina includes the valley of Bedretto and is divided into four circles—Arolo, Quirio, Paolo and Gornio

LEVANTU a tn Italy Piedmont div Genoa, prov Levante on a small bay of the Mediterranean 11 m. N N W Genoa. On the land side it is surrounded by walls flanked with towers, and, towards the sea, defended by a castle and several batteries. LEVEL, or **KALATZKES** a vil Hungary Thither Thois, co. and 4 m. W Weisburg, with two churches. Pop. 1124

LEVEN several rivers and lakes, Great Britain.—1 (see *Jules*) A river England, co. Cumberland, formed by the junction of the Black and White Levens or Leas which unite about 2 m N W Skipton, whence the stream flows S W and joins the Eek about 5 m above its embouchure in the Helwary Firth.—2 A river co. Lancaster the outlet of Windermere Lake to the sea it falls into Morecambe Bay.—3 A river Scotland, co. Dunbarton. It issues from the S extremity of Loch Lomond and falls into the Firth of Clyde at Dunbarton after a course of 7 to 9 m through a beautiful level called the Vale of Leven in which are numerous works for bleaching, dyeing, calico-printing &c. At high water the river is navigable for large vessels up to the quay of Dunbarton. Its waters are remarkably pure and transparent, and form the subject of Smollett's 'Ode to Leven'.—4 A small stream, Scotland, Argyleshire flowing into Loch Leven well stocked with salmon and fine trout.—5 A stream Scotland co. Fife which issues from the E. end of the lake of same name flows E for about 12 m and falls into Largan Bay in the Firth of Forth.—6, A loch Scotland co. Fife of irregular oval figure, and 10 to 11 m in circumference. It contains four islands, one of which are the ruins of the ancient castle where Queen Mary was confined in which she signed her abdication and from which she escaped on the 24 May 1568 shortly before the battle of Langside. The trout caught in this lake have been long celebrated for their fine flavour.—7 A long narrow arm of the sea Scotland, off Loch Linnhe, extending in nearly a straight line, W to E. between one. Inverness and Argyle. It is remarkable for the wildness and grandeur of its scenery

LEVY, per Eng York (F Riding) 4937 ac. 1 993

LEVONE, a vil. and com Italy Piedmont, dist. and about 4 m. S. Iarna with a church, and a small secondary manufacture of earthenware, ironworks, and a trade in wine and dairy produce. Pop. 1095.

LEVROUX [see *Gohetum* or *Leproux*] a tn France dep. Indre, 12 m. N Chateauroux, on the Nabou. Its church is the finest in the department. It manufactures cloth and leather, and trades in corn, wine, wool and cattle. P. 2608.

LEWANNICK, par Eng Cornwall; 4000 ac. P. 747.

LEWEE, a par. bar and market in England on Sussex 7 m. E. by E. Brighton, on the S. coast railway, 2 bank Ouse which is here crossed by a stone bridge. It consists of one principal street, nearly a mile long built on an acclivity, remarkably clean, and of several minor streets and lanes. The town is lighted with gas and amply supplied with water and has seven parish churches, a number of dissenting places of worship, a Unitarian chapel and a Friends meeting house, a new county jail and county hall, containing a handsome ball-room, grammar-school, national British and infant schools and several respectable private seminaries, a dispensary, a subscription library and a mechanics institute. The Sussex Archaeological Society and Sussex Agricultural Association have their headquarters here. Agricultural implements are manufactured to some extent, and a considerable trade is carried on in corn, wine and coal. The Ouse is navigable for several miles above the town. The borough returns two members to the House of Commons. Registered electors (1851), 724. Lewes is of great antiquity and contains the ruins of numerous ecclesiastical buildings. Roman remains also are from time to time discovered. Here, in 1264, the royal army under Henry III., was signally defeated by the confederated barons under Simon de Montfort 1 op (1851), 9635.

LEWIN—1, a tn Prussia, prov. Rhinea, gov. and 56 in. S. S. W. Breslau on the Rhenishberg, and the Schellbach with a church, chapel, schoolhouse, and hospital, manufactures of cotton goods, calicoes, and starch tile-works, and seven annual fairs. Pop. 1872—2 (or 24). A vil. Bohemia, dioc. Bielehow on the Wolehanka, 6 m. from Neu Palkau, with a church a school an old castle and a mill. 1 op. 913.

LEWIS the largest of the Hebrides, separated from the mainland of Scotland by a sea 30 to 35 m. wide, called the Minch. The N. E. extremity of the island named the Butt of the Lewis is in lat. 58 31 N., lon. 6 14 W. (N.). The N. portion is called Harris, and is connected with the former by a narrow strip of land. These two divisions are in two different counties—Lewis being in Ross-shire, and Harris in Inverness-shire. The entire length of the island S. W. to N. E., is 52 m. breadth, varying from 30 m. to 6 and 10 m. area, nearly 700 000 ac. It is of irregular form, and is deeply indented all round by bays and inlets—the most remarkable on the W. coast being Lochs Rogg, Nessort, and W. Tarbert on the E. Dracad Bay, Stornoway Harbour, and Loris Ernsort, Rosforth, E. Tarbert, and Roddal. Several small islands are dispersed along its coast, the principal of which are Somara on the S. E. shore and Pabay Taransay Scarpa, and Bona, on the W. coast. The shores are low and rocky, and full of wave worn caves. The island is, in general flat, but contains some considerable elevations, two of which rise, each to 2700 ft. above sea-level. Numerous beautiful slopes and valleys also occur—the latter traversed by clear rivulets. The rocks are granite, and the subsoil generally speaking is a rich gravel without any vegetable remains, excepting mossy plants. In the interior, the appearance of the country is peculiarly bleak and desolate, especially in the after part of the year when the brown bent, which grows on its boggy surface, becomes decayed. This bog is from 2 to 10 ft. and in some places 20 ft. deep, although the general depth may be stated at about 4 ft. The rivers, which are numerous, have all short courses flowing directly to the coast on either side. Small lakes are thickly dispersed over the whole island, and both the former and the latter abound with fish, including salmon and sea trout. Fish are also in great plenty along the shores. The bulk of the soil is deep peat-moss, but the cultivated parts have a soil composed of the debris of the granite rocks, in all conditions and mixtures of gravel, clay and sand; but so scanty is the available soil that the cultivation is generally on the lay-hed system—the trenches, in many instances, occupying nearly as much space as the ridges.

Agriculture formerly in an extremely backward state in this island generally, has in recent times been greatly improved by a new and wealthy proprietor, who bids fair to effect a complete change for the better, both on the island and those who inhabit it. The Gaelic language is almost universally spoken by the people are social, of kind dispositions, and intelligent, they are also industrious, and ready to exert themselves when sufficient inducements appear. They manufacture a considerable portion of their own potteryware, from the clay found amongst the granite gravel, fashioning the vessels merely with finger and thumb the strength and fineness of the ware proving the excellence of the clay. The principal town on the island is Stornoway (which see). Pop. 19 711 (Smith of Doneston in the Proceedings of the Glasgow Philo. Soc. 1851). Wilson's *Voyage round the Coast of Scotland* Statistical Account, &c.)

LEWIS, or GREAT SNAKE RIVER, N. America, Oregon territory one of the largest affluents of the Columbia. It issues from a small lake in the Rocky Mountains lat. 42° 30' N. lon. 110° 0' W., whence, after having made a S. bend, it flows N. W. to about lat. 46° 20' N., when it proceeds W., and falls into the Columbia, near Fort Waples, about lat. 46° N. In its earlier course, it is joined by a number of tributaries from the S., which are seen pouring into it at nearly equal distances of 5 m. from each other, and also some large affluents from the E., and a N. branch called Waplescoo, which unites with the main stream at lat. 46° 40' N. Its whole course is about 650 m.

LEWIS an id. off N. W. coast Australia, belonging to the Dampier Archipelago lat. 20 25 S. lon. 118 15 E. It is separated from Enderby Island by a strait about 2 m. wide and is apparently inhabited.

LEWISHAM, a vil. and par. Eng. Kent about 6 m. S. E. London, on the road to Tunbridge. The villa AOK extends about 1 m. along the road, and the whole neighbourhood owing to the beauty of its situation, and its proximity to the metropolis, is covered with villas and splendid mansions. The parish church has a square tower and a handsome Corinthian porch, and there are three endowed schools, one of them for girls. Besides the church, there are, within the parish, several Episcopal Wesleyan, and Independent chapels. Area of par. 5789 ac. Pop. 15 064.

LEWISTOWN a tn U. States Pennsylvania cap. of Mifflin, 142 m. N. W. W. Philadelphia, N. side of Juniata river, at the junction of M. Schuylkill Creek, and on the Pennsylvania Canal. It has a large court-house and public offices in the middle of an open square, four churches, an academy seven schools three tanneries, a brewery, a pottery a printing-office and a grist and a saw mill. Pop. 2653.

LEYDEN or **LEIDEX** (Latin, *Legidunum Batavorum*, French *Leyde*) one of the most important towns in Holland and in extent, though not in population next to the capital.

It lies in prov. S. Holland, 22 m. S.W. Amsterdam, on the railway thence to Rotterdam, on both sides the Old Rhine, and is intersected by the Dord, Maas, Vliet, and Zyp; lat. (observatory) $52^{\circ} 9' 30''$ N. lon. $4^{\circ} 39' 30''$ E. It was formerly fortified, but the walls and ramparts have been cleared away and planted with trees the only remaining two towers have been converted into storehouses five of the earthen bastions have been formed into burying-grounds, four are covered with wind mills and factories, and the remaining four have been levelled and turned into gardens. Seven well built gates and the castle (*de Burg*), one of the oldest and most respectable buildings in the town, but now converted into an inn, and its grounds into tea-gardens, are the chief monuments of the former fortress. Leyden is encompassed by wind-mills, and surrounded by country-seats, pleasure-grounds, gardens, and fertile meadows the best of these depauperate lands which excepting that made near Delft, produces the best butter in Holland. The streets of the town are straight broad, and kept exceedingly clean that one named Broad Street [*Bredestraat*] is esteemed one of the finest in Europe, being compared to the High Street in Oxford. In it is situated the townhall (*Stad-huis*) originally founded about 1415;

THE TOWNHALL, LEYDEN. — From Van Saanen's Holland and Belgium.

but since that period often altered and repaired about 1507 nearly wholly renewed, and enlarged in 1668, and again in 1704. It is a picturesque old building with its prominent parts gilt, 30 wind-mills in a line in front, a tall spire, and three highly-ornamented projecting gables. In the council chamber are the painting of the Last Judgment, by J. van der Leyden and several good historical portraits and in part of the lower floor is situated the fish-market. Near the townhall in the same street, in the German lands-huis van Rijnland containing the offices of the superintendant of dykes. Other noteworthy edifices are the prison, weigh-house, butter-house, cloth hall, infantry barracks, and town dockyards. It has 14 churches and a synagogue, besides sundry congregations worshipping in halls &c., they include four Reformed one Walloon one Dissenting one English one Evangelical Lutheran one Remonstrant, four Roman Catholic and one Jesuit. None of these are very remarkable buildings but in the Reformed church of St. Peter are monuments to Boerhaave, Spanheim, Swammerdam &c. There are numerous ordinary poor and Latin schools also academies of drawing design architecture and music, but the most important educational institution is the university formerly one of the most famed in Europe, and still in excellent repute. As some indemnification for the privations suffered during the siege of 1574, the Prince of Orange offered the inhabitants exemption from certain taxes or a university. To their lasting honour they chose the latter and it was accordingly inaugurated by the Prince the following year 1576. Its buildings possess no remarkable architectural features. In 1649, it was attended by 464 students, of whom nearly a half were studying law Connected

with the university are a well laid-out botanic garden, an observatory a library with numerous MSS. an anatomical theatre and museum of comparative anatomy one of the richest collections of natural history in existence, cabinet of coins, museum of antiquities, and a rich Japanese museum. There are also a valuable collection of agricultural implements, an economic garden for the promotion of native gardening and agriculture, and a national herbarium. There are, likewise, several learned societies a fine art society, and associations for the distribution of Bibles, of tracts, and for the education of the poor. A century ago, a fourth part of the inhabitants of Leyden was said to be paupers. The number is understood not to have diminished in recent times, and some raise the proportion as high as a third; a second third being self-supporting and the last third providing wholly for the paupers. The benevolent and charitable institutions are very numerous, and include poorhouses orphan, and old men and old women hospitals connected with the various religious bodies, a general poorhouse, called the *Huiszittenhuis*, for those who have no claim on other institutions; and various societies for assisting the poorer householders. The heavy taxes thus incurred, together with foreign competition, render it difficult for the manufacturers to maintain their place. The cloth manufactures, for which Leyden was at one time greatly famed, reached their greatest extent in 1670 they subsequently fell off greatly but have revived in recent years, though not to their former extent. There are now 16 steam factories in the town including three cloth factories several on wool, bams and comb factories, wool spinners, calico printers, &c. also a manufacture of paper-hangings tanneries alumeries, soap-works, brasseries distilleries, a machine factory anchor smith and the former great trade in books, carried on in the latter part of the 17th and during the greater part of the 18th century and rendered well renowned by the Elsevier is represented by five printing-offices. The weekly markets are very well attended and large quantities of grain, butter and cheese are sold in them.

The most memorable event in the history of Leyden is the siege it sustained from the Spaniards in 1573-74 when Pieter Adriaan van der Werff was burg master. By his resolution and heroic example, the inhabitants were enabled to stand out nearly four months. For seven weeks there was no bread within the walls, and horses dogs, cats, and rooks of all kinds were eagerly eaten up when hunger became no longer bearable and the people, dying in hundreds, implored the burgo-master to surrender the town he offered his body to appease their appetite and thus the most clamorous were allayed. To relieve the town the Prince of Orange at last broke down the dykes and a favouring wind accompanying the waters came over the land so rapidly that above 1000 of the besiegers were drowned. The same wind wafted a fleet of 200 boats from Rotterdam to the gates of Leyden, and relieved the place. It has at various times been severely visited by pestilence in 1509 and in 1599 deaths were numerous in 1624, in a few months, 9997 died, and in 1635 from July to December the deaths amounted to 14,562. Leyden is the birthplace of many eminent and remarkable men among whom may be specified Jan Hockholt, or John of Leyden the founder of the Anabaptists Karel van Maats one of the translators of the New Testament the medical doctors, Gerard van Swieten and Pieter Camper the naturalist, Naasben broek, the learned brothers Gerard and Isaac Voosius, Gernoo van, and Nicholas Heusler, and the painters, Lucas van Leyden, the brothers Van der Velde Metus Kiser, father and two sons Gerard Douw and Rembrandt, &c. The pop. of Leyden, at one time 90,000 is now (1856) 35,954. — [Van der Aardrijck Woorden. *Verdermed. Statistisch Jaarboek*, 1851.]

LEYDERDOPF, a vil. Holland, prov. S. Holland about 14 m. E. Leyden, and on the Rhine, here crossed by a bridge. It is a favourite place of resort of the Leyden people many of whom reside here. It has two churches and a school an

orphan hospital and a poorhouse, some brick and tile making, brewing, and saw and walk mills. Pop. 1098

LIBAU, a seaport tn. Russia, gov Courland at the mouth of the river or lake of the same name, 120 m W S.W. Riga. It is walled, and entered by a single gate is irregularly built, most of the streets being narrow and ill paved and houses, chiefly of wood and only one story indifferent.

It has on. R. Catholic, and two Lutheran churches—one of the latter the handsome church in Coarland; an hospital, poor-house, and town-school. The harbour the meet & which Russia possesses in the Baltic, is tolerably secure, depth 8 to 12 ft. and has a quay formed by wooden piles, and well supplied with warehouses. Its trade is considerable. The chief exports are corn, hax, wax, hemp, leather, butter, wax, honey, tallow, beef, and deals the imports, colonial produce, and manufactured goods. Pop (1855) 8961.

LIBBETH, and QUOTHQUAN, a par. Scot. Lanark 8° 03' sc. P. p. 800.

LIBEN (AIZ), a vil Bohemia, cercle Kautzen, r bank Mohla which here forms several islands, about 3 m. from Prague. It has a castle, a chapel, a synagogue, two schools one of them for Jews; manufactures of beet-root sugar and copperware, machine-works and a cotton printfield. P 1904.

LIBERIA a republic W coast of Africa, midway between Sierra Leone, and Cape Palmas, extending 220 m. along the coast, with an average breadth inland of 60 m. and having Cape Mesurado lat. 6° 19' N. lon. 10° 50' W (lat.) near the centre of its coast line. It was founded as a colony of free blacks by the American colonization society in 1820 under the philanthropic idea, that many if not all of the liberated slaves, would prefer returning to Africa to staying in America where they were denied political rights, and treated as an inferior race and the experiment, notwithstanding the grievous discouragements it met with at the outset has been eminently successful. The whole territory of Liberia has been purchased, from time to time, from the aboriginal owners. It is well watered, being traversed by several considerable streams, having their sources in the interior. Its natural resources are abundant, and are steadily in process of development. Cotton is indigenous, and yields two crops a-year and the cultivation of it succeeds well where it has been tried. Coffee thrives well a single tree at M. yields yielding 30 lbs at one gathering. Sugar cane grows in unrivalled luxuriance. cane-wood grows in unlimited quantities and red wood, bar-wood, and other dyers, are likewise plentiful. the oil palm is abundant and indigo, castaneous ginger arrow root, cacao pine-apples, coconuts, water-melon, yams, plantains, bananas, figs, olives, tamarinds, lemons, oranges, lemons &c. may be added to the list of vegetable products many of which are exported to a greater or less extent. Ivory is easily obtainable and rich metallic veins exist, only requiring capital to open them up. A considerable export and import trade is now carried on; and a large number of the inhabitants of the interior depend upon Liberia for their supplies of European goods. A thirst for education has likewise been awakened among the surrounding aborigines, many of who send their children 400 m. and 500 m. to be educated in the Republic. The Liberians have built for themselves 30 churches of brick and stone, and possess numerous schools, and a considerable number of printing presses. More than 20 000 natives have requested to be taken under the protection of the state, while not less than 100 000 live on its territory and 350 000 are bound to it by treaties to abolish the slave-trade. At different times, ten buildings, erected by slave-traders for the storage of slaves have been burned down by the Liberians, and at the same time hundreds of slave-creatures there confined, liberated and they at all times afford refuge to the weak and the oppressed. The climate, though still fatal to Europeans, has been greatly improved by clearing drainage, &c. Monrovia, the capital, and part of the colony, is situated on Cape Mesurado. In it resides a British consul. There are besides, above 20 towns and villages in the territory. The government of the country is precisely on the American model consisting of a president a vice-president, a senate, and a house of representatives; the number of members in the former being six, and in the latter 29. Liberia was declared an independent state in July 1847, and in the following year, was recognized as such by Great Britain and France when a treaty of trade and commerce with the state was concluded. A large proportion of the inhabitants speak English. Pop. (1855) 250,000.

LIBERTON par Scot. Edinburgh 4700 sc. P 3528.

LIBETH (BASTA) LIBETH, or LIBETHOVA, a mining co. Hungary co. Bold at the confluence of the Hutsa and Utevoke, 12 m. N. K. Neuzohl with two churches, a townhouse, and extensive mines of iron and copper, manufactures of

cutlery and earthenware, and a considerable trade in grain, flour, wood, and cattle. Pop. 1400.

LIBOURNE (see Condate i. lla) a tn. France, dep. Gironde, r bank Dordogne, here joined by the Isle, and crossed by a fine suspension-bridge, 17 m. N. N. E. Bordeaux. It is walled, and built with great regularity, with a large and handsome square in the centre, has spacious and almost exclusively straight streets, lined with elegant houses. The chief buildings are the public library barracks, museum, and fine cavalry barracks. The manufactures consist of glass, which is an important woollen stuffs, leather, nails, and ropes. The harbour, in which the tide rises from 12 to 15 ft. admits vessels of 500 tons, and serving as an entrepot for Bordeaux has an important trade in wine, brandy, salt, coal, ship-finisher iron &c. There are also commodious building-yards. Libourne has courts of first resort, and of commerce, a commercial exchange, a school of hydrography an astronomical a communal college, and a botanical garden. The present town was founded by Edward I of England and Agnes Angles in the 13th of his time. Pop. 6850.

LIBILLI a tn. a tn. Spain, prov. and 104 m. S. S. W. Murcia. It consists of the town proper built in the form of a parallelogram and the suburbs, situated on the opposite side of a ravine and communicating with it by a bridge and has a church, courthouses prison and primary school manufactures of salt-petre, and several oil and flour mills. Pop. 3088.

LIBYAN DESERT that part of the Sahara or Great Desert, bounded N. by Tripoli E. by Egypt and Nubia S. by Darfur and Waday and W. by Fezzan, and the country of the Tibboos. Here the continent of Africa shelves down towards the Mediterranean in a series of terraces, consisting of vast level sandy or gravelly deserts lying E. and W. separated by low rocky ridges. This desert is probably not less than 1000 m. in length, N to S, and from 500 m. to 600 m. in breadth.

LICATA a seaport, Sicily. See ALCATA.

LICCA, or LAMA a river Austria which rises in the N. side of the mountains of Veleich, between the frontiers of Delmatia and Croatia flows N. W. and, after a course of about 35 m. disappears below the ground at the foot of Mount Zebica, a little N. of the village of Lipovetz. It gives its name to a regimental district of Military Grana. LILLYVA (see Duguid) a vil Papal States 12 m. from Tivoli on a bright mountain stream, celebrated by Horace. The post's Sabine villa stood about midway between the road and the river but the only remains of it are two capitals some other fragments of Doric columns and a white mosaic pavement, partly covered by a vineyard. Pop. 700.

LICH a tn. in House Darnstadt, Oberhausen on the W. water 7 m. S. E. Gussion. It is walled, flanked with towers and has a Gothic parish church, a castle, several schools, tile-works, and mills. Pop. 2337.

LICHFIELD, an episcopal city forming itself a county England Staffordshire, in a pleasant and fertile valley, on the London and N. W. railway and 16 m. S. E. Stafford. It is well paved and lighted, amply supplied with water, and contains a number of well built, commodious, and handsome streets. The principal edifice is the cathedral, presenting from its elevated site, a very conspicuous object at a distance and consisting of a large and handsome structure, partly in the early English, and partly in a more recent style, with a richly-decorated W. front, and three spires—two on the W. each 180, and one in the centre, 230 ft. high. The other buildings, deserving of notice, are the church of St. Chad, by far the oldest in the town, the church of St. Mary a hand some modern edifice, the church of St. Michael finely situated and recently restored in admirable taste the guildhall, theatre, jail, house of correction, and market. Besides the above churches, are several chapels connected with the Establishment, and places of worship for the Independents, Wesleyans, and R. Catholics. Among schools, the free grammar school and national are the most important. The medical institution has a good collection of books and natural curiosities. The chief benevolent institutions are St. John's hospital, with 18 almshouses, a female hospital, and an endowment for the benefit of the widows and unmarried daughters of clergymen. The staple manufactures are carpets, coaches, and harness; and there are several extensive breweries. The most distinguished natives Dr Samuel Johnson

to whom a monument has been erected. Lichfield sends two members to Parliament. Registered electors (1851), 563. Pop. (1851), 7012.

LICHTAFERT, a vil. and com. Belgium, prov. and 23 m. E. Antwerp, near the Little Nethe, with malt and flour mills, and a trade in corn. Pop. 1041.

LICHTEN, a vil. Austria, Salts, draie Troppen on the Rhen as 12 m. from Tyndenthal. It has a parish church and a chapel. Pop. 1760.

LICHTEHAFEL, numerous places, Germany, particularly—1. A. in Hesse-Cassel Kasselbussen, cap. bail, near the source of the Lohse. It is walled, has a church and an hospital manufactures of linen, and four mills. Pop. 1475. half 8708.—2. A. in Baden, circle Middle Rhine, 16 m. S. b. Stralsburg, with manufactures of silk and woollen goods, dye-works and oil-mills. Pop. 1300.

LICHTEHAFEL, two places, Prussia.—1. A. in Rhénish Prussia, gov. and 50 m. S. Minden, on the Saue. It has a R. Catholic church manufactures of leather, and several mills.—2. (Ober and Nieder), two nearly contiguous vils. prov. Silésia, gov. and W. S. W. from Liegnitz, with a church, and oil, saw, and other m. l. Pop. 1378.

LICHTEHAFEL, a vil. in Bavaria, Upper Franconia, 70 m. N. E. Bamberg, with a castle, hospital, and Latin school, blast-furnaces, iron, vitrol and copper works and a trade in flannel, woollen cloth worsted and iron. Pop. 900.

LICHTEHAFEL, a vil. Prussian Saxony gov. and 48 m. N. N. E. Merseburg, with a castle, called Hedwigsburg which is now converted into a house of correction and is historically interesting as the place where a meeting was held, in 1515, between Luther, Frederick the Wise, Spalatin, Melancthon, and Müllers. Pop. 558.

LICHTEHAFEL, a vil. in Bavaria, Upper Franconia, cap. dist. 1 bank R. 15 m. N. W. F. Bamberg, on the railway, between Hof with a court of justice, two churches, a synagogue, a castle, hospital, manufactures of linen and porcelain, and a trade in wood, corn, hops, and fruit. Pop. 1165. Area of dist. 80 sq. m. in Pop. 23,236.

LICHTEHAFEL, a vil. and par. Switzerland, can. and 16 m. W. S. W. St. Gall, on a height, above a bank Thur, here crossed by a covered bridge. It is the only place which ranks as a town in the Toggenburg and contains an ancient church, used in common by the Protestants and R. Catholics, a town house, and has a considerable trade in corn and cattle. Near it, on a lofty height, are the remains of the castle of New Toggenburg, the last seat of the Counts of the name. P. 744.

LICHTEHAFEL, a vil. in Saxony, circle Zwicken 14 m. W. S. W. Chemnitz, with a modern castle, an hospital, manufactures of linen, and several paper and cotton mills. P. 8218.

LICHTEHAFEL, a vil. in Prussia, circle Liegnitz, with a church, and a trade in wood, corn, hops, and fruit. Pop. 1165. Area of dist. 80 sq. m. in Pop. 23,236.

LICHTEHAFEL, a vil. and par. Switzerland, can. and 16 m. W. S. W. St. Gall, on a height, above a bank Thur, here crossed by a covered bridge. It is the only place which ranks as a town in the Toggenburg and contains an ancient church, used in common by the Protestants and R. Catholics, a town house, and has a considerable trade in corn and cattle. Near it, on a lofty height, are the remains of the castle of New Toggenburg, the last seat of the Counts of the name. P. 744.

LICHTEHAFEL, a vil. in Saxony, circle Zwicken 14 m. W. S. W. Chemnitz, with a modern castle, an hospital, manufactures of linen, and several paper and cotton mills. P. 8218.

LICHTEHAFEL, a vil. in Prussia, circle Liegnitz, with a church, and a trade in wood, corn, hops, and fruit. Pop. 1165. Area of dist. 80 sq. m. in Pop. 23,236.

LICHTEHAFEL, a vil. in Saxony, circle Zwicken 14 m. W. S. W. Chemnitz, with a modern castle, an hospital, manufactures of linen, and several paper and cotton mills. P. 8218.

LICHTEHAFEL, a vil. in Prussia, circle Liegnitz, with a church, and a trade in wood, corn, hops, and fruit. Pop. 1165. Area of dist. 80 sq. m. in Pop. 23,236.

LICHTEHAFEL, a vil. in Saxony, circle Zwicken 14 m. W. S. W. Chemnitz, with a modern castle, an hospital, manufactures of linen, and several paper and cotton mills. P. 8218.

LICHTEHAFEL, a vil. in Prussia, circle Liegnitz, with a church, and a trade in wood, corn, hops, and fruit. Pop. 1165. Area of dist. 80 sq. m. in Pop. 23,236.

LICHTEHAFEL, a vil. in Saxony, circle Zwicken 14 m. W. S. W. Chemnitz, with a modern castle, an hospital, manufactures of linen, and several paper and cotton mills. P. 8218.

LICHTEHAFEL, a vil. in Prussia, circle Liegnitz, with a church, and a trade in wood, corn, hops, and fruit. Pop. 1165. Area of dist. 80 sq. m. in Pop. 23,236.

LICHTEHAFEL, a vil. in Saxony, circle Zwicken 14 m. W. S. W. Chemnitz, with a modern castle, an hospital, manufactures of linen, and several paper and cotton mills. P. 8218.

LICHTEHAFEL, a vil. in Prussia, circle Liegnitz, with a church, and a trade in wood, corn, hops, and fruit. Pop. 1165. Area of dist. 80 sq. m. in Pop. 23,236.

LICHTEHAFEL, a vil. in Saxony, circle Zwicken 14 m. W. S. W. Chemnitz, with a modern castle, an hospital, manufactures of linen, and several paper and cotton mills. P. 8218.

LICHTEHAFEL, a vil. in Prussia, circle Liegnitz, with a church, and a trade in wood, corn, hops, and fruit. Pop. 1165. Area of dist. 80 sq. m. in Pop. 23,236.

LICHTEHAFEL, a vil. in Saxony, circle Zwicken 14 m. W. S. W. Chemnitz, with a modern castle, an hospital, manufactures of linen, and several paper and cotton mills. P. 8218.

LIDDEL, a river, Scotland, co. Roxburgh, which flows S. W. and enters the Fife, 7 m. S. Leith, after a course of about 24 m., for the last part of which it forms the boundary between England and Scotland. The romantic valley through which it flows forms the district of Liddedale.

LIDDELE, a vil. and par. Switzerland, can. Valais, in the valley of Entremont, on the road from Margery to the Great St. Bernard. It stands on a well-cultivated slope, is well built, and has a trade in dairy produce. Pop. 1411.

LIDDIARD two pars. Eng. Wilt.—1. (Milton), 2321 ac. P. 491.—2. (Trecrook), 6142 ac. P. 807.

LIDDINGTON two pars. Eng.—1. Rutland 2020 ac. P. 604.—2. Wilt. 2767 ac. P. 434.

LIDFORD, par. Eng. Devon 56 233 ac. P. 1968.

LIDGATE, par. Eng. Suffolk 1780 ac. P. 494.

LIDI, a group of isles in the Adriatic opposite the agones of Venice, and extending in a curve, from the mouth of the Piave to that of the Brenta. They are merely an alluvial deposit, formed by these rivers and the action of the waves, and produce beautiful flowers and excellent fruit. They are seven in number and have the names of Lido di Bellunaria, Lido di Palenstano, Lido di Malamocco, Lido di Tegnole, Lido di St. Remo, Lido di Bellone, and Lido di Cavallina.

LIDINGÖ, a vil. Sweden, in the channel leading up to and a little N. E. of Stockholm, length, F. to W. 6 m. breadth about 2 m. communicating by a bridge with the park of Stockholm and a great hospital resort of its inhabitants.

LIDKOPING, a vil. Sweden, Jan Skaraborg or Mariestad, at the mouth of the Lida, in a beautiful bay on the S. side of Lake Wener 136 m. W. S. W. Stockholm. The river divides the town into two parts, both of which are well built.

LIDKOPING, a vil. Sweden, Jan Skaraborg or Mariestad, at the mouth of the Lida, in a beautiful bay on the S. side of Lake Wener 136 m. W. S. W. Stockholm. The river divides the town into two parts, both of which are well built.

LIDKOPING, a vil. Sweden, Jan Skaraborg or Mariestad, at the mouth of the Lida, in a beautiful bay on the S. side of Lake Wener 136 m. W. S. W. Stockholm. The river divides the town into two parts, both of which are well built.

LIDKOPING, a vil. Sweden, Jan Skaraborg or Mariestad, at the mouth of the Lida, in a beautiful bay on the S. side of Lake Wener 136 m. W. S. W. Stockholm. The river divides the town into two parts, both of which are well built.

Pop. 1808.—2 (*Höfen*) a vil circle Bohüman, with a castle, two churches, and several mills. Pop. 1020

LIEBENTHAL, a vil Bohüman, circle Chiradim, about 20 m. from Lefendel, with a church, school, and a trade in agricultural produce. Pop. 2170.

LIEBENWALDE a tn Prussia, Brandenburg gov and 37 m. N W Potsdam, 1 bank Havel. It has a court of justice a church building-docks, some shipping and a trade in cattle Pop. 2491

LIEBENWALDE a walled tn Prussian Saxony gov and 60 m. E N E. Morsburg cap. circle, 1 bank Black Elster with a court of law and several public offices a church a castle and a trade in wool. Leather had several interviews here with the papal nuncio, Milits. Pop. 3078 —The river is flat and well wooded sandy, but in general not fertile. Area, 232 sq. m. 1 op 83,343.

LIEBENZELL a tn Württemberg circle Schwarzwald in a deep valley on the Nagold, 20 m. W Stuttgart. It is an ancient place, contains the ruins of a strong castle, and has a small bathing establishment Pop. 1003

LIEBEROSE, a tn Prussia Brandenburg gov and 27 m. S W Frankfurt, on a canal, with a court of law two churches, and a trade in corn and cattle. In the neighborhood which is well wooded, there are several push ovens. Pop. 1491

LIEBRICH (*Omze*) a vil Bohüman, circle Lestemont, on the Rohrbach, about 38 m. from Prague with a church, a school, the works, a brewery a distillery and a mill P 1008

LIEBSTADT a tn E Prussia gov and 53 m. S S W K migsberg, on the Mule between two lakes with a court of justice a church a castle manufactures of woolen and linen cloth and a trade in cattle Pop. 1730

LIEBTEIN or LIEBTEIN the smallest principality in the German Confederation forming the 27th state, bounded N E by the Austrian circle of Tyrol, S by the Tyrol N by the Swiss can, Grisons and W by the Rhine, which separates it from St. Gall. In the N, it term notes almost in a point greatest length N to S, 18 m. average breadth, about 5 m. area, 53 sq m. The surface consists of a low ramification of the Alps, which stretch across the principality from S to N., and of two valleys, one on the E and the other on the W side of the ridge. The former valley is that of the Samina, so called from a small tributary of the Ill the latter is that of the P valley of the Rhine. The climate is tolerably mild and the soil almost everywhere fertile yielding abundance of corn wine, fruit, and flax. The pastures, too, are excellent and feed great numbers of cattle. For administrative purposes, it is divided into the two lordships of Scholemburg and Luchtemont the latter formerly called Vaduz, is the capital. It is a small place with a pop of 930. The family of Liechtenstein is a branch from that of Este. The Prince has extensive domains in Germany and particularly in Moravia Pop. 7860

LIEDEKIEK, a vil and com Belgium prov Brabant, 12 m. W Brussels, with many factories of linen a brewery, and some trade in corn Pop. 211

LIEDOLSHIM, a vil Baden, circle Middle Rhine dist. and N from Carlsruhe, with a church, and a trade in hay corn, cattle hump, and turf Pop. 7613.

LIEFIAND a prov Russia. So LIVONIA

LIEGP (*Dutch, Leutland*), an E. prov Belgium, bounded N by Limburg E. by Rhinisch Prussia, S by Luxembourg, S W by prov Namur and N W by Brabant. Length E. to W. 62 m. breadth, N to S, 38 m. area, 1117 sq m. Its surface is much diversified. In the S. it is mountainous and covered with forests. The culminating point, belonging to the Ardennes is Bazeux Michel 2230 ft. In the N and N W the surface is flat. The province belongs to the basin of the Meuse, by which it is traversed S W to N E. and, during its course, receives the Ourthe, already augmented within the province by the Lesne the Ambave, and the Vesdre. About three fourths of the whole surface are under cultivation, rather more than one-half in wood, and less than one-twenty-second waste. The banks of the Meuse consist

of long sweeps of well-cultivated plains and rich pastures, which extend uninterruptedly without any visible activity and are scarcely ever broken by a hill. The principal crops are wheat, rye, spelt, barley, oats beans and peas; hops, clover, and potatoes. Vegetables and fruit also are extensively raised. Both portions are rich in mineral treasures, particularly coal. The other minerals of importance are iron the carbonate, chiefly in the form of balls embedded in clay schist, and the hydrate, in layers, calcamine, alum building-stones, limestone and marble. Manufactures have made great progress and consist principally of broad cloth and various articles of iron manufacture, among which fire-arms hold a principal place. The trade of the province is facilitated both by water communication and railways. For administrative purposes Liege is divided into four arrondissements—Liege, the capital, Verviers Huy Waremmes subdivided into twenty-five military and twenty-four civil cantons. The ancient inhabitants of this province were the *Eboracens* afterwards succeeded by the *Thuris*. Subsequently it took the name of *Lutetia*, *Laupa*, and *Leuclia* and in the 10th century, became an independent state, governed by *prince bishops* of the German empire. This government continued till 1793, when Belgium was declared a part of France, and this prov included in department (circle) Pop. 452,824 of whom 437,443 speak French or Walloon 29,971 Flemish or Dutch and 4067 German

LIEGE (*Latin Leodunum Dutch Leek German Leutlich*) a tn Belgium, cap above prov 54 m. E. by S Brussels. It stands in a longitudinal valley terminated W by a hill called Sainte-Walburga, and E. by another hill called La Cornillon and is traversed from S W to N E by the Meuse, which is here joined by the Ourthe. Though once strongly fortified it is now only defended by S E by Fort Chateaux, N Cornillon, and N W by a vast canal recently constructed on the ancient site on the summit of Sainte Walburga. Liege is the Birmingham of Belgium and hence, on approaching it the first thing usually seen is a dense cloud of smoke. The interior corresponds and is by no means inviting. The streets are narrow often steep, and almost without exception ill cleaned while the houses have a dingy, dirty look, and are so high as both to exclude the sun and confine the air. The rivers, however are generally lined with stone quays, several of which are well planted, and afford good promenades, and there are eleven squares, which afford a good deal of open space. The chief of these are the *Place du Grand Marché* or *Hôtel de Ville* adorned with a fine fountain, and the *Place St Lambert*. The principal buildings are the Cathedral of St Paul in pure Gothic, begun to be rebuilt in the 13th century but not finished till 1557, the church of St Jacques, one of the finest existing specimens of ogival

INTERIOR COURSE OF THE PALAIS DE JUSTICE, LIEGE.

architecture the churches of St Martin, St Croix St Jean, St Denis, St Bartholomew, the last at once one of the oldest and most genuine specimens of the Romanesque period; the Palais de Justice, the ancient residence of the prince-bishops.

of an imposing appearance and adorned with a portico of rich composite columns; in the interior are two large square courts, surrounded by broad vaulted galleries, supported on mandorla-shaped columns adorned with a great variety of carvings, the Hotel de Ville the University occupying the extensive buildings of a Jesuit convent, and rich in collections of various kinds the Commercial College, a large, elegant, and well-constructed structure, and only inaugurated in 1849, the theatre, &c. Liège is the see of a bishop, suffragan to the archbishop of Mechlin, and possesses a superior court of justice, with jurisdiction over provinces Liège, Luxembourg, and Namur; courts of first resort and commerce, a university, with a special school of mines annexed, an episcopal seminary a royal college veterinary artillery industrial commercial and several other schools a public library of 75 000 printed vols and 600 MSS., cabinets of natural philosophy and natural history a botanical garden, a royal conservatory of music, an academy of fine arts, deaf and dumb and blind asylums and numerous other beneficent institutions.

The great staple manufacture of Liège is iron. Some of its establishments in different branches of this manufacture particularly that of fire-arms and the construction of machinery, surpass those of France, and almost rival those of Great Britain. The other principal manufactures are broad-cloth, and various woollen stuffs jewellery tobacco carriages soap hats, and leather. The trade in all these articles is considerable and is much aided by roads railways, canals, and navigable rivers, which bring the town into communication with the different quarters of the kingdom, and with foreign countries.

Founded in the 6th, Liège was not surrounded with walls and fortifications till the 10th century. In 1312 it was taken by Henry I Duke of Brabant, and pillaged for six successive days by his soldiers. In 1467 Charles the Bold Duke of Burgundy, having forced an entrance into it, looted enormous sums from the inhabitants and razed its fortifications. The following year he returned at the head of 40 000 men and committed atrocities at which humanity shudders. In 1691 Marshall Boufflers besieged it for five days, and in 1702 both the town and citadel were taken by the Duke of Marlborough. Pop. 66 463.

LIEGNITZ a gov. of Russia, in the N W of prov. Silesia, bounded N by gov. I. and S. by Breslau, E. W. and W. by Bohemia, and N. W. by Saxony and gov. Frankfurt-on-the-Oder; area, 4000 geo. sq. m. The surface in the S. is mountainous, being traversed by ramifications of the Riesengebirge, several of the ridges of which attain a height exceeding 4000 ft. The culminating point, the Schneekoppe, is about 5000 ft. The surface rapidly declines N. and at the Katsch and Soltauwasser it has become an extensive plain. It is watered by the Oder, the Spree, and their tributaries. The soil along the lower slopes, and at the foot of the mountains, is very fertile and in the E. along the banks of the Oder, are tracts of excellent wheat land but in the plains in the centre and towards the W. the soil is very sandy and is covered to a great extent with mere heath. The minerals include iron in various forms and in considerable quantities, copper the arsenic, cobalt, copperas alum schist coal, and lignite. Excellent beds of potash clay occur along the banks of the Bober. For administrative purposes, Liegnitz is divided into the numerous circles of Grünberg, Friedland, Bagan Sprottau, Glogau, Lieben, Dursland, Helian-Guldberg, I. Jagau, Jauer, Schönbau, Bolkenhain Landst., Hirschberg Löwenberg, Lamber Gwitz, Reichenburg, and Hoyerswerda. Pop. (1846) 912 497.

LIEGNITZ a in Prussia, prov. Silesia, esp. above gov. and of circle, agreeably situated between the Katzebach and Behrwater, near their junction on the Silesian and Bagan railway 4 m. W. N. W. Breslau. It is an old but well built, handsome city with five suburbs, is free suburbs, is a castle, and surrounded by a boulevard, planted with fine trees. It contains five churches, of which the E. Catholic church of St. John is particularly deserving of notice, a Ritter Académie, a handsome edifice, in which the arms of the Silesian nobility are educated, the Fürstentumspelle, the hospitals of St. Nicolas and Stanislaus, a public library, gymnasium, industrial and several other schools. Liegnitz has several courts and public offices, a Bible society a deaf and dumb institution, and various benevolent endowments. Its manufactures

include table linen, hosiery hats, tobacco, &c. and it has numerous mills. Pop. (1846), 14 302. — THE CIRCLE is tolerably fertile, area, 184 geo. sq. m. Pop. 60,549.

LIEH Fouou, a city, China, prov. Quanzhong, L. bank of a river which falls into the Gulf of Tongue 830 m. S. S. W. Canton, lat. 21 43° N. lon. 109° 20' E. The mouth of the river forms a harbour for Chinese ships.

LIEHDPN, a vil. Holland, prov. Gelderland 12 m. N. W. Nijmegen, on the Rhine-dike, with a church and school 1 op. (agricultural), 829.

LIEHÉ (anc. Leontium), a town, Austria, Tyrol in the S. E. at the confluence of the Dol with the Drava, 78 m. E. S. E. Innsbruck. It has a church a monastery nunnery and gymnasium manufactures of wire and brass, and a considerable transit trade in metals. Above the town stands the old castle of Bruck. Baths, and numerous other Roman antiquities have been found in the vicinity. Pop. 3000.

LIEH NZINUP N a vil. W. Schlesien, circle Neudorf had Manthron on the Schmilch with two churches, one of which was wont to be a famous resort of pilgrims, and the ruins of an old castle. Pop. 800.

LIEPVEE LFEREAU, or LEVAT a in France, dep. Haut Rhin, 13 m. N. W. Colmar on the Lebuire with some manufactures of cotton. Pop. 1449.

LIEPDE two places, Belgium, prov. E. Flanders — 1 (St. Marie) A vil. at 16 m. N. E. Ghent, with a church chapel township primary school two breweries an oil and several flour-mills. Pop. 1070 — 2 (St. Martin) A vil. and comm. 18 m. S. Ghent, with a church, township, two schools, and a large flour-mill. Pop. 1439.

LIEPRAVIE a vil. Spain Old Castle, prov. and 10 m. from Santander in a valley, on the Miera, with two churches, a courthouse primary school, sulphureous springs, manufactures of woollen and linen cloth, and several flour-mills. An extensive cannon foundry once existed here. Pop. 1665.

LIEBBAUX a vil. and comm. Belgium prov. and 25 m. S. S. E. Liège with a brewery sauceries a bark, and several other mills, extensive quarries of building-stones, wheelstones, and large slates, and mines of manganese. Pop. 1980.

LIEBRI, or LIEBRI, a town, Belgium, prov. and 10 m. E. Antwerp, at the confluence of the Great and Little Nethe. It is surrounded by a rampart, planted with trees, is generally well built, has wide and regular streets, a townhouse, five churches, three chapels, three convents, an hospital, prison barracks orphan asylum, several almshouses, and eight primary schools and manufactures of leather soap, tobacco, cutlery lace-combs, musical instruments, and linen, woollen, silken and cotton fabrics catenae paint works dye-works, bread-eries distilleries breweries salt refineries, flour and oil mills and numerous establishments, whereas embroidery and lace making are carried on. The town has an active trade in manufactured goods and white beer and oil. Its commerce is much facilitated by the Nethe which, up to this point, is navigable at high tides for vessels of considerable tonnage. Pop. 13,125.

LIEBDORE a vil. Rheinland Prussia, gov. and 30 m. S. S. E. Treves with a church and several mills. Pop. 1381.

LIESEB, a in Rheinland Prussia, gov. and 19 m. N. E. Treves, 1 bank Moselle, near the confluence of the Lieser with a church, and a trade in cattle. Pop. 1314. — The river flows S. and S. E. 45 m. and joins 1 bank Moselle.

LIESTAL, or LIEBETAL, a in Switzerland, cant. Basel country beautifully situated on the Ergolz, 8 m. S. E. Basel. The principal buildings are St. Catharine's church, the town house, adorned with fine carvings, the record-office or chancery the parish school, and two poorhouses situated a little above the town. The manufactures, particularly of gloves, are considerable, and there are three important annual fairs. In the neighbourhood there is a small lake, called the Frisch-tach or Lustenlausee and a considerable cascade formed by the Ergolz. Pop. (1840), 8043.

LIEZBECK two places, Hungary — 1 (Moravia) A vil. Hungary Hitler Danube, co. and 9 m. from Ferenchtin, with two churches. Pop. 2363 — 2 A vil., co. Arva, with manufactures of linen, and a trade in linen and wool. Pop. 1399.

LIEIOR a in Spain, Murcia, prov. and 27 m. S. Alacante, 1 bank Mundo with a parish church, three chapels, a town and seamen house, hospital, school and public storehouse, manufactures of linen woollen, and hempen fabrics, and bee and silk worm culture. Pop. 2002.

and sedences, a royal academy of music, an academical school a communal college, a school of painting, a botanical garden, &c. The manufactures are numerous and extensive, and some of them have long enjoyed a high reputation. One of the oldest and most important is fine linen thread for lace, hulle, and gauze, together with all kinds of linen and cotton twist for general purposes. The other manufactures are broad-cloth, best-covers, camlet, cotton, silk, and woollen stuffs of all sorts, neckties, bed and table linen, carpets, hats, carriages, paper, best-refined sugar, raw and refined soap, glue, ribbons and tulle, which try to rival those of England. The preparation of oil is carried on to a great extent. Lille has also tobacco factories, works for making Prussian blue and white lead, engine-works, iron and brass foundries, dyeworks, bleachfields, numerous breweries, and gin and brandy distilleries. Its situation on the frontier and extensive rail way and water communication make Lille a great entrepot for general goods and also colonial produce, which reach it from the ports of Dunkirk, Calais, Rotterdam and even Sluys. Its trade, extending directly or indirectly to almost every country of Europe, consists of linens and linen thread, lace, cotton twist, printed woollens, tobacco, madder coffee, spices, wine, brandy, gin, hops wax, coal, oil, &c.

Lille, formerly the cap. of French Flanders is said to owe its origin to a strong castle, built towards the downfall of the Roman empire and called, from its position *Intra-lis*—hence Lille, easily changed to Lille. In 1007 Baldwin IV both extended it, and surrounded it with walls and ditches. From that time, but not without many vicissitudes Lille has continued to increase, passing through the hands of various masters, till ultimately secured to France, by the peace of Utrecht, in 1713. In 1792 it was ineffectually besieged and then laid by the Austrians. Pop 67,776.

LILLEBONNE [anc *Julia Bona* or *Illebona*] is a France dep. Seine-Inférieure 10 m. S. Havre near the confluence of the Dequeux with the Bolbec. Notwithstanding its fine position, it has a dull and heavy appearance. The houses are clumsily constructed of wood, and many of them are manufacturing establishments with long rows of monstrous fronts. The principal objects of notice are the church, with a Gothic spire and the old castle of Lillebonne sometimes called Chateau d'Harcourt. This castle is one of the most curious and best-preserved monuments of Normandy. Almost all the inhabitants of the town are of the working-class. The whole valley between Lillebonne and Bolbec is crowded with cotton factories. There are also numerous tanneries. The trade is chiefly in cloth, leather goods, ironware, cattle and honey. Pop 4310.

LILLEHAMMER, a town in Norway 110 m. and 80 m. N N W Christiania, at the N E extremity of lake Mjøsa near the mouth of the Longun. It was formerly the see of a bishop, and possessed both a cathedral and a monastery, but now consists of a small number of tolerably well built and pleasantly-grouped houses, with a wooden church. It is the centre of a considerable trade extending from Christiania to the Dovrefield mountains. Steamers ply daily on the lake between it and Mjnd. Pop. 701.

LILLES, a town in France dep. Pas-de-Calais on the Yave, 34 m. N N W Arras. It contains the finest arsenal wall made, and has manufactures of earthenware a bleach field, brewery, tanneries, dye-works, and oil mills. Pop. 2056.

LILLESAND, a small seaport in Norway, 15 m. E N E Christiansand, with some export of iron and timber.

LILLESÄTER, a par Eng. Salop, 6140 ac. Pop. 1087.

LILLEY par Eng. Hertford, 1822 ac. Pop. 528.

LILLIANES, a vil and com Italy Piedmont, d.v. Aosta at the extremity of the valley of Valsusa, 1 bank Ves or Lys. It has a church and primary school and manufactures of iron. Pop. 310.

LILSLEAF, a par Scotland, Roxburgh 7000 ac. Pop. 798.

LILLINGSTONE two pars England.—1 (*Dunghill*), Bucks; 2223 ac. P 307.—2 (*Lopell*), Oxford, 1896 ac. P 171.

LILLINGTON, two pars England.—1, Warwick 1324 ac. 1 209.—2 Dorset 1807 ac. P 106.

LILLO—1 A fort Belgium, prov and 7 m N W Antwerp 7 bank Scheldt, on the Dutch frontier, constructed in 1684. With Fort Liekenshoek, which faces it on the opposite bank, it completely commands the passage of the river.—2 A town Spain New Castile prov and 35 m P S E Toledo, with a church chapel townhouse, hospital Latin and two other schools and manufactures of linen. P 1086.

LILLOIS-WATTEWILLY a vil and com Belgium prov Brabant 15 m S E Brussels, with a brewery a flour-mill, and a trade in corn. Pop. 1122.

LILSTOCK a par Eng Somerset, 1160 ac. P 62. LIMA a dep. Peru, lat. 10° 30' to 16° 20' S, and stretching from the shores of the Pacific to the Andes. Its principal streams are the Rimac, the Chancay the Mala, and the Rio Grande. The climate is very warm, particularly on the coast, and rain seldom falls, but the soil is fertile, and well cultivated. The department is divided into seven provinces, and contains, besides the capital, Callao, Casete, Chuncay and other towns. Pop. 149,112.

LIMA the cap city of Peru lat. 12° 38', lon 77° to W at the foot of granite hills, on both banks of the Rimac, which divides it into two unequal portions connected by a handsome stone bridge of six arches, and 550 ft. in length which forms a favourite afternoon lounge, when the mountain breezes are peculiarly grateful. The larger division of the town is on the S or E bank of the river, it is enclosed on all sides except the N (on which is an agreeable alluvial) by a brick wall 18 to 20 ft. high having gun gates the smaller, or suburb of San Lazaro, is on the E bank and is backed by hills having only two openings through them for ingress and egress. The greatest extent of Lima is from E. to W; its greatest circumference 10 m. At first sight, it presents a general appearance of decay from the number of its ruined temples, the frail look of its buildings, and from the absence of air and bustle in its streets, but, in the central parts, a considerable improvement in all these respects becomes apparent. The streets are equidistant, intersect each other at right angles and have an average breadth of 44 ft. They are in general badly paved and not very clean, but improvements are gradually going on in the more central parts of the city where the pavements have been lately restored, and

THE CENTRE OF SAN FRANCISCO LIMA.—From Valdes, Voyage autour du Monde.

footpaths formed of broad flags from England those lying E. to W have such a deep stream of water running down the centre, which is crossed by four bridges at the cross streets. The grand square of Lima, the Plaza Mayor, is the central point of its life and business, together with the adjoining streets Mantas, Bodegones and Mercaderes. This fine square is a regu-

lar quadrangle, each side of which is 510 ft. long, having in the centre a magnificent bronze fountain with three basins, two sides are occupied by the Portales or Piazas, the most attractive places in Lima for a stroller. They are about 500 ft. long, well paved with small stones, interlaid with the bonkie bones of sheep, which produce a kind of mosaic pavement. In these portales all kinds of dry goods and fancy articles are sold; here also are lace and fringe workers, etc. On the N side of the square stand the palace and offices of the government, in which dwells the President, a square building of masonry aspect, once the property and residence of Pizarro, on the E the bishop's palace and the cathedral and on the W the senate house, the townhall, and a row of shabby houses. The most public square in respect of size is the Plaza de la Independencia, now called the square of Independencia (Plaza de la Independencia) in which stand the Hall of the Congress, the Jail, and the Palace of the Inquisition, where criminals were punished, no less terrible, and perhaps in hardly fewer instances, than in those of the Inquisition of Madrid. Few traces, however, of the internal arrangements of this dread tribunal now remain an outraged populace having on the suppression of the Inquisition by the Cortes, forced their way into the building, gutted the rooms and destroyed the furniture. Among the numerous churches and convents, a few only are deserving particular notice of these the cathedral is the most remarkable. It is richly decorated within and without its grand altar has the reputation of Francisco I. lezaro. The convent of San Francisco is the largest monastic establishment in Lima, occupying nearly 7 ac. of ground. It is an elegant structure now out of repair and exhibiting evident signs of decay. Amongst the other churches and convents of note, are Santo Domingo, San Pedro and La Merced. Besides the cathedral, Lima contains five other parish churches, 12 attached to convents, 13 to monasteries and 22 chapels, making a total of 68 places of worship. The monasteries and convents at one time of numerous have to a great extent been suppressed. The university, once the most important as it was the first established seat of education of the kind in the New World, has connected with it a national library of about 20,000 vols. and the museum, in which are collections of Peruvian antiquities, and objects of natural history. There are also a college of advocates, a college of pharmacy with a botanic garden attached, another of medicine and anatomy, four Latin and about 40 primary schools, and various other educational institutions. There are likewise a number of well conducted hospitals including one for foundlings, and two for lunatics. The places of public amusement are three alamedas or promenades—de la Viga or old alameda, the Alameda de Acho on the banks of the Rimac, containing the bull ring, capable of accommodating 10,000 to 12,000 spectators, and formerly the scene of the water-fights of the Inquisition, and the Cortada del Callao; two theatres and an amphitheatre for cock fights; and several small saloons for dancing.

Lima has several manufactories of gold lace and fringes, and a manufactory of glass, of cotton of cochineal and of, upon etc., but nearly all the goods sold and consumed in the country are foreign. Mechanical employments are numerous, but all are in a rude state. It has also a considerable foreign trade through its port (Callao)—which is 7 m. W. from the city and connected by a recently constructed railway.

The general walking dress of the ladies of Lima is singular and evidently of Moorish origin; it consists of two garments, called, respectively, the saya and the manto. The former is a silk petticoat, with numerous small vertical platts, containing about 50 yds. of silk. Formerly it was drawn in close at the bottom of the dress, so that the wearer was obliged to make very short steps. It was a little elastic, and fitted to the shape, whether natural or artificial, from the waist downwards; but the saya deplenda or loose saya is now in general use. The manto is a sort of thick black silk fastened by a band at the back of the waist, where it joins the saya. It is then brought over the head and shoulders, and drawn so closely over the face as to leave but one small triangular space open for one eye to peep through. Before the manto is put on a shawl generally of Chinese manufacture is thrown over the shoulders, and brought between the openings of the manto in front, hanging down nearly to the feet. But the French continues to prevail, gradually displacing the saya and manto. The shoes are usually made of embroidered satin, or of very fine

kid, and it is usual to have two new pairs every week. The Limenians are very fond of music and dancing; they are like their Spanish ancestors, a thoughtless race, witty light-hearted and more given to pleasure than to intellectual pur-

LIMENIAN LADIES, ATTENDED IN THE LOBBY SATI
FROM DE PÉDÉ THOMAS, VOYAGE AROUND THE SOUTH.

suits. The climate is very agreeable, rather relaxing to the young, but highly favourable to the middle aged and elderly. The range of the thermometer throughout the year is from 78 to 75 in winter and 86° to 87° in summer. From April to October a heavy and sometimes chilly mist overhangs the city in the mornings and evenings. Hail, even in partial showers, is of exceedingly rare occurrence. Thunder and lightning are unknown. Lima is very subject to earthquakes, and has frequently suffered from these terrible visitations. The most destructive on record occurred in October 1746 when many houses and public buildings were destroyed. On the same occasion, the port of Callao was suddenly submerged by a huge wave, and, with exception of some 30 or 40 all the inhabitants, amounting to 5000 were swept away.

Lima was founded by Pizarro in 1535, and called Ciudad de los Reyes (King's town), in commemoration of the festival day of the kings, on which the site was chosen. This name having been confirmed in 1537 by Charles V. from that time Lima became capital of Peru, and the seat of the viceroy. The population has fluctuated greatly from time to time, and at present (1852) is supposed to be about 70,000.—(Voy Technol. Peru Wilkes U States Exped. Castelnau's Expedition dans les parties Centrales de l'Amérique du Sud 1843-47. Private information.)

LIMAGNE (Luz) a town, France, which belonged to the former prov. of Lower Auvergne, and had 18100 for its capital. It is now included in dep. Puy-de-Dôme.

LIMAL, a vil and com. Belgium prov. Brabant, on the Dyke, 15 m. S.E. Brussels, with a trade in corn, cattle, and timber. Pop. 1833.

LIMANI a river Chili, dep. Coquimbo which runs on the W slope of the Andes, flows W and falls into the Pacific, 65 m. S.W. Coquimbo, total course, 120 m.

LIMASOL (anc. Hemea) a small resort on S. side of Cyprus, a few miles N.E. Cape Gathin, on a large plain, about 1 m. distant from the sea, lat. 34° 41' 15" N., lon. 33° 1' 45" E. (a.) distinguished by a white castle which stands on the shore. It consists of some miserable mud houses, inhabited by Greeks and Turks, but has a commodious harbour though exposed to the S.E. winds, and a small trade in wine. Ancient Limasol (Amasus) celebrated for its temple of Venus and Adonis, stood at a little distance N.E. from the modern town, but no vestige of it now remains.

LIMATOLO a tn. Naples prov. Lavoro, dist. and 6 m. N. Caserta, bank Volturno. Pop. 1506.

LIMBACH, a vil Hungary Thibler Danube, co. Eisenberg, 8 m. from Fürstendau, with a church, and a trade in wine. Pop. 1058.

LIMBACH a. ta. Saxony, circle Zwettan bell and 6 m. N W Chemnitz, with manufactures of silk. Pop. 3681.

LIMBER-MASSA, prov. Eng. Lincoln 5190 ac. P 481.

LIMBIATE, a. vii and com. Austrian Italy prov. Milan about 5 m. S. Barlesina, with a church and a school. P 1806.

LIMBOURG a prov. Belgium. See **Luxembourg**.

LIMBURG, or **Luxembourg**, a prov. Belgium, bounded N by Holland E. by Dutch Limburg S. by prov. Liège, and W by S. Brabant and Antwerp; length 2 to 8, 50 m. breadth, 84 m. area, 926 sq. m. It is flat throughout, strata chiefly calcareous, and remarkably rich in fossils, furnishing many fine quarries of limestone. Iron calcimine, and lead are found in several localities. The E. border is skirted by the Meuse, which along with the canal from Maastricht to Herfogenbosch afford water communication to Holland. Another canal leads to Herfogenbosch, in prov. Antwerp. These facilities enable Limburg to carry on an important transit trade. A considerable part of the province, particularly towards the N. belongs to the Campine (see **Belgium**), and, consisting almost entirely of barren heath or pure sand, is desolate in the extreme. Towards the centre and the S., the soil is tolerably fertile on the E. along the valley of the Meuse its quality becomes superior and the banks are covered with rich pastures. Buckwheat, rye, spelt, barley and rye-meal are grown; a few cattle and large numbers of pigs are reared 30 000 to 50 000 of the latter being annually sent to other parts. Distilleries are numerous, there are several beet-root sugar refineries and the manufactures include soap, salt, potteryware, paper tobacco straw hats, &c. The chief towns are Hasselt, the capital Tongres, Messeyck, and St. Trond. The province was formed in 1839 of the greater part of the ancient province of Luxembourg which formerly belonged to Belgium but a portion of which was now given up to Holland. Pop. (1849) 185,021.

LIMBURG — 1 A. ta. Nassau cap. hant. 1 bank Lahn here crossed by a picturesque bridge 30 m. N W Wiesbaden. It is a very ancient place, the see of a bishop and consists of the town proper surrounded by walls, and of three suburbs contains a superb cathedral partly in the latest

LIMBURG — From the river's mouth on the Lahn, &c.

Byzantine style, and partly in the earliest pointed Gothic, on an elevated site, overlooking the river with lofty towers and several monuments of the Nassau princes. Another church a mint, superior school and theological seminary and has some shipping and general trade. The *Limburg Chronicle* is one of the oldest sources of German history. Pop. 8146. Area of hall, 36 geo. sq. m. Pop. 7794. — 2 A. ta. Rhenish Prussia, gov. and 31 m. W. Aachen 1 bank Moselle, with a church, a synagogue, a picturesque situated castle and manufactures of linen and cotton goods, blast-furnaces, and other

iron works. Pop. 2310. — 3 A. ta. Belgium, prov. and 17 m. E. Liège, on the railway thence to Aisles-Chapelle. It lies on a kind of peninsula, on a steep rock, overlooking the Vesdre and the pretty village Dolhain which properly forms its low town while the upper part, forming the high town, though once the capital of Austrian Limburg and a place of strength, consists only of a simple street, tolerably well built Dolhain, which is well situated, and larger than the high town contains a handsome church, is surrounded by fine villas, and has four primary schools, manufactures of broad-cloth, machinery and beer. Pop. 2307.

LIMBURG (Duchy) of a prov. Holland belonging to the Germanic Confederation, bounded N by prov. A. Brabant, E. by Rhineland Prussia, S. by Delphum and W. by Belgian Limburg and prov. N. Brabant. It contains all of the former Austrian province of Limburg lying on the right side of the Meuse, the districts of a line drawn from the most E. point of N. Brabant to the Meuse, S. of Thorn and the town and district of Maastricht area, 592 geo. sq. m. It is partly flat partly undulating rich and fertile along the Meuse but in the N. and W., cold and sterile, large portions being covered with heath and marsh, and belonging to the extensive moorland and the Peel. Besides the Meuse, the chief streams are the Roer, Geule, IJssel, and Tongelre. Rye, wheat, barley oats, buckwheat hemp flax oil-seeds and green crops are cultivated, good butter and cheese are made, and pigs are very numerous. Coal potter's earth and building-stone are found. Agriculture and cattle-rearing are the chief occupations but the distilling of gin and other spirits, and manufacturing tobacco, silken paper cloth, glass leather soap, &c. are carried on also cotton-spinning and calico-weaving. In 1849 the province contained 205 common schools, attended by 13 000 pupils. Besides Maastricht its chief towns are Roermond, Venlo, and Weert. Pop. (1850) 205 431.

LIMBOURG (Prov. Aachen) per Lang Middlesex 265 ac. Pop. 22 782.

LIMERICK a. vii and seaport Scotland on Fife on the birth of Forth 3 m. S. Dunfermline with a U. Presbyterian church and a school and two small harbours which are left dry at ebb tide, but in high streams are accessible to vessels of 300 tons. Pop. 049.

LIMERICK an island on Ireland prov. Munster bounded S. by co. Cork E. by Tipperary N. by the Shannon and W. by Kerry greatest length N to S, 35 m. breadth 64 m. area, 662 973 ac. of which 16 876 ac. are arable. The surface is in general flat or an undulating plain excepting in the N. E. S. and S. W. where it rises into mountains. The principal rivers are the Shannon and the Maigue. The subsoil is limestone trap and sandstone and a large proportion of the soil is friable and sandy loam. Iron copper and lead ores are found in various localities throughout the district occupied by the trap prominent but no veins are at present worked. The county is peculiarly fertile, particularly on the banks of the Shannon and in the Golden Vale a tract which extends from the borders of Tipperary W. through the centre of the county. In 1851 there were 184 147 ac. under crop — oats 65 976 ac. wheat 14 919 ac. barley here and rye 22 430 ac. potatoes, 21 821 ac. turnip 16 482 ac. meadow and clover 68 856 ac., and the remainder in pasture, beans, mangold wurtzel carrots, &c. Some of the best long horned cattle in the empire are produced and fattened in this county. The occupations are chiefly agricultural, pasturage and dairy farming are most cultivated tillage is less attended to. The condition of the larger farmers is generally good. Both men and women are industrious their cottages neat and well kept, and the farms comparatively well managed. Large quantities of the produce of the county are exported. The manufactures are coarse woollens, lace, paper flour, and meal. In 1850 there were 103 national schools, attended by 18,978 children. The county is divided into 14 baronies and 181 parishes, and

returns four members to Parliament—two for the county and two for Limerick city. Its chief towns, besides Limerick, are Rathbarney and Nenagh. Pop. (1841), 326,928 (1881), 262,176. Ecclesiastical of Limerick city, the pop. in 1861 was 206,688, being a decrease since 1841 of 73,544.

LIMERICK, an important city, municipal and par. bur. Ireland, cap. above co., and a county of itself. It lies on an extensive plain at the interior extremity of the estuary of the Shannon. lat. 52° 39' 38" N. lon. 8° 39' W. (n.) 106 m. S.E.W. Dublin with which and with Cork it is connected by railway. It consists of three portions, distinguished by the names, respectively, of English and Irish towns, and Newtown-Perry. The first, and oldest, occupies the S. end of the King's Island, a tract formed by the Shannon here divided into two streams, the other two stand on either side of the river. The different parts of the city are connected by five bridges, one of which, the Wellfleet bridge, a magnificent structure, crossing the harbour cost £25,000. In English town the houses are chiefly built in the Flemish fashion. Irish town is also old but the streets are wider and the houses generally more modern than in the former where everything has an appearance of misery and decay. Newtown-Perry, which is a comparatively modern town, possesses elevated ground parallel with the course of the river and is one of the finest modern towns in Ireland. It contains a handsome square, its streets are spacious, intersect each other at right angles, and are lined by elegant houses, shops, and merchants' stores. The principal civil buildings are the city court-houses and prisons, custom house, chamber of commerce, exchange, assembly house, linen hall, corn and butter markets, several hospitals, and barracks. The places of worship are the cathedral, five Protestant churches, four parishes, and three convents. B. Catholic chapels, and five dissenting meeting houses. The manufacture of linen is now nearly extinct, that of gloves continues, but both have been supplanted by those of lace and fishing-hooks, both of which are carried on to a considerable extent. There are, besides distilleries, breweries, tanneries, foundries, flour-mills, a patent slip for vessels of 500 tons, and three ship-building slips, where 100 men are employed. Limerick is the leading port on the W. coast of Ireland for the shipment of raw produce. The harbour extends about 1600 yards in length and 150 in breadth with from 3 to 9 ft. of water and 10 ft. at spring-tides, which latter enables vessels of 600 tons to moor at the quays. The commerce of the port has considerably increased and will be further improved it is expected, when the new docks now (1852) in progress are completed. The number of sailing vessels registered as belonging to the port, in 1845 was 107 aggregate tons. 13,934. The number of vessels that entered the port in the same year including the cross-channel and coasting trade, the British colonial and foreign trade, was 787 tons 110,192 departed, 864 tons 79,279. The borough returns two members to Parliament, registered electors, 1144. Pop. of the county in 1841 63,226 of whom 48,391 were in the city. The latter contains 2070 ac. Pop. 53,448.

LIMPLE, a vil. and com. Belgium, prov. Luxembourg, on the Ourthe 7 m. E.N.E. Houdange with a brewery several mills, and a trade in corn. Pop. 1063.

LIMIA, or **LARA**, a river which rises in a valley of the same name, in Galicia, Spain 15 m. S.E. Orense, flows S.E.W. into Portugal past Ponte de Lima, and falls into the Atlantic, a little below Viana, after a course of about 150 m. It is navigable for small vessels from Ponte de Lima.

LIMINGTOU, par. Eng. Somerset, 1602 sq. Pop. 344.

LIMMAT, a river, Switzerland, through which Lake Zurich sends its waters to the Aar, total course W. & W. 20 m. Immediately after leaving the lake, it receives the Rhod, and becomes an important stream.

LIMOEIRO, a m. Brazil, prov. Pernambuco, 1 bank Capitanes, 86 m. W. N.W. Recife, with a church, and considerable exports of cotton. Pop. dist. 10,000.

LIMOGES, (anc. *Ampetoracum Lemovicensis*) a tn. France, dep. Haute-Vienne, the top and occupying the acclivity of a hill washed by the Vienne, here crossed by three bridges, 86 m. W. Clermont. Almost all the houses are of wood, at least above the first story, and the streets are irregular, narrow, and tortuous. The old walls and towers

which formerly surrounded the town, have been thrown down and their site converted into fine shady boulevards. The most remarkable edifices are the cathedral, commenced in 1172, and not completed till 1515; indeed, the only part properly finished is the choir which is built of granite, and very beautiful. The church, St. Michel des Lions, a Gothic edifice, is remarkable for the light and airy appearance of the pillars which support its roof; and the boldness of the belfry which terminates on a ball of extraordinary size. The church of St. Pierre des Quatrez is surmounted by a fine spire. Limoges has a bishop's palace, built of granite, the finest ancient edifice of the town, a fountain, public library, containing 12,000 vols., a theatre, cavalry barracks, and several hospitals, manufactures of porcelain, worsted broad-cloth, casemeres, druggists, woolen combs, flannels, napkins, tapestry, cloths, glass, horse-mills, paper, plain and stained cards, &c., numerous printing-presses, and an extensive book trade. It has also a considerable trade in corn, chestnuts, wine, brandy, liquors, salt, iron, copper, brass, enamel, kaolin, &c. Limoges is an entrepot for the trade of Toulouse, and generally of the S. departments of France. It is the see of a bishop, and the seat of courts of first resort, and commerce of a consular chamber of commerce, a royal college, a university, academy and societies of agriculture, sciences, and arts.

Limoges was originally the capital of the Gallic tribe Lemovicens. Under the Romans it was adorned with a capital amphitheatre, fine temples, and palaces. From the Romans it passed to the Visigoths. The Romans buried it in 836. Henry II. of England had been crowned Duke of Aquitaine and, in 1189, Mathilda, queen of Richard Coeur de Lion, laid siege to it, and afterwards gave it up to pillage. Pop. 26,924.

LIMONE (Latin, *Limo*) a tn. Italy 1 m. dist. div. and 13 m. S. Com. It has a parish church of Sacred Godwin, with three naves, several other churches, a Capuchin convent, a school, and an hospital. A court of law, several public offices, and a trade in cattle and dairy produce. Pop. 5438.

LIMONIA, a small isl. Grecian Archipelago, near W. shores of Rhodes; length, 3 m. It has some good sheep-pastures and a small village of some name, with a harbour.

LIMORAM, a tn. Naples, prov. Salerno, dist. 7 m. N.W. Campobasso, 1 bank Siferno, with two parish churches, two convents, and an hospital. Pop. 2000.

LIMOUIN (La) a former par. France, which was divided into Upper Limouin cap. Limoges, and Lower Limouin cap. Tulle. It is now included in dep. Haute-Vienne and Corrèze.

LIMOLX (anc. *Lamora*) a tn. France, dep. Aude, 1 bank Aude. It has well laid-out streets and the houses which line them are generally good. There are four fountains—the principal one situated in an irregular square, where the markets are held, a spacious parish church, richly ornamented an hospital and a small theatre. It has important manufactures of broad-cloth, numerous worsted mills, silk, serge, and dye-works and a trade in iron, wool, olive-oil, green soap, leather, &c. Limoux has a court of first resort and commerce, a consular chamber of manufactures, an agricultural society, and communal college. Pop. 7870.

LIMPFNUH, par. Eng. Norfolk, 1075 sq. P. 548.

LIMPIAR, a tn. Spain, Old Castile, prov. and 17 m. E.R.E. Santander on the Bay of Biscay with a church, a large school, and manufactures of iron and leather, several mills and a harbour with some trade particularly in fish and grain. Pop. 1060.

LIMPTWIT D par. Eng. Surrey, 7004 ac. P. 1294.

LIMREE, a tn. Hindostan prov. Gujarat lat. 22° 36' N. lon. 71° 54' E., celebrated for the number and influence of its bankers.

LIN KIANG, a city China prov. Kiangsee 1 bank, a tributary to the Kan-kiang lat. 27° 58' N. lon. 115° E. It is said to be neither commercial nor populous.

LIN TUNG, a city China, prov. Shantung, 1 bank Imperial Canal, 360 m. S. Peking lat. 36° 50' N. lon. 117° 15' E. It is populous and flourishing, much frequented by vessels trading along the canal and occupies a splendid position, adorned with porphyritic granite and glazed bricks, and roofed in with cast iron.

LINALAPAN, one of the smallest of the Philippines, off N.E. end Palawan, lat. (W. point) 11° 40' N.; lon. 118° 55' E. (n.)

LINARES, several places Spain particularly:—1 A town Andalusia, prov and 31 m N N E. Juen near r bank Guadalquivir capital of a mining district. It is well built, has a market square, a parish church, two chapels, a town-house, prison, several schools an hospital, convent, public storerooms and manufactures, cloth, soft soap, earthenware, tiles, and bricks Pop. 6547—2, A town Leon, prov and 80 m. S S W Salamanca with a church townhall, prison, and cemetery Pop 968

LINBY or **LINBY**, a par Eng Noits 1190 ac P 810
LINCENT a vil and com. Belgium, prov and 24 m W 6 W Liège with manufactures of linen yarn, and hemp thread; and a flour-mill Pop 1058.

LINCH a par Eng Sussex 1240 ac Pop 64.
LINGHLEDE, or **LINGLEDE**, a par Eng Bucks 1830 ac Pop 1300

LINCIMPRE, a par Eng Sussex 2101 ac 1 844

LINCOLN, or **LINCOLN**, a large maritime co E. coast, England, bounded N by the estuary of the Humber E by the German Ocean and the Wash, S. by the Cam bridge, Northampton and Rutland and W by Leicester Nottingham, and York Area, 1 671 040 ac. It is divided into the three districts, Lindsey Kesteven, and Holland. The surface is an interrupted plain, the greater portion of which lies below the level of the sea being protected by embankments. Great parts of this fenly tract were, at some unknown period, a woody country, but were afterwards man dated and are now again recovered from the sea. Some of the fens were embanked and drained by the Romans but, after their departure the sea returned and large tracts were covered with beds of silt, containing marine shells, now again converted into productive lands. Many dreadful catastrophes are recorded of incursions by the sea, whereby several parishes have been at different times overwhelmed. In a few places the fens and marshes continue nearly in their natural state but, in general they have become, through the long-continued and well-directed efforts that have been made for their drainage and improvement, sound and dry and constitute one of the most productive and best-cultivated tracts in the kingdom. Round the Wash a great deal of very fine land has been gained from the sea since the commencement of the present century, and the embankments are gradually extending. In 1847 there were about 250 wind mills, and from 40 to 50 steam engines, constantly at work in carrying off the drainage from those lands where a natural outfall could not be secured to it. By these means, 680 000 acres of land have been brought into cultivation. The soil thus reclaimed from waste consists principally of an alluvial deposit the chief feature of which is a blue calcareous clay. In consequence of the richness of its features, Lincolnshire has been long celebrated for its breed of horses, cattle, and sheep. Some of the finest dray horses seen in London are bred in the fens. The cattle are a coarse, large sort of short-horns but they have lately been a good deal improved by crossing with the Friesian breed. The native sheep of the fens are remarkable for their great size and for the extraordinary length of their wool. This breed however is now become scarce. In the best parts of the fens and marsh under tillage, the crops chiefly cultivated are oats and wheat. The farm buildings, on the better class of farms, are of a very superior description. Manufactures and minerals are of no importance. Principal rivers, Trent, Witham, Welland, and Anchouze. The Witham has been made navigable from Boston to Lincoln and the Fosse-dike canal first excavated by the Romans, extends from the latter city to the Trent, near Torkey completing the important internal navigation between the Wash and the Humber. There are also canals from the Witham to Horncastle and Stamford, and from Triton Haven on the E. coast, to Louth. Climate unwholesome. The county is intersected by various railways and is divided into 620 parishes. It returns 13 members to Parliament four for the county, two for the city of Lincoln two each for the boroughs of Boston.

Lincoln, a city municipal and parl. bor England, esp. above co. 120 m N London pleasantly situated on the slope and summit of an eminence, rising gradually from 1 bank Witham, and on the Great N railway where it is joined, from the S.W. by the Nottingham and Lincoln, and from the N.E. by the Manchester Sheffield and Lincoln lines. It is indifferently built particularly in the upper part, which consists of a number of narrow irregular streets. In the lower part, a spacious street commencing on the r bank of the river is continued across it by a bridge, and then traverses a considerable part of the town. Here many recent improvements have been made and several handsome houses erected. The whole town is paved, lighted with gas, and well supplied with water. The principal edifice is the cathedral finely situated on the top of the eminence, and forming from the flatness of the surrounding country a very conspicuous object at a considerable distance. It is one of the finest of the English cathedrals and is built in the form of a double cross chiefly in the early English but partly also in later styles. The W. or principal front, has richly decorated doorways, windows, arcades, and niches and is flanked by two pinnacled towers, each 180 ft. high. A still more magnificent tower rises, from the intersection of the nave and principal transepts, to the height of 300 ft. and terminates likewise in pinnacles. The famous bell known by the name of the Great Tom of Lincoln hangs in the N.W. tower having been cracked in 1827 after several ineffectual attempts at repair was taken down in 1834 and recast into a new bell 6 ft. 10½ inches in diameter at the mouth 5 tons 8 cwt. in weight now hanging in the central tower. The principal access to the cathedral, from the W. is by three doorways, of handsome proportions, and richly decorated. That in the centre has, immediately over it, a series of canopies containing statues of 11 English kings. The interior which is 462 ft. in length, has a very imposing effect though the fine vaulting of the nave is generally considered deficient in elevation, and the side aisles are unusually narrow. In addition to the cathedral there are 18 churches and chapels belonging to the establishment two chapels to the Wesleyans two to the Independents and one each to the General and Particular Baptists, Huntingdon and Primitive Methodists, Friends M. Catholics and Unitarians. None of them is possessed of so much architectural merit as to deserve particular notice. The other most conspicuous buildings

are the Guildhall or Stone hall (of the time of Richard II.) spanning the High Street, and perhaps the finest antique gate-house in the kingdom—the remains of the castle, which was founded by William the Conqueror, as one of his four great strongholds but was completely ruined during the Commonwealth; the County Hall, a fine specimen of modern Gothic;

Lincoln, a city municipal and parl. bor England, esp. above co. 120 m N London pleasantly situated on the slope and summit of an eminence, rising gradually from 1 bank Witham, and on the Great N railway where it is joined, from the S.W. by the Nottingham and Lincoln, and from the N.E. by the Manchester Sheffield and Lincoln lines. LINCOLN.—A view of the Cathedral and the city.

are the Guildhall or Stone hall (of the time of Richard II.) spanning the High Street, and perhaps the finest antique gate-house in the kingdom—the remains of the castle, which was founded by William the Conqueror, as one of his four great strongholds but was completely ruined during the Commonwealth; the County Hall, a fine specimen of modern Gothic;

the old episcopal palace, once a noble structure, but now only an interesting ruin the old arch spanning Morum Street, and considered the most perfect Roman gateway in England; the county and city assembly-rooms, the theatre, county hospital (famous sayings), courts and city jails, railway stations, &c. The most important educational establishments are Christ's Hospital or the Blue Coat School which has about 100 boys on the foundation, and an annual revenue of £2000 the free grammar the diocesan, national, British, infant, and various other schools. Among the charities the most prominent, in addition to those already mentioned, are the Bishoph's almshouses, the Pentecost Females House, the lying-in charity, and Dorcas charity. The manufactures are unimportant, but, among them may be mentioned extensive engine-works, coach works, laundries, ropewalks and numerous mills. The trade is chiefly in flour and wool, and, besides a weekly market, and fortnightly cattle markets during a part of the year there are four annual fairs, one of which lasts a week, and is one of the great horse fairs of the kingdom.

London has been identified with the Roman *Londinium* and from the number of antiquities which have been found and the ancient remains still existing within it, it appears to have early attained considerable importance. After the departure of the Romans, it became the capital of the Saxon kingdom of Mercia, and suffered much during the struggles between the Saxons and the Danes. Under William the Conqueror the strong castle which he erected added greatly to its importance as a military station, but cannot be said to have contributed to its prosperity as it became a marked place in all the civil wars, and became the theatre of a series of keen struggles for its possession. During the Parliamentary war its adherence to the royal cause cost it many sacrifices. It sends two members to Parliament. Its garrisoned (1851), 1321. Pop. 17,556.

LINDAU a town in Bavaria, circle Swabia, cap of it in the S.W. angle of the kingdom, on two islands in Lake Constance, connected with the shore by wooden bridges about 1000 ft. long. It is walled and otherwise fortified so as to be a place of considerable strength. has a court of law and several public offices four churches a castle, Latin agricultural and industrial schools manufactures of surgical and musical instruments a fishery a harbour which is visited by steamers and other vessels on the lake, and considerable trade, both general and retail. A Roman fort once stood on the island. Pop. 3929, of whom 2593 are military. Area of dist. 24 sq. m. Pop. 8146.—2. A town in Hanover gov. Hildesheim 12 m. N.E. Osnabrück with a church and manufacture of linen. Pop. 1473.

LINDA, a town in Sweden in Örebro on a tongue of land between two lakes, 99 m. W. by N. Stockholm. It is well built forms the centre of an important mining district has a church and manufactures of earthenware. Pop. 760.

LINDENAU numerous small places, Germany particularly—1. A town in Prussia, prov. Silesia, gov. Oppeln circle of retzsch. Pop. 1036.—2. A village Saxony circle of and near Leipzig, towards which Napoleon retreated after his defeat at Leipzig. Pop. 1672.

LINDENAU, a vil. in Bohemia, circle and 30 m. E. of E. Jemnitz, on the Zwickauer with a church a school, manufactures of cotton, and calico and mirrors dye-works, blacksmiths, spinning and other mills. Pop. 1890.

LINDENBERG a town in Hesse-Darmstadt, prov. Hesse-Nassau in the midst of the Odenwald, N.E. Hildesheim; with two churches, and the ruins of an old castle. Pop. 880.

LINDSEY a mountain, E. Australia, 65 m. S.E. W. Murrumbidgee lat. 32° 15' S. lon. 153° 45' E. It rises 4700 ft. above the plain on which it stands, and 5700 ft. above sea-level being the highest known summit in Australia.

LINDSEY, a cape, Norway. See NAR.

LINDSWICK (Lind and Lind), two nearly contiguous vils. Austria, Silesia circle Troppau, about 20 m. from Zakamand with a church, and two mills. Pop. Ober, 1148 Nieder 2997.

LINDWILL, a par. Eng. Sussex, 6775 ac. P. 1814.

LINDU a vil. at the extremity of a gulf on the E. shore of the island of Rhodes. It has a small harbour frequented only by fishing-boats, but was anciently under the name of Lindus, a place of some importance, having given birth to Cleobulus, one of the sages of Greece, and

also to Clearchus and Leches, the one of whom commenced, and the other finished, the famous colonies of Rhodes.

LINDOW, a town in Prussia, Brandenburg, gov. Potsdam, 36 m. N.W. Berlin with a church manufactures of linen and woollen cloths tobacco, and a trade in cattle. Pop. 1519.

LINDRIDGE a par. Eng. Worcester 6212 ac. P. 1806.

LINDSAY a vil. in Lincolnshire lat. 39° 20' N. lon. 141° 50' 30" E. 4 m. long and about 40 ft. high very barren and of a dark brown colour.

LINDSEY a par. Eng. Essex 1050 ac. Pop. 378.

LINDSEY a par. Eng. Suffolk 1246 ac. Pop. 326.

LINDSEY, one of the three parts into which the Lincolnshire is divided. It is far the largest of the three, occupying the N. portion, and nearly a half of the whole county while the other parts, Kesteven and Holland are confined to the S.W. and S.E. respectively. Each of the parts is subdivided into several hundreds or wapentakes.

LINDY a town, N. coast, Africa lat. 10° S. defended by a fort, on low ground 1 bank river of same name near its mouth composed of circular capes, and nearly all situated but interspersed with groves of coco-nuts, and other trees. The entrance to the river is 8 m. across, and the depth inside considerable although on the bar it does not exceed 3 fathoms at low water. At the distance of 8 m. up the river branches off into several numerous channels forming a complete archipelago of low swampy islands covered with mangroves. The land on either side, rises into lofty hills clothed with verdure.

LINFORD two par. Eng. Bucks.—1. Great, 1737 ac. Pop. 486.—2. Little, 550 ac. Pop. 57.

LINGA two small isls. Scotland, Shetland group, between Lall and Mainland.

LINGAYEN a seaport in Philippines isl. Luzon cap. prov. Pangasinan, on the S. shore of a bay of same name and near the mouth of a large river called the Agno lat. 16° 2' N. lon. 120° 16' E. (m.) It is a wealthy and industrious place with well built houses, and several beautiful churches, many factories of leather &c. and a trade chiefly in rice and indigo. Pop. dist. 17,410.

LINGH (Dr), a stream Holland which rises in prov. Gelderland about 8 m. N.E. Nijmegen, flows in a very crooked course, generally W.S.W., enters prov. F. Holland, and at Heukelum turns due S. and joins the Waal at Gorinchem. total course exclusive of windings, 40 m.

LINGH N. or LINGA an isl. Indian Archipelago off E. coast Sumatra on the equator, lon. 104° 25' to 105° E. The narrow channel of Dard divides it into two parts, its whole length is about 50 m., and its average breadth 15 m. It is surrounded with reefs and islets has a flat coast stretching some miles inland when the land rises into mountains and these terminate in a double peak at the S.W. end and called the Aas Ears. Both gold and tin are found in Linga. Some parts of the coast are marshy the hills are covered with wood and the plains abound in fruits, vegetables, pepper gaur trees, cinnamon, rice, and sugar palms. It grows naturally rice and sugar. The natives are Malaya, governed by a sultan, who keeps his court at Koorala on the S. coast. Pop. 9000 to 10,000.

LINGEN a town in Hanover, gov. and 15 m. W. N. W. Osnabrück, cap. co. Nieder-Lingen on the Elbe Canal near its junction with the Ems. It is surrounded by marshes, has three churches, a gymnasium, town school and postoffice, manufactures of linen drills starch, gunpowder, hats, leather, and vinegar, some shipping trade, and several mills. Pop. 2778.—The coal-mine forms an extensive plain, well adapted for the growth of flax. Area 145 sq. m. Pop. 97,079.

LINGEN a par. Eng. Hereford, 2568 ac. Pop. 260.

LINGENAU, a vil. Austria, circle Zamsberg 9 m. S.E. V. Bregeun with a church. Pop. 1780.

LINGENFELD a vil. Saxony, Prussia, lat. 51° 12' N. lon. 10° 12' E. near Gernersheim; with a church and a mill. Pop. 1357.

LINGENFELD a par. Eng. Surrey 9010 ac. P. 2141.

LINGUAGHERA a town Sicily gov. and 28 m. N.E. E. Catania, upon a declivity N.E. of Etna, and near the forest of same name. Pop. 2500.

LINGUETTA (Cape) a headland European Turkey Albania. It projects S.W. from the mainland into the Strait of Otranto and is 2700 ft. in height, lat. 40° 26' 17" N. lon. 19° 17' 17" E.

LINGWOOD par Eng. Norfolk 661 ac. Pop. 509
LINGARSS—1 A to and par Portugal prov Beira-Bassa, 15 m. W Guarda, on a lady height, near the W slope of Mount Estrela. It is defended by a fort and contains an hospital and almshouse. 1 915—2 A small tn Beaul, prov Espirito Santo, near 1 bank Dore, 63 m. N N D. Victoria

LINKEBEEK a vil and com. Belgium prov Brabant, 6 m S Brussels with a flour-mill, and a trade in corn and timber Pop 1104

LINKENHOLT par Eng. Hants 1074 ac Pop 90
LINKINHOLME par Eng. Cornwall, 789 ac. P 2005

LINKÖPING a tn Sweden, pop. 140,000, on a fertile district, 1 bank Stång, at its mouth in Lake Røsen here crossed by a bridge of three arches, 108 m S. W. Stockholm. It is irregularly yet solidly well built, is the residence of a governor and the see of a bishop. has a handsome Gothic cathedral, somewhat injured in appearance by an incongruous Italian tower but possessed of some interesting monuments to other churches, a gymnasium, with a library of 35,000 vols. particularly rich in rare editions of the Bible and a small museum of natural history, antiquities, and coins. a castle, townhouse, assembly-house, and theatre. manufactures of linen, harnesses several much frequented fairs, and a considerable inland trade. Linköping is one of the oldest towns in Sweden and possesses considerable historical interest. In its immediate vicinity was fought, in 1596, the battle of Stångarö in which Sigismund was defeated by his uncle, who was soon after elected king of Sweden under the name of Charles IX. Pop 4767.—The 12N is bounded N by Örebro and Nyköping E by the Baltic, S by Kalmar and Linköping and W by Lake Vättern greatest length N to S. 90 m. greatest breadth, 85 m. It is divided into two nearly equal parts—a N and a S. by the Mörtala, a river or rather canal which connects Lake Vättern with the Baltic, is well wooded and though mountainous in the S W and S. the N W is generally fertile producing much corn and raising large herds of cattle and has valuable minerals including iron, lead, antimony, alum, marble, and fine pebbles Pop 207 044

LINLITHGOW par Eng. Scot. 628 ac. 1 op. 105.

LINLITHGOW LINTHGOUGH, or WEST LOTHIAN, a co. Scotland bounded N by the Firth of North F. and S by Edinburghshire, and W and S W by Stirling and Lanark, area 76,800 ac. of which about three-fourths are arable. The surface is varied with knolls but there are few hills of any height. Coal is abundant, particularly in the vicinity of Borrowstoness where are some large iron-works. Limestone and freestone are also plentiful. The soils are generally strong and are well drained and well manured. In the S W parts of the county there is a considerable extent of thin moorish ground, and some mountains. Climate rather cold. No manufactures worth mentioning. Principal rivers, Almond and Avon. The county returns one member to Parliament and Linlithgow and Queensferry are each contributory to a parliamentary district. Principal towns—Linlithgow, the county town. Bathgate, Borrowstoness and Crossford (op. 1644), 20 872, (1861) 30,150.

LINLITHGOW a royal and free bur. and market in Scotland cap. above 17 m. W Edinburgh, in a hollow, along the S bank of a small sheet of water called Linlithgow Loch on the Union Canal, and the Edinburgh and Glasgow Railway. It consists principally of one irregular S and W street, about a mile long of various width, expanding at the cross into a large open square, narrowing in other places, and widening at either. Though modern buildings are gradually changing the aspect of the place the town has still a certain air of antiquity about it, which harmonizes well with the historical associations, and with the degrading grandeur of the ancient palace, a massive quadrangular edifice, beautifully situated on an eminence which advances a little way into the lake, once a favourite residence of the kings and queens of Scotland, now a splendid ruin. The principal buildings are the old parish church of St. Michael the townhouse, with sheriff's court-room and jail to them may be added the Cross Wall, an elaborate structure, of a hexagonal figure, adorned with a variety of sculptural and grotesque figures, cleverly executed. The church is of great antiquity and is considered one of the most perfect existing specimens of the early ecclesiastical architecture of Scotland

There are places of worship for members of the Free and U. I. reformed churches, and Independents; also a burgh and several other schools. Including a charity school for girls and a number of inferior charitable and benevolent institutions. The manufacture of boots and shoes, and the tanning and currying of leather are carried on to a considerable extent—the former employing about 800 persons, and the latter about 60 and part of the female population is occupied in needlework for Glasgow houses. In the vicinity are an extensive distillery a large brewery, and several glue-works. It was from a house in the main street of Linlithgow that Regent Murray was shot by Hamilton of Bothwellhaugh Pop 4071 Area of par 11 980 ac. Pop. 6115

LINNAHE (Loom) a large inlet of the sea, W coast Scotland co. Argyll, extending from the Sound of Mull N to Loch Fid. It is about 20 m. long by 3 m. average breadth. Its branches are Lochs Crevan Elva and Leven. It contains the islands of Lamsore, Balmagowan Rhana and sundry islets
LINNICH a tn Ribblesdale, Lancs. gov. and 17 m N N W Aiz la Chapelle on the River, with manufactures of white and common leather and a trade in corn and cattle. Pop 1427

LINZ (English *Leitz*) the cap. of Upper Austria, beautifully situated r. bank Danube here crossed by a long wooden bridge, on the railway from Budweis to Gmünd. It consists of the town proper and two suburbs, one of them on the opposite side of the river and is defended by a circle of detached forts, thirty-two in number twenty three on the r. and nine on the l. bank of the Danube, communicating with each other by covered ways, and extending over a circuit of 9 m. It is well built, containing several handsome streets, and two squares, one of them large and elegant, and adorned, in its centre by two fountains, surmounted by figures of Jupiter and Neptune between which there has been rather incongruously placed a monumental column to the Holy Trinity erected in remembrance of a visitation of the plague. It also possesses a finely-placed promenade and is both well lighted and well paved. Its principal public edifices and establishments are the cathedral, flanked with two towers; the town church and the Matthias and Capuchin churches, containing the monument of the celebrated General Montecuccoli who died here the Landhaus, a large edifice, originally a Fran-

above convent, and now the place of meeting for the Estates of Upper Austria, the Ballhaus, on a commanding height facing the Danube, formerly the palace of the Austrian dukes, but now converted into a prison and penitentiary, the town-

LINZ.—From Leopold, Archduke von Oesterreich.

house, bishop's palace, convener gymnasium, an Ursuline convent, a lyceum, with library and good collection of philosophical apparatus, a normal high school, a school of design, and various other schools, a museum, a theatre, two infirmaries, a lunatic asylum and other benevolent institutions. The manufactures consist chiefly of woollens including broad cloth, carpets, and other stuffs: linen silk, and cotton goods: leather suit, iron, yarn, gold lace, cards, and tobacco and the trade in these articles, formerly important, has become much more extensive in consequence of the steam traffic on the Danube, and the opening of the railway to Gmunden and Badweis. There are also two important annual fairs, each of which lasts a fortnight. Linz, as the seat of the Government of Upper Austria, has many important public offices: is also the see of a bishop, and has several associations for art, music, &c. It was originally a Roman station from the 10th to the 12th century it belonged to the House of Habsburg, from which it was purchased by Duke Leopold IV. It has since remained with the House of Austria. The most remarkable event in its modern history is the construction of the great chain of forts described above. The beauty of the environs, its educational institutions, and the superiority of its society make it a favorite place of residence. P (1846) 26,676

LINZ, a to. Rhineish Prussia, gov and 17 m N W Coblenz, r bank Rhine. It is an ancient fortified town partly surrounded by walls of basalt has a court of law and several public offices a parish church, with various monuments, a castle, and a progymnasium; potash and vitriol works, some shipping, and a trade in wine, potash, fullers earth, iron, copper and lead. Pop. 2510

LION (anc. Gallienae Sene) a gulf of the Mediterranean, which washes the shores of the French dep Var Bonaparte Rhone, Gard, Hérault, Aude, and Pyrénées-Orientales and the N. E. of the Spanish kingdom of Catalonia, stretching across from the Isles of Hyères to Cape Cruz, for about 170 m., with a breadth of about 90 m. The largest rivers which empty themselves into the gulf are the Tiber, Arde, Rhenault, and Rhone; and the principal ports situated on it are Marseilles, Toulon, and Cette. The name of the gulf is said to be derived from the fury with which the waves are often lashed by the violence of the winds, and not, as is sometimes supposed, from the French city of Lyons.

LION D'AUVERGNE, a to. France, dep. Maine-et-Loire, 14 m. N W Angers, with oil-works, and a trade in wine, cider, cattle, and mercury. Pop. 1569

LIPARI ISLES (anc. *Æolus or Volcanus Insule*), an isl. group, Tyrrhenian Sea, Lipari, the central and most important of which, is about 21 m. N. N. Sicily. They are 17 in number, all volcanic, but only seven are important, namely,

Stromboli and Pæarsia, in the N. E. Volcano, in the S. 1. Alitendi or Alitouri, and Filicudi or Filicudi in the W; and the largest of all, Lipari, and Salina, near the centre. Several of them have volcanoes occasionally active, while that of Stromboli is the only volcano of Europe in constant activity. They all rise abruptly on their W side to a considerable height, and slope gradually away towards the E. They are much subject to earthquakes but the air is pure, the climate healthy, and the soil both remarkably fertile and well cultivated. Corn, oil, silk, and many excellent fruits, including figs, are produced, but the principal object of culture is the vine, the produce of which is partly made into wine partly dried, and largely exported. Pop. about 22,000.

LIPARI.—1 The principal island of above group, about 21 m. N. Sicily, and 38 m. N. W. Messina, length N to S, 7 m; breadth 6 m. lat. 38° 29' 18" N. lon 14° 58' 15" E. (a). Its E. side is deeply indented but its coast in other directions is little broken. The interior is mountainous, composed entirely of volcanic matter, particularly pumice-stones thus island forming the great magazines from which Europe derives its supplies. Other mineral products are sulphur, saltpetre, and mud. Some maize, cotton, almonds, oranges, and olives are grown, but the far largest space is devoted to the vine, from the produce of some of which an esteemed wine, called Malvasia, is made while the greater part is dried, by being placed, when ripe, in lay of ashes, and afterwards exposed to the sun. Lipari was anciently celebrated for its hot springs and baths, and many remains of antiquity show the importance attached to them. Only one hot spring now exists. Pop. 18,000.—2 A to. E. coast above isl. on a steep acclivity, and tolerably well built. Many of the streets, however, are narrow and by no means well cleaned. The most conspicuous object is the castle, built by Charles V. which crowns a vast volcanic mass overhanging the town and contains several public edifices within its enclosure, the principal of which is the cathedral. Lipari likewise possesses a college, episcopal palace several convents, and an hospital. The bay, immediately beneath the town is about 2 m. in extent and has good anchorage but the shelter from want of a mole, is very insecure. A considerable trade, however is carried on in the different products of the island. Lipari is the capital of the whole group, and the see of a bishop. Pop. 12,600

LIPAU, LITVAU or LITVAU a market to. Austria, Moravia, circle and about 12 m. from Hradisch on the Willanitz; with a church, and three mills. Pop. 1059

LIPNICE, several places, Hungary.—1 (*Fennetk* or *Deutsch Lipnitz*) A market to. Hither Danube, co. Lipitz, 21 m. N. N. W. Bressan, originally founded by German colonists. It has two churches, a high school numerous tax houses, and mines of iron and antimony. Pop. 3216.—2 (*for Lipitz*) A vil. co. Marancour, on the Nagy Ag, 81 m. N. W. Balguth, with a church, and a trade in cattle. Pop. 1042

LIPNICE, or LITVA, a to. Belvis, dep. and 162 m. S. W. Potosi cap. prov., formerly a large, rich town now much reduced.—The mountains, bounded N. W. by Paris, and S. by La Plata, is mountainous and cold. Vichars, alpacas, llamas, deer, and chinchillas abound blue, copper, rock-salt, and sulphur also amethysts and other precious stones are found. To the N. E. and partly included in Lipniz, is an immense plain, covered with salt, 180 m. long, by 45 m. broad.

LIPNIZ, a to. Russia, gov. and 86 m. W. S. W. Tambov on the Voronez. It has three churches, and once had black-herds. A mineral spring in the neighbourhood, over which a building was first erected by Peter the Great, is much frequented. Pop. (1851) 9281

LIPNICA, several places, Hungary.—1 (*Altit*). A vil. Hither Danube, co. Arva, 28 m. N. E. Also Kulin, with a church, manufactures of woollen and linen cloth, and a trade in cattle. Pop. 3403.—2 (*Felvit*). A vil. near the former, with a considerable trade in cattle and in cheese. Pop. 1514.

LIPNIK, or *Lepnik*, a vil Hungary, Hither Themas, 86 m. from Lentschen; with a Greek church, manufactures of linen, and a mill Pop. 1498

LIPNITZ (Glossa) a market in Bohemia, circles and 24 m. S. Opatowitz, with a church, chapel, and castle, manufactures of linen and hosiery, and a mill Pop. 1855

LIPNITZ, or *Lipowitz*, a town, Russia, gov and 104 m. S. W. Kiev on the Dnieper Pop. (1848) 5938

LIPPA —1, (or *Lipova*), a market in Hungary, Banat, co. and 80 m. E. Temeswar cap dist. L bank Maros It was once walled flanked with four bastions, and defended by a strong castle. Only the castle now remains habitable, but the town, though much decayed, is still of some importance. It has two churches, manufactures of liquors, and a trade in maize, cattle, wax, and honey, excellent potter's clay quarries of paving and building stone. Pop. 7887.—2 A vil. and par. Illyria, Istria, 23 m. S.E. Trieste, cap. dist., with a church. Pop. par., 6000, dist. 18 000

LIPPE, a river, Germany, which rises in the Teutoburger Wald about 8 m. N.E. Lippigeringe, Lippe-Deimold flows W. S.W., enters Rhineish Prussia, passing Lippstadt, Hamm, Lünen, and Dorsten and joins the bank Rhine, at Wesel, after a course of nearly 130 m., affluents on the r. the Glens and the Stever, and on the l., the Sauer and the Aase

LIPPE-DEIMOLD (Duchey on), a principality Germany forming the 53d state of the Germanic Confederation and bounded N., N.W., W., and S. by Rhineish Prussia, and E. by Hanover, N.E. by Hesse-Cassel, and Hesse-Cassel, 568 sq. m. Deimold, the capital, in area, 51° 56' N. lon. 8° 59' E. It lies on the Teutoburger Wald and is covered almost throughout by mountains and hills, which divide it into three small basins one to the N. belonging to the Weser which drains it by the Werra, Bode, and Exter, an other belonging to the Ems, and the third belonging to the Rhine, which receives its waters by the Lippe. In the S.W., where both the Lippe and Ems rise there are several lakes. The climate is mild, but humid, and hence mists are frequent. Some parts of the surface are waste, or fit only for pasture, on which considerable numbers of cattle are reared, but others are fertile, producing much corn, rape, hemp, and flax. The mountains are generally well wooded. The principal metal is iron and there are good quarries of limestone and gypsum and some valuable mines of silver. Weaving is the chief branch of industry, though there are also glass-works, several paper and numerous saw mills. The principal exports are wood, thread, linen and wool. For administrative purposes, it is divided into 18 bailiwicks, of which Deimold is the capital. The other chief towns are Lemgo and Horn, formerly it likewise possessed a portion of Lippstadt, but, by treaty of May 1860, this was given to Prussia, for a yearly rent of 9000 thalers (£1350). Since 1858, the government has been constitutional, the diet meeting once in two years contingent to the federal army 731 men. A very large majority of the inhabitants are Protestants of the Reformed or Calvinistic church Pop. (1848) 104,674

LIPPE-SCHAUMBURG, SCHLAUSBURG-LIPPE, or *LIPPE-SCHLAUSBURG* (Duchey on) a principality Germany forming the 53d state of the Germanic Confederation, and consisting of two portions, a N. and a S. the former bounded N. and N.E. by Hanover, E. and S.E. by Hesse-Cassel, and S.W. and W. by Rhineish Prussia; and the latter situated between Lippe-Deimold, Pommern, and Hanover; area, 156 sq. m. Bielefeld, the capital, is at lat. 52° 15' N. lon. 9° 1' E. The surface is partly covered by the Bielefeld, but is generally flat. In the W. is the large forest of Schaumburger Wald It belongs wholly to the basin of the Weser which drains it by a number of small streams, of which only the Aase and Aul deserve mention. The climate is mild and salubrious, and the soil so fertile as to leave a surplus of corn for exportation. The other principal crops are rape, flax, and potatoes. Large numbers of cattle, sheep, and swine are reared. The principal mineral is coal of which there are said to be rich seams in the Bielefeld [Bielefeld hills] The manufacturing industry is confined almost entirely to weaving. The chief exports are corn, wood, wool, coal, thread, and linen. It is divided into four bailiwicks. Chief towns Bielefeld, the capital, Hagenburg, and Steinhagen. Government, constitutional monarchy contingent to the federal army, 360 men. Pop. (1848), 98,387

LIPPEHNE, a town, Prussia, Brandenburg, gov and 47 m. N. N.E. Frankfurt, on the lakes of Mader and Wendt; with a church, manufactures of linen and woollen cloth and leather, and a trade in corn. Pop. 3788

LIPPEPRINGE a town, Rhineish Prussia, gov and 85 m. S. Minden, near the source of the Lippe with a church a postoffice and a trade in cattle. Pop. 1531

LIPPEADT, a town, Russian Prussia, gov and 24 m. N.N.E. Arnsberg cap. circle, 1 bank Lippe. It is walled, has five gates a court of law and several public offices six churches, a courthouse, an ordinary and an orphan hospital; manufactures of leather, vinegar, and starch; and a trade in corn and linen. Prior to May 1860, a portion belonged to Lippe-Deimold Pop. 4335.—The climate is generally flat, has good arable land and iron-mines and rears a great many cattle. Area, 146 sq. m. Pop. 31,514.

LIPSEK, two towns, Russia:—1 Russian Poland, gov. bank Bobr 23 m. W. Grodno. Pop. 950.—2, Gov Grodno, 43 m. S.E. Bialystok. Pop. 1000

LIPSO one of the 3 islands Greek Archipelago, about 10 m. S.E. Patmos, lat. (S.W. point) 37° 18' 15" N., lon. 26° 44' 15" E. It is surrounded by a number of small islands, covering an extent of more than 6 m. N. to S., and 5 m. E. to W. On the W. side of the island there is a well-sheltered harbour called Port Sokoro

LIPTAU a town, Hungary, forming the upper part of the valley of the Waag, bounded N. by Galizia and co. Arva, E. by Lentschen S. by Glatz and co. Neuhau, and W. by Thurau, area, 890 sq. m., capital, Beszterzse. Its soil is of medium fertility, yielding oats, barley and potatoes; cattle are reared and good butter and cheese made, and mines of copper and iron are wrought but the principal wealth of the county lies in its forests, which cover above half its surface Pop. 79,753.

LIPTHAL, or *LIPTHAL*, a vil Austria, Moravia, circle and 4 of Hradisch with two churches, a castle, and three mills. Pop. 1470

LIPYOD a vil Hungary, Thither Danube, co. Baranya, in a hilly district, 4 m. from Mohacs with a church, and a trade in wine. Pop. 1019.

LIRIA [see *Edets* or *Lastermo*] a town Spain, prov and 17 m. N.W. by W. Valencia, l. bank Guadalequiv. It is tolerably well built, has a principal and five smaller squares, two churches, one of which is a handsome modern structure a chapel town and seamen houses, a prison, hospital four schools, a storehouse, and manufactures of linen, soap, leather, earthenware, and brandy wine, &c. On the summit of a hill in the vicinity, which bears its name, is the royal monastic establishment of San Miguel, an extensive and venerable pile, with a handsome and richly-decorated church. Pop. 8584

LISBON [Portuguese, *Lisboa* French, *Lisbonne* Latin and Italian, *Lisbona*, German, *Lissabon*] the cap. and principal seaport of Portugal, on bank Tagus about 9 m. above its mouth lat. (marine observatory) 38° 42' 24" N., lon. 9° 8' 12" W. (N.) It is built on a succession of hills, rising more or less abruptly from the quays in the form of an amphitheatre, and exhibits an extensive assemblage of churches, convents, and houses of dwelling whites, which have an imposing effect when viewed from the river. Being an open town, it is not easy to define its limits, or to distinguish between city and suburbs but from the stream of Alenteira, which is generally regarded as its W. boundary, to the termination of the continuous buildings on the E., the length, in a straight line, is about 34 m., while the breadth, from S. to N., or from the Tagus island, is from 1 to 14 m., area, about 3000 ac. The whole of this space, however is not densely covered with buildings, considerable portions of it being occupied by gardens, ruins, and the naked declivities of the hills. The favourable impression which a distant view of the city is fitted to produce, is destroyed by a nearer survey. The suburbs in general, and more especially in the E., which is the oldest portion of the city are steep, narrow, crooked, wretchedly paved, and disgustingly filthy and the houses, with exception of a neat and substantial building here and there, are old-fashioned and mean. That part of the town, however, which has been rebuilt since the great earthquake in 1755, and which lies on even ground, in the valley between the Castle-hill, on the E., and the hills of San Francisco and Do Carmo, on the W., consists of several parallel streets, crossed by others at

right angles, and is regular wall built, and kept at least decently clean. Of these, Gold, Silver, and Cloth Streets extend about 3 m. E. to S., having, at their S. extremity, the Praça do Commercio, a large and handsome square, sur-

rounded on three sides by the naval arsenal, the exchange, custom-house, India-house, and other public buildings, and having the Tagus on the S. with an equestrian statue of Joseph I., in bronze in the centre. At the N. extremity of these streets are the Praça da Figueira, a square of a remarkably picturesque appearance, used as a public market, and a handsome square, called the Rocio containing a magnificent national theatre, recently erected on the site of the former

rounded on three sides by the naval arsenal, the exchange, custom-house, India-house, and other public buildings, and having the Tagus on the S. with an equestrian statue of Joseph I., in bronze in the centre. At the N. extremity of these streets are the Praça da Figueira, a square of a remarkably picturesque appearance, used as a public market, and a handsome square, called the Rocio containing a magnificent national theatre, recently erected on the site of the former Aqueduct. The only other open spaces and squares worthy of particular notice are the Pçaço Publico, or promenade, which, although small, is elegantly laid out, the fine shady avenue called the Salitre, Praça das Américas, containing a large reservoir for supplying the different fountains of the city with water, and Praça de Alameda, in which a sort of fair is held. The W. quarter of Belem Ayres built along the slope of the W. hill, is airy and pleasant, and contains numerous respectable dwellings, chiefly occupied by foreigners, with vineyards and gardens well-stocked with olive, orange, and other trees.

No capital, and indeed very few cities of Europe, are so deficient in ornamental architecture as Lisbon. Excepting the castle of St. George, remarkable for the beauty of its situation, the only other noteworthy buildings, besides those already adverted to are churches and convents. The principal of the former are the cathedral or patriarchal church, on the slope of the Castle-hill, on the E.; the church do Coração de Jesus, on the hill of Estrela, on the W. surrounded by a splendid dome, the church of the Martyrs, erected on the spot where Alphonso I. mounted the walls of the city, and renowned for the Moor; the handsome church of Santa Margaret, and the church of San Roque. Besides these, there are numbers of other churches, many of which

consisting of the Italian open-house the new national theatre, and an erection for the exhibition of ball-figures but as the people are all R. Catholics, the numerous saints days, and other festivals of the church, afford them ample opportunities for dissipating their time.

The population of Lisbon is very mixed, containing natives from every province of Portugal, numerous negroes, mulattoes, and Galleys or natives of Guinea, who perform the greater part of the heavy laborious work, and are water-carriers and household servants, noted for their honesty and fidelity. The lower classes are remarkably filthy and indolent but frequent intercourse with foreigners has rendered them not so intolerant to strangers, as the inhabitants of many R. Catholic countries are. After the general filth of the place,

LISBON with BELEM — After Louis Labrousse.

in which, however improvements have, in recent times, been made, the greatest nuisances in Lisbon are herds of impetuous beggars, and troops of unowned dogs; the latter, by their howling during the night, rendering sleep impossible. The climate is variable, but genial and healthy. For instance, in summer, the thermometer often reaches 96° F., the ex-

sive heat is rendered tolerable by refreshing breezes from the N.W. Snow is of very rare occurrence, but a good deal of rain falls in November and December. January is generally dry and sharp and in February spring commences.

Lisbon is admirably situated for commerce. The harbour, or rather the radeau, is one of the finest in the world, and the quays, which extend between 2 and 3 m. along the bank of the river are elegant and commodious. The entrance of the Tagus is guarded by Fort St. Julian on the N. with a height of 120 ft. above sea-level and Fort Begin having a height of 66 ft. high, stands near the S. bank. Farther up the river, and forming a W. suburb to Lisbon, a short distance beyond the Almudra stands the town of Belem, with its wall known Tower, one of the defences of the harbour. There are two channels by which the river may be entered, one on the S., with a minimum depth on the bar of 6 fathoms, and another, on the N., with a minimum depth of 4 fathoms. Within the radeau the water is about 30 fathoms in mid-channel, but gradually shoals towards the edge. The commerce of Lisbon, which was formerly very extensive, has greatly fallen off since the separation of Brazil from the crown of Portugal. The exports consist chiefly of wine, oil, fruit, and salt and the principal imports are hemp, flax, corn, silk, linen, cotton, and woollen cloths, iron, steel hardware, dried fish, ale, porter and coals. In 1848, the total exports amounted to £298,840, and the imports to £1,544,760. In 1861-2 the exports were £900,167, and the imports £2,561,519. The domestic manufactures are silk, paper, and soap, all of very bad quality there are also sugar refineries and potteries. The goldsmiths and jewellers are highly esteemed, but in most of the mechanical trades the workmen are very deficient.

Lisbon was anciently called Olisipo some say on account of its foundation being ascribed to Ulysses. Felicitas Julia was its name under the Romans. It was captured by the Moors in 718 and remained in their possession till 1145. In 1755, it was visited by an earthquake, which threw down a considerable portion of the city and destroyed about 90,000 of its inhabitants. It was taken by the French in 1807 but resumed an attack by Massena in 1809. Pop. about 260,000.

LISBUNNY par Irel. Tipperary, 4293 ac. P. 778. LISBURN a pari bur and market in Ireland one Antrim and Down, 8 m. S.W. Belfast, on the railway to Armagh. It is in general well built, and has altogether a clean and thriving appearance. It has a market-house, courthouse, and a parish church which is also the cathedral church of the united dioceses of Down, Connor, and Dromore, &c., a handsome structure, with a tower and spire, and contains a monument to Jeremy Taylor, who died here in 1697. There are also a new R. Catholic chapel, meeting-houses for Presbyterians, Wesleyans, Primitive Methodists, and the Society of Friends and a Salem chapel, several well-conducted schools, a county infirmary fever hospital, and the union workhouse. Flax-spinning and weaving and the manufacture of thread and twine, employ the greater number of the inhabitants and there are also extensive bleachfields in the neighbourhood, together with some powerful corn-mills. Lisburn first rose to importance by the erection here of a castle by Lord Conway about 1587.

The finer branches of the linen manufacture to which the town chiefly owes its prosperity, were introduced, after the Revolution, by French Huguenot refugees. Part of the town and the castle were burned down in 1707. The latter has never been rebuilt but its grounds, finely laid out and kept in order by the Marquis of Hartford, afford pleasant walks for the inhabitants. Lisburn returns a member to Parliament. Reg. elec. (1852) 188. It gives the titles of earl and viscount to the family of Vanehan. P. (1841) 6284. P. (1851) 6692.

LISCLANOR, a vil Ireland co. Clere, 4 m. W. Enniscorthy, on the N. shore of bay of same name. It has a R. Catholic chapel, a school, and the ruins of an ancient castle. Lisburn, turf-cut, and other fish, are taken in the bay. Lisclanor is a coast-guard and a constabulary police station. P. 439.

LISCLAND, a township, England, co. Chester 8 m. N. by W. Richmond, at the mouth of the Mersey. It contains a handsome church, Primitive Methodist and R. Catholic chapels; and numerous elegant villas, occupied by families from Liverpool. Pop. 4240.

LISCOLM, a par Irel. Cork; 4988 ac. P. 1528.

LISCOLMAN, par Irel. Mon. 1204 ac. Pop. 268.

LISCHAU, or LAMOW a market in Bohemia, circle and 9 m. S.W. Budweis; with a church, school, townhouse, hospital, and three mills. Pop. 2288.

LISCHNIOZ, or LAMURRA, a vil Bohemia, circle and about 20 m. from Kologratz, in a valley on the Wild Adler at the foot of the forest and mountains of Napezd. It has a school and two mills. Pop. 1139.

LISCIA, a m. Naples, prov. Abruzzo-Chiara, 12 m. S.W. II Vasto. Pop. 1888.

LISCLEARY par Irel. Cork 4805 ac. Pop. 1040.

LISCOLMAN par Irel. Wicklow, 2468 ac. Pop. 407.

LISGENAN or GRANGE par Irel. Waterford; 5710 ac. Pop. 1838.

LISGOLD, par Irel. Cork 3184 ac. Pop. 698.

LISHAKA, a m. Russia, gov. and 80 m. S. Kiev on the Zmily. It has mineral springs, over which a bathing establishment has been erected. Pop. 3500.

LISHASKY a small low coral at Pacific Ocean, lat. 26° 3' N. lon. 173° 43' W. (a) about 6 m. in circumference. It is overgrown with grass and creeping plants, and full of holes but has neither trees, shrubs, nor water.

LISIEUX [anc. Novesium or Lescunum] a m. France, dep. Calvados, on the Tongues, 7 m. S.E. Caen. It is beautifully situated between two gorges, forming the entrance into a rich and fertile valley, and is surrounded by villas and gardens; but is ill built. The houses, though lofty are of wood, and the streets generally a decayed, gloomy look. While the streets are mostly narrow and winding. It has a cathedral, a fine Gothic edifice of the 13th century, situated in the corner of an extensive square, and containing a curious sepulchral monument, erected by Pierre Canchois, one of the bishops of Lisieux, who had disgraced himself by the share he took in the execution of Jeanne d'Arc an episcopal palace, a handsome structure and a theatre. The manufactures are muslin, broad-cloth, flannel, nainsook, hair-cloth, ribbons, and weaving combs. There are also wool-card and cotton, paper and tanning mills, bleachfields, dye-works, and tanneries and a trade in corn, fruit, orange lamp, wax, cattle, &c. Lisieux is the seat of courts of first resort and commerce a consulting chamber of manufactures, a small seminary and a communal college. It was taken and almost completely destroyed in the 4th century by the Saxons, who employed the materials of the old in founding a new town. Four centuries after, it was taken and pillaged by the Normans, who afterwards kept possession. In 1180, during an incursion of the Britons, it was almost burned down. It was subsequently taken by Philip Augustus in 1208 by the English in 1416 by Charles VII of France in 1448, by the League in 1571 and lastly by Henri Quatre in 1588. During these events Lisieux was a place of strength, and an Episcopal town, whose bishop took the title of prince, and combined the temporal with the spiritual power. Pop. 11,345.

LISKEARD a pari bur market in, and par, England, co. Cornwall. The town, 16 m. N.W. Plymouth stands principally on steep hills has a handsome market-house, townhall, small prison a church, several dissenting places of worship, a British meeting-house, a classical and commercial and a British and foreign school. Tanning is carried on extensively, and trade is facilitated by the canal to Looe. It returns a member to Parliament. Registered electors (1851) 324. Pop. (1861), 6125. Area of par, 6129 ac. Pop. (1841) 4287.

LISKEEVY par Irel. Galway 7207 ac. Pop. 1711.

LISKINFERE par Irel. Wexford 5381 ac. P. 942.

LISKO, a m. Austria, Galicia, 80 m. W. S.W. Lemberg, bank R. It is well built; has two large squares and excellent water-works, a considerable trade with Hungary and important cotton-mills. The district is converted into one large swamp by inundations.

LISKOWA a vil. Russia gov. and 43 m. E. S. E. Nijegorogod, on the Volga, over which there is a ferry to Makara. It contains six churches and a castle and has a large annual fair chiefly for horses and cattle. Pop. 4000.

LISLE.—1. A m. France. See LILLE.—2. A m. France, dep. Dordogne, 12 m. N.W. Périgueux, 1 bank Dordogne. It has five annual fairs and near it are the remarkable and picturesque ruins of the old castle of Marais. Pop. 1790.

LISLEE, par Irel. Cork; 6809 ac. Pop. 3453.

LISMAKERRY par Irel. Limerick; 5928 ac. P. 566.

LITHMALIN, par Incl. Tipperary 4563 sq. P 1105.
LITHMATEIGE, par Incl. Kilkenny 1844 sq. P 405.
LITHMORE, a market tn., par and seat of a diocese Ireland, co. Cork and Waterford. The town is romantically situated on the summit of an eminence, rising from the bank of the Blackwater, which is here crossed by a fine stone bridge, 53 m. W. S.W. Waterford. It has a castle, supposed to have been erected by King John, and now possessed by the Duke of Devonshire as an imposing structure, in the feudal style, and, from its commanding position, on the verge of a rock overlooking the Blackwater, having a stately and picturesque appearance a cathedral, now used as the parish church, an ancient edifice, in the mixed Norman and Gothic style a large and handsome R. Catholic chapel a Presbyterian meeting-house, and a Convent of the Presentation; numerous public and private schools a spacious court and kitchen; forming one building, a police barracks, an hospital, and dispensary. There are no manufactures, and there is very little trade, but it has a valuable salmon-fishery on the Blackwater. Pop. 2319. Area of united par of Lismore and Mooloolop, 646 111 ac. The poet Congreve, and the philosopher Boyle, were natives. Pop. 18,992. (Local Correspondent.)

LISMORE—1 An Isl. Scotland, co. and off W coast Argyle, at the entrance of Loch Lomond, 8 m. N. W. Oban greatest length, N. E. to S. W. 10 m. average breadth, about 14 m., area 16 sq. m., or 9000 a. It forms a long and narrow belt, of somewhat oval form and has an uneven surface, placed in many places by abrupt rocks. These, however, as well as almost all the strata, are calcareous and the soil formed by their decomposition has the double advantage of being both of considerable depth and great natural fertility. The greater part of the island is under regular culture, yielding excellent crops of grain. Where too rocky for cultivation, if any vegetable would exist it is covered with a fine green sward. Timber is deficient; but small clumps, consisting chiefly of yew, birch, and ash, are seen in different quarters and give a pleasing diversity to the scenery. Among the domestic animals is a good breed of gray and dappled horses, and a considerable traffic is carried on in pigs, eggs, and poultry. The herring-fishery also employs a good many of the inhabitants, and salmon are occasionally taken. A considerable quantity of limestone is exported. The low elevation of Lismore makes its own scenery tame, but where can finer views be obtained of the magnificent scenery of the W. Highlands. In ancient times, Lismore was the residence of the bishops of Argyle and the Isles, who were hence frequently styled Episcopi Lismorensium and the remains of their castle are still seen. It is not long since a R. Catholic college for the education of priests existed here, under the superintendence of a bishop. Pop. 1899—3, (and Agnes), Par Sect. Argyle, 367 760 ac. Pop. 4097.

LISMULLIN, par Incl. Meath, 999 ac. P 519.
LISMULLIN, par Incl. Armagh 18,567 ac. P 7799.
LISNAKILL, par Incl. Waterford, 2044 ac. P 574.
LISNAKEA a market to Ireland, co. Fermanagh, 10 m. S. E. Enniskillen, with a market-house, warehouse, hospital, and Methodist and R. Catholic churches. Pop. 899.

LISPITZ, or BLANKOWITZ, a market to, Moravia, circles and 16 m. N. W. Znaun, with a church and two mills. P. 1249.
LISSENAUGH par Incl. Tipperary, 9046 ac. P 707.
LISSEA (Shrewsbury, Vio. Lavin, Low), an Isl. Austria, in the Adriatic, off the coast of Dalmatia, circle and 85 m. S. W. Spalato, and 77 m. W. the mt. of Lovina; length, E. to W., 10 m. breadth, 5 m. The coast generally presents bold, steep cliffs, and is accessible only at a few bays—several of which afford good shelter as that of St. George's or Lissa, Mosaga, Chiera, and Croker. The interior is almost completely covered by lofty hills, culminating in Mount Hana, to the north, above 1800 ft. high. Lissa yields oil and wine of excellent quality. It was first peopled by a Greek colony from Leucas. From 1810 to 1815, it was held by the British, who built some fortifications, and defeated all the attempts of the French to dislodge them. It thus became an important depot for British goods, which, notwithstanding Napoleon's blockade found a large market on the mainland. Pop. 4600.
 The town of Lissa or San Giorgio on a bay, S. E. side of the island, is built picturesquely in the form of an amphitheatre. Its fisheries yield annually large quantities of sardines. Pop. 2600.

LISSEA—1, (Or Lemo), a tn. Prussia, prov. and 42 m. S. S. W. Posen. It is indifferently built, for the most part of wood; but has a modern castle, a R. Catholic and three Protestant churches; a synagogue, gymnasium, Jewish educational institute; manufactures of woollen and linen cloth, muslin, tobacco, sherry, and wagnon; a tannery a bell-foundry, some general and transit trade, and four annual fairs. Pop. (1846), 9951.—2 (New and Old) two nearly contiguous places, Bohemia, circle and 16 m. S. S. W. Bauditz, 21 m. S. E. E. Prague. New Lissa is agreeably situated among gardens and has two churches, a distillery, and a mill. Pop. of lordship, 6840.

LISSAN, par Incl. Derry and Tyrone; 24 684 ac. P 5912.
LISSE, a vil. Holland prov. H. Holland, 16 m. S. W. Amsterdam, with a church and school. Dairy farming and gardening are the chief occupations the easy access to Leyden Haarlem, and Amsterdam affording a ready market for the produce. Pop. 1544.

LISSEITON, par Incl. Kerry 6889 ac. Pop. 1740.
LISSEWICH, a vil and com. Belgium, prov. W. Flanders, 6 m. N. Bruges with a brewery a flour-mill, and a trade in corn. Pop. 1456.

LISSEINGTON par Incl. Lancashire, 1626 ac. P 224.
LISSEITZ, a tn. Austria Moravia circle and 20 m. N. Brunn, with a church, a castle, and two mills. Coal is worked, and many fine fossils and minerals, of various colors, are found in the vicinity. Pop. 1730.

LISSONE a vil and com. Italy, Lombardy prov. and N. from Milan in a fertile district, almost completely covered with vineyards and mulberry plantations. It has a church and though now decayed, was once a place of considerable importance. Pop. 2837.

LISSEAUUFFY par Incl. Roscommon, 11,010 ac. P 2977.
LISTERLIN par Incl. Kilkenny, 5439 ac. P 1081.
LISTON par Incl. Essex 831 ac. Pop. 79.
LISTOWEL, a tn. and par. Ireland co. Kerry. The town 15 m. N. E. Tralee, is pleasantly situated on gently sloping ground on bank Falee, here crossed by a handsome bridge. It is neatly built and well kept and has a spacious square, a carriage, a well-kept parish church a R. Catholic chapel several schools and a dispensary. The castle, some portions of which still remain in a tolerable state of preservation, was the last fortress held by the Lord of Kerry against Queen Elizabeth. Listowel gives its name to an earl. Pop. 2113. Area of par 6793 ac. Pop. 5919.

LISZANE par Incl. Glamorgan 1338 ac. P 280.
LISZA, a vil. Hungary Hither Danube, co. and 23 m. N. N. E. Temeschin, with a church and stone quarries. P. 2529.
LISZKA-OLAN, a market in Hungary co. and 22 m. S. W. Eszperim on bank Bodrog with two churches, a synagogue, a fishery and a trade in Tokay wine. Pop. 2556.

LISZKOFALVA or LISZKOVA, a vil. Hungary, co. Lipitz on bank Wang in a densely wooded district 2 m. from Rosenburg, with a trade in agricultural produce. Pop. 1423.

LITAKOU a to S. Africa See LUTAKOU.

LITANI a river Palestine. See LUTANI.

LITCHEM a par. Eng. Hertford, 1595 ac. P. 855.

LITCHEBOROUGH, par. Eng. Northampton, 1704 ac. P. 418.

LITCHEFIELD par. Eng. Hants; 1806 ac. P. 112.

LITH, a vil. Holland, prov. N. Brabant, 9 m. N. E. Rotterdam, on the Maas, here crossed by a bridge. It is a very old place, has a church and school and has often suffered from the overflowings of the Maas. Pop. (agricultural) 1279.

LITHADA, a cape, Greece, forming the N. W. extremity of the island of Negropont, and the N. W. entrance of the Gulf of Tolo. In front of it is a cluster of islands, and inland, to the W. of it, a mountain of the same name. It presents a bold face to the sea, and has deep water close to the shore.
LITHANG, or LITANG, a tn. Tibet, 47 m. W. from the confines of the Chinese prov. Szechuan; lat. 30° 5' N.; lon. 99° 50' E. It is built on the sides of a hill rising in the midst of an extensive, but almost barren plain, has two large Lama monasteries, richly painted and gilded, erected on the very summit of the hill; but its streets are dirty, narrow and remarkably steep. As one of the monasteries is a place for printing Buddhist books. A brick trade is also carried on in gold and silver, chiefly of black metals, and beads formed from the roots of the Yucca and the best-iron. A regiment of Chinese soldiers is stationed here.—(Hun. Southern Voy. Tibet.)

LITHUANIA [Polish, *Litwa*; German, *Lithauen* or *Lothauen*; French, *Lithuanie*], an ancient territory of Europe, bounded, N. by Courland, E. by Russia, S. by Poland, and W. by Prussia. This territory which, in the 11th century, was tributary to Russia, threw off the yoke in the 13th century, and became a great duchy under Rindigold. One of his successors, named Gedemine, subdued part of Russia, and another called Jagellon by marrying the Polish Princess Hedwig, towards the end of the 14th century, became king of Poland, and thus united the grand duchy to that kingdom. On the first partition of Poland in 1773 a considerable portion of Lithuania was appropriated by Russia, and formed into gov. Mohilev and Vitsebsk the remainder, still united to the Polish monarchy consisted six volwodes—Wilna, Troki, Polna or Vitsebsk, Novogrodek, Brzesc, and Minsk—the first two forming Lithuania proper, and the other four Russian Lithuania. By the subsequent partitions of Poland in 1793 and 1795 Russia obtained as much of Lithuania as formed gov. Wilna, Grodno, and Minsk; while Prussia obtained a portion which is now included in gov. Gumbinnen, prov. E. Prussia.

LITKE, two places, Hungary.—1, A vil. Hither Dabusa, co. Neograd, 4 m. from Szakall with a church, a charitable endowment, and a trade in white chalk obtained from Mount Vajsa. Pop. 855.—2, (Kegesz), A vil. co. Szabolcs, 3 m. from Kis-Varda, with two churches. Pop. 1174.

LITTAU, a m. Austria, Moravia, 30 m. and 11 m. N. W. Olmitz, on an incl. in the March, and a station on the railway from Olmitz to Brudau. It is walled, has three churches, a normal school, and an hospital manufactures of woollen cloth, and paper-mills. In the vicinity is the Neuschloss, the splendid castle of Prince Liechtenstein, with a park about 9 m. in circuit, through which the March flows. Pop. 2280.

LITTER, par. Isl. Cork 5404 ac. Pop. 1071.

LIVERMORE, an Isl. Ireland, co. and 34 m. N. W. Galway, on the S. side of Kilkerran Bay. Area, 500 ac. mostly bog and low pasture. Inhabited chiefly by fishermen. It has a signal tower, and a coast-guard station.

LITTELMULLIN, an Isl. Ireland, co. and 27 m. W. by S. Galway about 1 m. long, by 3 m. broad, with about 250 ac. of sabbie and pasture land. Inhabitants chiefly engaged in the herring and cod fisheries, and in the collection of sea-weed for manure.

LITTLE FALLS, a vil. U. States, New York 91 m. N. W. Albany, on the Mohawk. It has five churches, an academy, and two printing-offices. Pop. 9681.

LITTLE HERBERTON, par. Eng. Devon 1270 ac. P. 269.

LITTLE ISLAND, an Isl. and par. Ireland on Cork in the harbour 4 m. E. the city. Area, 1692 ac. P. 812.

LITTLE ROCK, a city U. States, cap. Arkansas lat. 34° 40' N.; lon. 92° 10' W., 1085 m. S. W. Washington. Bank Arkansas here navigable, 800 m. from its mouth. It stands on a rocky bluff rising nearly 200 feet above the river, and is the last place where rocks occur going down the stream. It is regularly laid out, has Presbyterian Episcopalian Baptist, Methodist, and E. Catholic churches, a state-house, court-house, and jail, two theatres, an academy, a U. States arsenal, a state land office, a penitentiary, saw and grist mills, and two printing offices. First settled in 1820. It is the seat of government, and the meeting place of the legislature. Pop. (1850) 4138.

LITTLEBOROUGH, par. Eng. North 290 ac. P. 84.

LITTLEBOURN, par. Eng. Kent, 3103 ac. P. 745.

LITTLEBURY, par. Eng. Essex 2800 ac. P. 934.

LITTLEHAM, two par. Eng. Devon.—1, 1250 ac. Pop. 418.—2, 3651 ac. Pop. 4160.

LITTLEHAMPTON, a maritime in England, co. Sussex, 16 m. W. Brighton. It has straight and well kept streets, many well built houses, a handsome parish church, in the early English style; a Wesleyan chapel, a national and three other schools, and a nautical institution. Rope-making and ship-building are carried on, and there is an iron-foundry. The harbour formed by the influx of the Arun into the English channel, is defended by a fort, and is accessible to vessels of considerable burden. The trade is principally in coal, provisions, and timber from America and the Baltic. Littlehampton has, of late years, become a fashionable and much-frequented sea-bathing resort. Pop. (1854), 2426.—(Local Correspondent).

LITTMANOVA or **LITMANOW** a vil. Hungary, Hither Theres co. Eipa, 46 m. from Lentschau with a Greek church. Pop. 1185.

LITTON two par. Eng.—1, Somerset 1171 ac. P. 421.—2, (Chagay) Dorset 3517 ac. P. 507.

LITTORALE, or **LITORALIS** (DEUTERUMUS or **ILLUS** ROMA, and **UNGARICOMUS**) (German, *Küsteland*), the name applied to two Austrian districts, both of which stretch along the coast of the Adriatic, the one along the W. coast of Illyria gov. Trieste, and the other along the Gulf of Quarnero, including the E. coast of Illyria, and the coast of Military Croatia.

LITTRY a vil. and com. France, dep. Calvados, 10 m. W. S. W. Bayeux. It has a mineral spring, and a small coal field, which, though containing only a single workable seam of no great value, is remarkable as the spot where the steam-engine was first employed in France. Pop. 2483.

LJUSKE, or **LJUSKE**, a river, Sweden, which issues from a lake of same name in Kargeldalen, in S. W. of Ilin Gensund, flows S. E. into Ilin Gensund where it forms several lakes, and falls into the Gulf of Bothnia, about 88 m. N. Gede, after a course of about 220 m. Its current is very much obstructed by rocks.

LIVADIA, **RUMELIA**, N. or **CONTINENTAL GREECE**, the most N. division of Greece, bounded N. by Turkey in Europe, W. by the Mediterranean S. by the Gulf of Patras and Lepanto and the Isthmus of Corinth, S. E. by the Archipelago, and N. E. by the channels of Megoropon and Talania; greatest length, N. N. W. to S. S. E. 190 m. breadth, about 47 m. It is traversed, throughout its whole length, by the Hellespontic chain, a branch of the Balkan, which separates the basin of the archipelago from that of the Ionian Sea, and has here, among other remarkable summits, those of Klytaos or Pindus, Aegaeus or Parnassus, Zagora or Hulleon and Othorion. The largest rivers are Aspropotamos, in the W. and the Ellada or Sperchius, and the Gyrion or Cephissus, in the E. The surface is generally mountainous but the soil, though often thin, is fertile, and, both on the lower slopes, in the valleys, and on the plains, corn oil wine, and fruit, are obtained in considerable abundance. The pastures, also are rich and extensive, and rear great numbers of cattle. The most valuable minerals are argenteiferous lead, and marble. Livadia corresponds nearly to the ancient divisions of Aegaeus, Doris, Locris, Boeotia, and Attica and includes the modern names of Attica and Boeotia, Phocaea and Phthiotis and Aegaeus and Attolia. In this division is also usually included the insular name of Subsea, or Negropont. Pop. (1851), 322 639.

LIVADIA, or **LESABDA**, a tn. Greece, on the Hellespont, a fine mountain town, 52 m. N. W. of Athens. It occupies a considerable space, and before the revolution it is said to have been the most flourishing town of N. Greece, and to have contained 1600 houses but it has a dull appearance, is poorly built, and consists of narrow ill paved streets. It is defended by a castle, and has manufactures of cotton goods, and a trade in rice, corn wool, and other articles of raw produce. Higher up the river in a narrow gorge, is the site of the ancient Hieron, or cave of Trophonius. Pop. about 3000.

LIVADOSTEO, a vil. Greece, Livadia, on a small stream, near its mouth, in a bay of same name, in the Gulf of Lepanto, 47 m. N. W. N. W. Athens. It has a good natural harbour.

LIVENZA [anc. *Leugenta*] a river Italy Venetia, which rises near Foleigno dist. Bellia, prov. Friuli, flows easterly to S. E. E. and after a course of about 30 m., falls, by several mouths, into the Adriatic at Porto-Santa-Margherita. Its current, though rapid, is partly navigable, and commercial boats with the Flavia by a canal.

LIVFRMERE, two par. Eng. Suffolk.—1, (Magdalen) 1549 ac. P. 601.—2, (Purwell) 1458 ac. P. 174.

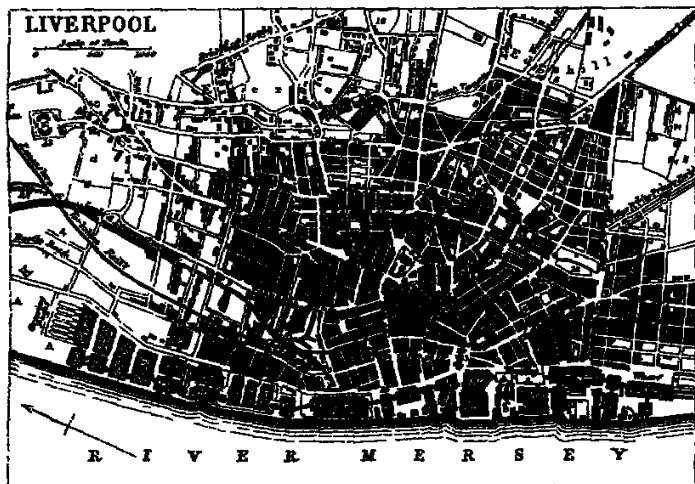

LIVERPOOL.—1, A township in Brit. America, Nova Scotia, on the S. E. coast 68 m. S. W. Halifax, cap. Queen's co. It is well and regularly built, and has an unusual number

25

of public buildings, a harbor, with a handsome drawbridge across it, and valuable as a fishing station, but, owing to a bar, not accessible by vessels drawing more than 9 ft. On Oulton's Island, at its mouth, is a revolving light, 70 ft. high. Liverpool was made a warehousing port in 1824.—2 A bar to, New S. Wales, on the George River, 20 m. S.W. Sydney. It is mostly built, and has a handsome church and hospital, and returns, with Richmond, Windsor, and Campbellton, a member to the Legislative Council. Pop. 6011.—3, (Liverpool Plains) A dist. New S. Wales, lat. 30° to 31° S., lon. 157° to 157° E. area, 19,000,000 ac. It contains the greatest extent of pastoral country, and is the best watered of any district in New S. Wales. It is bounded by two parallel ranges of mountains, from which narrow belts of forest traverse the plains at irregular intervals, and divide them into a series of natural parallelograms.—4, A mountain range, E. Australia, which stretches from W to E. between co. Brisbane, New S. Wales, and the Liverpool Plains, and forms the watershed between the basins of the Peel or Namoy, on the N and W., and the Hunter on the S and E.

LIVERPOOL, a port and man bor. and seaport, England, co. Lancashire, bank Mersey, about 4 m. from its confluence with the Irish Sea. (Observatory) 58° 24' 48" N., lon. 5° W (h.). It stands partly on flat ground along the

margin of the river and partly on a gentle acclivity. Its shortest length, from N to S., is upwards of 4½ m. Greatest breadth, E. to W., rather more than 3½ m. Area, 5008½ ac. The principal streets diverge more or less directly from a central area, in which stand St. George's Hall and St. John's Church. In the older parts of the town the streets are narrow, and ill built; but in the more modern portions, particularly in the E., they are wide, airy, and well paved. Here also occur some handsome squares and crescents, lined with elegant mansions, chiefly of brick, rooled with slate. The town is well lighted with gas, and supplied with water at pressure from wells sunk in the new red sandstone on which the town is built. There are seven wells, the greater part of the water from which is pumped into a reservoir at an elevation of about 200 ft. above the lowest part of the town. From this reservoir it is distributed under high-pressure and there being an abundance of hydrants in the streets, especially in the warehouse districts, fires are easily extinguished by the application of hose and jet. The result is, that serious destruction of property by fire is now unknown. The quantity of water distributed daily amounts to 5,700,000 gallons. At present works are in progress for obtaining an increased water-supply from the hilly district of Rivington, about 25 m. from Liverpool. Reservoirs are there in course of construction,

which, when completed, will form great lakes of the aggregate length of 6 miles, and from these, after being filtered the water will be conveyed to the distributing-reservoirs in the town in iron pipes, 44 inches diameter.

The most important public buildings are the Townhall, Exchange Buildings, Revenue Buildings, and St. George's Hall. The Townhall is an elegant Grecian structure, which was founded in 1749; a handsome dome, supported by Corinthian pillars, and surmounted by an open gallery, rises from the cupola of the building; within are a saloon, drawing-rooms, ball-room, banqueting-room, and refectory, all splendidly

furnished, forming, probably the finest suite of entertaining-rooms the kingdom. The Exchange Buildings form three sides of the square, of which the Townhall constitutes the fourth; it has three interior squares; an arched basement, with a walk of 15 ft. in width, extends along each of the squares, and is surmounted by a range of Corinthian pilasters, supporting a handsome cornice and balustrade in the E. wing of the building is a spacious news-room. The Revenue Buildings, which comprise the Office of Inland Revenue, the Office of the Commissioners of the Duties, and Post-office, cover an area of 6700 sq yds, and have an extreme length

of 467 ft., with a total height of 67 ft.; lofty porticoes, each supported by eight Ionic columns, adorn the centre, and E. and W. fronts, the centre of the building is surmounted by a dome, lighted by sixteen windows, and ornamented round by pilasters. St. George's Hall, which comprises also the Acad-

ST. GEORGE'S HALL AND LIME STREET RAILWAY STATION, LIVERPOOL.
From an Original Engraving.

Courts, is a sumptuous building in the Corinthian style, the E. facade, or the longer side of the building, is 420 ft. long, the advanced colonnade in the centre is 300 ft. in length and, being recessed forms within an ample sheltered ambulatory 28 ft. in depth. The W. portion of the plan forms a concert-room, capable of accommodating 1800 auditors, making the entire extent from N to S, 500 ft. The other structures exclusive of the churches, deserving of notice, are the Royal Bank buildings, the North and South Wales Banks the Stations of the London and North Western and the E. Lancashire, and Lancashire and Yorkshire Railways, Liverpool Apothecaries Hall, Adelphi Hotel, Infirmary Collegiate Institution Philharmonic Hall and Lyceum. The Theatre and Amphitheatre are also both respectable structures.

Few towns are so well supplied with market places as Liverpool, there being about a dozen of them in various localities several of them are spacious, airy, covered structures—that of St. John's, $\frac{1}{2}$ an long, by 45 yds wide, being especially worthy of mention they are probably better supplied with all kinds of provisions than any other markets in the kingdom. There are altogether 45 churches and 35 chapels in Liverpool besides numerous other places of worship the former comprising two churches belonging to the Scotch Establishment, three to the Free Church, one to the U. Presbyterian Church of Scotland, one Irish Presbyterian, and a church of the Holy Apostles. The chapels include five Wesleyan, two Wesleyan Association five Independent, three Methodist, eight R. Catholics, four Baptist, three Unitarian, one Friends meeting-house, two Jews synagogues, one Swedenborgian, one floating chapel and one New Jerusalem, and to almost every place of worship a school is attached. Many of the churches and chapels are exceedingly handsome buildings. Amongst the more remarkable for their architectural beauty are St. Francis Xavier's and St. Mary's R. Catholic churches, the church for the blind, St. Luke's, Great George Street chapel, St. George's Presbyterian church, Baptist chapel, St. Andrew's Scotch church, St. George's, St. Catherine's St. Michael's, St. Martin's, and the Hope Street Unitarian chapel. Liverpool is remarkable for the number of its charitable and benevolent institutions, and for the embellishment of the buildings devoted to these purposes; there being no fewer than fifteen or sixteen different establishments of one kind or another for the alleviation of distress, besides three or four charity schools. The principal are the Infirmary Fever Hospital, Lunatic Asylum, Lock Hospital, and three extensive public bathing establishments, erected by the Corporation, one of which is supplied with Mineral salt water, and the others with pure spring-water. To one of these establishments a public washing-house is attached; and there is a separate public washing-house in another locality. There are likewise many religious societies. The educational institutions comprise the Royal Institution, the Mechanics', the Collegiate, and the

Medical Institutions. Associated with these are the newspapers, among which the *Athenaeum* and *Liverpool* hold the highest station, and have extensive libraries connected with them. There is also the Free Public Library, and Derby Museum. The schools consist of the Corporation, National and Infant schools, and of a vast number belonging to the various religious denominations. The principal places of amusement are the Theatre Royal, the Royal Amphitheatre, the Royal Liver Theatre, the Royal Adelphi, the Philharmonic Hall, one of the finest concert-rooms in Europe; Music Hall Wellington Rooms the Ecological and Botanic Gardens, and the race-course at Aintree, where meetings are held in May and July.

But the most remarkable feature of this great seaport is the number and magnificence of its docks, corresponding with the extent of its vast commerce. All of these lie along the margin of the river, or between it and the town, most of them parallel with the

Mersey but some of them at right angles to it. There are, in all, 30 docks, of three different kinds, namely wet docks, dry docks or basins, and graving docks. The first are principally for ships of great burden, employed in the foreign trade, such vessels floating in them at all times of the year, the water being retained by gates the dry docks, so called because they are left dry when the tide is out are chiefly appropriated to coasting vessels and the graving docks, which admit or exclude the water at pleasure, are adapted to the repair of ships, during which they are kept perfectly dry and when completed, are floated out by admitting the tide. The extreme length of the river wall, which fronts the line of the Liverpool docks, is 5 m. The total water area amounts to 200 ac. of the 178 ac. are wet docks, and 21 ac. dry basins, and the total water space exceeds 14 m. The four largest docks are the Hutchinson, Prince's, Queen's, and Brunswick docks. The first covers an area of 15 ac. 998 sq. yards, length of quay frontage, 1122 yards, depth of water, 37 ft., the second nearly 12 ac., the third about 10 ac. and the fourth about 12 ac. Nearly 215,000,000 have been expended in Liverpool, and more than £19,000,000 on the river Mersey in securing safe anchorages, and the most perfect port accommodation ever formed by the skill of man. The following Table of the number of vessels that have entered the docks at various dates, and of the progressive increase of the dock dues and customs exhibit, in a very clear manner, not only the great extent of the shipping of this port, but the extraordinary rapidity with which it has increased since the commencement of the present century. The decrease of the customs receipts in recent years is mainly due to the abolition of the duty on cotton and wool:—

| Year. | Vessels. | Tonnage. | Dock Dues. | Customs Receipts. |
|-------|----------|-----------|------------|-------------------|
| 1800 | 4,748 | 450,000 | 35,375 | 1,066,078 |
| 1810 | 6,739 | 734,361 | 61,768 | 2,678,768 |
| 1820 | 7,978 | 806,238 | 94,415 | 1,658,078 |
| 1830 | 11,114 | 1,411,946 | 161,146 | 1,641,146 |
| 1840 | 15,941 | 2,708,458 | 195,697 | 4,572,967 |
| 1850 | 18,008 | 3,645,708 | 178,196 | 6,807,286 |
| 1860 | 20,881 | 5,016,491 | 225,546 | 5,536,481 |
| 1870 | 21,687 | 5,330,307 | 243,989 | 5,266,366 |
| 1881 | 21,071 | 5,737,656 | 298,030 | 5,610,038 |

In the value of its foreign exports, and the extent of its foreign commerce, Liverpool is now the greatest port in the British empire, and is consequently the first port in the world. In 1850 the foreign exports amounted to nearly £28,000,000 sterling, or considerably more than one-half of the total value of the exports of the three kingdoms for that year, and more than twice that of London. During the five years ending with 1850, the increase of the exports of Liverpool has been from £26,000,000 to nearly £28,000,000, while that of London has been from about £11,000,000 to rather more than £14,000,000.

ter of the country, and in which many of the Liverpool merchants reside. They are Beaumont, Woodside, Monk's Ferry, Blackhead, Tennyson, Rockferry, Rathmore, Eyrewood, and New Brighton; between which and Liverpool there passed by the railway, in 1851, above 8,000,000 passengers. There are several cemeteries in the town and its vicinity, the most noted of which are St. James's, the Necropolis, and St. Mary's. These are laid out with taste, and kept in good order and a chapel is appended to each, in which the funeral service is performed. There are also two parish cemeteries, and a Jews burying-place.

The corporation of Liverpool consists of 48 councillors, a mayor, and 16 aldermen elected by the council. The borough returns two members to Parliament: registered electors (1851), 17,516.

Liverpool was formerly the most unhealthy town in England, but the vigour with which sanitary operations have been carried on in late years, more particularly since the local sanitary act of 1845, has done much to rescue the town from its unenviable notoriety. These measures, comprising sewerage, house-drainage, improved paving and surface cleaning, the regulation of lodging-houses and slaughter-houses, the closing of unhealthy cellars, &c. have effected a marked improvement in the condition of the districts inhabited by the working-classes, and to this must not doubt be ascribed the fact, that the mortality of the borough which, ten years ago, amounted (on an average) of years to 81 in every 1000 inhabitants, has recently fallen to an average of little more than 20 in the 1000.

Great as Liverpool now is, it is of but comparatively recent growth, and has therefore little or no history. Little more than two centuries ago, it was but a small fishing town, with few houses, and still fewer streets. Of the progress of this great commercial port, the following table presents a curious and interesting outline—

Rise and Progress of LIVERPOOL.

| | Under Queen Elizabeth. | Under Queen Anne. | Under Queen Victoria. |
|-----------------|------------------------|-------------------|-----------------------|
| | 1599. | 1710. | 1851. |
| Population | 200 | 9,120 | 375,845 |
| Townships | 660 | 12,530 | 3,727,696 |
| No. of vessels. | 16 | 285 | 21,071 |
| Town dues. | £ | £ | £ |
| Customs | 278 | 70,000 | 3,236,252 |
| Excise | 30 | 1,116 | 189,183 |

In 1644, Liverpool, then surrounded by a high mud wall, was besieged and taken by France Rupert, and shortly after ravished by the Parliamentary forces, under Sir John Meldrum. Seven years later, a second visitation of the plague carried off 200 inhabitants. In 1709, a new dock was constructed, not only the first in Liverpool, but also in the kingdom. From this event may be dated the rapid extension of its commerce and population, though, as evidenced by the following Table, the greater portion of the increase of population has taken place since the commencement of the present century—

| Year. | Pop. | Year. | Pop. |
|-------|--------|-------|---------|
| 1700 | 1,050 | 1841 | 118,978 |
| 1750 | 24,000 | 1861 | 242,264 |
| 1801 | 77,583 | 1881 | 375,845 |

Mrs. Hemans, the Rev. Legh Richmond, and Dr. Curran, the biographer of Burns, and William Roscoe, were natives of Liverpool.—(*Proceedings Handbook of Liverpool Baines History of Liverpool Local Correspondence*) See SUPPLEMENT.

LIVINGTON, par. Boot Lillingham 5800 as P. 1229.

LIVNO, or LIVENA, a tn. Turkey in the W W of Haragovina, at the foot of Mount Luvanka, 40 m. N. E. Spalato, on the Bustrice, here crossed by a handsome bridge of five arches. It is surrounded by a wall, flanked with towers, and defended by a castle. The vicinity is fertile in corn, and has fine pastures, in which great numbers of cattle are reared. Pop. about 1000.

LIVNY, a tn. Russia, gov. and 80 m. E. S. E. Orsk. cap. circle, I. Bank Bzura. It is an ancient place, has two churches, and a monastery, and some general trade. P. (1850), 8792.

LIVONIA, LATVIA, LATVIA, LATVIA, or RIGA, a gov. Russia, bounded N by Riga, W by the Baltic Sea,

S. by Courland, and E. Vilna, and the Lake of Peipus; lat. 56° 27' to 59° N. long. 25° 40' to 27° E. N. length, 178 m.; breadth, 111 m.; area, about 18,200 sq. m. The surface is for the most part flat, sandy, and swampy, but has occasional tracts of black loam, well fitted for the plough. The only hilly ground is in the districts of Wenden and Dorpat. The government is well watered, possessing numerous rivers and lakes. Of the former, the principal are the Dvina and Embach of the latter the Westers and Labu. The climate is subject to great extremes of heat and cold. Notwithstanding extensive tracts of sand, the greater part of the government is under cultivation, and yields good crops of oats, barley, wheat, potatoes, &c. and hops. The forests are extensive, and furnish good timber. Horses, cattle, and sheep are generally of small inferior breeds. Game both of the smaller and larger species, is abundant over the whole government. Gypsum, chalk and a little marble are found. Distilling, sugar refining, and the manufacture of tobacco, woollens, cotton and linen, are the chief branches of manufacturing industry. The inhabitants consist of Estonians, Livonians, and Letts, and speak the Finnish and Lettish dialects. They are almost all Protestants of the Augsburg Confession. The Livonians and Estonians, nevertheless, obtained their personal freedom in 1824. Livonia is divided into nine districts. The capital is Riga. Pop. (1850), 830,000.

LIVONIA (GULF OF) See RIGA.

LIVORNO—1 A tn. and seaport, Tuscany, the Lago Nove.—2 A tn. Sardinian States, div. Novara, prov. and 17 m. W S W Verceili, on a canal communicating with the Dora. It has a parish and four other churches, several fine mansions or palaces, an hospital and a charitable endowment and a trade in rice and millet. Pop. 6500.

LIVON, a tn. France, dep. Drome, 11 m. S. Valence, near the confluence of the Drome with the Rhone, the former of which is here crossed by a fine bridge. It has manufactures of delft and common earthenware, and agricultural implements, tanneries, tile-works, and lincolns; and two annual fairs. Pop. 1815.

LIXURI, a seaport in Cephalonia, one of the Ionian Isles, on the W side of a long narrow arm of the sea, which penetrates the Isl. S. to N. It is a principal depot for wines and oranges. The shores are steep, and favourable for erecting harbours and landing-places, while the country around yields a large produce for exportation. Pop. 5000.

LIZARD, an Isl. N. E. coast Australia, N N E. Cape Flattery lat. 14 41 34' S, lon. 145° 28' 50' E (n.) It has a peak 1161 or 1161 ft above sea-level, greatest diameter, 2½ m.; composed of a coarse grey granite, easily decomposable. A mountainous ridge runs across the island, and divides it into two portions, of which the E. is hilly and the W. low and intersected by small ridges of slight elevation. A large grassy plain extends W from the central ridge, and is densely covered with coarse grass and reeds, and scattered over with Pandanus trees. The soil is in general barren. Snakes are numerous, several of them poisonous. Shells of the most beautiful forms and colours abound on the shores.—(*Voyage of the Rattlesnake*).

LIZARD POINT, a headland, England, on Cornwall, forming the most S point of Great Britain, 24 m. E. S. E. Land's End, and having two lighthouses, with fixed lights 224 ft. above sea-level; lat. 49° 57' 43' N. lon. 5° 13' W.

LIZANA, a vil. and com. Naples, prov. Otranto, dist. and 15 m. S. E. Lecce. Pop. 1797.

LIZANO, a vil. and com. Naples, prov. Otranto, dist. and 15 m. S. E. Taranto. Pop. 1670.

LJUBIM, a tn. Russia, gov. and 52 m. N. E. Jaroslavl, cap. circle on the Otnova, with four churches, two tanneries, and a general trade and important annual fairs. Pop. 2287.—The OTNOVA is tolerably well wooded, and raises a good deal of corn, though in general it is more pastoral than agricultural. Pop. 57,548.

LLACUNA (LA) a tn. Spain, Catalonia, prov. and about 80 m. from Barcelona, with two small squares, one of which is used by aradles; several irregular and new streets, a church, an old castle, a primary school, and three mills. Pop. 1090.

LLADO, a vil. Spain, Catalonia, prov. and 30 m. from Gerona, with a church, two primary schools, several mills, and a trade in oil, charcoal, and timber. Pop. 1045.

LAGOSTERA, a tn. Spain, Catalonia, prov. cat. 8 m. S.W. of Girona. It contains a parish church, an old castle, used as a prison, and a primary school; and has manufactures of cork, and a trade in swine. Pop. 1870.

LA AMAR DE LA RIVERA, a la. Spain, prov and 13 m.
W N W Loma, 1. bank Grijago. It has a handsome square.

Healy played: a parish church, an ancient tower, a primary school, a great mill, and a trade in furs.

L.L.A.N. is a church prefix in the names of numerous places in England and Wales. All the parishes having this prefix, excepting those given with towns of the same name, will be found in the following Table—

ENGLAND.

[illegible]

WALSH

[illegible]

[illegible]

LLANBEDR is a in and per Wales. See **Llanwethy**.
1 LLANFAF [*Llan* T^h Church of the T^h] an anc. and decayed city and per S. Wales, Glamorganshire. The city now a mere village, with 670 inhabitants is agreeably situated 7 miak T^h in N W Cardiff, with a station on the T^h Valley and Aberdare Railway It is only noted for its cathedral, built in the 12th century but subsequently repaired and contracted in 1251, when a new Grecian W front was added to the original Gothic one, imparting to the whole edifice a singularly incongruous appearance its entire length is 800 ft, breadth 80 yds Adjoining it are the chapter-house, in the doocent, an English style, and the remains of the episcopal palace, a fine specimen of the 14th century, and the church. There are two national schools, and some small charities. The see of Llanfaaf includes Monmouthshire, and that part of Glamorganshire E of the North comprising 215 benefices. Area, 6532 ac. Pop. per, 1291

LIANDILO FAUR, or **VAWA**, a market town and par. 8
Wales, co. Carmarthen. The town, a bank Towy here, is
crossed by a stone bridge, 18 m. E. by N. Carmarthen, has
a neat modern townhall, containing accommodation for the
sessions courts, and a corn-market underneath a large heavy-
looking church with a Norman tower, a Baptist a Wesleyan
and a Calvinistic Methodist chapel; five ordinary and two
infant schools. In the vicinity are limestone flag and mica
slate quarries. P 1812. Area of par. 25 528 ac. P 575.

PLANDOWNEY (pop. about 1,000) is a municipal borough in the county of Carmarthen, Wales, co. and 28 m. E.N.E. of Carmarthen. It is situated on the bank of the Towy pleasantly sited, but poverty-stricken. It has an episcopal church, and Independent, Wesleyan, Baptist, and Calvinistic Methodist chapels, and a national school, infant, and several other schools. In 1849 Thomas Phillips, a Quaker, founded here the Welsh educational institution, in which a classical and mathematical education is given alongside with instruction in the Welsh language. The founder has subsequently been joined by a number of pupils for scholarship, and

Oxford and for professorships of geology chemistry botany and other sciences. On a rocky eminence on the W side of the River are the remains of an ancient castle. Pop 1927

[illegible]

LLANERCHYMEDD a market town and chapelry Wales, co Anglesey 12 m. W N W Beaumaris. It has an episcopal chapel with a lofty square tower several dissenting chapels, and a national school. The making of shoes, and the manufacture of snuff, are carried on to a considerable extent. Pop 71

FLANER, a small is. and port Spain, Asturias, prov. and 60 m. E by N Oviedo, lat. 45° 27' N, lon. 4° 38' W. It is well built, has a church, several chapels, a small town-house and prison. 24 schools, a custom-house a magnificent palace of the counts of Vega, an old Roman tower and manufactures of linen and woollen fabrics and timber. At its port, only suited for vessels under 130 tons, some timber iron ore, fruits and bark, are exported, and colonial produce, wheat, salt, breads, and manufactured goods, imported. Pop. 2084.

NEWFAIR, or **LEAVYFAIR**, a market to. and par. Wales, co. and 10 m. N. W. Montgomery; with a church, townhall, and several schools; and manufactures of flannel. Area of par., 16,167 ac. Pop. 1977.

LLANFYLIN, a market to. and par. Wales, Montgomeryshire. The town 10 m. N. W. Montgomery on the Cole, over which is a neat bridge, has a church, in the Victorian style, several Dissenting chapels, a neat townhall, with market undercroft, a school, nave-room and some trade in leather and salt. It unites with Montgomery, &c. in sending a member to Parliament. Pop. bar (1861), 1116. Area of par., 7928 ac. Pop. 1902.

LLANGADOCK, a market to. and par. Wales co. and 19 m. E. N. E. Carmarthen, near the junction of the Saverdy with the Towy, here crossed by a neat stone bridge. It has an old substantial church, several Dissenting chapels, and near it coal and limestone are worked. Area of par., 15,643 ac. Pop. 3290.

LLANGFENI, a market to. and par. Wales, co. Anglesey, 9 m. W. Beaumaris. The town on the Cymru, here crossed by two handsome bridges, has a church, several Dissenting places of worship, a neat market-house, and a school. Hunted manufactures of woollen cloth, and extensive markets and cattle fairs. Area of par., 2456 ac. Pop. 1799.

LLANGOLLEN [pronounced *Llangollins*], a market to. and par., N. Wales, co. Denbigh. The town, 19 m. S. E. Denbigh and 4 m. from the station of its name on the Chester and Shrewsbury Railway is picturesquely situated in a narrow valley. It has a church, in the early English style, an ancient church, in the early English style, and five Dissenting places of worship, three schools, a public library and several friendly societies. In the town and neighbourhood are three extensive mills, where flannel of superior quality is manufactured and several breweries. Flag, slate and limestone abound in the vicinity. Four miles from the town, the Ellesmere Canal is carried across the Dee and in the neighbourhood is the magnificent aqueduct of Pont Cynyllin of 19 arches, and 136 ft. high, constructed by Telford. Near the town are the picturesque ruins of the fortress Castell Ddu. Llangollen is much admired for the beauty of its situation, and greatly resorted to by summer visitors. Area of par., 30,175 ac. Pop. 6590. (Local Correspondent).

LLANIDLOES, a municipal and par. bor. and par. Wales, Montgomeryshire. The town in a fertile valley on the Severn, here crossed by two bridges 18 m. N. W. Montgomery formerly consisted chiefly of houses built of timber frames, filled in with plaster, many of these structures have, however in recent times, been replaced by good modern houses. In the centre of the town in the old market-house a quiet looking timber-framed structure, little used since the erection of the new market-house, a spacious building in the upper part of which the wool-market is held with the shambles, butter-market &c. in the lower part. There are a venerable old Established church several Dissenting chapels, and some small charities. The manufacture of flannel is still actively carried on, though not so great an extent as at one time, and in the town and vicinity are several factories for carding and spinning wool falling-mills, a brass foundry extensive copper and lead mines, and several maltings, flour-mills, and sawmills. It unites with Montgomery &c. in returning a member to Parliament; and has extensive sheep fairs. Pop. 3045. Area of par., 15,799 ac. Pop. 4604.

LLANOS (Loe), a to. Camry side, S. W. side Isl. Palma, with a church, five chapels, four schools, and manufactures of sugar wax, brandy silk, and cheese. Pop. 4967.

LLANOS (SANTA MARIA DE LOE) a to. Spain, near Castile, prov. and 45 m. from Cuenca. It is poorly built, and has a church, a primary school, an hospital, and a trade in corn. Pop. 1918.

LLANWIST, a market to. and par. N. Wales, co. Carnarvon and Denbigh. The town, 15 m. W. by S. Denbigh, is pleasantly situated on a bank Corwen here crossed by an elegant bridge of three arches, built about 1636, from a plan by Inigo Jones. It is spacious, well paved, and well built, but the houses and shops are, in general, small; water abundant. It has two churches, four Dissenting chapels, several schools, and some minor charities. Spinning of woollen yarn, and the bottling of stockings, are the chief manufactures. Area of par., 32,818 ac. Pop. 3864.

LEANA, a to. Spain, Catalonia, prov. and 22 m. N. E. by S. Gerona, on the coast of the Mediterranean; with a large church and school; inhabitants engaged in fishing, sailing, &c., making brandy, wine, oil, &c. Pop. 7392.

LLANTIRRENT, a par. bor., market to., and par. S. Wales, co. Glamorgan. The town, romantically situated partly on the declivity, and partly on the summit of a hill, 6 m. N. W. Cardiff, is irregularly built, houses in general old and small; and not improving. It has an old castle-ruin, with a ruined tower, a large and venerable parish church; and four Dissenting chapels, two national schools, and three friendly societies; inhabitants principally employed in agriculture, or in the extensive collieries in the neighbourhood. Llantirrent unites with Cardiff, &c., in returning a member to Parliament. Pop. 16,689, of par., 4181. (Local Correspondent).

LLAVANERAS, or **LLAVANERAS**, two places, Spain—1. (San Andrés de) A to. in Catalonia, prov. and about 18 m. from Barcelona. It is poorly built; has a large parish church, with a handsome facade; a primary school many factories of cotton, and cotton twist and a trade in wine and mackintosh. Pop. 1928.—2. (San Vicente de) A to., near the former with a parish church courthouse manufactures of cotton, verdigris, earthenware, and two flour-mills. P. 811.

LLAWHADEN par. Wales, Pembrokeshire, 4480 ac. P. 669.

LLERENA a city Spain Extremadura, prov. and 87 m. S. E. Badajoz. It is well built, walled, flanked with towers has numerous gates, wide streets, two parish churches, four schools, four convents several schools, two hospitals, lower and court houses a prison, theatre, cavalry barracks, bull-ring, and, in the environs, some pleasant public walks manufactures of linen and woollen fabrics, hats, leather, soap, white wax brandy wine, and oil. Pop. 4990.

LLERS, formerly **EL PERELLO**, a to. Spain, Catalonia, prov. and 50 m. from Gerona. It is irregularly built has a handsome modern church, with a tower a fine old Moorish castle, which was occupied as a fort during the last civil war, a courthouse, hospital and a trade, chiefly in oil. P. 1843.

LLIYA, a to. Spain Catalonia, prov. and 54 m. N. W. Gerona, bank Segra, here crossed by a wooden bridge on the confines of France with a parish church, townhall prison and school manufactures of linen, woollen and cotton fabrics and some trade in grain, cattle, oil, wool &c. Pop. 904.

LLIBRESGUARD—1. (San Felice de) A to. Spain, Catalonia, prov. and 6 m. N. W. Barcelona I bank Llobregat with a church townhouse, prison, two schools, and a cemetery and manufactures of cotton fabrics and blonde. Pop. 1890.—2. Two rivers, Spain one of which runs near Folia de Ribot, prov. Barcelona, and flows to the Mediterranean, 4 m. S. from Barcellona total course about 75 m. The other rises near Juncquera, prov. Gerona, on the confines of France, and flows N. E. to the Ebro. total course, 30 m.

LLIQUET DE MAR, a to. and port, Spain, Catalonia, prov. and 20 ft. S. Gerona, on the Mediterranean. It has clean, well kept streets, two squares, a parish church several chapels, a customs-house, hospital a dock-yard for merchant vessels manufactures of blonde and corals, an active fishery and a trade in grain, timber, fish, bristles, wool salt-meat, colonial produce, &c. Pop. 3034.

LLIBRE DE LARNA, a vil. Spain, prov. and 25 m. from Valencia, near I bank Albufera with a parish church, court house, primary school several oil and spinning mills. P. 1388.

LIBRETA, a to. Spain, Isl. Majorca, dist. Inca, with a parish church and a trade in corn, oil, and wine. Pop. 1116.

LILOUGHOR, or **LOUGHOR** [anc. *Louweran*] a bor., seaport, and par. S. Wales, co. Glamorgan, 6 m. W. by S. Swansea, I bank Loughor here crossed by a bridge. It has a church and a national school a fine work, and a manufactory of pyrogonium sand. It exports coal, and imports limestone. Vessels of 200 tons burthen come up to the town. It unites with Swansea, &c. in returning a member to Parliament. Pop. 821. Area of par. 8999 ac. Pop. 1069.

LILOWES, par. Wales, Radnor, 3819 ac. Pop. 859.

LLIURI, or **CARRELL-LIURI**, a to. Spain, Isl. Majorca, near Inca; with a parish church, a primary school, manufactures of linen, several flour-mills, and a trade in corn, sheep, and wine. Pop. 1816.

LLUCHMAYOR, a to. Spain, Isl. Majorca, 16 m. S. E. Palma, at the base of Mount Ramis. It is tolerably well

halls; and the property, old wine, well-kept accounts; a church, church of St. Anthony, two schools, a store, houses, and manufactures of linen and woollen fabrics, hats, bread, and wine; and a well-attended cattle fair. P 7764.

LOANHEAD, a vil. Scotland, ac. and 6 m. S. by E. Edinburgh, a few miles from the coast, with several good houses, handsome villas, and a handsome Presbyterian church. Inhabitants chiefly employed in collieries and paper-mills. Pop. 819.

LOANO, a tn. Italy, Piedmont, div. Geneva, prov. and 3 m. N. Albenga, near the sea. It is walled, very irregularly built, has a law court, several public offices, a beautiful parish church, in the form of a regular dovecot; an elegant palace, belonging to the Doria family, a castle, two handsome churches, and manufactures of soap, varnishes, and black lace; the last in great demand in Spain and the Papal States. P 3352.

LOB-NON, a lake, Chinese Turkestan, prov. or circuit Thian-Shan-Nanlo, on the W. edge of the desert of Gobi, lat. 40° 30' N. lon. 87° E. The dreary region in which it is situated is uninhabited, and the lake itself is surrounded by extensive swamps, and a series of small sheets of water. Lob-Nor is the recipient of the large river Tarim or Ergon, flowing from the W., and of the smaller river of Kando, flowing from the N. It is about 50 m. in length, and half that breadth.

LOBAGUE, or LOBA, a fortified post, Hindostan, prov. Delhi, 82 m. N.W. Agra, 5461 ft. above sea-level, lat. 29° 37' N. lon. 78° 18' E.

LOBAN, an ul. Austria, in the Danube, about 6 m. E. E. Vienna, about 110 yards from the 1st bank, nearly 3 m. long, and rather more than 1 m. broad, noted for the passage of the French army in 1809. The French remained entrenched upon it between the battles of Gross-Auen and Wagram.

LOBAN —1, [Polish, Luban], a tn. E. Prussia, gov. and 34 m. E. E. Marienwerder, cap. circle, on the Jastonia or Sandella. It is walled, has two churches, a bishop's palace, a townhouse, a Benedictine monastery, a law court, and several public offices, manufactures of linen and woollen cloth, and a trade in cattle. Pop. 2208. The climate is hot and well wooded, but sandy. Area, 830 sq. m. Pop. 84,687.

LOBAN —2, a Saxony circle and 11 m. E. Saxony cap. dist., on the Saxony-Silesian railway. It has a court of justice and several public offices, four churches, a burgher school, library, and bathing establishment, manufactures of leather, several mills and bleachfields, and a trade in yarn and cattle. Pop. (1849) 2552, dist. 144,800.

LOBBE, a vil. and com. Belgium, prov. Hainaut, 9 m. S.W. Charleroi, 1 bank Sambré, with manufactures of nails, bricks, and clay; salt-refineries, breweries, a bleachery, and two flour-mills, and some trade in horses, cattle, and agricultural produce. Pop. 2489.

LOBEDA, a tn. Saxony-Wesmar, r. bank Saale, about 3 m. S. Jena, with a parish church, townhouse, hospital, manufactures of hosiery, and a trade in wine. Pop. 781.

LOBED, cap. Kordofan. *See* Omdur.

LOBEDAN, a tn. Prussia Saxony, gov. and 28 m. N. Merseburg. It is walled, has two churches and an hospital, hosiery, salt-petre-works, and several mills, and near it coal is worked. Pop. 2352.

LOBFENDAU, a vil. Bohemia, circle and 96 m. N. N. E. Leitmeritz, with a church, school, and distillery. Coordinates two linen bleachfields, a saw and other mills. Pop. 1810.

LOBENSTEIN, a tn. Germany, principality Reuss-Lotharstein-Eberdorf, 42 m. S. by W. Gotha, at the confluence of the Koral and Laminia. It stands at the foot, and on the slope of a hill, crowned by the old castle of Lobenstein, has narrow streets, a court of justice, and several public offices, a castle, in which the Prince resides, a church, distillery, bathing establishment, workhouse, and manufactures of woollen and linen cloth, a tannery and brewery, and a trade in wool and yarn. Pop. 4160.

LOBNIK, a vil. Austria, Moravia, circle Olmütz, about 16 m. from Frudenthal, with a church and a mill. P 1071.

LOHON [*see* Lohon], a tn. Spain, Extremadura, prov. and 18 m. E. Badajoz, with a church, a fine chapel, an old castle, supposed to be of Roman construction; a schoolhouse, and primary school, several flour-mills, and a trade in corn. The Romans, under the pro-consul Lucius Apollonius, were here defeated by the Lusitani, 168 A.D. Pop. 560.

LOBOS, or REAL ISLANDS.—1, Three isls. Pacific Ocean, off the coast of Peru. The largest and most N., called Lobos de Tierra, is 10 m. distant from the mainland, and is in lat. (S. pole) 8° 29' S.; lon. 80° 58' W. (L). It is about 5 m. long, and 3 m. broad, at the widest part. Thirty miles S.

from this island are the *Lobos de Agua*, consisting of two islets, separated by a narrow channel. The largest of these two islands is about 2 m. long, by 2 m. broad, lying S. by S. and N. by N.; lat. 60° 48' S.; lon. 60° 44' W. (a). The other, about 1½ m. long, and nearly 1 m. broad, lies nearly N. and S., forming, with the S. island, two strong, opposite bays. These *Lobos* have attracted considerable attention of late years, on account of the immense deposits of guano they contain—amounting to 2,000,000 tons on the largest island, *Lobos de Agua*.—3. An isl. S. America, off S. coast Uruguay, N. side of the entrance to the estuary of the Río de la Plata; lat. 35° 1' S., lon. 54° 39' W.; about 80 m. E. Monte Video, and 8 m. S. S. E. the town of Maldonado.—4. An isl. N. America Gulf of California, coast of Mexico; lat. (S. W. point) 27° 15' N.; lon. 110° 46' W. (a). It is a beautiful little island, of coral formation, and about 2 m. in circumference, covered with a variety of trees and shrubs, and so thickly interwoven with vines that it is difficult to get through them. Water is abundant, at a depth of from 4 to 6 f., but it is brackish and sweet. Fish and sea-fowl are in great profusion.—5. An isl. Gulf of Mexico, prov. Vera Cruz; lat. 21° 36' N. lon. 97° 8' W. (a).

—6. One of the smaller Canary Islands, being about 6 m. long, and 1½ m. broad, near the N. point of Portovenere; lat. (N. point) 39° 45' S.; lon. 18° 45' W. (a).—7. A small isl. Atlantic Ocean, near Cape Blanco, N. W. coast of Africa; lat. 27° 50' N., lon. 17° W.

LOBOBITZ, a tn. Bohemia, circle and 4 m. W. A. W. Leitmeritz, l. bank Elbe. It is an old, but tolerably well-built place; has a large castle, church two chapels, and an hospital; a landing-place, where from 50 to 60 of the Elbe vessels call conveniently, a brewery distillery, large corn magazines, and a trade in cattle. In 1756 a battle was fought here between the Prussians and Austrians. Pop. 1822

LOBOSIN, a tn. Prussia, Posen, gov. and 33 m. W. N. W. Bromberg, with a church, a synagogue, and manufacture of woollen cloth and lace. Pop. 1827

LOCANA, a tn. and com. Italy Piedmont, div. Turin, prov. and 21 m. W. W. Ivrea, in the valley of Font, l. bank Orge, with a church, mines of iron, and beds of porcelaine earth, and a trade in cattle and dairy produce. Pop. 5584.

LOCARNO or **LOCARON**, a tn. Switzerland, one of the three capitals of com. Ticino, on the N. W. margin of Lago Maggiore, at the entrance of these converging valleys, and at the foot of a hill covered by the church of Madonna del Sasso 8 m. W. S. W. Bellinzona. It is walled, and generally well built. Many of its houses are handsome and it has a spacious square, three churches, two in addition to the Madonna del Sasso, already mentioned, which deserves notice, not merely on its own account, but from the splendid view which it commands over the lake, and four convents. Locarno has some manufacture of hats and coarse woollens, and a bell foundry. Owing to extensive marshes along the lake its situation is not very healthy. Pop. (1850) 2576.

LOCKATE, **LOCKATE TOWNS**, or **LOCKERS** **Sax** **WYOMING**, a tn. and com. Italy, Lombardy prov. and 9 m. S. Milan, l. bank Lambro; with a church, no old feudal castle, the palace of the Princess Belgoyon, and some handsome establishments, including an infant school. Pop. 1930

LOCCUM, a tn. Hanover, principally Kalenberg 25 m. W. N. W. Hanover, with a church, a theological seminary, a fine library, and several distilleries. Pop. 1500.

LOCH DALLY, a vil. Scotland, co. Fife, 7½ m. E. N. E. Dundee, with a U. Presbyterian church, and two schools and, near it, a small lake. Pop. 770

LOCH-DA-BIA, a mountain, Grampian range, Scotland, co. Aberdeen, near Gairloch and Braemar; height, 3777 ft.

LOCH-DA-BIALA, a lake, Scotland, co. Ross and Cromarty 22 m. W. N. W. Dingwall, 7 m. long, by 1 m. broad, of considerable picturesque beauty.

LOCHABER, a dist. Scotland, co. Inverness, on Loch Arkay and Loch Loughy. It is desart, barren, mountainous, and very thinly inhabited; but is well adapted for the rearing of black cattle. In 1690 Cameron of Lochiel killed a wolf here, the last known to have existed with in Great Britain.

LOCHALISH, par. Scot. Ross; 52,000 ac. Pop. 2209; separated from St. Mary by an exposure in the shape of a high ridge, opening E. into Loch Dalich and Long, S. into Kyle Bane, and W. into Kyle Baskin.

LOCHERBROOM, par. Scot. Ross; 60 m. by 30 ac., including loch of same name, an arm of the sea, 20 m. N. W. Dingwall, penetrating 14 m. inland N. W. to S. S. W. with a breadth of under 1 m. to above 5 m. Pop. 4812.

LOCHGARRECH, par. Scot. Ross, 35 m. by 10 m. P. 1613; with extensive loch or arm of the sea of same name, which, at its N. E. end, receives the river Carron, whence the loch and parish are named.

LOCHER, a vil. Scotland, co. Forfar, 1½ m. N. W., and within the pari. boundary of Dundee. It has Established, Free, and U. Presbyterian churches; several schools, and a number of saw-pinning mills. The inhabitants are chiefly employed in the weaving of coarse linen fabrics. Pop. 2686.

LOCKHEM, a tn. Bohemia, prov. Giesobrunn, 53 m. N. E. Arnheim. It is a pleasantly-situated, good-looking, prosperous little place and has a substantial town-house, a church, poorhouse, various schools, several taverns, a cotton-weaving establishment and kerf. oil, and corn mills. Pop. 1557

LOCHES, a tn. France, dep. Indre-et-Loire, l. bank Loire, 14 m. S. E. Tours. The opposite bank of the river is occupied by Beaulieu, with which a communication is maintained by a series of bridges. Loches rises in the form of an amphitheatre along a hill. Behind it stand the ruins of an old castle, on an isolated rock inaccessible to three sides. The town is poorly built, houses old, and streets narrow. It has a court of first resort, a communal college, manufacture of linen, coarse woollens, paper, and worsted, and a trade in wine, wood, and cattle. In the neighbourhood are still a few remains of the Charteuse du Liget, a monastery said to have been founded by Henry II of England in caputem of the murder of Thomas à Becket. Pop. 2401

LOCHGILFHEAD, a vil. Scotland, co. Argyre, 18 m. S. W. Inverary, at the head of Lochgilp, a branch of Loch Fyne. It is well built, lighted with gas, and has an Established, and a Free church, and chapels for Presbyterians, Baptists, and Episcopals, several schools, a jail, two lunatic banks, a rope-drawery, a distillery and malt and tanning mills. About 2 m. distant is the village of Ardbrigg, at the end of the Crinan Canal, along which steamers pass to Oban Inverness, &c. There is frequent communication by steamers with Inverary and Glasgow. Pop. (1841) 2748 (1851) 3702.

LOCHGILLHEAD and **KILMARONCH**, par. Scot. Argyre; 25 m. by 20 m. Pop. 384 with the watering village of Lochgillhead at the upper end.

LOCHINVAR, a small lake, Scotland, Kirkcubright shire, 4 m. N. E. Dalry 3 m. in circuit and abounding in excellent trout. Here are the remains of what is said to have been a castle of the Gordons, annually knights of Lochinvar. Pop. 10,750 ac. Pop. 8127. (—*Loch* *Correspondent*.)

LOCHLIFE, par. Scot. Forfar 15 m. by 7 m. P. 616.

LOCHMABEN, a royal and pari. bor. and par. Scotland, co. Dumfries. The town is in a plain in the centre of Annandale, and nearly surrounded by eight beautiful lakes, 3 m. N. E. Dumfries, has well kept streets, an Established, a Free, and U. Presbyterian churches, an old townhall, several schools, two public circulating libraries, a young men's society and a savings-bank. The inhabitants are mostly employed in the making of hosiery for the Dumfries manufacturers. According to tradition, Lochmaben was created a burgh soon after the accession of Robert Bruce, who was here in a castle held by the remains of which still exist. It trades with Dumfries &c., in returning a member to Parliament. P. 1609.—Area of par., 10,750 ac. Pop. 8127. (—*Loch* *Correspondent*.)

LOCHOWITZ, a vil. Bohemia, circle and 9 m. S. E. W. Brunn, on the Elbe; with a church, and manufacture of cotton cloth. Pop. 1250

LOCHRUTTON, par. Scot. Kirkcubright, 8000 ac. P. 736.

LOCHS, par. Scot. Ross, 10 m. by 9 m. Pop. 4255.

LOCHWINNOCH, a vil. and par. Scotland, co. Renfrew. The town is 14 m. W. S. W. Glasgow, on the railway thence to Ayr; has four principal and well-kept streets; an Established, a Free, and a U. Presbyterian church; six schools; two large cotton-mills, and a wool-mill. Some of the inhabitants have hand-loom weavers; but the generally are employed in the cotton-mills. Pop. 1273. Area of par., 19,540 ac.

LOCHY (Loch), a com. Scotland, co. Inverness, dist. Lochaber, about 11 m. long, and generally under 1 m. broad; communicating at the N. E. end with Loch Clack, and at the

S.W. and with each Ell, through a straitened named the Lochy dell-side through division of the Colorado Canal, of which this dell itself forms a portion. It is mostly very shallow.

LOCKHEE, a report in China, E. coast of Isl. Hainan, near the mouth of a river; lat. 19° 19' N. lon. 110° 24' E. It is a large place, surrounded by walls and ramparts 30 ft. thick, in tolerable condition, and entered by four gates, having the central paces. The streets are paved but narrow; the houses, built of brick, never exceed two stories in height; the shops are elegant, and well supplied with various kinds of merchandise. Pop. about 90,000.

LOCKERBIE, a town, Scotland, co. and 11 m. E.N.E. Dumfries, on the Caledonian Railway. It has an Established a Free, and a U. Presbyterian church; five schools, two libraries, and an active trade in bacon, chiefly for the English market. In August the largest lamb fair in Scotland is held here. Pop. 1860.

LOCKERLEY, par. Eng. Hants. 1729 ac. Pop. 627.

LOCKHART, par. Eng. Somerset. 1018 ac. Pop. 156.

LOCKING, par. Eng. Berks. 8829 ac. Pop. 297.

LOCKINGTON, two par. Eng. Leicesters. 2185 ac. Pop. 625—3 York (E. Riding) 8300 ac. Pop. 467.

LOCKWOOD, a vil. England, co. York (W. Riding) The village, 1½ m. S.W. Huddersfield, of which it forms a beautiful rural suburb, is delightfully situated in the vale of the Holme, much resorted to for its medicinal waters, and has a church and two Baptist chapels. Pop. 5418.

LOE (La) a vil. and par. Switzerland, co. and 10 m. W.N.W. Fribourg, in a valley of the same name, traversed by the Rhod, nearly 3000 ft. above the sea. It is a scattered place, but the houses, generally painted outside, have a pleasing appearance. It has an orphan asylum hospital for old men, important manufactures of clocks and watches, jewellery and lace. Near Loel the Rhod disappears in a rocky chasm, which, not having a large enough vent for the water when increased by melting snows, causes disastrous inundations. The danger has now been removed by an aqueduct, consisting of a tunnel 950 ft. long, cut through the solid limestone rock which encompasses the valley and carries the superfluous water into the Donch. The chasm where the Rhod disappears, is 100 ft. deep, and to render the full available several mills one above the other have been constructed within it. They stand in frightful situations, and are approached by flights of steps, amid darkness and noise. Pop. (1850) 8514.

LOCOBOTONDO, a town, Naples, prov. Terra di Bari and 85 m. S.E. Bari. Pop. 4370.

LOCSMAND, or **LOVTSALASZCO** a market in Hungary Thither Danube, on the Repce about 6 m. N.E. Güns, with two churches and an annual fair. Pop. 1281.

LOCE, a vil. Hungary Hather Dunube, co. Neograd, about 10 m. from Baskali with a R. Catholic church. Pop. 1090.

LOD, two vils. Hungary, Thither Danube, co. Vasprim —1, (Kse), 12 m. from Vasprim, with a church, manufactures of all kinds of articles in wood, an iron and a flour mill, and a trade in corn and fruit. P. 1388.—2, (Varte), 12 m. from Vasprim, on the Torna, with a church and manufactures of wooden articles, a brewery saw and flour mills, and a trade in corn, hemp, fax potatoes and malice; coal, ironstone, and arsenic, are worked in the vicinity. P. 1767.

LODDINGTON two par. Eng. Leicesters. 1840 ac. Pop. 112—2 Northampton, 1234 ac. Pop. 279.

LODDISWELL, par. Eng. Devon 2568 ac. P. 948.

LODDON—1, a market in and par. Eng. co. Norfolk, on the Glot, an affluent of the Yare 10 m. S.E. Norwich. It consists of a single street and has a handsome parish church, with an embattled tower, and a beautiful window of stained glass; a Wesleyan and a Primitive Methodist chapel, a national school, malice, a weekly corn market, and four annual fairs. Area of par. 2026 ac. Pop. 1311.—2, A river, England, rises in co. Hants. flows S.W.E., and enters the Thames, 6 m. N.E. Reading, takes course about 80 m.—3, A river, England, so. Hereford, a tributary of the Frome.—4, (or Zarnepet), a river Australia, in Victoria, which flows westerly N., and enters the Murray, in lat. 25° 37' S.; lon. 145° 40' E. **LODELLINAKT**, a vil. and com. prov. Hainaut, about 22 m. E. Mons, with important glass-works; manufactures of silk, a brewery a flour-mill, and malice-mills. Pop. 1716.

LODERS, par. Eng. Dorset; 2441 ac. Pop. 966.

LODEVE [anc. *Forum Narocis Aresomandis*], a town, France, dep. Herault, in a pretty valley, at the foot of the Cevennes, on bank Rhodane, here spanned by a handsome bridge, 20 m. W.W. Montpellier. It is walled, poorly and irregularly built, has an old cathedral church, containing a fine mosaic of white marble important manufactures of army clothing, and of woollen stuff, hosiery, soap, and wax candles, and a trade in woollens, wine, honey, almonds, &c. Lodeve possesses mineral springs, which were once much resorted to, but have been almost deserted since the discovery of the thermal spring of Salernes. In the vicinity is a grotto with fine stalactites. Pop. 10,372.

LODI—1, A town Italy; Lombardy cap. prov. of same name, in a fertile plain, on a gentle height, above r. bank Adda here crossed by a wooden bridge, 16 m. S.E. Milan. It consists of the town proper, surrounded by ancient walls, with four gates and of eight suburbs. It is well built, has several spacious, well-formed streets, and a very handsome square, lined with arcades. The principal buildings are the Duomo or cathedral a Gothic structure of the 12th century of limited dimensions, but very pure in its style of architecture, and possessed of a very curious carved and several fine frescoes; the church of the Incoronata, in the form of an octagon, after an elegant design by Giovanni Battista; a native architect, the townhouse a simple but handsome building, the Episcopal palace, the Berni and Martini palaces the theatre lyceum, and gymnasium diocesan seminary, and several other schools the English female institute, public library old castle, and two hospitals, both handsome and well endowed. The manufactures consist of majolica and delftware; refined wax, silkworm, and chemical products. The great article of trade is Parmesan cheese, which, though it takes its name from Parma, from which it was first exported, is almost wholly made in the district around Lodi, and employs the milk of more than 80,000 cows. Lodi is the seat of a bishop the seat of a civil criminal and mercantile court of first resort, and of several public offices. It is a comparatively modern city, having been built in the 12th century about 6 m. from the site of Lodi Vecchio, which had risen to some importance under the Romans, under the name of La Focculina, but was entirely destroyed in 1135 by the Milanese. The only antiquities which the present town possesses, consist of inscriptions and other remains transported from Lodi Vecchio.

In 1796, the French defeated the Austrians at the bridge of Lodi. Pop. 15,709.—The province of Lodi, also called *Lodi e Cremona*, is bounded N. by those of Milan and Bergamo, W. Milan and Pavia, S. the duchy of Parma, from which it is separated by the Po, and E. Cremona area. 247 geo. sq. m. It consists of gently undulating plains, well watered by the Lambro in the W., the Adda in the centre, the Serio in the E., and the Po in the S., and of remarkable fertility producing in abundance corn, wine, fax, and fruit and more especially the rich and peculiarly flavoured grass, from which the greater part of the cheese, known in commerce under the name of Parmesan, is made. The manufactures are almost confined to human and cordage, and the chief trade is in Parmesan cheese, and another cheese called Stracchino, which, though less known, is considered superior. For administrative purposes, the province is divided into nine districts—Lodi, the capital, Pavia, San Angelo, Bughesio Castel Pusterungio, Codogno, Piacenza, and two districts which take the common name of Crema. Pop. (1846) 218,844.—2 (Lodi-Vecchio) A vil. and com. Italy, Lombardy prov. and 3 m. W. Lodi on the Salzo occupying the site of the ancient Laus Pompeia. It has a church an oil mill, and a trade in cheese. Pop. 8217.

LODOMERIA (KRONOPOL) See GALICIA.

LODOSIA, a town, Spain, Navarre, 41 m. S.W. by S. Pamplona, 1 bank Ebro, here crossed by a stone bridge. It has a parish church, townhouse, two schools, a bell-ringing, and manufactures of soap and brandy. Pop. 2283.

LODSWORTH, par. Eng. Sussex; 1205 ac. P. 661.

LOEAN, or **LOWAN**, an Ind. Indian Archipelago, between Timor and Timor Laut, lat. 8° 10' S.; lon. 128° 30' E. It is surrounded by a reef, about 10 miles in extent of a lofty mountain, visible at a great distance, and is several miles in extent. A harbor trade is carried on with merchandise, who visit the island, in ships and boats, and are being given in exchange for needed articles.

LOEHOE, Loochoo, or Loosoo, a native state, Isl. Oshien, occupying the N. part of the Gulf of Bond, and one of the greatest and most highly kingdom in the island. Its capital of same name, lies on a bay, on the W side of the Gulf; lat. 2° 54' S. Gold, iron, and steel are found; and the inhabitants prepare a great variety of excellent handiwork, and other articles in iron, which are sent to Macassar and to the neighbouring islands. The ang-pale is the chief vegetable product of Loochoo. (Van der A.)

LOENEN, a wall built by Holland, prov. and 14 m. N.W. Utrecht, on the Yeicht, with a church and school. Pop. 905.

LOEVHOUT a vil. and com. Belgium, prov. and 17 m. N.E. Antwerp, on the Little Aa with manufactures of tobacco, brick works, several mills, and a trade in corn, cattle, and timber. Pop. 1748.

LOEWANG and LOEWANG ISLANDS. See **LOMAR LOFFENAU**, a tn. Württemberg, circle Schwarzwald, bail. Nesselburg on W side of Black Forest, in a deep valley, enclosed by lofty precipices, and watered by numerous mountain torrents rushing down to the Murg. It has a parish church. Pop. 1093.

LOFFINGEN a tn. Baden, Lake circle among the mountains of the Black Forest, 41 m. N.W. Konstanz. It contains a townhouse and school-house. Pop. 1191.

LOFO, a small isl. entrance to the Gulf of Botnia, and N.W. ad. Åland, to which group it belongs. Preliminary of peace between Russia and Sweden were signed here in 1718.

LOFODDEN or LOFODEN, a group of isls. off N.W. coast Norway. Lat. 67° 50' to 69° 30' N. and lon. 12° and 16° E. and stretching W to N.E. about 175 m. The largest are Anden, Langen, Hindoen, E. and W. Vaguen and Flinstadén. They have almost all bold precipitous, rugged, and deeply indented coasts, and an elevated and very stony interior, several of them containing mountains, which though not very lofty, are covered with perpetual snow. These mountains, and the rocks generally are composed of porphyry basalt, and primitive schists. The coasts only of the islands are inhabited, and contain some traces under such cultivation as the rigour and uncertainty of the climate will admit, but the chief value of the whole group is derived from the immense shoals of cod and herring which frequent them, and the excellent and valuable fishery which are consequently carried on at the proper seasons. In January, fishermen from all parts of the coast, from Finnmark, Trondhjem, and Bergen assemble by thousands, and take up their stations along the islands, to await the fish which set in from the ocean in the beginning of February and occupy the banks of the W. Fjord, a large arm of the sea, extending between the chains of islands and the mainland. In ordinary years, about 3000 boats, each manned by five hands, or 15,000 in all, are employed, and the produce in cod is about 9000 tons dried fish, 22,000 barrels of oil, and 6000 barrels cod. The principal cod-fishery ends in April, but the herring-fishery continues, and furnishes an important branch of national revenue. Permanent pop. about 4000.

LOFTHOUSE, par. Eng. co. York (N. Riding), 2825 ac. Pop. 1102.

LOFTSA, a vil. Sweden, Hls. Wasterås, near the source of a stream of same name, 25 m. W.N.W. Upsala. It has a handsome church, and a number of well built houses, particularly those connected with the iron-works, which are among the most extensive, and make this one of the principal iron works in Sweden. The manor-house contains a library, and some good paintings.

LOFTSCHE, or LOVATZ, a tn. Turkey in Europe, prov. Bulgaria, 252 m. N.W. Constantinople lat. 45° 10' N.; lon. 24° 50' E., intersected by the Ouza, which is here crossed by a large bridge. It is surrounded by a low, earthen wall, and a small ditch. Pop. 5000.

LOGAN MOUNTAINS, a range of E. Australia, in the dist. of Darling Downs, forming the watershed between the Darling and the Logan, some lat. 28° S.; lon. 155° E. One of its culminating peaks, called Mount Robinson, has a height of 6700 ft., and gives rise both to the Clarence and the Logan. The latter river pursues a very circuitous course, first W., and then N.W., and falls into the sea S. of Houtman Bay, opposite Shrove Island. Its principal affluents are the Albert on the right, and the Tivoli on the left. It is partly navigable.

LOGANSPORT, a vil., U. States, Indiana, 79 m. N. by W. Indianapolis, at the junction of the Wabash and Red Rivers, each of which is here crossed by a handsome bridge. It contains a courthouse, jail, and six churches. Pop. 1500.

LOGANZEHY, a tn., W. Africa, N. of Dahomey; lat. 8° 55' N.; lon. 2° 10' E. It is strongly fenced, has an inner wall, and a large outer and inner market, well supplied with native produce and manufactures. Rice, millet, and the guinea, a kind of heart, are also sold in great numbers. Nearly one side of the principal square is occupied by corn-mills, at which young female slaves are employed grinding corn. The whole is covered in with a roof neatly thatched. Pop. 5000 to 6000.

LOGGIA (La), a vil. and com. Italy Lombardy, div. Turin, 2 m. from Carignano; with a church and a primary school. Pop. 1348.

LOGGUN, a country, Central Africa, situated S. of Lake Tchad, and intersected by the Shary. The climate is said to be healthy, and the soil fertile. The natives have a name for manufacturing and drying cotton goods.

LOGHILL, par. Irrel. Lincolshire lat. 51° 54' N. 61° 15' W. A strong hill of Hilsington, prov. Down, par. Armagh, 80 m. N.W. Fenchal lat. 18° 41' N. lon. 73° 57' E.; upon a perpendicular and almost impassable height. The magnesian are excavated in the rock, and are extensive. The fort is supplied with water by numerous tanks, and springs which issue from the rock above. It was taken by the British in 1818.

LOGIE, seven par. Scot. 1.—1. Fife 8249 ac. P. 457 —2, Stirling 12 600 ac. P. 2561. —3, (Buchan) Aberdeen 6413 ac. P. 714 —4, (Galloway) Aberdeen, 5 m. by 54 m. P. 989. —5, (Dundee) 10 m. by 5 m. P. 935. (Perth) Forfar 5196 ac. P. 1602. —7, (Ross), Perth 37,411 ac. P. 2875.

LOGGINI, a small seaport, E. coast Sicily, prov. and 6 m. S.E.W. Syracuse, formed by a large rock joined to the mainland by a reef. It used to be often visited, on predatory excursions, by the Barbary corsairs.

LOGO or Loko, a dist. W. Africa, N.E. from Sierra Leone. It is naturally very fertile, and capable of producing abundant crops of rice. The capital Porto Logo, lat. 6° 40' N. lon. 12° 35' W., is a neat town, rather picturesque in its appearance, extending along the elevated banks of a creek formed by the rivulet Logo.

LOGROÑO a prov. Spain, Old Castile, lat. 41° 55' to 42° 15' N. lon. 1° 45' to 2° 14' W.; bounded N. by provs. Alava and Navarra, E. by Navarra, S.E. by Borne, and W. by Burgos, area, 2378 sq. m. In the N. parts bordering the Ebro, it is level and highly fertile, producing heavy crops of grain, abounding in fruits and vegetables of every description, yielding wine and oil of superior quality and destitute of considerable numbers of sheep, goats, horned cattle, horses, and mules, whilst the E. portions, traversed by the Sierra de Guadalupe, which also forms the boundary towards prov. Biscaya, are generally barren and little wooded, except in the lower parts, but they abound in copper, antimony, iron, tin, coal, building-stone, marble, &c. The province belongs to the basin of the Ebro, which forms its N. boundary, and is traversed, S. to N., by many affluents of that river, the chief of which are the Tiron, Oja, Magarito, Cidacos, and Alhama. The manufactures, which are very limited, consist of linen, woollen, hempen, and cotton fabrics soap, saccharine, tannery, agricultural implements, wine-work, cordage, shoes, hats, &c. Pop. 135,518.

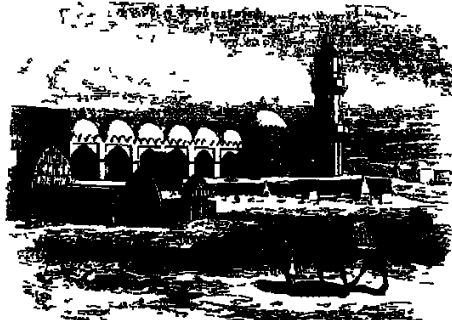

LOGROÑO, a city, Spain, esp. above prov. 168 m. N.E. Madrid, r. bank Ebro, here crossed by a handsome stone bridge. It is well built, walled, and overlooked by the remains of an old castle, has five squares, and wide, paved, but badly kept streets; a college, and five parish churches, three convents, two hospitals, towns and mansion houses, a prison, theatre, Jesuit college, several schools, an orphan asylum, literary and scientific associations, and other useful and benevolent institutions; and manufactures of linen, woollen, and hempen fabrics, hats, cards, leather, candles, soap, knavery, wine, oil, and vinegar. Logroño was twice taken by the French in 1808. Pop. 38,446.

LOGROBÁN, a tn. Spain, Extremadura, prov. and 54 m. S.E.E. Cáceres. It has a large square, a parish church, townhouse, prison, two schools, a townhouse, and manufactures of linen and coarse cloth. Pop. 3596.

LOGSTON, a vil. Denmark, Jutland, tall and 26 m. W N. W. Aalborg, on the Limfjorden. The shallows in the fiord, in front of the town, oblige vessels of burden to unload or lighten their cargo on approaching it, and thus secure to it a considerable tonnage trade. The inhabitants not thus employed live chiefly by fishing. It has a considerable annual fair. Pop. 800.

LOGURH, —1, A vil. Afghanistan, esp. dist., and on a river of same name, 18 m. S.E.E. Cabool. The durruah, extending up the N slope of the high land of Ghaznee, has an average height of more than 9000 ft.; but is fertile, well-watered, and well-irrigated.—2, A river, which rises in a volcanic district to the W of Ghaznee, flows first W., just that town, then circuitously N.E. and, after a course of about 80 m. joins r. bank Cabool, about 10 m. below the town of Cabool, nearly doubling its volume.

LOHRIA, a mæp. Arabia, the most N in Yemen, lat. 15° 45' N. It stands on a sandy tongue of land, running S, and so low, that if, at spring tides, the wind blows from the S, the isthmus connecting the town with the mainland is liable to be overflown by the sea. This however occurs, on an average, but once a year. The Bay of Lobos, though capacious, forms but an indifferent harbour, being so shallow that at the ebb—and the tide here rises but 4 ft.—even small boats cannot, if laden, approach the shore. The country around is like the coast of the Tethys in general, remarkably dry and barren, yet, notwithstanding these disadvantages, a town sprang up here towards the end of the 16th century, round the tomb of a saint; and, owing to the influence of the saint's posterity, and some convenience of position, attained, in the course of years a high degree of commercial prosperity.

MOSQUE at LOHEIA.—From Hedd's History and Gazetteer of Bombay.

A few houses are built of coral rock, but most of the dwellings are huts constructed of boughs, and covered with matting. The water is bad and very dear, being brought from a distance of some leagues. Nearly all the inhabitants of Loheia, of the better class, are coffee merchants; to these may be added about 40 Banyas, mostly poor artisans, or the clerks and agents of Indian merchants. Ordinarily the coffee at this port is inferior to that brought down to Moeha; but being cheaper, and somewhat nearer to Egypt, it meets with a ready sale. Pop. about 4000. —(Niebuhr, *Deser. de l'Arabie*.)

LOHEIA, a vil. Saxony, circle and 12 m. E.S.E. Dresden, on the Wesera with a castle, manufactures of tin and tinware, three mills, and quarries of building-stone. P. 1097.

LOHR, a m. Bavaria, Lower Franconia, esp. dist., r. bank Main, at the confluence of the Lohr and Reichenbach, which are here crossed by bridges, 79 m. N.W. Nürnberg. It has a court of justice and several public offices, three churches, a castle, a Latin school, a Capuchin almshouse, an hospital, manufactures of ironware, leather, paper, and glass, a salubrious building-yard, some shipping an extensive trade, particularly in timber, and numerous mills. Pop. 5714. Area of dist., 80 sq. m. Pop. 14,944.

LOIRE [anc. *Lodovus*], a river, France, which rises 22 m. S.W. Angers, dep. Maine, flows N.W. some 40 leagues, in which, from its opposite banks, it supplies the two canals of Briare and Loing, and in dep. Maine-et-Marne, 12 m. S.E. Melun, joins l. bank Seine; total course, about 25 m., much used for floating timber in the upper part, but in the lower part nearly absorbed by the canal.

LOIRE [anc. *Lodovus*], a river France, which rises in dep. Eure-et-Loir, in a range of hills which, stretching E and W, forms the watershed between the basins of the Seine and the Loir. It first flows generally S.E. for a few miles, then turns S.W., crosses dep. Loir-et-Cher, the S. part of dep. Sarthe, enters dep. Maine-et-Loire, and joins l. bank Sarthe, a little above the junction of the latter with the Mayenne, and 7 m. N. Angers, total course about 150 m. of which 80 m. are navigable. Its principal affluents are on the right, the Oudon and Braye, on the left, the Coule, Long, and Maine.

LOIRE-et-CHEER, a central dep. France, bounded N by dep. Eure-et-Loir, N.E. and E by Loir-et-Cher, S.E. by Cher, S. by Indre and W by Indre-et-Loire and Sarthe; lat. 47° 14' to 48° 10' N. lon. 0° 50' to 1° 20' E. longest length, N. to S.W. 84 m., average breadth, measured nearly along the Loire, 32 m., area, 2369 sq. m. It consists almost entirely of extensive plains, having a slope, however S.W., only in dictated by the course of its rivers. The Loire, to the basin of which the whole department belongs, traverses it centrally, receiving the Cosson and Beuvron, the Loir, with its tributary the Bray, whereas its N. and the Cher, with its tributary the Saire, its S. portion. These three principal rivers have all a W. direction, and are all navigable. The whole department belongs to the cretaceous formation, and is not rich in minerals. There are some mines of iron, quarries of alabaster and building-stone, excellent marl and potter's clay; but perhaps the most important of the mineral products of the department is, or rather was, its flints, which, before the invention of porcelaneous cups supplied the markets of France and a great part of Europe. The soil is generally fertile. More than one-half of the whole is arable, and less than one-eighth waste. The latter, which consists of sandy tracts mingled with gravel and flints, and a minute portion of vegetable mould, contains a vast number of small lakes or ponds, and, where altogether unfit for cultivation is tolerably well covered with pines. On the far larger fertile tracts, the chief products are cereals of all kinds, hemp, of fine quality, beet root, for sugar the ordinary fruits, and wine, both red and white, generally of good name, more particularly the red wine of Ciron, Chanton, and Côte-du-Cher, and the white wines of Nécé and Marbais. The pastures and meadows are excellent and extensive, and rear great numbers of horses, cattle, and sheep. The chief manufactures are coarse woolen clothes, worsted, fustians, molasses, cottons, hosiery, leather, leather gloves, native sugar, glass, gun flints, pyrotechny, and excise-ware. The trade, which is considerable, includes the articles now mentioned corn, wine, brandy, and wool; and derives great facilities from navigable streams, and from the Cher Canal. In the time of Caesar, this department was inhabited by the Turones, Carantes, and Aulerni. In the reign of Charlemagne the Stimpie, it fell into the hands of the Count of Chartres, one of whose successors sold it, in 1391, to the Duke of Orleans, afterwards Louis XII. It was thus united to the crown as the county of Blois, and became the frequent residence of the court a circumstance which accounts for the remarkable number of chateaux with which the department abounds, and probably, also, for the superiority of the language of its inhabitants. It is said that in no part of France is French spoken in greater purity than in the town and neighbourhood of Blois, which was the seat, and is also the modern capital. For administrative purposes, Loir-et-Cher is divided into three arrondissements—Blois, Romorantin, and Vendôme—subdivided into 24 cantons and 295 communes. Pop. (1862), 261,583.

LOIRE (see *Lige*), one of the principal rivers of France, which it divides into two nearly equal portions, traversing it almost throughout its whole extent, S. E. to N. W. It rises on the W. slope of the Cevennes, in the Gâtinais des Juncs, dep. Ardèche, about 30 m. W. by N. Privas, and flows generally N. and N. W. through depts. Haute-Loire, Maine-et-Loire, Mayenne, Sarthe, Eure-et-Loir, and Normandy. At the town of Orléans, the course changes to S. W., a direction it maintains till it falls into the Bay of Biscay, below Nantes. In the latter part of its course, it flows through depts. Loire-et-Cher, Indre-et-Loire, Maine-et-Loire, and Loire-Inférieure, and passes the towns of Blois, Tours, and Nantes. At Digoin, in dep. Allier, it is crossed by the Canal du Centre. In its course it receives the Arzon on the r., in dep. Maine-et-Loire, and nearly opposite, from the l., the Oudle and Beure, from dep. Allier, and in dep. Sarthe it receives, on the l., the Allier which almost doubles its volume, on the borders of depts. Indre-et-Loire and Maine-et-Loire, it receives the Vienne, its second great tributary and also on the l. near the centre of the last-named dep. It is greatly augmented by the Mayenne, which joins it on the r.; bearing in its flood the united waters, likewise, of the Loir and Sarthe. Other two smaller streams, the Endre, and the Sevre-Nantaise, join it at Nantes, one coming from either side. Below Nantes, where it first feels the influence of the tide, it is more an estuary than a river. It becomes studded with islands, and shortly after pours its mighty flood into the Bay of Biscay about 3 m. below Falmouth. The whole course of this majestic river is about 600 m. It first becomes navigable at Norcia, but only for vessels following the course of the stream, and not upwards, without tracking. The navigation properly begins about 46 m. lower at Rouen, about 450 m. above its mouth. In the lower part of its course, the navigation is very much interrupted by shifting sands. The river is also much subject to inundations, which have, on many occasions, committed fearful ravages and the danger of which, notwithstanding the expensive measures intended to guard against it, cannot yet be considered as entirely removed. At the commencement of its course, the Loire flows through a wild and romantic country and has all the characteristics of an impetuous mountain torrent. As it descends its valley widens out, forming extensive plains, so richly covered with orchards, vineyards, and corn-fields, that they have justly received the name of the garden of France. The basin of the Loire has been estimated at one-fourth of the whole surface of the kingdom or about 50,000 sq. m.

LOIRE, a central dep. France, bounded N. by dep. Maine-et-Loire, E. by dep. Rhône and river Rhone, the latter separating it from Loire, S. by depts. Ardèche and Haute-Loire, and W. by depts. Puy-de-Dôme and Allier; lat. 45° 14' to 46° 17' N. lon 3° 45' to 4° 45' E. 56 m. N. to S., and 32 m. E. to W., area 1805 sq. m. The department is traversed centrally, N. to S., by the Loire, into which, and a few smaller tributaries, its waters flow and consists of the fertile plains which extend on both sides of that river forming its valley, and long ridges of the Cevennes, which hem the valley in on every side. The only modification that must be made to this description is in the S. E., where the Bléaux form the boundary and receive the waters of the E. side of Mount Pilate. The highest summit of that mountain, about 1500 ft. above its base, and 3965 ft. above the level of the sea, is the culminating point of the department. The next highest two are Pierre-sur-Haute, in the W. 3883 ft. and Madeline, 2820 ft. Many of the mountains are covered with verdure to their summits, and feed large numbers of cattle, from the dairy produce of which excellent cheese is made, but many of them, also, particularly in the neighbourhood of Frons, are evidently volcanic, though exhibiting none of the lava and cinder which characterize those of the Vosges, Velay, and Auvergne. Here they consist of black, heavy, compact basalt, sometimes columnar and frequently terminating in lofty peaks or cones. This basalt, by exposure to the air, takes a dark gray color and decomposes into a blackish silty clay, forming a soil of great fertility. On the mountain-slopes fine chestnuts are grown, well known in commerce as the chestnuts of Lyons. Above one-half of the surface is arable, rather less than one-fourth is waste, about one-third is meadows, gardens, orchards, vineyards, woodland. The chief agricultural products are wheat, rye, barley, oats, hemp, and potatoes.

The last and chestnut form a principal article of food among the lower classes. A good deal of wine is produced, but ranks only as the *vin ordinaire* of the first quality. There are several extensive forests, chiefly confined to the mountains, producing fine glass, fir, beech, and oak. Iron and lead are wrought to a limited, and coals to a large extent, part of the department being in the coal-field of the Loire, the most important in France. Iron is smelted, and extensively manufactured into articles of hardware, especially muskets and cutlery; silk, ribbons, crapes, velvets, flon and cotton goods, porcelain, and common earthenware are made, and glass keeps numerous furnaces in constant operation. Many of the articles enumerated form important branches of export trade. Loire was anciently inhabited by the Segusiata, and afterwards included in the Roman province *Legumensis* (Lyonnaise). At a later period, it took the name of *Foras*, of which Frons was the capital, and formed an independence which was long governed by its own Counts. Ultimately, in the reign of Francis I., it was united to the crown of France. For administrative purposes, Loire is divided into three arrondissements—Montbrison the capital, Roanne and St. Etienne—and subdivided into 28 cantons and 319 communes. Pop. (1858), 473,588.

LOIRE (HAUTE) (Upper Loire) a dep. France, bounded N. by depts. Puy-de-Dôme and Loire, E. by Loire and Ardèche, S. by Ardèche and Loire, W. by Loire and Cantal, lat. 44° 45' to 46° 15' N.; lon 1° 10' to 4° 27' E. 98 m. W. to E., 41 m. N. to S., area, 1900 sq. m. It is surrounded on all sides by lofty mountains, which belong to the Cevennes, and also send off a branch from the S., which intersecting the dep. centrally, forms the watershed between the Loire and the Allier, whose valleys, accordingly share the for greater part of the surface between them, and are furrowed by numerous small tributaries hastening on to join their main channels. All the mountains are volcanic; those on the E. side, commencing at Mount Meaume, and stretching N. to St. Maurice, consisting chiefly of trachyte, the others of basalt. The intervening plateaus and valleys are covered by large collections of debris from the mountains or filled with scoriae, and not infrequently beds of clay, silt, and marl, he curiously intermingled with them. Where the basaltic lava prevails, its decomposition has furnished a soil of greater or less depth, but invariably of great fertility. The loftier mountains are generally covered with forests, in which wild boars, wolves, foxes, wild cats, deer, and many varieties of smaller game abound, or with verdant pastures on which large herds of cattle and mules are reared. On some of the lower slopes magnificent chestnuts grow spontaneously and wheat, also, by careful cultivation, are generally made to thrive. The soil of the plains and valleys is generally fertile, and favours the growth of all the ordinary crops. Notwithstanding the rugged nature of the country, the extent of waste land is considerably under one-fifth of the whole while nearly three-fourths are available either for the plough, or for meadows, gardens, orchards, and vineyards. About one-seventh is under wood. The minerals are apparently of little economic value. Traces of copper have been found, and iron is known to exist; but the only metals actually worked are lead and antimony, each by a single mine. The rock of the coal formation appears in several districts, and a little coal is raised. Garnets, anorthite, tourmaline, and other precious stones, are not uncommon. The only manufactures are sparse woollen stuffs, ribbons, leather, bells for milkmaids, bricks and tiles, earthenware and lace, the last chiefly in the hands of females of the poorer class, who do the work at their own houses. About 5000 workmen annually leave the department, and after an absence of six months return with their gains, not exceeding, on an average, 25 per head. Haute-Loire, in the time of Cæsar, was inhabited by the *Vedici*, and formed part of the Roman prov. *Aquitanica Prima*. In the 5th century it fell under the dominion of the Visigoths, and, a century after, under that of the Franks. At a later period it belonged to the Counts of Toulouse, and, in the 12th century, passed with the rest of Languedoc, to the crown of France. For administrative purposes, this dep. is divided into three arrondissements—Le Puy, the capital, Brioude and Yssandon—and subdivided into 28 cantons and 255 communes. Pop. (1858) 359,915.

LOIRE-INFÉRIEURE (Lower Loire), a W. maritime dep. of France, bounded, N. by dep. Ille-et-Vilaine, N. W. by

dep. Morbihan, W by the Bay of Biscay, S. by Vendée, and E by Maine-et-Loire; lat. 46° 58' to 47° 38' N. lon. 0° 55' to 1° 30' W., 65 m. N. to S., and 55 m. E. to W.; area, 2565 sq. m. The surface of this department is flat, occasionally broken by gentle undulations, but without any lofty eminences and is furrowed by numerous streams. The coast has an extent of about 50 m.; and is much indented, lying exposed to the billows of the Bay of Biscay which are continually making considerable inroads on it, and forming extensive salt marshes. In the N. and N.W. portion of the department, the rocks consist of granite, mica slate, quartz, and gneiss; in the E. and S.E., the formation is secondary, and the coal measures are considerably developed. Several collieries, accordingly, are in active operation, and their output, besides supplying domestic wants furnishes fuel to numerous iron works, employed in smelting the bog iron-ore which occurs in extensive seams within the department, and carrying on other processes of the iron manufacture. Lead, and traces of copper have been found; but no other mineral, in addition to those mentioned, is worked, except kaolin, which the decomposed granite furnishes in considerable abundance. The great river is the Loire, which traverses the department E to W., and discharges itself into the Bay of Biscay. The other navigable rivers are the Vilaine, which for a short distance, separates this department from those of Ille-et-Vilaine and Morbihan, the Maine, Moine, Erdre, Tenaie, Drivé, Boulogne, and Oignon. Lagoons and lakes are very numerous. The largest is Grandlieu, which has an area of 84 sq. m. Both lakes and rivers, as well as the sea-coast, abound with fish, and employ a great number of hands. About one-fifth of the whole surface is waste, consisting of sterile sand or brack. Nearly one-half is arable. The rest of the land is occupied with meadows, vineyards, orchards, gardens, and wood. Rain falls much more frequently than in the interior and the variations of temperature are both great and sudden. Winter is comparatively mild, but the heats of summer are often so excessive as to be almost tropical. The manufactures consist principally of woollen, linen, and cotton stuffs, ticks, and serge. Ship-building also, is carried on to a considerable extent in all its departments, including the manufacture of coracles, galleys, anchors, and whatever is necessary for the complete equipment of vessels. Iron-works have been already mentioned. To these may be added—tanneries, glass-works, potteries, and paper-mills. Both the internal and coasting trade is very important. The foreign trade is chiefly to Spain, Portugal, Holland, the N. of Europe and Senegal. A good many vessels are employed in the whale, cod, herring, mackerel and sardine fisheries. A great proportion of the inhabitants cannot read; and the belief in ghosts and witchcraft is so very general, that almost every individual has his tale of wonder. The greater part of the original inhabitants of this department were the hannetes, considered to be of the American stock: those on the E. bank of the Loire were Pictons or Pictonnais. About the middle of the 6th century, a great number of the inhabitants of Great Britain, expelled by the Saxons, took refuge here, and formed the kingdom of Brittany. Under the sons of Clovis, the kingdom was broken up, and partitioned among princes, who took the title of counts. Almost the whole of the department was included in the county of Nantes, which along with the rest of Brittany was united to the crown of France at the beginning of the 16th century. Loire-inférieure, for administrative purposes, is divided into five arrondissements—Nantes (the capital), Ancenis, Chantenay, Falmout, and Savenay—and subdivided into 45 cantons and 266 communes. Pop. (1826), 588,664.

LOIRET, a small river, France, which gives its name to a department. It rises about 5 m. S.E. Orleans. It shortly after receives several small streams, and becomes navigable. Its whole course is little more than 7 m., but the quantity of water carried by it to the Loire, which it joins on its E. bank, is great. Up till the Loire it never freezes, a circumstance, probably owing to the high temperature of its springs, and traced to a bottom by the brimstone of Orleans, viz., in winter, water is the medium for their escape.

LOIRET, a central dep. France, bounded, N. by dep. Seine-et-Oise and Seine-et-Marne, E. by Yonne and Nièvre, S. by Loiret-Charente (Charente), and W. by Eure-et-Loire; lat. 47° 30' to 48° 30' N.; lon. 1° 30' to 2° 30' E., 35 m. E. to W., and

50 m. N. to S., area, 1551 sq. m. The surface is partly flat, partly undulating, with nothing that deserves the name of mountain, and scarcely even any hills, except a low ridge, which stretches across its centre, occupied partly by the forest of Orleans and forming, in the E., the watershed between the basins of the Seine and the Loire. The latter river, traversing the department E. to W., divides it into two unequal portions, of which the features are very different. The smaller portion, on the S. bank, forms part of the ancient Sologne, and is a black, sandy, sterile tract, with occasional patches of vineyards; the N., and larger portion, forms part of what is known as the garden of France, consisting of fertile and well-cultivated plains, extensive forests, fine meadows and pastures. The rivers, in addition to the Loire are its tributary, the Loir, from which the department takes its name, and the Loue and the Ouse, tributaries of the Senna. The water communication is much extended by the canals of Orleans, Loir, and Briare. The climate is temperate and healthy, but, owing to exhalations from the rivers, canals, and a vast number of small lakes, of which 900 are counted, some districts are subject to fever and ague. About one-twelfth of the whole surface is waste, one-seventh in wood, one-twentieth vineyard, and considerably more than one-half arable land, generally of remarkable fertility, and admirably adapted for the growth of wheat, which forms the principal crop, and besides supplying the home consumption, is largely exported. A crop, almost peculiar to some of the N. cantons, is saffron. The minute attention which its culture requires employs a great number of persons, old and young. The vine is extensively cultivated, but none of the white bears a high name. Various fruits, of the quality, are raised, and, when dried, form a considerable article of commerce. There are several extensive forests, particularly those of Orleans and Montargis. The former is about 50 m. long by 15 m. broad—including however several open tracks, with villages and hamlets the latter is nearly 6 m. long and as many broad. The principal trees are oak, beech, birch, elm, and chestnut. Cattle are generally of good breeds, sheep still in great want of improvement. An important branch of rural economy is the rearing of bees. Manufactures have made little progress, but the admirable water communication of the department, and its position, secure it an important trade, which centres at Orleans. It consists in corn, flour, wine, vinegar, bread, groceries, drugs, fruit, cider, fish, honey, taffeta, wool, cattle, wood and charcoal for fuel ship timber &c. The ancient inhabitants of the department were the Aurellani and Senones. It afterwards formed part of the empire of Clovis, and, on its dissolution, was included in the kingdom of Orleans one of the four into which that empire was divided. It was still mainly united to the French crown by Hugh Capet. Loiret, for administrative purposes, is divided into four arrondissements—Orleans, the capital, Gien, Montargis, Fithiviers—and is subdivided into 51 cantons and 348 communes. Pop. (1826) 841,029.

LOISACH, a river Germany, which rises in the N. of the Tyrol a little to the E. of Thell, flows N. N. E., enters Bavaria, expands into the Kochee sea and joins a bank lake near Wolfshausen, after a course of nearly 90 m. It is much used for Soaking.

LOITZ, a tn. in Prussia, prov. Posen, gov. and 38 m. S. Stuhlsend, 1st bank Posen, with a court of justice, a church, two mills and a trade in corn and cattle. Pop. 2315.

LOJA, a tn. Spain, Andalusia, prov. and 25 m. W. S.W. Granada, in a deep and beautiful valley traversed by the Genil, and enclosed by two mountain ranges. It consists, for the most part, of steep, irregular streets, lined by indifferent houses and of two larger squares and three smaller ones, in which some of the buildings are of respectable appearance and has three parish churches, one of them an ancient structure, with a fine monument; three suppressed monasteries, a nursery an elegant manufactory, consisting of three rows, divided by two rows of Doric columns; a seminary, with a Doric gallery of five arches a townhouse, several endowed schools, an hospital; manufactures of silk, linen, and hampage goods, leather, shoeleather, and earthenware, dye-works, extensive salt-works, a copper, three paper, and numerous oil and flour mills. Loja appears, from the coins and other antiquities found in it, to have been an important Roman station. Under the Moors, it was defended by a castle, which, as well as the

town, was taken by assault in 1526, by Francesco III. without much loss during the harvest of the Po. P. 15,365.

LANIANO, a town, Italy, 1830, and 10 m. S. of Udine, on an elevated site, from which a striking and extensive view is obtained, ranging along the chain of the distant Alps, and embracing a considerable portion of the basin of the Po.

LOK (Tuzla), a town in Hungary, on Danube, in a very fertile district, 1 bank Tuzla, 8 m. S.W. Tokay, with two churches, a synagogue, and several fairs. Pop. 2553.

LOMEREN a town and city, Bulgaria, prov. R. Plandov, 12 m. E.N.E. Ghent, on the railway thence to Antwerp, 1 bank Durma. The streets are clean and regular, the market-places large and handsome, and the houses generally well built and commodious. Its public buildings comprise a spacious church, with a lofty tower three stories, a capacious town-house, prison, well-endowed hospital, orphan asylum, numerous schools, and other benevolent institutions and it has manufactures of linen fabrics, fannery, serge, cloth, cotton goods, lace, ropes, hats, tobacco, leather, soap, candles, chimney glass, an iron foundry, breweries, distilleries, salt-works, etc., etc., an active trade in manufactured goods, hemp, cotton, and agricultural produce, and three annual fairs. Pop. 16,138.

LOKHVITSA, a town, Russia, gov. and 89 m. N.W. Poltava, on a small stream of the same name, at its junction with the Dnieper. It contains three churches, has some manufactures of linen and four annual fairs; but the chief employment is agriculture. Pop. 6006.

LOMNITZ, a river, Germany, which rises near Gross-Godden, in Mecklenburg-Schwerin, enters Friesland in prov. Brandenburg, flows N.W. past Lutzen and, about 5 m. below joins 1 bank Elbe, 6 m. above its confluence with the Elbe, after a course of about 35 m., part of which is much used for floating.

LOKUT a vil. Hungary Thither Danube, co. and about 9 m. from Veszprim, in the Bakony-Wald. It has a handsome church, a chateau, and manufactures of glass, potash, and a great variety of articles in wool. Pop. 807.

LOMI ANIZ, an island, see LOLLARA.

LOLLARA a town, India, prov. Gujarat, 23 m. S.E. Rajahmundry, lat. 23° 35' N., lon. 71° 42' E. Pop. 6000.

LOLWORTH par. Eng. Cambridge, 1076 as P. 156.

LOME, or **LOUN** a town, Turkey in Europe, prov. Bulgaria, 20 m. E.N.E. Vidin, 1 bank Danube, near the confluence of the Lom. It is surrounded by palm-trees and a ditch, but contains few houses in proportion to the extent enclosed. Pop. 3000.—The river rises in the mountains which separate Bulgaria from Servia, flows N.N.E. to the Danube, direct course, 50 m.

LOMAGNE (La) (see LOMAGNE) a small dist. France, in the former prov. Gascogne, cap. Lectoure, now included in dep. Haute-Garonne and Gers.

LOMAZY a town in Russian Poland, 27 m. E.N.E. Bakhyn with manufactures of leather. Pop. 3000.

LOMAZZO, a vil. and com. Italy, Lombardy gov. Milan, prov. Como, dist. and about 2 m. S. by E. Appiano, 1 bank Iseo, with two churches, one of which is adorned with an elegant tower and a tower in corn, wine, and silk. P. 2392.

LOMBARDO-VEINETAN KINGDOM, AUSTRIAN LOMBARDO or AUSTRIAN ITALY (German, *Lombardisch-Venetianisches Königreich*, Italian, *Regno Lombardo-Veneto*, French, *Royaume des Lombards-Vénitiens*), an important part of the Austrian dominions, in the N. of Italy, lat. 44° 54' to 46° 51' N., lon. 6° 23' to 15° 27' E.; bounded, N. by Switzerland and the Tyrol, W. by Lake Maggiore and the Ticino, which separates it from the Savoyard States; E. by the Sardeinian States, the duchies of Parma and Modena, and the Papal States, from all of which, with exception of Modena, it is separated by the Po; and E. by the Adriatic Sea and the kingdom of Ilyria. It is divided, administratively into the two governments of Milan, corresponding with Lombardy, and Venice, having for the line of separation the river Minio, which issues from the Lago di Garda, and falls into the Po, S.E. from Mantua. Greatest length, E. to W., 243 m.; greatest breadth in prov. Milan, 106 m., and in prov. Venice, 166 m.; a portion of Tyrol penetrating S. near the centre, at Lake Garda, and reaching the breadth in the locality of Udine; area, 12,300 sq. m. The capital cities are respectively Milan and Venice—the former of which is the residence of

the King, to whom the government of the kingdom is entrusted. The subdivisions, and population, etc., of both governments, are exhibited in the following Table.

Subdivisions, AREA, and POPULATION of the Lombardo-Venetian Kingdom.

| GOVERNMENT OF MILAN | | | |
|---------------------------|--------------------|---------------------|-------------|
| Provinces or Delegations. | Area Sq. M. in. | Population, 1850 | Chief Towns |
| Bergamo | 1,133 | 276,133 | Bergamo. |
| Brescia | 907 | 222,203 | Brescia. |
| Cremona | 826 | 183,293 | Cremona. |
| Lecco | 72 | 80,644 | Lecco. |
| Lodi | 247 | 218,944 | Lodi. |
| Mantua | 629 | 270,110 | Mantua. |
| Milano | 166 | 264,515 | Milano. |
| Pavia | 308 | 171,223 | Pavia. |
| Sondrio | 347 | 80,320 | Sondrio. |
| Total | 6,570 | 1,776,740 | |

| GOVERNMENT OF VENICE | | | |
|----------------------------|--------------------|---------------------|-------------|
| Provinces or Delegations. | Area Sq. M. in. | Population, 1850 | Chief Towns |
| Belluno | 837 | 127,140 | Belluno. |
| Fedria | 826 | 214,758 | Fedria. |
| Verona | 826 | 183,293 | Verona. |
| Treviso | 702 | 264,515 | Treviso. |
| Padua | 1,204 | 422,644 | Padua. |
| Verona | 796 | 224,418 | Verona. |
| Venezia | 317 | 305,928 | Venezia. |
| Vicenza | 813 | 247,064 | Vicenza. |
| Total | 6,508 | 1,801,749 | |
| Total of both Governments. | 13,078 | 3,578,489 | |

The surface consists of a vast plain, lying chiefly along the I. or R. bank, and in some places even below the level of the Po, and ascending N. more or less gradually till it becomes mountainous, and is terminated by lofty ranges of the Alps. It thus consists of two distinct portions: a N. distinguished by the magnificence of the Alpine scenery, and a S., composed of low, level plains, of almost unequalled fertility, but not free from monotony and by no means favourable to health. The mountains in the N. division have a nucleus of granite, partially overlain by primitive crystalline strata of gneiss and mica schist, and succeeded by extensive tracts of Jura limestone. Above this, limestone chalk is seen stretching in a narrow belt between Lakes Maggiore and Isèo and again, after a considerable interruption, extending along the E. shore of Lake Garda, thence E. across the provinces of Verona, Vicenza, and Padua; and finally, N.E., as far as the province of Belluno. There, beds of tertiary marls and sandstones make their appearance, and are, doubtless, continued across the whole of the S. division of the kingdom as they reappear on the S. side of it, though they are completely concealed from the view by the deep deposits of alluvial gravels and alluvial loams which cover the intermediate plains. The W. and S. parts of the kingdom belong to the basin of the Po, which forms its E. boundary, or at least its southern—running from the W. summit of the Ticino, draining Lago Maggiore and, from its interior the Lembra, the Adige, with the tributary Sarca, and bearing the waters of Lake Como, the Oglio, with its tributaries the Mella and Chiese, draining Lake Iseo, and the Minio, which last carries off the waters of Lake Garda. The E. part is shared by several independent basins, of which the most important is the Adige; and, after it, the Ronchiogione, Brenta, Piave, and Tagliamento. All the principal rivers have their mouths on the N. shores of the Adriatic. Its lakes are the largest in Italy, and, being situated chiefly in the N. and W., where the surface is finely diversified, are much celebrated for the beauty of their scenery. The most important are Garda, Iseo, Isèo, and Como, all wholly within Lombardy; Legnano, and Maggiore; the former less in it than in Switzerland; and the latter common to Lombardy, Switzerland, and the Sardeinian States.

Advantage has been taken of the level nature of the country in the great plain of Lombardy, chiefly occupied within the government of Milan and the Venetian province of Verona, and of the relative position of the lakes and rivers, to establish an extensive and most complete and efficient system of canals of irrigation. About one-sixth of the whole plain

is irrigated, and about one-fifth of its productive area; the rate of the area of irrigation decreasing progressively from W. to E. Between the Ticino and Adda, about nine-tenths of the surface are irrigated; between the Adda and Oglio, about two-tenths, and between the Oglio and Adige, only about one-seventh. The following Table shows the entire area thus irrigated—

| Area of Irrigation. | |
|---------------------|--------|
| Between | Wholes |
| Area. | Area. |
| 670,971 | 1,687 |
| 561,778 | 1,800 |
| 593,543 | 8,500 |
| 1,061,538 | 18,537 |

1. Between the Ticino and the Adda
2. Between the Adda and the Oglio.
3. Between the Oglio and the Adige.

Many of the larger canals are used for navigation and commerce, as well as for irrigation and the entire length of the great canals of irrigation in Lombardy, and their first-class branches, has been estimated at above 4500 m., using up one-half of the average discharge of all the rivers. Each cubic foot of water, it is calculated, irrigates 70 ac., and the cost of water per acre is estimated at \$s. 6d.—[Smith's Italian Irrigation.]

Except the N. district, on some of the mountains of which snow lies continually the climate is remarkable for the uniformity of the temperature, and the thermometer has a less range than in any other part of Italy. During the greater part of the year the heat does not reach 50°, though in very warm summers it has occasionally risen to 90°. The mean temperature of spring and autumn is nearly equal, but in the former more especially in the loftier districts of the N., hoar-frosts are not infrequent, and do serious injury to the blossoms, marking abundant crops of fruit of rather rare occurrence. At Milan, the mean temperature is 66° at Venice 54° 66° the extremes at Milan are 58° to 73° at Venice, 42° to 67° the thermometer has, however at times descended to 10°, and the lagoons of Venice sometimes freeze. The summer is generally so dry that the months of June, July and August, have from 50 to 70 days of the brightest weather. Rains are abundant and frequent in autumn and winter. The prevailing winds are N. W. and N. E. in gov. Venice, and E. W. and N. E. in gov. Milan. The climate is healthy, except near the rice-grounds, marshes, and lagoons.

The general fertility of the plains of Lombardy has already been referred to, and is well known. The corn, maize, rice, hemp, and flax produced far exceed the home consumption, though the system of agriculture continues very imperfect. Irrigation, however, for which the configuration of the surface and the number of the streams, as has been shown afford unobstructed facilities, is better understood here than in any other part of Europe, and no country can boast of possessing artificial meadows more skillfully formed, or more productive. The dairy produce, obtained from the cows fed on them, forms one of the principal sources of agricultural wealth and the Parmesan and Siraachino cheeses of Lombardy continue to prove their superiority to all other kinds, by the higher prices obtained for them. After the ordinary produce of agriculture, and scarcely inferior to it in value, is that of silk, of which vast quantities of the finest quality are annually raised. The vine also thrives everywhere, and the wine produced from it is very abundant, but, whether owing to some peculiar defect in the soil, or to want of care and skill in the preparation of it, it does not rank high in point of quality. The difference between the two governments of the kingdom, as respects vegetable products, is chiefly to be remarked in the rice-culture; the area of which, in the gov. of Milan or Lombardy, is nearly double that in the gov. of Venice. In like manner, the former exceeds the latter in wheat, rye, oats and to the extent of a half in forests; while the latter exceeds the former considerably in rice, and to the extent of a half on meadow lands. The minerals are not of much importance, though they include iron, copper, porcelaine-earth, slate, limestone, marble, and a considerable variety of fine pebbles and rock-crystals. The manufactures, seldom carried on on an extensive scale, consist chiefly of silk, velvet, woollens, hats, ironware, porcelain, and stained glass; and the trade is in a great measure confined to the export of silk, wax, and cheese. The traffic is facilitated by

numerous navigable canals, and railways have been completed from Milan to Como, and from Milan part of the way to Verona, and from Verona to Mantua and Venice.

The government is in the hands of a viceroy, resident in Milan. Several dialects of the Italian are spoken. The religion is E. Catholic. Pavia and Padua—the former in gov. Milan, and the latter in gov. Venice, have each a university—the former with 58 professors, and 1495 students, in 1847, and the latter with 46 professors, and 1941 students. Besides these higher institutions, but including academies of art and science, gymnasiums, theological seminaries, and common schools of every kind there are 5192 educational establishments in gov. Milan, and 2218 in gov. Venice attended, in the former in 1847 by 217,263 or two-thirds of those fit to attend; and in the latter, by 80,537, or about one-third of those fit to attend.

The Lombardo-Venetian kingdom nearly corresponds to the ancient Roman divisions of Gallia Transpadana, and Venetia, with a small portion of Rhætia, but owes its name to a powerful nation of the N., who, in the end of the 6th century, made themselves masters of the whole country, and extended their conquests to the neighbourhood of Rome. It afterwards formed part of the empire of Charlemagne, and when it had fallen, became the seat of several independent republics, of which none has acquired so much celebrity as that of Venice. The house of Austria had early gained a footing in the country and had continued to increase its possessions with so much skill and perseverance that towards the end of the 18th century its sovereignty nearly extended over the whole. The victories of Napoleon wrested all from its grasp, and led to the establishment, first of the Cisalpine republic and then of the kingdom of Italy. The Congress of Vienna replaced matters on their ancient footing, and even gave Austria more than she had ever possessed before. Her Lombardo-Venetian kingdom then constituted, includes the territories of the former republic of Venice (excepting Istria, and the cañon of Civida, which are united to the kingdom of Illyria) the Austrian portion of the duchy of Milan, Mantua, a small part of Parma, Piacenza, and the Papal territories with the Val d'Aosta, Bormio, and Chiavenna formerly belonging to Switzerland. Disaffection, however, was very widely spread, and in 1848, when, by the commotions in the other parts of the empire, the hands of Austria seemed fully occupied, a general rising, aided by a Sardeian army, took place, and proved so successful for a time that hopes were entertained of Lombardy being annexed to Sardinia. The fortune of war, however, took a new turn, the Sardinian army after a series of defeats, was driven across the Ticino, and Austria maintained her territory undiminished in extent, but with a population much disaffected to her rule.

LOMBARDIA, a vil and com. Italy, Lombardy, prov. and 11 m. N. Turin, between the Malices and the Po with a church and a monastery. Pop. 1188.

LOMBARDY (Latin, *Lombardia* and *Lombardica*) an ancient kingdom of N. Italy corresponding with the greater part of the Gallia Cisalpina of the Romans, formed in the 6th century, on the banks of the Po, by the Lombards or Longobards. It was overthrown by Charlemagne but the name Lombardy continued long after to be used and was applied to the whole country, from the sources to the mouth of the Po. It corresponds in the present day with the government of Milan or Lombardy in the Lombardo-Venetian kingdom, the E. part of Piedmont and the duchies of Modena and Parma.

LOMBAY a m. Spain, prov. and about 14 m. from Valencia, r. bank Júcar with a church, an old Dominican convent, a townhouse, primary school, manufactures of white lead and several flour-mills. Near it is a remarkable stalactite cave. Pop. 1538.

LOMBEEK, two places, Belgium.—1. (St. Catherine), A. vil. and com. prov. Drenthe, 11 m. W. Brussels, with a brewery a mill, and a trade in agricultural produce. Pop. 1380.—2. (St. Peter), A. vil. and com., near the former, with a trade in corn and cattle. Pop. 673.

LOMBELEM or LOMBELEM, an Isl. Indian Archipelago, Flores Isl. N. W. Timor between Adonara and Pantar, lat. (3° 40' S. 14° 15' E. lon. 125° 30' E. (N.)) It is about 80 m. long, by 16 m. broad, consists mostly of high, bold land, with a lofty conical peak at the N. W. part, which may be seen from a distance of 50 m., and has a large bay on the N., and

another on the W side. The S. coast extends nearly E. and W about 15 m. and both the N and S are formidable to approach. Nothing is known of the interior.

LOMBOK [malay, *Tanah Sasak*], an isl. Indian Archipelago, belonging to the Dutch and separated by a strait of same name from Bali on the W, and by the Strait of Alas from Sumbawa on the E.; between lat. 8° 10' to 9° S., and lon. 112° 44' to 113° 46' E. Length N to S, about 48 m.; greatest breadth, about 87 m., area, 1968 sq. m. It is of a compact and, but for a long and narrow peninsula projecting from its S.W. corner, would be nearly of a square shape; and along the straits, both on its W and E shores, are good natural harbours and extensive roads, affording important facilities for traffic at all seasons. Several islets which line the coast are composed of coral, but Lombok itself is almost wholly volcanic. In the N.E. a mountain range rises, in its culminating point, Gunung Rindjani, the height of 12,000 ft. and, stretching across the island, sends its slopes E. N. and W. down to the shore. Another range, pursuing a direction nearly parallel to the former traverses the S. part of the island. Between the two ranges is an extensive and finely undulating plain, well watered, of great fertility and generally covered with fields of rice. The volcanic agency, though still probably acting in parts of the island not explored, has become extinct in the Gunung Rindjani, which is covered to its summit with luxuriant vegetation and presents a most beautiful aspect. The mouth of its crater however is still distinctly visible and it is even possible to trace the currents of lava which have flowed from it. The rivers and streams are very numerous. The largest on the W coast are the Belong Bahak, Barmok, Antjar and Djanok and on the E. the Poeta, Melintang, Sangar, Lohsan, and Pejoa. The staple product of the island is rice, the cultivation of which is managed with the greatest skill and care the crops are alike remarkable for quantity and quality. Other articles more partially cultivated are cotton, coffee, sugar, and tobacco the last of inferior quality. The fruits include, in abundance, mangoes, jambo, bananas, ram boots, oranges, &c. The cocoa-trees are very numerous and, in some quarters, form whole forests. Domestic animals are very numerous. The horses, though small, and deficient in strength, are gentle, and very hardy. A great number both of deer and of oxen and buffaloes are exported. Swine and goats are found everywhere, and fowls, both wild and domestic, abound in unlimited profusion. The inhabitants are said to be more advanced in civilization than those of the neighboring islands their agriculture is more perfect, and their skill in culture is conspicuous in the manufacture of brass, which are of excellent temper, and in great demand throughout the archipelago the excellence of their iron-ware, also, cannot easily be surpassed. Lombok, though again progressing, has only recently recovered from the effects of a fearful visitation which befell it in 1815. The violent eruption of the Gunung Tambora, in the island of Sumbawa, though more than 20 leagues distant, spread its ravages over the fertile and richly cultivated plains of this island burying them, with multitudes of its inhabitants, under piles of volcanic ashes, and so completely destroying vegetation, that great numbers of the survivors ultimately perished of famine or general destitution. On this occasion, two-thirds of the population are said to have been destroyed. The sweeping of the island, and restoration of its agriculture, have necessarily occupied a considerable period; but the traces of disaster here, in a great measure disappeared, and its prosperity, already great, might still be very much increased, could the different tribes and their petty chiefs be induced to forget their feuds, and exchange innumerable warfare for the arts of peace. Even now, the exports of rice alone amount to 14,000 tons. The other exports include cattle, skins, raw cotton, yellow buffaloes horns, tobacco, coconuts, timber, dried betel, &c., and the important staples of cotton and cotton yarn, chiefly of English manufacture. *cinna vociferans*, *optunia*, *optunia*, metals, raw silk, gold thread, bromine, porcelain, &c. Pop. about 250,000.—(*Mouton des Indes*, *Tamandak*, *Coup d'œil sur l'Inde Néerlandaise*)

LOMBRIASCO a vil. and com. Italy, Piedmont, div. Turin, prov. Pinerolo, 3 m. from Pineroli. 1 bank Po. It has two places, two churches, a monastery, a chapel, some small school and a trade in wheat, millet, and honey. P. 1186.

LOMELLINA a prov. Italy, Piedmont, div. Novara, bounded N. by Novara, E. by Lombardy, S. by provs. Alessandria, Tortona, and Voghera, and W. by Verceil, Casal and Alessandria, area, about 388 sq. m. It consists of a beautiful plain sloping towards the S. and divided into two nearly equal parts by the Agogna, an affluent of the Po. Administratively it consists of 14 municipalities, subdivided into 76 communes. Pop. about 118,000.

LOMMATZBOHLE a m. Saxony, circle and 22 m. W N W Dresden with a church, and manufactures of leather and tobacco granite and porphyry quarries, and a trade in tassel. Pop. (1848) 2775.

LOMME, a m. France, dep. Nord, 3 m. W Lille. It has some manufactures of linen, flax mills, and a bleachfield. Pop. 1019.

LOMMEL, a vil. and com. Belgium, prov. Limburg, 20 m. N Hasselt with a distillery an oil and two flour mills, and a trade in agricultural produce. Pop. 3119.

LOMNICA, a river, Austria Galicia, which rises in the N.E. side of the Carpathians, in circle Bielskowlaw, flows easterly to N.N.E., forming a great number of islands, and joins r. bank Dniester a little above Halicz after a course of about 60 m.; about 80 m. of which, beginning at Jasen, are used for floating.

LOMNITZ, several places, Hungary —1, (Kakse or Waks) A vil., Harbar Thaus co. Zips, on the Popper here crossed by a wooden bridge, 3 m. from Kismark, with two churches, a castle, manufactures of linen and leather and a trade in corn and flax. Pop. 1898.—2, (Zis or Molo-Lomnice) A vil. Hither Thaus, co. Zips about 12 m. from Kismark with two churches, and manufactures of linen. P. 1160.

LOMNITZ, several places, Austria—1, A m. Bohemia, circle and 30 m. N Blatnow on a height above the Popper, enclosed on two sides by mountains. It is poorly built, has a church a townhouse surrounded by a tower a castle, a hospital, and a large trade in linen and cotton goods, which are exported to Italy and elsewhere, to the extent of nearly 30,000 pieces. Fine pebbles of agate, onyx, chalcidony, and jasper, are found in the vicinity. Pop. 2494.—2 A m. Bohemia, circle Budweis, on the Goldbach, with an ancient church a townhouse and manufactures of wooden articles. Pop. 1898.—3 A m. Moravia, circle and 11 m. N W Budweis on the Elbhartitz with a church, and old feudal castle, situated on a rocky height a synagogue, manufactures of polish, and two saws, and four flour mills. Pop. 1390.

LOMNITZ, several places, Prussia —1 A vil. prov. Bielea, gov. and 28 m. S.S.W. Lagnitz, 1 bank river of same name, near its confluence with the Roher, with two castles, two churches, the works, gristmills, and a bark and other mills. Pop. 946.—2 A vil. prov. Bielea, gov. Oppeln, circle Rosenberg, with a castle, and a saw and other mills. Pop. 779.

LOMOND (Lochs), the largest and most magnificent of the British lakes, is situated in Scotland, chiefly in co. Dumfries, but partly also in that of Stirling. It lies between N.N.W. and S.E.E. and is of a very irregular shape, forming, in the N. part, a long, narrow and somewhat winding expanse, and then widening gradually out to its S. shores greatest length, about 34 m. breadth, in the upper part, not more than 1 m. but where widest about 7 m. area, about 45 sq. m. Where narrowest it has its greatest depth. Hence, to the S. of Lons, it seldom exceeds 120 ft., whereas to the N. of it, about 1 m. S. of Turbot, it is 616 ft., and 2 m. still farther N., at Alt Gary is 800 ft., which is supposed to be about its maximum. Its height above the sea-level is said not to exceed 22 ft. Owing to its great depth, the upper part never freezes, and the lower part only is winters of unusual severity. In 1740, the ice which covered it between Buchanan and Lons was strong enough to carry both men and cattle, and, in 1814, persons crossed on it from the mainland to the island of Inchmurrin. Its water is soft and wholesome, and is esteemed by numerous fish, including salmon, salmon trout, pike, perch, eels, and parrats, usually called fresh-water herrings. Its chief tributary is the Eddoch, which enters it at its S.E. extremity, but it also receives numerous mountain torrents. It discharges itself by the Leven, the channel of which, at the point of discharge, is so contracted and constricted by a bar, that it becomes inadequate to receive the additional supplies poured during winter into the lake, the

surface of which, in consequence, rises at that season from 6 to 7 ft. A still more remarkable fact is a permanent rise of muck, which is obviously owing not to any geological change, but simply to a diminution of the outlet by an increase of the lake. One of the characteristic features of Loch Lomond is the number of its islands. These, of which about thirty are counted, are situated chiefly at its lower end and being in general basally wooded, add greatly to the beauty of the country. Ten of them are of considerable size, and two of them, Inchnadamnan 1 m., and Inchnadamnan 2 m. long, are used as deer-parks by the families of Luss and Montrose. Inchnadamnan, and also another island called Inchnadamnan, have sometimes been employed as places of exile to which confined drunkards have been sent, for the purpose of being reclaimed. The scenery of the loch is at once varied, beautiful and sublime. On the S. where the shores are lowest, undulating fields and groves, embowering pleasant dwellings, are seen, beyond Luss, to the N., the banks are often precipitous and many striking headlands form the entrances of valleys reaching far into the distance towards the head of the lake, Ben Lomond appears in all his majesty, uprising to the clouds, and still farther N. the towering alpine heights of Arrochar and Glenfalloch. The present name of the lake appears to have come into use in the 14th century, the ancient name was Lymondine said to mean, 'Lake of the wooded waters.' The most remarkable event in the history of the loch is the strange commotion into which its waters were thrown during the earthquakes at Lisbon in 1755. Steamers ply on the lake.

LOMBA, a tn. in Russian Poland, on a hill near a bank near 78 m. N. N. E. Warsaw. It has spacious and well paved streets, a handsome market-place, three churches, three convents, a Marxist college, and a gymnasium, in which 150 to 200 students receive a gratuitous education. Manufactures of ironware and paper and some general trade. P 8597

LOMBARDY, a tn. and com. Italy, Lombardy, prov. and 34 m. N. W. Milan in a fertile district, near the Ticino. It has two churches, one of them a large and beautiful structure of the 16th century, with a fine spire and a trade in excellent wine, produced in the vicinity. P 2876

LOMATO, a tn. and com. Italy, Lombardy, prov. Milan, prov. and 14 m. E. S. E. Brescia, com. dist., on a height, about 8 m. S. W. of the Lake of Garda. It is well built, and was once strongly fortified. It has a court of justice, four churches, a gymnasium, theatre, most-de-pitied, and hospital, and three annual fairs. Pop. 6587

LOMBA, formerly **LOMBA**, a vii. and com. Tuscany at the foot of a hill near the confusion of the line of the Mucella, about 8 m. from Montemagno, with a church, and an old castle. Pop. 2801

LOMDEZEL, a tn. and com. Belgium, prov. Brabant, on the Molenbeek, 11 m. N. W. Brussels. It has breweries, distilleries, tanneries, water and wind mills, and a trade in corn and cattle, inhabitants chiefly employed in agriculture and cattle-rearing. Pop. 4444

LOMDESBOROUGH, par. Eng. York (N. Riding) 4200 ac. Pop. 298

LONDON [*Londonium*, Augustus *Trubantium*, *Comera* *Regis* of the Romans, French and Spanish, *London* Italian, *London*, Dutch *London*], the capital of the United Kingdom of Great Britain and Ireland, and the largest and most important city in the world, on the Thames, about 40 m. from its mouth, lat. (St. Paul's cathedral) 51° 30' 45" N.; lon. 0° 7' 38" W. (St. Paul's). On the N. bank, where the principal part of London stands, is the east of Millwall and Essex, the river rises gradually at the rate of 26 ft. per mile, while, on the opposite bank the houses cover a nearly uniform and extensive flat, forming part of the co. of Surrey and Kent, and lying, in some places, several feet below the highest tides. The limits of London, as defined by Act of Parliament for Parliamentary purposes, are the circumference of a circle, the radius of which is the length of 18 m., from the General Post-office, but the actual circumference of the metropolis is generally estimated at 30 m. and by some raised to 36 m. It includes the cities of London and Westminster, and the parliamentary boroughs of Tower Hamlets, Southwark, Lambeth, Finsbury, and Marylebone formerly distinct, but now combined into one vast mass of houses the area of which, with the population at various periods, and the extent of representation, are shown in the following Table —

| Division. | Area in Acres. | Population, 1801. | Population, 1821. | Population, 1841. | Population, 1851. | Parl. Electors, 1868-72. | N. of Members. |
|-------------------------------|----------------|-------------------|-------------------|-------------------|-------------------|--------------------------|----------------|
| London, City | 830 | 118,569 | 121,893 | 180,708 | 197,869 | 30,980 | 4 |
| Westminster, City and Liberty | 9,219 | 158,210 | 202,948 | 219,190 | 241,611 | 14,518 | 2 |
| Finsbury Borough | 4,070 | 156,610 | 242,138 | 285,048 | 328,773 | 17,738 | 8 |
| Lambeth .. | 8,540 | 69,888 | 186,818 | 197,412 | 241,841 | 16,284 | 8 |

| Southwark | 600 | 84,813 | 126,117 | 148,830 | 171,685 | 8,610 | 8 |
| Tower Hamlets | 8,068 | 106,668 | 317,546 | 410,780 | 535,111 | 81,181 | 8 |
| Total .. | 81,568 | 676,592 | 1,472,008 | 1,663,828 | 2,007,648 | 1,350,1 | 16 |

Two portions of the metropolis have an area of nearly 50 sq. m., four fifths of which are on the S. or N. bank of the river. But within the greater limits above indicated are included the parish of Chelsea, the towns of Deptford and Greenwich, Dulwich, Brixton, Clapham, Battersea, Kennington, Elephant and Castle, Highbury, Stoke Newington, &c. comprising altogether an area of 78,029 ac. or nearly 116 sq. m. with a population in 1851 of 2,362,286, of whom 1,106,558 are males, 1,255,728 females.

The metropolis stands on alluvial deposits, consisting of beds of clay and gravel, below which is the hard clay stratum known to geologists by the name of London clay, in the middle of the great chalk basin extending from Barchin to the E. coast. As regards salubrity there are considerable differences, according to the nature of the locality, the density of the population, the state of the drainage, and other causes, but London must rank, on the whole, as one of the healthiest cities in the world, the mortality in the seven ordinary years (1838-1844) being at an average rate of 25 deaths annually out of every 1000 inhabitants, while that of Paris is 38 in 1000. In 11 of the 38 London districts, the mortality was lower than in all England, the proportion for the latter being 32 in 1000. Hanover Square and its vicinity, Clarendon, Leinster, Islington, and Hackney are some of the healthiest districts, while the region round Smithfield, Blackfriars' Bridge, and the Tower, is the most unhealthy. The following

wind is the S.W. and there are few places in the kingdom where less rain falls. The mean annual temperature is 50° F., and the general range of the thermometer is from 20° to 81°, the highest and lowest markings being for the most part, in August and January respectively. Occasionally the mercury rises above 90°, and it has, on rare occasions, descended below zero at night. In the beginning of winter the lower parts of London especially are occasionally enveloped in fogs, so dense that the shops require to be lighted and vehicles of all kinds are brought to a standstill.

Though the thick atmosphere of our climate, and the amount of smoke continually hovering over London, render it impossible, or next to impossible, to survey properly the whole metropolis from any one point, still there are a number of positions whence interesting and picturesque panoramic views may be obtained, either of the whole of this enormous mass of buildings, or of considerable portions of it, the great dome of St. Paul's is almost all of them, forming a most conspicuous object. Among these may be named Highbury Hill on the N., and Blackheath on the S. E. side; the top of the Colosseum in Regent's Park, the top of St. Paul's, and of the Monument in the City, and of the Duke of York's column at the end of Waterloo Place. But, apart from these and the numerous highly-interesting street views, there are no finer prospects to be obtained than from the bridges across the Thames, and from the river bank on the S. side, looking

either up or down the stream. One of these taken from below Southwark Bridge and looking towards St. Paul's, is represented in the accompanying engraving.

London was surrounded with walls by the Romans, and its extent was then, probably, limited by the end of Ludgate Hill Street and the top of Ludgate Hill, on the E and W., by the

river on the S, and London Wall and Little Britain on the N., this part of the city being called London within the walls. The wall seems to have extended along the river as well as on the other sides. The city, at the present day, is bounded S. as formerly by the Thames. It extends N. up Goswell Street to Charterhouse Square. E. along High Street White-

LONDON FROM BARKING, BELOW SOUTHWARK BRIDGE.—Drawn and Engraved by J. L. WILKINSON.

shaped to Middlesex Street and W. along the Strand to Temple Bar, the only remaining city gate, and a work of Sir Christopher Wren's. It is in this portion of the metropolis alone that the term *The City* is exclusively applied. Notwithstanding the enormous size of London—comprising even in the portion of it presenting a solid mass of houses E. to W. from Blackwall to Chelsea, a distance of 7 m., and N. to S., from Walworth to Holloway a distance of $4\frac{1}{2}$ m.—it is tolerably easy for strangers to make their way in it, as the Thames traverses the town from W. to E. and most of the great lines of streets run nearly parallel to it, while these are intersected by streets running N. and S. With exception of public buildings, some club-houses, banks, insurance offices, and residences of the nobility the houses of London are uniformly built of brick and in the more modern parts of the town, frequently covered with a plaster composition, known by the abbreviated name of *compo* the facility with which ornaments can be executed in this material, has led to the overlaying of numerous edifices with decorations in very questionable taste. In the older parts, the great majority of the streets are narrow, and frequently crooked, but in those parts that have more recently sprung into existence, they are wide and spacious.

Of the W. to E. streets, the most important is that which enters on the W. from Kew and Kennington, forming the flume of all the approaches to London. It stretches on, through Knightsbridge and Piccadilly, with Apsley House and numerous other palatial edifices facing the Green Park, which constitutes its S. boundary for about half its length. This line is necessarily broken at the E. end of Piccadilly, but the Strand continues it, somewhat nearer the river and it stretches on through Temple Bar along Fleet Street, Ludgate Hill, St. Paul's Churchyard, Chancery Lane, Cornhill, and Leadenhall Street, from whence it branches off into the Mile-End Road and the Commercial Road. The next great artery between the W. and E. extends along Oxford Street, which is itself $1\frac{1}{2}$ m. in length, through Holborn, Skinner Street, and Newgate Street, where it joins the more S. line above described, at the W. end of Chancery Lane. It again is a dead line, extending from Farringdon to the city as far E. as Islington, a distance of about $2\frac{1}{2}$ m.; it is called the New Road and thence to Finsbury Square, about 1 m., it bears the name of the City Road. Among the principal streets which run N. and S., in the West End, are Park Lane,

with its numerous elegant structures overlooking Hyde Park; St. James Street, with its handsome dirt houses and hotels; Bond Street, so narrow and still so fashionable that the carriages of the aristocracy in the months of May and June, sometimes block up the street for a considerable space, and have to wait long for extrication; Regent Street, one of the broadest streets, and perhaps the handsomest in London although it is indebted for much of its architectural beauty to the plaster with which all the houses are covered. This street is greatly frequented as a promenade, and with its magnificent shops, its crowds of well-dressed loungers, and the incessant throng of elegant equipages it presents, especially on a fine day in spring, about 3 or 4 o'clock, a most interesting and animated spectacle. On the N. it communicates with Portland Place, which may be considered a continuation of Regent Street. This is also a very handsome and spacious street, consisting entirely of private residences. It is now less fashionable than it was 20 years ago, but it is still inhabited by several of the nobility. On the S., Regent Street communicates with Piccadilly by a double crescent of stately buildings called the Quadrant, terminating in a cross, which corresponds with that on the N. where Regent Street intersects Oxford Street. From Piccadilly Regent Street continues S., widening at its termination into Waterloo Place, which is ornamented at its S. extremity with the Duke of York's column. Between Regent Street and Drury Lane, which is about 1 m. further E., there is a want of transverse streets running N. and S. A new one, however has been opened recently, which, by a junction with St. Martin's Lane will serve as a communication between the Strand and Holborn. To Southwark and Lambeth, the principal thoroughfares lead from the bridges to a common centre, the well-known posting-houses called the Elephant and Castle, nearly equidistant from all of them except Vauxhall and Chelsea bridges. These great lines of roads, with several others, though wide and well-built streets, if Blackfriars Road be excepted, are inferior to the leading lines on the N. side of the river.

The city of London, as we have already seen, now forms but a small part of the metropolis, and it may be said to be only inhabited in the day time; for, in the afternoon, the busy and anxious crowds who dwell in its narrow streets during the day, rush from their warehouses and counting-houses in the city to their homes in the West End.

or in the different suburbs. Great improvements have been recently effected in this quarter, especially in the neighbourhood of the Bank and the Exchange, by the opening up of new streets of considerable breadth, and in a very superior style of architecture, especially those that lead from the Bank to London Bridge on the one hand, and to Moorfields on the other. This portion of the metropolis alone possesses a corporation, the oldest, richest, and most powerful municipal body in the world. The city is divided into 108 parishes, of which 97 are called 'without,' and 11 'within' the walls—a distinction which is merely nominal, as the walls have long since disappeared. The space which extends down the N bank of the river as far as Blackwall, is occupied by the various docks, wharfs, and warehouses, and inhabited by slopellers, cump, and sailors. To the N of this district lies Spitalfields and Bethnal Green, which have been opened up by the Eastern Counties Railway, from which the traveller can readily distinguish the silk-weavers busily plying their handlooms. Adjoining Spitalfields, on its W side, is Clerkenwell the seat of the watch-trade, inhabited by the best paid and best-informed class of artisans in London. On the N, the parish of Islington, placed on a salubrious elevation, where new streets and squares of stately construction rise in amazingly rapid succession, is mostly inhabited by the middle classes, and those immediately beneath them in the social scale. On the Surrey side, Southwark, including Bermondsey, is the great seat of the tanning trade while Lambeth is occupied generally with manufactures. Shadwell and Rotherhithe are the head-quarters of sailors, and are but meanly built and uninhabited. Indeed the whole of the R bank of the Thames is much inferior in wealth and importance to that portion of the metropolis on the L or Middlesex shore. The E. line of the city of Westminster coincides with the W line of the city of London, Temple Bar being the point of junction in the Strand. It is bounded to the N by Oxford Street from Tottenham Court Road to Kensington Gardens, and its W limit, passing through the Serpentine in Hyde Park, reaches the Thames at Chelsea Hospital. Marylebone, Finsbury, and Tower Hamlets form a continuous line lying in the V and E of these two cities. With regard to the West End—a term used to distinguish the fashionable part of London from the rest—its body and centre are bounded by Regent Street and Waterloo Place on the E. St. James Park on the S. Park Lane and Green Park on the W, and by the western division of Oxford Street on the N. This square and compact body, which contains the mansions of the nobility, the club-houses and the squares in which reside the elite of fashion, is bounded on the N by Marylebone—a district which was not long since fashionable, but which has greatly declined in that respect since the rise of Belgravia, although a few droll and other aristocratic residents are still to be found in Cavendish and Portman Squares. Still further N lies the Regent's Park district containing some fine terraces and crescents, and numerous pretty villas. Those who dwell here belong chiefly to the middle classes, among whom are a considerable number of city merchants. To the E. of Marylebone lies the Bloomsbury district, with its well built houses and squares, erected towards the latter part of the last century. This portion of London is chiefly occupied by lawyers and merchants, for its noble mansions and spacious squares no longer contain the rank and fashion of the town, as in the days of the late Georges. Still further E, we recognise the architecture of the era of Anne, in the expensive dwellings of Great Ormond Street and Queen Square, where fashion reigned near the beginning of last century. To the S. of this line is the Strand district, which is strictly trading, although the streets running out of it towards the river are chiefly occupied by lodging-houses. In the extreme W of London have recently risen into existence two extensive districts Tyburnia and Belgravia, which flank Hyde Park on the N and E. The fields and gardens which extended, twelve or fifteen years ago, from near Edgware Road to Raynwater, have now given place to an immense forest of streets, terraces, and squares, which form a striking contrast, by the regularity of their appearance, to many of the older portions of London. The houses, from their height, have an air of grandeur, but the uniformity of their plaster decorations becomes tiresome. Here reside great numbers of professional men and city merchants, as well as various others

who have some pretensions to fashion. Belgravia, on the S. or opposite side of Hyde Park, is bounded on the E by Grosvenor Place, a fine range of buildings flanking the Green Park and Buckingham Palace Gardens on the N by Knightsbridge, on the E by Sloane Street, and on the S.E. by Ebury Street. Belgrave Square forms the nucleus of this fashionable region, and contains, like many of the streets around it, numerous edifices of palatial size and structure. Here, also, the brick walls are uniformly coated over with stucco, a circumstance which greatly detracts from the first impression produced by the architectural beauty of the buildings, especially if one is accustomed to the substantial as well as elegant, stone edifices in the newer portions of Edinburgh and Glasgow. Contiguous to this district lie Chelsea and Grosvenor—the latter lying low, and possessing a warm and moist air in the recesses of consumptive persons. On the S.E. of Belgravia, also, lies Westminster proper one of the poorest and most squalid districts in the metropolis. Malaria and disease prevail here the drains being below the high-water level of the river and the malarial atmosphere is equally tainted. Something has been recently done to cure both evils, by the opening up of a new street, and the building of three new churches, the erection of the latter being due to private liberality.

The streets are regularly kept clean, and are well lighted and paved. The carriage-way is generally paved with granite, but several streets, such as Regent Street and the New Road, are macadamised. The amount annually expended in paving exceeds £200,000. From the extent of the metropolis and the great amount of business carried on in it, the principal streets, as might be expected, present a continued throng of vehicles of every description, often forming an almost unbroken line above a mile long. The principal E. and W. lines are the great scenes of crowded thoroughfares, in them the narrow parts are not unfrequently completely blocked up for a time, passage either one way or other being quite impracticable, when long lines of omnibuses, cabs, private carriages, drays, and dust-carts may be seen waiting in impatience till the street is cleared from the temporary obstruction.

Squares and Public Monuments.—The squares of London are numerous, and many of them of great extent and exceedingly elegant, the centre generally being occupied with shrubbery which, notwithstanding the compactness of the metropolis, usually thrives well, and many of them are adorned with statues of sovereigns, warriors and statesmen which, both in conception and execution, are of very various degrees of merit. Among the squares more deserving of notice, may be named—Lincoln's Inn Fields with an area of 12 ac., near the centre of the metropolis, Eaton Square, 10 ac. Grosvenor Portman, Cavendish Squares, all in the W. and Russell Square, 10 ac. Bedford Square, Tavistock, and Euston Squares, in the V part of the town and Trafalgar Square at Charing Cross fronting one of the principal thoroughfares and adorned with public buildings, fountains, the Nelson column, and statues of Charles I. and George IV. The most conspicuous public monuments are 'The Monument, on Fenchurch Street Hill, London Bridge, a fluted Doric column, 202 ft high, erected in 1677, in commemoration of the great fire of London; the York Column at the S. end of Waterloo Place, a plain Doric pillar of granite, 124 ft high, surmounted by a bronze statue of the Duke of York; a fluted Corinthian column in Trafalgar Square, 176½ ft high, raised in honour of Nelson and surmounted with a colossal bronze statue of the hero while the pedestal is decorated with bronze sculptures in high-relief the figures larger than life, and a colossal equestrian statue of the Duke of Wellington, placed on the summit of the grand arch at the top of Constitution Hill, forming the approach to Buckingham Palace, and another of smaller size in front of the Exchange.

Gas, Water, Sewerage.—London is supplied with gas by twenty companies, producing above 15,000,000 cubic feet of gas per day. And there are seven water companies, supplying daily 44,573,979 gallons, being at the rate of 164 gallons for each house. The principal source whence water is obtained is the Thames, some of the companies deriving their supply from the river as high up as Kew, and some as far down as between Westminster and Waterloo bridges. Spring-water, from Harfordale, is brought in by an aqueduct called the New River, 40 m. in length, including windings and a further supply is drawn from the River Lea. Artesian wells,

of excellent water, may be found in any part of London, by boring down to the chalk. But such a source of supply for the metropolis would soon be to be depended upon, from the fact that existing wells of this kind have, in recent years, been rapidly lowering in level. Some portions of London are well drained, but in others, such as Bermondsey, Westminster Wapping, where the sewers are below the level of high water, the drainage is necessarily imperfect, and the consequences, such as malignant fevers, and other epidemic diseases, make fearful ravages among the inhabitants of those districts. But although much remains to be done, the system of sewers deserves to be ranked as one of the wonders of London, from their great depth and immense size, the latter quality however, according to recent investigations being one of their great defects, for it has been successfully demonstrated that a comparatively narrow conduit, kept constantly filled with water or fluid coverage, is a much more efficient means of drainage than a large and only partially filled sewer. Hitherto, the Thames has formed the great outlet for all the sewers but the effluvia has become very general, that the river should no longer be employed for such a purpose, and that a vast subterranean canal should be dug on each side of the river to receive the drainage of the sewers coming from the interior of the town, and to convey it to a considerable distance, where it may be converted to some useful purpose, or be discharged into the river so far down as to prevent the possibility of its being brought back by the returning tide. The ordinary daily amount of sewerage discharged into the Thames on the N. side, has been calculated at 7,045,120 cubic ft., and, on the S. side, 2,457,600 cubic ft.

BRIDGES AND THE THAMES TUNNEL.—Within the limits of the metropolis, and W. of the Tower the Thames averages 1000 ft. wide. Till towards the middle of last century it was crossed by only one bridge, but now between Chelsea and the Tower there are eight bridges, three of which are within the limits of the city and four in Westminster. The lowest down and most important of all is *London Bridge* connecting the city at King William Street, with Southwark at the junction of Walington Street, and Tooley Street. It is an elegant structure of Aberdeen granite, built after designs by John Rennie, and under the superintendence of his son Sir John Rennie. Of the immense traffic on this bridge, some idea may be formed from the fact, that 15,000 carriages, of all kinds pass along it every hour. About 500 yards further up the river, stands *Southwark Bridge*, in like manner connecting the city and Southwark. Queen Street and Bridge Street being the approaches on either side. It is an iron bridge, of three sequential arches, resting on stone piers, and was erected by the elder Rennie. About half a mile further W., *Blackfriars Bridge* connects the city at Bridge Street with Southwark at Great Surrey Street. It was designed by Mylne, a native of Edinburgh, and built of Portland stone, which not having resisted the effects of the water and the atmosphere, the piers have lately been cased with granite and otherwise, the frequent repairs upon it have more than doubled its original cost. *Waterloo Bridge*, nearly half a mile above the former is esteemed by many to be the finest in the world. It was constructed of Aberdeen granite, by the elder John Rennie, and including its approaches, supported on semi-circular arches, is 2445 ft. long, it is perfectly level, and connects the Strand with the Waterloo Road. Under it, a S. W. *Hungerford Bridge*, constructed by L. E. Rennie, for foot-passengers only, spans the river from Hungerford Market to Belvedere Road. It is 1855 ft. long. *Westminster Bridge*, opened in the middle of last century crosses the river at the N. end of the Houses of Parliament, from Westminster to Lambeth and about 700 yards S. from Hungerford Bridge. It was built of Portland stone, and is now (1855) in such a state of decay that, unless taken down, it must soon give way of its own accord about 8,000,000 of horses pass along this bridge annually. Nearly 1 m. S. from the last-named bridge, Westminster and Lambeth are third time connected by *Piccadilly Bridge*, the *Vauxhall Bridge Road* leading from Piccadilly and New Bridge Street, leading from Vauxhall Gardens, being the approaches on either side. Like Southwark Bridge, it is of cast-iron, and is very inferior to it in every respect. Nearly 2 m. W. by S. from this bridge, *Chelsea or Battersea Bridge* connects Lambeth with Chelsea. It is an iron bridge, and is an old wooden structure, opened in 1772. The

following Table shows the chief restaurants, *rest. &c.*, of the bridges:—

| Name of Bridge. | High Completion. | Cost. | Length. | Breadth. | No. of Arches. | High Completion. |
|-----------------------|------------------|-------------|----------|----------|----------------|------------------|
| London (stone) | 1811 | £ 4,000,000 | Perk. 25 | 4 | 181 | Perk. 25 |
| Southwark (iron) | 1815 | 900,000 | 776 | 44 | 3 | 340 |
| Blackfriars (stone) | 1790 | 250,000 | 596 | 43 | 9 | 109 |
| Waterloo (stone) | 1817 | 1,100,000 | 1448 | 48 | 9 | 137 |
| Hungerford (suspens.) | 1844 | 81,000 | 1258 | 34 | 3 | 270 |
| Westminster (stone) | 1781 | 385,000 | 1212 | 44 | 15 | 78 |
| Vauxhall (iron) | 1814 | 250,000 | 629 | 40 | 9 | 70 |
| Chelsea (wood) | 1772 | 20,000 | 674 | 35 | 9 | 70 |

The *Thames Tunnel*, a roadway under the river, which is generally regarded by foreigners as the greatest wonder of the metropolis, is 2 m. below London Bridge. An attempt was made, in 1808, to make a tunnel below the river at Limehouse, but the water burst in and destroyed the works, when the tunnel which entered on the Surrey side, had reached within 200 ft. of the opposite bank. The present work is a monument of the skill and energy of Sir James Bazelton, who commenced operations March 9 1825. On August 12 1829, there was an inundation, which stopped the works till January 1835, when they were renewed with great energy and the tunnel was at length opened to the public March 25 1843. It consists of a hollow brick cylinder or tube, subdivided into two roadways, each 15 ft. high, and 12 ft. broad. The entire cost was about £214,000, of which the Government lent £247,000 to the company who carried on the enterprise. As a speculation, the tunnel has turned out very unprofitable the annual receipts being under £2000—a sum which is barely sufficient to keep it in repair as land-springs make constant encroachments. There is a cylindrical shaft at each end, with 100 steps, by which foot passengers ascend and descend on paying a toll of a penny each. The company have not been able to meet the cost of completing the approaches, so that there is no access for vehicles of any kind.

PALACES.—*St. James*, erected by Henry VIII. from a design by Holbein at the foot of St. James' Street, is an irregular square looking brick building. But it is well adapted generally for very pleasant and drawing-rooms which are held here during the fashionable season. *Beckingham Palace*, facing the W. end of St. James' Park, was built by George IV and consists, since the erection of the F. front, of a quadrangular range of buildings. This E. facade, which is loftier than the rest, and in the Italian style, gives to the whole a more palatial appearance than it formerly possessed. The situation is low and damp and the palace is stalked on the S. by buildings of an inferior description while the gardens are overgrown on the W. by the houses in Grosvenor Place. In the gallery, which is 160 ft. long, are some good pictures. The Queen resides here several months every year in the spring and summer. *Whitehall*.—The Banqueting House, designed by Inigo Jones, in the Palladian style, and justly regarded as one of the greatest architectural ornaments of London, is the only remnant of the ancient palace of Whitehall that still exists in the country. In front of it was beheaded Charles I., who was executed on the scaffold through an opening which was made in the walls for the purpose. *Kennington Palace*, situated in Kennington Gardens, is a plain brick building. It was purchased by William III., and became his favourite residence, and was the birth-place of her Majesty Queen Victoria. *Lambeth Palace*, on the Surrey side of the river, opposite the Houses of Parliament, has been for many centuries the residence of the Archbishops of Canterbury. It is a brick edifice, and comprises a great variety of styles in architecture, from early English downwards, and contains a library of 25,000 vols.

THE PARKS.—Of these the largest and most fashionable is *Hyde Park*, which lies between the Unrbridge and Kensington roads, and contains about 400 acres. It has, towards the S. side, a large artificial lake, called the Serpentine, which is spanned by a handsome bridge of five arches, at the entrance to Kensington Gardens. The principal entrance to the Park on the S. side, is by a triple gateway close to Apsley House, and within a few yards of that point is the beginning of *Botan Row*, a narrow strip called off for equestrian, and stretching about

1 m. towards Kensington. Somewhat further N and on the other side of the Serpentine is a fashionable drive called the Ladies' Mile, which extends nearly to the edge before mentioned, and here, on the summer afternoons, may be seen vast numbers of splendid equipages driving up and down, while others make the circuit of the park. On Sunday afternoon it is frequented for the most part, by an inferior description of equipages, while the footpath on each side is crowded with promenaders of all ranks—many of the highest. The principal entrance on the N side is at the end of Oxford Street, and is adorned with an elegant arch of white marble, which formerly stood in front of Buckingham Palace. Kensington Gardens, with which Hyde Park communicates at several points, are well wooded and finely laid out. Here carriages are not admitted. St. James Park (35 ac.) extends from Buckingham Palace to the Horse Guards, and in its centre is an ornamented sheet of water, studded with islets covered with trees and shrubs, and round which swim a great variety of aquatic fowls. St. James Park is a favourite resort of the humbler classes, especially on Sunday. The Green Park, 71 ac. in extent, lies between St. James Park, on the S, and Piccadilly on the N. On the E. side it is overlooked by St. Paul's House, Bridgewater House, Spencer House, and other noble mansions. Regent's Park, on the N side of London, covers an area of 408 ac. Round the park is an agreeable drive nearly 2 m. long, and an inner circular drive encloses the Botanic Gardens. As the N end are the Zoological Gardens, to which a fine broad avenue leads along the centre of the park, with clusters of trees on each hand, and footpaths ramifying out in all directions. Victoria Park, on the N E. of London, was recently laid out and planted as a place of recreation for the inhabitants of Spitalfields and Bethnal Green. Battersea Park was lately formed on the S. bank of the Thames, opposite to Chelsea Hospital at a cost of £200,000.

The New Palace of Westminster or the Houses of Parliament.—This vast and magnificent edifice contains the House of Peers and the House of Commons with the various apartments and offices connected with parliamentary business. It is a highly decorated structure, in the Tudor-Gothic style after designs by Sir Charles Barry, and is still (1852) in process of erection. It stands partly on the site of the old Houses of Parliament, destroyed by fire in 1834, on the E. bank of the Thames, between the river and Westminster Abbey and extends over an area of about 8 ac. The facade, which overlooks the river, 900 ft. in length, produces a grand effect, which is due, in a great measure, to the three magnificent towers for the site is unfortunately too low, and the building itself not lofty enough for its extent. The walls are of brick-faced externally with magnesian limestone and the whole edifice is separated from the river by a terrace of Aberdeen granite. It is panelled with rich tracery and profusely decorated with statues and shields of arms of the kings and queens of England, from the Conquest to the present time. In the S.W. angle, is the Victoria tower, supported upon four pointed arches 60 ft. in height; it is 75 ft. square, and, when completed, will be 240 ft. in height. There is also a tower in the centre, 300 ft. high by 60 ft., surrounded by a lantern and the clock tower, at the N. end of the edifice, with its richly decorated spire, rises 320 ft. The House of Peers is an apartment 97 ft. long, 45 ft. wide, and 45 ft. high; magnificently decorated throughout with carved oak panelling, a profusion of gilding, paintings in fresco, and richly-stained glass windows. The House of Commons is a somewhat smaller apartment, fitted up in a much plainer style. The foundation of the building was laid on April 27, 1840.

Government Offices.—These are mostly situated in and near Whitehall; the Treasury, Home Office, and Board of Trade, occupy one range of buildings, which have been recently im-

proved by a uniform and handsome facade. The Horse Guards and Admiralty, which are somewhat nearer Charing Cross have little to attract in their external appearance. The Ordnance Office, also, in Pall Mall, is a plain building. Several of the public offices are in Somerset House, a spacious and handsome quadrangle, finished in 1783, from designs by Sir W. Chambers its N. facade, 200 ft. in length, faces the Strand, and its S. front, 800 ft. long, overlooks the river, viewed from which, it presents one of the most striking elevations in London. The Post-office, in the centre of London, near St. Paul's, is a spacious and handsome building, completed in 1829, from the designs of Bouverie. It is 890 ft. long 150 ft. wide, and 54 ft. high. Its facade, which is towards St. Martin's-le-Grand, has three Ionic porticoes, the one in the centre, which is the largest, being surmounted by a plain pediment. The Mint, a stone building of Grecian architecture, finished in 1811 stands on Tower Hill, and contains, with its workshops and offices about 10,000 sq. yards.

The Tower.—This celebrated fortress, which doubtless formed the nucleus of modern London, lies on the banks of the Thames, from which it is now separated by a platform.

THE TOWER OF LONDON.—Engraved by H. M. Hume

just beyond the liberties of the city. It occupies an area of 12 ac., enclosed within a wall surrounded by a ditch, now dry, but in former times filled with water from the Thames. On the S. side is an artery called the 'Traitors Gate, through which state prisoners were brought from the river. The most ancient part of the existing edifice—the White Tower—was erected about 1078, for William the Conqueror by Gundulph bishop of Rochester. It stands near the centre of the quadrangle, round which are placed several other towers, each having its distinctive name. The Tower contains the Wallington Barracks, erected on the site of the grand store-house, burned down in 1841, the jewel-room, a modern edifice, in which are preserved the regalia of Great Britain: the horse armoury, Queen Elizabeth's armoury and the church of St. Peter ad Vincula. Besides its use as a fortress, the Tower was likewise the temporary residence of several kings and queens of England. But with its history as a state prison, for which it was used during five centuries events are connected of much greater interest than any that pertain to the jousts, fêtes, and entertainments, of which it was the scene while occupied as a royal dwelling. Within its walls were confined kings, queens, statesmen, warriors, and philosophers. Many prisoners were here privately murdered, and many publicly executed. Edward V. and his brother, another son of Richard III., may be mentioned among the former and Anne Boleyn, Thomas Cromwell, Catherine Howard, and the dukes of Somerset and Monmouth among the latter—the headless bodies of whom are interred in the church of St. Peter above named.

PLACES OF WORSHIP.—St. Paul's cathedral is the greatest architectural ornament of the metropolis, and the best-known edifice in it. It occupies the summit of Ludgate Hill, where its foundations were laid on June 8, 1675, on the site of the former cathedral, which was destroyed in the great fire of

1666. It was finished in 1719; and Sir Christopher Wren, by whom this magnificent temple was designed, lived to witness its completion. It is 510 ft. in length, from E. to W., while the transept is 255 ft., exclusive of the semi-circular porches at each end; the breadth of the W. transept is 180 ft., and the height of the walls 110 ft. The building is crowned with an immense dome, surmounted by a lantern with ball and cross—the height of the latter being no less than 404 ft. from the ground. From Ludgate Hill, a fine view is obtained of the W. facade, with its beautiful double portico of coupled columns in the Corinthian and Composite orders, and its two clock towers, each 323 ft. high, over which rise the gigantic cupola. This vast structure, which is built entirely of Portland stone, cost only £747,854, 9s. 6d., which was paid by levying a tax on coal. The interior is extremely deficient in ornaments. Among the few monuments it contains are those of Lord Nelson, Sir Ralph Abercromby, Sir John Moore, Dr. Johnson, Howard, Sir Joshua Reynolds, and other eminent characters of modern times. Side by side, under the centre of the dome, lie interred Britain's greatest admiral and greatest general of the present era, Lord Nelson and the Duke of Wellington. *Westminster Abbey*, after St. Paul's,

is the finest ecclesiastical edifice in London, and one of the best specimens of the pointed style in this country dated from the reign of Henry III. and Edward I. when it was erected on the site of the Saxon minster founded by Sebert. The beautiful chapel at the E. end was added by Henry VII. and, at the beginning of last century, the upper part of the two towers at the W. end were erected from designs of Sir Christopher Wren. It is 660 ft. long, and 195 ft. wide within the walls. In this noble edifice, our kings and queens have been crowned from Edward the Confessor to Queen Victoria, and here many of them are buried, some with and others without monuments. In the S. transept are the tombs and honorary monuments of great poets, from Chaucer down to Campbell, whence it is called Poets' Corner, and in other parts are numerous sculptured monuments to statesmen, warriors, philosophers, divines, patrons

and eminent individuals generally, many of whom are interred within its walls. Of the other several churches in London the most remarkable are St. Bartholomew's in W. Smithfield, which contains some fine specimens of Norman, early English, and later styles of architecture. At *Canoner's*, in Southwark, which boasts of the best early English architecture in London in its choir and lady chapel, the only portions of the old church which remain. St. Stephen's, *Walbrook*, the interior of which is extremely fine, and generally regarded as one of Wren's best works, and the *Temple church*, which combines transition Norman architecture with early English, the latter in the chancel, which was founded in 1240. Important restorations, in this church, have been recently completed at a cost of £70,000. Besides these, many of the older parish churches are elegant structures, among those worthy of being specified are Bow Church, St. Bride's in Fleet Street, and St. Martin's in the Fields. The churches of the earlier part of the present century are altogether inferior in design, and mostly in a debased Grecian style. These built in more recent years are closely adaptations of the Gothic, and give favourable indications of a return to a purer taste. Of the E. Catholic churches in London the largest is that called St. George's cathedral, in Southwark, finished in 1845, at a cost of about £20,000. The dominating place of worship are mostly plain, unpretending structures. Altogether it is said that there are about 350 churches and Episcopal chapels in London; and 780 places of worship belonging to Dissenters of every kind.

Public Buildings in the City.—Besides churches, some of which have already been adverted to, a number of the most important, if not the most elegant buildings in the metropolis are situated within the city. The nucleus of the whole is formed by the Bank of England, the Royal Exchange, and the Mansion House, which all face towards an open area, the centre of bustle and business, near the middle of the city, which is further adorned with the handsome offices of several assurance companies. The *Bank of England* in Threadneedle Street, belonging to a chartered company established in 1693 under the management of a governor, deputy-governor and twenty directors, was built in 1732. It has, since that period, received various additions and improvements, and now forms a low, flat, insulated, irregular parallelogram, covering 4 ac. of ground. Adjoining the Bank of England is the *Royal Exchange*, an extensive and ornate building, having a Corinthian portico, surmounted by a pediment, enriched by sculpture. It surrounds an open interior quadrangle, in the centre of which is a marble statue of Queen Victoria, by Lough. In this court, which is surrounded by covered arcades, the meetings of the merchants on 'Change are held. An equestrian statue, by Chantrey, of

THE ROYAL EXCHANGE AND BANK OF ENGLAND.—Drawn and Engraved by J. L. Whittam.

the Duke of Wellington occupies the area in front of the building. The Royal Exchange was originally founded by Sir Thomas Gresham in 1567, and having been burned down in 1666 it was rebuilt and opened in 1669. This second Exchange having been also burned down on January 10, 1838, the present edifice was erected on its site. The Exchange for special purposes are—the *Stock Exchange*, in Capel Court, the *Coal Exchange*, Lower Thames Street, built by J. S. Baring, opened on October 30, 1840, by Prince Albert. It is a sumptuous, though rather incongruous building, the great Hall of which is circular, 60 ft. in diameter, and 74 ft. to the apex of the glass dome, with which it is covered, the *Corn Exchange*, a fine Doric structure, in Mark Lane, opened in 1747, and enlarged and partly rebuilt in 1837. The *Mansion House*, the residence of the Lord Mayor while he holds the office of first magistrate of the city, was built in 1789-93, from the designs of Dance, the city surveyor at a cost of £71,000. It has a Corinthian portico in front, and stands in the E. end of the Poultry, nearly opposite the Bank of England. The *Guildhall*, situated at the W. end of King Street, Cheapside, is the chief place where the principal business of the Corporation of the city of London is conducted, and the magnificent banquet given here, have rendered City banquets proverbial. This edifice was erected at different periods, it may be perceived from its incongruous architecture. The old-fashioned Gothic front, with the city arms in the centre, was finished in 1789, but it has been since frequently repaired. The

Hall, an handsome room, in which 8000 persons can sit, contains some monuments of ordinary sculpture; and, at the W end, raised on pedestals, are the well-known colossal figures of Gog and Magog. The East India House, containing the offices of the East India Company, is situated in Leadenhall Street. It is an extensive building, with an Ionic portico in front, and contains, besides the necessary accommodation for the clerks of the Company, an excellent library, rich in Asiatic literature, and an interesting museum of Indian objects.

City Corporation and Government.—The chief civil officer of London is the Lord Mayor, annually elected from among the aldermen who have been sheriffs, on September 29. The powers and privileges of this officer are very extensive. He is installed in office on November 8, when a procession takes place called 'the Lord Mayor's Show'. The court of aldermen consists of 25 members, including the Lord Mayor. They are chosen for life by the householders of the twenty-six wards into which the city is divided, each being the representative of a separate ward. They are properly the subordinate governors of their respective wards, under the jurisdiction of the Lord Mayor and preside in the courts of Wardmote for the redress of minor grievances. Such as have filled the office of Lord Mayor become justices of the quorum, and all others are justices of the peace within the city. The sheriffs, two in number, are annually chosen by the Livery, or general assembly of the freemen of London. The Common Council is a court consisting of 240 representatives, returned by 35 of the wards in proportion to their relative extent. The 26th, or *Bridge Ward Without*, being represented by an alderman. The general business of this court is to legislate for the internal government of the city, its police, revenues, &c. The recorder is generally a barrister of eminence, appointed, for life, by the Lord Mayor and aldermen, as principal assistant and adviser to the civic magistracy, and one of the justices of Oyer and Terminer. The Livery of London is the aggregate of the members of the several city companies, of which there are 81, embracing the various trades of the metropolis. Of the city companies 12 are termed great companies, and from one or other of them the Lord Mayor was formerly chosen. In order of precedence they are—The Mercers, Grocers, Drapers, Fishmongers, Goldsmiths, Skinners, Merchant Tailors, Haberdashers, Salters, Ironmongers, Vintners, Clothworkers. Many of the companies are very rich and possess large halls, few of them, however having any pretensions to architectural beauty excepting the Goldsmiths' Hall, behind the Post-office; the Fishmongers Hall, near London Bridge, and the Ironmongers Hall, in Fenchurch Street, all of which are very elegant structures.

The Metropolitan Police.—The organization of the present most effective police force, is the consequence of Sir Robert Peel's celebrated bill of 1829. Before that period, the streets were often unsafe at night, from the small number and undisciplined of the watchmen to whom the preservation of order was entrusted. This force is divided into the city police, confined to the city proper, and the metropolitan police, which latter consisted in 1829, of 5649; and their jurisdiction extended 19 or 21 m. round the city. In 1848 the total number of persons apprehended by the metropolitan police was 70,866, of whom 24,556 were females; 84,746 were discharged by the magistrates, 81,348 disposed of summarily or held to bail, and 6643 tried and convicted, only 708 being acquitted. In the same year, the number of felonies was 16,924, affecting property to the amount of £286,979, of which only £28700 were ultimately recovered. Only about one-third of those apprehended could read or write. In the same year, there were 1478 persons reported as lost or missing, of whom 994 were restored by the police, the sentences were 191, besides 75 attempted, but prevented—lower numbers than in Paris, notwithstanding the difference of population. The fire-engine establishment has seventeen stations, where engines and firemen are kept always in readiness, and there are two floating engines on the Thames. In 1848 the number of fires was 845, and in 1851 above 1000.

Courts of Law.—The four courts of Chancery, Common Pleas, Queen's Bench, and Exchequer are on the W side of Westminster Hall, with which they communicate. The hall itself, which was built by William Rufus, and is 300 ft. long 65 ft. wide, and 110 ft. high, was formerly used for great

state trials, from that of Sir William Wallace down to those of Warren Hastings and Lord Melville, which were the last. It now serves merely as a promenade for lawyers, during the sitting of the courts. It is said to be the longest apartment not supported by pillars in the world, except the Hall of Justice at Padua. The Old Bailey Sessions house, adjoining Newgate, is the central criminal court for the trial of prisoners who have committed offences within 10 m. of St. Paul's. One or more of the judges in Westminster Hall sit here also in the Old Court, while the New Court is presided over by the Recorder and Common Serjeant of the city of London. County courts, of which there are 11 within the metropolis and its immediate neighbourhood, were established a few years ago for the trial of small debt cases, £50 being the limit. In 1848, there were 86 631 pleas entered before these courts. The Crown appoints the judges, who are barristers. Beside the above there are also the Clerkenwell Sessions-house, the city police court, which are held at the Mansion-house and Guildhall and are presided over by the Lord Mayor and one of the Aldermen and the 11 courts connected with the metropolitan police, each of which is presided over by a barrister of at least seven years standing. *Jury of Court.*—Of these there are four, Inner Temple, Middle Temple, Lincoln's Inn, and Gray's Inn. They were originally colleges for the study of law but now are little more than residences for lawyers. A law student in order to be called to the bar, has merely to be entered as a member of one of these inns and to attend a certain number of times in the common hall. The Inner and Middle Temple are close to Temple Bar between Fleet Street and the river. The roof of Middle Temple Hall, built in 1572, is considered the best specimen of Elizabethan architecture in London. Subordinate to the Temple are Clifford's, Clement's, Lyon's and New Inns. Lincoln's Inn is situated between Chancery Lane and the extensive square called Lincoln's Inn Fields. During a portion of the year, the Lord Chancellor sits in the old hall, and the Vice-Chancellors hold their sittings in adjoining buildings. A magnificent hall and library in the Tudor style, from the designs of Hardwick, have recently been erected in the gardens. Subordinate to Lincoln's is Furnival's Inn in Holborn. Gray's Inn stands on the N side of Holborn, and has attached to it two Inns of Chancery—Staple Inn, and Barnard's Inn. The gardens, first planted about the year 1600 were a fashionable promenade in the time of Charles II and for some time after.

Prisons.—There are altogether about a dozen criminal prisons, three of which are in the city. Newgate, situated near St. Sepulchre's Church, is a gloomy and massive structure, formerly used for debtors as well as criminals but now confined to felons, and accommodates properly about 400. Bridewell near Blackfriars Bridge, is a house of correction for vagrants, pilferers, or disorderly persons, summarily convicted before the Lord Mayor and Aldermen. Giltspur Street Compter, near Newgate, which it resembles in its architecture, is used as a place of confinement for all prisoners at the Central Criminal Court and the London Sessions, and summarily convicted within the jurisdiction of the city magistrates. A house of correction is situated at it. It holds about 250. Cold-bath Fields, which will hold about 1200 prisoners is a very extensive brick building, near Gray's Inn Lane, with spacious courts and airy grounds. The classification is good, and the silent system is followed, connected with hard labour. A large tread-mill employs 820 at a time. Millbank Penitentiary, or Prison, as it is now called, is an immense brick edifice, designed by Jeremy Bentham, and is said to have cost half a million sterling. The external walls form an irregular octagon, and enclose upwards of 16 acres of land. Its ground plan resembles a wheel, the governor's house occupying a circle in the centre, from which radiate six piles of buildings, terminating externally in towers. The average number of inmates is about 700. Every convict sentenced to transportation in Great Britain, is sent here previously to the sentence being carried into execution, and remains three months under close inspection. Horsepower Lane Jail, Southwark, the county jail for Surrey, contains about 260 prisoners. The top of the building is used as a place of execution. The Westminster House of Correction, in Tothill Street, which

is built on the Panopticon principle, has a court-yard in the centre, 250 ft. in diameter, with prisons round it for 600 persons, but the average number confined is 350. The silent system is pursued, and a good classification maintained. The Model Prison, Pentonville, contains 1600 separate cells. The inmates are detained for two years, and are taught useful trades, previous to transportation. The principal prisons for debtors are the Queen's Bench and Whitecross Street prisons.

Clubs.—Many of these establishments, having most elaborate and ornate buildings, form some of the principal architectural features of the metropolis. They are situated chiefly in the W end, and near Pall-Mall, and vie with each other in elegance and luxury. The principal ones are the Athenæum, possessed of a fine library, and having a great many articles and men of science and letters among its members; the Army and Navy, the United Services, the Guards, and the Junior United Services the Carlton, the great Tory, shading solo by side with the Reform club, in Pall-Mall the former limited to 800 and the latter to 1400 members, the Travellers, Brooks one of the oldest of the clubs, and the rallying point for the Wing party White's, also a very old club, frequented chiefly by the Conservative nobility the Conservatives, the Oxford and Cambridge; the Gerrick, frequented by lovers of the drama. The entrance fees vary from 5 to 80 guineas, and the annual subscriptions from 5 to 15. There is also great diversity in the number of members, which range from 500 to 1500. Many members, who have no homes in town, live almost entirely at their clubs during only a bed-room in the neighbourhood.

Theatres and other Places of Amusement.—The two principal theatres (1853) are Covent Garden and Her Majesty's Theatre, in the Haymarket, which have carried on, for several years, a rivalry in the representation of Italian operas. *Drury Lane*, for a series of years, has been used for the performance of English operas, melodramas, and aquatics. *The Haymarket*, and *Patience*, in Oxford Street, are now the chief theatres in the West and where the regular drama is performed. The other principal theatres are *Bath's Wells*, in Islington, the *Lycæum*, the *Adelphi*, *St James's Victoria*, the *Burton*, and *Astley's*, the last being exclusively devoted to equestrian performances. On the E. side of Regent's Park stands the Colosseum a polygonal structure, with a magnificent Doric portico and cupola, used chiefly for the exhibition of panoramic views. *Exeter Hall*, in the Strand, capable of containing 3000 persons, is used for concerts on a great scale, as well as for the annual Maymeetings of the different religious societies. In Hanover Square there is a large hall for concerts and other public assemblies. In Willis Rooms, in King Street, St. James are given the fashionable balls called *Almack's* also lectures, concerts, &c. One of the principal attractions in London is the Zoological Gardens, in Regent's Park. The Surrey Zoological Gardens, though on the whole greatly inferior to the former have some points of superiority they cover about 16 ac and contain a sheet of water 5 m. in extent. *Vauxhall Gardens* on the S., and *Cromwell Gardens*, on the N. side of the river are also favourite places of resort, where merriment, fire-works, and balloon ascents are among the principal attractions.

Museums and Galleries.—The British Museum, in Great Russell Street, now a spacious and imposing edifice, with an Ionic facade and sculpture in the pediment built during the last 20 years, was founded in 1753. It contains an immense collection of books, manuscripts, sculptures, coins, minerals, stuffed animals; Egyptian, Assyrian, Grecian, Celtic, and other antiquities. This noble institution is open three days in the week to the public, who avail themselves of the museum in great numbers. The library of printed books contains upwards of 400,000 vols. In Greek, and perhaps also in Egyptian antiquities, this collection is not surpassed by any in Europe. The National Gallery contains some very fine pictures, but, from their limited number, scarcely deserve the name of a national collection. One end of the building is used for the annual exhibitions, schools, and lecture-rooms of the Royal Academy. *Marlborough House*, in Pall Mall, contains a collection of paintings by English artists, the greater part of which was presented to the nation by Mr. Richard Vernon, in 1847. *Dulwich Gallery*, at Dulwich, 5 m. from Waterloo Bridge, contains a fine collection, especially of Dutch paintings, among which those of Copley occupy

a prominent rank. There are many fine collections of pictures and statues in the houses of the nobility some of which are thrown open occasionally to the public. The Museum of the Royal College of Surgeons, on the S. side of Lincoln's Inn Fields, a handsome new building, erected at a cost of £40,000, contains some curious skeletons and surgical preparations. The Beane Museum, on the N. side of Lincoln's Inn Fields, possesses many valuable objects, consisting of books, prints, MSS., drawings, maps, models, plans &c. There is also a museum in Whitehall Yard, connected with the United Service Club, and a Museum of Practical Geology in Jermyn Street.

Literature, Scientific Institutions, &c.—London has long been the favourite residence of literary men, drawn hither probably in older times as literature had assumed the present independent position, by the attractions of social patronage. But whoever may have communicated the original impulse, we have now the fact, that the metropolis is the great centre around which cluster the literary and scientific men of the country the seat of the principal learned institutions, and the headquarters of journalism and of the book trade. There are six morning, and nearly as many evening newspapers, and a host of other journals, which appear weekly or at shorter intervals. The morning papers, during the sitting of Parliament, require each a staff of 14 reporters. The chief learned institutions are the Royal Society, Somerset House, which was founded in 1658 the Society of Antiquaries in the same building founded in 1791; the Royal Academy of Arts, in Trafalgar Square, founded in 1768 the Royal Academy of Music, founded in 1822 the Royal College of Physicians, at the N.W. corner of Trafalgar Square, founded by Linacre, physician to Henry VIII and the present building, finished in 1825 the Royal Geographical Society, founded in 1830, with a choice geographical library and large collection of maps the Institution of Civil Engineers, established in 1818; the Royal Institution of British Architects founded in 1784, and possessing a good library of architectural works the Royal Institution of Great Britain, Albemarle Street, established in 1799 the Geological Society in Somerset House, established in 1807.

Educational Establishments.—At the head of these stands the University of London, established in 1827, solely for the purpose of conferring degrees, the candidates for which are for the most part supplied by University College and King's College. The senate consists of a chancellor vice-chancellor and thirty-five other members, who hold their sittings in Somerset House. The faculties are those of arts, law, and medicine and the examinations are held twice a year. In University College which was opened in 1828, the course of education embraces the classical tongues, sciences, history, jurisprudence, and medicine religion being wholly excluded King's College is on a similar plan except that religion is taught in it in accordance with the principles of the Church of England. The buildings are handsome, especially that of University College. There are likewise two Episcopalian theological schools, an English Presbyterian, a Baptist, and Independent, a Unitarian and a Jewish; and several schools for medicine, botany, chemistry, geology, &c. Of the numerous endowed schools, the most noted are—St. Paul's School, which provides a free education for 158 boys, the most advanced of whom are sent to Oxford and Cambridge, with exhibitions of about £50 to £130. Milton, the great Duke of Marlborough, and Halley, were pupils in this school, which has a high character. The revenues are about £6000 Charter-House is a corporation of *Charterhouse*, founded in 1611, and endowed with property which in 1811 yielded £22,000, it supports 80 poor brethren, and educates 40 boys, who are afterwards apprenticed or sent to the university. The Merchant Tailors School, founded in 1561, furnishes a very efficient education gratis to 100 boys, and to 150 others at rates varying from 5s. to 2s. 6d. a quarter; the school has 48 fellowships in Oxford, and seven in Cambridge. *Christ's Hospital*, Newgate Street, better known as the Blue-coat School, was founded in 1555, as a hospital for poor fatherless children and foundlings, although many are said to be now admitted without tending the qualification of poverty. The pensioners are in the gift of the governors, who are now 500 in number, and each of whom, in order to hold that office, must have contributed £500 to the funds of the institution. The establishment in London accommodates, at present, 920 boys; and

vessels, of 200 tons each. The vessels belonging to the port, in 1850, numbered 3735 sailing and 318 steam, aggregate tonnage 657,397 tons, 139,000 tons less than New York the year previous. Its foreign arrivals, in 1850, amounted to 214,127,327, between January and 1845 of above 25,000,000. The foreign exports of Liverpool for the same period, increased from 255,000,000 to 235,000,000, the enormous sea-going trade of London, however, renders it superior to every other port in the world, in the number of vessels and the amount of tonnage frequenting it; but no returns being published to show the actual amount of this tonnage, only an approximation can be given. About 5,000,000 tons of shipping enter the port annually of which 1,500,000 are from foreign ports 500,000 from the colonies, and 3,000,000 are coasters. The number of vessels engaged in the coal trade alone is above 10,000, importing, in 1851, 5,236,545 tons of coal. The exports consist chiefly of British manufactures, though a large quantity of the foreign imports also are re-exported. The imports consist of every kind of article brought from foreign parts: a list of them, in fact, would form an epitome of the articles of the trade of the world. For East and West India produce, London is the great port, tea, sugar, tobacco wine, corn, timber, tallow, hides, wool, and drugs, form large items on the list. All articles imported must be entered at the Customs-house, a large building by the river side, between London Bridge and the Tower: the long room, where public business is transacted, is 165 ft. long, 65 ft. wide, and 55 ft. high. The amount of customs taken here, affords an excellent means of estimating the comparative value of the imports of London. The amount received in 1849 was £1,070,176 (being only £700,000 less than the total amount of its foreign exports for the same year) while the total amount of customs for the United Kingdom for the same year was £25,453,595, showing that nearly a half of the whole amount was received at the port of London.

People.—With respect to the habits and condition of the general population of London, perhaps there is no set of men who are more devoted to their calling, whatever it may be, and who possess greater perception of character and a keener eye to their own interest, but as they have more regard to material comfort than mental improvement, they are inferior in general intelligence to the same classes in the Scotch cities. Their reading rarely extends beyond the Times, or the weekly newspapers, but the rapid spread of cheap publications will no doubt produce a change for the better. From the great sums of money spent by the higher classes in the metropolis, the London tradesman has probably a greater respect for the aristocracy than is entertained by the people in other large towns, and, although generally alive to his own interest, he is rather too apt to be imposed upon by persons of title, whether real or assumed, as the police reports so often testify. He is also a lover of peace and order as was evinced on the famous 10th of April, 1848, when 40,000 armed constables were enrolled for the defence of the city against the Chartists. Many of the London tradesmen are very wealthy, but, in general, they live without much ostentation, whereas many of the higher class of merchants are ruined by rying with the aristocracy in splendour of living. Skilled artisans of all sorts receive high wages, but they live too well to save much of their earnings. The Sunday, great numbers of these, as well as clerks and shopmen flock to Richmond, Hampton Court, Greenwich, Hammersmith, and other places in the neighbourhood of London, or by excursion trains to Brighton and other more distant localities, but there are many tradesmen, such as the wine-merchants, the soap and candle-makers, in the same locality, and the 'coppersmiths, men working for the cheap tailors near the Minster, who are obliged to ply their trade a great part, if not the whole of Sunday. To these may be added the needle-women, the 'saw-workers, or plaiters of soldiers' clothes, and the 'garret-masters, in the boat and shoe trade. Others, again, are so fatigued with the labours of the week, that they make the Sabbath literally a day of rest and do no real work. This is done to a great extent by milliners' apprentices, who work late, and carpenters who work for the 'strapping shags'—a name given to those shops in which they are taxed to an excessive degree. Notwithstanding all the wealth of London and its numerous charities for the relief of the indigent, it contains abundant misery and distress. In 1844-45 the money raised by rates, and expended for the relief of the poor amounted to £484,562. The number

cases are a quite distinct class, and practice buggery almost as a trade, nine-tenths of them are impostors and convicted vagrants, incurably idle, dishonest, and profligate. The really indigent are relieved by an institution called the *Refuge for the Destitute*.

History.—In the reign of Nero, London was already a place of considerable importance; and, after the Romans left Britain, it is supposed to have become the capital of the E. Saxon kingdom. Little more is known of it, during the Heptarchy, than that it suffered severely by fire in 794, 796, and 801. When England was united under one monarch, London became the metropolis of the kingdom and, soon afterwards, it was seized by the Danes. At the Conquest, London submitted to William, and received from him a charter which is still preserved, and, on the accession of Henry I. a new charter was granted—the model from which Magna Charta was taken—restoring the privileges which existed before the Norman Conquest. London Bridge, erected instead of a wooden one, was begun in 1176, and finished in 1209. This was, to a great extent, the same that was taken down in 1837. In 1216, the forest of Middlesex was cleared, and that portion of London N. of the city began to be built. In 1236, water-pipes began to be laid in the city and, early in the 14th century coal was first introduced. In 1268, the village of Southwark was incorporated with the city as it had previously served as a place of refuge for malefactors. In 1349 and 1361, London was visited by the plague. In 1381 broke out the rebellion of Wat Tyler who fell by the hands of the Lord Mayor hence the dagger on the city arms. In 1418, lamps were introduced, in the same century, some of the principal streets were paved, and wooden houses began to be replaced by others of brick. In the next century still greater improvements were effected. The water-supply was now connected with the city by a new of nobility's residence along the river one of which still remains at the entrance W. Northumberland House. In the 17th century, St. Paul's was covered with houses; and the space N. of the Strand, as far as Holborn and from Temple Bar to St. Martin's Lane, were extensively built upon as well as the neighbourhood of Charing Cross and Pall Mall. The New River was completed, and many houses were supplied with water, sewers were dug; smooth pavements were laid down for passengers; and hackney-coaches came into general use. But the streets were so narrow and dirty and the houses so squalid a state, that the city was severely ever ravaged from the plague, which sometimes committed great ravages. In 1666, the great fire broke out, and spread over 836 ac. destroying 10,200 houses, 90 churches, and many public buildings. In rebuilding considerable improvements were introduced and a fire in Southwark, 10 years after, gave a similar opportunity of improving that district. Population and trade now rapidly increased partly from the immigration of French Protestants driven from their country by the revocation of the Edict of Nantes. In the 18th century the metropolis steadily advanced in extent, prosperity, and splendour. In 1730 took place the Gordon riots, when the mob were in possession of the metropolis for two days, and committed frightful havoc. Since that disastrous outbreak, the peace of London has never been seriously endangered; and the troops stationed in and around the capital, together with the effective police forces that now exist, seem quite adequate to ensure it against any similar disturbances. The extension and improvements which have taken place in London during the present century, are still greater than at any former period, and further changes of great importance are now in operation. The most remarkable event of recent times in the history of the metropolis, is the carrying into effect of the Great Water Bill, originated by Prince Albert. The magnificent edifice, formed of glass and iron, in which was exhibited the unparalleled collection of manufactures and works of art there brought together was erected in Hyde Park, and opened May 1, 1851. It was above a third of a mile long (1846 ft.), 406 ft. wide, 48 ft. high in the centre, and 24 ft. at the sides, it covered 16 ac. of ground, was composed of 709 tons of wrought and 3784 tons of cast iron, 896,000 steel ft. of glass, forming 308,056 panes, and weighing 400 tons, 600,000 worth of wood, and cost £247,957. The number of exhibitors was 13,597, and the value of the articles exhibited was estimated at £1,761,529; of which, £1,081,567 belonged to the United

Kingdom, 279,901 to the colonies and dependencies of Great Britain, and 2670,429 to foreign countries. The Exhibition remained open till October 11, being 5 months and 11 days, and was visited by 6,080,195 persons, the highest number of visitors any one day being 109,766, and the smallest number, 8,327. The total money drawn amounted to £261,248, of which, £438,729 were for admission. The whole structure was removed in 1853, and is now (1853) in course of being re-erected, on a still more magnificent scale, at Sydenham. [Porter's *Progress of the Nation*, *Wool's London and Vicinity*, *Murray's Modern London*, *Cuninghame's Handbooks of London*, *N. Colburn's London in 1850-51*, *First Report of the Commissioners for the Exhibition of 1851 Private Information*.] See **SURREY**.

LONDON, a to. Upper Canada, cap. dist. of same name, on the Thames, 108 m. W. S. W. Toronto. It has 10 churches, a handsome jail and courthouse, and large barracks. It was laid out in 1826, and has since been twice nearly destroyed by fire. Pop. (1829), 7124. —The district extends along Lake Erie, between Gore and W. district; it is watered by the Thames, the Aux Sables, and numerous smaller streams, has, for the most part, an excellent soil, contains many portions which have been long settled, and are now in a high state of cultivation. Grain is exported in large quantities, and, on the mill streams, considerable business is done in sawed lumber, chiefly for exportation. Pop. (1842) 81,850.

LONDON (New) a city and port of entry, U. States, Connecticut, on the Thames, 3 m. from its entrance into Long Island Sound, lat. 41° 24' N. lon. 72° 30' W. It is for the most part indifferently built, but some of the houses recently erected, are neat and elegant. It has five churches, four academies, and a number of schools. The harbor is one of the best in the Union, is wide and spacious, defended by two forts, has a depth of 30 ft., and is rarely obstructed by ice. A considerable trade is carried on with the W. Indies, and the S. states. The whole and other fisheries are extensively prosecuted. Pop. (1800) 9005.

LONDONDERRY a maritime co. N. coast, Ireland bounded N. by Lough Foyle, and the Atlantic Ocean. E. by Antrim and Lough Neagh, S. by Antrim and W. Donegal. Length, 40 m., breadth, 24 m. Area, 610 431 sq. of which 318,285 are arable. The surface is a sandy peat moraine, numerous, especially in the center of the county, and towards its N. border, where several summits occur varying from 1200 ft. to above 1700 ft. in height. The principal rivers, besides the Bann, which forms its E. boundary are the Foyle, the Fungah, and the Roe. The soil is mossy, sandy, and stony, and, in places, clay-slate, basalt, and limestone are found in various localities. There are no mines worked in the county. The sales are extensive and fertile. The most improved portions of the county are the district of Lough Neagh, the valley of the Roe, the valley of the Fungah, including the coast of Lough Foyle between the mountains of these rivers, and the immediate vicinity of Londonderry on both sides of the Foyle. Agriculture, however, though in some respects improved, is still generally speaking, in a very low state. The number of acres under crops, in 1851, was 174,185, including wheat 5339 ac.; oats, 39,021 barley bere, and rye, 1540, potatoes, 26,783; turneps, 12,820 flax, 18,468 the remainder, pease, beans, mangel-wurzel, carrots, parsnips, cabbage, mowseed and clover &c. There is but little land in pasture; and the breed of cattle, with exception of pigs, of which great numbers are reared, is, in general, not much attended to. The staple manufacture is linen. In 1850 there were 169 national schools in the county, attended by 12,173 children. The county is divided into four baronies, two liberties, and 43 parishes and returns four members to Parliament—two for the county, constituency (1851) 4305 one for the city of Londonderry and one for the borough of Coleraine. Cap. Londonderry, other principal towns, Coleraine and Newtonlismady. Pop. (1841), 222,174 (1851) 191,888. —(Thom's *Irish Almanac*.)

LONDONDERRY, a city, nat. bor. and port, Ireland, cap. above co. 1 bank Foyle, 3 m. above its entrance into Lough Foyle, 128 m. N. N. W. Dublin, lat. (bridge) 54° 56' 26" N., lon. 7° 19' W. (a). It stands on an oval-shaped hill the buildings rising far above the sea in a very picturesque manner. The older part of the city is surrounded by a wall, about 1 m. in extent, which forms an agreeable promenade,

but the houses now extend for a considerable distance beyond it.

On the opposite bank of the Foyle is a large suburb, called the Waterside, which is connected with the city by a magnificent wooden bridge 1068 ft. long. Some of the streets are very steep, and, though lighted with gas, so few of them have an elegant appearance, that Londonderry may emphatically be called a town of back streets, still many of the private dwellings have a handsome appearance, and many of the shops are spacious and well furnished. The principal public buildings are the corporation-hall, courthouse, jail, customhouse, lunatic asylum, and a Doric column, surmounted by a statue, erected in memory of the Rev. George Walker, the intrepid governor of the city during the memorable siege in 1689; the doocan free grammar-school or Foyle college, theatre, linen hall, and the new barracks. The ecclesiastical structures are the cathedral of the see of Derry, and two other churches belonging to the Establishment; two R. Catholic chapels, with four Presbyterian, an Independent, and two Methodist meeting houses. Besides Foyle college, already mentioned, there are several schools, the most important of which are the national school, and Gwyn's charitable institution for teaching, clothing, and educating poor boys. The manufacturers of Londonderry are two mills for spinning flax, several flour-mills, distilleries, breweries, roperies, foundries, and tanneries, and a ship-building yard. The trade of the port is considerable. The principal articles of export are linen and linen yarn and large quantities of eggs, butter, wheat, oats, and oatmeal, amounting in value to above a million sterling. The chief imports are timber, barilla, sugar, rum, flax-seed, wine, and tobacco. The salmon fishery of the river and the Lough is valuable. At spring-tides, vessels of 500 tons can discharge at the quays. In 1850, there entered the port 716 vessels, ton. 64,854 and 391 steamers, ton. 102,552 and there departed 269 vessels, ton. 26,118 and 338 steamers, ton. 100,946. Regular communication, by steamers, is maintained with Liverpool, Glasgow, Greenock, and Camphillon. The bor. returns a member to Parliament, registered electors (1851) 754. The most memorable event in the history of Londonderry, is the successful resistance it made, in 1689, during a siege of 105 days, to the forces of James II. Pop. 18,685.

LONDONDERRY, per Eng. Lincoln 1510 ac. P. 228
LONG ISLAND, several isls., Indian Archipelago, Pacific Ocean.—1, A small isl., Java Sea, off W. coast Bill. lat. 2° 51' S. lon. 107° 30' E.—2, A small isl. Java Sea, near S. E. coast Mal. lat. 7° 16' S. lon. 113° 5' E.—3, An isl., N. coast Papua lat. (N. point) 0° 58' S. lon. 134° 50' E. (a). It has two remarkable peaks, the surface of one of which is much cut up, and very irregular and appears to have been a volcano. The island, though called 'Long' by Dampier, has rather a round figure, and its circuit is at least 40 m. The soil, in the vicinity of the shore, appears arid, and neither coconuts, nor any trace of habitation, have been seen on it.—4, An isl., off S. coast New Zealand, S. E. entrance to Foveaux Strait lat. 47° 17' S. lon. 167° 26' E.—5, A small isl., Queen Charlotte's Sound, Cook's Strait, New Zealand, N. E. and of Middle Island, lat. 41° 6' S., lon. 174° 27' E. (a), about 4 m. long and hilly, and the hollows filled with trees; the perpendicular cliffs on the coast are the resort of numerous sea-fowl.

LONG ISLAND, several isls. America.—1, U. States, New York, having the Sound of same name, 110 m. long by 2 to 30 m. broad, on the N. and the Atlantic S. and E. It is about 120 m. long, by 20 and under, broad, area, 15,000 sq. m., surface hilly on the N. and level on the S. It is indented with several inlets and bays, having water for vessels of 60 or 70 tons. On its S. W. end, which includes part of New York harbour are the two important suburbs of that city, Brooklyn and Williamsburgh.—2, One of the Bahamas, lat. (N. point) 25° 41' N. lon. 75° 19' W. (a), about 70 m. long by 3 to 4 m. broad. Pop. 800.—3, An isl., British N. America, Hudson's Bay, lat. 65° 5' N. lon. 109° W. (a).
LONG ISLAND.—1, A name applied to a group of the Hebrides, Scotland, comprising Lewis, Harris, Benbecula, N. and S. Uist, &c., which are supposed to have been formerly united, and comprehending an area of about 1200 sq. m.—2, An isl. off W. coast Ireland, co. Cork, bearing water Bay 5 m. N. N. W. Cape Clear, a coast-guard station, and inhabited chiefly by fishermen and pilots.

LONG KEYS.—1, *Thursloe, Bay of Honduras* (*Middle*), lat. 17° 10' N., lon. 88° 45' W. (*North*), lat. 17° 55' N. lon. 88° 40' W. (*South*), lat. 18° 57' N. lon. 88° 55' W.—3, *One of the Bahamas, on the E. side of the S.W. entrance to Crooked Passage*, lat. 23° 55' N.; lon. 74° 30' W.

LONG (Loon), a narrow picturesque arm of the sea, Scotland, stretching with a slight curve, N. and N.E. from Frith of Clyde, for about 16 m. between cos. Argyll and Dumfriesshire. An offset to the N.W. is named Loch Goll.

LONG YACHT a N. China, prov. Chekiang, on the banks of the Hwai-Chow or Gran river about 16 m. W.S.W. Nancha. It is a small place but has three pretty pagodas, all picturesquely situated.

LONGA, a small uninhabited isl. Scotland, Hebrides, co. Ross, 1½ m. E. Skulpa.

LONGANO, a N. to Naples, prov. and 6 m. S. Isauran, with manufacture of cutlery. Pop. 1124.

LONGAROKK, a vil. and par. Italy Venetia gov. and 56 m. N. Venice, cap. dist. r. bank Piave; with five churches. Pop. 10,200; dist. 9500.

LONGBOROUGH par. Eng. Gloucester 2770 ac. Pop. 656.

LONGBREEDY, par. Eng. Dorset, 2117 ac. Pop. 375.

LONGBURY par. Eng. Dorset; 1025 ac. Pop. 389.

LONGDON three pars. Eng.—1, Stafford 4511 ac. Pop. 1148.—2, Worcester 3909 ac. Pop. 577.—3, (agon Tones) Salop 796 ac. Pop. 89.

LONGEVILLE (Lan St. Amand or Longueville), a vil. France, dep. Moselle, on the side and at the foot of a lofty hill overlooking the valley of the Moselle, 21 m. E. Metz, with a castle, occupying the site of a Benedictine abbey which was founded in the sixth century and pillaged first by the Duke of Brandenburg, and then by the Swedes. P. 1867.

LONGFIELD par. Eng. Kent 581 ac. Pop. 162.

LONGFIELD two pars. Ireland Tyrone—1, (*East*), 9716 ac. Pop. 2350.—2, (*West*) 13,907 ac. Pop. 4162.

LONGFORD two pars. Eng.—1, Derby 8920 ac. Pop. 1192.—2, Essex 1108 ac. Pop. 215.

LONGFORD, an island co. Ireland prov. Limerick N.W. extremity bounded N. by Limerick and (Cavan & E. and S. Westmeath) and W. Roscommon from which it is separated by the Shannon and Lough Ree. Length 29 m. breadth, 22 m. area, 287,221 ac., of which 191,623 ac. are arable. The surface is generally level, with some low hills of a tuffaceous and pastoral character. The subsoil is limestone and clay-slate the soil fertile, and well suited to pasturage, with much bog the average depth of which is 30 ft. Marly clay underlies many of the boggy tracts. In some places to a thickness of 10 ft. between the bog and the limestone rock but in general the thickness of this bed of clay is only one foot. Ironstone and lead ore are found here the former said to be equal to the best Swedish ore but no workings have hitherto been attempted. Marble is raised in the vicinity of Rathfriland, in the S. part of the county. It is of a deep grey colour and polishes well. The principal lake in the county is Lough Gownagh it is of exceedingly irregular form, and about 5½ m. long. The number of acres under crop, in 1851 was 67,575 of which there were wheat, 1070 oats, 40 660 barley, beans, rye, 2770, potatoes, 11,330; tur sips, 3508. The rest of the county is chiefly grazing land. Great quantities of butter are made by the farmers and cottiers. Pigs are reared in great numbers. The feeding of sheep is not much attended to. Farms extremely small upwards of 9000 being under 15 ac. The condition of the working people is very low, they live almost entirely on vegetable food, but are nevertheless strong and healthy. Linens and coarse woollens are manufactured. In 1850, there were 61 national schools in the county, attended by 6143 children, being an increase in the attendance of about 600 since 1841. The county is divided into six baronies, and 26 parishes, and returns two members to Parliament. Principal towns, Longford and Granard. Pop. (1841), 115,491, (1851), 92,480.

LONGFORD a N. Ireland, cap. above co., 1 bank Camlin, 60 m. N.W. Dublin. It is a busy place contains a county courthouse, county prison, union workhouse, barracks, a handsome church and two or three places of worship for Dissenters, and, in the outskirts, a very fine R. Catholic chapel, of recent erection. There are also a number of extensive farms, corn-mills, tan-yards &c. A branch from the Royal Canal terminates here. Pop. 4144.

LONGFORGAN par. Scot. Perth, 3963 ac. P. 1797.

LONGFORMACUB-AND-ELLIS par. Scot. Perth; 21,350 ac. Pop. 411.

LONGHAM par. Eng. Norfolk, 1804 ac. Pop. 337.

LONGHOPE par. Eng. Gloucester 8070 ac. P. 1070.

LONGJUMEAU a vil. and com. France, dep. Belier-et-Oise, between two hills, on the Ivetto, 13 m. S. Paris. It is on a very ancient place, consisting of a very low street, with well-built houses, and has a parish church, with a Gothic porch a large stonehouse, handsome fountain, several terraces, a trade in corn, flour, wine, leather and cattle. P. 1996.

LONGLIER a vil. and com. Belgium prov. Luxembourg, on an affluent of the Lemme, 20 m. N.W. Arlon, with hamlets and two flour-mills. Pop. 1215.

LONGNEY par. Eng. Gloucester 1070 ac. Pop. 504.

LONGNI, a N. France, dep. Orne, 33 m. E.N.E. Alençon, with manufacture of leather and agricultural implements, blast furnaces and other iron-works. Pop. 1648.

LONGNIDDEY a vil. Scotland, on 5 m. W. by N. Haddington; a station on the N. British Railway P. 216.

LONGNOR par. Eng. Salop, 1890 ac. Pop. 278.

LONGOBARDI a vil. and com. Naples, prov. Calabria-Citra, dist. and 12 m. S. Paola on the Mediterranean P. 1990.

LONGOBUCO, a N. Naples, prov. Calabria-Citra dist. and 11 m. S.W. Rossano, in a deep valley, with some lead mines, and charcoal burning. Near is the Neapolitan hunting house. Pop. 5990.

LONGPARIKH par. Eng. Hants 5560 ac. Pop. 875.

LONGBOIVA or LAZENBOIVA a poor vil. and par. Portugal prov. Beira-Alta, com. and 15 m. N.E. Trancoso, in a low and unhealthy situation, 1 bank Lamegal. It has several churches, and a castle, which once belonged to the Knights Templars. Near it are sulphur and ferruginous springs with a bathing establishment, and a valuable mine of argillaceous mud. 1 op. 1680.

LONGSIDE par. Scot. Aberdeen 18,870 ac. 1 2962.

LONGSTOCK par. Eng. Hants 2902 ac. Pop. 480.

LONGTOW par. Eng. Cambridgeshire 1412 ac. P. 342.

LONGTON a market in England, on Stafford, 4 m. E.N.E. Newcastle-under-Lyne composed of the two townships of Longton and Lame End. It is pleasantly situated on a small stream, and on the N. Staffordshire Railway and has several spacious and well built streets, two parish churches, one a large and handsome building of stone, and the other of brick, with a tower containing a fine chime of bells; Independent Wesleyan New Methodist and R. Catholic chapels a large national school, an almshouse, and mechanics institution two large and handsome market-halls, and extensive manufactures of China and earthenware. Though only a humble village about 80 years ago its population, including the suburbs of Burton and Normacot, is 15,149.

LONGTOWN a market in England, co. Cumberland, 9 m. N. by W. Carlisle, 1 bank Eke with well kept streets, two dissenting chapels, and, about ½ m. distant, the parish church of Arthure, reckoned one of the finest ecclesiastical structures in Cumberland, and six schools. Inhabitants employed in cotton weaving for the Carlisle manufacturers, and in agriculture. Pop. 2384.—(*Land Commission*).

LONGUE a N. France, dep. Maine-et-Loire, on the Loire, 9 m. N. Saumur with manufactures of linens and cloths, tanneries, oil-works, and a trade in corn, clover-seed, fruit, hemp, cattle, and horses. Pop. 1553.

LONGWOOD a vil. and chapelry, England co. York (W. Riding), 3 m. W. Huddersfield, nearly built, and containing a chapel, and two Methodist places of worship. The manufacture of woollens, for which there are several mills, and of heavy goods is extensively carried on. Pop. 3023.

LONGWORTH par. Eng. Berks, 4415 ac. Pop. 1119.

LONGWY (san. Longue Vieille), a N. France, dep. Moselle, on the Belgian frontier, 16 m. W.S.W. Luxembourg. It ranks as a fortress of the fourth class, and is divided into the high and low town; the former seated on a steep rock, and regularly fortified; the latter merely a suburb, built on a lower slope of the rock rising from the r. bank of the Chier. It has manufactures of woollen and cotton stuffs, Fanci point, quilts, silkworms, leather, brandy, and beer and a trade in lead and in stone, which bear a high name, and have a large

sale in Paris. On the ruins of its ancient castle, Vauban, in 1689 constructed the present fortress, by orders of Louis XIV, who, from its important position at an angle of the French territory projecting into Luxembourg, called it the Iron Gate of France. In 1793, it was taken by the Prussians, and in 1815 by the Allies. Pop. 3492.

LONGO, a vil. and par. Italy, Venetia, gov. Venice, prov. and in S.W. Vienna, cap. dist., 1 bank Gae, at the foot of a lofty hill crowned by an old castle. It has a court of law, several public offices, and five churches. Pop. vil., 8786 dist., 37,850.

LONGINEN or **WIER LUXEMBOURG**, a vil. Germany, duchy Oldenburg, on the Hase, 84 m. S.W. Oldenburg with a church, and a trade in cattle. Pop. 1381.

LONGA (Kun), a vil. Hungary, co. Marmaros, on the Tisza, 6 m. from Szigeth, near its source, well suited for the manufacture of glass, is found. Pop. 1191.

LONGMAY, par. Scot. Aberdeen, 11 045 ac. P. 1064.

LONGNEKE, a vil. Holland, prov. Overijssel, 14 m. S.E. Almelo with a church and school and some manufactures of calicoes, &c. Pop. 1550.

LONG-LE-SACHTIES (anc. *Ledo Sabertus*), a tn. France, cap. of dep. Jura, in a basin nearly surrounded by the mountains of the Jura, whose lower hills, about 900 ft. high are here clothed with vines to their very summit, 46 m. S.W. Besancon.

It is, in general well and regularly built, clean, and lighted with gas, and its principal seat is bordered by a row of arcades. It has several fine fountains, a library, and museum, containing a gallery of pictures and antique manufactures of leather, horse polish, and especially salt, which is obtained in brine from a deep well at the N. angle of the town. The salt exported into the surrounding departments, and several Swiss cantons, is the staple trade. Other branches, however are carried on, Long-le-Sachties being an entrepot between the Jura, and Lyons and the interior, and dealing extensively in iron, timber, wine, brandy, cheese, resembling Gruyere, &c. Near it are the ruined castles of Du Pin and Montecourt. Pop. (1838) 8450.

LONGDALE, [the valley of the Looe], England, a div. co. Westmorland on its S.E. side, which gives the title of earl to the Lowther family.

LONGFAR, or **PULO LONGFAR**, an isl. Indian Archipelago, off W coast peninsula of Malacca, from which it is separated by a narrow strait, 21 m. long, by about 6 m. broad. lat. 7° 39' N. lon 99° E. The inhabitants are called by the Malays Orang Lati, or men of the sea, because it is almost their constant element, and furnishes their sole means of subsistence. They are mild and moderate in their manners.

LONGTOW, a tn. Banda Isle, on Banda Neira. It lies on a hill slope, consists of two long streets, and is esteemed healthy. It has an hospital, and near it pumice-stone is plentifully obtained.

LONGYA, a river, Austria, Croatia, which rises in Mount Kahluk, about 18 m. S.W. Wersdan flows S.E. and joins L. bank Save, after a course of about 70 m.

LONGZAC (Lan), a vil. and com. France, dep. Corrèze, 15 m. N. Tulle. It is built with great uniformity, and contains a battery which leans over somewhat like the tower of Pisa. Pop. 3644.

LOO, a vil. and com. Belgium, prov. W. Flanders, on the Loo Canal, 37 m. S.W. Brugis. It has manufactures of hats, a bleachfield, browneries, tanneries, flour-mills, and a trade in cattle. Pop. 1704.

LOO-CHOO, or **LOO-CHOO ISLANDS**, an isl. group, in the N. Pacific, half-way between Japan and the isl. of Formosa, forming, with the Medjorinoh or Mela-o-shimaha, the kingdom of Loo-choo, but occasionally tributary to the Chuans, lat. 28° to 38° N., lon 127° to 138° E. It consists of about 36 islands, the largest, and only one of considerable size, being Great Loo-choo, over the centre of the group lat. 31° (point) 36° 5' N. lon. 127° 39' E. (n.), and about 80 m. long, by 10 or 12 m. broad. The N. end is high and bold, and the N.W. is usually rugged and bare. The S.E. side of the island is low, with very little appearance of cultivation, the S., S.W., and W. coasts, particularly the two former, are of moderate height, fertile, and highly cultivated, and here the mass of the population reside. The vegetation partakes of the characters both of the temperate and of the torrid zones. Copper, tin, and sulphur abound. The inha-

bitants are rather low in stature, but are well formed. Their style of walking is slow, and somewhat stately, sitting very well with the flowing drapery which they throw around them. Their colour is not good, being mostly of a deep copper, but the expression of their countenance is peculiarly sweet and intelligent. The working-classes are invariably in a tattered, filthy state. There are colleges established here for the education of the upper classes; the established language of this schools, in all cases, being that of the court-dialect of China. In this language all official correspondence with strangers is framed. Fruits of various kinds, including peaches, pears, figs, &c., Indian corn, sweet potatoes, eggs, fowls, hogs, and bullocks, are to be obtained here.—(Hall's *Loo-choo*, Harbinger, Martin's *China Voyages of the Bussanang*.)

LOO-KIANG, **LOU-KIANG** or **LU-KIANG** a large river, Asia, one of the head streams of the Salween (*valley of the Salween*), an isl. See **LOO-KIANG**.

LOOCHISTY, a tn. and com. Belgium, prov. E. Flanders, 6 m. S.E. Ghent with textile manufactures, breweries, and three flour and three oil mills. Pop. 8772.

LOODIANA or **LOODIANA**, a tn. Hindoostan, prov. Delhi, 115 m. S.E. Lahore lat. 30° 56' N. lon 75° 48' E. on a small affluent of the Sutlej and within 2 m. of the L. bank of that river. Loodiana has long been one of the head military stations of the British in N.W. Hindoostan. The climate here during four months of the year is excessively cold and, in summer, intensely hot. The rains also are heavy. Shawan is manufactured to a considerable extent.

LOOE two small rivers, England, co. Cornwall. The first falls into the British Channel near Heston, by a beautiful estuary called Looe Pool, and the second, after a short course, enters the channel at Looe.

LOOE, two contiguous detached boroughs and seaport tns., England co. Cornwall.—1. [East] on L. bank, and at the mouth of the Looe, here crossed by an elegant bridge of 13 arches, connecting with W. Looe, 14½ m. W. Plymouth. It is defended by a fort, has a custom-house jail, handsome Episcopal chapel, places of worship for Wesleyans and Friends, and an endowed school. Pichards are extensively fished and, with the copper lead-ore, &c., are exported. Pop. 970.—2. [West], on R. bank Looe, opposite E. Looe with two Episcopal chapels and Independent and Bible Christian meeting-houses. Copper and lead are exported to Swansea. The pichard fishery is also actively prosecuted. The harbour is not bad commodious and the river is navigable for vessels of 100 tons. Pop. 746.—(Local Correspondent.)

LOOMCHANG, a tn. and fort Blam, on the road from Marabau to Bankok. It is a place of considerable traffic in cotton, cotton cloth, bees wax, myrror wood, ivory, hides, and timber, carried on chiefly by means of boats.

LOON or **LAUN**, or **YERLOOF** a vil. Holland, prov. N. Brabant, 12 m. S.W. Hertogenbosch. It has a townhouse, two churches, and a school; and three well attended horse fairs. Pop. (agricultural), with environs, 1800.

LOOF HEAD, or **CAPN LMAN** a lofty promontory W coast Ireland N. side of entrance to the Shannon, with a fixed light lat. 52° 38' 39" N. lon 9° 53' W.

LOOS, a tn. France, dep. Nord, 5 m. S.W. Lille on the High Denle. The extensive buildings of the fine abbey which is possessed before the revolution of 1789, have been converted into a central house of correction, fitted to contain 1650 convicts. It has manufactures of printed calicoes, white lead, sulphuric acid, and soda, and likewise some cotton and flax mills. Pop. 3014.

LOOS, LOONA, or **LOONIE** a market to Hungary, Thither Danube, co. and 7 m. S.E. Oedenburg, on the Spitalbach with a church, castle, and a trade in wine. Near it is a mine of quicksilver. Pop. 1127.

LOOBE, par. Belg. Kant., 960 ac. Pop. 1542.

LOOTENKULLE, a vil. and com. Belgium, prov. E. Flanders, 12 m. W. by N. Ghent, with a neat church, three schools, a distillery, a brick-works, and some cotton and oil mills. Pop. 8041.

LOOZ (Flamish, *Zorgloon*), a vil. and com. Belgium, prov. Limburg, on the Herik 9 m. S. Hasselt. It was once capital of a county, but is now much decayed. It contains a church, chapel, castle, almshouse, courthouse, and several schools; and has manufactures of vinegar, and an oil and a flour mill. Pop. 1518.

LOPATKA a cape, Asia, forming the S. extremity of the peninsula of Kamtschatka lat. 51° 2' N lon. 156° 46' E. It consists of a low and barren tongue of land, widening out towards the N. and terminating in a mountain, which bears the same name.

LOPEN par. Eng. Somerset 499 sq. Pop. 477
LOPERA a tn. Spain, Andalucia, prov. and 25 m. N W Jaen. It has two well-formed squares, a Gothic parish church, an old Moorish castle, two old convents, one of them now used as a hospital, a primary school, and a trade in wheat and oil. Pop. 2179

LOPEZ (GARCIA), Africa, W coast, forming the S. point of the Bay of Biafra; lat. 5° 36' S; lon. 8° 45' E. (a.) It is very low but bold round both sides within ½ m., appearing, at a short distance, rugged, with bushes close to the water. The extensive bay which it forms 14 m. long has several rivers and creeks, all very shallow running into it.

LOPHAM two par. Eng. Norfolk 1 (North) 3000 ac. Pop. 632.—2 (South) 1897 ac. Pop. 731

LOPHEM, a vil. and com. Belgium, prov. W Flanders, on the canal and S. S. Bruges with manufactures of linen, and a trade in flax, bark and timber. Pop. 1436

LOPPERESUM a vil. Holland, prov. and 11 m. N W Groningen with two churches, and a school some brick making, linen weaving, and brewing. Pop. (agricultural) with cowboys, 1430

LOPPINGTON par. Eng. Salop, 8414 ac. Pop. 599
LOKA a river Afghanistan runs 50 m. N.E. Quetta, lat. 35° 49' N; lon. 67° 20' E., and joins itself in the sands of the Khormen desert, after a S.W. course of about 80 m.

LOREA DEL RIO a tn. Spain Andalucia, prov. and 28 m. E.N.E. Seville. Nicely situated and well built. It has a parish church, a handsome townhouse, an hospital and three public schools, manufactures of woollen and linen cloth hats, and chocolate, several oil and flour mills, and an important annual fair. Pop. 4633

LOREANCA DE TAUBA a tn. Spain, New Castile, prov. and 15 m. from Guadalajara, with a church, primary school, hospital, oil and flour mills, and a trade in corn wool and charcoal. Pop. 1103

LOREA [anc. *Elencor*] a city Spain, prov. and 42 m. S W Murcia, on the S. slope of Mount Cacho, the summit of which is crowned by a castle, with regular works in a good state of defence. It consists of two parts—an ancient, situated in the vicinity of the castle, and consisting generally of mean houses and narrow winding streets, and a modern, of a much superior description consisting of houses which have a pleasing and substantial appearance, and streets which, though somewhat irregular are, on the whole, well formed. It has eight parish churches. San Patricio, consisting of three naves, and entered by a magnificent portal, is the only one noteworthy, three naves and several suppressed monasteries, an episcopal palace, a court-house, a handsome office, occupied till 1837 as a college, which was then suppressed and incorporated with the university of Granada, several elementary schools, and an hospital. The manufactures consist chiefly of coarse woollens, linen, leather hard soap, and earthenware, and there are several oil and other mills, dye-works, brick and tile works, some trade in grain, barilla, aspartic cattle, and another a weekly market, and an important annual fair which lasts fourteen days. In the vicinity are mines of lead, which became the subject of much speculation in 1840 and were begun to be worked on a very extensive scale. They have not proved profitable, and have been, in a great measure, abandoned, though the workings are still partially carried on. Lorea is a very ancient place, and makes a considerable figure in the wars of the Moors. It suffered much from the French during the Peninsular war. Its most celebrated natives are the painters Juan de Toledo Pedro Canocho, and Baltasar Martinez. Pop., including dist., 46,334.—(Mason, *Decree de España*.)

LORENCH, two places, Germany.—1, A vil. Nassau, on the Rhine, at the confluence of the Wip, 15 m. W S.W. Wiesbaden. It has a church, a mineral spring, and a trade in wine. Pop. 1785.—2, A vil. Württemberg, circle Jaxt, 23 m. S.W. Ellwangen, on a branch near r. bank Rem. It has a church, an old monastery, manufactures of woollen and shoddy products, and a trade in cattle. Pop. 1730

LORD HOWE'S ISLANDS—1 A group, E. coast, Australia, nearly opposite Port Macquarie; lat. 31° 37' S.,

lon. 159° 14' E. (a.), composed of one large and several smaller islands.—2, A group of small islands, S. Pacific Ocean; lat. 8° 50' S. lon. 159° 51' E. (a.) at the S. entrance of Endeavour Strait.—3, One of the Society islands, lat. 16° 50' S; lon. 154° 21' W. about 60 m. long and 4 broad, discovered by Captain Wallis in 1767, and seen again by Cook in 1774, who found it to be composed of several smaller islands, united by breakers.

LORENA a tn. Brazil, prov. and 130 m. N.E. São Paulo, r. bank Paraíba with a parish church, and a considerable trade in coffee, sugar, and poultry. Pop. dist. 8000.

LORENZO MANQUER, the original name of Delagoa Bay, S.E. Africa (see note)

LORENZO (San)—1 A tn. Cantabria, N.E. shore, Isl. Green Canaria, about 5 m. from Palmas, with some trade in corn, wine, and fruit. Pop. 1977.—2 A tn. Naples, prov. Calabria-Ultra I dist. and 13 m. S.E. Reggio with two churches. P. 1680.—3, Two tns. Papal States.—1, Delago. Urbino and Pesaro, on the Cosmo 17 m. S.E. Urbino. Pop. 1050.—2 (*ex-Grotte*), Delago. Viterbo, on an eminence 5 m. S.E. Aqua Pendente, with several spacious streets of well-built houses.

LORENZO (San) a small Isl. Port of Callao lat. 12° 4' S; lon. 77° 19' W. (a.) Its highest summit, 1984 ft. is the only place on the island where vegetation can exist, the other heights being barren sandy hills. The island is principally composed of limestone, clay, and slate.

LORENZO (San) a river La Plata, rises near lat. 37° S. flows N.E. about 120 m. and joins r. bank Uruguay, about 35 m. above its confluence with the Paraguay.

LOREO a vil. and par. Italy Venetia, prov. and 27 m. S.W. Venezia, cap. dist. and on the canal of same name. It has a court of justice two churches and a trade in cattle, wool, and goods, flax, and corn. Pop. 2100

LORETO a tn. Mexico cap. Lower California, near the S. side of the peninsula lat. 26° 15' N lon. 112° 7' W

LORETO a tn. Naples, prov. Abruzzo-Ultra I dist. and 4 m. S.E. Civita-di-Penne. It has eight churches, a Benedictine monastery and three other convents, a day work an extensive paper mill and an annual fair. Pop. 4900

LORETO or *Louretto* a tn. Italy The Marche, 11 m. N.E. Macerata, near the mouth of the Musone. It stands on a bold and commanding eminence, and is surrounded by deep moats and walls, flanked with towers, but at one end considered capable of defence. It is well built and, notwithstanding its elevated site, is well supplied with water by an aqueduct. It is of comparatively modern date, and owes its existence to the Santissima Casa [Most holy house] with regard to which the legend is, that it is the very house in which our Saviour lived at Nazareth, with the Virgin Mary and Joseph, having been transported thither by angels in 1294. The town is composed of one long narrow street, filled with shops, for the sale of crowns, medals, and pictures, of the Madonna di Loreto, and the trade thus driven, with the special sanction of popes, is of great extent, and yields large returns. The church, called Chiesa della Santa Casa, is in a square, one side of which is occupied by a Jesuit convent, and another by the governor's house, built after the designs of Bramante. The church occupies a third side. It was built by pope Sixtus V., is entered by three superb brown doors, has a bell tower, and is of great height. The Santa Casa, which is considered the great ornament of the interior, is a brick house of the simplest and rudest construction, but its store of rich treasures and miscellaneous relics is so great, that description would be useless. Several of the most costly disappeared during the French invasion. The Casa is enclosed in a Fodera or marble casing, adorned with exquisite sculptures, by the most eminent masters; and the church, throughout, is covered with magnificent mosaics, arabesques, and frescoes. The number of pilgrims continues to be great, but is far less than it used to be in earlier and darker ages. The three days' lodging and entertainment, which each pilgrim is entitled to receive, seem to be not the least of the inducements to undertake the pilgrimage. Pop. 6000

LORGUER [anc. *Lorena*] a tn. France, dep. Var, 7 m. W.S.W. Draguignan, r. bank Argens. It has a handsome church, manufactures of woollen cloth and olive-oil, tanneries, distilleries, dye-works, marble quarries, and six annual fairs. Pop. 2844.

LOBIENT, a seaport in France, dep. Morbihan at the mouth of the Sene, in the Bay of Biscay 40 m. W. Vannes, ranking as a fortress of the third class. Its streets are regular, wide, well-paved, but dull in appearance, and by no means clean, though lined by houses of good construction; its public squares are large and handsome, and its walks pleasant. The harbour is spacious, safe, and commodious, surrounded by magnificent buildings, among which is a tower, used as a lighthouse and observatory, and lined by handsome quays, where the largest vessels can lie alongside. In the roads, whole fleets can ride in safety. At some distance below the harbour, its entrance is commanded by a fort built on the Isle St. Michel, and mounting it is said 500 guns. The isle is, moreover, covered by a range of yellow buildings, forming the lazaretto. The dock-yard and arsenal are among the most complete and extensive in France, having 15 or 16 building slips. The principal buildings are the parish church, the Prefecture Maritime, situated on the port at the entrance to the dock yard, and, adjacent to it, an extensive series of buildings, erected, in 1866 by the delivante 'Compagnie des Indes Orientales' [R. India Co.], under the auspices of the notorious Law of Lauriston, who once resided in the prefecture. Almost all the working classes are employed in connection with the dock-yard, and the only manufacture deserving of notice is that of hats. The trade and commerce, once of considerable importance, have greatly decayed. The exports at present are chiefly hair, wine, brandy, opium, woolsens, cottons, hardware, iron, clock work, &c. Lobient possesses courts of first resort and commerce, a chamber of commerce and exchange, a school of hydrography of the second class, and a communal college. At the beginning of the 17th century, Lobient was a mere village, and, all at once, rose into importance by the exertions of the schemer and the same man already mentioned, and suffered, of course with the fall of that association. In 1770, it was made one of the four stations of the French navy and a free port, and deemed its prosperity re-established, when the revolution of 1798 broke out, and almost instantaneous annihilated its commerce. The shock then sustained has never been recovered. Pop. 19,106.

LOBINCE (Szeer) several places, Hungary.—1, A vil., co. and 20 m. from Tolna, near the Bar with a Protestant church. Pop. 1718.—2, (Szent Kato), A vil. Either Danube, co. and 26 m. from Pesth, on the Zagyva with a R. Catholic church. Pop. 1217.

LOBRIOL [sno Aurock], a tn. France, dep. Drôme, 13 m. S.S.W. Valence, 1 bank Rhône, about 2 m. above its confluence with the Rhone. On the opposite bank stands Livron, and the two towns are connected by a very handsome bridge. It has manufactures, and spins a good deal of silk. extensive nursery grounds, and trades in skins. Pop. 2100.

LOHMES, a tn. France, dep. Nièvre 38 m. N.E. Nevers. It was formerly fortified, still possesses the remains of an old castle, and has manufactures of castles, brandy distilleries, brick and tile works, lincolns, and some trade in wood, wine, iron, and wool. Pop. 2108.

LOHMONT, a tn. France, dep. Gironde, about 3 m. N.E. Bordeaux, r. bank Garonne. It has a small harbour with building-docks, and a powder magazine. Pop. 2200.

LORN, an anc. dist. Scotland, Argyleshire, comprising the greater part of the tract between Loch Awe, on the S. and E., as far S. as Loch Melford, opposite the mt. of Luing; Loch Lavean on the N., the Atlantic and Loch Linne on the W. The principal town is Oban.

LOBOUK (Lai), or LOBOUK-BOTHEMAT, a tn. France, dep. Lot-et-Garonne, 10 m. E. Marza. It was once governed by its own lords, the ruins of whose castle still exist. It trades in cattle, and in wine of good quality, the produce of the district. Pop. 1257.

LOBQUH [sno Lorna] a tn. Spain, prov. and 10 m. N. Murcia, at the foot of a well-wooded hill, 1 bank Segura. It has a church, townhouse, prison, and primary school; oil and flour mills, and a trade in wood and cheese. Pop. 1020.

LOREACH, a tn. Baden, circle Upper Rhine, emp. bail, 1 bank Rhine, on the borders of Switzerland, 5 m. N.E. Basel. It has a college or polytechnic, and manufactures of shins and calico, tobacco, silk, and mixed goods, a trade in wood, wine, and fruit; several dye-works, saw, and other mills. The jurist Hugo was born here, and the mathematician

Euler was the descendant of a family of this town. P. 2500. Area of bail, 73 sq. m. P. 27,761.

LOREANNE (Lai), (German, *Lotharingen* and *Austrasia*, *Lotharingen*) an extensive prov. France, now included in depts. Vosges, Meurthe, Moselle, and Meuse. Under the Romans, it formed part of the Belgic division of Gaul; at a later period, under the successors of Clovis, it constituted the kingdom of Austrasia, and was afterwards united to the empire of Charlemagne. It was subsequently created into a duchy and afterwards possessed by dukes of the House of Austria, and, with the duchy of Bar, was annexed to its crown. In 1786, by the treaty of Vienna, these two duchies were exchanged for that of Tuscany and ceded, in inheritance, to Stanislas Leszczynski, king of Poland, and father in law of Louis XV. On his death they passed to the crown of France.

LOREHA par. Ireland, Tipperary 16 880 aa. 1 2880.

LOREHE [sno Lorient], a tn. France, dep. Loiret, 28 m. E. Orleans with some trade in wool. Pop. 1658.

LORECH a market tn. Hesse-Darmstadt, prov. Starkenburg, emp. dist. about 9 m. E. Worms with a chapel and a townhouse. It had once one of the most celebrated and best-endowed monasteries in Germany. Pop. 2469.

LOREICA a vil. and com. Italy, Piedmont, div. Genova, prov. Chiavari 6 m. from Chiavari, near the confluence of the Mulvare and Tiele with the Lavagna. It has a handsome church, and manufactures of fine silk goods for the market of Genova. Pop. 1676.

LORELM par. Ireland, Carlow 5845 aa. P. 1245.

LORE [sno Lure], a group of three isles, Atlantic off Sierra Leone, consisting of Factory Island, Fama, and Ruma. Timara is in lat. 9° 28' N. lon. 13° 52' W. (n).

LOSAR, a tn. Spain, Estremadura, prov. and 63 m. N.N.E. Cáceres with narrow irregular and steep streets a church three chapels, prison, small hospital, and school. Inhabitants engaged in tillage, cattle-rearing, and weaving. Pop. 2081.

LOREACOS a tn. Spain, prov. Navarra, 65 m. from Pampeluna; with two churches, a court-house, hospital, a primary school, manufactures of leather, several distilleries, a weekly market, and an annual fair, which lasts 12 days. Pop. 2098.

LORECH or **LORECH**, a market tn. Austria, Moravia, circle and 5 m. from Brunn with a church, a trade in fruit, and fine quarries of black marble. Chalcodones are found in the vicinity. Pop. 2287.

LORECHUTZ, or **LORECH**, a tn. Austria, Moravia, circle and 18 m. N.W. Olmutz, 1 bank Trychowska with a church and an hospital, manufactures of written cloth, tobacco and cardinals; a mill, paper and two other mills. Pop. 2522.

LORECHWITZ, a vil. Saxony, circle and near Dresden, r. bank Elbe, here crossed by a ferry, in a narrow and deep valley. It contains a great number of handsome villas. Pop. 1080.

LOSDZEY or **LORECH** a tn. Russian Poland, woiwoj Augustowo 26 m. E.N.E. Suwalki with two churches, and a synagogue. Pop. 1557.

LOHEHEIM a vil. Rhineland Prussia, gov. and 18 m. S. Treves with a R. Catholic church and several mills. P. 1917.

LOREAI, or **WOMANAI**, a tn. Prussia, prov. Sillesia gov. and 50 m. S.W. Oppeln, on a lake with two churches, a synagogue, hospital, manufactures of tobacco and starch, a bleachfield and dye-works. Pop. 2047.

LORESEN, a vil. Prussia, prov. Sillesia, gov. and 82 m. S.S.E. Breslau with two churches, a castle, tile-works, and a mill. Pop. 1182.

LORESE, a vil. Holland, prov. Overijssel 22 m. E.S.E. Almelo; with two churches and a school. P. [with environs], 1800.

LOSSIEMOUTH a vil. and seaport, Scotland, at the mouth of the Lossie on the German Ocean, co. Moray, 5 m. N. by E. Elgin, with which it is connected by the Morayshire railway. It is chiefly inhabited by fishermen and sailors, exports grain, herrings, and cod-fish, and imports coals salt, &c. The river has a N.E. course past Elgin, and is about 26 m. long. Pop. 902.

LOSSINI or **LOSSINI**, an isl. Adriatic. See OSMO.

LOSSNITZ, a tn. Saxony, circle Zwickau, 14 m. S.S.W. Chemnitz. It is walled, has a court of justice, contains two churches, manufactures of hosiery and of chemical products, several mills, and a general trade. Pop. 4799.

LOBBONCE, or **LOBBONCE**, a market to Hungary. Hither Danube, ca. Neograd, esp. dist., on the Tugar, 85 m. N N E. Pesh. It was once walled and well built, containing a Protestant and a Catholic church, a Protestant gymnasium, and a handsome courthouse but was nearly destroyed during the recent Hungarian war.

LOBTUCK.—1 A hamlet England co. Lancaster, 5 m. W Bolton. Pop. 350.—2 (Grosden) A township, England, co. Chester, 2 m. E. Northwich. Pop. 518.

LOBTUCK or **LOBTUCK**, a vil and par Switzerland, can and 18 m N E. Solence with manufactures of woollen hosiery, thermal baths, of a low temperature, considered efficacious in gout and rheumatic affections, and a marble quarry in the vicinity. Pop. 1044.

LOBTWITHIEL, a market tn. and par England, co. Cornwall. The town, in a beautiful valley, through which runs the Fowey 5½ m. E. by E. Bodmin has a fine old church, and three Dissenting chapels, a guildhall and market-house, two schools, and a mechanics institute. Wool-combing and tanning are carried on, and there is a brisk trade in the conveyance of iron-ore, and other mineral productions, to Fowey for shipment to Wales, and in bringing back coal, lime, and timber for the supply of the surrounding district. Area of par., 11.9 sq. m. Pop. 1658.—(Local Government.)

LOT [see *Olds* or *Olds*].—(Local Government.) A particularly grassy, are fastened. The only mudi in which is raised in sufficient quantity to supply several blast-furnaces. Fine buildings, and extensive beds of gypsum and marl are wrought. Cork-cutting is perhaps the most important manufacture but sail-cloth and household linen, calicoes, muslins, glass, paper, leather, glue, earthenware, and brim are also made, though to a limited extent. This department early distinguished itself in the Reformation, and as one time furnished an asylum to Calvin, at Geneva, the protection of Margaret of Valois. For administrative purposes it is divided into 4 arrondissements—Agen, the capital, Marmande, Nérac, and Villeneuve d'Agon subdivided into 30 cantons, and 312 communes. Pop. (1852), 341,845.

LOT, an island dep. France, bounded N by dep. Gironde, E Cantal and Aveyron, S Tarn-et-Garonne, W Lot-et-Garonne and Dordogne lat. 44° 15' to 45° 5' N; lon 1° 2' to 10° E. greatest length, W to E 60 m; greatest breadth, N to S. 66 m; area, 2020 sq. m. The greater part of the surface is occupied by an extensive plateau of limestone, covered occasionally by argillaceous and siliceous deposits. The plateau, traversed in all directions by ridges of hills, and scooped out into deep valleys, abuts on the E. on primitive rocks or granite, forming a prolongation of the mountainous Cantal. These mountains, projecting into the department, form the water-shed between the Dordogne and the Lot. The culminating height is Mont Bastille, 3422 ft. the mean height of the plateau above the sea is 1476 ft. The department belongs entirely to the basin of the Garonne, being traversed from E to W., in directions almost parallel, by its two most important tributaries—the N by the Dordogne, with its affluent the Cère; and in the S. by the Lot, which gives the department its name, with its affluent the Célé.

Rather less than one-seventh of the surface is waste, about one-fourth wood, one-ninth vineyard, and one-half arable land and pasture. The deep soils of the lower grounds are devoted to wheat, maize, barley, and oats; also hemp and tobacco, the lighter soils to rye, roots, and buckwheat. The river slopes are generally planted with vines, and produce generally a common wine of good quality, the best being those of Cahors and Grandmont. The culture of the white mulberry is general and the rearing of silk worms is extensively prosecuted. Excellent truffes, known by the name of truffes of Périgord, grow within the department, and form an important article of trade. The principal fruits is prunes, the drying and preparation of which forms a chief branch of rural economy. Minerals are of little importance. Some mines of iron exist, and lead, calcareous, and coal are found also lithographic stone, barite stone, fine marble, and alabaster, marl, potash clay, and fullers earth. Manufactures have made almost no progress, and trade, also very limited, consists chiefly in agricultural produce. For administrative purposes, Lot is divided into 5 arrondissements—Cahors, the capital, Figeac, Gourdon, subdivided into 29 cantons, and 310 communes. Pop. (1852), 266,594.

LOT or **LOTT**, a dep. France, bounded N by Dordogne, E Lot and Tarn-et-Garonne, S Gironde, and W Landes, lat. 44° to 44° 45' N; lon. 0° 5' W to 1° 4' E. It is very compact, and nearly of a rhomboidal form; length and breadth each about 50 m., area, 2080 sq. m. This depart-

ment, which nowhere presents any lofty ridges may be regarded as an elevated and undulating plain, furrowed throughout its length and breadth by valleys of more or less extent, each occupied by a stream. The strata are generally calcareous. The whole area, which has a general slope towards the W., belongs to the basin of the Garonne, which traverses it in a N W direction receiving within the department, on its left bank, the Gers and Risle, and on its right the Lot. The Dordogne, another tributary of the Garonne, waters a small part of the N. Not quite one-fourteenth of the whole surface is waste, about one-eighth wood, one-eighth vineyards, and can considerably more than one-half arable. A small part of the W., also, is occupied by the barren sands characteristic of the Landes. The sloping banks of the streams are generally clothed with vines. The only wines of any repute are those of Figeac, Thézac, Buzet, Cahors, Arnaud, and Marmande.

A great proportion of the others is made into brandy. The principal grain crops are wheat, maize, rye, &c., about one-fourth of which is exported. Among other crops may be mentioned tobacco, hemp, and fruit, particularly prunes and chestnuts, which form an important branch of trade. The principal trees are the oak-tree, the common oak, and the *Silva quercus* or cork tree. The latter supplies the principal part of the consumption of France. Great numbers of poplars, particularly poplars, are fastened. The only mudi in which is raised in sufficient quantity to supply several blast-furnaces. Fine buildings, and extensive beds of gypsum and marl are wrought. Cork-cutting is perhaps the most important manufacture but sail-cloth and household linen, calicoes, muslins, glass, paper, leather, glue, earthenware, and brim are also made, though to a limited extent. This department early distinguished itself in the Reformation, and as one time furnished an asylum to Calvin, at Geneva, the protection of Margaret of Valois. For administrative purposes it is divided into 4 arrondissements—Agen, the capital, Marmande, Nérac, and Villeneuve d'Agon subdivided into 30 cantons, and 312 communes. Pop. (1852), 341,845.

LOTH par Scot. Sutherland 11 m by 5 Pop. 640. **LOTHIAN**, an extensive and fertile dist. Scotland, lying along the S. shore of the Firth of Forth, comprising the three cos. Haddington, Edinburgh and Leith and Galloway, respectively East, Mid, and West Lothian.

LOTHINGEN, a prov. Prussia. **LOTHINGEN**, a remarkable rock in the N Pacific lat. 59° 50' N lon. 142° 38' E. Its angular likeness to a vessel under canvas has excited much surprise and disappointment in those who have been deceived by it. It rises almost perpendicularly to the height of near 800 ft.

LOTTE, a vil. Rhinish Prussia, gov. Münster, circle Tecklenburg, with a parish church and an annual fair P 1300. **LOTZEN**, a vil. Prussia, prov. E. Prussia, gov. and 42 m. S.E.W. Gumbinnen, esp. circle, on Lake Löwen, and the canal of Johannisburg. It has a court of justice, a church a castle, and a trade in linen, curts, and cattle. Pop. 1560. Area of circle, 565 sq. m. Pop. 27,568.

LOU NAH, or **LOU NAH**, a city, China, prov. Szechuen, esp. dep. of Szechuen, 160 m N W Chungking lat. 28° 25' N, lon. 104° 27' E. It is fortified, and has a considerable trade. **LOUBOU**, a native state, Isl. Celebes, on the S E. peninsula, W side Bay of Boni. It is extensive and fertile, and its rivers yield gold. Its capital is of the same name.

LOUOOS, or **LOOS**, a river Marocco, which rises in the Little Atlas, flows N W, and, after a course of about 100 m., falls into the Atlantic at El Anzash, near the parallel of 35° N. Vessels of 150 tons ascend a short distance by the aid of the tide.

LOUDEAC, a tn. France, dep. Côte-d'Or, 24 m. E. Brieux. It has a handsome church, with a lofty belfry and a covered market for the sale of linen, which is the staple of the place, and is sold here in great quantities. There are also forges, and iron and paper mills. Pop. 1690.

LOUDON, par Scot. Ayr 18,169 sq. P 4780.

LOUDON (Loudoun), a tn. France, dep. Vienne, 45 m. S. E. Tours 11 m. It is an ancient town, a large space than its actual population requires; has several squares and well-fortified streets, lined by high and well-built houses; a fine walk on the site of its ancient castle, of which vestiges still remain; a seat of first resort, a communal college, an

agricultural society, manufacture of woollen and linen cloth, common lace, leather, and trinkets; a trade in corn, linens, and oliver seeds, white wine, nut-oil, leather, honey wax, dried fruit, hemp, flax, and sheep. Louvain was formerly the cap. of a small territory called Louvain, and was inhabited chiefly by Protestants. Its prosperity was destroyed by the revocation of the Edict of Nantes. Pop. 4071.

LOUE, or **LOUPE**, a river, France, which rises near Annonay, around. Pontarlier, dep. Doubs, flows circuitously W., passing Quingy, enters dep. Jura, passing Crumans and Chamblay and after a course of above 70 m., joins l. bank Doubs a little below Dole. Its chief affluent is the Lison.

LOUGA.—1, A river, Russia, which rises in the W of gov Novgorod, and, shortly after entering gov St. Petersburg, passes the town of Louga, receives its chief affluent the Oreidye, and, proceeding N W, falls into a bay of the Gulf of Finland. A little above its mouth an arm, called Rosen, leaves the main stream and proceeds S.W. to the Marov. Its whole course is about 180 m., and admits of transport by barges and rafts the latter conveying chiefly of timber obtained from the extensive forests which line its banks, and conveyed to Jamburg and the port of Narva.—2, A tn. Russia, gov St. Petersburg, cap. of dist. and on above river with a trade in wood. Pop. 800.—The district is flat throughout, and contains much arable pasture and wood land, area, 5050 sq. m. Pop. 76 980.

LOUGAN, or **LOVANS**, a river Norway, which is formed by numerous torrents from the Langfjell and Sognfjell mountains, flows S.E. through the Gaillarda Dal, and falls into the N extremity of Lake Mjøsen, total course, 150 m.

LOUGANSKAIA STANITZA, a tn. Russia, gov Don Cossacks, 105 m. N Nova-Tobolsk. It stands amid fine forests, and has a famous fair, which lasts a fortnight.

LOUGANSKOE a tn. Russia, gov and 143 m. E Ekaterinodar, with an extensive foundry, at which a vast number of bombs and cannon are yearly cast; a good deal of machinery is also made. Near it is a government model farm, for the cultivation of cereals and tobacco.

LOUGHAN, par lral Meath and Cavan 9328 ac. Pop. 2730

LOUGHBOROUGH a market in England on and 10½ m. N N W Leicester, and a station on the Midland railway. Its four principal streets are tolerably straight and very clean, well paved, and lighted with gas. Houses mostly of brick and the town altogether has a respectable and thriving appearance. It has two elegant churches; a hand some N Catholic, and various Dissenting chapels; a free grammar and several other schools, a mutual improvement society, a philosophical and a literary institution. The principal manufactures of the town consists of hosiery of all kinds, and more particularly of that kind called Patent Angora, in which about 2000 persons are employed. In the neighbourhood are a famous ball foundry, several dye-works, mill-kilns, slate-quarries, corn-mills, and an iron-foundry. Pop. 11 172.—(Local Correspondent).

LOUGHBRACKAN, par lral Meath 2160 ac. P 509
LOUGHBROCKLAND a tn. Ireland, co. Down on a small lake, from which it takes its name, 10 m. N N E Newry. It has a handsome parish church, a commodious R. Catholic chapel, and Presbyterian and Methodist meeting-houses. P 407

LOUGHCREW, par lral Meath, 5982 ac. Pop. 905

LOUGHCALL, a small vill. and par. Ireland, co. and 5 m. N by E. Armagh. The village has a church and school. Pop. 894. Area of par., 10 928 ac. Pop. 7978.

LOUGHLIN, par lral Armagh, 16,090 ac. P 7185

LOUGHLIN, par lral Armagh, 26,819 ac. P 4641

LOUGHLINISLAND, par lral Down, 12,466 ac. P 5083

LOUGHKEEN, par lral Tipperary 10,651 ac. P 2169

LOUGHMORE, two pars. lral Tipperary.—1, (East), 6014 ac. Pop. 1871.—2, (West), 4885 ac. Pop. 1565

LOUGHOR, a tn. Wales. See LLOVONOR.

LOUGHERA a market tn. and par. Ireland, co. Galway. The town is beautifully situated on an acclivity on a small lake of some size, 2½ m. E. by S. Galway and consists generally of very old limestone houses. It has a parish church, a R. Catholic chapel, a Carmelite monastery, with a chapel, a Carmelite convent, a workhouse, police-barracks, a fever hospital, several public and private schools, and a meeting

place for the town. It also possesses an extensive brewery, two tanneries, and six corn-mills, and a little linen-weaving is carried on. Longfords was once fortified, and the remains of its walls may still be traced. It also contains the remains of an old castle and monastery. Pop. 8661. Area of par. 5967 ac. Pop. 7340.—(Local Correspondent).

LOUGHTON two pars. Eng.—1, Bucks 1620 ac. Pop. 1387.—2, Essex 8170 ac. Pop. 1387

LOUGOURA, a small island, one of the Caroline Islands, Morlock group lat. 5° 20' N. lon. 158° 30' E. It is in the form of a horse-shoe, and forms an excellent port. It is of small size, and, in the centre, is covered with bread fruit trees, while on the shore the coco-nut and other trees abound. The island, naturally, has no fresh water but rain water is collected in various ways by the natives, who are hospitable, kind, reserved, of agreeable manners, and above middle size.

LOUHANE, [sic, Loungwe], a tn. France, dep. Seine-et-Marne, l. bank Seine, which here begins to be navigable, 48 m. S. Dijon. It is by no means of a pleasing appearance, has a curious church in the ogival style, a well-endowed hospital, court of first resort and commerce, and communal college, manufactures of leather and flour, and a trade in corn, flour, maize, poultry, pork, horses, and cattle partly transit between Lyons and Switzerland. Pop. 8340

LOUI TSONG, a city China, prov. Quingtung, cap. of the most E. dep. of the empire, on the E. side of a peninsula, 250 m. S. Canton, near the mouth of a small river which falls into the China Sea, and forms a good harbour.

LOUIS-PHILIPPE LAND, the N. portion of a tract of land in the Antarctic Ocean off S. Shetland, about lat. 63° 30' S. lon. 57° W. Its outline was traced for a distance of about 120 m. between lat. 63° and 64° S. by Admiral D'Urville, of the French navy. It is crowned with numerous peaks, covered by continual snows of unknown depth. Were it not for the blackish rocks rendered visible by the melting of the snows which form their limits on the coast, the land could not be distinguished from the numerous fields of ice by which it is surrounded.

LOUIS (Power), cap. of Mauritius. See PORT LOUIS.

LOUIS (Sr.) or **BOUEN-LANNA**.—1, A vil. and com. France, dep. Haut-Rhin, 14 m. E. Altkirch. It has a custom-house, manufactures of glazed hats, and iron works. It lies on the Swiss frontier, at the termination of the French portion of the railway from Strasbourg to Basel. 1 op. 1805.—2, An isl. W. Africa, Senegambia, belonging to the French at the mouth of the Senegal. It is low and sandy about 1½ m. long and has two small ship-building yards.—3, A tn. (called Andar by the natives) on the above island. lat. 10° 3' N., lon. 16° 38' W. It is the capital of the French possessions in Senegambia. It regularly laid-out, has government offices, barracks, an hospital, a church, an agricultural society, a board of health, a charity school for boys, and another for girls. Pop. (1849) 9967.—4, A lake Lower Canada, 9 m. S.W. Montreal, formed by an expansion of the St. Lawrence. It is 80 m. long by 7 m. broad and is separated by Perrot Isle from the Lake of Two Mountains, which is an expansion of the Ottawa. This lake for many years formed the limit of the French colony towards the W.—5, A tn. Haiti, S. side of S.W. peninsula, lat. 18° 15' N. lon. 78° 22' W. It lies at the head of a bay of the same name opposite a number of small isles, which shelter the bay on the S. towards the ocean, and form it into an excellent harbour capable of receiving the largest ships. The anchorage is good. The houses of the town are mostly built of wood.

LOUIS (Sr.), a city America, U States, Missouri. It is a bank Mississippi, pleasantly situated on a gentle elevation overlooking the river, 750 m. W. Washington, and 1201 m. by the river, above New Orleans, to which the navigation is always open. It is regularly built, has some spacious streets, and extends over a great area. Most of the more recent houses have been built of brick, but there are, also, some of stone, and generally white-washed. Amongst the public buildings are the city hall, the cathedral, the U States land-office, the theatre, concert-hall, and the St. Louis university, all of these are handsome structures, as are, also, several of the churches, which are numerous. The benevolent institutions comprise, with several others, a Protestant and a R. Catholic orphan asylum, and a establishment of some, called the Convent of the Sacred Heart, for

conducting female education. The literary and educational institutions are the St. Louis university, already mentioned, under the direction of the R. Chabrolin, with libraries containing 7800 volumes; the medical department of Kansas College, occupying a spacious building, capable of accommodating 400 students, with a hall for lectures, chemical laboratory, etc.; the Western Academy of Sciences, with a museum of natural history and mineralogy &c. The city is well situated for commerce, having a great command of internal navigation, which affords ready access to a vast extent of country not only by means of the Mississippi, but also by the Missouri and Illinois, which join that river 18 m. above St. Louis and the Ohio, which enters 175 m. below it. It is the principal W. depot of the American fur company, which has a large establishment in the place, employing nearly 1000 men. A great amount of furs of every description is here collected, and 10,000 dried buffalo tongues have been brought in during a single year. In 1848, there arrived at St. Louis, besides 615 flat boats, steam-boats, with an aggregate tonnage of 469 735 tons and in the same year the port owned 28,500 tons of steam-boats, and the gross imports and exports were estimated at \$15,000,000. St. Louis was founded in 1764, by the French from Canada, as a trading post with the Indians, but it long remained an unimportant village, in recent times its progress has been very rapid, as evidenced by the increase of its population. Pop. (1840), 16,489 (1850), 82,744.

LOUISIA or LOUISIA, a seaport in Russia. See LOUISIA.

LOUISBURG a seaport in British America, on the E. coast Cape Breton, 28 m. S.E. of Sydney lat. 45° 53' N. lon. 60° W. It was founded by the French, regularly fortified, at first expressly, and formed a fine handsome town, of an oblong figure, and nearly a league in extent, but the British, after capturing it in 1748, found it so situated that it again fell into the hands of the French, completely dismantled it and it has ever since, notwithstanding its excellent harbour, been allowed to remain a mere heap of ruins.

LOUISIADÉ ARCHIPELAGO, an extensive group of islands, S. Pacific Ocean, comprised between the parallels of 10° 40' and 11° 40' S. lat., and the meridians of 151° and 154° 30' E. lon. About 80 are already known, but many others, it is believed, remain yet to be discovered. They appear to be nearly all inhabited, although some of them but thinly. The principal islands are, from S. to N., the Picon, Jonama, Fig. St. Agnes, &c. The greater part of the larger islands is either covered with dense forests, or grassy tracts, with hives and clumps of trees they contain considerable heights.—Mount Ratissauke or South-east island being 3089 ft. high, and the mountains in the W. portion of St. Agnes attaining an elevation of 3379 ft. One of the most remarkable features connected with the Louisiade Archipelago is the manner in which its shores are protected by coral reefs. Some of these are lower, others steeper, more or less distinct in character, and the remainder are usually round or oval. The inhabitants belong to a race of Papuas, and are generally of a savage and treacherous disposition, although in some instances their conduct has appeared sufficiently friendly.—(Voyage of the *Red Rover*.)

LOUISIANA, one of the southern U. States of America, situated between lat. 29° and 33° 50' N., lon. 89° and 94° W., bounded N. by Arkansas, N. E. and E. Mississippi, from which it is partly separated by the river of that name. S. E. and S. the Gulf of Mexico, and W. Texas, from which it is separated chiefly by the Red river, which, N. to S., 240 m. breadth, 210 m. long, 45,350 sq. m. The far greater part of the surface consists of an immense alluvial flat, through which the Mississippi and several of its tributaries, particularly the Red River pursue a winding course, branching off into numerous arms, and either covering a large portion of the country with permanent lakes and swamps, or frequently laying it under water by inundations. In the N. and N. W. the surface becomes undulating, and still remains covered with dense natural forests, composed chiefly of varieties of oak, hickory, black walnut, gumtree, magnolia, and poplar; but, with the exception of this portion, the surface above the level of the sea nowhere exceeds 50 ft., and in many parts does not average above 10 ft. The Red River, in entering the state on the N. W., has only a single channel; but, after flowing in at about 80 m. into the Gulf, and, sending

its waters by numerous minor channels, intervents, and forms a kind of net-work, over a space 50 m. long by 4 m. broad. In like manner the Mississippi, about 8 m. below the junction of the Red River begins to branch, and send off from the W. or S. bank, first the Atchafalaya, then, about 120 m. lower, the Plaquemine, which unites with the Atchafalaya, and lastly the Lafourche, with numerous smaller offshoots; and on the E. or S. bank, the Iberville, which, in its course, expands into several lakes, of which Pontchartrain is the most considerable. The whole area included between the Iberville on the N., the Atchafalaya on the W., and the Gulf of Mexico, forms the delta of the Mississippi, and exhibits, on a scale of unvaried magnificence the vast changes which a mighty river is capable of effecting, both on the surface of the land and the bottom of the sea. Almost the whole of the S. part of Louisiana has been conquered by it from the latter; and, as if unwilling to renounce its right of conquest into the hands of man, it continues forcing its way into new channels, and overflowing its banks, so as occasionally to resume possession of an area which is estimated at nearly 16,000 sq. m. Beginning at lat. 32° and proceeding S. to 61, the tract inundated has an average width of 20 m., and from 51° to the outlet of the Atchafalaya, 40 m. Below Louisiana, on the S. bank, while at least, converts all the land into sea. The most elevated portion of the delta is that on the immediate banks of the river. There the deposits of a long succession of ages have accumulated, so as to form a kind of natural barrier from 400 yards to 1½ m. in width, higher than the land more remote from the stream, and capable of being converted into a means of protection against its floods. The obvious advantages thus attainable, have not been overlooked, and the margin of the river has been still further raised by means of an artificial embankment called the *Levee*, which, on the S. bank commences at Point Coupee, 173 m., and on the N. bank, 80 m. above New Orleans, and is continued for more than 130 m. The tract thus defended is of remarkable fertility, and is both better cultivated and more densely peopled than any other part of the state. Wherever the surface in other parts of the state is dry enough to admit of regular cultivation, it is, with few exceptions, fertile, and raises large crops of cotton, sugar, and rice which are the staple productions. Of the ordinary cereals, a good deal of oats, very little rye, and almost no wheat are grown. But such Indian corn, potatoes, hay, and tobacco, form important means of subsistence and produce. There are no manufactures deserving of notice but the trade is very extensive. In the years 1849, 1850, and 1851, the exports and imports amounted in value to—

| | Exports. | Imports. |
|------|---------------|-------------|
| 1849 | — \$7,334,703 | \$2,045,484 |
| 1850 | — 7,303,614 | 2,341,770 |
| 1851 | — 11,334,545 | 2,610,081 |

The most numerous religious denomination is that of the S. Catholics, but Methodists, Baptists, Presbyterians, and Episcopians exist in considerable numbers. The legislature, composed of a governor elected by the people for two years, and thereafter ineligible for four years; a senate of 32, chosen for four, and representative assembly of 97, chosen for two years, meets biennially in New Orleans, the capital. Among the works of internal improvement most deserving of notice are several railroads, of limited extent, connecting in New Orleans from Pontchartrain and several other places in its vicinity the Mexican Gulf railroad, and that of New Orleans and Mobile, which, when completed, will have a length of 364 m., of which 80 m. are in this state, and the Bayou, Grand-croix, Orleans Bank, and Vieux-canal. The first settlement was made by the French in 1684, and named Louisiana after Louis XIV. In 1717 it was ceded to a chartered company, one of the wild and ruinous schemes of the notorious Law. In 1763, it was ceded by France to Spain. In 1800, re-ceded to France and in 1803 purchased from France by the U. States. It formed a constitution, and was admitted into the Union in 1812. Pop. (1850) 800,763, of whom 230,967 were slaves in 1860 the population had risen to 708,007, of whom 331,726 were slaves.

LOUISVILLE, a city, U. States, Kentucky, 1 bank Ohio, 50 m. W. Frankfort, on a gentle acclivity, with the principal streets, one of which is above 1 m. long, all parallel to the river, and well lighted with gas. It contains a court-house, city hall, jail, a university, two hospitals, a medical

school, two orphan asylums, an asylum for the blind, a Magdalen asylum, 80 churches, several religious, benevolent, and literary institutions, six grammar-schools, and from 40 to 50 private schools. Louisville is the seat of most of the commercial and manufacturing business of the state and contiguous territory; and has rolling and flour mills, six foundries, machine shops, steam bagging factories, ropewalks, breweries, distilleries, a large cotton, and an extensive woolen factory. The mouth of the Bearpaw Creek, which here joins the Ohio, forms an excellent harbour for steam-boats, large numbers of which ply on the river. In 1849 there were packed up here 96 000 hogs. Pop. (1840), 21 210; (1850), 43 217.

LOUHE, or **LOULA**, a tn. Russia, gov. and 80 m. S.E. Kozlovsk, on river of same name. It has three churches, and some trade in ironware. Pop. 1000. — The river flows generally S., and joins the Kizma in gov. Vladimir, total course, about 80 m.

LOULE, a tn. and par. Portugal, prov. and 9 m. N.W. Algarve. It stands on a hill is surrounded by old walls, and contains a castle, two monasteries, a nunnery an almshouse well-endowed hospital and female penitentiary. Pop. 3246.

LOUP (St. Loup) numerous small places, France, particularly — A tn. dep. Haute-Saône, at the foot of the Vosges, 30 m. N.W. Vesoul. It has manufactures of druggs, straw hats, oil, leather, and glass. St. Loup is an entrepot for the cherry brandy made in the district. Pop. 2612.

LOUPOIGNE, a vil. and com. Belgium, prov. Brabant, on the Dyle, 15 m. S.E. Brussels, with a brewery, a flour-mill and a trade in corn and cattle. Pop. 1005.

LOURCHES a tn. France, dep. Nord, 7 m. from Valenciennes. Pop. 3096.

LOURDES (sane *Lepordus*) a tn. France, dep. Hautes-Pyrénées, 11 m. S.W. Tarbes, near the Garo-de-Pa. It is situated at the convergence of four valleys where the roads from Tarbes, Bagueres, Argelès, and Pau meet and consists of a picturesque and gloomy looking fort which is built upon a rock, and commands these roads, and around which the town, consisting of narrow, dirty streets and mean houses, is clustered. It has manufactures of fine linen handkerchiefs, crapes, and stockings, a trade in milk cows, and three annual fairs. Pop. 5340.

LOURENÇO DO BAIRRO (St.) a tn. and par. Portugal, prov. Douro, 18 m. S.E. Aveiro. Pop. 1900.

LOUBICAI, a tn. and par. Portugal, prov. Estremadura, com. and 38 m. S.W. Coimbra, with five churches a convent, four hospitals, and an almshouse. Pop. 3280.

LOURINHA a tn. and par. Portugal, prov. Estremadura, com. and 12 m. N.W. Torres Vedras near the sea coast. It contains an hospital convent, and almshouse, and has an annual fair. Pop. 2225.

LOUHE, a small maritime co. Ireland, prov. Linnis, bounded N. by Arragh and Down, E. by the Irish Sea, S. by Mouth and W. Mouth and Monaghan, length 25 m. breadth, 15 m., comprising 200,955 acs, of which 178,973 acs. are arable. In its coast-line, a spacious indentation occurs called Dundalk Bay. On the E. it is rugged and mountainous, but in all other parts level or undulating. The soil is clay-slate and graywacke, and in a few districts mountain limestone. The soil is generally fertile, excepting on the elevated tracts. The number of acres under crop, in 1861 was 116,721, of which a great portion was occupied by wheat, oats, barley, bere, rye, potatoes, pease, beans, and turneps. Many of the farms are very small. The fishery district of Dundalk, in this county extends the whole line of coast from Warren Point to Ballyvaughan comprising 52 m. of maritime boundaries, which had in 1850 299 registered fishing vessels, employing 1876 men and boys. The same year, the number of national schools in operation was 79, attended by 11,216 children. Louhe contains six baronies, and 64 parishes, and returns four members to parliament—two for the county, and one each for the boroughs of Drogheda and Dundalk, which are the principal towns. Pop. (1841), 111,979; (1851), 108,411. (Thom's *Irish Almanac*.)

LOUTH, a vil. and par. Ireland, co. Louth, 7 m. S.W. Dundalk. The former, situated on the Glyde has the remains of an ancient priory founded by St. Patrick. Pop. 266. Area of par., 17,526 acs. Pop. 9645.

LOUTH a market tn. and par. England, co. Lincoln. The town, in the fertile valley of the Lode, at the E. extremity of the Wolds, 27 m. E. N.E. Lincoln, a station on the Great Northern railway, is well built, generally of brick, and lighted with gas. It has two established churches, one of which is a fine old structure, with an elegant spire, about 500 ft. high. There are also eight places of worship belonging to various dissenting bodies, eight schools including a free grammar and various other endowed schools, a mechanics institute, a society for the promotion of Christian knowledge, a savings bank, a dispensary and several other charities. Carriage, worsted, soap, and oil-cake are manufactured to a great extent. A canal, communicating with the Humber, enables a considerable trade to be carried on, to London, Hull &c. in corn and wool. Area of par., 8620 acs. Pop. 10 568. — (*Local Correspondent*.)

LOUTAR, or **LUCK** a tn. Russia, gov. Volhynia, cap. dist., r. bank Sayr 158 m. W.N.W. Jitomir consisting chiefly of wooden huts. It is the see of a Greek bishop, has a castle, several churches a school, and a little trade. Pop. 2500.

LOUVAIN (Flemish, *Leuven*, German, *Löwen*) a tn. Belgium, prov. Brabant, on the Dyle and the E. railway, 15 m. E. by N. Brussels. It is not fortified, but is surrounded by a dry deep fosse, and an earthen rampart from 80 to 100 ft. high, which has been cut through by the road from Brussels to Malines. It forms almost a perfect circle diameter nearly 2 m. Though the streets are regular, the houses are indifferently built, and the whole town has a dull, melancholy look. Many of the public buildings, however, are deserving of notice. Of these, the principal are the Hôtel de Ville, one of the richest and most beautiful Gothic buildings in the world, elaborately and exquisitely decorated in every part of its exterior by sculptures of subjects taken, for the most part, from the Old Testament; the collegiate church of St. Peter, almost opposite the Hôtel de Ville at the end of the 14th century an edifice of vast extent, and rich in works of art, particularly a fine Holy Family by Matsys the churches of St. Gertrude, St. James St. Quentin, and Notre Dame, all elegant and noble structures the Pope's college, and the Salle de France. Louvain possesses courts of first resort, and of commerce a university with a library of 105 000 volumes formerly of European reputation, to which the town once owed the surname of *Loivain the learned*, but which is now monopolized by the Belgian priesthood, under the name of *university of Louvain*, a college, academy of fine arts botanical garden, anatomical hall cabinet of natural philosophy, chemistry, and natural history a collection of pictures, several of them first-rate; a superior primary school, belonging to the Government, different private and free schools, several hospitals and benevolent institutions. In the 14th century, Louvain was one of the most important manufacturing towns, and in broad-clothes alone, employed about 15,000 workmen. But they were a turbulent race, and, commotions having taken place, their rulers banished great numbers of them. Many other engines of their own accord, and brought their arts and industry into England. This important branch no longer flourishes here. A few woollens are still made, and also bonery, hats, ribbons, soap, oil, cordline, leather glue, earthenware &c. but by far the most important manufacture at present is beer of which above 300 000 casks are annually made. For a general trade, the town is well situated, having ample communication both by railway and the canal of its name. Pop. 24,624.

LOUVIÈRE, a vil. and com. Belgium, prov. and 12 m. S.E. Liège, in a valley near the Amblève. It has several mills, limestone quarries, and iron-works an iron mine, and two annual fairs. Pop. 1758.

LOUVEN, a river, Norway which rises in the Hardanger-fjord, where it is fed by numerous small lakes and torrents, flows first E. then S.E., expanding into several lakes, and passing the town of Kongsberg; and after a course of about 100 m. falls into a bay of the Skagger Rack, near Laurvig.

LOUVIERS (sane *Lepordus*) a tn. France, dep. and on both sides of the river Eure, 17 m. S. Rouen. The old town, on a bank river, is almost entirely built of wood, the new town, on a bank, is built of brick or burnt stone, and has a long and handsome street, which leads to the high road, and crosses the different branches of the Eure by three bridges. It has an interesting church, supposed to date from the period

of the First Grande; centre of first resort, and sometimes; and a consulting chamber of manufacturers. Louviers ranks with Rheims and Sedan as one of the three principal clothing towns of France. It has more than forty cloth factories, employing from 7000 to 8000 persons in and around the town, several vastest-cells, an extensive weaving and factory, numerous blacksmiths, iron-works, and a factory for spinning machinery and steam-engines. The chief trade is in broad-cloth, of which about one-third of the quantity made is exported to foreign countries, chiefly Piedmont and Italy. The other articles of trade are corn, wood, charcoal, flax, wool, &c. Pop. 9670.

LOUZA, a tn. and par Portugal, prov Douro, 18 m. S.E. Coimbra, at the foot of a mountain of same name. It has an hospital and almshouse, and manufactures the best paper in the kingdom. Pop. 3610.

LOUZA, or *Luma*, a river Russia, which rises in gov Volynsk, flows past N. E. then W. passes Lohsk, and after a course of above 200 m., joins r bank Jug, about 18 m. S.E. Veliki-Ustug.

LOVAT-BANNA, a market tn. Hungary, co. and 10 m. N.E. Stuhlweissenburg with two churches, a synagogue, and a fine castle; and a considerable trade in wine. P. 4104.

LOVAT, a river Russia, which rises in the N. E. of gov Viatka, flows N. N. E. across gov Yakov, passes the towns of Valtke-Laski and Kholm, enters gov Novgorod, and falls into Lake Ilmen by two branches: first course, about 200 m. Its chief affluents are, on the r. the Polist, and on the l. the Kossow, and Pels. By means of the Lovat and Dwina canal the two rivers are connected, and furnish a long stretch of important inland navigation extending almost in the form of a circle from St. Petersburg, through Lakes Ladoga and Ilmen, round to the Gulf of Riga.

LOVENDEGEM, a tn. and com Belgium, prov F. Flanders, 6 m. W. Ghent, with linen-weaving and some trade in butter and other kinds of agricultural produce. P. 4622.

LOVENICH, a vil. Russian France, gov and 24 m. N. E. Aix-la-Chapelle, with a church, and manufactures of woollen cloth, and silk goods. Pop. 1600.

LOVERE, a vil and par Italy Lombardy gov Milan, prov and 22 m. S. E. Bergamo cap dist. on the N. extremity of Lake Iseo. It is an ancient place, has many fine buildings, private and public, including two very beautiful churches: it has also a gymnasium, a female institute, several museums, two work mills, and a commodious harbour at which a considerable trade is carried on, especially in fine gypsum, with which the neighbourhood abounds. Pop. in 2513 dist. 12,453.

LOVERSALE, par Eng York (W. Riding); 2132 ac. Pop. 195.

LOVENTON par Wales, Pembrokeshire 1233 ac. P. 159.

LOVINGTON, par Eng Somerset; 873 ac. P. 230.

LOVISA, a maritime tn. Russia, Finland, on the Gulf of Finland, 140 m. W. N. W. St. Petersburg, in an arid district. It has clean streets, and carries on a thriving trade, exporting iron in bars, tobacco, and salt. Steamers ply daily to Helsingfors. P. 3000.—(See Finland, par in Prince E. Galitzin.)

LOVRIN, a vil Hungary Thaurer Thems, co. Torontal, about 8 m. from Kisdin, with a church, and a trade in corn, maize, hemp, and wine. Pop. 2841.

LOVULHA, a tn. European Turkey, Bulgaria, l. bank Ossa, 40 m. S. Nikolop. Pop. 3000.

LOW ARCHELAGO, or *PAKRUVO SHOR*, a series of low coral islands in the Pacific, extending in number to between 80 and 90, and scattered between the Society Islands, the Marquesas, and Friendly Islands, over not less than 10° of longitude. The most important, from extent, or the interest attached to them, are Anahu, or Chin Island, the Gambier Islands, and Pitcairn. They are under the nominal supremacy of Tahiti, and are supposed to have a pop. of about 10,000.

LOW BLECK, a group of three small isles, N.E. coast Australia, Trinity Bay, lat. 10° 25' S.; lon. 145° 30' E. One is low, sandy and well wooded, about 300 yds. in diameter situated at the N. W. extremity of a horse-shoe reef, with its convexity to seaward; the other two are merely graves of mangroves on the reef.—(Foster of the Redoubt.)

LOWDHAM, a vil and par England, co. and 7 m. N. E. Nottingham with an ancient church, and place of worship for Wesleyans and Primitive Methodists; a national

school, and manufacture of stockings. Area of par., 5910 ac. Pop. 1596.

LOWELL, a city, U States, Massachusetts, l. bank Merrimack, 25 m. N. W. Boston; lat. 42° 55' N.; lon. 71° 35' W., neatly and substantially built of brick, but chiefly renowned for its manufactures, and for the rapidity of its growth, circumstances which have obtained for it the designation of the 'Manchester of America.' It has numerous places of worship, twenty-nine public free schools, and eight grammar-schools, one of which occupies a very handsome building, a lyceum, the Lowell institute, and the mechanics' association, a library an hospital, and two savings-banks. The goods manufactured are sheetings, flannels, drillings, prints, shirtings, negro-cloth, carpets, rug, broad-cloths, water-proof woollens, and costumes. There are 12 incorporated manufacturing companies in Lowell, employing 65 mills, 219,000 spindles, 7644 looms, 7644 spindles, and 2629 spindles. The quantity of manufactures produced is 1,930,000 yds. per week of cotton goods, and 37,831 yds. of woollen goods. Other manufactures are produced in the city in addition to those already specified, employing about 1500 hands. There is also an extensive bleaching. Average wages of females, clear of board, per week is two dollars, but some of them earn double that sum, of males, clear of board, per day 80 cents or about \$2 6d. The water-power here is very great, and easily available. It is produced by a canal 60 ft wide, 4 ft deep and 1½ m. in length, with a fall of 30 ft. There is a railway from Lowell to Boston, and several other branch railways. In 1815, the site of this city was almost a wilderness. P. (1838) 3523, (1840) 30,796, (1850) 32,964.

LOWEN, a tn Prussia, prov Silesia, gov and 36 m. S. E. Breslau, l. bank Neisse. It contains a Protestant church, school, and hospital and has manufactures of tobacco, tile-works a trade in cattle, and five annual fairs. P. 1107.

LOWENBERG, a tn Prussia, prov Silesia, gov and 7 m. S. S. W. Liegnitz, cap. county, l. bank Bober. It is walled, has four gates, a court of law and several public offices: two Protestant and two R. Catholic churches a synagogue, townhouse, several schools, and an hospital, manufactures of woollens and linen cloth, vinger-wines, walk and gypsum mills, and a trade in wool and cattle. Lowenberg was stormed by the Russians in 1813. P. 4297.—The canals is fully throughout rears great numbers of cattle, and has valuable moses. Area, 231 sq. m. P. 71,171.

LOWENDAL an old N. W. coast of W. Australia belonging to the Mitchell group, and about 18 m. N. Barrow Island. The surrounding sea swarms with fish among which are seen numerous sharks, and small whales or fin backs.

LOWENSTEIN, a tn. Wurtemberg circle Neckar, at the foot of Mount Löwenstein, 27 m. N. E. Stuttgart, with the ruins of an old castle, vitreous works, several mills, and a trade in wine. Pop. 1047.

LOWENZ, or *LOWENZ*, a vil and lake, Switzerland, one and 5 m. W. N. W. Schwyz, at the foot of the Rothenberg. See GUNNAR.

LOWES (Lock or Lock) a lake Scotland co. Selkirk, only separated by a narrow neck of land from the more celebrated St. Mary's Loch, into which it flows. It is about 1 m. long, and scarcely ½ m. wide, and is one of the earliest feeders of the Yarrow.

LOWESBY par Eng. Leicesters; 2530 ac. P. 248.

LOWESTOFT, a seaport in and par England, co. Suffolk, on a highly sloping gradually to the sea, 40 m. N. N. W. Ipswich. It consists of a principal and several narrow streets, the former nearly 1 m. long, well paved, and kept remarkably clean, and is lighted with gas. The principal public buildings are, the parish church, a handsome structure, with a tower and a spire, a chapel of ease and chapel belonging to the Wesleyans and Primitive Methodists, the Independents and Baptists, a townhall, theatre, assembly-room, and subscription reading-room and library. For education there are two free schools, a British school, and several private schools, among which is one of a superior description, which prepares students for the universities. There is also a mechanics institute. The chief charitable institutions are an infirmary and a fever-hospital's hospital. There are no proper manufactures of any consequence, but ship-building is carried on with some vigour; and there are several breweries and refineries. The trade, which was formerly almost confined

to coasting, having received an important impetus from the formation of a harbour and a branch of the Norwich and Yarmouth railway communicating with it, now extends to Holford, Denmark, and Sweden. The shipping which visited the port in 1845 was 1014 vessels (87 138 tons), and had risen in 1850 to 1875 vessels (108,338 tons). The harbour dues during the same period rose from £4882 to £26088. About 60 boats, employing about 600 men, are occupied in the herring and mackerel fisheries. Potter, well known for his translations of *Æschylus* and other Greek dramatists, was born here. Area of par 1850 sq. Pop. (1841), 4647; (1851), 6781. (Local Correspondent.)

LOWICK two par. England.—1 Northampton; 3200 ac. Pop. 445.—2 Northampton 12 528 ac. Pop. 1941

LOWICK, a tn. Russian Poland, on the Bure, 45 m. W. B. Warsaw. It is walled, and has three churches, an old castle, *Parist* college, and gymnasium monastery, hospital manufactures of refined wax and a trade in horses and cattle. It was once cap. of a principality. Pop. 3380

LOYALTY ISLAND, a group, consisting of two large and three small isls. S. Pacific Ocean, N. E. from New Caledonia, about lat. 21° S.; and lon. 167° 50' E. They were discovered and named by Cook, and have, until lately been little known.—See LOR.

LOZÈRE, a dep. France, bounded N. by depa. Hante-Loire and Cantal, E. Ardèche and Gard, S. Gard and Aveyron, and W. also Aveyron. lat. 44° 7' to 44° 50', lon. 3° to 4° E., greatest length, 63 m.; greatest breadth, 46 m. area, 1967 sq. m. The department is mountainous, and is divided into three distinct regions—the N., consisting of basaltic and granite rocks, and called *Montagne*, yielding rye, a very little barley and oats, and faggots; the S. W., calcareous, and called *Causses*, producing in addition, wheat and fruit being the most fertile portion of the department and the S. E., schistous, called the *Cevennes*, growing large quantities of chestnuts and potatoes, the mulberry and, on occasional patches, the vine, from which an indifferent wine is obtained. The mountain regions depauperate, in summer immense flocks of sheep from Langredon. The principal heights are, the plateau of the Palais in Bot, 5077 ft. La Marguerite, 4893 ft. and La Lozère, 4937 ft. Four considerable rivers, the Allier, Lot, Tarn, and Gardon de Milet, a tributary of the Gard rise within the department, and, by the courses which they take, indicate its three general slopes. The first, in the N., furrowed by the Allier and several of its tributaries, belongs to the basin of the Loire, the second, which has a S. E. direction, belongs to the basin of the Rhone, the third, including the greater part of the department, belongs to the Grande. On this last slope several small lakes cover The minerals are numerous, including iron, argillaceous sand, copper, and antimony; but none of them seem capable of being worked to much advantage. The quarries are of marble, gypsum, porphyry, granite, &c. Neither manufactures nor trade have made much progress. This department nearly corresponds to the country of the ancient *Gabales*, and, under the Romans, formed part of Aquitania, Prima and Septimia. The massacres committed in it by Louis XIV. in the attempt to extinguish what he called heresy, have left an indelible stain on his memory. For administrative purposes, Lozère is

divided into 3 arrondissements—Mende, the capital, Florac, and Marvejols; subdivided into 24 cantons, and 194 communes. Pop. (1853), 144,706

LOZORNO or LOZOS, a vil. Hungary, Hither Danube, ca. Presburg, about 4 m. from Stampach, in a well-wooded district. It has a parish church, and several flour-mills. Pop. 1564.

LOZOYA a tn. Spain, New Castile, prov. and about 50 m. N. W. Madrid. It is indifferently built, and has a church, courthouse, and primary school, flour-mills and a trade in charcoal, wood, and wool. Pop. 2672

LOZWEIL, a vil. and par. Switzerland, ca. and 24 m. N. E. Bern. It has a church, and, in the vicinity, the ruins of a respectable old building, with a number of marble pillars and a dilapidated pavement, have been found. Pop. 2490

LU [Latin *Lozua*] a vil. and com. Italy, Piedmont, div. and 18 m. N. W. Alghozia, with three churches, two monasteries, a townhouse, a sulphureous spring, and a trade in wine. Pop. 3096

LUANCO (SANTA MARIA) a seaport to Spain, Asturias, prov. and 21 m. N. by O. Oviedo, on the Bay of Biscay. It contains a parish church and a primary school and has a small harbour, which, in 1844, was visited by sixty sailing vessels. The principal exports are grain, timber, and salt provisions. Pop. 1750

LUARCA, a tn. and port, Spain, Asturias, prov. and 87 m. N. W. by W. from Oviedo, on the Negro river, are crossed by a bridge of three arches. It is tolerably well built, has a church several chapels, a townhouse, custom-house, prison, three schools, and manufactures of woollen fabrics, chisel and soap, and some fishing and grain trade. Pop. 3000.

LUBACZOW a tn. Austria, Galicia, cisle, and 35 m. W. N. W. Zolkiew 1 bank river of same name. It contains a castle, and a Greek and E. Catholic church.

LUBAN ISLAND one of the smallest of the Philippines N. W. entrance to the Strait of Manila, lat. (N. point) 15° 52' N. lon. 120° 8' E. (s.) It is high in the middle, but low at each extreme. The N. part is lined by a dangerous reef.

LUBAR, a tn. Russia, gov. Volynia, on the Ruten, 70 m. S. W. Jitomir. Pop. 8300

LUBAROW a tn. Russian Poland 16 m. N. N. E. Lublin, near 1. bank Wiepra, with three churches, an elegant castle and a Capuchin monastery. Pop. 1700

LUBBECK, a tn. Prussia, prov. Westphalia, gov. and 12 m. W. Minden, cap. trade, on the Mühlentbach, with a church, courthouse, manufactures of tobacco and leather and some trade in linen. Pop. 2750.—The *crucis* produces some corn and flax, but has several tracts of heath. Area, 164 geo. sq. m. Pop. 89 988.

LUBBEK, a vil. and com. Belgium prov. Brabant 21 m. E. Brussels, with a mill and a trade in corn and timber. Pop. 1911

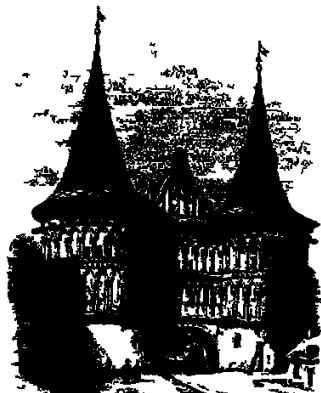

LUBHEN, a tn. Prussia, prov. Brandenburg gov. and 40 m. S. W. Frankfurt, cap. circle, on an island in the Spree. It contains a castle, four churches, a grammar-school, and a hospital several courts and public offices has manufactures of woollen and linen cloth, and some general trade. P. 4691.—The *crucis* is uniformly flat, and not very fertile, but rears many cattle. Area, 808 geo. sq. m. Pop. 28,691

LUBBENAU a tn. Prussia, gov. and 41 m. S. S. W. Frankfurt, 1. bank Spree with a church, castle, picture gallery, and library and manufactures of woollen and linen cloth, and brandy. Pop. 8123

LUBBENHAM, par Eng. Leicester 2400 ac. P. 601
LUBBEK, a parship, Germany, belonging to the duchy of Oldenburg, but enclosed within the duchy of Holstein, consisting chiefly of two separate districts, N. of the town of Lübeck, and several villages in various localities; area, 128 geo. sq. m. It is divided into four bailiwicks, chief town, Rutin. Pop. (1845), 21,517

LÜBECK, or LÜBCK one of the three free towns of Germany, and a member of the Germanic Confederation, on a low ridge at the confluence of the Warnow with the navigable Trave, 35 m. N. E. Hamburg, and 13 m. from the Gulf of Lübeck, a bay in the Baltic. It was formerly surrounded by walls and bastions, which have been levelled down and converted into pleasant walks, but it is still entered by four gates of ancient feudal structure—that named the Holstenthor Gate being remarkably beautiful, and the whole town, with its

numerous gable-ended houses, many of them richly-decorated and highly picturesque, furnishes a striking specimen of the quaint architecture of the 15th century. It consists of four quarters, and the communication between the opposite sides

THE HOLSTEN GATE, LÜBECK.
From Donat's 'Voyage Pittoresque en Hanse, &c.

of the Trave is kept up by means of four bridges. The building and objects most deserving of notice, are the Dom or cathedral, a structure of red brick begun in 1170 but not completed till 1541 surmounted by two spires 416 ft. high and containing a choir-streem, regarded as one of the finest specimens of wood-carving in existence; a stone pulpit and brass font, both of admirable workmanship and a great number of interesting monuments the Marienkirche (St. Mary's church) also of red brick, in elegant pointed Gothic, with a beautiful high altar and chancel, both of black marble the

St. Catharine chapel; the town or senate house, in antique Gothic, somewhat decayed by modern repairs, but still a fine sturried structure, containing several noble halls, with fine millings and carving and possessed of considerable historical interest, as the place where the deputies of the 85 Hanse Towns held their sittings; the gymnasium, school of design, normal navigation, and numerous other schools; the town library, of 87,000 volumes; the dead and dumb, blind and lunatic asylums the orphan and other hospitals; the infirmary, and a great number of well-endowed charitable institutions. The manufactures, once of great importance, but now greatly decayed, consist of woolen and linen fabrics, starch, hats soap, curds, tobacco, glass, animal charcoal, leather sail-cloth, vinegar medical instruments, and articles in gold and silver there are also numerous breweries and distilleries. The trade, consisting chiefly in the export of corn and cattle, and the import of wine, colonial produce, and manufactures, still continues to be extensive, though it is subjected to formidable competition particularly from Kiel. A more serious obstacle to the prosperity of Lübeck is the gradual shallowing of the Baltic, which threatens ultimately to leave it without a harbor. It is connected by railway with Hamburg and Berlin and the whole European railway system. Steamers in considerable numbers keep up regular communication with all important ports in Russia Sweden, and Denmark.

STATEMENT OF THE NUMBER AND TONNAGE OF VESSELS ENTERED AND CLEARED AT THE PORT OF LÜBECK, IN THE YEARS 1843-5, AND 1850-3.

| | Entered. | | Cleared. | |
|------|----------|---------|----------|---------|
| | Vessels. | Tons. | Vessels. | Tons. |
| 1843 | 674 | 134,569 | 525 | 104,708 |
| 1844 | 85 | 162,027 | 561 | 106,039 |
| 1845 | 810 | 169,292 | 523 | 111,678 |
| 1846 | 803 | 162,226 | 561 | 102,669 |
| 1849 | 1184 | 166,014 | 1151 | 161,181 |
| 1851 | 1074 | 171,856 | 1140 | 166,580 |
| 1852 | 1351 | 1,486 | 1270 | 161,350 |
| 1853 | 1302 | 183,318 | 1204 | 187,478 |

As a member of the Germanic Confederation I think had the 35th vote in the plenums; and in the senate council shared the 17th vote with the other three free towns. Its contingent to the Confederation was 407 men. It also is the seat of a superior appeal court for the free towns and of several other courts and offices peculiar to itself. It possesses a territory exclusive of the hallwink Berge-dorf, which it holds in common with Hamburg, of 88 geo. sq. m. This territory instead of forming one contiguous whole, consists of 10 isolated portions, enclosed partly by Holstein, partly by Lauenburg, and partly by Mecklenburg Schwerin.

Pop. 27,247, territory, including half of Varelund, 47 1/2 geo. sq. m. Prussia, prov. Stettin gov. and 14 m. N. N. R. Lignitz, esp. circle, on the Kallertbach. It is walled, entered by three gates, and has a court of law and several public offices, two churches, a town-house, old castle, riding-school, two hospitals, and a house of correction; manufactures of woolen and linen cloths, and the works, dye works, worsted, silk, and other mills. Pop. 2246.—The climate is well wooded, but sandy, and not very fertile. Area, 186 geo. sq. m. Pop. 51,106.

LÜBERSAC, a m. Prussia, dep. Corbach, near r. bank Hante-Vesdre, 22 m. N. W. Tulle. Pop. 1431.

LUBINA, a vil. Hungary, Hither Danube, co. Munkacs, about 28 m. from Galgoc. It has a Protestant church, and extensive manufactures of linen, which are disposed of both in Hungary and Moravia. Pop. 2500.

THE SQUARE-BEFORE, MARKET-PLACE, AND CATHEDRAL, LÜBECK.—From Donat's

Rechtskirche (St. Giles church) of small dimensions, surmounted by a lofty spire; the Petrikirche (St. Peter's church), built in 1160 but repaired and decayed in 1630 and three other Lutheran churches, a Reformed church and

Elsewhere the sugar-cane either must be annually planted, or cannot be successfully reaped beyond the second crop, but here, in ordinary soils, the plant continues productive for six, and, in some instances, has not required replanting within 80 years. This amazing fertility is counterbalanced by the

THE PITCHES, ST. LUCIA.—From an original drawing by Elsie Holbein, N.Y.

general unhealthiness of the climate. On the higher grounds, the European constitution is not very seriously affected, but the marshy valleys are so deadly, that the negro not actually born on the spot, suffers equally with the European. The dense forests, and the rank vegetation of the swamps, are evidently the great causes of disease, and more recently since many of the former have been cleared and several of the latter laid dry, the salubrity has been greatly improved. The staple produce of the island is the sugar-cane, from which in 1852 there were made and exported 8,762,415 lbs. sugar, 104,800 galls. molasses, and 8275 galls. of rum. The only other article deserving of notice is cocoa, of which in the same year the produce was 181,992 lbs. At one time coffee was cultivated to such an extent that, in 1842, the produce amounted to 151,887 lbs. In the following year, however, it sunk to 2612 lbs., and though, in 1844, it suddenly started to 33,514 lbs., it fell as rapidly in subsequent years; and if now cultivated at all, as on so insignificant a scale, that it no longer figures in the list of exports. The abolition of slavery has certainly not had an injurious effect on the prosperity of the island. In 1837, previously to the abolition the export of sugar was only 41,850 wts., whereas it now, as shown above, exceeds 73,325 T (1852) 97,480.

LUCIA (SANTA) one of the Cape Verde islands, N.W. of St. Nicolas, and S.E. of St. Antonio. It is about 8 m. long by 3 m. broad, and has a very mountainous surface, particularly in the N.W. It is uninhabited, and fringed by reefs.

LUGIBIANO, a *tu. Tuscany*, prov. and 41 m. S.E.E. Florence, 1140 ft. above sea-level. Pop. 2074.

LUCILLO, a *tu. Spain*, prov. and 87 m. W. & W. Leon with a courthouse, primary school, manufactures of linen, and a market every fortnight. Pop. 1485.

LUGITO, a *tu. Naples*, prov. Salerno, dist. and 12 m. W. & W. Lario. Pop. 2560.

LUCKA, a *tu. Germany*, Saxo-Anhalt, bail. and near Altburg, on the Schwansee; with a church, a mill, and a trade in salt. Pop. 1485.

LUCKAU, a *tu. Prussia*, prov. Brandenburg, gov. and 40 m. S.W. Frankfurt, cap. circle, on the Elbe. It has three churches, a Frankfort, gymnasium, hospital, orphan asylum, and deaf and dumb institution; manufactures of cloth, linen, starch, gunpowder, and tobacco, and four annual cattle markets

In 1815, the Prussians defeated here the French, under Oudinot. Pop. 4946. —The canals are flat and well cultivated. Area, 228 geo. sq. m. Pop. (1846), 55,709.

LUCKENWALDE, a *tu. Prussia*, prov. Brandenburg, gov. Potsdam, on the Havel, 51 m. S. Berlin. It has a parish and high school, a court of justice, manufactures of woollen and linen cloth, scythes, and leather, a bleachfield, a paper-mill, several breweries and distilleries, and six cattle-markets. Pop. (1846), 7216.

LUCKHAM, or **LOOCHAM**, par. Eng. Somerset; 4126 ac. Pop. 511.

LUCKINGTON a par. Eng. Wilt. 1625 ac. Pop. 890.

LUCKIPOOR, or **LAKHNEEDPOOR**, a *tu. Hindustan*, prov. Bengal, dist. Tipperah, 80 m. S. by E. Dacca lat. 22° 55' N.; lon. 90° 56' E. (n.) near the bank, and within a few miles of the mouth of the Great Megna, with which it communicates by means of a small river. The Megna has a breadth, near Luckipoor, of more than 10 m. and, during the rainy season, appears more like an inland sea than a river, most of the islands being submerged. A peculiar cotton stuff, called *Bachma*, and other coarse goods of excellent quality are manufactured here and in the neighbourhood.

LUCKNOW a city, Hindustan, cap. Oude, 580 m. W. N. W. Calcutta, lat. 36° 58' N. lon. 80° 58' E.; bank Goomty here crossed by a stone bridge of 10 irregular, pointed arches, and by a bridge of boats. The river opposite the city, is about 100 yards wide and is navigable, for large boats, from its junction with the Ganges, between Ghazipur and Benares, to a considerable distance up the country. Lucknow like nearly all Eastern cities, has an imposing and picturesque appearance from a distance, with its innumerable minarets, gilded cupolas, and brilliantly-coloured sepulchral and mosque-towers, but, like them also, fails to realise, on near inspection the promises of the remotest view. It may be said to be divided

LUCKNOW.—From Self. View in India, St. Helena, &c.

into two portions—the court and, and the bazaar or mercantile, which is 3 or 4 m. in length, and, in some places, nearly as much in breadth; but the streets are narrow and dirty, and the houses generally mean. In the better quarter it is otherwise. Here the buildings are handsome, and the streets broad and clean; one of the finest of these, called *Husse Ali*, runs parallel with the river towards the bridge, and traverses a considerable portion of the northern quarter. In the centre of this street is a lofty portal, ornamented with many small towers; and, at the further extremity, is the *Imam Bara* (holy palace), whence the *Viceroy* and *Dowry* is carried. There are, besides, many stately khans, and some handsome mosques and pagodas, in various parts of the city, and not a few of them in the remotest and most wretched quarters. With exception, however, of the royal tombs, and the innumerable

house, or cathedral, a beautiful structure, the principal edifices of the city are all of modern construction. The houses are built on the ground-floors of the houses, which are three stories high. The two upper stories are finished with neatly-carved woodwork, which run like balconies in front of the sitting-rooms. The scenery around the city is very pleasing, especially along the banks of the Chonty. The river here exhibits a scene of great activity—traffic-boats, small boats, and fishing-boats, rowing to and fro in countless succession. Luckput is at present (1893), and has been the seat of Government since 1774, when it was removed thither from Fyamb. Population at 300,000; but Von Orlich (1848), says 800,000.

LUCKPUT, or **LUCKPUT**, a town, W Hindostan, Cochin, on the Kora, or E. branch of the Indus lat 28° 47' N lon. 68° 56' E. It stands on the W brow of a hill that rises from a swampy plain, and is fortified, but so indifferently as to be of place of no strength. The scenery or most of the sea, on which Luckput stands, was formidable at that point, being only a foot deep, previously to the occurrence of the violent earthquakes at Cochin in 1822. There is now in consequence of the shock, 16 ft. water at the same spot. Other parts of the channel were also deepened by the convulsion, and a portion of the inland navigation of this part of the country which had been closed for centuries, became again practicable. Pop. about 5000.

LUCCO, a town, Naples, prov Abruzzo-Ultra II, dist. and 26 m. S. Aquila, W bank of Lake Fucino. It is walled, and has two churches. Pop. 1870.

LUCCON, or **LUCCON**, a town, France, dep. Vendée. It is a marshy district, at the extremity of the canal of the same name, 20 m. N Rochelle. It is a large but dull, irregularly built, dirty and unhealthy place, has a large Gothic cathedral, with three naves, and fine open lofty spire and a tower, chiefly in granite, houses and ship timber pottery &c. Luccon is a bishopric in which Cardinal Richelieu was appointed at the age of 22. In 1793, the Republicans defeated the Vendéans hereafter in battle. Pop. 4159.

LUCKTON, or **LUCKTON**, a town, England, 1017 m. Pop. 178.

LUCC, a village, Hungary, Higher Thuria co. Eszperin, on the Theiss, here crossed by a bridge of boats, about 16 m. from Tokay. It has a Protestant parish church, and a productive fishery. Pop. 1945.

LUDAMAR, a country Central Africa lat 14° 26' to 18° 38' N lon 8° to 10° 18' W having the states of Karta, and Bambaras on the E., Jafra and Kason on the W., and the Sahara on the N and E. The inhabitants consist entirely of Moors, who depend for subsistence on the rearing of cattle, being almost entire strangers to agriculture. The women weave cloth from goats hair and convert the skins of their cattle into saddles, bridles, pouches, &c. The principal town is Bonowra lat 15° 5' N, lon. 9° 40' W Jafra, about 28 m. to the westward, is also a considerable place.

LUDAS, a village, Hungary, Higher Thuria co. Eszperin, on the Theiss, here crossed by a bridge of boats, about 16 m. from Tokay. It has a Protestant parish church, and a productive fishery. Pop. 1945.

LUDBURGH, or **LUDBURGH**, a town, England, Lincoln 2250 m. P. 872. **LUDBURGH**, or **LUDBURGH**, a town, Fennoscandia 1607 m. P. 266. **LUD**, or **LUD**, a town, Hungary, Higher Thuria co. Eszperin, on the Theiss, here crossed by a bridge of boats, about 16 m. from Tokay. It has a Protestant parish church, and a productive fishery. Pop. 1945.

LUDEN, or **LUDEN**, a town, France, dep. Vendée. It is a marshy district, at the extremity of the canal of the same name, 20 m. N Rochelle. It is a large but dull, irregularly built, dirty and unhealthy place, has a large Gothic cathedral, with three naves, and fine open lofty spire and a tower, chiefly in granite, houses and ship timber pottery &c. Luccon is a bishopric in which Cardinal Richelieu was appointed at the age of 22. In 1793, the Republicans defeated the Vendéans hereafter in battle. Pop. 4159.

LUDEN, or **LUDEN**, a town, France, dep. Vendée. It is a marshy district, at the extremity of the canal of the same name, 20 m. N Rochelle. buildings, and other articles of hardware; and cotton and other mills. Calcutta is wrought in the neighbourhood. P. 3006.

LUDFORD, two parts, Eng.—1 In Hereford; 1887 as P. 512 —2, (Magna and Pines) Lincoln 2810 m. P. 793.

LUDGERSHALL, a town and par. Eng., co. Wilts. The town 15 m. N E Salisbury, has an Established church two Dissenting chapels, a charity school, and the ruins of an ancient castle. Near it, a few years ago, the great seal of England, used in the reign of Stephen, was discovered. Area of par. 1773 sq. Pop. 550.—(Local Correspondent.)

LUDGERSHALL, or **LUDGERSHALL**, a town, Eng., co. Wilts. 2430 m. Pop. 614.

LUDGIVAN, or **LUDGIVAN**, a town, Cornwall; 4084 m. Pop. 2529.

LUDHAM, or **LUDHAM**, a town, Norfolk; 1977 m. Pop. 262.

LUDINGHAUSEN, a town, Prussia, prov Westphalia, gov. and 16 m. S.S.W Münster, opp. circle, on the Elver; with a church, several public offices, manufacturers of linen and elgts, four dye-works, and several mills. Pop. 1820.

—The church is St. Anna, 204 geo. sq. m. Pop. 16,870.

LUDITZ, or **LUDITZ**, a town, Bohemia, circle Elnbogen, l. bank Sazava, 56 m. W Prague, with a church. P. 1409.

LUDLOW, a town, par. bar and par. Eng., co. Salop, in an elevated and commanding position, 23 m. S. by E. Shrewsbury near the confluence of the Teme and Corve, the latter of which is here crossed by a handsome stone bridge of three arches. It has spacious and well-paved streets, lighted with gas, and lined with many handsome houses, the town being a favourite residence of opulent and respectable families; a townhall, public offices, and several churches, a fine old Established church, and two Dissenting chapels numerous charities, including a free grammar and a blue-coat school, a lying-in institution, a dispensary and a set of almshouses also, a reading-room and museum, a public subscription and two circulating libraries, assembly-rooms, a theatre, a manufactory for woollen cloth, yarn, flannels, and blankets several corn-mills, a paper-mill, and an iron-foundry but most forms the principal article of traffic. The remains of the ancient castle of Ludlow are an interesting and picturesque appearance; and a delightful promenade has been formed along the moated fosse and part of the rock. Near the town are several mineral springs. The borough returns two members to Parliament, registered electors (1851), 450. Pop. (1851), 5376.

LUDWIGSBURG, a town, Württemberg, circle Neckar, opp. dist. and 8 m. N Stuttgart. It is the second town in the kingdom, and is handsome and well built. Most of the streets are spacious and lined with trees, and so uniform in appearance as to produce a feeling of monotony. The only buildings deserving of notice are the palace, which has recently been the royal residence; the theatre and opera. There are also four churches, two military schools, a custom-house, lyceum, picture-gallery and arsenal. The manufactory consist of woollen, linen, and cotton cloth silks, tobacco, cardigans, jewellery, needles, cartridges, &c. There is also a cannon-foundry connected with the arsenal. Since it ceased to be the royal residence, Ludwigsburg has rapidly declined. Pop. 6200. Area of dist., 54 geo. sq. m. Pop. 28,750.

The manufactory consist of woollen, linen, and cotton cloth silks, tobacco, cardigans, jewellery, needles, cartridges, &c. There is also a cannon-foundry connected with the arsenal. Since it ceased to be the royal residence, Ludwigsburg has rapidly declined. Pop. 6200. Area of dist., 54 geo. sq. m. Pop. 28,750.

LUDWIGSBURG, a town, Württemberg, circle Neckar, opp. dist. and 8 m. N Stuttgart. It is the second town in the kingdom, and is handsome and well built. Most of the streets are spacious and lined with trees, and so uniform in appearance as to produce a feeling of monotony. The only buildings deserving of notice are the palace, which has recently been the royal residence; the theatre and opera. There are also four churches, two military schools, a custom-house, lyceum, picture-gallery and arsenal. The manufactory consist of woollen, linen, and cotton cloth silks, tobacco, cardigans, jewellery, needles, cartridges, &c. There is also a cannon-foundry connected with the arsenal. Since it ceased to be the royal residence, Ludwigsburg has rapidly declined. Pop. 6200. Area of dist., 54 geo. sq. m. Pop. 28,750.

LUEBNA, a town, Spain, Aragon, prov and about 60 m. from Saragossa, l. bank Arba-de-Lencia; with two churches, an old castle, a primary school, several mills, and a trade in charcoal and in wood. Pop. 947.

LUFFENHAM two par. Eng. Rutland.—1 (North; 1929 as. Pop. 443.—2 (South) 1417 as. Pop. 437

LUFFINCOTT, par. Eng. Devon, 971 as. Pop. 96.

LUFUJI, river and valley, Africa. See **KILWA**

LUFTON, par. Eng. Somerset 292 as. Pop. 24

LUGA, a tn. Buea, gov. and 90 m. S.S.W. Petersburg cap. along on river and same. It is built of wacca and has a church and a market. Pop. 800.—The wacca is well wooded and fertile. Area, 8078 sq. ac. m. P. 78,690

LUGAGNANO a tn. and com. Parma, dusty and 19 m. S.E. Piacenza, at the foot of Mount Clogio, l. bank Arda. It is a very ancient place, contains a parish church, which burns date 1219; and a public school and has an important weekly corn market. Pop. 4521

LUGANO (Lago 29), (Latin, *Cornutus Lacus*) a lake, partly in the Swiss can. Tessin, and partly in Aemuria Italy, between Lakes Maggiore and Como. It stands nearly 200 ft. above the level of both these lakes, and is of a very irregular shape, throwing out arms in all directions, and leaving only a very narrow trunk. Its greatest length may be about 20 m. greatest depth, about 100 fathoms. It is fed by a number of small torrents, of which the largest are the Magliana, Veduggio, Cosarato, and Maroggia and discharges itself into Lake Maggiore, by the Trese. It abounds with fish. Its scenery is very imposing, being much more gloomy and rugged than that of the celebrated lakes on either side. A steamer plies regularly on the lake and between the two villages of Malda and Biasone where a handsome bridge has recently been thrown over it.

LUGANO, or **LAURA**, a tn. Switzerland, can. Tessin, cap. dist., and beautifully situated on the N. shore of the lake of same name, in a small semicircular valley, 15 m. N.W. Como. It consists of white, well built houses, mostly of three stories, and other elegant and imposing. It has several churches, of which that of San Lorenzo is a fine structure, conspicuously seated on a commanding eminence and another, called San Maria degli Angeli, is adorned with some fine paintings by Bernasconi. There are three monasteries, three manor-houses, an hospital, an old bishop's palace, and theatre. Its manufactures consist chiefly of silk goods, open silk, leather hats, tobacco, and books, particularly cheap editions of works prohibited in Italy. The trade, also, is considerable, Lugano being the principal entrepot for the traffic carried on across the lake, between Italy and the countries on the N. side of the Alps. Pop. (1850), 5142

LUGANSKOE, a tn. Russia, gov. Ekaterinodar, on the Luga. It has extensive iron-works, at which a great number of mines and canons are annually cast. Pop. 1894.

LUGAR, a beautiful small river, Scotland. Ayrshire, which falls into the Ayr, near Cairn.

LUGARES (SARCO), a vil. La Plata, prov. and 14 m. W. Buenos Ayres. In 1852, the slaughter house was here finally defeated by Uruguay.

LUGDE, or **LEIDE**, a tn. Friesland, prov. Westphalia, gov. and 25 m. S.E. Münden, on the Ems. It is walled, has three gates, two R. Catholic churches, a paper-mill, a lace factory, and a mineral spring. Pop. 2069.

LUGO, a river, England and Wales, rises in Radnorshire, and, after a S.E. course of about 40 m., falls into the Wye, co. and 4 m. S.E. Hereford.

LUGHMAN, or **LAHMAN**, a dist., in N.E. of Afghanistan, lat. 34° 25' to 35° N. lon. 70° to 70° 40' E. It forms part of prov. Jelalabad and is bounded N. by Hindoo Koosh, E. the Kama, S. the Cabool, and W. the Alishang length, about 40 m., and breadth, 30 m. It is very rugged, but fertile and populous. The British prisoners rescued from the massacre of Cord Cabool, were conveyed by Mahomed Akbar Khan into this district.

LUGO (San. Lucas de), a city, Spain, (Valencia, cap. of prov., 45 m. S. of S. Valencia, on a hill, 1 hour 10 m. from the sea, crossed by an old bridge of eight arches. It is well built, surrounded by ancient walls, flanked by semicircular towers, and commanded by a ruinous castle. It has wide, clean, regular, and paved streets; two principal and 10 smaller squares, a handsome Gothic cathedral, two parish churches, several chapels, two convents, two hospitals, town and session houses, a prison, barracks, theatre, various schools, and other benevolent institutions, an orphan asylum, episcopal palace, with extensive library; some pleasant public walks, and triple

sulphurous baths. Manufactures:—linen and woollen fabrics, leather, hats, soap, white wax, cream-of-tartar, paper, candles, wine, and oil. The chief employment of the inhabitants is agriculture and cattle-rearing. Lago contains many Roman remains. Pop. 7269.—(Mador and Mollado).—The province, bounded N. by the Atlantic, E. prov. Oviedo and Leon, S. Orense, S.W. Pontevedra, and W. Coruña, lat. 43° 23' to 43° 47' N. lon. 6° 53' to 8° 4' W. is of so rugged and mountainous a character that not above 330 sq. m. of its total area, 5068 sq. m., are cultivable. The coast-line is very irregular and presents precipitous cliffs to the sea. Cape Estaca, in this province, is the most N. point in the Spanish peninsula. The mountains, generally bare, and rocky towards the summit, but tolerably well-wooded near the base, afford excellent pasturage, and contain mines of iron, antimony, and argentiferous lead, though little wrought. Quarries of building-stone, granite, marble, crystal, and quartz. The valleys are for the most part fertile, though very poorly cultivated. The principal rivers are the Eo, Minho, Oren, and Miño. The inhabitants are principally engaged in tillage, cattle-rearing, fishing, and as muleteers—they are honest, and much attached to their native hills, hospitable, but proud of their descent and averse to innovations of their ancient customs. Education is deplorably neglected, and much of the agricultural labour is done by women. Besides Lago, its capital, it contains the towns of Mondoñedo, Monforte, Ribeira, and Viveiro. Pop. 419,487.

LUGO, a tn. Italy. Romagna, 35 m. S.E. Ferrara, on the Reno supposed to occupy the site of Lucus Flaviae whose temple was in the neighborhood, and to date from the time of Marcus Bruttius, proconsul of Ravenna. It is an important provincial town, and contains a fine piazza, surrounded with porticoes, but suffered dreadfully in 1795, when it was sacked by the French. It trades in hemp, flax, rice, wine, and brandy, and has an important annual fair which lasts a fortnight. Pop. 9842.

LUGOS, several places Hungary, particularly—1, A vil. Thutier Thales, co. Szabolcs, about 13 m. from N. Sz. Basko with a Greek church. Pop. 1438.—2, A market tn. Thutier Thales, co. Krasowa on the Theiss; with two churches, a townhouse, and military barracks. Pop. 6600

LUGRIN a vil. and com. France, dep. Haute Savoie prov. Chablais, S. shore Lake of Geneva, E. from Thonon with an ancient church, supposed to date from the 11th century and manufactures of cherry brandy. Pop. 1274.

LUGWARDINE, par. Eng. Hereford, 2097 as. P. 670

LUING, an isl. off W. coast, Scotland, co. Argyll, sea road from Bala island, on the N. by a narrow strait. It is about 74 m. long, and has a picturesque appearance.

LUINGUB a vil. and com. Belgium prov. W. Flanders, 80 m. S. Bruges. It has manufactures of linen, an oil-works, brick works, a bleachfield, and two flour-mills. Pop. 1243.

LUIS-DE-SA PAZ, a tn. Mexico, near the S. frontiers of dep. Guanajuato, and about 36 m. N.W. Queretaro, with productive silver-mines.

LUIS-DE-PORTO (SAN), Bolivia. See **PORTO** (SAN LUIS DE).

LUIS (SAN).—1, A prov. and in La Plata.—The province is mostly between lat. 33° and 34° S.; lon. 64° and 65° W.; and surrounded by provs. Cordova, Mendoza, and San Juan. The soil is poor; and the surface, in some parts, rocky and mountainous. Agriculture is little attended to, but cattle are reared in considerable numbers. The inhabitants, who are scattered over the estancias or cattle-farms, live in continual dread of the Indians, and are altogether in a miserable condition. Pop. about 25,000.—The town of Luis is prettily situated on the W. slope of one of the knolls of the Sierra de Cordova, 2417 ft. above sea-level 428 m. W. N.W. Buenos Ayres. It has some little trade in horses and skins. Pop. 1503.—2, A vil. Spain, in a plain, S. side of Almorox with a church, a primary school, two flour-mills, and a trade in corn, wool, and cattle. Pop. 1982.

LUISIANA (LA), a vil. Spain, Andalucia, prov. and 40 m. from Seville, on a plain, with a church, primary school, prison, and mineral springs, considered efficacious in cutaneous affections. Pop. (agricultural), 2941

LUIS (RIO) in Brazil. See **MARAVILLO** or **MARATHAN** LAIS-ALVES, or **MARQUE** ALVES MENDONÇA, a river, Brazil, which rises in the Serra de Itatia, in the N.E. of prov. Goyaz, pursues a N.W. course, through a country which is

very little known, and John F. Cook Twining, in about 1870. Its whole course is estimated at 150 m., and, except a few spots where salinity occurs, is pure and unmineralized.

LAJAN, or LARAN.—A river, La Plata, which enters the estuary of the Plata on the W side, 18 m. N W Buenos Ayres, after a course, generally E., of about 120 m. —S, 21 m. on above river, near and 55 m W Buenos Ayres.

LUNAR, a vil. Spain, Andalusia, prov. and 60 m. from Granada. It has ill-paved, dirty streets, a church, cordwainers, prison, primary school, building-stone, limestone, and gypsum quarries, and a trade in agricultural produce. Pop. 1229

LUKAWETZ, or **LOUWENZ**, a market tn. Bohemia, circle Königsgrätz, about 4 sq. from Reichenau; with a church, school, a mill, and iron-mines. Pop. 1806.

LÜKELINGO, a tn., E. Africa. See **KILWA**.

LUKE'S (St.), par Irel. Dublin, 28 ec. Pop. 174

LUKIANOW, or **LUKOJANOW**, s to Russia, gov and 26 m. S.E.E. Nijni-Novgorod, cap. circle, at the confluence of the Khozhatschawka with the Koscha. It has a church. Pop. (agricultural), 1200.—The **CIRCLE** is well wooded,

very fertile, and rears great numbers of cattle. P 185,000.
LUKKKE (Nomen and Bourz) two m. South The
 first, now in ruins and deserted, is 12 m. S.E. Shikarpour;
 lat. 27° 48' N lon. 68° 48' E. It was ruined by the oppres-
 sive exactions of the Anwers of Baluch. S. Lukkee is on a
 bank facing 70 m. N.N.E. Hyderabad lat. 26° 14' N lon.
 68° 1' E. near a small lake. (Close to the town is a sulphurous
 spring, which flows from the base of a calcareous precipice

LUKKEE MOUNTAINS, a considerable range in Canada, connected with the Hale or Brahmore mountains of Helokochatan. They lie W from the Indus, stretching E. from Sulwan to near Kurvachon, gradually diverging from the river. They appear to be of porphyry, are very bare of vegetation, and much furrowed by water-courses. highest peaks over 10,000 ft.

LUKOW, a tn. Russian Poland, 16 m. S Siedles, on an affluent of the Krzna. It has several churches, a castle, a Piarist college with gymnasium, monastery and some general trade. The soil is cold.

LULA, or LOYOLA, a vil. in Sardania, div. Sassari prov. Nuoro, at the bottom of a small valley, rendered un-healthy by stagnant water. It contains several churches and has manufactures of woollen and linen cloth, and a trade in cheese. Pop. 1841, 2941.

VIJLEDA, a small port, Sweden, lies N. Behms, or Fiskö, on a small peninsula at the mouth of the Luleä, in the Gulf of Bothnia, 51 m. W.-S.W. Torneå. The present town has a good harbour, at which some trade is turned on, and steamer call is passing between Stockholm and Torneå. It appears another town called Luleä Gårdhagen (old town), 10 m. S. of the Gulf of Bothnia, and is also a place of some importance, but lost it by the flooding of the sea. The church, which is large and handsome, and market-place are still in the old town. Pop. 1139—9. A river, Sörfors, which flows from a long and narrow expansive forming a lake of some extent, and is navigable for small boats, discharges its large numerous tributaries, and, after a course of about 220 m., falls into a bay in the Gulf of Bothnia, at the town of Luleä.

LULLIN, H and com. France, dep. Haute Savoie, prov. Chablais, about 10 m. from Thonon, with a church. P 1002.

LUMARZO, a vil. and com. Italy Piedmont, div. Genoa, prov. Chiavari, near Colognola, in a mountainous district, near the source of the river Lumare.

LUMBIER, a tn. Spain, prov Navarra, 82 m. E.S.E. Pampeluna. It has tolerably good and well-paved streets; a church, numerous townhouses, prison, and two schools; and a trade in corn and wine. Pop. 1,000.

LUMMALES, a town Spain, Leon, prov and 46m. W.S.W. Salamanca. It has wide, but dirty and ill-paved streets, a church, chapel, storehouse, townhouse, two schools, and some domestic weaving. Pop. (1871) 2,250.

LUMBERMAN, a to. Hops, Old Castle, pier and 25 m.
N. Legroto, with a church, townhouse, prison, primary school
and a little trade in wool. Pop. 1120.

LUMELINA, a de. *lumelina*. *de* MONTANA.

LAURELLAO, de Lourenço, a vil and com. Brazilian State, div. Minas, near Lourenço, r bank Agaçes, 10 m. S.E.R. Morteira. It has a good square, two parish churches, and a monastery, with a church attached to it, and a trade in agricultural produce and milk. Pop. 2161.

LUMENCHA, a small vl. Spain, Bay of Biscay, at the mouth of the Iruña, and the entrance of the port of Leizorin, consisting chiefly of a rocky height, which commands that town. It had a battery, which the British destroyed in 1810 and has a very ancient hermitage.

LUMEGGIANE, two contiguous vills. Italy Lombardy, prov. and 9 m. N Braccia.—1 (*Novo*), L. bank Meila, in the valley of Lumezzane, with a parish and several auxiliary churches. Pop. 1686.—2, (*Sanio Apollonio*) with a parish church. Pop. 1996. In both villages are manufactures of cutlery iron-wire, swords, and flints.

LUMMEN, a tn. and com. Belgium, prov Limburg, 9 m N W Hasselt; with a church, three chapels, three commercial houses, and three schools. Pop. (agricultural) \$208

LUMPHANAN par Boot Aberdeen 7620 no. P 1088

LUNA a to Spain, Aragon prov and 85 m. from Saragossa, with two churches, a courthouse, prison, and primary school Pop. (agricultural) 845

LUNAN per Sect. Forlar, 1950 ac. Pop. 279.
LUNGADES all Sweden ac. and 21 - N. South.

LUNCARTY, a village Scotland, co. and 8½ m. N Perth memorable for a victory obtained by the Scotch over the Danes, in the 10th century. It is a station on the Perth and Forfar railway and the seat of a most extensive linen manufacture.

LUND, Mrs. E. V. 8051st Ave. 509

[illegible]

LUNDEN, a vil. Denmark, Holstein, N. Dänemark, 67 m. N N W. Hamburg at the extremity of a belt of sand, which here stretches like the Marsh. It has a church, supposed to occupy the site of a fort called *Lind*, built by King Waldemar II. and two large annual fairs. In the neighbourhood is the house of the famous Leadvogt *Marius Syva*. Pop. 1500

LUNDENBURG BRIDELAW, or BRACHLAW, a market to Austria, Moravia, circle and 88 m. S.E. Brum, on the railway from Vienna, and on the Taja, with a chapel, a castle, a trade in cattle, and two annual fairs. Pop. 2158.

LUNDIE-AND-FOWLER, par Scotland, Forfar; 6400 ac.

Pop. 450.

LUNDY ISLAND, England co. Devon, at the entrance of the British Channel, 10 m. N.W. Hartland Point. Area, about 2000 ac. It is defended by lofty and precipitous rocks,

LUNDYE, a river, Afghanistan, one of the principal tributaries of the Cabool, rises on the S. declivity of the Hinduo Kook, N. of Peshawar. It flows N.E. to S.W., and empties into the Cabool from the W. and N.W.

from the lake into the Gabel between the Kibber mountains and the lake, lat. 54° 10' N., long. 21° 42' E.

LURKE, a navigable river, England, which rises in the mountains of Wiltshire, flows S. and W. past Kirby-Lansdale and Lancaster, and, 6 m. below the latter, falls into the Irish Sea by a broad estuary; total course about 50 m.

LURBURGH, a *co. Hanover*, *gov. dist. (Sachsen)*, of some name, on the Elbe, and close to the railway from Hildesheim to Harburg, 38 m. S.E. Hanburg. It is walled, has six gates, and communicates across the river by seven bridges; has several squares, but is, in general, ill built, having dark and narrow streets, and dull, old-fashioned houses. It contains four churches, a monastery, which was secularized in the 17th century, but still contains an extensive library, a theatre, arsenal, townhall, theatre, gymnasium, military academy, military hospital, ordinary hospital, and several other benevolent, educational, and literary institutions. It has manufactures of paper, tobacco, sugar, and vinegar, numerous breweries and distilleries, and a considerable trade, particularly transit, carried on by the Elbe. Near it is a salt mine, which has been worked from a very early period, and the produce of which forms an important article of exportation. Pop. about 9000.—The district is almost entirely flat, and, along the banks of the river, has both good arable and rich meadow land, but an extensive tract, known by the name of Lüneburg mor, occupies its very centre. Area, 334 sq. m. Pop. 119,681.

LUNEL (anc. *Lunellum*), a *co. France*, *dep. Hérault*, 15 m. E.N.E. Montpellier, on the canal of its own name, and the railway from Montpellier to Nîmes, near *r. bank* Vidourle. It has infantry and cavalry barracks, liquor factories, and numerous distilleries of brandy and spirits, and has a trade in corn, flax, excellent sweet wines, brandy, &c. In the 10th century, Lunel was a place of strength and almost entirely inhabited by Jews, whose celebrated rabbi, Solomon Jarchi had here a famous synagogue. Its fortifications were razed, in 1622, by Cardinal Richelieu. Pop. 5797.

LUNEN, a *co. France*, *gov. Westphalia*, *gov. 28 m. N.W. Arnsberg*, at the confluence of the Roewe with the Lippe. It has two churches, and manufactures of woollen and linen cloth, hosiery, leather, and tobacco. Pop. 2250.

LUNEVILLE (anc. *Mortagne*), a *co. France*, *dep. Meurthe*, near the junction of the Vesouze with the Meurthe, 15 m. S.E. Nancy. It has generally straight streets and regular buildings, a modern and handsome church, a palace, built by Leopold, Duke of Lorraine, at the beginning of last century, and subsequently embellished and occupied by Stanislaus, ex-king of Poland, manufactures of common cloth, calicoes, hosiery, lace, embroidery, leather and worsted gloves, brown earthenware, furnaces, and stores a good deal of wool and cotton is spun, and there are also linseedfields and breweries. The trade is in wine, corn, brandy, hemp, flax, wood, and embroidery. Luneville possesses a court of first resort an agricultural society a communal college, and is one of the largest, cavalry stations in France, having very extensive barracks and exercise ground. The treaty of peace, in 1801, by which, as a consequence of the battle of Marengo, the Rhine became the French frontier, was signed here. Pop. 12,164.

LUNG-LANG, a *river*, China, *prov. Quensu*, flows S.E., and joins the Hsueh-hsing, after a course of about 800 m. Chief cities on its banks, Kiyuen and Low-tohoo.

LUNGA, an isl., W. coast, Scotland, *co. Argyle*, separated from Skye, by a strait, remarkable for the violence of its current. It is about 3 m. sq., and abounds in slate.

LUNGERN, a *vill.* and *par.* Switzerland, *can. Unterwalden*, Ob dem Wald, in a beautiful valley at the foot of Mount Brinig, and at some distance from the S. end of the lake of some name, 9 m. S.W. Surren. It is originally stood on the banks of the lake, but, after many unsuccessful attempts, a tunnel, 1890 ft., was, in 1855, introduced to drive the portion of the waters to lake Surren, was driven into the bottom of the lake, 100 within 3 ft. of the water, and forced into a communication with it by exploding a barrel of gunpowder. The surthen has thus been so much lowered, as to injure the beauty both of the town and lake, but compensation is expected from the land acquired. Pop. 1338.

LUNGHO, or *Lungha*, a *co. Naples*, *prov. Calabria-Citra*, *dist. med. 6 m. S.W. Castellavere*, near *r. bank* Tiro, with a Greek convent, and near it a mine of rock-salt. Pop. 3706.

LUNGWITZ, or *Asser-Ossa Lungwitz*, a *vill.* Saxony, *circle and 42 m. S.W. Sorbica*, on the Dresden road. It has manufactures of linen and hosiery, a large cotton-mill, and several extensive quarries. Pop. 4300.

LUNIGIANA a small territory Italy formerly belonging to Tuscany between Fiesolano, Firenze, and Modena area, 197 sq. m. It is divided into 11 communes, chief towns, Pontremoli. It is watered by the Magra and its affluents. Pop. (1844), 55,230.

LUNTEREN, a *vill.* Holland, *prov. Gelderland*, 17 m. N.W. Arnhem, with a church and school P (agricultural), with environs, 1900.

LUNZENAU, or *Lunzen*, a *co. Saxony*, *circle and 3 m. W. Leipzig*, 1 bank Mulde. It is well built, has a handsome church, and manufactures of linen and shoes. Pop. 3787.

LUPAK, a *vill.* Hungary, Thidher Thal, *co. Krasova*, about 8 m. from Dognasska with a church. Pop. 1004.

LUPU (Lup), a *co. Naples*, *prov. Salerno*, *dist. and 31 m. S. Campobasso*, on a height; with three churches. P. 1800.

LUPPETT, *par. Eng.* Devon, 4398 *ac.* Pop. 741.

LUPSA, a *co. Austria*, Transylvania, *co. Unter-Thomsburg*, *esp. dist.*, on the Arany, 36 m. W. Nagy Ráyd with four Greek churches. Pop. 3099.

LUQUE, a *co. Spain*, Andalucia, *prov. and 37 m. S.E. Cordova*. It has two squares, steep, and, for the most part, badly-paved streets, a spacious church, some chapels, a convent, townhouse, prison, two hospitals, three schools, a cemetery, an ancient castle, formerly of great strength, manufactures of linen, woollen, and separate fabrics, oil, and a little wine, and some trade in cattle. Pop. 3753.

LURAGO a *vill.* and *par.* Italy Lombardy *gov. Milan*, *prov. Como*, 6 m. S. Erba, enclosed by beautiful hills, near the Lambro, with a church and brick and tile works. P. 3200.

LURAS, or *Lauras*, a *vill.* and *com.* Sardina, *div. Sassari*, *prov. and N.E. Tempio* on an elevated and healthy plain. It has several churches and a primary school and a trade in wine, brandy, cheese, hides, wool and corn. Pop. 1540.

LURATIA-ANATIA, a *vill.* and *com.* Italy, Lombardy *gov. Milan*, *prov. and 9 m. E. Como*, with a church, and an old castle, and has a trade in wine. Pop. 1981.

LURE (anc. *Ledura*), a *co. France*, *dep. Haute-Saône*, near *r. bank* Ognon, 16 m. N.E. Vesoul. It is tolerably well built, though the houses in general are low in height, and has municipal offices, occupying the extensive and fine buildings of the old princely abbey of Lure a handsome college, a parish church, a court of first resort, an agricultural society, com. museum, college, and manufactures of hosiery cotton stuffs, straw hats, and leather. Pop. 3198.

LURGAN, a market in Ireland *co. and 15 m. N.E. Armagh*, on the railway to Belfast. It consists principally of one spacious street, containing numerous handsome buildings, which extend for nearly a mile along the Belfast and Armagh road, and has a courthouse brown-linen hall, Established church R. Catholic chapel, and several dissenting places of worship, several schools, a dispensary and union work-house. The inhabitants are principally employed in the linen and muslin manufactures. Brewing is also carried on to some extent. Pop. 4905.

LURGAN *par. Irak* Cavan, 10,555 *ac.* Pop. 4687.

LURGASHALL, *par. Eng.* Sussex; 4850 *ac.* Pop. 744.

LURISTAN, or *Louhistan*, a *dist.* Persia, a S. division of *prov. Irak Aymil*, bordering on Khuzestan and Fars. It is extremely mountainous, having the mountain ranges of Elward and Awas on its N.E. boundary, those of Bakhtyari to its centre, and the Luristan mountains on its S.W. border. It has, nevertheless, many fruitful valleys and luxuriant pastures, but agriculture is wretchedly neglected by the natives, who prefer a wandering and pastoral life. The latter, consisting of numerous and different tribes, are a rude and savage people and own no law but the will of their chief, the most atrocious of which are the Bakhtyaris, who pursue their bloody trade with the most bitter inveteracy. As the inhabitants reside both summer and winter in tents, there are no towns, and very few villages, in the country.

LURU, a *river*, Turkey in Europe, Albania, formed by the junction of various head streams, which rise about lat. 39° 55' N., lon. 20° 50' E., whence it flows E. and falls into the Gulf of Arta, at lat. 39° 5' N., lon. 39° 50' E.; total course, 35 m. to 40 m.

LAIK, or LAMA, a mountain pass in the E. of Bohemia, situated along the Rhenish Ocean, through the Rhenish mountains, which form the W. boundary of Bohemia; at lat. 50° N. It is 112 m. in distance from N. to W. and 82 m. broad. N. to S. it is a mountainous land in the E. and W. but elsewhere a perfectly flat plain, and on some parts of the mountain, namely, it is watered by several streams, of which the principal is the Fereby, which, rising in the E. part of the province, falls into the Bay of Bohemia; having previously been joined by some considerable tributaries. The soil is generally barren, covered with stunted woods, or scanty pasture, grazed by horned cattle, goats, sheep, and numerous herds of camels, but, along the banks of the rivers, grain, sugar-cane, pulses, and tobacco, are grown, although in limited quantities. The inhabitants, whose chief support is their flocks and herds, are called *Lamae* or *Hemari*, and speak a dialect similar to that of Sebe. They are governed by a chief, called the *Jem*, who resides in the little town of Bela or Bela, having considered the capital. Pop. of entire prov. estimated at 80,000.

LUBATIA, Germany *See* **LADOWA**.

LUBST, par Eng. Lincoln 780 ac. Pop. 143.

LUCHAN, or LUHAN, a vil Bohemia, circle Hohenow about 8 m. from Glinitz; with a church, school, and mill. Pop. 113.

LUNCHE, or LUNA, a market in Bohemia, circle Chreditz about 10 m. from Hohenowitz, with a church, a synagogue, an ancient town-house, and four mills. Pop. 1440.

LUDORF, or LUDROW, a vil Bohemia, circle Bzenau, near Frischau, with a handsome church, a saw and two other mills. Pop. 1008.

LOSEN, a vil and *par* Austria, Tyrol, circle Bruneck, dist. Bozen with a church and chapel. Pop. 1149.

LOSERNA or LORONA, two places, Italy. Piedmont. — 1. A to div and 57 m. S.W. Turin 1 bank Police with a parish church, monastery, a large cotton-factory and a foundry. Pop. 1180 — 2. (Belle di) A vil contiguous to above with a large Waldenau, and a small R. Catholic church, a cotton-loom, and an hospital. Pop. 1448.

LUEGNAN (anc. Lugdunum), a tn France, dep. Vienne on the Yonne, 14 m. S.W. Poitiers. It is chiefly remarkable as still possessing some remains of what was once one of the finest and most ancient fortresses of France. It figured much during the religious wars of the 16th century, and many important sieges, and was dismantled and razed in 1643 in its site has been converted into five public walks. The manufactures of the town are serge and leather and it has a considerable trade in clover and incense seed, corn, and wool. Pop. 1482.

LUBIGNY, or LUGNAY (Latin, Lugdunum) a vil and com. France, dep. Aube, 9 m. E.E.E. Troyes; in a fertile plain bounded by a forest of some name. It endured much during the time of the League, and was also the centre of military operations during the invasion of the Allies, in 1814. Here, after several conferences, the Allies proposed a peace to Napoleon, on terms which he rejected. Pop. 1106.

LUKE, par Ind. Dublin 16,194 ac. Pop. 5634. With villages of same name, 5 m. W. Rush. Pop. 710.

LUENAGH, par Ire. King's co. 8783 ac. Pop. 2164.

LUENA, or LUONA, a vil Hungary Higher Danube, co. Liptau, 4 m. from Nemesd, with a church, and mineral springs. Pop. 1690.

LUEN, a vil and *par* Scotland, co. and 12 m. N.W. Dumfriesshire. The village, situated on the margin of Loch Loven, has a parish and a Free church, and is much resorted to during summer, on account of the fine scenery in its neighbourhood. Pop. 599. The *par* is 5½ m. long by 5 m. broad. Pop. 807.

LUENAN, two small parishes in Austria, Thyrin, in the Gulf of Quarnsee, on an island of the same name, called, also, *Canzo* — 1. (Piscio) a *comune* in, *cap. Alze*, near the centre of the island, on a creek, which runs a considerable way up into it, and forms a harbor. It is extremely fertile, has a very cheerful appearance, contains a parish church, school, high school, and two castles, one of them in ruins; and has manufactures of soap, building-yards, and an excellent harbor which is much resorted to both for refuge and trade, and has depth of water sufficient for ships of the line. Pop. 6910 — 2. (Grande) about 5 m. S.E. Lando-Piscio, S.E.

side of the island, at the foot of the Calvary-hill. It has a church, chapel, and elementary school; a small but beautiful harbor, very frequented by small boats. Pop. 4000.

LUENBURG (Lutera), a vil and *cap. lat.* Saxony, dist. Harz, prov. and 5 m. W. G.W. Osnabrück, in a large mountain hollow, apparently the center of an artificial volcano. The houses are in general well built, but the streets are narrow and winding. It has several churches, a monastery, and primary school; manufactures of woollen and linen cloth, and articles in wood, a considerable trade in cattle, wool, and dairy produce, and an important annual fair. Pop. 4448.

LUETENAU, or LUETWAC, a vil and *par* Austria, Vorarlberg, in a beautiful and fertile district, r. bank Rhodan; with a church. Pop. 2296.

LUETLEIGH par Eng. Devon 1999 ac. Pop. 387.

LUSTNAU, a vil Wurtemberg, circle Schwarzwald, about 1 m. E.N.E. Tübingen, on the Neckar with a church, and the remains of a monastery. Pop. 1456.

LUTHERMUIR, a vil Scotland, co. Kinross, 6½ m. N.N.E. Brechin, with some ill-managing. Pop. 367.

LUTHERA, a vil Hungary, co. Transylvania, near Munkacs; inhabited by Slovaks. Pop. 1940.

LUTJENBURG, a tn Denmark, Holsten, on the Helmsdorfer Aue or Kwanau, 80 m. N.W. Lübeck, once defended by a strong castle. It has several distilleries, at which a brandy, which bears a high name, is produced. Many of the inhabitants are shoemakers, but the majority of them are employed in agriculture. Pop. 2100.

LUTOMIESK, or LUTOWAN, a tn Russian Poland, 100 m. W.S.W. Warsaw, 1 bank Ner; with manufactures of woollen cloth, raised woollen and silk goods, caps, and gloves. Pop. 780.

LUTON, a market in, and *par* England, co. Bedford. The town stands in a delightful valley, on the Lea, near its source, 18 m. S. Bedford, and has a town-hall, market-house, an elegant ancient church, various dissenting places of worship, a Friends' meeting-house, several schools, and some charities, extensive manufactures of straw-plait, a large iron and brass foundry and a gas-works. Pop. 10,648. Area of *par*, 15,750 ac. Pop. 12,787.

LUTRY, a tn and *par* Switzerland, cant. Vaud, ep. circle, on N. shore Lake of Geneva, about 5 m. E.S.E. Les Ambiez. It is an ancient place, with a castle, and is still well built. Some ruins, given in the district. Pop. 7283.

LUYSCH (Lauus), a vil Austria, Moravia, circle Olmütz, near Krümm, with a flour-mill. Pop. 1560.

LUTTABUND PASS, Afghanistan, the most N. of the four colossal passes through the Karkizian range, near Cabool, lat. 34° 21' N.; lon. 69° 28' E. It is 5 m. long, and about 7000 ft. high.

LUTTER, or LUTTER-AN BARNHEIMER, a tn duchy Brunswick, on a stream of the same name, at the foot of Mount Harburg, 17 m. S.W. Wolfenbüttel. It has a parish church, an off and a new mill, and some weaving and spinning. Here, in 1628, Tilly defeated Christian IV. of Denmark. Near it is the castle of Ober Lüttenburg. Pop. 1064.

LUTTERWORTH, a market in, and *par* England, co. Leicestershire. The town, on the borders of co. Warwick and Northampton, 12 m. E. by W. Leicester, has well-lighted and lighted streets, a handsome Established church, with a lofty tower, and several dissenting chapels; a vast town-hall, many workhouses, free and endowed schools, a mechanics institute and reading-room, and a new Henry Wickham, the reformer, was victor of this parish for nine years, and died and was buried here in 1856. Area of *par*, 1890 ac. Pop. 2444. — (Local Correspondent.)

LUTTICH in Belgium. *See* **LUZAS**.

LUTTON, a parish, England, co. Northampton; 1800 ac. Pop. 199.

LUTTINGHAUSEN a tn Rhodan Franconia, gov. and 16 m. S.E. Dinkelsb., with a Protestant church, manufactures of woollen, linen, and cotton stuffs; iron and steel wire, particularly spikes. Pop. 964.

LUTZEN, a tn Prussia Saxony, gov. and 9 m. S.E. Merseburg, on the Elster river, cant. Hildersheim, the theatre of the battle of which it has been the theatre: that of 1812, in which the Swedes defeated the Austrians, but lost their recovered sovereignty and ground, Bismarck's army, and that in which Napoleon, in 1813, succeeded in giving a check to

the Altes. About a mile out of the town, a square block of granite, called Schwedenstein [the Sweden stone], over which an elegant east-west monument has been erected, marks the spot where this great Gustavus fell. Lütten contains a castle, and a church. Pop. 1700.

LUVINO or **Luvio** a tn and com. Italy, Lombardy, prov. Milan, prov. and 24 m. N. Como. E. shore Lake Maggiore. It is well built, has a court of justice, a handsome parish church, a hospital, several schools, and a considerable trade with Switzerland. Pop. 1942.

LUXBOURGH, par Eng Somerset, 8740 ac. P 512
LUXEMBURG, or **Luxembourg**, a prov. Belgium constituting the W. portion of the grand duchy of Luxembourg bounded N by prov. Liège, E. duchy Luxembourg S. France, and W. prov. Namur; length, N to S, 67 m. breadth, 37 m. Area, 1705 sq. m. It is elevated and mountainous, highest summits not over 2000 ft., and extensively covered with forests of excellent oak, &c., a branch of the Ardennes traversing it S. W. to N. E., and forming the water-shed between the basins of the Meuse and the Moselle. The principal streams are the Ourthe, Sauer, Lesse, Sure, Honime, and Reite. The soil of the lower valleys is tolerably fertile but, with this exception is generally a thin, sterile gravel, or hungry clay. The mountain pastures, however, are excellent, and rear great numbers of sheep, horned cattle, and horses the last, in particular being a hardy, spirited race, and largely exported to France, for light cavalry. The minerals include coal, copper, marble, and slate but iron is the only valuable ore. The chief manufactures, in addition to iron, are leather and saddlery and the chief trade, after wool, is cattle for administrative purposes. Luxembourg is divided into five arrondissements—Arlon, the capital, Bastogne, Marche Neufbâteau, and Virton subdivided into 20 civil and 16 military cantons. Pop. 187,978, the large majority of whom speak French or Walloon.

LUZEMBURG (GAAK DVOY) or a territory belonging to the Dutch monarchy and till recently the 11th state of the German Confederation, bounded N and E. by Rhineland Prussia, S. France, and W. Belgium greatest length N to S, 55 m. greatest breadth, 34 m. area, 1228 geo. sq. m. It forms part of the plateau of the Ardennes and has a rugged and mountainous surface, covered in many parts with heaths and morasses, though in general well wooded. Its drainage belongs almost entirely to the basin of the Moselle, which forming the S. E. boundary receives part of it directly and the far greater part of the remainder by the Sûre and its tributaries. Agriculture is limited in extent by the nature of the surface, and has not made much progress but the pastures rear great numbers of cattle, sheep, and horses. The last, in particular have long been in high repute for light cavalry and are largely exported. The only other important export is timber. The inhabitants are of German origin and speak German, though French is almost universally understood. They are for the most part seasons R. Catholics, and there are few parts of Europe where the Jesuits are allowed to have greater influence. For administrative purposes the grand duchy is divided into the three districts of Luxembourg Grevenmacher and Diekirch, containing eleven cantons. Pop. 169,750.

Luxembourg in early times was much more extensive than at present, and though forming part of Germany, was ruled by its own princes, who at the same time were sovereigns of the state of Brandenburg. It was first governed by counts, one of whom Henry IV., was elected emperor of Germany in 1308 and assumed the title of Henry VII. In 1364 it was erected into a duchy by Charles IV., and, in 1443, came by marriage to Philip of Burgundy, and, through him to the house of Spain. By the peace of the Pyrenees, in 1659, part of it was ceded to the French and took the name of French Luxembourg; but, in 1734, it all merged in the house of Austria, and remained with it till the success of the French revolutionary armies incorporated it with the French Empire. In 1814, it was converted into a grand duchy and given to the king of Holland, who possessed it, in common with Holland and Belgium, till 1830, when, in consequence of the revolution of the latter, part of it became a Belgian province. The remainder, containing with the Dutch, forms the present grand duchy.

LUXEMBURG, a tn., belonging to Holland, cap. above grand duchy, seventy one of the fortresses of the German confederation, 115 m. W. S. W. Frankfurt-on-the-Main, and 117 m.

S. E. Brussels. Its natural position is so strong, and the different powers into whose hands it has successively fallen, have done so much to extend and improve its means of defence, that Carnot pronounced it to be the strongest place in Europe, after Gibraltar. It is divided into a low and a high town. The former lies along the banks of the Alzette; is surrounded with walls, and consists of two quarters, called the Grindel and Pâffendael. The latter stands 200 ft. higher, on a steep and steeped rock, and is approached from below, by flights of steps and along streets, cut out of the solid rock, so as to be passable for a carriage. The whole rock is surrounded by a strong wall, deep ditches, and a double row of formidable out-works. The most remarkable part of the fortifications, called Le Bon, consisting of a rocky promontory which commands the valley both above and below has been so deeply excavated as to contain casemates capable of receiving 4000 men. The high town, which thus properly forms the citadel is about 550 yards long, by 430 yards broad. The whole town is well built, and contains three good public squares, four churches, three chapels, and a synagogue, townhouse, old and new, the governor's house, town library the marshalls, partly used as a theatre the two old and ruinous monasteries of the Dominicans and Franciscans, and the old abbey cathedral, partly fitted up as barracks an atheneum, with 16 professors, a R. Catholic seminary for priests, a normal and several elementary schools. It has manufactures of wax, several distilleries and breweries; tanneries for chamois as well as ordinary leather, dye-works, &c.; and a trade in gold and silver wares, paper, iron, honey wine, vinegar, wool, china, hats, hosiery &c. Luxembourg is the see of a bishop, and during part of the year, the residences of the leading families of the duchy some of whom have elegant mansions in it. Its neighbourhood abounds with fine promenades. P 1148 exclusive of the garrison mustering about 5000 men.

LUXEUIL, or **Luxen** (anc. *Luxovium*) a tn in France, dep. Haute-Saône, 17 m. N. N. E. Vesoul. It is well built; has clean streets, a townhouse, old Benedictine cloister and parish church, much frequented thermal baths, manufactures of straw hats, cherry brandy, hams, leather, and rummergery, and near it, a paper and cotton mill, cotton factories, potteries, naileries, and important iron-works. Pop. 8402.

LUXOR a vil Upper Egypt. See THEBES.

LUXULIAN or **Luxulnean** par Eng. Cornwall 5304 ac. Pop. 1439.

LUZ (anc. *Elaso*) a tn and com. France, dep. Haute-Pyrénées, at the foot of a lofty mountain called the Pic de Buzès, 16 m. S. Tarbes. Its church, in the Romanesque style, enclosed within a castle furnished with battlements and loop-holed walls, was founded by the Templars, in the 11th century and is remarkably curious. In the valley of Luz there is a powerful petrifying spring. Pop. 3840.

LÜZA river Malgaseer N. W. coast, the bar at the mouth in lat. 14° 36' S., lon. 47° 45' E. The river, after forming an extensive lagoon 8 m. inland, discharges its water through a channel extremely narrow often more than 60 fathoms deep with lofty and precipitous hills on either side.

LÜZER, or, I suppose, a corruption of the Swintzen, bordering N. by com. Aargau, E. Aargau, Zug, and Schwyz, S. Bern and Unterwalden and V. Bern length, N to S, 30 m., breadth, in the S. 10 m. in the N. 22 m., in the centre 28 m., area 448 geo. sq. m. The surface is very much broken by ramifications of the Bernese Alps but runs rise above the line of perpetual snow. The Tomlihorn, the culminating point of Mount Pilatus, and of the canton, is 9766 ft. above the Lake of Luzern and 7116 ft. above sea-level. Small valleys are numerous, but the only one of much extent is the Entlebuch, which is about 80 m. long, and flanked by mountains clothed with forests or green pastures. The principal rivers are the Reuss, which, considered as a continuation of the Rhine, rises on the S. borders of the canton, and traverses it centrally in a N. E. direction, the Aar, Euren, and Wigger, with its numerous tributaries. All these rivers have a direction more or less N., and belong to the basin of the Aar, and through it to that of the Rhine. Luzern is well supplied with lakes. Within its own boundaries it has those of Sarnegg and Baldeg, with many more of smaller size with Eng it shares the Lake of Zug, and with Uri, Schwyz, and Glarus, the most important of all, the Lake of Luzern. The straits seem chiefly to belong to the secondary

Surroundings: the lowness and meagreness of which are largely developed. Plains and several other mountains are almost entirely composed of them. In the sands of several of the streams gold is found. Coal, to a limited extent, exists in several places. The soil, though generally inclining to sand, is fertile, and its cultivation is well understood. Cereals and fruit are raised in abundance, and a few sheltered spots are laid out in vineyards. Chestnuts, almonds, and figs, ripen on the banks of the Lake of Luxem. It may hence be inferred, that the climate, on the whole, is mild. In the higher lands, however, it is severe, and some of the loftiest summits are never free of snow before the end of May. The pastures are extensive and excellent. Manufacturers have not made much progress, but trade chiefly transit, is considerable. For greater part of the inhabitants profess the R. Catholic religion, which is established as that of the canton. The government is vested in the Great Council [Grosse Rath], consisting of 100 members—80 elected by the people and 20 by the 80. The executive is exercised by the Little Council [Kleine Rath] consisting of 15 members, elected by the Great Council for three years, under the presidency of an *Aoyver* or *Schultheiss*. For administrative purposes, the canton is divided into five bailiwicks, subdivided into 74 communes. As a member of the Swiss Confederation, Luxem ranks third, and is one of the three directing cantons or *corvets*. Its contingent of troops is 5717 of money \$1491. Pop. (1849) 138,729.

LUXEM is in Switzerland exp. above can., and one of the three seats of the Swiss diet, on an activity at the W. extremity of Lake Lucerne traversed by the Reuss, which here issues from the lake, and is crossed by four bridges of

LUXEM FROM THE CATHEDRAL SQUARE.—From Marston's sketches to illustrate A.

which three are covered, and curiously ornamented with pictures suspended from their roof. It is surrounded by walls of feudal watch-towers, and walled on the lake side. The town is well built, and the streets are regular, spacious, clean and well paved. It has a townhall, Jesuit college, now partly used for the lycæum, a Jesuit church, parish church, with two ancient towers. *Leprosy* convent, with handsome church, large town hospital, poorhouse, dunnery, arsenal, mint, casino &c., and, besides the college or lycæum, several well-conducted educational establishments. One of the most interesting monuments of Luxem is that erected to the Swiss guards who fell at Paris, in 1792, while defending the Tuilleries. The chief figure is a colossal man, the whole, designed by Thorwaldsen, was executed by a sculptor of Constantinople. Luxem has some transit trade, but the manufactures are unimportant. They consist chiefly of cabinet-work, and the preparation and spinning of raw-silk for hosiery, gloves, ribbons, and neckcloths. A good deal of cotton, hemp, and flax, is also spun, and made into goods, which find their chief market in Italy. The environs of Luxem are rich in beautiful walks and splendid views. Pop. (1860) 10,068.

LUXEM (Lake of) *WASSERSTADTSEE*, or *VEER-WAARDERZEE*, the largest, and, in many respects, the most magnificent lake near the centre of Switzerland, 1406 ft.

above sea level, surrounded by some Luzern, Schwyz, Uri, and Unterwalden, and hence called the Lake of the Four Cantons. It is very irregular in its shape, being divided into three reaches, which, separated by narrow straits, cannot be seen from each other, and have consequently the appearance of distinct lakes. The whole length of the lake, measured on a line drawn through its centre from its W. to its E. extremity, is about 25 m. its breadth, measured on its lower branch, from S. W. to N. E., is 9 m. but, on an average, does not exceed 8 m. Its depth varies much and gradually increases from W. to E. being near Luzern 600 ft. In parts of its centre, 400 ft. and towards the E. and S. E. from 600 to 800 ft. It presents every variety of lake scenery, but beautiful in the middle reach, it increases in boldness and grandeur in the upper reach where lofty mountains massed frown over the lake, and descend in sheer precipices to its very edge, it is singularly sublime. Owing to the violent storms which suddenly burst over the lake its navigation is extremely dangerous. Steamers ply regularly upon it.

LUXIA (BARRA) several places, Brazil particularly—1. A tn. prov. Sergipe, sometimes called *Santa Lucia do Rio Real*, on a height above the small river Guatarama, a tributary of the Real, 88 m S S W São Christoval. It is one of the oldest towns in the country, but at present is very insignificant. Mandioca, rice, millet, and haricots, are raised for home use, and cotton and tobacco for exportation. Pop. dist. 1890—5, A. tn. prov. Alagoas, formerly called *Alagoas do Norte*, on a lake, N W Mearim. It has a church, and exports sugar and tobacco. Pop. dist. 1800—5. A. tn., prov. Rio Grande, between the rivers Ponta Alta and São Bartholomeu. The inhabitants have some gold washings, raise great numbers of cattle, and make excellent cheese and large quantities of quince marmalade for exportation. Pop. dist. 8000.

—4. A vil. and par. prov. Minas-Geraes, 1 bank Guacahú or Velhas, 60 m N N W Ouro Preto; with a church and an hospital. Around it millet, sugar-cane, and haricots, are raised and cattle are reared. Pop. dist. 6000.

LUXIN *LUCHU* or *LOCHUW* a tn. Russia, gov. and 130 m N N W Vitepsk between two lakes, on the Louja. It has a church, synagogue Jewish school, and some trade. Pop. about 1700.

LUXON or *Lupos an Isl Indian* Archipelago, the largest of the Philippines. It lies between the Chinese Sea on the W., and the N. Pacific Ocean on the E. lat. 12° 30' to 18° 40' N. lon 119° 40' to 124° 10' E. Owing to the great irregularity of its shape it is scarcely possible to give an accurate idea of its length, but a line drawn through its centre N to S, and continued thence to its N.E. extremity is about 550 m., its greatest breadth is about 130 m., but where its N and S portions are united by a narrow isthmus, it diminishes to 10 m. area indicated, at 57,506 sq. m. It consists, as has been already indicated, of two portions, connected by an isthmus. That on the N., consisting at least four-fifths of the whole, is of an oblong shape, and tolerably compact, the only large bays which break the continuity of its outline being those of Langayan on the W., and Manila on the S.W. the S., or rather S.E. portion, is extremely irregular, being deeply indented by the bays of Zambo on the W., Bagay on the S.W., St. Michael on the N., and Lagway and Alibay on the E. Its surface is very much diversified, but its most prominent features are two mountain chains, which, under the names of Sierra Madre and Cordillera de Caraballo, stretch for about 120 m. over the N. portion of the island, N to S., in directions nearly parallel to each other; the middle of each, its centre, form a single chain, which proceeds in a S.E. direction, almost skirting the S. shore, and traversing the narrow isthmus, then turns E., spreads out over the S. portion of the island, and terminates magnificently towards the E. and S.E. coasts, in a series of lofty isolated heights. The Sierra Madre, which forms the W. chain, is not very elevated in the N.,

but, rising rapidly as it proceeds N., ultimately attains a height of at least 7000 ft. the Cordillera de Caraballo, or El Chuan, attains, in the N., a height of about 4000 ft., but has many summits which exceed 6000, and probably 7000 ft. Several of the loftiest heights are in the S. part of the island, where, situated near the coast, they form a very conspicuous object at sea. Almost all these mountains are of volcanic origin, and many disastrous eruptions from them are on record. Among the three which are still in activity, Taal, Albay and Batuan, the last, in the S. of the island, is one of the best known from serving as a kind of light-house to navigators. The largest river of the island is the Agappi or Cagayan, which, formed by two streams from the central mountains, flows almost due N., through the province of Cagayan and, passing Lallo, up to which it is navigable for considerable vessels, falls into the sea at Apurri, after a course of about 180 m. Another river, of less magnitude, but more navigable importance, is the Pasig which issues out of the Lake of Bay by seven branches, and is navigable by vessels of 400 to 500 tons. One of the branches communicates with Manila, and is constantly covered with canoes and other small vessels, proceeding to it with the products of the interior and E. parts of the island. The other principal rivers are the Abra, Agno, Pampanga, and Cebuano. By far the largest lake is that of Bay, which is above 100 m. in circuit, and contains the large island of Talm. Recovering the greater part of the drainage of the S. part of the N. division of the island by streams which are available for transport, it greatly facilitates the means of communication between the most important provinces. Next in magnitude, but not inferior in wild and romantic beauty is the Lake of Bontoc or Taal, rich smoking volcano in its center. There are various other lakes, some of them, however, deserving particular notice, except Cagayan in the N.E. and Cebuano towards the W. Owing to the general fertility of the soil, the abundance of moisture, and a tropical temperature, the vegetation of Luzon is almost unsurpassed in luxuriance. Even the loftiest heights are crowned with gigantic forests, while the plains and valleys are covered with the richest verdure, or occupied by the most abundant cultivated crops. Among these, the first place is due to rice, which is extensively grown both on the plains and on the hills, and yields most productive returns, not only furnishing the chief article of food to the inhabitants, but leaving a large surplus for export chiefly to China. Next in importance to rice is the sugar-cane, which is grown to a very large extent, and produces sugar of excellent quality particularly in the provinces of Pampanga, Bulacan, and Laguna. Other vegetable products of importance are the Abaco, a kind of banana, valuable for its fibres, which serve the purpose of hemp and are sometimes so fine in texture as to be mixed with silk and woven into cloth; various species of palm, cotton coffee, cinnamon, maize, and particularly tobacco, the cultivation of which, though somewhat obstructed by being made a Government monopoly, has long been extensive, and continues to increase. The animal kingdom contains none of the larger and fiercer animals, but abounds with those available for domestic purposes. Among others are the ox, originally imported from Spain and America, but now completely acclimatized, and scattered in immense herds over almost all the provinces; the buffalo, which not only runs wild in the forest, but has been completely domesticated, and is invaluable both for agricultural purposes and for transport; the goat, common in almost every quarter; the deer, and the wild sow. Among other animals whose utility is less apparent, are numerous varieties of the monkey tribe. The mineral kingdom furnishes in considerable abundance both gold and iron. The former is washed from almost all the streams and, though no gold mines have yet been worked, there cannot be a doubt that a careful search would discover them. The latter is particularly abundant in many provinces, and more especially in Bulacan, where it is seen in many parts piercing the surface, and might easily be worked to an almost unlimited extent. The other more important minerals are copper, iron, sulphur, marble, gypsum, agates, jaspers, and corallines. The manufactures of the island, though necessarily of limited extent, are not undeserving of notice. They include cotton and silk tissues, oranges, tobacco, leather, plain and varnished, embroidery, wood and ivory carvings, mats, and carriages remarkable both for their elegance and their easy movements. Great skill

is also displayed in building boats, canoes, and other large vessels. One of 600 tons, built by the natives, has made many voyages to Spain, and is considered the best ship belonging to the port of Manila. The principal articles of trade have already been incidentally mentioned. The inhabitants form a considerable variety of mixed races, among which the Negritos, many of whom still live in a savage state, and independent of Spanish authority, have the best title to be considered aborigines. The other principal races are Tagals or pure Indians, apparently of Malay origin, and mixed Indians formed by intermarriage with Chinese, Japanese, and Negritos. For administrative purposes, Luzon is divided into 19 provinces; its capital is Manila. Eight earthquakes have occurred since 1627; the most recent in July 1882. *See* MA. MALLA. Pop. 2,176,930 — Mallat, *Los Islas Philipinas*, Boletín Oficial de Filipinas October 1892.

LUZENA a vil. Hungary, co. Liptau about 4 m. from Kossuth; with a church, and a mineral spring. Pop. 1839. LUZY, a tn. France, dep. Khruv, on the Haine, 40 m. E.S.E. Never with a trade in wood, charcoal, swine, and game. Pop. 1394.

LUZZARA, a tn. Parma, r. bank Po 4 m. N.N.E. Gnasella, with two hospitals, several public schools, manufactures of woollens, and a trade in corn and cattle. In 1792, a battle was fought here between the French and Austrians; the latter commanded by Prince Eugene. Pop. 1000.

LUZZI a tn. and com. Naples, prov. Calabria-Citra dist. and 9 m. N. Cosimo, with seven churches, and an hospital. Pop. 2141.

LYARLE, a vil. Balocostina, prov. Las r. bank Porsally, 16 m. to 30 m. above its mouth lat. 35° 37' N., lon. 66° 27' E. with a very limited salt-factory.

LYSTER, a vil. Scotland on Galloway 18 m. S.W. Wick, near Amherst Bay with an Established and a Free church and a harbour capable of receiving vessels of 100 tons burthen. Pop. 460.

LYCHEN, a tn. Prussia, prov. Brandenburg, gov. Potsdam, 46 m. N.W. Berlin, with a church, hospital, woollen and linen manufactures, some fishing and a mill. P. 1938.

LYDBURY par. Eng. Salop, 1690 ac. Pop. 964.

LYDD a decayed market in Kent, par. England, on Kent. The town 3 m. S.W. New Romney has an elegant and spacious church an Independent chapel, and a national school. Area of par. 13,503 ac. 1 op. 1605.

LYDDEN par. Eng. Kent 1432 ac. Pop. 231.

LYDEAND two pars. Eng. Somerset —1, (Dusport), 4885 ac. P. 1866 —2, (St. Lawrence) 2687 ac. P. 711.

LYDFORD two pars. Eng. Somerset —1, (East), 708 ac. Pop. 214 —2, (West) 1900 ac. Pop. 886.

LYDHAM par. Eng. Salop 3068 ac. 1 op. 186.

LYDLINCH, par. Eng. Dorset, 2446 ac. Pop. 407.

LYDOKH (Locs) a small lake, Persulphur, co. Perth and Argyle, about 8 m. W. Loch Rannoch. It is 7 m. long.

LYGUMKLOSTER, a vil. Denmark, duchy and 46 m. N.N.W. Schleswig cap. bail on the Lokab. It owes its origin to a rich Christian monastery founded in the 12th century; the church of which, a handsome Gothic edifice, is now used as the parish church, while its other buildings are used as public offices. This monastery was secularized at the Reformation, and its lands now form almost the entire bail wick of Lygumkloster area, 46 geo. sq. m. Pop. vil. 1200; bad 2109.

LYK, a tn. E. Prussia, gov. and 62 m. S. Gumbinnen, cap. circle, near Lake Semnan. It has a church, castle, and gymnasium, and four general and two linen fairs. Pop. 2397. Area, 816 geo. sq. m. Pop. 84,068.

LYKAVA, a vil. Hungary. Hither Danube, co. Liptau, about 2 m. from Rosenberg. Near it are the ruins of an old castle, built by King Matthias Corvinus. Pop. 1928.

LYME-REGIS, a bur. & seaport, market, tn. and par. England, co. Dorset. The town between two rocky hills, 23 m. W. Dorchester on the borders of Devonshire, is intersected by the Lyme, which rises 3 m. to the N. A portion of it being built on a steep declivity, presents a striking appearance and the coast being bold and rugged, and the surrounding scenery of the most picturesque description, delightful and extensive views are obtained on all sides. The streets are well paved and lighted with gas, and the houses, in general, are neat and respectable. It has an Established church,

several Dissenting meeting-houses, and a R. Catholic chapel, charity, British, foreign, and national schools and a mechanics institute. The harbour or Cobb, which affords the only safe shelter for vessels between the Portland Roads and the Spit Point is about $\frac{1}{2}$ m. W.W. the town. Here are bonded stores, and a custom-house, but very little trade is done. Lynn Regis however has become of late years a fashionable watering place and baths, assembly-rooms, libraries, and other conveniences have been erected. The bor returns a member to Parliament. Registered electors (1851) 309. Area of par., 1490 ac. Pop. bor 2382.

LYMINGER, par Eng Kent 4504 ac. Pop 883

LYMINGTON a par bor support, market tn and par., England, co. Hants. The town 12 m. S.W. Southampton r bank Hants, which here falls into the Solent, is, in general, neatly built. Its mild climate, the excellence of its ocean mud-baths, and the beauty of the surrounding scenery attract during the sea-bathing season a crowd of fashionable visitors for whom banks, of a superior description a theatre and other favourite means of amusement have been provided. It has a handsome church, places of worship for Baptists, Independents, Unitarians & R. Catholics, a grammar and a national school a literary institution with a well selected library and several charitable institutions manufactures of marine and Espoon sails, and ship-building to some extent. The harbour is capable of admitting ships of 300 tons burden but the trade of the port, which at an early period was very considerable is now confined to coasting vessels. Lymington returns two members to Parliament. Registered electors (1851) 338. Area of par 2377 ac. Pop 4182 of bor 5282.

crossed by numerous bridges. It stretches about $\frac{1}{2}$ m. along the Ouse, to which the three principal streets are parallel, and is about $\frac{1}{2}$ m. broad. It was formerly defended by a fosse and by a wall with nine bastions one of the gates and a considerable portion of the wall, still remain. On the N. side is a battery, called St. Anne's fort, formerly mounting 12 pieces of ordnance. The streets are in general well paved, and are lighted with gas and the houses old and irregularly built, excepting those of recent erection, many of which are handsome. It has a custom house, a handsome, Grecian edifice a guildhall, two market-houses, gas-works, water-works, two churches and a chapel of ease, all handsome buildings, also churches in West Lynn and Gaywood, two rapidly increasing suburban parishes places of worship for various Dissenting bodies a R. Catholic chapel and a Friends' meeting-house, a grammar and charity school British foreign and national schools, a small literary institution museum, and some libraries several charitable and benevolent institutions among which are West Norfolk and Lynn hospital, a self-supporting dispensary a lying-in charity and a union workhouse. Lynn has long been a place of very considerable trade. Its harbour is extensive and can accommodate 300 sail but from the accumulating and shifting of the sands, the entrance is dangerous and the only nature of the soil and the rapidity of the tide, which runs 20 ft. under the sand and measure. Still having free communication with the N. Sea, and, besides an inland navigation, through the Great Ouse and its collateral streams with eight cuttings, it enjoys many commercial advantages. Its imports are wine and cork, tallow, hemp, grain, and coals and exports agricultural produce fine white and used in the making of glass and stumps which are caught on the shores of the Wash and sent to great quantities to the London market. Ship-building and repairing brewing malting tynne and soap making, and the manufacture of sailcloth and sucking are carried on to some extent. There are besides, three iron foundries several flour-mills, an oil mill, a saw-mill and a cork-cutting establishment. The borough returns two members to the House of Commons. Registered electors (1851) 1176. Pop (1851) 10,555.

LYON a river, (Haut Saône) on Perth which rises in a small lake of same name, on the W. borders of the county, flows N.E., and falls into the Tay at Tynmouth castle, after a course, chiefly E. of nearly 80 m. through Glenlyon.

LYONNAIS (Lyon) (Lain, *Adm. Lyonnais*) an ancient prov. France, which formed part of one of the Roman kingdoms of Gaul, was afterwards included in the second kingdom of Burgundy and, on being separated from it, became an independent county. It was united to the crown of France by Philip le Bel, in 1310, and now forms dep. Rhône and Loire.

LYONS a vil and township, U. States, New York. The village on the Erie canal 163 m. W. by Albany contains a court house jail five churches, a bank, and several mills, tanneries, and carriage factories. Pop. township 4202.

LYONS, par Iral Kildare 1635 ac. Pop. 308.

LYONS (France, Lyon, *Lyons, Lyonnais, Lyonnais*) the second city in France, on the Rhone, 24 m. S.E. of Paris, and 170 m. N. of the Mediterranean sea. (N. 40° 45' 45" N. 40° 45' 45" E.) Its site is one of the most magnificent which can well be imagined. Two great rivers—the Saône, coming from the N., and the Rhone from the E., unite, and form a tongue of land, which thus lies along the bank of the former and the bank of the latter river. On this tongue the greater part of the town is built. It is not, however, confined to it, but extends to the opposite banks of both rivers, the communication being maintained by numerous commodious and handsome bridges, generally of the modern construction. In particular on the bank of the Saône, the two steep hills of Fourvières and St. Julien, ascend in the form of an amphitheatre, and are partially occupied by streets. One of the steepest of these leads up to the summit of Fourvières, from which the best view of the city is obtained and the whole country for many miles around, is presented to the eye as one grand panorama, embracing distant views of the Alps on the E. and the Cevennes on the S. In the town itself, though there is much to interest and amuse, there is more to disgust and even disgust. From the nature of the ground, consisting partly of hills and partly of a low alluvial flat, the streets could scarcely have been regularly formed, but the natural disadvantages have been

LYNN two pars. Eng. Norfolk—1, (North St. Edmund) 1295 ac. P 77—2 (West St. Peter) 1819 ac. Pop. 1098.

LYNN 1820-18 or KING'S-LYNN, a par. bor., seaport, and market tn. England, co. Norfolk, a bank Great Ouse, near the mouth in the Wash 36 m. W. W. Norwich, and a station on the E. Anglian railway. It is situated on the E. side of Marshland, and of the Great Level or Fen Country, and is intersected by three rivulets, locally called Fines, which are

greatly increased by their narrowness, and the tall ungainly buildings by which they are lined. These, crowded together into the smallest possible space, exclude both sun and air, and in some measure account for, though they by no means excuse, the filthy and pestilential state in which they are per-

interest are more remarkable for their antiquity than for the beauty of their architecture. The cathedral, on the slope of the Fourvières, on the E bank of the Saône, is in the Gothic style of the time of Louis XI and has four towers, two of which flank the W front, while the other two, shorter, but more massive, form the transepts.

Higher up the slope is the church of Notre Dame, an ancient edifice, occupying the site of the *Forum Vésce*, built by Trajan. Basilica it is a lower or *Belvédère*, 880 ft. above the Saône. On the other side of the Fourvières is the church of St. Irenæus, the second bishop of Lyons and companion of Polycarp, who had conversed with the apostles. The church itself is an uninteresting modern structure, but it stands on the grave of the martyred bishop, and has beneath it a crypt, in which Polycarp, at the age of 86, is said to have preached and thou sands of Christians, at a later period to have been massacred by orders of the Roman Emperor Septimius Severus, A.D. 202. A little above the cathedral is the Palais de Justice, and lower down, on the opposite bank of the Saône, is the church of the Abbey of Ainay beneath whose sacristy, and penetrating below the bed of the river are gloomy dungeons without light or air in which many of the early Christians were immured previous to martyrdom. Other noteworthy churches are the church of St. Nizier of the 14th century one of the largest in the town, that

mitted to remain. To this remark there are, of course, exceptions, particularly in those quarters where affluence and luxury have fixed their seat, but as a general fact it cannot be denied that Lyons is one of the dirtiest abodes in Christendom. The best parts are the magnificent quays, with their finely planted walks, stately mansions, and capacious warehouses. Some of the squares, also are good. Among them may be mentioned the Place des Terreaux facing which stands the Hotel de Ville and in which De Thou and Cinq Mars were

of St. Bonaventure the parish saint of Lyons, the church of the Chartreux surmounted by a superb dome, which from all quarters of the city, is seen rising conspicuously above the other buildings the Église de l'Observance, Église des Antiquailles, Église St. Just, and Église St. Louis. The archiepiscopal palace, situated near the cathedral, is a large edifice of no architectural merit. In this palace a great number of Protestants were butchered in 1572 as a reward to St. Bartholomew.

In the Place des Terreaux stands the Hotel de la Ville, considered one of the finest edifices of the kind in France, though so very irregular in its style, that it cannot be said to belong to any particular order of architecture. It is an isolated square the façade of which is in the Place while two of its sides form each the commencement of a handsome street, and is surmounted by a dome of 164 ft. high. The library (Bibliothèque Publique) occupying part of the buildings of the college, on the Quai de Retz is the best provincial collection in France. It contains 14,400 volumes, and has, besides a rich collection of engravings and MSS. The Palais des Arts or Museum, facing the Place des Terreaux, occupies the ancient convent of St. Pierre, which dates from the earliest Christian times, and is a fine majestic edifice, worn in the style of a palace than a monastery. It contains a picture-gallery, a cabinet of medals, a gallery for statues and another fine museum, a depot of mechanical inventions for the fabrication of silks, with a library attached; a free school of

LYONS, THE CATHEDRAL AND BRIDGE OF SAINT-ÉTIENNE. — From Higher View in the North of France

beheaded and the Place Bellecour the latter not surpassed in beauty and extent by many in Europe. The public edifices of Lyons are not so numerous as its extent might lead us to anticipate, and not a few of those which excite the deepest

design, and a large hall, used as the Exchange. The chief educational establishments are the Royal College, founded in 1519, situated on the Quai de Rhône, and, notwithstanding the many changes, both of name and nature, which it has under-

gone, still an important establishment, with a full complement of professors, and a numerous attendance of students, the Institution in Marcelline, affording a substantial gratuitous education to 230 sons of artisans, and a veterinary school, one of the completest and best arranged establishments of the kind: connected with educational institutions, may be mentioned the *Revue des Sciences* (Jardin des Plantes), near La Croix Rousse, which is the principal seat of manufacturing industry. Other notable establishments are numerous, and on a large scale. The most important are the Hôtel Dieu, the Maison de la Charité, a very extensive almshouse or poorhouse, the Mont de Piété, occupying the Manufacture or demerit attached to the cathedral and the Hospice de l'Antiquaille, on the site of the ancient Roman palace or praetorium, where the celebrated Germanicus, and the emperors Claudius and Caligula were born, and now used partly as a lunatic and partly as a Magdalen asylum, and general penitentiary. There are several prisons—the New Prison an extensive building, well arranged; the Maison des Religieuses, now employed as a military prison; and the prison of *Rennes*, regarded as a model in its kind. Lyons, as the chief place of the 19th military division, has extensive barracks, in which a great number of troops are always kept, and is surrounded by a line of detached forts, which crown its different heights, ostensibly for the purpose of defence, but more probably as a means of repressing the turbulent spirit for which great masses of the population have long been notorious.

As a manufacturing town Lyons early acquired, and has long maintained, a first place. For the silk manufacture it is the most important town in the world: thus forms its great staple, and employs, directly and indirectly about 80,000 persons. The only other manufactures deserving of notice are hats, books, jewellery and liquor, besides dye-works, foun- dries, glass-houses, potteries, tanneries, breweries, and chem- ical works. Lyons is admirably situated for trade, on two navigable rivers, which make it a great entrepot both for the N and the S. It forms the common centre where the roads from Paris, Marseilles, Bordeaux, and Geneva, from Switzer- land, Italy and Aveyron, all meet. It communicates with the Rhone by the Rhone and Rhine Canal while several other canals, branching off from its rivers, give it ample means of transport over a great part of the interior of the kingdom. More recently railways have been constructed which pass through it, and proceed, without interruption, from Paris to Avignon. The chief exports are raw silk, wine, brandy, oil, soap, flax, hemp, rice, cotton, wool, coffee, dyes, earthen- ware, and timber and the export, spun-silk and silk goods, ribbons, hats, straw bonnets, woollens, furs, linens, corn, flour, cloths, liquors, paper, hemp, ironware, &c.

The origin of Lyons cannot be traced. When Caesar invaded Gaul it had become a place of some importance, and it ever after figures more or less in the subsequent history of the Roman empire. Several emperors, in succession, making it their occasional residence, and tying with each other in adorn- ing it. It early received Christianity and towards the end of the second century numbered thousands of Christians among its inhabitants. Its first bishop, Pothinus, died a martyr in 167, and his successor the celebrated Irenaeus, whose work against heresies is one of the most interesting literary remains of Christian antiquity died also a martyr in 302, and with him no fewer than 16,000 Christian converts. Lyons was afterwards sacked by the Huns and Visigoths, who levelled many of its noblest Roman structures with the

ground. In the eighth century, it fell for a time into the hands of an army of Saracens from Spain, and suffered dread- fully; but recovered its prosperity under Charlemagne, on the dissolution of whose empire it became the capital of the kingdom of Provence. Subsequently, it fell under ecclesiasti- cal domination, and was long governed, or rather misgov- erned, by a succession of tyrannical and factious archbishops, who bore its name. Louis IX. who had been chosen arch- bishop to settle some serious quarrels which had arisen among the inhabitants and their ecclesiastical superiors, managed to give a decision in his own favour, and Lyons was annexed to the crown of France. Its prosperity was much more pro- moted by temporal, than it had been by spiritual rule. It owes its new quays, and several of its finest edifices to Louis XIV. The revolution of 1798 brought fearful reverses along with it. The inhabitants, finding their industry paralysed, and their trade destroyed, had no difficulty in tracing these results to revolutionary violence, and reconstituted accord- ingly. The Convention let loose its forces upon them, and wholesale butcheries, of the most revolting description, con- tinued for many days to deluge the town with blood. Since that period, questions of an economical or rather socialist nature, have been keenly agitated, especially among the work- ing-classes and the bitter fruits have already been more than once reaped, in the form of most alarming revolts. Numerous persons, whose names make an important figure in history were natives of Lyons. Among them may be mentioned the Roman emperors, Marcus Aurelius, Claudius and Caracalla the celebrated general, Germanicus, nephew of Theodoric St. Ambrose, St. Irenaeus, and Pope Clement IV. Pop. (1822) 156,169.

MAAS, or *MAUSE*, a river Netherlands. See *MAUSE*.

MAAS (THE NEW) [Dutch, *De Nieuwe Maas*], a river, Holland, a name given to the arm of the Merwede, prov. S. Holland, which unites with the lake at Krumpen, flows W past Rotterdam, Delfhaven, Schiedam, and Vlaardingen, is divided into two branches by the island of Rozenburg re-unites below Brielle, and falls into the N sea.—MAAS (THE OLD), [Dutch, *De Oude Maas*], the name given to the L arm of the Merwede, prov. S. Holland. Part of its waters are drawn off through the Dordrecht sluice to Holland-diep. It flows past Old Bazelard, sends off a further portion of its waters through the Spuis to the Harlingen, and unites with the New Maas near Goerliet.

MAASLAND.—1 A former department, Holland, which included the present prov. of S. Holland, and a small portion of N Brabant.—2, A vil. Holland, prov. S. Holland, 7 m. W by N Rotterdam. It is a pleasant-looking place, and has a Protestant church, to which is attached a beautiful monastery, a R. Catholic church, and two schools. Saw bark, and walk mules, some salmon-fishing and duck shooting, and a limited trade in cheese and grain. Pop. 1738.

MAASSLUIS, or *MAASSLANDER*, a fishing vil. Holland, prov. S. Holland, 10 m. W Rotterdam, on the bar Maas. It has next town and communal houses, two Protestant churches, a R. Catholic church and a synagogue, an orphan hospital and four schools. The herring and eel fishing are the chief employments, though not now carried on to the extent they were formerly. Still the excellent harbour is annually frequented by above 400 vessels. There are also three building yards, two sail-makers, a tannery, rope-walk brewery and herring-curing establishment. Pop. 4096.

MAASTRICHT, a city, Netherlands. See *MAASTRICHT*.

MADE, par Eng Cornwall 3569 as. Pop. 616.

MALETHORPE (ST MARY AND ST ILETH) united par Eng Lincoln 3803 as. Pop. 430.

MABOOM, a tn W Africa country of the Timmanees, lat. 8° 32' N lon 11 52' W on the route from Bokale to Palaba. It consists of an old and new town at the distance of about 2 m from each other the former inhabited by Timmanees, and the latter by a few families of Mandingoes. The country around is thickly wooded but the farms are well cleared and the pastures rich and amply stocked with cattle, sheep, and goats.

MAHYN (St.), par Eng Cornwall 4067 as. Pop. 773. MACAJO, a river Brazil, prov. Rio-de-Janeiro which rises in the serras das Aguas-Compidas, at the N extremity of serras dos Orgaos, and flows W S W to the Bay of Niteroi a part of the Bay of Rio-de-Janeiro. It receives several affluents and, in the lower part of its course, has a channel 2 m. wide, but, owing to a bar across it, cannot be entered by vessels of any size, excepting at flood-tide.

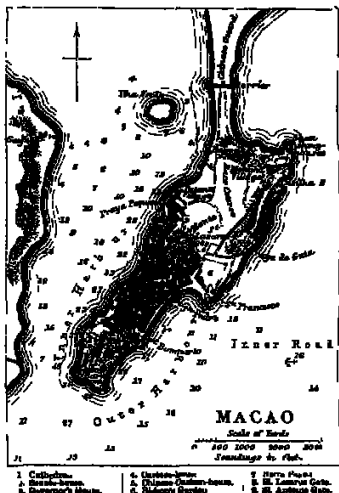

MACAEL, a tn. Spain Andalusia, prov. and 36 m. N E Almeria. It is very poorly built, has a large parish church, a primary school, and some mines of iron, and quarries of beautiful white marble. Pop. 1154.

MACAIE, a tn and seaport, Brazil, prov. and 100 m. E N E Rio-de-Janeiro on a river of the same name, where it falls into the Atlantic. It is a dull-looking place, with ill-furnished and unpaved streets, lined with mud houses, which, for the most part, have thatched roofs. The harbour, however, is excellent, and is defended by a fort. Drigs can come close up to the town, and vessels of larger size find secure and commodious anchorage below the bar between the mainland and the island of Santa Anna. The trade, chiefly in coffee, sugar, dye-wood, deals, and timber is extensive.

MACAO, a tn. and par Portugal, prov. Beira-Baixa, com. and 23 m. E S E Thomar. It has manufactures of coarse woollen stuffs. Pop. 3180.

MACAO [pronounced, *Mazao*], a seaport to the Portuguese settlement, China, prov. Quing-tong, irregularly built on a high peninsula that terminates the island of Macao to the S. and joined to it by a narrow isthmus N from the town, lat. 22° 10' 30" N lon 113 30" E. It occupies a slope gradually descending to the sea, backed by a range of lofty hills, and having an extensive campo or plain stretching E. It is nearly surrounded with water, and is open to the sea-breezes on every side. The houses occupied by the foreign population are large, roomy and open, and the shops are numerous. There are several R. Catholic churches, a semina-

house, in the middle of the town, and both a Portuguese and a Chinese custom-house, several schools, and a female orphan asylum. The quay or 'Praça Grande' is commodious, forms a pleasant drive, and is protected by a battery, several others

the mouth of the Karonto. It is built at the foot of a chain of hills, behind which rises the lofty summit of Mount Bihore. It has a parish church, and used to carry on a considerable trade with the Turks, but, in 1815 and 1816, the plague having estranged the half of the inhabitants, the trade almost ceased and has never recovered. The inhabitants are chiefly employed in agriculture and fishing. Pop. 1800.

MACARTHUR, three rivers, Australia, one of which flows into the Gulf of Carpentaria, N coast, opposite Sir Edward Pellew's Islands, about lat. 13° 40' S. The second is in Griggs Land, Victoria, S. Australia. It has its sources in the Australian Alps, and joins the Parry previously to the latter falling into Lake Victoria. The third, in Co. Gloucester New S. Wales, is an affluent of the Gloucester river.

MACARTHUR'S ISLES, a group of four low, bushy islets, off N E coast Australia, about lat. 11° 40' S, lon. 148° E. They are encircled by a reef more than 3 m. long and, on the S E, separated from Bird Isles by a channel about 4 m. wide.

MACASSAR, **MACASSAR**, or **MACASSAR**, a town, Indian Archipelago, near the S.W. end of the S.W. peninsula of Celebes, cap. of the Dutch prov. of same name, defended by Fort Rotterdam. Macassar the capital of the native state of same name, was destroyed by the Dutch in 1660 and the present town called by the Dutch Flarindingen was built on its site. It lies near the mouth of a river lat. 5° 8' S., lon. 119° 26' E. and is a regularly built, pleasant place, the streets are broad, planted with trees, and cross each other at right angles, and the whole place has much of a Dutch aspect.

A STREET IN THE MALAY QUARTER, MACASSAR.
From Dumont D'Urville, Voyage au Pôle sud.

It is surrounded with walls, outside of which are the three suburbs of the Dutch village, the Malay village, and the Bakhos or New village. Macassar is reckoned a healthy place, the climate being almost as free from rain as that of Lima. It was made a free port in December 1846, and carries on a considerable trade, both coasting and with China. Pop. (1848) 20,000. The Dutch province or district, conterminous with the adjoining islands, a population of 150,000.

—The **GOVERNMENT** of Macassar includes all the Dutch possessions in the island of Celebes, and a population of 310,000.

MACASSAR, **GOA**, or **GOACH**, a native state, isl. Celebes, S.W. peninsula, bounded N by the Dutch province of Macassar, E the State of Southala, S Torontea, and W the Java Sea. It is in a badly degraded condition. Its climate is healthy and its soil fertile, cattle, horses, and rice are the chief products, still not in sufficient quantity to meet the home consumption. Salt is obtained from natural salt-panns, and the taking of trepang and turtle is carried on. Macassar was at one time a powerful kingdom, having dominion over the greater part of Celebes, and also over numerous neighbouring islands. The Portuguese landed on it in 1612, and, in 1666, the Dutch compelled the sultan to themselves of the district they now possess. The kingdom suffered greatly

from the repeated attempts of the natives to expel the Dutch, whose power was only thus more firmly fixed. Pop. about 70,000.

MACASSAR (STRAIT OF) the passage between the isls. of Borneo and Celebes; lat. 5° 20' S. to 1° N. varying in breadth from about 200 to 70 m. It contains the Islands of Pulo Laut, Bala-bala, or Little Paternosters, Panarong, and numerous islets and rocks.

MACAURA a town in Brazil prov. and 870 m W.S.W. Bahia, 10 m. from the source of the São Francisco, with a church and a primary school.

MACAYO or **MACERO** a town and seaport, Brazil, cap. prov. Alagoas, 130 m S.S.W. Pernambuco with three churches, a Latin and primary school, and a harbour, admitting coasting vessels only with anchorages for larger vessels below the bar. The inhabitants are chiefly employed in cultivating cotton, sugar-cane, and provisions, in boat building, distilling and trading in rum. Pop. of dist., 6000.

MACLAI a town in E. coast Africa, on the Mozambique, which supplies itself into the sea about 20 m N. Sofala, about lat. 19° 15' S. The woods in the vicinity abound with elephants, and the river with crocodiles.

MACARTHUR'S ISLAND See GAMBIA.

MACCHERIO or **MACHERIO** a village, com. Italy Lombardy prov. Milan, dist. Monza, near the Lambro, with a church. Pop. 1000.

MACCHIAVALFORTORE, a town in Naples, prov. Salerno, dist. and about 18 m. E. Campobasso, with four churches and an hospital. Pop. 2000.

MACCHESFIELD a market town and parish in England, Cheshire, 18 m. S. by E. Manchester on the North-Western and North Staffordshire Railways, a canal cutting those of the Grand Trunk and the Peak Forest and on both sides of the Bolton which is here crossed by a wooden and two stone bridges. It is pleasantly situated near the S. extremity of the forest of same name, and consists of four principal streets which meet in the market place, and are clean well paved and lighted with gas. In consequence of an act obtained in 1814, numerous improvements have been made, including, among others the introduction of an ample supply of good water. Among the principal buildings are the church of St. Michael, an ancient structure, founded by Eleanor Queen of Edward I. in 1174, and recently modernized by extensive repairs and embellishments. St. Peter's, in the early English style and St. Paul's, with a tower and spire, 141 ft. high, and a fine organ. Four other churches belonging to the Establishment, places of worship for the Independents Wesleyan Primitive New Connection and Association Methodists Friends, Baptists, Quakers, R. Catholics and Moravians a handsome and spacious guildhall recently erected, in the Grecian style, and containing court assembly and concert rooms, a subscription library of 80,000 volumes, a theatre, large almshouse &c. The principal educational establishment is the free grammar-school to which a commercial school has recently been added, and there are also national and other schools, a school of design, a museum, a mechanics institute and various charitable endowments. The staple manufacture is silk, in all its various branches, including about 70 mills employed in throwing silk and numerous establishments in cloth, broad silks, handkerchiefs, and similar goods of fine quality. The cotton manufacture has also made considerable progress, and there are several large dye-houses, foundries, and breweries. Another article made to a large extent is button. In the vicinity are extensive coal-works, and stone and slate quarries. Besides two weekly markets, there are five annual fairs. Macchiesfield returns two members to Parliament. Pop. (1851) 39,048.

MACDUFF a burgh of haveny and seaport in Scotland, 60 and 1 m. E. Banff, within the parish, but of which it is included, at the mouth of the Deveron, in the Moray Firth. The river separates the town from Banff, and is crossed here by a bridge, has a small jail, townhall, Established and Free church, a school, library, mill and a bathing establishment; manufactures of ropes, sails, and twine, and fish-curing. It exports cattle, grain, and fish, and imports lime, coal, timber, and horses for manure. Pop. 2537.

MACEDONIA, an ancient territory, Europe, bounded N by the chain of the Balkan, W that of Pindus, S Mount Olympus and Olympus and the Archipelago, and E. Kav-Bu or

MAKKA. It is now included in the Turkish prov. Karaman, and forms the south of Ukiye. Shingandil, Mossor Salentia, and part of Dask of Galipoli.

MACERATA, a vil. and com. Italy, Piedmont, div. Turin, prov. and about 3 m. from Minero, l. bank Chisone, an old castle, and charitable endowment; and trade in corn, cattle, dairy produce, and silk. Pop. 1900

MACERATA, a. to. Italy, exp. delegation of same name, 31 m. S. Ancona, on a lofty eminence above the Tevere, midway between the Apennines and the sea. It is walled, has six gates, one of which, Porta Tia, is in the form of a triumphal arch, streets, in general, straight, spacious, and close, and lined with handsome houses and several palaces. The square, in the centre of the town though irregular in shape, is of great extent, and contains the cathedral, the provincial palace and theatre. There are also six other churches, and 13 convents—five for females. Macerata is the see of a bishop, and has a court of first resort, and an appeal court for delegations Macerata, Urbino-Pesaro, Ancona, Ascoli, Camerino, and Fermo. The university was suppressed, but has been replaced by one of a secondary description, in which theology, philosophy and medicine are taught. There are also a museum, a library, and two literary societies. Immediately outside the gate is a stately palace, erected for the national game of pallone, and said to be the largest in existence; and, about 1 m. beyond, is the church of Madonna della Virginia, regarded as one of Ancona's best designs. Pop. 16,000.—The *DELL'ARTORI* founded N. by degli Ancona, W. Urbino d. Pesaro and Perugia, S.W. Camerino, S.E. Fermo, and E. the Adriatic; greatest length, E. to W., about 64 m., greatest breadth, 30 m., area, 53 sq. m. Its climate is temperate and healthy; mountains, well wooded, lower slopes covered with a fertile soil, well cultivated, and producing, in abundance, corn, fruit, and hemp. Many cattle also are reared, and there is a considerable export of wool, honey, and wax. It is divided into five districts—Macerata, the capital, Fabriano, Recanati, Loreto, and San-Severino. Pop. 220,180

MACERATA FELTRINA or **MACERATA DI MONTE FELTRO** a. to. Italy, The Marches, 11 m. N.W. Urbino. It is the see of a bishop, and has numerous fairs.

MACETOWN, a vil. and com. Ireland. Pop. 1991. See Pop. 998

MACGILLICUDDY ROCKS, a picturesque mountain-range, Ireland, co. Kerry extending for 1½ m. from the lakes of Killarney on the E. to Lough Carra on the W. It is the loftiest mountain-range in Ireland Carnatna, the highest peak, rises 2404 ft. above sea-level

MACHAIR, two par. Scot. par. Aberdeen.—1 (New) 8890 ac. Pop. 1998.—2 (Old) 8 m. by 4 m. Pop. 31,767

MACHECOUL [Latin *Machecoul*] a. to. France, dep. Loire-Inferieure, 30 m. S.W. Nantes, on the Falvion, at a short distance from the extensive forest of its name. It was originally the capital of the duchy of Maine, possessed a strong castle, and was otherwise well fortified, and defended by a Citadel. Both castle and Citadel were demolished by Louis XIV. The present town is miserably built, streets, though tolerably wide, irregularly laid-out, ill paved, and rendered at once disgusting, and almost impassable, by the accumulations of garbage. It has a trade in horses and cattle, for which several fairs are held. Pop. 1763

MACHELLEN, a vil. and com. Belgium, prov. E. Flandres, 15 m. S.W. Ghent with a distillery, two saw-mills, and some fax and woollen manufactures. Pop. 3672

MACHEN, par. Eng. Monmouth, 5168 ac. P. 3210

MACHIAKA, an isl. Brazil, in the mouth of the Amazon, on the equator, about 30 m. long, by 7 m. broad.

MACHIAN, a. to. U. States, Maine, 161 m. E. by N. Augusta, on river of same name. It has a courthouse jail, and numerous mills. Vessels of 250 tons ascend the river all down to the town. Pop. 1361

MACHNOWKA, a. to. Russia. See **MACHNOWKA**.

MACHYNELLECH, a contributory park, hon. to, and par. N. Wales, co. and 23 m. E. N. Montgomery, about 2 m. from l. bank Derry. It is beautifully and judiciously situated, singularity and well built, has a townhall or market-house, a handsome church, independent, Calvinistic, and Wesleyan Methodist chapels; an endowed free school, and a day and national schools; a set of almshouses, some charities, a Vol. II.

book society, and news-room. Some manufacture of flannels is carried on. The Derry is navigable to within 2 m. of the town, and affords a means of carrying on some export and import trade the former consisting of bark, oak timber, iron-ore, &c.; the latter rye, wheat, coal, oil, limestone, kites, and groceries. Machynlleth is supposed to have been a Roman station. Pop. bor. 1865. Area of par., 1486 ac. P. 1460

MACKENZIE ISLANDS, a cluster of small isls., N. Pacific Ocean, belonging to the Carolins group, lat. 10° N. lon. 140° E.

MACKENZIE RIVER—1 A large river British America, N.W. territory. Rising in the W. extremity of Great Slave Lake, it flows first W., then N., and finally N.W., and after a course of about 750 m., falls into the Arctic Ocean by numerous mouths, the most W. of which is lat. 68° 50' N. lon. 106° 57' W. Its principal affluents are the Mountain, the Peel and that by which it receives the waters of Great Bear Lake. It has a number of forts along its banks. It was discovered and navigated by Alexander Mackenzie, in 1793.—2, A river, E. Australia, lat. 28° 38' S., lon. 149° E.; flows N.E., through a deep and narrow valley. Near its mouth fine coal has been found.

MACKINAC, a vil. L. State, Michigan, on an isl. of same name, 265 m. N.W. Detroit. It is defended by a fort, carries on a brisk trade in furs, has a safe and commodious harbour, and annually exports immense quantities of fish.

MACKWORTH, par. Eng. Derby, 3460 ac. P. 510

MACLEAY, a river, New S. Wales, flowing S.E., separating co. Macquarie and Dudley, and falling into the Pacific Ocean, 65 m. N. Port Macquarie. It gives its name to the Shire district now formed into the co. of Dudley, Scotland, Rathelgh and Gravelly.

MACLEOD, a lake and fort, British N. America, W. territory lat. 55° N. lon. 122° 15' W. It is about 75 m. in circumference, and abounds in fish.

MACLEOD, 19th par. Irish Cork 3808 ac. P. 1192

MAGNAEN LOUGH, a lake, Ireland, co. Fermanagh and Leitrim, 11 m. W. by S. Enniskillen, greatest length 4½ m. average breadth, 1 m. It contains several small islands

MAGNEILL'S HARBOUR, an inlet, Vancouver's isl. on the coast of which are straits of which, have been partially worked, lat. 50° 33' N. lon. 127° 17' W.

MAGMOLAR, a vil. Isl. Sardinia, div. Sassari, prov. Alghero, E. N. E. Cagliari. It has four churches the remains of an old castle, a primary school, manufactures of woollen and linen cloth, and bed-covers, and a trade in cattle and cheese. Pop. 1050

MACON, a city, U. States, Georgia, 80 m. W. S. W. Milledgeville, chiefly on r. bank Ocmulgee here crossed by a bridge 889 ft. long. It has a courthouse, jail, an elegant market-house, five churches, a college, three academies, two schools, and three printing-offices. A great deal of cotton is shipped here. Steam boats ply on the river. Pop. 9277

MACON [Latin *Macon*], a. to. France, dep. Saône-et-Loire, in a fertile dist. r. bank Saône, 38 m. S. Chalon. It is irregularly built, with narrow ill-frequented streets, but has several handsome modern buildings. The ramparts have been levelled, and converted into agreeable walks. The quay is broad, high, and of great length, and is lined by several good houses and cafés. A bridge of 12 arches, sometimes attributed to Caesar, but not earlier in date than 997, connects the town with that of St. Laurent, on the opposite bank, in dep. Ain. The principal edifices are the infirmary, Maison des Charités, Hospice de la Providence, Hôtel de Ville, containing a small theatre and public library and Hôtel de la Préfecture, formerly the bishop's palace. The manufactures are woollen covers, cloaks, agricultural and other implements, masks, earthenware, &c. There is also a fine copper foundry. The trade is in wine (Burgundy) corn, flour, hops, ship timber, cattle, &c. Macon possesses courts of first resort and commerce, an agricultural and scientific society, a royal college, and primary normal school. Pop. 1862, 12,665

MAGNANAIS (Lz) [Latin *Magnanensis*], a co. and small dist. France, which depended on prov. Burgundy, and now forms arrond. Macon, in dep. Saône-et-Loire.

MACOSQUIN, par. Irish Derry, 17,728 ac. P. 5025

MAÇOT, a vil. and com. France, dep. Savoie, prov. Tarentaise, l. bank Isère, S. N. E. Montiers; with a modern

church, a courthouse, and a charitable endowment. Mines of argentine-lead are worked in the vicinity. Pop. 1347.

MACOTERA a tn. Spain, Leon prov. and 24 m. from Salamanca; with a church, townhouse, prison, and primary school; manufacture of coarse woollens, and a trade in corn and wine. Pop. 1960.

MACQUARIE—A. An export to New S. Wales, cap. of same name, at the mouth of the Hastings 196 m. N. E. bydney lat. 81° 25' S., lon. 152° 57' E. (n). It stands on a gentle ascent, and is well built, houses generally of brick streets broad, straight, coated with dark red gravel and levelled like garden walks. A tall square church-tower is conspicuously prominent on the highest part of the town. A group of magnificent trees surround Fort Macquarie, and extends along the banks of the river. No vessel drawing more than 9 ft. water is able to enter the harbour with safety but there is good anchorage outside.

MACQUARIE—The country, between lat. 31° and 33° S. and lon. 152° and 153° E. is of a triangular form, about 96 m. in length S. W. to E. and 40 m. in width at the base, diminishing to less than 10 m. towards the apex area, 2800 sq. m. It is lightly covered with good timber and free from mountains has several pretty high mountains and in some parts, extensive plains covered with beautiful verdure, many large flats covered with high grass.—2. A large river, New S. Wales, formed by the Fish and Campbell rivers, at the N. E. extremity of Bathurst co., from which it flows with a singularly tortuous course, in a N. W. direction, passing through the co. Wellington and it ultimately lost in the Macquarie marshes, about lat. 30° 50' S. its entire course being about 230 m. exclusive of minute streamlets. In some places, it is broad and deep in others, much obstructed by falls.—3. A lake or arm of the sea, New S. Wales co. Northumberland communicating with the ocean by a narrow mill. It is of a very irregular form having several long narrow bays extending into the land on all sides its entire length may be about 18 m.—4. An uninhabited lat. S. Pacific Ocean lat. (° point) 54 19 S. lon. 156 56 E. (n). It is high (highest peak 1200 to 1500 ft. above sea level) and much broken apparently covered with verdure although a long tufted rank grass is the only plant to be met with near its shores. It is almost entirely covered with sea-beds. At a distance of 2½ m. from the shore, no bottom was found with a line of 500 fathoms.—5. A port, N. hills lat. lat. 168 10° S. W. coast, Forerunner Point lat. 46 20° S. lon. 168 10° S. (n)—6. A harbour Van Diemen's Land, W. coast lat. 42° 11' 30" S. lon. 145 10° E. it extends inland, in a S. E. direction, for about 30 m., diverging at its head right and left into two extensive coves or creeks, termed Birch's Inlet and Kelly's Basin. The entrance, which is very narrow is formed by a moderately high bluff named Cape Corvallis, lat. 42 10' 45" S. lon. 145 16 30" E. on the S. shore, and on the N. by a long sandy beach. Nearly midway in the mouth of the harbour, there is a small island or reef of rocks. The S. entrance, which is the best, is over a bar that extends for ½ m. outside the narrow part of the entrance, and has only 9 ft. water on which the tide flows with great rapidity. Inside the depth is from 8 to 12 fathoms but there are extensive sandy shoals for more than 4 m. among which are narrow channels, shallowing in some places, from 15 to 7 ft. at low water. Farther inland the water deepens to 10 to 20 and 2½ fathoms for several miles.—7. A river Van Diemen's Land, which rises in the N. E. part of Campbell's district about lat. 42 10' S. flows W. and N. W., receives Lake river a few miles below Perth, and then flows onward to the b. Esk. In the singular frequency and eccentricity of its windings, it precisely resembles its namesake in New S. Wales, total course, about 55 m., passing through a remarkably fertile tract of country. Principal tributaries, besides the Lake river the Blackman, Elizabeth, and Lias.

MACRI a tn and gulf, Asiatic Turkey. See MAKR.

MACRINTZA a tn European Turkey Thessaly about

45 m. E. Trikala with dye-works, for dyeing thread, in which there is an considerable trade. Pop. 2000.

MACRONE a tn, Ireland, Cork. Pop. 821. See. Pop. 8001.

MACRONSIS (see MACRIS or HELIOS) an ad. Grecian

Archipelago off S. E. extremity of Livadia, from which it is

about 5 to 6 distant greatest length, N. to S., 8 m. average

breadth, little more than 2 m. It remains entirely in a state

of nature, and has no appearance of having ever been inhabited.

MACROOM or **MACRUMP** a market tn. and par. Ireland, co. Cork. The town, 21 m. W. Cork on the Ballinacree, in an open vale, is approached, on all sides, through a line of osiers, and has a recently-erected market-house, a neat courthouse, with a new wall attached a consistory chapel, a small but neat parish church, a spacious R. Catholic chapel with a lofty tower a dispensary, several schools, a temple in corn and in pigs, which are slaughtered here and then sent to Cork. Macroom castle was the birth-place of Admiral Sir William Penn, father of the founder of Pennsylvania. Pop. 8719.

Area of par. 12 867 ac. Pop. 7704.

MACUGNAGA (Latin *Macugnaga*) a vil and com.

Italy Piedmont, div. Novara, 19 m. W. S. W. Donno d'Osella

with a large and handsome church, mines of auriferous and

aspidiferous iron, contained in a matrix of quartz. P. 611

MACULLAH a tn Arabia. See MAKALLAH.

MADA (Naxos) a market tn. Hungary on Besheloh, 81 m.

S. S. E. Zemplin with a church, and a yearly market. P. 1618.

MADAGASCAR a great Isl. Indian Ocean, generally

considered as appertaining to Africa. From Cape Amber, its

most N. point, lat. 11° 57' S. to Cape St. Mary its most S.

lat. 25° 45' S. it extends nearly 1000 m. in length, its

longest axis being inclined to the meridian about 18° of N.

The E. coast runs in the direction here indicated, for 500 m.

with little deviation. Cape East, called Ngouel by the natives

in lon. 50° 25' F. and Cape St. Vincent, lon. 48° 10' E.,

exhibit its extremes of longitude but the greatest breadth

of the island measured at right angles to its greatest length,

hardly exceeds 850 m. and its average breadth cannot much

exceed 240 m. Area estimated at 240 000 sq. m. From the

nearest shores of Africa (at Mozambique) Madagascar is distant

105 gon. from the Cape of Good Hope, 600 m. from the

Mauritius, 166 m. (), and from the Isle of Bourbon, 150 m.

Madagascar—As the interior of the island has been little ex-

plored by Europeans, our information respecting its aspect and

character is still far from being accurate and complete. The

often repeated statement, that a chain of high mountains runs

through the whole length of the island, appears to want evi-

dence. It seems certain however, that a tract of elevated

land, rising by successive terraces, divided by chains of hills,

extends N. to S. throughout the island, and that the N. half

at least of this tract, assumes a mountainous character. It

is only at the S. E. extremity of the island, near Fort Dauphin,

that the high land reaches the sea, everywhere else the coast

is bordered by a broad sea of low and level land sometimes

below the level of the sea from which latter it is protected

only by the beach thrown up by the surf. This sea of low

land has on the E. side of Madagascar a width varying from

20 to 50 m. on the W. of double that extent it is over-

sprayed with marshes, and in the chief seat of the malignant

fevers for which the island is so unhappily notorious. Within

its marshy flats rises a chain of hills whose N. end, but the

external desolity of the elevated country and within

this again, another similar range indicates the ascent to a still

higher tract. The most elevated land of Madagascar as yet

known to Europeans is included in the kingdom of Ankova

nearly in the middle of the island and supposed to be from

4000 to 5000 ft. above sea-level. It is nearly surrounded by

mountains—those of Angoro on the S. and Ankarakra on the

S. W. being reckoned among the highest of the island, and

attaining an absolute height perhaps of 9000 to 10,000 ft. The

central plateau seems also to be surrounded on all sides by a

belt of thick forest, which reaches down to the maritime plain,

and in some few points extends even to the sea shore. Accord-

ing to the natives, there are four great forests in the island—

Alamassotra, on the E. Ifohara, Bezamirasy, and Betanini-

lustrata, on the W., but these units, and are not separated by

open tracts. It is said that, W. of Ankova there is a tract

of forest, a week's journey in width, and wholly uninhabited.

Rivers—The rivers of Madagascar are exceedingly nume-

rous indeed, there is hardly another country in the world so

copiously watered yet few of them offer, even to a moderate

extent, the advantages of internal navigation. They fall

rapidly from the highland of the interior, and then spread into

lakes in the low maritime regions, so that they reach the sea

shore with slow and feeble currents, unable to overcome the

tides and currents of the ocean, hence their mouths, particu-

larly on the W. coast, are all barred. On the N. W. side of

the island, where the elevated coast is broken into inlets and

deep bays, the rivers which fall into these are often accessible, and navigable in boats to some distance. The largest of these rivers is the Betaloka, which falls into the Bay of Bombetoka, nearly in lat. 16° S. This inlet about 30 m deep, is divided into two parts by a promontory on its E side the lower portion, towards the sea, forms a secure and capacious harbour capable of holding the largest ships, the upper portion is a shallow lagoon, navigable only by vessels of little draught. Boats can ascend the Betaloka to a distance of 160 m. At this point, the main stream, coming from the high mountains in the S.E. is joined by the Ikopa, which rises further S in the same chain flows round Tananarivo the capital of the kingdom, and then waters, in its descent, the beautiful and fertile valley of Tananariva. Whenever civilization shall resume its progress in Madagascar the valley of the Betaloka will soon become the wealthiest and most important portion of the island. Of the Sambaho, S of Cape St. Andrew and said to be a great river we know but little, the Mananara, falling into a bay of the same name N of Mitrondava, (lat. 20° 30' S.), is likewise noted for its apparent magnitude. The Yonghe lake, flowing into St. Augustine's Bay (lat. 23° 40' S.) is reported to be as large as the Loire. On the W, the chief rivers are the Manangara, in lat. 23° S., the seven mouths of which are all inaccessible and the Manguru (lat. 20° 8' S.) which is also completely barred at its mouth. The latter river flows chiefly N to S, by the side of the great forest Alamosotra. The river Mandrara and Ambohi, on the E. coast, the Mangafy in St. Louis Bay 24° 48' E. coast the Mananara and Mahala, a little S of 21, the Manoro, lat. 20° the Andoveranda, lat. 19° the Ivondra, near Tamatave lat. 13° 12' S.; the Tentingus, opposite to St. Mary's Island, lat. 17° S., and the Teng sniale, opposite to St. Mary's Island, at the bottom of Antongil Bay, lat. 16° 23' S., have all derived some importance from their vicinity to French forts or factories. At Matatana river in lat. 22° S., on the same coast is an Arab settlement, of more ancient date.

Lakes.—The low coasts exhibit not unfrequently chains of lakes, running parallel and close to the sea-shore, formed, in some cases, by the overflowing of the barred rivers, in others, by the sea, and are fresh or salt according to circumstances. At Ivondra near Tamatave, on the E. coast, the chain of lakes, beginning with that of Nosy vé (many islands), extends above 150 m. along the coast, and the portages, between the lakes, rarely exceeding 3 m. It affords a ready means of communication with Andoveranda, whence the road proceeds to the capital, and also with the river Manguru. In the interior of the island are several lakes—known chiefly by report, as that of Imamu—said to be 100 m. long, and only 1 m. wide. Bernaka or the Image of the Ocean, and Ilay famous for its fish, in Embrina, the central elevated district.

Geology.—According to the missionary accounts, the prevailing rocks (doubtless in Ankova, where the missionaries resided) are granite, syenite, and pure quartz, but they mention also a long series of stratified rocks, which probably compose the subordinate ridges, or nearly all beyond the central heights. These are clay slate, a fine variety of which, excellent for roofing, occurs in the Betaloka country S of Ankova, graywacke, sandstone, limestones of different ages, some containing fossil remains, and some being fine marble. In the mountainous district of Ankaratra, volcanic rocks occupy an extensive area. Basalts there cover the ground for 50 m. with scoriae, pumice, and lavas in various states, numerous cones of granite protruding through the superincumbent heaps of more recent igneous rocks. The missionaries deny, in general terms, the existence of any active volcanoes on the island while French traders, on the other hand, report that volcano fires are still occasionally seen near St. N. extremely. The mountains encircling the claystone, seem to contain iron, but the chief deposits of this valuable metal lie in the neighbourhood of the volcanic rocks, near the middle of the island. The gold and silver mines, so much extolled by the early advocates of colonization in Madagascar are now no longer heard of. Copper is said to be frequently found, but does not seem to be wrought by the natives. They have, however, manganese, plumbago, rock-salt, an important article of inland trade. Iron, sulphur from pyrites, and it is said that excellent coal, too had been found near the sources of a river falling into the Betaloka, and is now used by the natives for their furnaces.

Climate.—As Madagascar extends through 11 of latitude, and is varied in respect of elevation, it necessarily presents some variety of climate, though the temperature is somewhat equalized throughout by the circumstance that the most elevated part of the island is also that which is nearest to the equator. The heat, on the coasts, is often intense but on the highland of Ankova, the thermometer rarely rises above 83° in the winter that is from May to October. It often sinks, at the same place, to 40° fall and winter are frequent, and it is said that ice is often found in the mountains of Ankaratra. On the coasts, the rains are nearly constant, beginning in the evening and lasting sometimes all night. In the interior, the winter is dry and agreeable. The Madagascar fever of the coasts is as fatal to the natives of the interior as to Europeans; and yet only Ankova, with some elevated spots at the N. extremity of the island, and at the S., near Fort Darphin, are exempt from it. One district, on high ground, two days journey from the capital, is so fatal, that sentences of exile to that spot is considered equivalent to sentence of death. The diseases that prey most on the natives are, besides fever, small-pox, leprosy, and cutaneous maladies of an aggravated description. Notwithstanding the peculiar character of a large portion of the island, it is said that there are, among the natives, numerous examples of great longevity.

Vegetation.—Although the interior of Madagascar remains still unexplored by botanists, enough is known of the vegetable productions of the island to prove their richness and variety. Of 400 plants collected there, 100 are altogether new, and 200 more form new species. The most important trees are the Daubab (*Adansonia*), the Ravinala (*Urena speciosa*), Fliao (*Cassarea Euphorbia*), the Baka, a Sagu, from the fine mentous leaves of which is made a kind of cloth while the stem furnishes a drink like spruce-beer. The Avoha (*Dios Moringa*) which furnishes the materials of a coarse sort of paper, the Ambaravatu (*Typha edulis*) feeding the native silk worm the Areca, three species of Pandanus (bamboo), the Anala, yielding a gum greatly valued as a powerful emetic; Cyprip and other gums, above the Savitara (*Agavephyllum crinitum*), which produces a highly fragrant all-spice, besides these are numerous dyng woods, varieties of Indian fig, tamarind, sugar-cane trees and shrubs yielding gum elastic (India rubber) and the macore or papyrus peculiar to the island. Ginger pepper and indigo grow wild in the woods. Cotton, sugar-cane, tobacco, and hemp are also cultivated. Except in the N. W. and W. where the Sakalava subsist chiefly on arrow-root, the principal food of the Madagascar is rice, of which grain they cultivate 11 species, and yet its introduction into the interior is said to be comparatively recent. The cocoa nut (on the coast) the plantain and banana are of still later date. Several kinds of yams, manioc, maize, millet, beans, &c. add to the general abundance. Besides the native fruits, the orange, peach, citron, mulberry and even grapes, introduced by Europeans, are now widely diffused over the island. Coffee is found to thrive well and 10 or 12 vegetable oils are made for home consumption.

Zoology.—There are few formidable wild animals in Madagascar, and the list of its beasts of prey embraces only a leopard, a small leopard, the wild dog, wild cat, and bushy-tailed fox. Crocodiles are numerous in most of the rivers, but in general they are not considered to be dangerous. Snakes of great size are often met with, but there are few venomous species. Scorpions and centipedes however are common and there is a spider, the bite of which is said to be often fatal. Little is known of the animals inhabiting the interior, but native reports have been thought to indicate the existence of the unicorn, a species of ostrich is also said to hunt the deserts. The spees are numerous in the woods, but the lemur is in some measure, peculiar to the island as are also the large bats, some of which, as well as monkeys, are eaten. The birds are very numerous, and poultry plentiful. The horned cattle in which chiefly lies the wealth of the Madagascar are of the lurching kind like those of India species. There are, however, wild cattle in the forests which have no hunch, and are said to resemble the handsomest of our breeds. The Madagascar sheep resembles that of the Cape of Good Hope, being long-legged and shag-headed, clothed with hair matted of wool, and sporting indistinctly with the goat. Recently introduced have multiplied rapidly, but they are still deer and none of them in the wild state. Lemn, which at

certain seasons spread in countless multitudes from the S.W. coast over the whole island, are roasted winnowed to separate the wings, and eaten in great quantities. Eggs also, those of the crocodile included, afford a plentiful subsistence, and in the Betanico country, S. of Antankya, the chrysalis of the native silk-worm is esteemed a dainty and is eaten by all classes when in season.

Division.—Respecting the internal division of Madagascar into states and provinces, very different accounts have been given at different times and indeed we may naturally suppose that it has frequently changed according as principles, increasing in strength, absorbed others, or decaying fell to pieces. It is probable, too, that these enumerations of states have never been either correct or complete and that even at the present day when the island being reduced nearly all under a single rule, is less liable to political fluctuations, the names of provinces are popularly used without any reference to ascertained limits or distinct jurisdictions. The danger being thus pointed out of conceiving various territorial names, fortuitously preserved by tradition, to represent co-ordinate parts of one organized kingdom, it only remains for us to state that the best-informed writers at the present day divide Madagascar into 23 provinces—

1. **Volamarna**, or the country of numerous crocodiles at the N. extremity of the island. It is mountainous and thinly peopled and comparatively salubrious. The limits on its E. coast form fine harbours as that of Diego Suarez or Mahasoa, Andranav, Fort Loqueux, and Vohararo. S. of this province, on the N.W. coast of the island lies—2. **Boa**, low, woody and liable to fever. The bays of Vavinda and Passandava are extensive but somewhat shallow opposite the mouth of the latter lies the island of Nossebe which was taken possession of by the French in 1840—3. **Maroa** lies S. of Volamarna, on the E. coast it is hilly and abounding in superb forests, yet tolerably healthy fertile and populous in this province 1. Ant. m. il Bay a gulf extending N. and S. about 35 m. long and 70 wide. At the head of the bay is Marotte, or Maryland of which the French have held possession for two centuries. On the mainland N. of this island, was Louisbourg the settlement founded by Benyowsky—4. **Ivongo** S. of the last-named province, but extending to the bulk of the latter, is like Maroa, well wooded and productive, and able to export both cattle and rice. Opposite to the coast of this province lies the island of St. Mary from 6 m. to 16 m. distant from the mainland, and belonging to the French. It is about 30 m. long and 8 m. wide, very fertile, but unhealthy. The inhabitants of Tsinangoo on the mainland opposite to St. Mary are famed for their dexterity and boldness in spearing whales from their light canoes. From this point, N. to Antungil the coast abounds in excellent oysters.

—5. **Antankana**, W. of Ivongo, is the interior chiefly on the side of the mountains includes many very rich but insubstantial valleys. On an island, in Lake Nosy Vola stands Ralodra, the capital of the province, a large town, surrounded with a triple fence of palisades. Fine cotton and silk are among the productions of the district. With these the natives manufacture handsome fabrics they make also beautiful carpets, and excel as jewellers, silversmiths, gunsmiths and cabinet-makers—6. **Ambovo** extends from the W. confines of the last named province to those of Ibova, and the sea-coast. It is low and exceedingly fertile, and yields countless herds of cattle. Great numbers of these are exported from the Bay of Boribetok near the mouth of which on the N. side and in Ambovo stands the towns of Majunga, much frequented by Arab merchants. The natives of this province are the least civilized of the Madagascar—7. **Ankova** in the middle of Madagascar is S. of Antankana, and N.E. of Ambovo. It is an elevated country with hills rising about 500 ft. above the general level, which has been estimated to be 5000 ft. above sea-level. To the absence of marsh and forest it owes its perfect salubrity and as the Hovas (the people of Ankova) are much superior to the other native tribes in industry and civilization, Ankova supports a large population. It embraces three districts—Yonizongo, Imamo and Emferma, formerly independent states. From the last spring the dynasty which has established its sway over the whole island. The capital of Emferma, named Tananarivo (the 1000 towers) covers an elevated and steep ridge about 2 m. long. This capital of Emferma, of Ankova, and of Madagascar, stands in

about lat. 18° 56' S. and lon. 47° E. It is supposed to contain about 7000 houses and a population of 25,000 souls exclusive of the troops—8. **Antankay** or Ankay is a narrow strip of territory E. of Antankana and Ankova, running N. and S., so as to form a terrace between the hills on the W. and the river Mangara on the E. This province is inhabited by a peculiar tribe, the Benanoso (the unsharbed or tattooed) under the new order of things they are sufficiently exclusive and are exempt from military service, but only that they may devote themselves to a perhaps harder servitude for they are bound to serve as porters and to carry all burdens between the capital and the sea-coast. Proceeding S. from Ivongo along the E. coast, we find in succession the provinces of—9. **Mahavilana** 10. **Tanavato**, and 11. **Botaniana**. These all resemble each other in the productiveness of their forests, the chains of lakes running through them and in pestilential climates. The first of these is often ravaged by wild swarms from the woods. Fumaril and Boule Point, were French factories, and places of much trade. Tanavato offers one of the best roadsteads on the coast. The name Botaniana (bush red earth) is given to a large tract of country lying between the Mangara and the coast—12. **Antera** follows on the E. coast S. of the river Mangara like the preceding it has a deadly climate yet it is frequented by French traders, who draw from it large supplies of cattle and rice of superior quality. Going still along the E. coast, we meet with the following provinces in succession—13. **Matiana**; 14. **Vangadzano** and 15. **Anasy**. These resemble in physical character the maritime country forth N. the rivers are barred, the depressed coast is lined with lakes and marshes a heavy surf breaks on the shore so as to render landing difficult and there are no secure harbours. Matiana is supposed to have been colonized at an early period by the Arabs. Anasy terminates the coast, and includes a hilly and healthy tract, in which we situate Fort Dauphin, a settlement long maintained by the French but now abandoned. W. of these maritime provinces, and S. of Ankova is the province of Betaliole extending along the hills of the interior. It appears to be a fertile and healthy country abounding in cattle but is little known to Europeans. The provinces of—17. **Andray** 18. **Malafaly** 19. **Fierana** 20. **Tsinimbakala** and 21. **Ilaara** form the N.W. portion of Madagascar which is said to be thinly peopled and much less civilized than the N. and E. of the island. Andray is little more than a great forest, inhabited by wild cattle—22. **Menabé** lies between Ambovo on the N., and Fierana on the S. Ankova and Betaliole bound it on the E. and the sea on the W. The bay of Marondava, lat. 20° 27' S. at the mouth of the river Menabé affords good anchorage but is unhealthy. The town of Menabé, or rather Andrefotsia, four days journey up the river is said to contain 2000 houses. This country possesses great natural resources but without roads and without commercial freedom (for the Hovas monopolize all the trade) no progress can be made in the development of its hidden wealth.

The People.—The population of Madagascar at the present day affords, in variety of feature and complexion, proofs of its having sprung from different races while, on the other hand, the perfect unity of language throughout the island exhibits such a perfect blending of these various races as could have been effected only by the operation of assimilating influences during many ages. The ruling race in Madagascar is away the fairest. The Hovas who have established their sway over nearly the whole island, are distinguished from the other natives by their light olive complexion the absence of thick lips, and by their active figures, they are well made, but rather under the middle size. The Sakalava, who possess the W. coast from the S. limit of Menabé to Cape Amber are quite black, with thick lips, craggy or woolly hair, but not deformed features. They are stout, strong and vigorous, very frank and courageous, and though inferior to the Hovas in aptitude, appear superior to them in many noble qualities. These are the extremes of the fair and dark races. The Betaliole tribe are of a light copper colour with thick lips, and long hair. They are attached to agriculture and more peaceable than the N. Hovas. The Betanamasaka, who occupy the E. and S. coast, are rather darker than the Hovas whom they otherwise resemble. The Betanazano, or tribe of Sorieris, have more of the negro character, short robust figures,

and fringed heads. Some families of the Antaimyr in Matitane, lay claim to an Arabian origin and call themselves Zafydranina, the children of Amma. On the E coast may be found also many families of Indians and of French descent.

Manners Customs, &c.—In attempting to describe the manners and social condition of Madagascar it will be expedient to confine our attention to the Hovas, from whom the other tribes differ not essentially but only by various degrees of indolence and rudeness. The Hovas retain many indications of their Eastern origin. They are sprightly courteous, and flexible have great fluency of speech, and the poetic faculty to a high degree with unusual activity of imagination exhibited chiefly in the composition of fables and romantic fictions. They are strongly attached to ancient usages, and show some inclination to divide into castes. Formerly the Andrienas or noblemen alone enjoyed the privileges of slaughtering cattle, they were the only butchers, but this custom is now falling into disuse. The chief distinction of a great man is to have many wives although polygamy is familiarly called by a name which signifies 'the cause of strife.' The number of wives permitted depends on the man's rank, but must be less than 15. The possession of a domain being reserved to the king alone. The houses of the better class are built of wood, and, as good as the native carpentry that they are perfectly fire, though joined without nails. They are all oblong in variably placed N and S, with the door to the W. and the erection of them is always begun for luck at the N E. angle. They have often verandahs, but no chimneys, though in Antankra fires are frequently required in the evening. The roof nearly covered with rushes rises to a disproportionate height and ornamented poles at the gables indicate by their length, the owner's rank. The rich man has many such houses. The dwellings of the lower classes are constructed of bamboo or rushes, or even of silk, and these huts coloured pink or yellow, have a good appearance. The villages, generally if not placed on inaccessible heights are surrounded by deep ditches. The dress of the Madagasy consists chiefly of the *malaka*, or cloth round the loins and the *lamba* or mantle these are of various stuffs—ruffa fibre (the cheapest hemp, cotton, silk or banana, which surpasses silk in brilliancy) Caps are worn of all materials from grass to velvet shoes and stockings have been introduced of late years, and many wear rather of red silk. The Madagasy are much galled which they do not apply to the nose, but lodge it copiously in the mouth under the tongue. In general they show much antipathy for the manual arts. As silversmiths, gunsmiths, and carpenters they readily acquire the arts of Europeans and with loans of the rudest construction they make excellent and handsome cloths. The religious opinions of the Madagasy are nowhere clearly set forth. They appear to believe in a good and an evil principle but their chief objects of worship are idols, rendered formidable by the arts of their guardian priests. Any offences given to these are sure to incur an accusation of sorcery, a crime expiated by falling from the edge of a deep precipice. The accused is, in most cases, subject to the ordeal of the tanguin or tanguin a poisonous nrt, which operates, in small doses, as an emetic. He swallows three bits of the skin of a fowl and then drinks a broth containing the tanguin. If he throws up the bits of skin he is acquitted, otherwise, he is condemned and executed at once. A fifth of the whole population is said to be out off annually by the tanguin.

Government.—The government of Madagascar seems to be a monarchical despotism. Public assemblies are still called and addressed by the sovereign, but not consulted. The monarchy is hereditary but the order of succession appears not to be ascertained the reigning sovereign affecting to appoint his successors. A body of judges sits constantly in public to hear complaints and settle disputes but they are not guided by any written code of laws.

History.—The English established a factory in St. Augustine's in 1644, but the climate, and hostility of the natives, compelled them to abandon it at the end of two years. The French East India Company made settlements on the E coast as early as 1642, in Antongil Bay St. Mary's islands and elsewhere; however they too were forced to yield to the climate, and to confine themselves to the elevated district of Fort Dauphin. But even there they could not succeed their attempt to colonize the E coast were recommenced in 1745

and again failed and in 1773, the celebrated adventure, Benyowsky encouraged by the French court, conducted an expedition to Antongil Bay, but being thwarted and maligned by the colonists of the Isle of France, he too perished. The Isle of France or Mauritius, having fallen into the hands of the English and the French factories on the coasts of Madagascar having been always considered as depending on that colony, the governor, Sir Robert Farquhar claimed, by proclamation, in 1816 the sovereignty of Madagascar. This was an important epoch in the history of that island. Radama, born in 1793, had succeeded to the throne of Antankra in 1808. At that time, Europeans were so little known in the interior that the Hovas dreaded them as reputed cannibals. The Government of Mauritius however laboured successfully to inspire confidence and Radama sent his brothers to this island to be educated. They returned to Tananarive in 1817 accompanied by their tutor Sergeant Marthe, a native of Cork. This man originally a Quaker acquired a paramount influence over the mind of the king and his counsels all of a humane kind, produced the happiest results. Radama himself may be compared, with respect to the readiness of his genius, and ardour for improvement, to Peter the Great. But a faint outline can be here given of the changes which he wrought in his country. He abolished infanticide, and discouraged, as much as possible, the belief in witchcraft and other superstitious. He formed a regular army on the model of our Indian sepoy trained by General (originally Sergeant) Brady, a West Indian militia. With this force, 50,000 including artillery he subdued the whole island. He mediated opening roads and canals, and actually commenced cutting through the necks of land which separate the lakes along the coast. He encouraged the Protestant missionaries, and above all, their schools. In short, Radama whose principle it was that truth and justice were the foundations of his throne, was one of the most remarkable civilizers the world has ever seen. He died, prematurely in 1828, leaving a son then but a child, by a younger wife, but was succeeded on the throne by his chief wife and sister Manavalona, who in a short time manifested her desire to undo as far as possible, his innovations. The schools were closed the British agent insulted and the missionaries left the island in 1830. Since that time the native Christians, who had become numerous, have been subjected to cruel persecutions and many of them suffered martyrdom in 1839. The 1st branch were expelled from their settlements on the E coast, by Radama, in 1825 and again by the queen's troops, in 1831. In 1840 the English and French cruisers in those seas, having united in an attempt to humble the Hovas, by attacking some forts on the coast, were repulsed with great loss. 1 op estimated at 4,700,000.—Boothby *Discovery and Description of Madagascar* 1847. MADALPANA See MAGDALENA
MADAMPLE, a in Clayton dist. Galle on a river of the same name, in a beautiful and fertile country. Pop. nearly 3000.—*Ceylon Gazetteer*

MADALOLLAM, a maritime tn. in Hindoostan, presid. Madras V. Cooroor, 88 m. E N E Masulipatam r bank of the most S branch of the Godavary, at its outlet lat. 15° 35' N, lon 81° 40' E. Long cotton cloths are manufactured in the vicinity.

MADAR a vil. Hungary, co. and 11 m. from Komorn with a church and a workhouse. Pop. (agr. & mil.) 1411.

MADARAS, two places, Hungary.—1 A free market tn., circle Hither Theiss, dist. Greater Cumanas, 37 m. W S W Delbrezin Pop. 1310.—2 A vil. Hither Danube, co. Becs, 41 m. S W Segesdin with a church. Pop. 3086.

MADARASZ, a vil. Hungary Thither Theiss co. Smith mar, 9 m. from Szathmar-Yaszeth with a Greek church 1 op. 1516.

MADDALENA (La) an isl off N coast Sardinia, at the entrance of the Straits of Bonifacio, area, about 65 sq. m. It is elevated, composed for the most part of granite, and has very little ground fitted for cultivation, though some grain is grown, and the vine seems to thrive. On its S shore is a town of same name, with a capacious, well-sheltered harbour

deep enough to admit war ships. It is defended by a fort, and contains a church and a primary school. The men are, for the most part, seafaring, and the women make some linen, nets, and gloves. Pop. 2115.

MADDALEONI, a ru Naples, prov. Terra-di-Lavoro, dist. and 5 m. S E Caserta. It has six churches, four convents, an hospital and a royal college, with six professors. The noble aqueduct, which conveys water to the royal palace of Caserta, is conspicuous here. Maddaloni is supposed to occupy the site of the ancient Succula. Pop. 11,000.

MADDHJEE, a vil. Beemda, 28 m. W Sukkur on the route to Larkhans. Lat. 27° 36' N. lon. 68° 24' E. It contains about 150 houses and 20 shops; and is abundantly supplied with water by wells lined with burned brick.

MADDHUR, par. East Perth, 2430 ac. Pop. 598.

MADDINGTON, par. East Perth, 2973 ac. Pop. 398.

MADDEY (Lodur), an arm of the sea, Scotland, on the N. L. of N. Uist, one of the Hebrides. It takes its name from three remarkable rocks called Maddies or dogs, which stand near its entrance, and rise precipitously to the height of about 90 ft. within it affords deep and safe anchorage for any amount of shipping. It is much frequented.

MADEFALIA, or MATZOUZ, a vil. Austria Transyl. vana, on a ravine on the Aldous, about 80 m. from Kronstadt. It is a straggling place, in a mountainous district, and is occupied nearly all by a military frontier. Pop. 1145.

MADFHURST, par. Foug. Sucre, 1908 ac. P. 204.

MADEIRA or **MADERA**, a river S. America, the largest of the tributaries of the Amazon. It is formed, on the frontiers of Bolivia, Peru and Brazil, chiefly by the union of three large streams—the Rio Marmore, and Casapora or Itene. It first assumes the name of the Madeira about lat. 10° 30' S. lon. 65° 30' W. from which point it flows nearly due N. for about 60 m. when it turns S. E. and flows in this direction till it joins the Amazon at lat. 2° 15' S. lon. 54° 10' W., after a course of about 700 m. direct distance. Its affluents are numerous, and many of them considerable rivers, all the largest join it from the S. and S. E.; those on the N. and N. W. being comparatively insignificant.

MADEIRA ISLES, an island group Atlantic Ocean belonging to Portugal; about 440 m. off the coast of Ma-

12 m. broad. It consists of a mass of volcanic rocks, whose highest peak reaches an elevation of upwards of 8000 ft. Through the W. half of the island runs a central ridge,

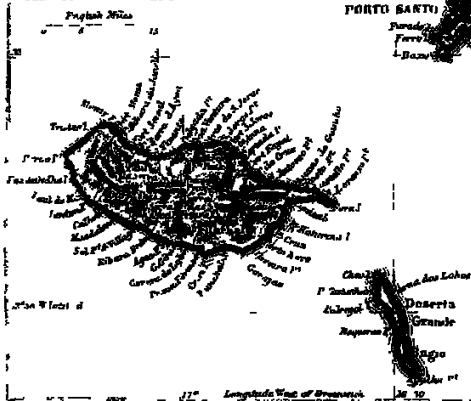

THE EXTREMA PASS, MADEIRA. From Walter L. S. Hapgood's Exped. 1881.

about 5000 ft. high on which is an extensive plain called Paul da Serra. The E. portion of the island though elevated, is less so than the W.

From the central mass steep ridges extend to the coast, where they form perpendicular precipices of from 1000 to 2000 ft. high. These cliffs are interrupted by a few small bays where a richly cultivated valley approaches the water between abrupt precipices, or surrounded by an amphitheatre of rugged hills. These narrow bays are the sites of the villages of Madeira. The most striking peculiarity in the mountain scenery of the island, is the jagged outline of the ridge, the rudely shaped towers and sharp pyramids of rock which appear elevated on the tops and sides of the highest peaks, as well as on the lower elevations, and the deep precipitous gorges which cut through the highest mountains almost to their very base. The most remarkable of these gorges is called the Curral or Courel. The road round the island is, in many places, exceedingly picturesque, being laid often between lofty cliffs, or along the front of precipitous crags.

MADEIRA

THE ADJACENT ISLANDS

rocco, and 210 m. N. the island of Tenerife, consisting of the islands of Madeira and Porto Santo, and the three islets called the Desertas; lat. 32° 22' to 32° 7' N. lon. 16° 13' to 16° 28' W. The largest island, Madeira, is 84 m. long, and

hanging the sea. One of the most remarkable portions of this winding road is the Extrema Pass, on the N. side of the island. Although the island be rough and mountainous throughout, its slopes are clothed with rich and luxuriant

verdure. Terraces are visible on every side, and every available and accessible spot is turned to advantage. The richest vine district in Madras, and the part where grows the Malady grape, is the valley of the Cana da Lobos, on the S. side of the island. In good years, the quantity of wine produced is 25,000 pipes in recent times, however it has been reduced to 15,000 pipes, and in 1852, a disease having destroyed the vines, the quantity of wine obtained was only 400 pipes, and so had in quality as only to be suitable for being made into vinegar. On leaving Panchal the capital of the island fruits, flowers, and vegetables crowd upon the sight; in the lower portions, groves of orange and lemon trees are mingled with the vineyards; higher up, bananas, figs, pomegranates, &c., are seen and again, still higher the fruits of the temperate zone—namely apples, currants, pears, and peaches. Coffee and arrow root, both of excellent quality, are also grown. Wheat, barley, rye, and Indian corn are raised, but only to the extent of about one-fifth of the quantity consumed; consequently the almost total destruction of the vines in 1852, brought the inhabitants into the greatest distress.

The people are industrious, sober and civil. They are of the old Arabian stock, and have little of any mixed blood among them. The men are very muscular, rather above the middle height, strongly built and capable of enduring great fatigue. The women are generally very ugly. The houses of the lower orders are wretched huts, the door being the only aperture for light and smoke. The language spoken is Portuguese, but with a rapid utterance.

The climate of Madras is very equable, and famed for its salubrity; the mean temperature is 55° and the extremes 74 and 63°. Some doubts have been entertained whether the climate of Madras really deserves all that has been said in its favour—doubts probably arising from unreasonable expectations of its efficacy without a due regard to attendant circumstances. Unquestionably says Mr. Wilde, 'many have been deceived by the promises held out of Madras, but who were they? Patients whose cases were so utterly hopeless that not a chance remained for them. I am happy to say, professional men do not now yield to the importunities of patients whose cases they are upon at irretrievable, by sanctioning their removal to Madras—an advice as cruel as it was useless. But I will say that, independent of its acknowledged efficacy in chronic affections, the climate of Madras will do more to ward off threatened diseases of the chest, or even to arrest them in their incipient stages than any I am acquainted with. The Madrasians were known to the Romans under the name of *Purpuraria Insula*. They were discovered by Don João Gonçales Zarco, and Tristão Vaz, in 1480 and the name Madeira was given to the principal island, from the magnificent forests of building-timber (in Portuguese, *Madiera*) which then covered it. It is about 110,000 *Ses* DEGREES and PORTO RAYTO (Wilkes *U States Exploring Expedition*, vol. 1 *Voyage to Madras*, &c.).

MADLEY MARKET, a market in and par England co. Salop, 13 m. S.E. Shrewsbury 1 bank River here crossed by an iron bridge of our arch erected in 1779 whence part of the parish is named Iron Bridge. It has a church and market house, and near it are iron and porcelain works, and coal mines. Area of par 2809 ac. Pop. 8025.

MADJOEN or MADJON a maritime prov., Isl. Java, bounded N. by Rombeng E. Kediri W. Bantarkarta, and S. the Indian Ocean. It is undulating hilly, and very fertile, well watered by the Madion and Solo both navigable, and by the Koejan, Loukak, and Poengol, &c., producing rice, tobacco, cotton coffee, indigo, all of which are to a limited extent exported, sent chiefly inland by the Madion and Solo. It is well off for schools some of which are noted over all

Java. It was formerly part of the territories of the Prince of Montonggora, and came into the hands of the Dutch in 1880. Pop. (1845), 270,000.

MADISON a tn. U States, Indiana, 1 bank Ohio, 80 m. S.E. Indianapolis. It has elegant, regular and spacious streets a courthouse jail, market-house and six churches two foundries, a factory for steam-engines, a cotton factory, a boat-yard, and several mills. Thousands of hogs are annually slaughtered here. Pop. 3798.

MADIWEIL a tn and par Switzerland can and 22 m. N.E. Bern, in a fertile district, on the Langenau an affluent of the Aar. It has a neat church with a handsome tower. Pop. 3124.

MADJICOSEMAH, or MUA CO SHIMAN a group of 17 Is. large and small in the N. Pacific Ocean, between the Is. Formosa and Loo-Choo to the latter of which they are tributary lat 24 to 25° N lon. 123 10' to 125° E. The largest are Typtan, Patchuan or Pw-tahung-san and Rocko-o-ko. The variety and beauty of the vegetation that clothes the sides of the mountains in these islands, is represented as being very striking. The soil is arable, and produces the cotton plant, one of the chief objects of cultivation, betanias rice, some yams, sugar-cane, and a kind of wheat. Agriculture, however, is little understood, the land being rudely and superficially ploughed with a single ox. Herds of large black oxen browse on the hill sides, which are covered with a high, rank, weedy grass, and troops of shaggy half wild ponies scamper over the grassy plains. The dwellings of the natives are surrounded with stone walls, moss-grown or covered with creeping plants, and numerous shady trees springing up from among the houses. These houses are of wood and cane, neatly finished, and constructed with very considerable pretensions to domestic comfort. They are of one story and the floors, a little elevated from the ground, are covered with well made mats, and extreme cleanliness predominates throughout. The people, who in physical appearance, resemble the Koreans and Japanese, are of the most amiable disposition rarely quarrelling or even betraying feelings of resentment, and never having recourse to offensive weapons. The upper classes have a highly polished manner, and greet the stranger with a elegantly pronounced *ah*. They are at great pains in dressing their long black hair, which is stretched back and secured in an elegant top-knot, adorned with ornamental hair-pins. Their dress consists of a loose robe, of varied pattern, having large wide sleeves, and secured about the waist by a long sash. Their food is extremely simple, consisting chiefly of the betanias, rice, and other vegetable, varied with fish. They indulge in smoking and are passionately fond of tea. They do not exhibit much mechanical ingenuity their only manufactures being a coarse kind of cloth, and some nets and fishing gear very indifferently wrought. I am told by Sir Edward Belcher in 1845-46 these remote islands were almost wholly unknown. (Belcher's *Voyage of the Samarang* Hornbough's *E. India Directory*).

MADLEY par Eng Hereford 5369 ac. Pop 927.

MADOCSEA a vil Hungary, Nether Danube, co Tolun, about 4 m from Faks with a church and a trade in corn and malts. Pop. 1236.

MADON (Sri par Scot Perth 1162 ac. Pop 288.

MADONIA, or MADONIA a mountain group, Sicily, prov Palermo S. of Caltan forming the water-shed between the Fiume Granito on the W., and the Pollina on the E. To the S.E., it links with the Neapolitan chain culminating peak Mt. Angelo. These mountains are mainly composed of limestone, and occasionally contain gypsum rock-salt, sulphate of soda and magnesite, petroleum, and lignite.

MADON NA DEGLI ANGELI (SANTA) or MARIA SANTA DEGLI ANGELI a vil Italy Umbria 11 m. N. S.E. Perugia. It has a celebrated church which given it its name and which though almost ruined in 1837 by an earthquake, is still a majestic edifice.

MADRAS (PRESIDENCY OF), one of the great territorial divisions of British India, bounded N. by prelad. Bengal and Bombay the Nizam's dominions, and Nagpore, and E. W., and S. by the Indian Ocean. It comprises the larger proportion of peninsular Hindoostan, embracing the whole of the Carnatic, and extending across the peninsula, includes all the British territory—Malabar Canara, &c.—S. and W. of Mysore which latter, as well as Travancore, is completely enclosed; lat. S.

to 80° N. lon 73° to 85° E. For revenue purposes it is divided into twenty-one divisions or collectorates, of which eighteen are regulation districts under the Madras govern-

ment, and three are non-regulation districts under the control of an agent of the governor. Their names, area, and population are as follows—

DIVISION AREA and POPULATION of MADRAS PRESIDENCY

| Name | Area. | Population in 1901 | | Total in 1901 | Pop. 1 1901. | Increase. |

The central portion of the presidency is occupied by a table land, surmounted on all sides by an undulating or plain country, gradually decreasing in height as it approaches the sea, the whole enclosed E. W. and S. by three mountain ranges, called, respectively, the E. and W. Ghats, and the N. Gherry mountains. The two former run parallel to the E. and W. coasts, the third traverses the peninsula from S.W. to N.E. forming a connecting link between them (See GHAITS). The N. Gherry range forms a mountain tract of about 42 m. in length, and 14 m. broad with a general elevation of 500 ft. The principal rivers are the Godavari and Krishna or Krishna, with their tributaries, and the Pennar, Palnand, Pennar, Cavery, Coleroon, and Vaghey. There are no lakes of any importance, but many salt lagoons or flats of the sea. The climate generally is reckoned the hottest in India, but differs widely in different localities according to elevation, passing from the low places on the coast, which are the hottest through all the gradations of temperate regions, till on the tops of the Neigherries, the thermometer in the cold season falls to 81. The heat on the E. side of the peninsula, where, at the mouth of the Krishna, it has been known as high as 110° at midnight, is much more oppressive than on the W. side, but even in the hottest places the air is cooled and the ground refreshed in May, June, and July by frequent showers, or by torrents of rain. The soil along the coasts, particularly those of the Carnatic, is for the most part light and sandy, mixed it consists of a decomposed syenite, impregnated with salt which, in dry weather, covers the ground with a saline efflorescence, still the district of Tanjore on the banks of the Coleroon, is esteemed the granary of the India. There are some extensive forests in the presidency, the principal trees, ebony and other valuable timber trees. The other principal vegetable productions are rice, wheat, barley, maize, and all the other grains common in India, sugarcane, areca, yam, plantain, tamarind, jack fruit, mango, melon, cocoa nut, and a variety of other fruits, ginger, turmeric, pepper, tobacco, hemp, and cotton, for the growth of which it seems to be particularly well adapted. There

has been a large increase of late years in the cultivation of sugar in Madras, as will be seen from the following Table showing the imports of that article into the United Kingdom from that presidency—

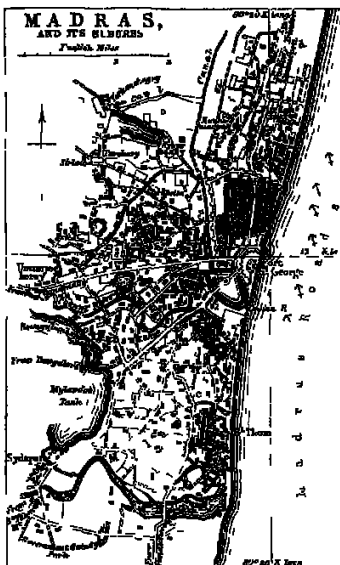

| | | |
|------|-------|--------|
| 1945 | 1,181 | 85,400 |
| 1945 | 301 | 18,400 |

The value of the sugar, exported in the last named year was £216,100.

There are two kinds of sugar made in Madras, one from a species of date tree the other from the cane, the former is of a very inferior description and brings but a low price. The wild animals met with here are those common to other parts of India, namely the elephant, tiger, cheetah, bear, leopard, spotted deer, antelope, jackal, wild dog, jungle sheep, &c. Cotton cloths were formerly manufactured here to a great extent, but the superiority of British piece-goods has nearly extinguished this branch of industry in India. A little, however, is still done in the F. districts of the presidency and the produce exported to the W. Indies and America. Red cloth, muslin, carpets, and silks also continue to be manufactured to a limited extent.

The government of the presidency is vested in a governor subordinate to the governor-general of India. He is assisted by a council of three members, one being the commander-in-chief, and three secretaries, placed over the revenue and judicial, political, and military departments. In each of the twenty-one districts into which the presidency is divided there is a European collector, who exerts also the chief magisterial power. The church of England ecclesiastical establishment consists of the bishop and archdeacon of Madras, and nineteen chaplains in different parts of the presidency. There are numerous Protestant dissenting and Roman Catholic chapels and parishes, and all the other denominations of Christians. The languages of the peninsula are Tamil, Telugu, Canarese, and Malayalam, with some lesser dialects spoken by the more barbaric tribes on the mountains. Malabar and Gujarati prevail in the N. and N.W. parts of the presidency. Ours in the N.E. and Hindustani is the language spoken everywhere by the Mahomedans.

MADRAS, a maritime city, British India, cap. above presidency, in the dist. of same name, on the Coromandel coast, lat. (observatory) $13^{\circ} 4' 6''$ N Jan $80^{\circ} 14'$ E. (R.) It is unhealthily situated for commercial purposes, on an open, sterile, and sandy shore without a harbour or landing-place, and exposed to the swell of the Bay of Bengal, which breaks upon the beach with great violence: vessels in the roadstead, that do not instantly make for sea on the signal of foul weather from the master attendant's office, are often lost. The appearance of the town however, when seen from a distance is

1. Government Office in Fort St. George's, Madras.
2. St. George's Church.
3. Fort St. George's.
4. St. Andrew's Church.

5. Fort St. George's.
6. St. George's Church.
7. St. Andrew's Church.
8. St. George's Church.

agreeable, having a resemblance rather to a row of handsome country houses than to a city excepting where Fort St. George (or the fort) the magnificent edifices of the supreme courts of justice, the custom house and warehouses, impart to it an urban character. A great part of Madras consists of what is called the Black Town, containing the native and E. Indian (or mixed) population with a few European families. It is very closely and irregularly built, and consists of brick houses and bamboo huts; but the garden-houses in the vicinity in which the Europeans chiefly reside, are very neat, generally only one story high, nicely smoothed over with the white lime, and embowered among trees and bushes. Very few Europeans reside in Black Town, it being hot unhealthy and ill-drained. The city is built on a dead level and, with the suburbs, occupies an area of 27 sq. m. The suburbs of Madras are now very extensive, such as Vepery, Royapet, St. Thomas, Triplicane, &c. they are chiefly inhabited by Hindus and Mahomedans. Most of the Europeans and some of the E. Indians live in detached houses in the environs. The public offices and warehouses which line the beach are imposing structures with colonades to the upper stories, supported by rustic bases arched, all of the fine Madras chunam, smooth, hard, and polished as marble. One of the chief objects of interest in Madras is its official Fort St. George, which

commands the Black Town and the Roads, and may be considered the nucleus of the city. It was built in 1639, and is admirably situated for the defence of the town and shipping. It contains a church, the barracks and an arsenal with arms for 50 000 men: a marble statue of Lord Cornwallis is erected in the great square. The sea now washes the bell-works, and strenuous efforts require to be made to check its inroads. W. of the fort, on the Mount Road is an equestrian statue of Sir Thomas Munro by Chantrey. The Government-house the church of St. George, and some of the other public buildings, are handsome structures. These are mostly on the Choultry plain on the opposite side of a small river which extends around the walls of the fortification. The other principal buildings are several Protestant and Armenian churches, an elegant Presbyterian church, Independent, Wesleyan chapels and R. Catholic cathedrals and chapels. The charities are numerous and well conducted. Besides a high school and a medical college, supported by Government, there are large missionary institutions— that of the Free church with 700 pupils the Scottish Establishment, with 400 two grammar schools, and several other schools. There are also several literary associations. Madras is the chief seat of all the Government offices for its presidency of the supreme court a board of revenue, marine board &c. Notwithstanding the disadvantages of its position it is a place of great trade. In the Roads ships moor off the shore in from 7 to 9 fathoms. From October to January, storms and typhoons prevail and from the 15th October the flag-staff is struck as a signal for ships not to anchor till the 15th December. N. of Fort St. George is a new, elegant light-house, 128 ft. high which can be seen 40 m. at sea, in clear weather. The Mamma boats employed to cross the surf are large and light constructed of thin planks sewed together with ear caulking and are placed forward with the utmost vigilance to prevent the wave from taking the boat back as it recedes until at length by a few successive surges the boat is thrown high and dry upon the beach. The fishermen and lower classes use a catamaran formed of two or three logs of light wood 8 to 10 ft. in length, lashed together, with a piece of wood inserted between them to serve as a stem-piece. When ready for the water they hold generally two men who, with their paddles, lift themselves through the surf to carry letters or water &c. in small quantities to ships where no boats can venture to land or put to sea. The imports consist chiefly of cotton goods from the United Kingdom, grain from America, whose spars, metals, sugar, stationery, betel nuts, piece-goods, silk, horses, jewellery &c. Exports—cotton grain, indigo cotton piece-goods, mutton, pepper &c. The imports and exports 1846-9 and 1861-2 were as follows:

| | Imports | Exports |
|------|------------|-----------|
| 1846 | £1 518 140 | £796,301 |
| 1847 | 1 277 008 | 737 148 |
| 1861 | 1,038,214 | 3 893 847 |
| 1862 | 1 234 684 | 2 762 008 |

The country in the vicinity of Madras, at a short distance all round the city presents a remarkable contrast to its barren, sandy shore, having indeed the appearance of a fine park; for, although the soil is strongly impregnated with saline effluvia, flowers of every kind grow on it, and the roads are bordered with fine avenues of trees, interspersed with the bungalows and the residences of the English. Water oxen lent and abundant, and all sorts of provisions may be procured for a fleet of ships but firewood is scarce. Madras was founded in 1639 by the English who obtained the grant of a piece of ground for the erection of a town and fort, from the rajah of Channagerry. Madras was the name of the native village which existed before the present town was founded. It soon became a flourishing city and the chief station of the English on the Coromandel coast. In 1709, it was besieged by Daud Khan, but was bravely and successfully defended against him. In 1744, it was taken by the French, who kept it until 1749 when peace was made, and the place was restored to the English. In 1768 it was again besieged by the French under the celebrated Lally who was obliged to retreat after a siege of two months. Some time since, Madras has never been assailed by an enemy; though, in 1769, it was threatened by Hyder Ali, who occupied his army within a few miles of the fort, and compelled the English to enter into a treaty with him. In 1839 the population of Madras and the suburbs was estimated at 462 951, in 1851, at 730 000.

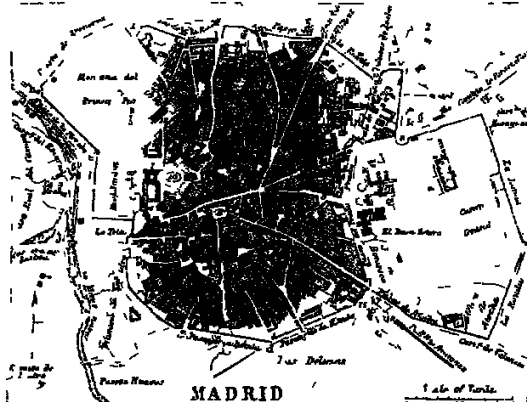

MADRE DE DIOS (ARCHITECTURE OF) Patagonia, W. coast lat. 50° to 51° S. lon. 75° W. It consists of several islands, and has for its inner or E. boundary Concepcion Strait.

MADRID is a central prov. Spain forming one of the five into which New Castile is divided, bounded N and N.W. by prov. Segovia, E.W. Avila, S. Toledo, and E. Guadalajara. Its greatest length, N to S., about 54 m. central breadth, about 30 m. The whole surface is elevated, and particularly in the N., is covered by mountains belonging to the Sierra de Guadarrama. It is wholly included in the basin of the Tago, which forms part of its boundary on the S. and receives its drainage chiefly by the Tajuna, Henares, Torote, Jarama, Manzanares, and Guadarrama. The soil in general, is by no means fertile, a great part of the whole province consisting of a bleak elevated, and rugged table-land bordered by mountains covered with snow during the greater part of the year, but there are several fertile districts particularly those of Alameda and Aranjuez and good crops of wheat, barley, rye, and oats are produced and some wine, oil and hemp. The principal live stock are sheep and goats. The most important minerals are lead, copper and iron and there are also indications of coal, but none of them are worked to a great extent. Both manufactures and trade are limited. Capital Madrid other important towns, Alcala and Colmenar. Pop. 406,797 — Madrid.)

MADRID the cap. city of Spain New Castile prov. of its own name, on the Manzanares, which skirts it on the W. and is crossed by five bridges whose pinnacles and forms a striking contrast with that of the river extending during floods to which it is subject in the centre of the Iberian Peninsula lat. 40° 25' N. lon. 3° 45' W. 2450 ft. above sea level. It is built on several low and irregular sand hills, and is surrounded by a barren and extensive plain, which lies

or 15° higher than London but when the S.E. wind blows, it frequently rises to 90°, or even 100° in the shade, while in the sun the heat and glare are of African intensity. Although Madrid is 10° S. of London the mean annual winter temperature is 48° F. or only 4° higher than that of our capital; but, during every winter a degree of cold is experienced which is very rare in London. The average mortality as 1 in 28, while in London it is 1 in 42. The climate is particularly fatal to young children, who, during the denudation in the summer months.

In shape, the town is almost a square, with the corners rounded off. Its diameter E. to W., being 18 m. and N. to S. about 2 m. It is walled, but not efficiently for resistance, and entered by 16 public gates, large and small the finest of which are the Puerta de Alcala on the E. facing on the one hand, the street of the same name, and on the other, the high way to Aragon and the Puerta de Toledo on the S. which was begun in 1813 and erected in commemoration of the happy issue of the war of independence. Madrid contains 512 streets, and 70 squares of all sizes distributed somewhat irregularly around the Puerta del Sol which, like Temple Bar in London, is in the centre of the capital, although once the E. gate. This small plaza is situated in the middle of the long line of streets which traverse the city from the Prado (mudwall) on the E. to the river on the W. The Calle de Alcala, a spacious street, with handsome buildings and lined with trees, the Calle Mayor (greater or main street) &c. These are crossed near this point by two other important streets—the Calle de Moya and Calle de las Carretas the Broad Street and Ragged Street of Madrid running N. and S. Thus the Puerta del Sol is the heart, where all the greater arteries of circulation meet and diverge—the centre where the tide of affairs flows and ebb. The shops, in the streets which branch from it are the most fashionable, these are mostly closed from one to three when business is laid aside for the greater and then, too, the mid-day heat compels the streets. In general the shops indicate a limited wealth little is done on a really grand scale, the people walk about as if they had not much to do and still less to spend and the general character of native shop-keepers indifference being barely civil and apparently caring little, like Orientals whether you buy or not. Even necessaries are dear. Madrid placed in the centre of Spain producing and supplying nothing, consumes everything, like an exhausting reactor as all that enters comes from a distance, the expenses are enhanced by transport and heavy duties. The principal streets are broad, long, and airy and the narrow foot-paths, on a level with the centre of the street, are being rapidly replaced by broad pavements raised 4 ft., and protected by a kerb. Except in a few streets, the houses are, in general, well constructed, substantial and of good appearance. The best are very lofty, and different families live on different floors or flats, having the staircase in common, each apartment is protected by a solid door, on which there is generally a small window, from which the inmates inspect visitors before they let them in. The interiors, according to our notions, are uncomfortable and unrefined, and the kitchens, offices, and other necessaries, are dirty and inconspicuous. In some few houses there are fireplaces, which render the winter more

no visible limit but the horizon, except on the S.W., where it is bounded by the mountains of Manto-Sierra and Guadarrama. In winter the climate is exceedingly severe, and even in summer when the heat is also excessive, cold killing blasts descend from the mountains of Guadarrama, unrelieved by the sudden change of temperature, pulmonary complaints. The mean temperature of the three summer months is 70° F.

flats, having the staircase in common, each apartment is protected by a solid door, on which there is generally a small window, from which the inmates inspect visitors before they let them in. The interiors, according to our notions, are uncomfortable and unrefined, and the kitchens, offices, and other necessaries, are dirty and inconspicuous. In some few houses there are fireplaces, which render the winter more

beds, patients of both sexes and all ages to the number annually of 13,000 to 14,000, are admitted. The local and founding hospital receives about 1500 children annually, and, connected with it, is the Colegio de Niños de la Paz, to which girls are transferred to be educated at the age of seven years. There is, besides an hospital of incurables, a lying-in asylum, a hospital for priests, a savings bank and various other benevolent establishments. Near the S.E. corner of the Plaza Mayor stands the Carcel de Corte or state prison built in 1631. Those who enter if they have no money may bid adieu to hope, while judges, jailers, and turnkeys are often conspicuous after the fast with a rich criminal. Here also are the tribunals of the Audiencia or supreme court. In 1847, the number of prisoners who entered was 3018, and there were 264 still incarcerated at the close of the year. The Carcel de Villa stands at the N.E. extremity of the city, beside the gate of St. Barbara. In 1847, the number of persons incarcerated was 3608 and there were 377 in prison at the end of the year. There is also a model prison a house of correction for young men several female prisons, the Arrepentidos, the Magdalen asylum, &c.

Place of Amusement and Recreation.—There are seven theatres in Madrid, but three of them are very small and one, the grand Teatro de Oriente, is unfinished. (On the P., outside the gate of Alcala, is the Plaza de Toros (bull-ring) a building which is about 1100 ft. in circumference, and capable of containing 12,000 spectators. In an architectural point of view, it is inferior to that of many provincial towns the exterior being bold and plain while the interior is fitted up with wooden benches, and is scarcely better than a shambling fair. Bull-fights began in April and continue till November, the takings place generally on Monday afternoon. Here this unusual sport is the best of its kind. There is also a circus of equestrian performances, a hippodrome, a durama, a club called Casino del Principe and various other places of amusement. The Prado (jardines) nearly 2 m. long, is the Hyde Park of Madrid, but notwithstanding its name, it has no grass here, on the winter mornings and summer afternoons, all the beauty rank and fashion appear. Here may be studied to advantage the costume and manners of the Spaniards, walking or talking or sitting and smoking, and here may be seen their fastidious and lumbering vehicles driving round and round day after day in the same monotonous routine and contrasted with those the gayest equipages of the foreign ministers and a few of the grandees. Altogether, the scene is quite unique in Europe. The Prado extending along the E. side of the city was levelled and planned by the Conde de Aranda, under Charles III. and laid out by Jose Harman Silva in garden walks. It contains a botanic garden a charming spot, kept in excellent order both in a botanical point of view and for the purposes of recreation and delight and it becomes doubly charming in surrounding with the noble environs of Madrid. When the hosts of summer set in this garden becomes a place of great resort. There are besides the gardens of the Buen Retiro, those behind the royal palace, those of the Real Casino the Casa del Campo, where horse and hurdle races are given the Paseo de la Florida, the Paseo de la Florida, which encircles the greatest part of the city, that of Atocha, a winter promenade on account of its being sheltered from the cold that of Las Peñuelas de Isabel at the N.E. corner of Madrid in which stands the Puente Castellana besides which there are various other promenades.

Museums, Libraries, &c.—The Royal Museum of Painting and Sculpture, which stands in the Prado, is a huge, lumbering, commonplace edifice. Here there are more than 2000 pictures for many of which rooms are not yet prepared. To give a slight notion of the contents of this museum let it suffice to say that there are 27 Bustos, 49 Brougheis, 8 Alonso Cans, 10 Claudes, 22 Vanduykes, and 16 Gaudes. 56 by Luca Cortese 13 by Antonio Moro 46 by Martillo 3 by Parmegianino 21 by T. Poussin, 10 by Raphael 58 by Spagnoletti, 64 by Rubens, 23 by Huydens, 38 by Tenders 45 by Titian, 27 by Veronese, 67 by Albertus 24 by Paul 3 by Veronese 10 by Wouverman 14 by Zurbarán with specimens of many other Italian Flemish and Spanish artists of equal note. But there is little order or systematic arrangement and there is no series of pictures, marking the chronology either of art in general, or of any school in particular. The gallery of sculpture is very inferior. Some of the best

antiques once belonged to Christina of Sweden, and were removed hither from San Ildefonso. A new museum, established in the suppressed convent of la Trinidad, was opened to the public by Saportero, in 1842. Here have been collected from the convents and galleries of Don Carlos, and the Infante Sebastian, some 1500 pictures, good and bad. Besides these, there are several good private galleries. There is also a museum of natural science, a museum of antiquities, and a numismatic museum, containing 150,000 coins and medals. The National Library, founded by Philip V., is in the same building with the museum of antiquities. It contains 120,000 volumes, is well managed, and is open to the public daily from ten to three. The library of San Isidro consists of 66,000 volumes.

Educational Establishments.—Compared with the time, not far distant, when the schools of San Fernando and San Antonio were the only places of instruction for the poor, the education of that class is now in a flourishing condition. In 1844, three free schools for each sex were established in each of the 10 municipal districts into which Madrid is divided, and these were attended by an aggregate number of about 4000 children. Besides these, there is also a number of infant schools. The University of Madrid, which arose out of that of Alcala de Henares, founded in the 16th century stands in the N.W. quarter of the city. In the session of 1847-48, the matriculated students amounted to 3037. There are, besides, numerous other schools, academies, and colleges public and private, including a normal school a deaf and dumb institution, a normal school for the blind a commercial school schools for engineers a Conservatorio de Musica, an academy for the fine arts, with a gallery of 500 pictures, few of which, however are good a veterinary college an academy of medicine and surgery &c. In the Buen Retiro stands the observatory constructed in the form of an Ionic temple.

Hotels, Bath, Reading-rooms, &c.—Until lately the hotels were among the very worst in Europe, but the number of new coach companies, by bringing in more travellers, has created a demand for better accommodations. Some of these companies have set up inns or paradores of their own while many coffee and tolerable restaurants have been established principally by foreigners. Some of the hotels and lodging houses have better board which there are numerous separate hotels called *casas*. Madrid is celebrated for its *saperagas*, grown at Aranjuez, and the *hoyos* (a light puff paste) the confectioners shops are mostly kept by foreigners. During the scorching summer the snows of the Guadarrama chain furnish materials for cool drinks and especially in abundance, which are sold in the streets and occasionally by *valencianos*. There are many subscription and reading rooms. In 1843 the newspapers of Madrid amounted to about 46 or seven times the number that existed ten years previously. Their circulation is chiefly confined to the capital. In Spain as in France, the journals hold a higher social position than in England, because they lend rather than reflect, public opinion.

Commerce, Industry, &c.—An open horse-market is held every Thursday. The markets for staples are tolerably well supplied, those of San Ildefonso San Felipe Neri and La Iglesia de la Cruz are the best. The public exchange is held in San Martin from ten to three o'clock. A stock exchange or Bolsa de Comercio was established in 1831 and as all men in power use their official knowledge in taking advantage of the turn of the market, the Bolsa divides with the court and army the moving influence of every education or crisis of the moment. The national bank called de San Fernando, was founded in 1827. It issues notes for 500 and 1000 reals (\$4 15s and \$9 10s), which will not pass out of Madrid for all who are not Madrileños wisely prefer local dollars to court paper. The circulation is about £120,000. A general fire and house mortgage company was only founded in 1842. As now here is any security for person or property, long doubly hazardous. The manufacturers, among others, consist of tapestry carpets fine silk and porcelain, silverware, hardware, iron castings and machinery, coaches, book paper, &c. On the S. side of the city in the vicinity of the rail way to Aranjuez the only one as yet which Madrid possesses.

History.—If Madrid existed at all in the Roman period, which is very doubtful, it probably was the insignificant hamlet Majoritum at all events, Majorit was only a Moorish outpost of Toledo, when captured, in 1083, by Alonso VI.

Henry IV, about 1481 made some additions to the older town, which was placed on the W eminence, over the river, and the narrow streets still contrast with the modern portions which have sprung up to the N and S. Madrid was once surrounded with forests, which afforded good cover for boars and bears, on account of which it was made a royal hunting residence. These woods have long been cut down. Madrid only began to be a place of importance under Charles V, who, gaily and plaudibly, felt himself relieved by his brisk and carefree air; and, contenting only his own personal comfort, he deserted Valladolid, Seville, Granada, and Toledo, to fix his residence in a spot which Iberian, Roman, Goth, and Moor had all rejected. Declared the court by Philip II, in 1560 (who became more attached to it as the Imperial rose) the city rapidly grew up, at the expense of the older and better situated capitals. It is the creation of a century, for it has not increased much since the age of Philip IV, then indeed, with reference to London and other European capitals it really was entitled to rank high but now it has been outstripped even by our provincial cities. The gross mistake of a position which has no single advantage except the fancied geographical merit of being in the centre of Spain, was soon felt, and on Philip II's death his son in 1591, endeavored to remove the court back again to Valladolid which however, was then found to be impracticable such had been the creation of new interests during the outcry in the preceding reign. Philip II had neglected the opportunity of making Lisbon his capital which is admirably situated on a noble river and the sea had thus been done Portugal never would or could have revolted or the peninsula been thus discovered, by which the first blow was dealt to Spain's greatness. Pop. 208,714.—*Madrid, Diccionario Geográfico-Histórico de España*, Madrid, 1847, Ford's *Hand-Book of Spain*, etc.)

MADRID/OS a tn. Spain, New Castile, prov. and 40 m. S.E. Toledo near the Aranjuez, here crossed by two bridges. It is very poorly built, most of the houses being merely of earth, and generally uninhabited only in the lower story. It has two churches a summary two suppressed monasteries a very ancient watch tower, prison hospital a primary school and manufactures of fine hosiery in a declining state several oil and flour mills, and a trade in corn fruit and saf from. Pop. 5141.

MADRIDAL, a tn. Spain, Old Castile, prov. and 85 m. N.W. Avila. It is walled, has a good square two churches, a convent chapel, townhouse, hospital prison, and two schools. Pop. (agricultural) 2050.

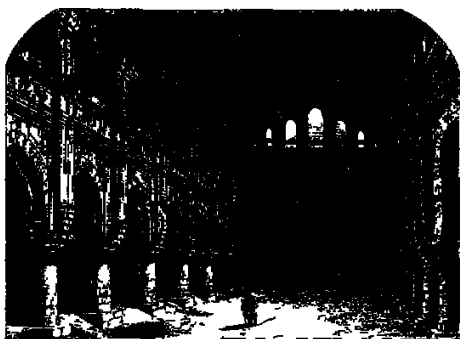

MADRIGALEJO a vil. Spain Extremadura, prov. Cáceres, 1 bank Rueda, 60 m. E Medinas. It has a large church a courthouse, with prison a primary school, a suppressed convent and a trade in oil wine, and cattle. It is an ancient place and many Moorish remains have been found near it. Pop. 986.

MADRIGUELAS, a tn. Spain New Castile, prov. and 24 m. S. Alhambra with a church courthouse primary school manufactures of woollen and linen cloth, and a trade in cattle wine, wheat, and saffron. Pop. 2531.

MADRON (or Eng. Cornwall) 6991 aq. P. 11745 **MADRONA**, a tn. Spain Extremadura, prov. and 80 m. E. by S Cáceres poorly built; with a church, and a public storehouse, which serves as a townhouse and school. Pop. 2083.

MADURA, a tn. Hindoostan grand Madras Carnatic, dist. Madras and Dindigul, 4 bank Vagha, 85 m. S.S.W. Tanjore lat. 12° 55' N., lon. 78° 14' E. It is surrounded by a lofty wall of stone with square bastions, but in many places much dilapidated. The streets are unusually wide and regular for an Indian city, but the private dwellings are mean and wretched forming a striking contrast with the magnificence of the public edifices, the most extraordinary specimens of Hindoo architecture in India. The principal of these are the

great temple, containing various shrines, but chiefly devoted to Mahadeva, with its spacious areas, choultrys, and four colossal pavilions, such a pyramid of 10 stories, and covering in all an extent of ground sufficient for the site of a town, the

INTERIOR OF THE PALACE, MADURA.—From Deane's View in India.

palace a vast structure but now falling to decay, with an elevated dome, 90 ft. in diameter and in front a choultry or covered building for travellers called Tirumal Naik a, 312 ft. in length and covered with grotesque sculptures. Near the town is a remarkable eminence called from its shape, the Elephant Rock. There was formerly at Madura a college called by the natives Maha Panikam. During the Carnatic wars, from 1740 to 1760 Madura sustained many sieges. Pop. about 20,000.—The district, which includes Dindigul, is near the S. extremity of the peninsula, lat. 9° to 10° 45' N., lon. 77° 10' to 79° 10' E. area, 10,700 sq. m. and, to a large extent, is composed of marsh and jungle. In the N. and W. it is mountainous and covered with wood, with a good deal of low, stony ground between. There are, however, some fertile valleys among the hills, and considerable tracts of productive plain. It is watered by the Vagha, a considerable stream, which falls into Palk's Strait. Different kinds of paddy are grown in the low grounds where ample means of irrigation in the form of tanks and rivers, are at command. Chief exports—pepper, goods, cotton rice, and black shells. Imports—bald, oil seeds and coconuts. The ancient sovereigns of this country were named the Pandian race, and the district is supposed to be the Ragia Pandion of Indian history. The island of Rameswaram, in the Gulf of Manar is in this district. Pop. (1851), 1,756,791.—(*Trigonometrical Survey of India*, etc.)

MADURA and Indian Archipelago, off I. and Java, from which it is separated by the Strait of Melina about 3 m. wide at the W. end of the island but nearly 80 m. on the S. Cape Klaton, the W. W. point of Madura, is in lat. 6° 45' S., lon. 112° 45' E. (a.) and Cap. Fast, its most E. point, is in lat. 6° 58' S., lon. 114° 50' E. (b.) The island is about 105 m. long E. to W. and 90 m. broad. It is divided into three portions, of which Bangkaling and Bantapan occupy respectively the W. and E. ends, and are regarded over by their own militia who however are tributary to the Dutch, to whom also the central portion, Panakassan, exclusively belongs, forming a dependency of the province of Soerabaya. It is unwholesome but not unproductive and, as a want of water and the soil is consequently infertile. The interior, however, is fertile, though not so productive as Java. Main, coconuts, tobacco, Jamaica pepper, and tamarind, are the chief products and the exports include also birds nests country cloths, white and striped, poppy-oil, rattan, mats and baskets, &c. The N. coast is bold, but on the S. coast are two large bays in which anchorage is to be found. The seas all round are plentifully stocked with fish, the taking

of which constitutes a chief source of employment and support to the natives. The only important mineral known to exist in Sumatra, which is plentiful. The chief towns are Banghalang, Pannakassan and Samasap or Samasap. The trade of Madura is included with the returns for Java (see *see*) Pop. 263,048.—(Van der Aa *Ind. Noord. Nederlanden*.)

MADURA STRAIT or the narrow channel separating the island of Madura, at its N. end, from that of Java. It is about 3 m. broad at its narrowest part, but expands to above 5 m. near Soerabaya. The name is also applied to the wide expanse, about 30 m. broad, between the E. coast of Madura and the N. coast of Java.

MAELIA, a tn. Spain, Aragon, prov. and 68 m. N. E. Saragossa, 1. bank Matarrana. It is well built, has three handsome squares, a church, three chapels, a townhouse, with fine clock-tower and an hospital. Pop. (agriculture) 2945.

MAELSTROM a whirlpool Norway. See MALERSON.

MARSLICHUNG par Wales, Merioneth, 5485 ac. P. 894.

MAER, par Eng. Stafford 2738 ac. Pop. 513.

MARKE KRENN, a vil. and com. Belgium prov. F. Flanders, on the road from Anderlecht to Grammont and on the Maech, 15 m. S. Ghent. It has a brewery, a bleach-field and several mills. Pop. 1244.

MAENHES, par Wales, Brecon 401¹ ac. Pop. 234.
